Hunters, up to any weight: 1, Mr. Thos. Pearce, Long Ashton; 2, Mr. G. F. Tilley (Elegance); r, Mr. Jim Tilley, Axbridge (Shamrock). Hunters, four years old: 1, Mr. Thos. Pearce; 2 and 3, Messrs. Flower and Mattick, Ston Easton; r, Mr. G. F. Tilley (Elegance). Jumpers, local, any age or height: 1, Messrs. M. and G. E. Ponting, Hewish (Nemo); 2, Mr. G. F. Tilley (Fear Not); 3, Mr. W. T. Weaver, Dunkerton, Bath (Kitty); r, Mr. W. H. Churches, Hewish (Violet). Hacks, local, no restriction as to age or height: 1, Mr. G. F. Tilley (Elegance); 2, Miss E. C. Nicholetts (Pompey); r, Dr. J. Fuller (Lady Louise); Mr. W. L. Rowley, Huntspill (Ruby). Cob (in saddle), not to exceed 14½ hands: 1, Dr. J. Fuller, Long Ashton (Lady Louise); Mr. M. Pope, Banwell (Lottie); r, Mr. G. S. Lysaght (St. Blaise). Mare or gelding, any height: 1, Mr. G. S. Lysaght (Lady Brompton); 2, Mr. Joe Wilson, Weston-super-Mare (Khaki); 3, Mr. H. E. Ball, Backwell (Gaer); r, Mr. F. Cousins, Weston-super-Mare (Countess); c, Mr. William Butler, Kewstoke (Rufus); c, Mr. H. J. Castle, Banwell (Jessie). Four-year-old harness horse, not under 14 hands 2ins.: 1, Mr. W. T. Plimpen, Kewstoke (Pretty Boy); r, Mr. Walter Brice, Wedmore (Tom). Pony, not to exceed 13 hands: 1, Mr. Harold V. James (Ragged John); 2, Mr. Robert Bailey, Bristol (Game Bantam); 3, Mr. A. Anthony, Shipham (Cricket); r, Mr. H. J. H. Baber, Weston-super-Mare (Sunbeam). Colt, gelding or filly, under two years: 1, Mr. G. F. Tilley (Fidget); 2, Mr. E. J. Edwards, Yatton (Lady Day); 3, Mr. James G. Wallis, Kewstoke; r, Mr. Sidney Hill, Langford. Gelding or filly, under three years: 1, Mr. Ernest Dewdney, Chewton Mendip (Watchman); 2, Mr. W. J. H. Porter, Wedmore (Lord Roberts); 3, Mr. G. F. Tilley (Woodranger); r, Mr. John Sadler, Weston-super-Mare (Prince). Mare with own foal at foot: 1, Mr. John Sadler (Queenie); 2, Messrs. J. and S. Burdge, Cross, near Axbridge (Maggie); 3, Mr. E. J. Edwards; r, Mr. G. F. Tilley (Princess). Gelding or filly, under four years: 1, Mr. Ernest Dewdney (Midday); 2, Mr. Mutford Millard, Wedmore (Dolly); 3, Mr. Sidney Hill; r, Mr. R. C. Tilley (Stella). The Hackney Horse Society's silver medal for best hackney or pony mare or filly: 1, Dr. J. Fuller (Bonnie Belle); r, Mr. G. F. Tilley (Elegance). Sucking colt: 1, Mr. G. F. Tilley (Brunette); 2, Mr. John Sadler (Perfection); 3, Mr. G. F. Tilley (Topthorne); r, Mr. G. F. Tilley (Whitesocks). Cart mare, with own foal at foot: 1, Mr. Gilbert Williams, Winford (Regilbury Flower); 2, Sir W. H. Wills, Bart., M.P., Blagdon (Jolly); 3, Mr. James Gibson, Langford (Clematis); r, Mr. W. H. Brake, Bawdrip, near Bridgwater. Cart gelding or mare, any age or height: 1, Sir W. H. Wills, Bart. (Scarsdale Marabon); 2, Mr. Jamse Webber, Puxton (Miss Xerxes); 3, Sir W. H. Wills, Bart. (Jolly); r, Sir W. H. Wills, Bart (Rickford Lady Harold). Cart gelding or filly, foaled in 1896: 1, Mr. James Webber (Miss Xerxes); 2, Mr. Thomas Chapman, Kewstoke; 3, Mr. Henry Macey, Brinsea, Congresbury; r, Mr. Gilbert Williams, Winford (Regilbury Champion). Yearling cart colt, gelding or filly: 1, Sir W. H. Wills, Bart. (Rickford Jewell); 2, Mr. W. N. Tilley, Huntspill; 3, Mr. W. H. Brake; r, Mr. Robert Hicks, Hewish. Sucking cart colt: 1, Mr. W. H. Brake; 2, Mr. S. A. Hooper, Huntspill; 3, Mr. Henry Macey; r, Mr. James A. Hicks, Weare; hc, Mr. Gilbert Williams (Regilbury Beauty). The Shire Horse Society's medal for the best Shire mare or filly: , Sir W. H. Wills, Bart. (Scarsdale Marabon); r, Mr. James Webber (Miss Xerxes).

CATTLE.

RESTRICTED CLASSES.

Pair of fat oxen or steers: 1 and 2, Mr. Thomas Chapman, Kewstoke; r, Mr. C. Tilley, Badgworth. Pair of fat heifers: 1, Mr. T. Chapman; 2, Mr. S. Harding, Hewish. Bull of any age: 1, Mr. Herbert Frost, Winscombe (Red Prince); 2, Mr. John Burdge, Claverham Court (Baron Blagdon IX.); r, Mr. A. Criddle, Locking (Langford Lad); c, Mr. W. Phippen, Woodspring Priory (Ambassador). Bull under two years: 1, Mr. W. Young, Langford (Victor Boy); 2, Mr. James Butt, Lympsham (Ernelo); r, Mr. W. N. Tilley, Huntspill (Prince). Pair of dairy cows, in milk: 1, Mr. Robert Clapp Weare (Muddler II. and Muddler III.); 2, Mr. H. Edwards, Banwell (Pretty and Beauty). Dairy cow, in milk: 1, Mr. H. Edwards (Dairymaid); 2, Mr. J. F. Day, Lympsham (Cherry). Pair of heifers, in milk, above two and under three years: 1, Mr. Robert Clapp, Weare (Bluebell II.); 2, Mr. S. Harding, Hewish. Three-year-old heifer, in milk: 1, Mr. W. Young, Langford (Fuchsia III.); 2, Mr. W. T. Phippen (Pink). Pair of yearling heifers: 1, Mr. Robert Clapp (Bluebell III. and Muddler V.); 2, Mr. Robert Clapp (Fancy III. and Beauty II.); r, Mr. John Burdge (Countess and Duchess). Pair of heifer calves, under twelve months: 1, Mr. W. G. Williams, Chelvey; 2, Mr. Henry Macey, Congresbury; r, Mr. B. W. Collins, Banwell. Bull calf, under twelve months: 1, Mr. John Burdge, Claverham Court ((Baron Blagdon IX.); r, Ernest W. House, Rooksbridge (Thumper); 2, Mr. W. Young (Kruger); r, Mr. R. C. Tilley (Prince Charlie).

OPEN CLASSES.

Bull: 1, Mr. G. F. King, Chewton, Kenysham (Chewton Oxford Cornelius); 2, Mr. Sidney Hill, Langford (Langford Lavender); r, Mr. Sidney Hill (Puck); c, Mr. T. C. Candy, Cattistock (Adonis Foggathrope). Alderney, Guernsey, or Jersey cow or heifer, in milk: 1, Mr. J. H. Powell, Banwell; 2, Mr. F. Hill. 3, Mr. F. V. Bruce, Uphill (Lady Rodney); r, Mr. F. V. Bruce (Belle Beckington). Pair of dairy cows, in milk: 1, Mr. John Little, Trowbridge; 2, Mr. Sidney Hill (Levender Gem).

SHEEP.

RESTRICTED CLASSES.

Ram of any breed: 1, Mr. James Webber, Puxton (Adoniser); 2, Mr. G. Edwards, Wick St. Lawrence. Five ewes, having bred and reared a lamb in the present season: 1, Mr. S. H. Webber, Puxton; 2, Mr. H. C. Davis, Wick St. Lawrence; r, Mr. H. C. Davis. Five fat sheep: 1, Mr. F. J. Court, Blackford; 2, Mr. James Webber; r, Mr. S. H. Webber, Hewish; hc, Mr. J. Franks, West Town; c, Mr. A. Stephens, Banwell; c, Mr. A. Stephens, Banwell. Five lambs, chilver or wether: 1, Mr. W. Butler, Kewstoke; 2, Mr. W. H. Churches, Hewish; r, Mr. W. H. Churches. Ram lamb: 1, Mr. H. C. Davis; 2, Mr. J. Edwards, Wick St. Lawrence; r, Mr. A. C. Burgess, Puxton.

Bakewell Farmers' Club.

The fifty-second annual exhibition of the Bakewell Farmers' Club was held on Wednesday in very fine weather. The Bakewell Show holds a position of some importance amongst the agricultural meetings of the Midlands, especially as regards the Hackney horse section, which always attracts some of the best breeders in the country. The aggregate of entries this year well maintained the totals of previous years, the number and quality of the exhibits in the Hackney horse classes being regarded as exceptionally satisfactory by the committee. The class of Hackney mares brought out a string of ten. Mr. Smedley's bay mare being an easy winner. Messrs. Cockayne Bros.' mare was also regarded very favourably by the judges, but she is getting a little old for the show ring. The judges were so complimentary in adjudicating upon the foal class as to say that Mr. G. Welch's bay is the best Hackney foal seen out this season. It has a remarkably fine all-round action and has all the making of a rare show animal. Messrs. Cockayne Bros. were placed second with a fine foal which was not quite so strong an animal as the first prize-winner. In the Hackney yearling class the winning animal belonged to Messrs. Cockayne. The other exhibits in this class were rather poor. There was a very strong competition amongst the saddle hacks under 14.2 hands, and for her age the winner, Mr. W. Foster's Wet Valley Queen, was an almost perfect animal of her type. Mr. A. S. Day's chestnut Sunshine is also a good quality mare, but did not please the judges quite so much in her riding action. Mr. A. L. Goodson's chestnut, Heathfield Conceit, was an easy winner amongst the saddle hacks over 14.2 hands. The second prize taker, Surprise, a black gelding, owned by Mr. G. Ledson, is a really good animal, but lacking in riding qualities compared with the other. Mr. C. S. Godsell's well-known Norbury Squire was placed third. In the harness classes it was a tight fit for first place between Norbury Squire and Mr. G. Ledson's Surprise, but the first-named moved with a little more freedom, and was awarded premier honours. Mr. G. E. Franklin's bay, Lord Gobang, added another to his long list of successes in the under 14.2 hands class, and showed exceedingly well in harness, Mr. Day's Sunshine being a good second. Lord Gobang secured further honours amongst the ponies. Mr. Day's bay Berkeley Bobs, who came second, requires a little more time to develop into a first-class pony. The final class in the section was for farmers' turnouts, and the judges were somewhat dissatisfied with the definition of the class, it being rather difficult to know what to adjudicate upon. Most of the horses were shown in gigs, which are not usually understood to be farmers' turnouts. Consequently, the decisions gave some dissatisfaction in certain quarters, and a little more definiteness would be advisable another year. In the eight hunter classes Mr. F. B. Wilkinson, of Edwinstowe, Notts., was, as usual, prominent with his well-known bays amongst the prize takers, Dr. Haslewood, of Buxton, being another successful exhibitor. The Shires are, at Bakewell, the less important section of the horse exhibits, the entries being principally confined to the agriculturists of the immediate neighbourhood. There were fifteen classes for cattle, ten for sheep, etc., and four for pigs, and, here again, these were entered from exclusively local exhibitors, though a high standard was generally maintained.

Dumfries.

The Dumfries Agricultural Society's second annual show, recently held, was, in common with others held during the week, marred by unfavourable weather. Following upon a night of heavy rain, there was a lull in the storm in the early forenoon, and the judging was got through in dry weather, but by two o'clock heavy rain again came on, and it continued with little cessation until the stock began to move off the field. Notwithstanding these circumstances, there was a large attendance. The show was a most successful one in respect to the number and quality of the stock forward; and a particularly gratifying feature is that it brings together a very good representation of the stock of the district, landlords, and tenant farmers alike seeming to take an active interest in it, and the competition being widely distributed and not confined to a more or less professional ring. There was an exceptionally good show of Clydesdales, although the proportion of animals known in the national showyards was not large. In a large class of brood mares, Mr. James Crawford, Floshend, was first with Pride of Gretna, which beat Mr. Carson's Robina of Newfield, to which she had to take second place last year, but which on this occasion was only placed third. The second was Mr. Pilkington of Cavens' Maid of Honour. First prizes in foals went to Mr. James Crawford for colt and Mr. Pilkington for filly. In the eild mare class, Mr. John Wilson, Tinwald Shaws, was first and second, with Lady Grace (a daughter of Scottish Standard) and a Goldfinder mare. Mr. Weir, Townhead, Lanark, was an easy winner in the three-year-old filly class with Baron's Queen. A Fortune Still filly, from the Crichton Royal Institution farm, was placed second. Mr. James Crawford's Williamwood filly, champion at Annan and first at Lockerbie, was relegated to third place. The Duke of Buccleuch was fourth with Europa 2nd of Drumlanrig. The two-year-old fillies were the strongest class of the breed. There was a close tie for first place between the exhibits of Mr. Weir, Lanark, and Mr. Wilson, Tinwald Shaws, which was eventually decided in Mr. Weir's favour. The Duke of Buccleuch was third with Mary 2nd of Drumlanrig. In a good yearling class Mr. Carson, Newfield, was first with Lady M'Robert; Mr. Gibson, Hallhill, Irongray, second. There were a large number of geldings of a particularly good class forward, showing that heavy draught horses of a superior stamp are produced in the district. In the old class, Mr. R. Williamson, Tinwald Downs, was first with a massive animal; Mr. Wallace, Terreglestown, second; Mr. Lamont, Ingleston, third. Mr. Wallace, Mauchline, took first prize among the three-year-olds with his Cairnie champion, and Mr. C. H. Maxwell of Dalruscan was a good second. In the two-year-old class Mr. H. Young, Redhills, was first with the colt which was second at Lockerbie, and Mr. Pickton, Torrs, second with a fine, upstanding gelding. Mr. Picken also won first prize in the yearling class, Mr. Woodrow, Cotland, being second. In a small class of two-year-old entries Mr. W. Crawford, Whiteside, was first with Full of Promise, a well-known colt, with specially good fore legs and fine neck and shoulders. His brother, Mr. Peter Crawford, Dargavel, was second with Ethiop. Mr. James Crawford, Floshend, headed the yearling entire class with Scottish Crown. The hunter and other light-legged classes were only moderately filled. Mr. Galbraith, Terregles, and the Hon. Mrs. Vernon, Auchans, were leading prize-takers for Hackneys.

The Galloway cattle made a capital show, the classes being largely composed of winners at the

Highland Show at Stirling. In the bull classes, Mr. R. Wilson, Kilquahanity, with Macdougalt 4th of Tanbreoch, and Mr. D. Brown, Stepford, with Camp Follower of Stepford, were the respective winners, and the same exhibitors secured the first tickets for cows. In the quey class, Lady Stanley 10th, the property of Messrs. T. Biggar and Sons, Chapelton, which was only fourth at Stirling, was promoted to the first place, while Belle 12th of Drumhumphrey, owned by Mr. R. T. Scott, who was awarded premier honours at the Highland, was placed second. Another instance of the reversal of the Stirling awards occurred in the same class, Mr. Scott's Belle 12th, which was second at Stirling, being relegated to the sixth place; while the Duke of Buccleuch's Flint 8th of Drumlanrig, which was seventh at the Highland, was placed before her on Tuesday. Mr. Wilson was first for yearling queys with Maggie of Kilquahanity, while Mr. J. Wilson, Tundergarth Mains, was placed first for pair of quey stirks. There was a particularly good representation of Ayrshire cattle. The male championship was won by Mr. Mitchell of Barcheskie with the Highland champion, Commander, while the female honour went to the Crichton Royal Institution. Sir Mark Stewart, Bart., of Southwick, was first and third for bull stirks with two animals which were sold to go to Japan. In the other classes the principal awards were divided between Mr. G. J. F. Buchanan of Auchentorlie, Bowling, and Mr. Mitchell, and Mr. Slater, Hartburn, Kirkcudbright. In the Shorthorn and fat classes the chief awards went to Messrs. Watson, Wigton, the Earl of Antrim, and the Duke of Buccleuch.

There was a good display of sheep of all classes, the entry showing an increase over last year. Cheviots were especially good all over, particularly the old sheep. Mr. John A. Johnstone, Archbank, Moffat, carried off nearly all the honours, only two of his exhibits not getting cards. Mr. M. S. M'Kerrow, Boreland, of Southwick, ran him very close, beating him on one or two occasions. The black-faced animals were, on the whole, better all over than last year, the shearlings being pre-eminently so. Here, Mr. D. M. Macrae, Stenhouse, Thornhill, and Mr. James Moffat, Gateside, Sanquhar, shared the honours pretty equally between them. Messrs. J. and W. W. Anderson, Reddings, Moffat, also standing well. Border Leicesters and Suffolks made a good show, all classes being well contested. Rev. Sir Emilius Laurie, of Maxwelton, occupied a prominent place in the Leicester prize-list, his 100-guinea tup again taking the red ticket; while the animals sent by Major Baird, Exning, Newmarket, were very smart, and took several prizes. The fat sheep, a section which is of great importance in the district, made a very good show, and showed a great improvement on last year. Messrs. J. and D. Fergusson, Hillend, Auldgirth, were the most prominent winners, with extraordinarily good sheep.

Barnard Castle.

The Barnard Castle Agricultural Society's 101st annual show, held a few days ago, in every respect compared favourably with the majority of previous years. The entries were fairly up to the average, cattle numbering 73, as compared with 72 last year; sheep 55, against 75; and horses 191, against 182; the total number, with minor exhibits, being 445, against 455 in 1899. The horses were a splendid lot, particularly the draught, field, and Hackney lots, but here the awards went to more numerous competitors than was the case in the cattle classes. Sheep were a capital show, and it was not surprising to hear an occasional expression of regret at the abandonment of the wool classes in such a centre as Barnard Castle. The dairy produce was, perhaps, in advance of anything shown during recent years.

Sir Powlett C. Milbank, Bart, M.P., presided at the luncheon, and proposed "Success to the Barnard Castle Agricultural Show"—the oldest but one of similar organisations in the country. Lord Barnard, responding, suggested that the existing order of the executive of the Durham County Council as to the movement of sheep should be accepted and acted upon. The regulation, as it stood, would certainly touch some people rather hardly, but, after all, it was rather moderate in its tone. He was desirous of having more representative farmers on the Durham County Council, though they had failed in that district to carry a gentleman who was practically interested in agriculture, because the great mining industry of the county continued to be of paramount importance. The experimental farms inaugurated at Cockle Park were calculated to do much good. With regard to tuberculosis, an appalling state of things existed in Weardale, as disclosed by statistics. There were evidences of the existence of the disease in Teesdale, yet there were no reliable figures to enable them to trace its extent. He asked his audience to confer with one another in offering counsel to the authorities in an endeavour to stamp out this dread malady.

The principal awards were as follows:—

CATTLE

Shorthorn bull, two years old or upwards: 1, G. Harrison, Gainford; 2, R. T. Tiplady, Bell House, Staindrop. Shorthorn yearling bull: 1, G. Harrison, Gainford; 2, Lord Barnard, Raby Castle. Shorthorn cow, in calf, or having calved since December 31st last: 1, G. Harrison; 2, Lord Barnard. Shorthorn two-year-old heifer, in calf: 1, G. Harrison; 2, R. Metcalfe, Dent Gate. Shorthorn yearling heifer: 1, G. Harrison; 2, Lumb Brothers, Shipley. Bull calf, to be under a year old at date of show: 1, G. Harrison; 2, Lord Barnard. Heifer calf, to be under a year old at date of show: 1, Lord Barnard; 2, Messrs. Metcalfe. Cow for dairy purposes: 1, R. Brunton, High Farm; 2, W. Wilkinson, Barnard Castle. Pair of grazing bullocks, to be shown with all calf teeth: 1, J. Stubbs, Broomielaw; 2, T. Alderson, Barnard Castle. Pair of heifers, ditto: 1, G. Harrison; 2, Lord Barnard. Pair of bullocks, any age: 1, P. Amos, Langton; 2, Lord Barnard. Shorthorn in the show belonging to an exhibitor residing or farming in the Teesdale Union, and which has never won a prize outside the limits of the Union: G. Harrison, Gainford.

SHEEP

WENSLEYDALE.

Tup, two shear and upwards: 1, J. Gibson and Son, Natland Hall, near Kendal; 2, E. Horseman, Broken Brea Farm, Richmond. Shearling tup: 1, J. Gibson and Son; 2, E. Horseman. Tup lamb: 1 and 2, J. Gibson and Son. Pen of two ewes, having reared lambs this season: 1, J. Gibson and Son; 2, H. Rowlandson, Darlington. Pen of two shearling gimmers: 1 and 2, J. Gibson and Son. Pen of two half-bred gimmer lambs: 1, J. Gibson and Son; 2, G. Brown, Stotley Hall. Pen of two twice-crossed lambs, either wethers or gimmers: 1 and 2, H. G. Jones, Abba Close, Skeeby, R.S.O., York. Pen of two half-bred ewes that have reared lambs this season, the property of a tenant farmer: 1, W. Hutchinson, Nunstainton Grange; 2, J. Gibson and Son. Pen of two half-bred shearling gimmers, the property of a tenant farmer: 1 and 2, J. Gibson and Son.

HORSES.

DRAUGHT.

Foal, colt or filly: 1, S. Parker, Mosser Grange, Langton-on-Swale; 2, T. Nesbitt, Macnell, Witton-le-Wear. Yearling colt, gelding, or filly: 1, G. Stephenson, Summerhouse, Darlington; 2, R. Jackson, Greta Bridge. Two-year-old gelding or filly: 1, R. Smelton, Bolton Grange, Scorton; 2, T. Nesbitt. Three-year-old gelding or filly: 1, T. Dawson, East Greystone, Gainford; 2, S. Barker. Mare in foal, or having had a foal this season: 1, S. Barker; 2, T. Nesbitt. Horse or mare, any age, under 15.2 h.h.: 1, J. Stubbs, Broomielaw; 2, P. Langstaff, Streatlam. Colt or filly foal, by Black King: Mrs. Beckwith, Carkin Grange, Gilling.

HARNESS HORSES.

Foal, colt, or filly: 1, E. C. Meysey-Thompson, Rokeby; 2, The Right Hon. Lord Barnard, Raby Castle. Yearling colt, gelding, or filly: 1, R. Brunton, Marton; 2, T. Longstaff, Cockleberry, Brignal. Two-year-old gelding or filly: 1, E. C. Meysey-Thompson, Rokeby; 2, T. Longstaff, Cockleberry. Three-year-old gelding or filly: 1, E. C. Meysey-Thompson, Rokeby; 2, J. and T. Stubbs, Hillingdon. Mare in foal, or having had a foal this season: 1, E. C. Meysey-Thompson; 2, R. Brunton.

HACKNEYS.

Foal, colt, or filly: 1, J. Burton and Sons, Copthewick, Ripon; 2, W. Awde, 20, Bridge Road, Stockton. Yearling colt, gelding, or filly: 1, S. Metcalfe, Danby Wiske, Northallerton; 2, P. Raine, Mickleton. Two-year-old gelding or filly: 1, Mrs. F. Robson, The Cedars, Sunderland; 2, L. Temple, Middleton-in-Teesdale. Three-year-old gelding or filly: 1, T. M. Clayton, M.D., Felling, Springfonteih; 2, J. Turnbull, Marwood. Mare in foal, or having had a foal this season: Messrs. J. Burton and Sons, Copthewick.

HORSES FOR THE FIELD.

Foal, colt, or filly: 1, T. Swales, High Street, Yarm; 2, J. Turnbull, Marwood. Yearling, colt, gelding, or filly: 1, H. L. Fife, Staindrop House, Darlington; 2, Mrs. Wise, Little Stainton, Bishopton. Ferryhill. Two-year-old gelding or filly: 1, A. Ramshay, East Appleton, Catterick; 2, T. Longstaff, Cockleberry. Three-year-old gelding or filly: 1, T. Holliday, Jolby, Stapleton, Darlington; 2, E. Nixon, Parrick House, Marwood. Mare, by a thoroughbred horse, in foal, or having had a foal this season: 1, T. Swales; 2, J. Turnbull. Pony, under 13 hands high, to be ridden on the ground: 1, T. B. Forster, Barnard Castle; 2, G. Dodds, Broomielaw. Pony, under 14.2 hands, to be ridden on the ground: 1, S. Jarrett, Cleadon House, Bishop Auckland; 2, T. M. Clayton, M.D., Felling. Gelding or mare, under 15 hands, to be ridden on the ground: 1, J. Scott, Cotherston; 2, J. Stubbs, Broomielaw. Hackney, under 15.2 hands, to be ridden on the ground: 1, T. G. Benn; 2, J. W. Dalton-Ewbanke, Borrenthwaite, Kirkby Stephen. Lady's Hackney, to be ridden on the ground: 1, J. A. Pease, M.P., Snow Hall, Gainford; 2, C. W. Dixon-Johnson, Oakwood, Croft. Four or five years old gelding or mare for the field, to be ridden on the ground: 1, J. B. A. Dixon, Rock Castle; 2, J. A. Pease, M.P.

DRIVING

Pair of draught horses (of either sex), to be driven in the ring in plough gear (belonging the same owner): 1, T. Dawson, East Greystone; 2, S. Barker, Mosser Grange.

Smithfield Club Show, 1900.

Annexed is a list of the judges who will officiate at the next Smithfield Club Cattle Show, at the Agricultural Hall, in December:—

CATTLE

DEVONS: Samuel Kidner, Bickley, Milverton, Somerset.
HEREFORDS: J. H. Yeomans, Stretton House, Hereford.
SHORTHORNS: William Wright, Scamblesby House, Horncastle, Lincolnshire.
SUSSEX: Alfred Heasman, Court Wick, Littlehampton.
RED POLLED: Herbert Blofield, Quidenham, Attleborough
ABERDEEN-ANGUS: Samuel Davidson, Beech Hill, Inverness
GALLOWAY: Robert Shennan, Balig, Kirkcudbright
WELSH: John Jones, Denarch Hall, Colwyn Bay
HIGHLAND: John McGillivray, Ballochroan, Kingussie, N.B.
CROSS-BRED: James McWilliam, Stoneyburn, Keith, N.B.
KERRY, DEXTER, AND SHETLAND AND SMALL CROSS-BRED: H. D. Betteridge, Drayton House, Littlebury, Essex
£25 Cup, Best Beast not exceeding two years old; £50 Cup, Steer or Ox; £50 Cup, Heifer; The Queen's Challenge Cup, value £150; 100 Guinea Champion Plate: Francis Evans, Bredwardine, Hereford.

SHEEP

LEICESTERS AND BORDER LEICESTERS: John Twentyman, Hawkrigg House, Wigton, Cumberland.
COTSWOLDS: W. T. Garne, Aldsworth, Northleach.
LINCOLNS: Joseph Brocklebank, Carlton-le-Moorland, Newark
KENTISH OR ROMNEY MARSH: Francis De B. Collard, Minster Abbey, Ramsgate.
DEVON, or other Pure Long-woolled Breeds: E. R. Berry-Torr, Westleigh House, Bideford, N. Devon
CHEVIOTS: George Douglas, Hindhope, Jedburgh, N.B.
MOUNTAIN: Andrew G. Speedy, Baddoch, Blairgowrie, N.B.
SOUTHDOWNS: William Toop, Westergate, Aldingbourne, Chichester
HAMPSHIRE DOWNS: James Flower, Chilmark, Salisbury
SUFFOLKS: F. S. Lewin, Hillcrest, Ipswich
SHROPSHIRES: J. Bowen Jones, Rocklerry, Shrewsbury
OXFORD DOWNS: A. F. Milton Druce, 16, Queen Street, Oxford.
DORSET, or any other Pure Short-woolled Breeds: W. Elworthy, Alton Pancras, Dorchester.
CROSS-BREDS: George Stimson, Senr., 71, Central Meat Market, London, E.C.

The £50 Champion Plate for the Best Pen of Long-woolled Sheep or Lambs: Robert Leeder, Lowthorpe, Bridlington.
The £50 Champion Plate for the Best Pen of Short-woolled Sheep or Lambs: F. S. Barnes, Compton Grove, Norwich.
The Prince of Wales's Challenge Cup for the Best Pen of Sheep or Lambs, value £50: Peter Dunn, Preston House, Sigglesthorne, Hull.

PIGS

WHITE BREEDS: John Barnes, Bourne, Devon.
BLACK AND BERKSHIRE: J. W. Kimber, Fyfield Wick, Abingdon.
TAMWORTH: W. H. Mitchell, Lindome, Kennoway.
CROSS-BRED: James Bainbridge, Street, Leeming, Reeding.
The £20 Champion Plate for the Best Pen of Pigs; the Duke of York's Challenge Cup, value £50; the £5 Champion Plate for the Best Single Pig: Captain H. Hoole, Worsley, Manchester.
CARCASE COMPETITION: William Reed, Sons, 146, Central Meat Market, London, E.C.; John Wortley, Frettenham, Norwich.
£5 Champion Prize for the Best Carcase of Beef, and £5 Champion Prize for the Best Carcase of Mutton: Frederick Redman, 146, Borough High Street, S.E.

THE GARDEN.

Already the summer is waning again, as the fast purpling heather on the moorlands too surely testifies. Scarlet runners, too, are getting plentiful, and that is always an indication of the near approach of autumn. It is to be devoutly hoped that we shall be favoured with a fine autumn this year, for nearly the whole spring was wet, cold, and dreary, and the summer something like a month behind its usual time—in fact, it seems to be drawing to a close ere almost it has fairly set in.

Outdoor tomatoes bid fair to do well again this season—that is, if we do not get much more rain; it all depends upon the weather that may prevail for the next six or eight weeks. In most places the plants appear to have made a very vigorous growth, and are carrying plenty of fruit, though this is in many cases rather backward for the time of year; here it is so, at any rate. House-grown fruit has been rather scarcer of late than earlier in the season, consequently prices have risen, and anyone possessing a good crop of nice, shapely out-door fruit would have no trouble in obtaining an excellent return for them. A great difficulty is that nearly all the best and hardiest out-door varieties produce such rough or sutured fruit that only second or third prices can be obtained for them. The Early Evesham, though unequalled in other respects, is certainly very "rough," but by selecting it carefully for a few years I have succeeded in obtaining a very nearly "smooth" type. There is also a very superior type of the Large Red, known as the "Improved," which affords a large proportion of very nice and nearly round fruit, and Ifield Gem also produces heavy crops of perfectly shaped and very solid tomatoes in the open.

If not already done, prick out the points of all the (out-door) plants, remove every vestige of a side shoot, and shorten all the leaves to one, or at the most two, pairs of leaflets or "pinnæ." About the end of the month seed may be sown to afford plants for early fruiting next spring. For a late autumn crop the plants should now be standing out of doors in 6in. or 7in. pots, and as soon as the house can be cleared get them inside, and either move them into large pots to fruit or plant in boxes. In this way they usually do better early and late in the season than when planted in beds.

As fast as potatoes of the second early or succession classes become ripe and the haulm dies away they had better be lifted, sorted, and stored away. If the weather remains dry they might be as well in the soil for a time yet, but should any further amount of rain fall they should be lifted, especially if the haulm is at all diseased, as the spores are sure to be washed down to the roots by the rain.

Plant out a good batch of lettuces for use in the autumn (the Brown Cos is one of the best for this batch), also more endive, and do not forget to make a sowing of cauliflowers to stand the winter at once, if this has not been done already.

AUTUMN-FRUITING STRAWBERRIES. This new race seems to have a future before it. New forms are now being raised constantly, and great improvements effected in the size and quality of the fruit, habit, and freedom of the plant, etc. One of the best was Louis Gauthier, an almost white berry, studded with pink; this fruits at the usual time and is very prolific, but if the runners are stopped beyond the first stolon this flowers and fruits again in the autumn, which, if the little plants are top-dressed and "fed" a little, is very fine. St. Joseph is a perpetual-fruiting Alpine variety, with nice, round fruit, of medium size, with a sugary sweetness. It continues to produce flowers and fruit continuously right through the season and until the first frosts come, but should be kept watered and have liquid manure freely in dry weather. M. H. Vilmorin, an eminent French authority, speaks very highly of this variety.

Then there are St. Antoine de Padoue, a hybrid kind, with comparatively large red fruit and vigorous in habit; La Constance d'Automne, similar to St. Joseph, and very productive; Myosotis, more vigorous and less than St. Joseph, more or less pink; and Jeanne d'Arc and Louis XIII., are still newer hybrid kinds, the first being freer than St. Joseph and the second fruiting at the usual time and again from September to November. Some if not all of these are well worth a trial.

LETTERS TO THE EDITOR.

The Royal Agricultural Society.

Sir,—The Society was founded in 1838. In March, 1840, a Royal Charter of Incorporation was granted. The work to be undertaken by the Society is clearly stated in the Charter: "The general advancement of English agriculture," by the prosecution of the ten national objects enumerated. The following is the ninth object named:—"At the meetings of the Society in the country, by the distribution of prizes, and by other means, to encourage the best mode of farm cultivation and the breed of live stock." During the last sixty years it has been the practice of the Society to hold the shows in a different place every year, a practice that has undoubtedly promoted the general advancement of English agriculture. It has now been decided by the Council not only to discontinue the migratory shows that have done so much "to spread the light of agricultural improvement in various parts of the country," but also to discontinue holding shows in the country. In future the annual show is to be held on a site to be selected in the neighbourhood of London. The special committee appointed by the Council to inquire into the Society's show system recommended a location near some large town, "preferably in the centre of England." The reason why this recommendation has not been acted upon is said to be that "a closer and maturer consideration of the question in its broader issues has led to a different conclusion." Possibly, if the present position of the Society were to receive still further consideration and closer attention, it would be found that there is no necessity to discontinue the migratory shows. The great thing is to get the correct facts. A violent change from old established practice can alone be justified when it is clear that difficulties have arisen that cannot be overcome. The Council believe that insurmountable difficulties have arisen, and that the migratory shows have become an unwarrantable drain upon the society's general resources. The change from migratory shows to a show held in the same place every year will not put an end to the drain on the society's resources unless a strong effort is made to improve the financial administration of the society's funds. The plain truth is that neglect of business principles has created the present unsatisfactory position, and not the show system. In the early history of the society the shows were much more unprofitable than they have been lately, but the financial position of the society remained in sound condition because the Council in those days took good care that the ordinary expenses of the society were not allowed to swallow up the whole of the income from subscriptions. As a matter of fact, in the thirty-seven years—1841-77—the surplus available to meet the loss caused by the shows amounted to £43,121, being on the average £1,165 annually. By the shows held during that period no less than £33,298 was lost. By the prudent administration of the society's funds not only was this heavy loss met by the income from subscriptions, but there remained to the good nearly £10,000. In 1898, the "ordinary income," as stated in the society's annual account, amounted to £10,390. The "ordinary expenditure," according to the same account, practically amounted to the same sum, the surplus being only £5! This outlay, included under the head of "house rent, taxes, insurance, and ordinary house expenses and repairs," the large sum of £1,829. In 1893, under this heading, the outlay was £722. Here, then, we have an increase in expenditure of £1,107, or over 153 per cent. I unhesitatingly venture to express the opinion that the present outlay under this heading is unnecessarily large. The society cannot afford to expend over 17½ per cent. of its income on "rent, taxes, insurance, and ordinary house expenses." The sooner this fact is recognised and acted upon the better will it be for all concerned. In 1898 "depreciation" amounted to £1,004 4s. Of this amount only £173 3s. 3d. is charged in the expenditure account. The remaining £831 0s. 9d. alone appears in the balance sheet. By the first twenty shows held by the society £34,164 was lost, or on the average £1,708 annually. The first nineteen shows were all unremunerative, and resulted in a loss of £35,345. The show held at Chester in 1858 left a profit of £1,181. If these results are compared with those of the last twenty shows (exclusive of the show this year, the accounts of which have not yet been published) it will be seen that the last twenty shows compare very favourably with the first twenty. It will be remembered that the shows held at Birmingham, in 1898, and at Maidstone, in 1899, took place under exceptionally unfavourable circumstances. The loss by the Maidstone show alone amounted to £6,382. Thirteen out of the twenty shows resulted in a profit which, in the aggregate, amounted to £52,173. Seven shows were unprofitable, and resulted in a loss that, in the aggregate, amounted to £18,762. The net financial result of the twenty shows held from 1880 to 1899 was, therefore, a profit of £13,411, being equal to an annual average profit of £670 11s. This result cannot fairly be described as an "unwarrantable drain on the resources of the society."

Out of the £18,762 lost by the seven unsuccessful shows from 1880 to 1899, £11,348, or over 60 per cent., was lost by the two shows held in the neighbourhood of London. London is by far the most convenient centre for a permanent show, but past experience proves that from a financial point of view the shows held in the neighbourhood of the metropolis have never been a success.

The heavy loss that has been incurred by the annual sales of timber used in the show ground has been greater than necessary. It would have been much better to have purchased creosoted timber. Timber thus prepared would have lasted many years. The depreciation and cost of removal would, I think, have been much less than by the plan adopted. Having had fifteen years of practical experience in the foreign timber trade, my attention has naturally been given to this subject. The whole of the work connected with the preparation of the showyard could probably have been carried out more economically by contract than by men employed by the Society.

The arable side of farming has not received from the Council the attention and encouragement it deserves. The fifth object named in the charter is: "To promote the discovery of new varieties of grain and other vegetables useful to man or for the food of domestic animals." This has not been done. The tenth object named is: "To promote the comfort and welfare of labourers, and to encourage the improved management of their cottages and gardens." In recent years this important object has been lost sight of, and yet success in farming to a very large extent depends on efficient labour.

The Society has done, and is doing, a vast amount of valuable and most useful work. The members are not ungrateful for the large amount of time devoted by the Council to the duties of their office, but when they see the terms of the charter disregarded it is time that attention should be drawn to the fact.

ROBERT E. TURNBULL.

Ayton, York, August 10th, 1900.

Harvest Thanksgivings and the Royal Agricultural Benevolent Institution.

Sir,—The Press of this country has so generously given publicity to my annual appeal for the funds of the Royal Agricultural Benevolent Institution that I am emboldened, for the thirteenth year in succession, to bring to the notice of your readers the claims of this excellent charity upon the generosity of the public when making their charitable gifts in grateful acknowledgment of the ingathering of another harvest.

I am well aware that the pockets of the ever-ready British public have been heavily drained for the support of the dependents of the large army of workers who have willingly gone to a foreign shore to defend the interests and honour of this vast Empire. I have also noticed the liberal response which has been made to the appeal on behalf of our starving fellow-subjects in India, who are once again suffering from the failure of their crops.

Surely, I am not wrong when I rely upon the charitable assistance of this same public for help to the *only* institution in England whose sole object is to come to the help of the British farmer and his dependents, who have had to knock under from no fault of their own.

I may say that nearly all the applicants seeking pensions are those who have lost their all by the disastrous harvests commencing in the year 1879 and continuing during the cycle of wet years which followed.

The list of candidates for the pensions of the institution increases each year; and, notwithstanding the generous help of the public there remained, after the election in June, 1900, no less than 355 cases left out in the cold, and which the council were unable to assist.

All votes recorded for the unsuccessful applicants are carried forward to the next election, and it depends largely upon the response to this appeal how many of these disappointed candidates the council will be able to place on the list of pensioners, and so enable them to spend their few remaining years outside the workhouse. Each case is rigorously inquired into, and only those whose applications are brought about by causes beyond their control are accepted by the council.

It should be remembered that all accepted applicants are *bona-fide* farmers, who, during twenty years or more have cultivated as an exclusive means of support holdings of at least one hundred acres, or at rentals of £150 per annum; or their widows or orphan unmarried daughters, of the age of 65 years and upwards. After the election in June, 1900, there were 312 married (156 couple), 266 male, and 665 female pensioners on the books of the society, involving an annual charge of £27,000 on the funds of the society.

The prospects of the present harvest vary considerably in different parts of the kingdom. The cold in the early part of the year, up to May or June, precluded any hope of a good hay crop generally; since then the long-continued heat and drought, followed by the recent cold and wet days, has not conduced to the quantity and quality of the grain and root crops.

Altogether, the season is summarised by Professor Wrightson, of the Downton Agricultural College, as one that "must be added to a long list of bad years for farming."

I will not trespass upon your kindness by occupying more space, but confidently leave the appeal in the hands of an ever-generous English public.

To the very large number of clergy and ministers of all denominations, who year after year devote the whole or a part of their harvest thanksgiving offertories to this object, the council of the institution tender their grateful thanks; but I think the list might be largely increased if I could prevail upon our wealthy congregations in the Metropolis and our large manufacturing towns to allow this institution to share in their harvest thanksgivings: for it must be universally admitted that to no more appropriate object could their offerings be devoted.

Every half-guinea given to the institution ensures one vote at the election in June.

All contributions (subscriptions, as well as harvest thanksgiving offertories) may be sent to the Secretary of the Royal Agricultural Benevolent Institution, at 26, Charles Street, St. James', London, S.W., who will gladly acknowledge receipt and furnish any information desired by applicants, as to the working of the charity.—Yours truly,

WALTER GILBEY.

Elsenham Hall, Essex, August 18th, 1900.

Pedigree Wheat.

Sir,—Referring to the remarks under the heading "Practice with Science," in your issue of the 13th inst., I send you some of this year's ears of my original red pedigree wheat, as I think they will be of interest as showing, after forty-three years' annual selection, restarting in each year from the *proved* best single grain of the year, how the breed is kept up.

I also send some ears of my other three pedigree varieties of this year, showing equal progress.

I may mention that in 1860 I advised that there was nothing to prevent every farmer from "pedigreeing" on the same system (which I published), that particular variety of wheat which was found best suited to his soil.

My gallery of the successive best annual ears (of course, empty) forms, in the case of the original pedigree wheat, a closely-packed line of ears forty-two inches long, and is absolutely unique.—Yours faithfully,

FRED F. HALLETT (Major).

The Manor House, Brighton, August 21st.

[*** The four samples of wheat form a very fine quartette. These are "Pedigree Original Red," "Golden Drop" (red), "Victoria" (white), and "Hunters" (white). Some of the ears are seven inches long and well corned. We fear that too many farmers this season will find their wheat not half this size. This may be due to the season in a great measure, but the land and the grain should be given "a chance" by the farmers sowing good and selected seed. These dozen ears are by far the best we have seen this year.—ED. M.L.E.]

Pigs at the Royal Lancashire Show.

Sir,—"Nemo" is evidently one of those unfortunate people who are never satisfied, and who, either from suffering or nature, has got his judgment so warped and twisted that nothing but his own way will please, and not so much of that, or he will complain that there is nothing left to live for.

If a detailed list of a show will give no information, what will? All show reports should give number of entries in each class, so as to show the competition the winners have had. When the herd is large and entries are many, some are sure to catch the judges' eye, and count, especially when, in addition to their own breeding, they buy all the good ones they can find. What chance has the small breeder with such competitors?

"Nemo" never saw a good pig unless it come from his herd, and then it must not beat him, or some favour was being shown. If I had been at the R.L.A.S., and seen a wrong pig, and made the statement that he did, I would have stopped and exposed the fraud, and not run away to catch the train, and then bring it up in print, no matter whether the owner was a titled brewer or a belted earl, and as a member of the R.L.A.S., if he will send his complaint to the secretary, I am sure it will be looked to; but let it be better founded than his last complaint, or he will not get his money back this time. As to the judge. What "Nemo" means by class, I scarcely know; he is a man who has both bred and exhibited pigs a long number of years, and has had a lot of experience with them, and I think he did his work very well; and as to the statement that he applied to the steward every time, it is one of "Nemo's" peculiarities or eccentricities to think something is wrong if he is not consulted. I saw him try to get a spoke in the wheel a few times during the judging.

As to his being a 'local' man: he resides thirty miles from the show and in another county, and is designated a gentleman at home. Respecting the stewards at the R.L.A.S., one was a local man and the other one of the oldest and most respected members of the Pig Breeders' Association, who has judged at a large number of shows from the Royal down to the local dog show with its two classes, and is respected wherever he goes. When a man is asked to judge five years in succession it one show it says a lot for his honesty and judgment, and the stewards of the R.L.A. Show has done that, as I can vouch.

In your note to my last, you said the reason of the

poor reports of the pig section was largely due to the jealousy of the pig men, and that they could not give credit to any but their own. You were very right in your remarks, and "Nemo" must not have read them, or he would have formed his answer different, I think.

But how can we hope to get to a better understanding when the father of the pig trade writes such letters and makes such statements without substantiating them, as appears in yours of the 20th inst., and when such gentlemen as Captain Heaton declares he will never judge pigs again, if a certain exhibitor is to be allowed in the ring to insult both judge and steward?

When I can boast that I have sent pigs to forty different foreign countries, and have more prize cards than I can find room to put up, I will retire from exhibiting and live on my laurels, and let others try.

As to pigs at the Bath and West, the entries average 6½ per class. At the R.L.A. Show 8½ per class, and was filled with quality. ANON.

Phosphate of Alumina.

Sir,—A correspondent asks more information regarding the experiments on the above subject, and mentions that they would be of general interest.

Would you be good enough, therefore, to insert my reply to him which was in the following terms:

"The phosphate of alumina used in the Aberdeenshire experiments was in a very fine state of division—an impalpable powder. Our attention at that time was closely directed to the value of fine division, and, naturally, therefore, this feature was carefully attended to.

You are evidently under a misapprehension as to the comparison made in our experiments, which was *not* phosphate of alumina against a *mixture* of soluble and insoluble phosphate, which would obviously have been unfair, but phosphate of alumina against soluble phosphate alone, and insoluble phosphate alone, on different plots.—I am, yours sincerely,

THOS JAMIESON.

Agricultural Research Association for the North-Eastern Counties of Scotland, 10, Belmont Street, Aberdeen, August 21st, 1900.

Hayloader—Ensilage.

Sir,—Could you please tell me where I could see or get particulars of the hayloader that was spoken about in your paper two or three weeks ago? Also, could you give me any advice on how to make ensilage, and what quantities to give to feeding and milking beasts, or tell me a good book on the subject? F. J.

[*.* The hayloader is the Keystone, made by the Keystone Manufacturing Company, Sterling, Ill., U.S.A. The agents in London are Lankester and Co., 71, Southwark Street, E.C., where you will probably be able to inspect the apparatus, or they would tell you who are using it. The Ensilage Society have issued a little work, "The Practical Guide for Making Ensilage in Stacks and Silos," which will suit your purpose. You can obtain it through any bookseller.—ED. *M. L. E.*]

SOCIETIES.

Galloway Cattle.

The annual meeting of the Galloway Cattle Society was held at Dumfries on the 15th inst., Mr. M'Cormick, Lochenkit, presiding. Rev. Dr. Gillespie, in submitting the report of the Council, referred to the death of three of their number—Mr. Maxwell, of Munches, whom he characterised as the most prominent and most useful public man in the south-west of Scotland; Mr. Cunningham, Tarbreoch; and Mr. Carruthers, Balgray; also to the death of another prominent breeder, Mr. Thomas Biggar, of Chapelton. He stated that the Council proposed to offer some prize or prizes for Galloways at district shows. One object which they had in view particularly was to encourage the breeding and improvement of Galloway cattle in Ireland, and he believed during the year a prize would be offered at the most suitable place for the best cattle owned and bred in that country. Of recent years the best outlet for the breed had been found in Ireland. Galloways had been a very great success in crossing with native Shorthorns, and they knew from the blue-greys that were sent across here that the success had been very marked. They were peculiarly popular in the west of Ireland. They regretted very much that the outbreak of foot-and-mouth disease prevented the bulls being taken away this spring, but he hoped no such obstacle would occur in future. The rev. doctor also mentioned that the breed was taking a strong hold in Northumberland, and that the membership of the Society, to which eighteen names had been added during the year, was drawn from a very wide area—from Kent in the south, through various English counties, up to Newton-Mearns, near Glasgow, in the north. The funds of the Society amounted to about £200. The Duke of Buccleuch was re-elected president; Sir Robert Jardine, Bart., vice-president; and Dr. Gillespie, secretary and treasurer.

LITERARY NOTICES.

Messrs. Graham, Morton, and Co., Limited, of Leeds, who are the makers of some wonderful labour-saving machinery, have lately issued a most artistically got-up little publication, in which is a collection of photographs of some of the elevating and conveying plants they have erected during the past twelve months. As this kind of labour-saving machinery may be profitably introduced on the farm, we should advise our readers to obtain a copy of this catalogue, which can be had free from Messrs. Graham, Morton, and Co. on mentioning this paper.

His Imperial Majesty the Emperor of Germany has been graciously pleased to accept a copy of Mr. W. Arnold's translation of the "Maritime Code of the German Empire," the new volume of Effingham Wilson's series of translations of the Foreign Maritime Codes.

Messrs. Toogood and Sons, of the Royal Seed Establishment, Southampton, have just published a new edition of "The Culture of Flowers from Seeds and Bulbs," and a "Treatise on Lawns, Cricket Grounds, etc.," both by Mr. E. Kemp Toogood, F.R.H.S. The former books is a capital one, abounding in useful information for gardeners—both amateur and otherwise. It is freely illustrated, nicely printed, and is written in a brief though perfectly clear style. It is published at tenpence—cost price—and is wonderful value for money. We may mention that this publication, like two or three others of Messrs. Toogood and Sons', has already exceeded the tenth thousand. Twopence is the price of the treatise on lawns, and this amount expended on a copy will be well spent.

"Successful Advertising"—a book which no enterprising business man should fail to read—has just reached its twentieth edition. It is published by Smith's Advertising Agency, 100, Fleet Street, and in it Mr. Thomas Smith, the founder of the firm, gives an interesting account of the business of this well-known agency from its foundation in June, 1878, to June, 1899. The numerous specimens of advertisements which have proved successful will appeal to the advertiser, and should induce those who have not yet tried advertising to make a start now. In addition to being a guide to advertising, it is also a directory of newspapers, etc., for it gives a list of the principal papers and journals published both in and out of London. It consists of over 700 pages, is tastefully bound, and is published at the modest price of 2s.

Sport in the Cornfield.

The familiar sound in the country just now is the rattle of the reaper and binder, which pursues its way round and round the grain fields, cutting off the straws, binding them into sheaves, and tossing them aside for the harvesters to pick up and build into shocks. The farmer this year has every reason to bless the mechanic who has provided him with labour-saving machinery of this kind, for workmen are very scarce—more scarce than we have ever known them, in spite of good wages offered. How strangely things have worked out! I well remember some years ago, when agricultural machines were first introduced, some pessimistic persons looked on the new departures with an unfavourable eye, and vowed that they would supplant the labourer and do away with his occupation altogether. But what do we find? We have the machines, but a dearth of suitable men to work them, and we wonder how ever the harvest would be got in at all if we had to go back to the old days of the reaping hook.

Harvesting operations generally have the effect of disturbing the game that have taken up their abode in the standing corn, and look upon it as a sort of natural cover. It is rather hard to have your home removed from over your head, and it is not to be wondered that when the reaping machine pursues its way round the field the game cling to the cover as long as it lasts, and, when the corn affords them shelter no longer, make a wild dash for freedom. It is at this moment that the cornfield is the scene of some exciting sport, particularly if it happens to be in close proximity to a wood, and the other day I happened to be an interested spectator of a little episode of this kind.

When pursuing my course quietly along the king's highway, I was attracted by a somewhat excited scene, that was being enacted over the hedge. Only a small square of corn was left standing in the centre of the field, and at every round of the machine it grew perceptibly less. A man with a gun in his hand stood at one corner, and another similarly armed occupied a position at the other side. Several men and boys who were engaged in placing the sheaves of wheat in position appeared to have their interests divided, as they continually paused in their work, as though they were all expectation for something to emerge from the square of corn. They did not have to wait long, for a volley of voices shouted "Look up!" Bang went a couple of barrels, and away scudded a rabbit, far more frightened than hurt, with a couple of heavily booted labourers on dog, and several boys in pursuit. The rabbit won in a canter, the dog was a good second, and the rest came in nowhere. One man who brandished a hayfork was leading well in the pursuit, though I do not say that he had any chance of overtaking the rabbit, when his foot caught in something, and he measured his length in the stubble, to the intense amusement of the lad who was close on his heels.

"Why didn't you kill him?" was the question asked by the person who had not shot, but the other was read with a frown.

"I daren't shoot when I should have done," was the reply. "Ive been at it hitting that young blackhead," pointing to one of the boys, "and then, when I did get a shot the thing was out of range," though it was quite easy to see from where I stood that the marksman had fired quite half a dozen yards behind the escaping coney. The lad naturally enough resented the charge brought against him, and instead of thanking the sportsman for considering his personal welfare, seemed inclined to argue the matter, and a heated discussion seemed likely to ensue, when the man on the machine saw a movement in the corn and shouted in excited warning. Two rabbits immediately bolted at opposite angles and both guns rang out. The first one had evidently missed, for I perceived the dog in full pursuit of a rabbit whose running powers were mine. The other shot had taken a better effect, for though the animal ran, it was evident that something was wrong. The creature struggled on, but dragged its hind quarters uneasily, and a babel of shouts and whistles attempted to draw the attention of the dog, but he was far enough away on a more fruitless errand. "Get after it," shouted someone, and from different points two runners started. You would not put money on either in a sprinting match, but it is really remarkable what the spirit of competition will bring out of a man. Each one saw that the other meant to have the rabbit, and determined to capture it himself, while there was just a chance of the wounded creature detecting the ends of both. The rest of the harvesters entered into the spirit of the thing, and urged them on with: "Go on, Jack." "I'll back Bill." "Run hard, lad; you'll win." Thud, thud, went heavy boots on hard ground, and the heavy-heeled pair ran, scrambled, and struggled on, first one leading by a neck and then the other. The wounded rabbit was nearly played out, though it evidently meant to die game. Within a few yards of the hedge it gave up, and the two pursuers, running neck and neck, attempted to pull up. Two pairs of arms stretched out to grab the dying rabbit, but both men overreached themselves, and down they came. In wild attempts to catch the rabbit they grabbed each other, and looked nothing but a rolling mixture of legs and arms. Bunny wisely crawled off, and might have reached the shelter of the wood to die there had not the dog worked his way round, and, catching it up in his mouth, dropped it at the feet of the man with the machine.

In the meantime the two pursuers struggled on the ground, each one with the impression that the other had the rabbit, and mutual vigorous attempts were made to regain possession. It was only the shouts and laughter of the other harvesters that revealed the true state of affairs, and the men got up and stared at each other in a sheepish sort of manner, and then sidled back in a very dishevelled state of perspiration, and by way of reward for providing such good amusement, they were treated to a look at the now lifeless rabbit.

I do not know whether it was accidental or designed, but just then another individual strolled up to the cornfield, and at his heels there trotted a slim greyhound. I am of the opinion that the idea of the man was a little amateur coursing, and my conjecture proved to be correct in this particular. As it happened, neither of the men with guns was particularly dead on running rabbits, and consequently the greyhound had good opportunities of displaying his powers. There was a good deal of excitement at the finish when the last bit of corn was being stripped, and some twenty rabbits bolted in rapid succession. A few fell to the guns, one dropped to a stick deftly wielded by a burly harvester, and several others escaped. My attention was chiefly taken by the greyhound, who slipped forward at every opportunity and rarely failed to pick up his rabbit before it reached the safety of the wood. An old hare, whom nobody expected to see, proved the only exception, though the chances were scarcely equal. A terrific shout accompanied the exit of puss, who got a good start before the dog was laid on. It proved to be a good race across the stubble, in and out among the shocks of corn, but, to the disappointment of those present, the hare won by a good length and, reaching the cover of the wood, still lives perhaps to swell a sportsman's bag later on. It is surprising what an excitement there is about a little episode of this kind, and it was some time before the men again settled to their work. I expect it is nothing more than the sporting spirit which is possessed to a greater or lesser extent by all individuals, and though on this occasion I was only a spectator from the outer side of the hedge, I shared the excitement of the sport. I have, however, taken an active part in [illegible] sport on more than one occasion, and know that there are pretty warm times in [illegible] in shooting the bolting rabbits and other game that [illegible] upon the [illegible] loss of work. [illegible]

WATERLOO ROUND CAKES,

Henry Dudding, J. Casswell, Hy. Smith, jun., etc. Heavy-wool Sheep for export. Also prize and prize-bred Polled Angus, Shire Horses, and English Ponies for inspection and sale.

SHEEP *(contd.)*.

LINCOLN LONGWOOL.

ANDERSON, JOHN, Chapel Farm, Barton-on-Humber, Lincolnshire Breeder of pure-bred LINCOLN LONGWOOL SHEEP. Flock Book 106. These sheep are noted for having hardy constitutions, true character, and long, lustrous wool.— Telegrams: "John Anderson, Barton-on-Humber."

OXFORDSHIRE DOWN.

OXFORDSHIRE DOWNS.— For SALE, 100 pure-bred young EWES and 50 EWE LAMBS. Dispersal of flock, established more than 30 years. During recent years rams have been used from the noted flocks of C. Howard, G. Street, B. Hawkins, and H. J. Peacock. Apply to THOMAS STREET, Milton Ernest, Bedford.

HAMPSHIRE DOWN.

FLOWER, JAMES, Chilmark, Salisbury. Undoubtedly the leading flock of the day; in show yard records at all the largest shows, including the Challenge Cup at the Salisbury Great Prize Sheep Fair six years in succession; also highest average for same period for 100 ram lambs at annual sale, at Britford Fair, August 12.

The Flock is one of the oldest existing combining fine quality, strength, constitution, and true character.

"Fossil," sire of the highest-priced Hampshire Down Ram ever sold, was bred at Chilmark, and in service there last two seasons.

COLES, CARY, late C. and T., Manor House, Winterbourne Stoke, Salisbury.—Registered HAMPSHIRE DOWNS, prize-winners at the Royal, Bath and West, Royal Counties, and other shows. Sheep of all ages for sale; selections from 1,000.

SHROPSHIRE.

COOPER, WILLIAM, AND NEPHEWS, "Cooper's Dip" Works, Berkhamsted, England. Breeders and Exporters of pure Shropshire Sheep. First and Third Prize for Ewes, Royal Show, 1898. Five hundred breeding Ewes. The largest export flock of Shropshires in England. The sires used present season include 310 Guinea Champion "Royal Record," Two First, One Second, and One Third Royal Show Prize winners.

LIVE STOCK AGENTS.

INVERNESS, WEST HIGHLANDS.—JAMES ARNOTT, Scotch Live Stock Agent, Ellandonan, Inverness, established 1870, selects and supplies on commission all classes of SCOTCH STOCK. He attends all the leading markets to purchase Stock at lowest rates. References can be given if desired to customers who have been annually supplied. All orders are personally attended to. List of classes and approximate prices sent on application. Reference required; terms cash. Telegrams: "Arnott, Inverness." J.A. is now booking orders. N.B.—Polled Angus or West Highland Heifers for crossing or feeding, in truck loads, at moderate prices. Fat Stock of all classes also purchased.

LARGEST Live Stock Agency in England.—E. GOODWIN PREECE, Portland House, Shrewsbury, will be glad to receive orders for RAMS, EWES and WETHERS, of various breeds, of which he buys annually large numbers on commission. SHROPSHIRES, CLUNS, and KERRIES a SPECIALITY. HAMPSHIRES, OXFORDS, SOUTHDOWNS, LINCOLNS, LEICESTERS, and COTSWOLDS. Also CATTLE of various classes for GRAZING or DAIRY. References to practical farmers all over England, who have been regularly supplied for many years. All personally bought. Prices on application.

STOPHAM, near PULBOROUGH.

TO LET from Michaelmas, 1900, the MANOR FARM, with fine old-fashioned Farmhouse, substantial and well-arranged Farm Buildings, and about 163 acres Arable and 153 acres Meadow and Brookland. Rent £300.—Apply, W. B. HOY, Stopham Estate Office, Pulborough.

WATER-POWER Country Flour and Grist MILL, working two pairs of stones, TO LET from Michaelmas. Good connection, excellent neighbourhood, small capital only required; rent £40.

Apply, MICHELMORE AND SON, Land Agents, Gate House, Totnes.

TO LET, in the Winchester neighbourhood, a farm of 884 acres, as follows:—

	Acres.
Grass	124
Down	180
Arable	442
Woods	138
	884

There are two good sets of buildings and an excellent house. The sporting, which is very good, could be let with the farm.—Apply, J. ARTHUR WALLINGTON, Esq., Basingstoke.

TO BE LET, from Michaelmas, 1900, a Valuable SHEEP and DAIRY FARM, known as Sutton Hall, in the County of Suffolk, containing 1 327a. 2r. 18p., of which 563a. 2r. 2p. are Permanent Pasture, Marshes and Heath Land, and 764a. 0r. 16p. Arable.

There is a first-class Residence, with Bailiff's House, Several Sets of Farm Buildings, all in Good and Substantial Repair.

The whole of the land is in a high state of cultivation, having been farmed by the late owner for many years. The pasture land, together with the marshes, is very rich grazing ground and the heath land is a healthy sheep run.

The farm is within four miles of Melton Station, on the Great Eastern Railway, and has its own quay on the river.

For further particulars apply to PETER HAY, Bawdsey Estate Office, Woodbridge, Suffolk.

AUCTION SALES.

THE QUARRINGTON RAMS.
(Flock Book No. 155).

Important SALE of Grand Lincoln Long-wool SHEARLING RAMS.

MESSRS. HINCKS & TURNER beg to announce their instructions from Mr. F. WARD, to SELL BY AUCTION, upon the premises, QUARRINGTON,

On TUESDAY, SEPTEMBER 4th, 1900,

80

of his Grand Lincoln Shearling

RAMS

This Flock, established in 1841, has been enriched by purchases of Ewes from the Flocks of the late Mr. Hack, Silk Willoughby; Messrs. Clarke and Son, Ashby-de-la-Launde; late Mr. John Byron, Kirkby Green; Mr. Pinder, of Barrowby; Mr. E. H. Cartwright, Keddington; and Mr. H. Dudding, Riby; four of which were the 1st prize winners at the Louth Show. Notable Stud Rams, purchased at sums varying from 60 to 115 guineas, from amongst others: The Flocks of Mr. Dudding, Mr. J. E. Casswell, Messrs. Dean and Son, Mr. T. Casswell, Mr. Pears, Messrs. Clarke and Son, Mr. Wright, Mr. Goodyear, Mr. Rudkin, Mr. Sharpe, and Mr. C. Clarke, have been used. The present collection show great size and capital constitution, with plenty of bone, combined with perfect fleeces, and can with confidence be thoroughly recommended. Specimens this year and the last two at the County Show, held at Spalding, Louth, and Lincoln (the only times exhibited), secured high honours.

The place of Sale is within One Mile of Sleaford Station on the Great Northern Railway, Grantham to Boston, and Great Northern and Great Eastern Joint Main Line, London to Doncaster, where Conveyances will meet intending buyers.

Luncheon at 1 o'clock. Sale at 2.30.

Auctioneers' Offices—Sleaford and Leicester.

THURSDAY, SEPTEMBER 13, next.
APPLESHAM FARM, SHOREHAM, SUSSEX.
About 2½ miles from Shoreham and Lancing Stations, L.B. & S.C.R.
Highly important SALE of SHEEP and DAIRY CATTLE.

MR. C. STRIDE has been favoured with instructions from Mr. WALTER WHITE (who is quitting and relinquishing farming) to SELL by AUCTION on the farm on the above date, the whole of his well known hill flock of DORSET DOWN SHEEP, consisting of about 1,500 EWES and LAMBS in ages as follows:—

219 two tooth ewes,
196 four tooth ewes,
179 six tooth ewes,
204 full mouthed ewes,
325 ewe lambs,
335 Wether lambs, rams and ram lambs.

This flock has been in the White family for seventy years, and since being brought into Sussex from Dorsetshire by Mr. Walter White ten years ago, has been crossed with the Southdown.

The Ewes are very prolific and hardy of constitution, possessing the quality of the Southdown with greater size and scale. They will be sold in their natural condition, and work on the Downs for their living until day of sale.

Together with
48 GRAND HEAVY MILKING DAIRY COWS AND HEIFERS,
all with calves at foot or due to calve.

All the above cows and heifers are a Shorthorn and Hereford cross, were bred on the farm from cows specially selected for their milking qualities, and are well worth the attention of buyers.

The remainder of the Dairy Stock, with the Horses and tackle, will be sold on THURSDAY, SEPTEMBER 27 next.

Sale to commence at 1.45 with the Cows.

Luncheon obtainable on the premises.

Catalogues of the Auctioneer, Auction and Estate Agency Offices, 63, East-street, Chichester.

4,000 SHEEP.

FRIDAY NEXT, SEPTEMBER 7TH, 1900, AT WELLINGTON, SALOP.

MESSRS. BARBER AND SON will hold their ANNUAL SPECIAL SHEEP SALE in the Smithfield, on the above date, when about

4,000 PURE-BRED SHROPSHIRE and other SHEEP will be sold.

The Sale will commence with the Ewes at 11 o'clock.

Catalogues free on application to, and Commissions faithfully executed by, the AUCTIONEERS, Wellington, Shropshire.

OXFORD DOWNS, 1900.

THE KELMSCOTT FLOCK, the property of ROBERT W. HOBBS, Kelmscott, Lechlade.

RAM LAMBS
or
SHEARLING RAMS

from this old-established flock will be SOLD by AUCTION at the undermentioned Fairs:—

CIRENCESTER, SEPTEMBER 3rd.
BURY ST. EDMUNDS, SEPTEMBER 4th.
KELSO, SEPTEMBER 11th.
NORTHAMPTON, SEPTEMBER 19th.

Yearling ewes for sale at home privately.

Prizes won by lambs from this flock this year are four firsts and four seconds at the Royal, Bath and West, Royal Counties, and Gloucestershire Shows.

ALFRED MANSELL & CO.,

LIVE STOCK AGENTS AND EXPORTERS,
SHREWSBURY.

BREEDING & FEEDING SHEEP.—Shropshire Rams and Ewes (all classes) supplied at *lowest rates*, also rams and ewes of other breeds, Shropshire, Clun, Kerry, and Welsh Wethers and Lambs for feeding purposes, bought on Commission.

WINTERING CATTLE.—Hereford, Shorthorn, Polled Angus, Blue-Grey, and Welsh Bullocks and Heifers can be supplied on favourable terms.

PERSONAL BUYING.—All orders are executed by Mr. Alfred Mansell or Mr. G. G. Blantern, a guarantee in itself that selections will be made with *good judgment*.

Specialities: Shropshire and Clun Sheep, Hereford and Polled Angus Cross-bred Cattle.

SILCOCK'S CALF REARING.

CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 *per cwt., carriage paid. 5 cwt. lots,* 12/-.

WARRINGTON.

BIBBY'S

"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

DALMENY OBJECT LESSONS.

There apeared in the MARK LANE EXPRESS of last week an interesting account of a visit to Lord Rosebery's Home Farm by the members of the Kippen Farmers' Club, by which it appears the party of fifty were not only deeply impressed with what are termed the "wonderful crops" that met their view, but had to con several important object lessons possessed of very uncommon features, while the conclusions derivable from some of the experimental results seem of great value.

For instance, the discovery that the largest sized turnip seed will produce finer roots than the smaller sized ones of any given sample is not only "a new wrinkle worth noting," as Mark Twain would perhaps say, but is of deep scientific interest, proving, as it does, that the law of "like producing like" pervades every part of the vegetable kingdom to the same extent it does in the animal. Mr. Drysdale, the Dalmeny prince of factors, got a seedsman, we are told, to send him the best turnip seed procurable. This he winnowed again to separate the finest seeds from the rest. After making the division, he sowed the two lots separate into adjoining lands similarly treated in respect to cultivation and manuring, with the result that "the larger and heavier seeds gave a crop of much stronger and more vigorous plants than was got from the smaller and lighter seed."

Dalmeny has much to do with lime. Very heavy applications of it has there cured the tendency of affecting turnips with "finger-and-toe." Dr. Hunter, the scientific adviser at Dalmeny, believes the disease to come from a soil germ, which the caustic lime kills. His opinions are not shared universally, for a great many declare the disease to be chiefly propagated by infected seed. Possibly the plant malady may be liable to be spread both ways. Lands which have once been infested may retain the disease germ, and the seed of an affected crop may propagate it also. At any rate, if by particular treatment at Dalmeny one-half of an affected soil has been completely cured, while the other half has continued to grow turnips so defective as to be scarcely worth harvesting, Dr. Hunter and Mr. Drysdale may certainly claim to have found a reliable remedy for land of the same nature at least.

But lime is so highly appreciated at Dalmeny that a small quantity consisting of 4 cwt. per acre is applied for all crops. Of course, "facts are stubborn things," and as Mr. Drysdale told the Farmers' Club that the application of this small quantity of finely-ground lime had in repeated experiments caused much better crops to be grown than were raised on other lands precisely treated the same otherwise, but not receiving the lime, we are bound to believe him. Moreover, according to his statement, it did not matter whether the manurings were with nitrogen, phosphates, or potash, or whether no manure otherwise was applied, there had always been a marked difference in the superiority of the limed plots.

We are inclined to attach an equal amount of importance to these results last alluded to as Mr. Drysdale and Dr. Hunter evidently pay to them. They are not only of practical but scientific importance. Some of the old chemists used to affirm that there were four elements of plant nutrition necessary to be supplied by manuring unless the soil happened to have any of them in latent force, these elements being nitrogen, phosphoric acid, potash, and calcium or lime. M. Ville, the great French chemist, was among those who held that view. Our modern chemists all leave lime out of the list, but these Dalmeny experiments tend to prove M. Ville and our older scientific teachers to be correct. We are perfectly aware that caustic lime when applied to land in sufficient quantity possesses that other function commonly assigned to it of liberating the other elementary plant foods when held fast latently. Indeed, Lisle more than a century and a-half ago termed it "the midwife of fertility." But the quantity Dr. Hunter and Mr. Drysdale find to be so beneficially applied to all kinds of cropping at Dalmeny is too small to act effectively in that way, so that we can form no other conclusion but that the effect on the Dalmeny soil is decidedly manurial. A further proof that this is so is also to be found in the statement that the experimental plots which received a ton and a-half of lime gave poorer returns than those which had only 4cwt.

The custom regularly pursued at Dalmeny and strongly advocated by Mr. Drysdale of growing mangels and swedes in rows no wider apart than 24in. is not new. Other practical farmers have found it to be better to grow their roots closer together than formerly, and some hold the opinion that heavier crops can be obtained by so doing. As Mr. Drysdale is perfectly convinced that such is the case, the fact cannot be too generally known. Whether the result would be just the same on all soils alike is a point worth inquiring into. The farming is high at Dalmeny, and it will no doubt be thought that there is sufficient plant food to swell out the bulbs to large size when studded so close as almost to touch one another. We believe, however, that the selfsame result has been discovered on farms not habitually kept in such high condition as the home farm of Lord Rosebery.

Almost every agriculturist in the kingdom would feel grateful to Dr. Hunter and Mr. Drysdale for their recipe how to grow three tons of hay per acre, for it appears the average exceeds that quantity on the Dalmeny farm. The statement made to the Kippen Club was that "the hay crop this year yielded up to 3 tons 7 cwt. per acre for the first cutting, only one small patch of inferior soil having yielded less than 3 tons per acre." How such magnificent crops were grown is not stated in the reports that have come to hand, but no doubt employing the best seeds and applying the most efficient manures have had much to do with it.

We can only give expression to the wish that there were more Dalmeny example farms and experimental grounds to give object-lessons of what can be got out of the land when stimulated to its highest capabilities of productiveness. English noblemen having large landed estates and sufficient means could scarcely serve their country more beneficially than to take a leaf out of Lord Rosebery's book, but to be thoroughly successful in this they would have to look out for Drysdales as factors or managers, and Hunters as scientific advisers.

SAMPLES.

By a Man of Mark Lane.

I regret to receive reports from Greece affirming that almost the entire crop of currants has been destroyed through the ravages of the peronosperos, a blight which has rotted the young grape. Many thousands of tons of currants are ruined. Consequently, prices in this country, I am told, are likely to advance as high as they did in 1853, when the retail price was 1s. 6d. per pound.

I have received from the Board of Agriculture two leaflets (which may be had free on application to the Secretary, 4, Whitehall Place, S.W.) relating to white root rot in fruit trees, and to the small ermine moths, also to the preventive or remedial measures to be adopted.

I see that an official contradiction is given at St. Petersburg to the rumour of the impending prohibition of the export of cereals from Russia.

Professor Malden calls attention to a new disease in beans, which he has detected in a crop in Sussex. Early in the year a crop of good promise commenced to die off, and continued to waste away until only about one tenth of it was left to be harvested. Investigation proved the mischief to have been caused by a fungus named *Sclerotinia sclerotiorum*, which frequently attacks potatoes and other farm and garden crops, but has not been reported to have affected beans before. The haulm in the case under notice had hard swellings under the skin and inside the hollow stems, containing great numbers of resting spores. It is important, therefore, to burn the haulm, but no remedy for an attack is known.

The Joint Agricultural Council in the East and West Ridings of Yorkshire are promoting an extensive scheme for the study of agriculture in the year 1900-1901. The Yorkshire College at Leeds is adopted as the centre, and a new scheme of instruction is in vogue. At the Manor Farm, Garforth, near Leeds, the practical experiments are carried on, and special exhibitions are offered so as to enable farmers' sons to take the winter course of instruction at the Yorkshire College. The County Mayor Scholarships value £60 per annum (and in the West Riding also the Mayor Scholarships of a second-class value, £30 per annum), are available for agricultural study at the College. Competitive examinations are provided for, and arrangements have been made for the carrying out of experiments at Manor Farm with stock and crops or tests of new implements and varieties of seeds, and may be brought before the public.

PRACTICE WITH SCIENCE.

Bath and West and Southern Counties Society.

A letter which affords good evidence of the practical utility of the Travelling Farriery School conducted by the above-named Society for the Somerset County Council has just been received from Mr H. J. Shire, formerly of Combe St. Nicholas, near Chard, who was a pupil at the school when it was held at Ilminster in February, 1899, and who at one of the school competitions was awarded first prize for shoeing nag horses.

He is now in South Africa, the letter, which is addressed to the Society's farriery instructor, Mr. W. B. Blackall, R.S.S., being dated from Sunnyside Ward, Pretoria.

The writer states that after being engaged in some sharp fighting outside Pretoria he formed part of the advance guard of Lord Roberts' army when he entered that town. Shortly after this he availed himself of an opportunity to join the Transvaal Mounted Police, and has now become farriery sergeant. As an ordinary trooper gets 10s. a day he expects as sergeant to have 17s. 6d. a day, in addition to board and lodging. He has sixty horses to look after, and these are kept in the stables connected with the town tramway, which is not at present in operation.

At the conclusion of the letter he expresses himself as very grateful for the kindness shown to him by the Society's instructor, and he winds up by saying: "I believe it due to you my being made farriery sergeant, as I should not have been fit for it if I had not attended the school."

Carlisle August Fair, which at one time continued for fifteen days, but is now confined to one, was held on Monday. There was a fair show of Irish store cattle on the Sands, though much smaller than usual on such an occasion, and a few horses were also exhibited. A remarkable circumstance, however, was the entire absence of buyers, the result of the unprecedented weather which has been experienced since the eleventh of August. During the intervals between the heavy rainstorms which have marked the month, farmers worked hard in the harvest field and got a good deal of corn cut, but satisfactory progress was not made, and the harvest, and the gravest fears were entertained as to the prospects of the grain being gathered in safely and without injury. The weather, therefore, being fine on Monday, there was nothing to be thought of but to make the best of the opportunity it afforded, and everywhere farmers and their servants were busy in the harvest fields. Rosy accounts were given of the harvest prospects before the rain came, and even yet, in spite of the undoubted damage which was done by the wet, the hopes are that the harvest will, on the whole, be good and plentiful.

Death of Sir J. B Lawes.

It is with deep regret we have to announce the death from dysentery of Sir John Bennet Lawes, Bart., which took place at Rothamsted on Friday morning last.

There is no name more familiar to students of agricultural chemistry, and to farmers generally, either in this country or, indeed, in any other civilised country of the world, than that of Sir J. B. Lawes, Bart., who for half a century devoted his energies to help and to benefit the science and practice of agriculture.

John Bennet Lawes was born in 1814, and on the death of his father in 1822 succeeded to the estate of Rothamsted in Hertfordshire. He was educated at Eton and at Brasenose College, Oxford, where he remained from 1832 to 1835, and he afterwards spent some time in London for the purpose of the further study of chemistry.

Sir John Lawes was elected a Fellow of the Royal Society in 1854, and in 1857 the Royal medal was awarded to him by the Council of the Society. Further honours received by him were his baronetcy (1882), his Honorary D.Sc. of Cambridge, Gold Medal of the Imperial Agricultural Association of Russia, Gold Medal of Merit from the German Emperor, Albert Medal of the Society of Arts, and diplomas or medals from a great number of other academies and societies in America, Sweden, Holland, and other countries, besides the Legion of Honour from Napoleon III. He was a member of the important Royal Commission which investigated the application of town sewage to the fertilisation of different crops. The work of Rothamsted is embodied in print in many forms: in the records of the Royal Agricultural Society, the British Association, the Chemical Society of London, the Royal Society, the Horticultural Society, and the Royal Dublin Society, in articles in the MARK LANE EXPRESS and other technical newspapers, and in numerous reports, pamphlets, and letters to the general press. In 1892 he published a book on the work of the Rothamsted Farm.

Sir John Lawes married, in 1842, Caroline, daughter of the late Mr. Andrew Fountaine, of Narford Hall, Norfolk, who left him a widower in 1895. He leaves one son and one daughter, the son, who succeeds him, being Mr. Charles Bennet Lawes, the well-known sculptor, who was born in 1843.

Prior to the appearance of Liebig's remarkable works, "Organic and Animal Chemistry" in their application to agriculture and physiology, in 1840 and 1842, which certainly constituted a very marked epoch in the history of the progress of agricultural chemistry, Mr. Bennet Lawes (as he then was) commenced experiments with different manuring substances, first with plants in pots, and afterwards in the field at Rothamsted, Hertfordshire, into the hereditary possession of which he had entered on his majority in 1834. Of all the experiments so made, those in which the neutral phosphate of lime in bones, boneash, apitite, was rendered soluble by means of sulphuric acid, and the mixture applied for root-crops gave the most striking results. The data so obtained on a small scale led to more extensive trials in the field in 1840 and subsequent years. In June, 1843, at which date Dr. Gilbert became associated with Sir John Lawes in the Rothamsted investigations, more systematic field experiments were commenced, and a barn, which had already been applied to laboratory purposes, became almost exclusively devoted to chemical research.

The experiments so set on foot, and which may truly be said to have revolutionised agricultural practice, were conducted entirely at the cost of Sir John Lawes, who further set apart a sum of £100,000, the laboratory—built by public subscription of agriculturists, and presented to Sir John Lawes in July, 1855, since which date the old barn laboratory was abandoned—together with certain areas of land, for the continuance of the experiments after his death. The necessary trust deeds were executed in the early part of 1889, and, in accordance with its provisions, trustees and a committee were appointed.

The fact that agricultural experiments are of little or no practical utility unless they are continued from year to year for a long period, and tried in good and bad seasons in a manner which allows us, if not to eliminate, yet clearly to recognise, the disturbing influences of climate, seasons, conditions of soils, and other circumstances which often affect the produce in a higher degree than the manures on which we experiment, was from the very first recognised by Messrs. Lawes and Gilbert; so that the general plan of the Rothamsted field investigations has been to grow some of the most important crops of rotation, each separately, year after year, for many years in succession, on the same land, without manure, with farmyard manure, and with a great variety of chemical manures; the same description of manure being, as a rule, applied year after year to the same plot.

Experiments with different manures on the mixed herbage of permanent grass-land, on an actual course of rotation, on potatoes, oats, beans, and various leguminous plants, without manure, and with different manures were likewise made.

Obviously, an investigation of the scientific principles of agriculture would be incomplete if it were not extended to the question of the feeding of the animals of the farm. Accordingly, experiments with such animals were commenced early in 1857 and continued at intervals. Among the points investigated have been:—(1) The amount of food and its several constituents consumed in relation to a given live-weight of animal within a given time. (2) The amount of food consumed to produce a given amount of increase in live-weight. (3) The composition of the solid and liquid excreta (the manure) in relation to that of the food consumed.

Supplementary investigations have also been made on the application of town sewage to different crops, including experiments on the feeding qualities of the produce grown, the amount of increase yielded by oxen, and the quantity and quality of the milk yielded by cows being determined. The chemistry of the malting process, the loss of food constituents during its progress, and the comparative feeding value of barley and malt have also been made.

The results of these numerous agricultural researches in the field, the feeding shed, and the laboratory, have been given in a series of papers, too long for enumeration here, which, as regard the agricultural history, progress, and literature of the past fifty years, are one of the glories of the English tongue.

The funeral is fixed for to-morrow (Tuesday) at Rothamsted.

THE DAIRY.

Tring Milking and Butter-Test Trials.

Judge's Report.

The Tring milking and butter test trials of 1900 are chiefly remarkable for the large weight of butter obtained from milk of one of the Shorthorn cows, and for the general excellence of all the Shorthorn cattle exhibited.

For the first time at this show the awards in the milking trials were given by points, the period of lactation being taken into account, these points being as follows:—One point for every 1lb. of milk, fractions of 1lb. being worked out in decimals. One point for every ten days since calving, deducting the first forty days.

Mr. Dawe's cow Cherry, which won the first prize in both the milking and butter-test classes for cattle over 900lbs. live weight, was a Shorthorn weighing 1,289lbs., and gave 36lbs. 8oz. of milk in the morning (thirteen hours), and 31lbs. 2oz. milk in the evening (eleven hours), a total of 67lbs. 10oz. of milk of very rich quality, evidenced not only by the butter ratio, 15.79, but confirmed by the sample of morning's milk which, through the Babcock tester, under Mr. F. J. Lloyd's care, showed a very large percentage of butter fat.

The butter ratio showed that the milk from this cow was as rich as that from the Jerseys. Compare the figures of the gold and bronze medal cows in the test, but it is certainly remarkable to find milk so rich when the yield is so large.

Referring to the excellence of all the Shorthorns exhibited, if the figures of this, the eighth year of the Tring trials, be compared with the figures of the year 1893 it will be seen that this particular breed has improved in every way, a satisfactory proof of the practical value of these competitions.

(1) The averages of all the Shorthorn cows tested in 1893 and 1900.

(2) The yields of butter and milk respectively of some of the best Shorthorns whose milk passed the standard of 3 per cent. fat.

TABLE I.

Year.	No of Cows.	Days in Milk.	Milk. lb oz.	Butter. lb. oz.	Butter ratio.
1893	20	72	43 6¾	1 8¾	28·07
1900	25	60	49 0	2 0¾	24·12

TABLE II.

MILK YIELD. 1893. lb. oz.	1900. lb. oz.	BUTTER YIELD. 1893. lb. oz.	1900. lb. oz.
56 14	67 10	2 2¾	4 4½
48 10	62 4	2 1¾	2 12
47 7	59 14		2 9¾
	58 0		2 3¾
	57 14		2 3¾
	56 12		2 2¾
	(2) 56 6		2 2¾
	54 10		
	54 0		

The whole of the milking prizes in the class for cows over 900lbs. live weight were won by tenant farmers, and this is another satisfactory feature of these trials.

The Jerseys, on the average, did not come out so well as they usually do, owing, I think, to the fact that the cattle were in many cases rather too young. Out of the thirty-five animals tested, ten were over four and under five years of age, six were three and under four years of age, and four over two and under three years of age; so that twenty out of thirty-five can hardly be said to be in their prime.

The averages of the Jerseys are as below:—

No. of cows.	Days in milk.	Milk. lb. oz.	Butter. lb. oz.	Butter ratio. lb.
35	100	32 6	1 11¾	19·01

The English Jersey Cattle Society's gold, silver, and bronze medals were awarded as below:—

Name of cow.	Days in milk.	Milk. lb. oz.	Butter lb. oz.	Butter ratio.	Prize and points.
Colonel McCalmont's Freedom	111	34 14	2 10½	13·20	Gold medal, 49·35
Dr. Watney's Lady of the Sunny Isles	124	46 12	2 6¾	19·30	Silver medal and £5, 47·15
Viscount Enfield's Musk	194	29 12	2 0¾	14·53	Bronze medal and £3, 44·75

The test was carried out on the same lines as at previous shows, the cattle being milked out on Tuesday, the 7th inst., at six p.m. The milk of Wednesday was passed through a Farmer's Alfa steam turbine separator on the evening of that day, and on Thursday the various lots of cream were churned, the awards being published at 12.30 p.m.

The arrangements for carrying through the trials were (as they always are at Tring) perfect, and my thanks are due to all those who so ably assisted me in the work. I would especially mention Mr. Richardson Carr and his assistant, Mr. Young, the stewards, the assistant-secretaries to the English Jersey Cattle Society, and the dairymaids, all of whom worked with a determination to make the trials a success. ERNEST MATHEWS.

BUTTER TEST.

COWS NOT EXCEEDING 900lbs. LIVE WEIGHT 32 ENTRIES.

	Days in milk.	Milk yield. lb.	Butter yield. oz.	Butter ratio.	Pints
1st prize, £20, to Col. McCalmont's Freedom (Jersey)	111	34·14	2 10½	13·20	49·35
2nd prize, £15, to Dr. Watney's Sharab (Jersey)	117	31·8	2 0¼	15·62	44·25
3rd prize, £10, to Viscount Enfield's Gloaming 4th (Jersey)	94	38·10	2 5½	16·48	42·90
4th prize, £5, to Mrs. McIntosh's Fairy (Jersey)	108	51·11	2 3¼	23·46	42·05

COWS EXCEEDING 900lbs. LIVE WEIGHT, 34 ENTRIES.

1st prize, £20, to Mr. E. Dawe's Cherry (Shorthorn)	41	67·10	4 4½	15·79	68·60
2nd prize, £15, to Dr. Watney's Lady of the Sunny Isles (Jersey)	124	46·12	2 6¾	19·30	47·15
3rd prize, £10, to Viscount Enfield's Musk (Jersey)	194	29·12	2 0¾	14·53	44·75
4th prize, £5, to Mr. C. Birdney's Florence (Shorthorn)	23	44·14	2 12	16·31	44·00

ENGLISH JERSEY CATTLE SOCIETY'S PRIZES FOR THE THREE BEST JERSEYS IN THE TEST.

Gold medal or £10 to Colonel McCalmont's Freedom.

Silver medal and £5 to Dr. Watney's Lady of the Sunny Isles.

Bronze medal and £3 to Viscount Enfield's Musk.

MILKING TRIALS.

COWS NOT EXCEEDING 900LB. LIVE WEIGHT, 32 ENTRIES.

	Days in Milk.	Milk yield.
1st prize, £20, to Mrs. McIntosh's Fairy (Jersey)	108	51·11
2nd prize, £15, to the Duke of Marlborough's Water Lily (Jersey)	125	47·6
3rd prize, £10, to Lord Braybrooke's Dewberry (Jersey)	114	43 8
4th prize, £5, to Hon. Murray-Smith's Lorna (Jersey)	183	35·12

COWS EXCEEDING 900LB. LIVE WEIGHT, 34 ENTRIES.

1st prize, £20, to Mr. E. Dawe's Cherry (Shorthorn)	41	67·10
2nd prize, £15, to Mr. A. Bonest's Milkmaid (Shorthorn)	17	62·4
3rd prize, £10, to Mr. Ellingworth's Daisy (Shorthorn)	67	58·0
4th prize £5, to Mr. J. Even's Judy (Shorthorn)	76	56·14

SOCIETIES.

Durham.

The council of the Durham County Agricultural Society met on the 25th ult. at the Rose and Crown Hotel, Durham, to receive the statement of accounts in connection with the society's recent show at West Hartlepool. Mr. Robert Richardson, of West Rainton, presided over a good attendance.

The secretary (Mr. Chrystal) submitted an abstract of the accounts. These showed a net loss on the show of £252 17s. 2d., as against a loss of £306 17s. 3d. on the previous year's show held in Durham. The total receipts were £1,136.

It was announced that Sir Christopher Furness and Mr. Stephen Furness had intimated their willingness to become vice-presidents of the society.

At the Taunton Police Court on Saturday week, Thomas Cornwall, a cattle dealer, was charged with having stolen nineteen crossbred lambs, value £27, the property of Mr. Marwood Stone, of Sweethay Farm, Trull, on the 21st ult. The prisoner, who is a rough-looking man, of middle age, was arrested at Bridgwater, where he was endeavouring to dispose of the lambs. Evidence was given to the effect that prisoner was seen in the neighbourhood of Trull driving the animals on Tuesday evening, and on Wednesday morning a drover, employed at Bridgwater Market in putting up the pens, saw him there with the sheep. He asked him to whom they belonged, and prisoner answered, "Mr. Edwards, of Chiselwood, Trull." The drover, however, reminded him that Mr. Greenslade lived there, and again asked him where he got them. He then said he had them from a field at Culmstock, in Devon. Prisoner was ordered to take the lambs out of the market, and subsequently he offered the drover half a sovereign to put them into an auction, and an additional sovereign if they were sold all right. The drover then communicated with the police, and Superintendent Barnett, of the borough police force, went to the market and pretended that he wanted to buy the lambs. Prisoner then gave his address as "Mr. Edwards, of Kingston." Superintendent Barnett, doubting the truth of the statement, took him to the police office, and ascertained that he was a drover named Cornwall. He was eventually handed over to the Taunton police. Prisoner was committed for trial at the next Quarter Sessions for the county.

FARM.

Agricultural Returns of Great Britain, 1900.

Preliminary statement for 1900, compiled from the returns collected on June 4th, and comparison with previous years:—

Crops and Live Stock.	1900.	1899.	1898.
	Acres.	Acres.	Acres.
Wheat	1,845,042	2,000,981	2,102,206

The Plague of Thistles.

Writing to the *Irish Times*, a "County Wicklow Man" draws attention to the plague of thistles, which is really disastrous to a grazing country like Ireland, and says methodical steps should be taken to stamp it out unless farmers wish the feeding value of their fields to be reduced by one-half. In Holland a fine is exacted for every thistle found in a field, as the thistle-down flies all over the country, and no man has a right to injure his neighbour's property, however careless he may be about his own. It is supposed that if thistles are cut in full bloom, when the strength has gone out of the plant they will die, but the only effective remedy is to pull them out by the roots. The new Agricultural Department should take the matter up. The destruction of thistles is quite as important as potato-spraying.

Awards at the Paris Exhibition.—Spratt's Patent, Limited, has received a gold medal for its display at the Paris Exhibition. Mr. George Vickers, of 172, Strand, has received the highest award—a medal—in competition with other well-known English makers of ink. Within three years this firm has obtained no less than twenty-two prizes, which is something of a record.

FARM LABOURERS' WAGES.

Board of Trade Report.

A most interesting report has been issued by the Board of Trade on the wages and earnings of agricultural labourers in the United Kingdom. Mr. Wilson Fox, Assistant Commissioner for Labour, and who was Assistant Commissioner both to the Royal Commission on Labour 1892-94 and to the Royal Commission on Agriculture 1894-96, is the writer of the report, which covers nearly three hundred pages, and deals separately with England, Wales, Scotland, and Ireland. Preliminary to the detailed report there is a summary of the main conclusions, and attached to this is a coloured map showing for each county in the United Kingdom the average earnings of ordinary agricultural labourers in 1898, including all extra cash payments and the value of payments in kind.

Systems of Engagements.

In Scotland, Wales, the north of England, and the north of Ireland the majority of the farm servants are, broadly speaking, on yearly or half-yearly terms of engagement, and are paid a regular wage, board and lodging being usually provided free in the farm houses for the unmarried men and cottages in many districts for the married men. This applies generally to all classes of farm servants in Scotland and in Northumberland and Durham. In the other northern counties of England and also in Wales the yearly or half-yearly engagements are mainly confined to the unmarried men, while the majority of the married men regularly attached to the staff of a farm are usually on weekly engagements. It is a frequent custom in Wales and Ireland to give the married men their meals in the farmhouses on working days. In other parts of England (excepting the counties abutting on the Welsh border) and in Ireland, except in the north, the majority of agricultural labourers are, as a general rule, on weekly engagements, though the men in charge of animals are frequently engaged for longer periods. Throughout the greater part of England the custom of lodging and boarding men in the farmhouses has practically ceased to exist. The system of hiring nearly all classes of farm servants at hiring fairs obtains in Scotland, the north of England, the north of Ireland, and in a few districts in Wales, chiefly in the north. In other parts of the United Kingdom the system is nearly extinct, and it is declining to some extent in all districts.

Earnings.

It is shown that though time-payments in cash form the main part of the agricultural labourer's earnings, the method of remuneration greatly varies in different parts of the United Kingdom. Where the hiring system prevails, extra cash payments for piecework, hay and corn harvest, overtime, etc., are few, if any, while allowances in kind, such as board and lodging for unmarried men, and free cottage, potatoes, fuel, etc., for married men, are frequent. On the other hand, where the engagements are shorter and the rates of cash wages are lower, as in the arable districts of the eastern and southern counties of England, more piecework is done, and extra payments in cash at hay and corn harvests and for overtime can be earned, while men in charge of animals often receive lamb money, journey money, etc., free cottages, and other allowances in kind. A comparison between the wages of agricultural labourers in different parts of the United Kingdom is, therefore, of not much practical advantage without an accompanying statement of the actual annual earnings, including the extra amounts obtained in cash from all sources and the value of all the allowances in kind. The report gives a statement of the cash wages and earnings of the various classes of agricultural labourers in each county of the United Kingdom. The following are the final averages obtained for the earnings of ordinary agricultural labourers in England and for the classes of labourers most nearly corresponding to them in other parts of the United Kingdom for the year 1898:—

Country.	Average earnings per week in 1898 (including the value of all allowances in kind).
	s. d.
England	16 10
Wales	16 5
Scotland	18 1
Ireland	10 1

These averages are arrived at by combining the earnings for each county with the total number of agricultural labourers in each county according to the 1891 census. The census figures include classes of labourers not covered by the average earnings given for each county, but as they show roughly the proportionate number of labourers in the various counties it is considered that the resulting averages for England, Wales, Scotland, and Ireland may be taken as approximately correct.

Highest and Lowest Wages.

The report shows that the earnings were highest in Scotland, England, and Wales near the large industrial and mining centres. This is also true of Ireland, where, however, the earnings were uniformly lower than in Great Britain, the highest earnings there being in County Dublin and in the counties of Down, Antrim, and Armagh in Ulster. There are six counties in the United Kingdom where the earnings exceed 20s. a week, viz., Renfrew, Lanark, Stirling, and Dumbarton, Durham, and Northumberland, the highest being in Scotland, in the county of Renfrew, where they averaged 21s. 9d. a week. The county where the earnings were lowest in England was Suffolk, the earnings being 14s. 5d. a week. In Cardiganshire, in Wales, the earnings were 15s. 9d. In Scotland, in Sutherland, Orkney, and Caithness the earnings were 14s.; while in Mayo, in Ireland, the earnings were 8s. 7d. In Ireland there were eighteen counties where the average weekly earnings in 1898 were under 10s. a week. In many districts in the province of Connaught, and also in county Donegal in Ulster, agricultural labourers, as a class, do not exist, the holdings in such districts being generally small, and worked by the owners and their families. Large numbers of these small farmers and their sons go to work as labourers on farms in various districts in England and Scotland during the spring, summer, and autumn.

Wages for a Series of Years.

Information has been obtained for a considerable number of farms in the United Kingdom as to the rates of weekly cash wages paid on them for a long series of years. The inquiry goes back to the last fifty years, there has been a marked increase of wages. The changes in England and Wales are shown on charts. The returns as a whole indicate that the average increase from 1850 to 1899 in the rates of weekly cash wages paid on thirty-three farms amounted to 48 per cent.

The information as to the rates of wages paid during the last five years is of a much more complete and detailed character than that for earlier years. Dealing with the changes which have taken place from 1895 to 1900, there has been a progressive upward movement in England, Wales, and Scotland. The information received from January up to June, 1900, from all parts of England, Wales, and Scotland points in the same direction. In Ireland there has been but little change, except in the neighbourhood of the large towns or in districts where railways have been constructed. Where changes have taken place, they have been in an upward direction, most of these changes having taken place in Ulster. Generally speaking, the rates of agricultural wages in Ireland have not altered much for the past ten years. The rise in the rates of cash wages in England and Wales from 15s. 5½d. to 16s. amounted to about 11½d. per head of the agricultural labourers in the districts reported on. In 1899, as compared with 1898, wages rose by about 4d. per head, and in June, 1900, as compared with June, 1899, by about 8½d. per head.

Cottage Rents.

In determining the annual earnings of agricultural labourers the question of cottages is, it is pointed out, a most difficult one to deal with, more particularly in the counties where there is a mixed system. For instance, some labourers get free cottages and others cottages at a low rental, and in both cases they may or may not be receiving a lower rate of cash wages than that current in the district. On the other hand, some may be paying full rental for their cottages but receiving full cash wages. Though it may be stated generally that in the greater number of counties the ordinary agricultural labourers do not get free cottages, it would no doubt be true to say that in every county there are numerous instances in which they are held at low or almost nominal rents. The counties in which ordinary agricultural labourers frequently get cottages free are Northumberland, Durham, Cumberland, Westmorland, the North Riding of Yorkshire, and to a less extent the West Riding, Shropshire, Gloucester, Hereford, Dorset, Wilts, Somerset, Devon, and Cornwall. In the western counties many men who get cottages free receive a rather lower rate of wages than those who pay rent for their cottages. Some landowners, when letting their farms, keep the cottages in their own hands in order to give the labourers greater security of tenure, as well as to ensure the cottages being kept in a good state. But farmers frequently stipulate that they shall at any rate have the letting of a certain number, more particularly for men in charge of animals. In some districts the cottages held direct from the landowner are called "free cottages," and those rented from the farmer "tied cottages." The rent received for cottages by landowners has generally no relation to the initial cost of building them. They are frequently erected on farms with the object of inducing a good class of tenant to take the farm, in the rent of which the cottages are included without any separate calculation of their value. The landowner, it is pointed out, may also be desirous of improving the appearance of his property or be willing to spend freely on the habitations of the labourers on his estate for philanthropic reasons.

Scarcity of Labour.

One of the most interesting points in the report has reference to the scarcity of labour in recent years. The rise in wages in England and Wales, and also in Scotland, in the last five years is usually attributed by employers to the scarcity of labour, which is said to be increasing, particularly of the more skilled and educated men, owing to the competition of other industries during the last period of general prosperity. Many farmers in England consider there is a special difficulty in getting young men to take charge of animals, and that this is partly a

to their objection to Sunday work. Employers of labour have complained for many years of the difficulty of keeping the younger and more efficient men on the land, but never has the complaint been so general as at the present time. The scarcity has been accentuated in many districts by the calling out of the Reserves and the Militia towards the end of 1899 and in 1900. The employment of women and children in agriculture in England has been gradually decreasing during the last twenty years, until it has nearly ceased to exist in almost every county, thus depriving the farmers of cheap labour at busy seasons, and in the last few years the resident casual labourer who could be secured for hoeing and weeding, hay and corn harvest, and potato lifting, etc., has almost or entirely disappeared in many districts. The farmers have tried to meet the difficulty in some localities, especially since the price of corn sank to such a low level, by keeping more land in grass and by using self-binding machines at harvest. As it is nine years ago since the last census was taken, it is not possible to give figures showing what changes have taken place in the number of agricultural labourers in the last ten years, but the evidence of employers in England, Wales, and Scotland is to the effect that there has been considerable migration to the urban centres, especially in the case of the younger men, during that period. In Scotland, where women are still largely employed at field work in many districts, it is generally stated that they, and also the young women engaged for dairy and other work in the farmhouses, are steadily decreasing year by year owing to their preference for situations in towns, either in shops or domestic service. It is, the report points out, sometimes asserted that the migration to the towns is due not only to a desire to obtain higher wages, but also to the wish to secure employment to which a higher social position is attached, and to lead a life which is less arduous and monotonous. However this may be, it is observed that the complaints of scarcity of labour come from the high-wage districts in the north of England and in Scotland, where regular employment is afforded, as well as from the south of England, where the terms of engagement are usually short. The report adds that, comparing one purely agricultural district with another, say, in Northumberland and in Suffolk, there is not much difference, if any, in the cost of cottage rents or of living generally.

The Collection of Information.

There is a chapter of the report showing how the large body of facts and figures has been obtained. In England alone over 9,000 returns were sent to employers asking for information as to the rates of wages and the actual annual earnings of all the men in their employ, and particulars were received relating to 18,069 labourers. In addition the rates of weekly cash wages paid in the rural districts were sent by the chairmen of Rural District Councils. A large number of employers in Wales, Scotland, and Ireland also sent information. Altogether the book contains a large mass of most useful details bearing on the agricultural problem, and Mr. Wilson Fox is to be congratulated on the manner in which he has presented the information.

Doncaster Races.— The Great Northern Railway Company are, as usual, making very extensive and complete arrangements in connection with this year's Doncaster Races. The ordinary splendid service of seventeen express trains from London will be fully maintained, and the following additional special expresses will be run:—On Monday, September 10th, first and third class expresses at ordinary fares will leave London (King's Cross) at 3.18 and 5.40 p.m. On Tuesday, Wednesday, Thursday, and Friday, September 11th, 12th, 13th, and 14th, special express with first and third class luncheon cars attached will leave King's Cross at 9.40 a.m. and arrive at Doncaster at 12.40 p.m. On Tuesday, Wednesday, and Thursday, September 11th, 12th, and 13th, a special first and third class dining car express will leave Doncaster at 6.5 p.m., and arrive at King's Cross at 9.5 p.m.; and on Friday, September 14th, a special first and third class dining car express will leave Doncaster at 5.0 p.m., and arrive at King's Cross at 8.25 p.m. First and third class luncheon or dining cars are attached to the ordinary trains leaving Doncaster at 10.45 a.m., 11.1 a.m., 6.20 p.m., and 7.32 p.m., arriving at King's Cross at 1.55 p.m., 2.10 p.m., 9.30 p.m., and 10.45 p.m., respectively. To enable visitors from the Metropolis to return immediately after the last race on Friday, September 14th ("Cup" Day), special expresses will be run, leaving Doncaster at 4.18 p.m. and 4.40 p.m., arriving at King's Cross at 7.35 p.m. and 8.8 p.m. Cheap excursions will be run as under to Doncaster:—Monday, September 10th, for 3 or 5 days, from Moorgate at 1.56 p.m., Aldersgate 1.58, Farringdon 2.6, King's Cross (G.N.) 2.45. Wednesday, September 12th ("St. Leger" day), for 1 or 3 days from Woolwich (Arsenal) at 6.25 a.m., Dockyard 6.27, Charlton 6.30, Maze Hill 6.35, Greenwich 6.40, Deptford 6.43, Blackheath 6.20, New Cross 6.30, Spa Road 6.45, Moorgate 6.37, Aldersgate 6.39, Farringdon 6.41, King's Cross (G.N.) 7.0. Friday, September 14th ("Cup" Day), for 1 day, from Moorgate at 6.37 a.m., Aldersgate 6.39, Farringdon 6.41, King's Cross (G.N.) 7.0. For these trips the low fares of 13s. 6d. for 1 or 3 days, and 14s. for 5 days, third class, will be charged.

BARLEY AND MALT.

By Hordeum.

How to Thresh.

The question of *when* to thresh dealt with last week leaves less to the individual judgment than the very important point of *how* to do it.

A great deal of prejudice still exists in the minds of many men in favour of flail or hand-threshing. Grain so treated is assumed to be free from so very many of the defects commonly attributed to machine action when an ordinary threshing machine is used. Fair comparison of a series of average samples treated by the differing processes would show that the old-fashioned system has not the marked superiority over the newer methods enthusiasts or theorists claim for it. There are still remaining with us a few maltsters and barley merchants who contend that hand-threshed barley is worth up to 2s. (two shillings) per quarter more money than the same barley if run through a machine.

Cut and Chipped Grain

is gravely injured without doubt, and as it is so entirely open to prevention the damage ought not to be allowed to be longer perpetrated; but in reality, if the drum of the machine is properly regulated and constructed, and is driven at a steady and proper speed with uniformity observed in feeding, a great deal less harm is done to the barley than by even very careful hand-threshing.

The main things to attend to when any fairly well-constructed machine is used is to see that the drum is true and properly fitting—*i.e.*, that the beater is perfectly round and well centred as well as straight, and that the bed is truly concave and flat or straight also. As a matter of everyday practice, no really respectable maker now sends out a machine in which the workmanship in these particulars leaves anything to be desired. Commonly, it is only when, by improper driving and excessive feeding, or from very lengthened use, that drums get irregular and defective.

It is not at all difficult to find the defect, nor is it an expensive matter to apply the remedy.

Irregular Driving

and injudicious feeding have really more to do with defective results than imperfections in the machine, but in any case a very small amount of intelligent care and attention given by the farmer when the work is in progress can stop a very large part of any or all of the evils complained of.

Injudicious attempts to get the utmost amount of work done regardless of its quality are sure to lead to chipping and peeling or other abrasion of the grain. It seems a pity that so many growers do not get imbued with the conclusion that the skin of a barley-corn must be kept intact with the same care as is shown in keeping brood eggs from chipping or cracking. There is only one way to make sure of this, and that is by personal attention being given to the points already mentioned.

Any machine which is overworked by excessive speed or by too crowded feeding cannot possibly do its work well or efficiently in any sense, but for every evil arising from these causes it is quite clear the maker of the machine ought not to be blamed or held responsible.

Hiring by the Day

has much to answer for in this matter, so many farmers try to get the maximum amount of work done possible during the day. When payment on the results or piecework is attempted then the owner of the machine tries for the same reasons to do all he possibly can. The final outcome, of course, is the conclusion inevitably arrived at, that on the whole the grower does best who hires by the day and sees to the quality of the work done regardless of quantity.

It is much cheaper in the end to have a fine uninjured sample as the outcome of five days' working than to secure the same quantity in four days, but with a large number in almost every bushel of it of broken, chipped, cracked, or peeled berries.

Maltsters and buyers might do a good deal in this particular by pointing out that had the sample been properly threshed they would have gladly given another shilling or two a quarter for it. Still more practically useful would it be if they could grumble at so-called small or minor defects, and also in those cases where a sample is rejected altogether for this cause to make it quite clear that the true reason is known by the grower.

The Scarcity of Prime Samples

this year in many districts should make any grower who has any stacks in good condition doubly careful. There are one or two little practical matters which even good and careful managers are sometimes apt to overlook.

The top of a stack should not be allowed to go with the head corn until each sack, after careful examination, has been found fit to be so treated. Nor should the setting of the machine be ruled by the first start. Under no circumstances ought a long interval to elapse between examination of samples solely with a view to determine that no danger is being done.

Engine drivers only too frequently are allowed to be careless as to the head of steam they keep, or, in other words, the boiler pressure preserved. Fluctuations in pressure necessarily affect the speed of the engine, and consequently the quality of the work done. No engine is allowed to run without one or more pressure gauges, and the majority of them have a red line to indicate the safe or best working pressure. It is a simple matter to see how closely the index keeps to this line, and frequent reference to it has an excellent effect.

FOREIGN AND COLONIAL.

Condition of Crops in Germany.

The subjoined report of the condition of crops throughout the empire was issued by the Imperial Bureau of Statistics in the middle of August. No. 1 represents very good, 2 is good, 3 an average, 4 below an average, and 5 is bad:—

—	Wheat.		Rye.		Barley.	Oats.	Potatoes.	Clover.	Lucerne.	Hay.

The severely hot weather of July was not favourable to the condition of field crops, and harvest prospects show a slight decrease on those of last month in all crops except summer wheat and clover. In comparing them with those of the last seven years we see that the note for August is better in the case of potatoes, better than in six years for summer wheat, better than five for oats, and four for summer rye and barley. It is, however, worse than in six years for winter rye and clover, and worse than in five for lucerne and hay. Winter wheat shows about the average of the last seven years. The note from Baden and Wurtemberg is generally satisfactory. The yield in straw is not so good. The crops were carried well in East Prussia. Harvest is in full swing in all parts, but was hindered by rainfalls in the early part of the month, which have also caused some damage. Hot, dry weather prevailed during the last few days. Hailstorms have done some damage in parts. Rye harvest is mostly ended, and the note has chiefly reference to the yield. That for the whole empire is 3.0, while Prussia, Saxony, Saxe-Weimar, Saxe-Altenburg, and Mecklenburg-Strelitz remain below the average. The note for Bavaria is the most favourable, but is not so good as that of last year. Wheat suffered from brand and rust, and was also prematurely ripened by the July heat. It is, however, a good average crop. Mecklenburg-Schwerin alone shows a report below the average. Bavaria is above an average. Summer crops are above the average for the last seven years, but complaints are heard of premature ripening, beating down, loss of grain, etc., from wind and hail. Potatoes are in good condition almost everywhere, and tubers are good. A few complaints are heard of disease and small tubers owing to the drought. The note for the empire, which is 2.3, shows that harvest prospects are exceptionally good. They have never been better during the last seven years in August. Clover and lucerne have suffered much from the drought; some fields are, however, in better condition since rain fell in the beginning of August. It is feared that there will be a fodder famine. The condition of hay is not uniform. Aftermath will be small; some meadows recovered after the rain. Conditions are unfavourable in Posen and Alsace Lorraine. Unfavourable reports are to hand from many other parts.

The Leicestershire coroner has held an inquest at Cosby, on the body of a farm labourer, named John Burbage, who was killed in the harvest field under singular circumstances. He was loading a cart with wheat rikings when a blast of wind blew the load over, and buried the poor fellow under it. On being extricated it was found that death had been almost instantaneous, his neck having been broken. A verdict of accidental death was returned.

By Lupulin.

Home Notes

The Borough.

My country friends may, I think, at last congratulate themselves that the market is moving in their favour. Their patience has, I know, been sorely tried, and at one time it appeared almost impossible for any change to be effected in the cloudy aspect of the trading sky. But gleams of sunshine are at last breaking through, slowly and with difficulty, I admit, but with sufficient force to give promise of a brighter, healthier atmosphere in the early future. To come to business facts, there has been quite an active trade this week. More inquiry has set in for yearlings, and several lots have been sold at fully 5s. advance, while more could have been disposed of had not holders withdrawn them from offer. Then some new hops have arrived, and have been eagerly looked after by buyers. The quality was generally disappointing, but, nevertheless, East Kent bramblings, not free from a suspicion of mould, and not fully matured, were taken at 95s., which is a fairly satisfactory indication of the trend of the trade.

I hope and believe I shall have still better news to tell next week, and in the meantime I am confirmed, by the general tone of remarks in the Borough, in the advice I have ventured to offer to growers. While it is not wise to open the mouth too wide at first, as it is bad policy to frighten buyers into retreat, I do not think 1s. per lb. for sound hops of fair quality at all too high for an opening price. Growers are entitled to claim this figure as a minimum, and if they are firm thereat, I anticipate that they will meet with sufficient buyers to justify them in demanding and obtaining higher figures as the picking proceeds.

With Regard to the New Crop,

the more I hear concerning it the more difficult does a correct conclusion become. The patchy character of the growth creates uncertainty, from which it is almost impossible to extricate oneself. An experienced grower who is also an absolutely impartial and careful estimator, told me this week that he had never been so much puzzled. In his own plantations his crop was most unpromising. He had already condemned about twenty-five acres to be left unpicked, and expected only a very small crop of but poorish hops from the remainder. His immediate neighbours were in a similar condition, and an inspection of some 2,000 acres elsewhere in Kent had convinced him that the general crop could not nearly attain an average weight. But in Hampshire he had been through gardens that were a surprising as well as a pleasing picture. The bine, well washed, was perfectly clean and free from mould. Laterals had grown out splendidly, and the whole of some extensive grounds were crowded with well developed, healthy, and handsome hops, which he had hardly ever seen excelled for quality, while the yield of quantity would be all that could be desired. I am bound to add that this is the only report of such a character that I have received, and I am certain it must be quite exceptional and can only felicitate the growers on their good fortune.

However, when I take a general survey of the position and make allowances for all the improvements that have been manifest during the past few days, putting against it the run of mould produced by the recent muggy and cold weather, I cannot do otherwise than adhere to my previous estimate, expecting our official returns to give us an average very little beyond 6cwt. per acre. If this should even be exceeded by 1cwt. or so the growth will not be too heavy for the requirements of the year, and remunerative prices should consequently and will most certainly rule.

The English Acreage

has been reduced by 535 acres. This reduction is mainly found in Kent, where the hop area has been diminished by 474 acres. Hants, Surrey, and Sussex have also fallen off a little, the total reduction in the southern district being 688 acres. A slight increase is visible in Herefordshire, and Worcestershire has enlarged the area by 176 acres. The reduction on the whole does not exceed 1 per cent., but it is sufficient to account for a reduced average crop to the extent of over 200 tons of hops.

From the Plantations.

Special to the Secretary N.A.E.H.G.

SHOREHAM.—Hops are improving slowly, though the north-easterly winds blowing against the lews have done some damage. Unless we get warmer weather speedily the fruit will be small and our previous low estimate will not be reached.

SMARDEN.—Some improvement can be seen in part of the gardens hereabout, but hops are coming out very unevenly and the general crop must be light, not more than one-third of last year.

MAIDSTONE.—We hope to gather hops of good quality, though the yield will be below an average in quantity. Where good cultivation has been practised satisfactory results are apparent.

EAST PECKHAM.—I regret I cannot report very favourably of the average of gardens in this locality. There are certainly some pieces which will grow sound hops of good quality, but mould has been rampant in very many, and the efforts made for its destruction have been foiled by the weather. Our total crop will be light, and our average quality not too attractive.

CANTERBURY.—The cones have developed with the help of warmer weather, but the few days of recent cold winds have again been detrimental and promoted the spread of mould, which is to be found in most gardens to a greater or less degree. I fear but few of our hops will grow out to their full size, and the final prospect is no more promising than it was a week ago. Somewhere about half of last year's crop seems to be the best estimate I can make.

BIDDENDEN. The low temperature we have had lately has hindered development; cones will be consequently small, and will only come down light. Mould is spreading rapidly, and will lower both the quantity and the quality of the crop. I do not expect an average in this district of more than 5cwts.

BINSTED.—Washed hops have grown out fairly, and may produce an average crop. The unwashed will be almost a failure, certainly will not give more than 2 to 3 cwts. Only about half the acreage in this parish has been washed.

RYE.—The hops round our "ancient town" have distinctly improved lately, development has proceeded, and the prospect is perhaps a little brighter. The greater part of the gardens are now estimated at about a third of last year, though some may produce half, and in exceptional cases a little more. Picking will be general next week.

PETERSFIELD. There are some splendid hops in this neighbourhood, which stand out as quite exceptional to the reports generally current. At Weston the gardens are a picture, the bine being strong and fully fruited with well-developed hops. The prospect here both for quantity and quality is all that can be desired. Further up country near Midhurst there are also some very good-looking gardens. Mould has not been prevalent, and with good cultivation and incessant washing it appears as if satisfactory results will be attained.

WORCESTER. Recent rain has been beneficial in most of our plantations, especially where proper attention has been given to cultivation and washing, but where neglect has prevailed the bine is weakly and some grounds will be left unpicked, as the crop cannot be sufficient to pay for the labour.

STOURPORT (Worcestershire).—We have had a deluge of rain during the week ending August 25th, which will much enhance the quality and size of our crops, provided it is followed by warm weather. We may possibly grow nearly half of last year's crop here, but in the Ledbury district I saw quite 600 acres which cannot grow more than 1cwt. per acre.

HOLT.—Though hops were injured locally they have not recovered from the effects of the heavy blight, and therefore can only produce a very light crop.

CLIFTON-ON-TEME.—The severe blight, the worst we have had for years, has left its marks on all our plantations; some yards will grow a good picking, but where washing has been persevered in a moderate crop will be gathered.

HANLEY.—The rough weather and the change in temperature have been fatal to many hops, the sunshine being now reduced by 2cwt. to 3cwt. per acre, so that we do not expect to harvest on the average more than one-third of last year's crop.

BRANSFORD.—Our bine is light, and the prospect for crop does not exceed half of last year's. Some improvement is readily visible, but we want warmer and dryer days and nights, or else we shall not get full development.

BISHOP'S FROME (Hereford).—The season presents much irregularity, some of the well-known yards are promising well, while others are just as disappointing. The average of the bine is light, and although I think we are on the whole in a favourable condition as any district in our county, our average crop will hardly exceed one-third of last year.

LEDBURY.—The hops in this district have made very satisfactory progress during the last fortnight, and where the blight was successfully dealt with they have come out of burr a good size, and have an exceptionally clean and healthy appearance. With favourable weather present prospects point to a small crop of first-class quality. Picking will be general about the 10th inst.

KENT AND SUSSEX.—Since I last wrote (on July 24th) there has been no material change in the prospects of the hop crop. I have visited and inspected quite a considerable number of gardens situate in the border-land of both counties, and I cannot say that I was at all inspirited by what I saw. It is essentially a top crop, the bine having apparently lacked the vigour necessary to throw out the lateral shoots which usually do so much in helping the yield. I did indeed see one ground (I believe it is in the parish of Trant) which was an exception to the rule, and here 8cwt. and perhaps more will probably be gathered on each acre; but on the whole I am satisfied that your last week's estimate of 6cwt. is quite as much as will be realised; indeed, I think your view is a little too rosy, and that when we come to realise actual results the yield will be found nearer 5cwt than 6cwt., at all events, in this district. But we shall soon know how they "come down." On a few exceptionally early grounds picking commences this week. Some are to start next Monday if weather is favourable, but the work is not expected to be in full swing before the 10th.—MID KENT (August 28th).

N.A.E.H.

An important meeting of growers in conjunction with the Council of the National Association will be held at the Central Office, Hop Exchange, on Monday next, September 10th, at 1.30 p.m.

The prospects of the crop and market will be considered, and the terms of the circular issued annually to growers by the association discussed and decided upon.

It is hoped that a numerous attendance will be secured, as the course of the market may probably be largely affected by the course adopted by growers on this occasion.

Foreign Notes.

Nuremberg.

The attention of traders is now being directed to the new crop hops, which are arriving in some quantity. The quality of these deliveries is not so attractive as was expected, as most of them are unripe, being picked too soon to save them from deterioration. Consequently prices have been somewhat lowered from recent quotations, and this tendency is assisted by the desire of holders of medium or bad parcels of yearlings to clear off their stocks. For several parcels of very Württemberg of inferior character 120s. to 130s. have been realised, and as the news from the plantations indicates a very uneven crop which can only produce on the whole substantially less than last year, there is little doubt that a firm and rising market will be established as soon as supplies of the fully matured crop are put forward.

Belgium.

Business being at present confined to the most necessities of brewers, it might have been expected that values would have receded, but on the contrary firmness is maintained, both for 1899 hops and for forthcoming crop of this year's growth. The former are held at 55 to 67½ francs, and these are given at Alost, 8 marks, 1900, at 92½, while sellers demand

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interst and benefit to the members of the society*

95 francs. Poperinghe town hops are realising 95 francs per 50 kilos, equal to about 75s. per cwt.

Although the weather is favourable for the development of the cones, and the general aspect of the plantations is therefore improving, there is no advance on recent estimates of the yield, which will hardly reach and certainly cannot exceed one-half of last year's growth. Taken in connection with the probable deficiency of supply from other sources, the Belgian shortage will therefore create a higher market in the near future.

Belgian imports of hops during July last were nearly double those of the same month in the previous year, and the exports showed a considerable falling off from July, 1899. The largest quantity was sent from England, while the shipments to this country were merely nominal.

France.

Reports from Burgundy do not indicate any important change in the condition of the growing crop, which has suffered from unfavourable climatic influences, and the final output will therefore be considerably below that of last year. The quality is, however, expected to be generally good, and growers are declining to contract with buyers at the advanced rates they are now offering, as they expect still higher prices later on.

The French commercial returns for France for seven months ending July 31st last show that nearly 100,000 kilos of hops have been imported for French consumption in excess of the same period of 1899. The exports for the period have exceeded those of last year by about 35,000 kilos, giving a net increase of local purchases to the extent of about 65,000 kilos, or 1,300 cwt. The demand for beer in France is steadily expanding, and unless the growth of native hops is enlarged, this country must be a buyer of greater importance than heretofore.

America

The latest intelligence from New York reports the tone of the market as being considerably stronger. Buyers are operating freely, in order to secure available lots before the expected advance in value is confirmed. Already quotations have commenced to move upwards, and, as the previously reported shortage of the crop is now being generally accepted as inevitable, it is most probable that much higher prices will be heard of before long.

Further News from the Plantations

has not come to hand very freely, but I hear that the yards in Cobleskill Valley, Schoharie Co. (N.Y.), are in excellent condition and very promising, but the rest of the country looks poor, and the average will be 50 per cent. deficient of last year. The *Waterville Times* says that vines seem to be doing well, though in some cases blight is reported. Sales of small lots of early pickings have been made at 18 cents to 19 cents. In Oneida Co. (N.Y.) the opinion that hops will yield below an average is general, and growers are disinclined to contract unless at 15 to 20 cents, according to quality. From Puyallup (Wash.) I hear that, the weather being favourable, the vines are growing nicely, and arming out freely, being in full burr. A good crop is looked for. In King Co. (Wash.) the hops have been attacked by a grub which is threatening to destroy many yards. A report from Yuba Co. (Cal.) says hops are in fair condition, and promise at least an average crop.

Acreage of Hops.

The following is the preliminary statement, compiled by the Board of Agriculture from the returns collected on June 4, 1900, showing the acreage under hops in each county of England in which hops were grown, with a comparative statement for the years 1899, 1898, and 1897.

Counties.	1900.	1899.	1898.	1897.
	Acres.	Acres.	Acres.	Acres.
Gloucester	47	42	40	40
Hants	2,331	2,319	2,263	2,306
Hereford	7,287	7,227	6,651	6,542
Kent	31,514	31,988	30,941	31,661
Monmouth	–	–	2	2

Worcester	3,964	3,788	3,567	3,591
Total	51,308	51,843	49,735	50,86

(*For Hop Market Reports, see pages* 305, 307.)

At Ballycastle Fair, co. Antrim, on the 28th ult., there was a very small supply. Cattle in good condition sold well. Calves, second class, £3 to £3 15s.; third class, £1 15s. to £2 10s. Yearlings, second class, £5 to £7; third class, £3 10s. to £4 12s. 6d. Two-year-olds, second class, £8 10s. to £10 10s.; third class, £5 10s. to £7 10s. Three-year-olds, third class, £7 6s. 3d. to £7 10s. Springers, second class, £11 12s. 6d. to £14 10s.; third class, £9 5s. Good demand for sheep. Lambs, second class, 19s. to £1 4s.; third class, 10s. to 15s. Hoggets, second class, £1 6s. to £1 10s.; third class, 15s. to £1. Two-year-olds and over, third class, £1 to £1 3s. Young pigs, eight to ten weeks old, averaged about 18s. each.

THE GARDEN.

Except in the case of winter greens of sorts and a few other late crops, the season for growth is now over, and our efforts should be directed chiefly to promoting or encouraging the maturing principle. To this end all vacant plots or beds, as well as the spaces between rows of vegetable crops of all kinds, should be carefully hoed and cleaned of the weeds, which have been growing at an alarming rate recently, and indeed all through the season. Any exhausted crops, such as peas, dwarf beans, over-grown cabbages or lettuce, etc., should also be cleared away, so as to admit all the light and air possible to late peas, scarlet runners, Brussels sprouts, and other advancing crops.

Some seed of the Tripoli, Giant Rocca, or Spanish onion had better be sown at once. In some places these do well when sown early in September, but as a rule August is probably the better month.

Spinach—the prickly-seeded or winter variety, of course—is usually sown twice in August (early and late in the month), and again in the early part of September. In any case a good bed or two had better be sown at once. There is now a new Giant variety of this subject to be had, which is decidedly preferable to the old kind.

Turnips for autumn and early winter supplies should, of course, have been sown in June or July, but for late or spring use any time in August will do, and such small, late-sown roots withstand frost much better than the larger ones. I have had nice sound little bulbs in the spring from seed sown the first week in September, though this is rather late. Even if not required thus, these will afford plenty of often acceptable turnip greens in the spring.

Unless it has already been done, lose no time in stopping the growth of all outdoor tomatoes by pinching out the point of each beyond the last truss, and at the same time removing every vestige of lateral growth. The leaves, too, if at all luxuriant—and in most places they are very much so this season—had better be shortened to half or a third of their length. With fine weather next month a lot of the fruit now formed and swelling up will ripen yet, especially where the plants stand at the foot of a sunny wall.

The middle of September, or a few days later, is probably the best time to sow seed of tomatoes to stand the winter in small pots and afford the earliest gatherings next season.

The World's Harvest

The Hungarian Minister of Agriculture has just published his report giving an estimate of the world's crops. In regard to Hungary the report states that this year's wheat crops have undergone an improvement since the statement of July 31. It is also shown that the quality of the wheat has improved, owing to favourable weather while it was ripening and in harvest time, so much so that there appears an improvement in the quality over that of last year. Rye also shows an improvement in quality since the statement of July 31, but barley shows a falling off. As regards quantity, the report estimates the yield of wheat at from 4 to 5, of rye at from 22 to 23, of barley at from 15 to 16, of oats at from 13 to 14 per cent. less than the respective yields of last year.

The area of the land sown with winter and summer wheat amounts to 5.51 million yokes, with a yield of 36.63 million meterzentner, as compared with 38.45 million meterzentner last year, showing a decrease of 1.82 million meterzentner. One decimal eight million yokes were sown with rye, and the yield amounted to 9.5 million meterzentner, as compared with twelve million meterzentner last year, showing a decrease of 2.5 million. The land sown with barley amounted to 1.78 million yokes, with a yield of 11.30 million meterzentner, against 13.40 million last year, showing a decrease of 2.1 million meterzentner; 1.68 million yokes were grown with oats, and the yield showed a decrease of 1.6 million meterzentner. The maize crops are satisfactory in almost the whole country, and the yield is estimated at 35,000,000 meterzentner, as compared with 29.40 millions last year.

The report estimates this year's world's crops of wheat as yielding from 870,000,000 to 890,000,000 hectolitres, as compared with from 966,000,000 to 970,000,000 hectolitres last year. It estimates the yield of this year's rye crops at from 480,000,000 to 493,000,000 hectolitres, as compared with 567,000,000 to 570,000,000 last year; this year's barley yield at from 308,000,000 to 320,000,000 hectolitres, as compared with 324,000,000 to 330,000,000 last year; this year's oat yield at from 1,085,000,000 to 1,100,000,000 hectolitres, as compared with from 1,130,000,000 to 1,140,000,000 hectolitres last year; and the maize yield at from 979,000,000 to 992,000,000 hectolitres, as compared with 998,000,000 to 1,000,000,000 hectolitres last year.

At the time of sowing, the stocks already in hand amounted to:—Wheat, 70,000,000 to 80,000,000 hectolitres; rye, 29,000,000 to 32,000,000 hectolitres; barley, 8,000,000 to 10,000,000 hectolitres; oats, 41,000,000 to 54,000,000 hectolitres; maize, 28,000,000 to 35,000,000 hectolitres.

The report gives the following estimate of the average yearly consumption:—Wheat, 926,000,000 to 963,000,000 hectolitres; rye, 520,000,000 to 540,000,000 hectolitres; barley, 327,000,000 to 346,000,000 hectolitres; oats, 1,101,000,000 to 1,143,000,000 hectolitres; maize, 981,000,000 to 1,005,000,000 hectolitres.

THE WEATHER.

Monday (August 27th).—The country was divided between two types of weather. North of the Trent the conditions were governed by an Arctic anticyclone, which was increasing in intensity, with light north-westerly breezes and fair to fine dry weather. On the other hand, the southern districts were affected by a cyclonic system working up the Bay of Biscay, occasioning strong and increasing north-easterly winds, a gale and rough sea being experienced in some parts of the Channel, and rain falling in several localities, a large quantity being measured in the Channel Islands, the sky being dull and heavy generally over the more southern counties. Temperature was maintained at a level rather below the normal nearly everywhere, few of the afternoon maxima being as high as 65deg., the metropolis, with its gloomy sky, succeeding in only just passing above 61deg.

Tuesday (August 28th).—The Arctic anticyclone continued to increase, both in extent and intensity, its central space occupying North Britain. This had caused the cyclonic system of the previous day to travel on an easterly course across France, and it was at the same time filling up slowly. While, therefore, the winds still held mainly from some point between north and east over our islands, its strength along the southern and south-eastern coasts had greatly diminished. In most parts of the country the weather was fair or fine and dry, but the south-eastern counties were under a dense canopy of gloomy clouds, with a little moisture floating in the air. Many of the northern and western night temperatures had been well down in the forties, and the north-east wind kept the afternoon values below the normal all round, London reaching 61deg.

Wednesday (August 29th).—The entire area of the United Kingdom was completely within the influence of the great anticyclone, whose central space has been over North Britain since the beginning of the week. Gentle to very light breezes from some easterly quarter prevailed over nearly the whole country, with the weather from overcast to cloudless, the sky dull and gloomy locally, and a slight drizzle falling in Dorsetshire. With the weaker breezes the feeling was not so cold, and the temperature, which had been rather high over the southern counties in the night, was improving, many afternoon maxima being sixty-five degrees and upwards, London touching sixty-nine degrees.

Thursday (August 30th).—An anticyclonic type of atmospheric conditions was again in the ascendant, the whole of the western half of Europe being occupied, and the core of the system lying over the eastern counties of England throughout the day. Very light breezes from all directions were general at first, with dry weather, but with a cloudy and rather dull sky, and mist or gloom in many localities. Occasionally there were fine, bright intervals. As the day advanced there were indications of some change approaching the north-western coasts, where the barometer was giving way at an increasing rate, the wind backing into the south-west and freshening decidedly, accompanied by rain in the north of Ireland. The air had lost its cold harsh feeling, and temperatures in the sixties were experienced very generally.

Friday (August 31st).—A distinct change in the type of atmospheric conditions was observable over the British Isles to-day. The anticyclone of previous days was slowly drifting south-eastward for the Continent, and the cyclonic disturbance which had been indicated out on the Atlantic on Thursday was travelling along the north-western and northern coasts, while another one seemed to be about to follow it. The wind had drawn into south-west and south, and blew fresh or strong in exposed situations, a moderate gale in the extreme north-west, rain falling in considerable quantities in Ireland and Scotland, while England had a good deal of morning mist, succeeded by a fair to fine day. There was a softer feeling in the air, and the night and day temperatures showed a disposition to increase all round. In London, the thermometer rose as high as seventy-five degrees.

Saturday and Sunday (September 1st and 2nd).—During these two days atmospheric conditions of a very changeable type have been experienced over the British Isles, cyclonic and anti-cyclonic systems following each other in quick succession, the latest reports showing the country to be once more coming under a large system of high pressure, which promises a renewal of dry, quiet weather. The wind was mostly from a south-westerly quarter on Saturday; it has since become northerly, and from both directions brisk breezes have been felt in places. Rain was universal through the first half of Saturday, and in several districts the amounts measured were rather large, two-tithis of an inch in London. Yesterday was wet and foggy across the mouth of the Channel, the weather elsewhere being on the mend. Temperatures in the sixties were general on Saturday, but Sunday was cooler, only southern localities reaching 60deg.

FARM PROSPECTS.

Durham.

Unsettled weather delays harvest work, and agricultural prospects are not so favourable as they were a few weeks ago. Corn crops have suffered from rain and wind. Cutting is now general, but very little secured as yet. It is doubtful if even wheat, which was so very promising, will reach an average crop, while barley and oats will both be something below. Potatoes and turnips are still well spoken of, though they have had rather much moisture. Hay was a good crop, but a portion won in only moderate condition. Grass is plentiful, and live stock is doing well.—R. (September 1st).

Hampshire (East).

Harvest is almost completed. A few fine days will now ensure its conclusion. Threshing of new wheat is very disappointing. I have heard of two cases where the yield is only three sacks, and on land which is farmed above the average, I know of yields of only five and seven sacks respectively, and the corn itself is not such as will commend itself to millers. Root crops are now coming on well and will be very good if only the weather continue warm.—G. S. M. (August 30th).

Lancashire (North).

The past month taken generally has been quite propitious for the farming interests of this part. The heavy rain of early August did not do much damage to grain (wheat at any rate being too thin on the ground to take much harm), and with fine weather later crops have matured, been cut, and, generally speaking, safely stacked. So little threshing has been yet done that we cannot speak definitely as to the yield of cereals, but have reason to believe that no one crop will be up to the average, and in all probability we shall find wheat 8 to 10 per cent., oats 10 per cent., and barley 5 per cent. under. The rain which caused fears as to cereals greatly benefitted roots, and during the month turnips and mangolds have made marked progress, and look like marking a full average. We are pleased to note an absence this year of the general complaints of finger-and-toe, and whilst straw will not be plentiful a large bulk of roots will be available for winter feeding. Potatoes are variously spoken of, some districts complaining of disease making great strides, whilst other localities claim to be perfectly sound, and the crop certainly, generally speaking, is getting off a heavy crop. The opinion we come to as to yield is that it will probably show, taking all things into consideration, about 5 per cent. under average. Pastures continue full of meat, and all stock is doing well. Prices of beef and mutton keep up well, and considerably above the range of values we have been accustomed to of late years. Lean stock, it is needless to say, maintains the advance established in the early spring, and both breeders and graziers should be quite satisfied with their operations so far. An active demand is still experienced for horseflesh, whether heavy or light. Orchards are well supplied with fruit, although price offers to be low. The farming classes should therefore be, and are, on the whole, very cheerful.—E. J. S. (Aug. 31).

Middlesex.

Prospects rather gloomy. Little sun, much wind. The afternoon farmers about here (and their name is legion) have allowed much of their hay to spoil. The wheat ripened too quickly, and will yield badly, with little straw. On the whole, I consider the season fairly good. The grass and roots have continued to grow. There is plenty of labour about here, but it is principally employed in building operations, and many hands are employed in road-making upon the many estates that have been given over to the builders. Fruit is very abundant and practically of little value, the markets being glutted with windfalls. Several Welsh strings of good horses and colts have gone through to Barnet September Fair, and will doubtless sell well.—F. K. (August 31st).

North Devon.

Taking 100 to represent an average crop, I estimate wheat at 100, barley 95, oats 100, potatoes 65, roots 100, and grass 80. The first crop of early potatoes has been good, but it is feared that late potatoes will be one-third diseased. Corn crops seven-eighths harvested, mostly in good condition.—J. H. (Aug. 30).

Somerset.

With rain during the early harvest the prospect of roots and grass was greatly improved, after which the weather was all that could be desired for harvest operations, and on farms fully equipped with labour the whole was secured in fine condition; but where the fine weather was not taken full advantage of the harvest is not yet completed, and some damage has been done to the crops and extra labour entailed by the recent rains, which, apart from the harvest, have been beneficial to all farm crops and operations. The corn crop generally should prove about an average, whilst roots are more promising than for many years. The young seeds also are a full plant which has not been the case for some years past, whilst grass is sufficient, and the late rains will continue its growth. The teams are now busy on the stubbles, and the sowing of mustard, trifolium, etc., is proceeding apace. Sheep and cattle generally have done well during the summer, and there is now a prospect of a sufficient supply of food during the autumn and winter. The weather appears to be again settled, and there is every prospect of the later harvest being carted in good condition.—S. K. (Aug. 30).

Shropshire.

Beautifully fine days to close the corn harvest. Stackyards filling better than expected. A nice breeze of wind fans the workers and tempers the heat. Dutch barns with iron roofs save a lot of thatching. No threshing here yet.—J. G. (Aug. 30).

Foreign Prospects.

FRANCE.—Wheat crop advices continue to be not very precise, and any approximate estimate is hardly yet obtainable. As the threshings advance some foresee an average outturn, others a deficient one, and these advices vary in the same region. The quality is generally fine, but the threshings do not give what the heavy ears led one to suppose. Oats are of variable quality, yield moderate, and specific weight very irregular.

SPAIN.—Latest postal advices from Madrid speak of heavy rains and inundations in the provinces of Corunna and Barcelona, with much damage to all the outstanding crops. According to official data the yield of the wheat crop in 1899 reached 11,600,000qrs., and it is estimated by experts that from the present outlook the crop will exceed 14,440,000qrs., it being affirmed that it is one of the biggest crops in the Peninsula for many years.

ITALY.—A recent report from Milan states that the wheat crop in the upper provinces is estimated at under an average. In Piedmont the outturn is 10 to 20 per cent. less, but of excellent quality, and similar reports come from Emilia. In Venetia the yield is inferior to last year's, and condition leaves something to be desired. In Lombardy the crop is a fine and abundant one. Maize is in general satisfactorily spoken of, especially in Piedmont, where the quality is good and a full average.

HOLLAND.—In several localities the weather for some days was very bad and prevented farmers from carrying their still outstanding crops, but with a change to drier conditions the wheat and oats were being rapidly ingathered.

GERMANY.—Harvesting of all the crops is nearly finished, and results are rather favourable for oats and wheat, although a little under that of last year. Rye, however, is affirmed to be under an average.

RUSSIA.—According to the latest agricultural report the condition of the autumn crops has in most instances improved under the influence of more favourable weather, and in general in European Russia the yield is expected to be above an average and good over a considerable portion of the black soil zone. With regard to the spring crop it must be observed that owing to the tardy setting in of mild weather the growth and development of the grain was much delayed, and the harvest in a great measure depends upon further meteorological conditions.

UNITED STATES.—The *Cincinnati Price Current* says the past week has been favourable for maize, and indications now suggest about three points decline for August. The interior offerings of wheat are tending towards a reduction of holdings, and the sentiment is strengthening.—*Dornbusch.*

On Friday afternoon, at the meeting of the Northwich Rural District Council, Mr. Millington presiding, Dr. Gough (Medical Officer of Health) reported that the police had notified to him than anthrax had broken out on a farm at Cuddington, near Northwich. The sale of milk from the farm had been stopped, and none would be utilised for human consumption until the veterinary inspector reported the premises free from infection. Mr. Holland (Little Budworth) asked how it was that the Rural Council had been notified when they had no power. Dr. Gough: We have no power so far as notification is concerned, but we have a voice in the distribution of milk. Anthrax is undoubtedly communicable to human beings, and in that way we have control. The Agricultural Board are the authority who deal with it, and the Chief Constable is the responsible party. They are empowered to deal with it in a very drastic manner. Mr. Holland asserted that it had been discovered in other cases that the disease was amongst the young stock and not in the milking herd. Was the milk stopped in that case? Dr. Gough believed that in the present case it was amongst the milking stock. Mr. Gerrard (Weaverham) regarded it as a very serious thing that the entire milk supply should be stopped from one farm simply because a single cow had had the disease and had been killed. Dr. Gough said it was laid down that no milk was to be sold until the veterinary surgeon was satisfied that there was no further danger of infection.

LETTERS TO THE EDITOR.

The Horse and the Empire.

SIR,—May I be allowed a little space to [illegible] to [illegible] my letter, and to say yet another word on this important subject. Since the appeal was made on August 14th a move has been made, and a small committee has been formed locally, consisting of Mr. William Pinckney, treasurer, manager of the Old Bank, Sherborne; Colonel Lovett, formerly Master of the South Wilts Foxhounds; and myself, the idea being to get a strong committee formed to meet in London and endeavour to start with [illegible] which one could go to the general public for a shilling membership fund, and so create a general interest in the question. The difficulty will be to obtain the £5,000; if it is not forthcoming the thing may fall through, as after the election it would not be much use. It is most important, therefore, to strike now. The politicians do not mean to trouble about it, and the only way is to get an expression of opinion from the people themselves, which could be done through a Horse and Empire Society, if they were properly educated up to the case in point. For my part, I do not believe in neglecting the question. I do not believe in relying on a chance supply of horses from beyond the seas when we may be opposed by hostile and active navies. I hold that the certainty of an annual supply in time of peace, and a strong reserve which ought to be an equal certainty in time of war, would be a most untold blessing towards the security of the nation. The only efforts we are making at present to encourage horse breeding are a sum of £5,000 in England and another of £3,000 in Ireland. These sums are provided by Government and divided among the owners of the sires and mares in certain districts. Not one of the foals that are bred on those lines are really available for the English Army, inasmuch as they are all bred for the open market and are mostly bought up by the foreigner and the big dealers. Some get into our Army, but not many. In Ireland especially the foreign remount buyers sweep the place. Would it not be better if we bred for the English Army instead of the French, and made sure that the effort that certainly ought to be made should result in the benefit being assured for those who needed it? But, as I said before, it cannot be done without money, and if that is not forthcoming the thing must fall to the ground.—Yours faithfully,

W. PHILLPOTTS WILLIAMS

Llangarran, Salisbury, August 26th.

Pigs at the Lancashire Show.

SIR,—Had "Anon" endeavoured to scribble something to prove up to the hilt that portion of your footnote in which you truly state that "many persons show by their actions that they hate a breeder more than they love a pig" he could not have achieved a greater success.

Instead of offering that apology which was due to your readers for his mistatements, which we will charitably attribute to his want of knowledge, he goes off at a tangent to attack someone whom he imagines might be "Nemo." The breeder who has aroused the jealousy of "Anon" and his friends by his long-continued and unparalleled successes is, I believe, quite capable of defending his actions. There appears to be nothing further in "Anon's" second contribution calling for notce, save that in it, as in his former letter, there are errors which tend to show either ignorance or something worse on his part. He wrote: "As to pigs at the Bath and West, the entries average 6½ per class; at the R.L.A. Show 8¼ per class, and was (sic) filled with quality." The actual facts are: Entries at the Bath and West of England, 6¾ per class, or 135 entries in 20 classes, at the R.L. not quite 8¼ per class, or 90 entries in 11 classes. Then in the classes for younger pigs at the Bath and West of England pairs of pigs were shown, and at the R.L. only single pigs. In this way there was an increase of 30 pigs, or of one-third the total entry at Rochdale. But even more important still, nearly two-thirds of the Rochdale winners would not have won at the Bath and West Show had they been there.

NEMO.

[*** No good purpose can be served by the continuance of this correspondence, which must now be closed. ED. *M. J. F.*]

LITERARY NOTICES.

We have received a copy of a pamphlet on "India and Her Wild Birds," written by Sir Charles Lawson. It demonstrates the need of preserving those marvorous birds of India, whose wholesale slaughter for the sake of their plumage [illegible] fields at the mercy of insect pests that [illegible] deplorable scarcity of [illegible] and the [illegible] of human ratepayers, besides inflicting penury on individuals and [illegible] on the State. The Society is endeavouring to enlist in India Society for the Protection of Birds, and appeals for the support of all interested in the Indian Empire.

Anthrax in Dorset.—Anthrax is a troublesome [illegible] has broken out on a farm at Bradpole, in West Dorset, occupied by Mr. Miller. The Local Committee was immediately summoned, and vigorous measures have been adopted with the view of preventing the disease spreading.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: No alteration since our last report. Barley: 3d per qr dearer. Wheat advanced 6d to 1s per qr on the week. Oats: Made 3d per qr more money. Maize: Improved 9d per qr. Flour: About 6d per sack dearer. —NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—Old home-grown wheat is scarcely to be had, and the new crop is so backward this year that there is practically nothing submitted either here or on the country exchanges. Fine white from Kent held for 32s per qr delivered. American descriptions again rather firmer. In the flour market consumers were again determined to pause, apart from sellers being reserved, and there was no alteration fixed in either English or American brands. The London Millers' Association made no change at this afternoon's meeting. Grinding barley, on continued scarcity, is upheld. Persian still supplies any requirements, while a little Russian is obtainable. Black Sea remains off the market, and American is very scarce. English malting (fine), 30s per qr, imperial measure. Californian brewing, about 27s. Oats unaltered, but with next to nothing doing in most cases it was difficult to test to-day's market. Maize in small supply, and, while assisted by America, again tended upwards.

Mark Lane, Friday.—English wheat remains extremely scarce, and is inclined to be dearer. Scarcely anything is submitted, while threshings make the same slow progress. Fine white, 32s 6d; and red, 31s 6d per qr 504lb; old crop in the meantime not being mentioned. Stocks of flour continue ample, but the market showed no deviation. The London Millers made no alteration at their meeting this afternoon. Flat maize lost part of the advance established during the week, and was devoid of incident, even at the concession. Meanwhile, the supply on hand continues small. Mixed American quoted at 20s 7½d sellers ex ship (to which buyers failed to respond during the afternoon), and 20s 9d ex quay. Odessa, 21s 6d ex ship to come, and 25s 3d ex quay. The market for oats is none too well supplied at present, and sellers still maintain reserve, while a good country trade is reported this week. Grinding barley unaltered, Persian still supplying requirements, while named at 17s 9d ex ship, 18s ex quay. Black Sea remains unobtainable. Although there was insufficient passing in beans and peas to make a market, holders still command the situation, scarcity being greatly felt, and arrivals come up slowly.

COUNTRY.

Ashford, Tuesday.—Samples of new corn were not numerous, though wheat, oats, and beans were all represented. English wheat was firm, and about 6d dearer on the week. New black oats, 18s to 20s, but some light ones did not command more than 16s to 17s per quarter. New white oats, 19s to 22s; and old ones about 1s more. New tick beans, 29s 6d to 31s; and old ones, 32s 6d to 33s 6d. Round maize, 26s to 27s; and flat, 23s to 24s per quarter. Flour, scaling, 23s; seconds, 25s; households, 26s; whites, 28s per sack.

Aylesbury, Saturday.—Increased show of new wheat, which realised 6d per quarter advance on last Saturday's rates. Barley, oats, and beans in short supply; prices unchanged. Old wheat, 30s to 32s per quarter; new ditto, 27s to 29s.

Banbury Thursday.—Wheat, white (old), 30s 6d to 31s 6d per qr; wheat (red), 29s to 30s per qr; barley, 25s to 30s per qr; beans (old), 32s to 34s per qr; oats (new), 20s to 22s per qr; oats (old), 18s to 19s per qr. New wheat in small supply at about last week's prices.

Braintree, Wednesday.—Corn in very small supply, but a firm trade at last week's prices. A few samples of new barley showing, quality irregular and prices unsettled.

Brigg, Thursday.—There was only a moderate attendance, and very little grain on offer. A few samples of new wheat were shown, and prices may be quoted at 28s to 29s per qr. Old wheat, 30s to 30s 6d. A little new barley was offered, which realised about 28s to 30s per qr. New oats, 18s 6d per 24 stones.

Bristol, Thursday.—At our market to-day there was a rather moderate attendance. Foreign wheat in demand at about 6d advance. English rather more offering at about 3d to 6d dearer. Quality variable. Flour in better demand at about 6d advance. Barley 6d. Maize 1s dearer. Oats about the same.—GRACE BROTHERS.

Cambridge, Saturday.—With the exception of to-day, we have had a week of fine harvest weather, and farmers have made good progress with their crops. In this immediate neighbourhood harvest is practically finished, but in the Fens a good deal remains to be done. The trade has been quite firm, with a steadily hardening tendency. At this market to-day we had a fair show of new wheat, which met a good demand at 6d to 1s more money for dry lots. Many samples lack condition. Red wheat 27s to 31s, and white up to 31s per 504lbs; old makes up to 32s. Barley was also in fair supply, with some little inquiry, but prices are not yet established. A sample of new beans made about 30s.

Canterbury, Saturday.—Wheat rather firmer, supply moderate. Some good barley showing. Closing quotations: White wheat, 31s to 33s; red ditto, 29s to 32s; grinding barley, 20s to 24s; white oats, 18s to 21s; ditto black, 16s to 20s; peas, 28s to 30s; tick beans, 30s to 32s; mazagans, 28s to 29s; flat maize, 21s 6d to 22s; round, 26s to 27s per quarter; winter tares, 6s 6d to 7s per bushel.

Carlisle, Saturday.—Small supply of oats in our market to-day. Fair sale at unchanged prices, 22s to 24s; new, 20s 6d. —THOMAS ROBINSON.

Chester, Saturday.—There was a small attendance, and little trade passed in English grain. Old wheat firm at last week's prices. New in small supply, quality and condition variable. Old oats in good demand, and fully 3d per bushel dearer. Indian corn sold freely at 3d per sack advance. Quotations:—Old white wheat, 4s 5d to 4s 6d; and new, 4s 4d per 75lb; new grinding barley, 3s to 3s 6d per 64lb; old beans, 5s 6d; and new, 5s per 80lb.

Colchester, Saturday.—There was still only a small supply of wheat here to-day; trade firm at about 6d per qr over last week. A few samples of barley; prices irregular; oats and beans firm.—FRANCIS AND CO.

Cork, Wednesday.—208 cwt barley, 7s 6d per cwt; 182 cwt black oats, 5s 4d to 5s 6d; 45 cwt white oats, 6s 6d.

Dorchester, Saturday.—New English wheat to hand in very variable condition, and millers cautious in dealing. Prices from 26s to 29s; old wheat firm at 29s to 31s. Foreign 6d per quarter dearer than last week. Grinding barley, owing to scarcity, rather dearer. Feeding stuffs met a firm trade. Maize dearer.

Glasgow, Wednesday.—There was the usual attendance at our Corn Exchange to-day. Wheat firm, and some descriptions held for 3d per boll advance. Flour firm, and sellers ask an advance of 3d to 6d per sack, but without response. Grinding beans and Canadian pease are firm, and held for an advance of 1½d per boll. Home oats, new and old, firm, and in good request. Foreign oat and barley steady. Oatmeal, new and old, quiet. Bran and thirds firm, but unchanged.—GIBSON AND CLARK.

Hereford, Wednesday.—Small attendance; values of grain without change, with lower prices for wheat, but few samples offering. Foreign barley, wheat, and maize 3d to 6d per quarter dearer. Quotations: Wheat—white 3s 6d to 3s 10d per bushel; red, 3s 6d to 3s 8d; barley, 3s to 3s 9d; oats, 2s 3d to 3s; beans, 3s 10d to 4s; maize, 2s 8d to 3s 2d; vetches—winter, 4s to 6s; and spring 3s 6d to 5s.

Ipswich, Tuesday.—Very little wheat on offer; old worth from 30s to 32s for red, and 33s for white. Samples of new fetched from 28s to 30s, according to quality and condition. A sample or two of new barley, quality unsatisfactory, and prices not fixed. Oats steady. Maize rather dearer. Beans and peas unaltered.

Leeds, Tuesday.—The weather has been more favourable the last few days, still much corn has been stacked in defective condition, and reports of short yield become more numerous. The wheat trade though firm is short of activity, millers stoutly resisting the advance which holders and shippers demand, consequently the business passing is limited at 6d over last Tuesday's rates. Maize 3d and beans 6d dearer. Oats steady.—DUNNS AND CO.

Leeds, Friday.—The demand for both English and foreign wheats continues limited, without any further advance upon Tuesday's prices, new English coming in more freely, prices varying according to condition. Oats and peas show a further hardening tendency. Barley, maize, and flour firmly held.

Leicester, Saturday.—Fair attendance, with moderate supplies of wheat, in very variable condition. Fine samples firm, inferior slow trade. Prices, 31s to 34s per 36 stones. Beans quiet. Fine oats in good demand.

Lincoln, Friday.—Several samples of new wheats shown, condition inferior, prices 29s to 30s; old wheats 6d dearer, foreign 6d higher. New oats also inferior in quality; old oats made full money. Old beans very dear. Peas firm. Maize unaltered.

Liverpool, Friday.—Wheat quiet with a small trade. White wheats ½d dearer, reds unchanged. Flour a quiet trade at Tuesday's prices. Maize, the demand has been disappointing owing to lower advices from America, and only a moderate consumptive trade has transpired for mixed at ½d to 1d over last Tuesday. European and Plate are steady at ½d improvement. Barley is firm for feeding and ½d dearer. Brewing has a good demand, and full prices are obtainable. Beans steady with a moderate trade. Peas firm with a fair business at ½d advance. Oats have a good trade for English, but without alteration in values. Foreign are firm and ½d dearer. Oatmeal is dull, unchanged. Oilcake has a better inquiry, and prices in sellers' favour.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Wheat did not sell so freely to-day as last week. The supply of new, though not large, sufficient to check any advance; so at about former quotations is the report. Barley of this season does not show yet; old is at previous rates. Oats are 3d per qr dearer, and maize 9d per qr up. Beans and peas, very little trade. Winter tares are rather a high figure, 7s to 7s 6d per bushel. Rye is about 26s per qr. No change in brank, hemp, sedge, or millet.

Manchester, Thursday.—A firm tone has prevailed during the last few days, and English wheat commands 6d per qr more than a week ago. American kinds are raised about 1½d per cental. Flour keeps in only moderate demand, but prices here also are 6d per sack higher. Indian corn has gained 2d per cental on the week. No change noticeable in oats, peas, beans, or barley.

Newark, Wednesday.—Only a small show of grain at this market. There were a few samples of new oats and wheat on offer, wheat making 29s to 31s, according to condition. Oats varying in price from 17s to 19s.

Newcastle-on-Tyne, Saturday.—At to-day's market English and foreign wheat ruled steady at last week's rates. Maize firm, and in the favour of sellers. Barley, peas, and beans without change in value. Scotch oats in favour of sellers. Foreign no change. Flour 6d per sack dearer on the week.—JOSEPH POLLARD AND CO.

Newcastle-on-Tyne, Saturday.—The wheat market remains firm but not fast; however, factors seem to have a promising time. Flour tends better. Feeding stuffs closed unchanged, yet the tendency is against buyers.—G. W. WATSON and CO.

Northampton, Saturday.—Wet unfavourable weather interferes with harvest progress. A very limited attendance, with a small supply of samples, and demand inactive, caused prices to be similar to last week. A few samples of new wheat were on the market. White wheat, 32s to 33s; red wheat, 30s to 32s; new wheat, 29s to 30s; grinding barley, 22s to 24s; oats, 19s to 21s; old fine, 24s; beans, 30s to 35s for fine old; flour, 23s to 27s.

Norwich, Saturday.—Wheat was again a poor show at our market to-day, and very little business passing. The weather of the past week has been mostly fine, enabling farmers to get on well with the harvest, which is now in a forward state. New wheat, 30s per qr; old wheat, 32s per qr. Corn Inspectors return for the week ending August 27th, 1900:—Wheat, 1349-3, 27s 10½d. Barley, 22-3, 25s 0½d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat, fair supply of the new crop, quality and condition various: prices ranged from 29s to 31s 504lbs; old parcels, 31s to 33s. Only a very few samples of the new crop of barley on offer, condition fair, quality moderate, not sufficient passing to test prices. New oats poor in condition and quality, 18s to 20s. Old 6d dearer on the week. Old beans scarce and 1s higher.—ROBERT HUBBLE.

Oxford, Saturday.—Very little wheat offering, making 6d to 1s over last week. Old, 31s to 34s; new, 29s to 32s. A few samples of barley offering, quality very various, and values scarcely established.

Peterborough, Saturday.—We have had fine weather this week, and a fair quantity of corn has been got together in good order. There has been rather more wheat offering to-day, which met a good demand, but at prices about 6d under those of last week. Not much spring corn showing, and values are not yet unsettled.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was an average attendance at our Corn Exchange to-day. Prices for all stuffs remain quite firm, a little dearer on the week if anything. Flat maize is making 21s 9d; round, 22s 3d; barley, 20s 6d; and oats (Libau), 16s 6d. Fine weather has again set in, thus enabling the farmers to get on with the harvest.—ORLANDO DAVIS AND CO.

Reading, Saturday.—A great scarcity of wheat was the chief feature of to-day's market. There was very little offering and the trade naturally ruled firm, the rates of last market being always maintained. There was only a limited supply of barley also, and a firm business was experienced at prevailing rates. The supply of other descriptions of corn was about the average, and prices did not change from last week.

Ripon, Thursday.—Old wheat and round maize show a firmer tone; other kinds unchanged. The show of samples is light, with a poor attendance. Prices:—Wheat, English, 30s to 31s; ditto foreign, 31s to 35s; barley, grinding, 24s to 25s; oats, 22s to 25s; round maize, 27s; flat maize, 23s per qr; beans, 11½d per stone.

Romford, Wednesday.—Wheat was fully 6d per quarter dearer than last week. Red wheat made from 29s to 31s 6d, and white wheat 30s to 32s 6d per qr. There was only a small supply on offer. New rye made 26s to 27s per quarter.

Sheffield, Tuesday.—The attendance was moderate. Good wheat very scarce, old being as much as 1s dearer. Maize and beans gradually advancing, and in the old trade there is a very much greater demand at considerably enhanced prices. Quotations:—Wheat, white, 33s to 33s 6d; red, 32s to 33s per 504lb; oats, old white, 26s; ditto old black, 22s per 336lb; peas, grinding, 28s to 29s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small, 26s to 29s; ditto American mixed, 22s 6d to 23s per 480lb.

Spalding, Tuesday.—Wheat was 6d per qr dearer, at 29s to 30s per cwt. There was mostly new wheat, there being very little old on offer. New oats, 17s to 18s; old oats, 22s; new barley, 25s to 30s. Peas and beans were steady at previous prices. All new corn was spoken of as in moderate condition.

Stamford, Friday.—Only a few samples of new wheat, showing, which made 28s to 29s 6d; old wheat, 30s to 31s 6d. Very little barley showing. Old oats, 19s to 22s; new, 17s to 18s. Maize 6d dearer.

Sunderland, Saturday.—Farmers being engaged with harvest work, which proceeds slowly owing to unsettled weather, are offering but little grain. Wheat 6d to 1s dearer. Barley and oats held for higher prices. Arrivals coastwise: oats, 224 qrs; foreign wheat, 5,240 qrs —E. AND F. RICHARDSON.

Taunton, Saturday.—Wheat a firm trade at last week's full prices. Grinding barley and maize 6d per qr dearer. Oats and beans steady.

Wakefield, Friday.—English wheats are quoted 1s, and foreign a turn dearer, on our market to-day; but the business passing is only nominal. We quote feeding stuffs 3d per quarter dearer, with the exception of oats. A few samples of new Yorkshire barleys at market, and, should the present fine weather continue, we expect to see some good quality shortly.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—Wheat remains exceedingly firm with an upward tendency, as there can be no longer any doubt that this year's yield is a deficient one. Foreign wheats are generally 3d, and old English 1s per qr dearer on the week. New sells irregularly, quality and condition being very various. Maize and beans 3d dearer. Oats unchanged.—DUNNS AND CO.

Winchester, Saturday.—A very short supply of wheat on our market to-day, which met a firm trade at 6d to 1s advance on the week. Barley, little offering, grinding sorts 6d higher, with fair inquiry. Oats unaltered. Maize 3d to 6d higher. Flour 24s to 25s.—FEAR, COLEBROOK, AND CO., LTD.

Wisbech, Saturday.—A small supply of grain at market; samples of the new crop vary in quality and condition. New wheat sold at 28s to 30s; old up to 32s. New oats, 17s to 19s; old, 21s to 24s. Barley, 25s to 28s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—A very quiet market, owing to farmers being busy with their corn harvest. English wheat, 13s per 216lb, springs 6s 4d, and Duluths 6s 6d to 6s 7d per cental; oats, 14s to 15s; beans (old), 14s to 15s per 196lb; flat maize, 22s 9d per 480lb.

Worcester, Saturday.—Few more samples of new grain on offer, mostly in damp condition; trade slow. Old wheat scarce and more firmly held. Barley, maize and oats show a further hardening tendency. Old white wheat, 30s to 32s; red, 28s to 30s.

York, Saturday.—Few samples of wheat offering, very firmly held at 6d per quarter advance on last week's prices. The following are the quotations:—Fine white, 30s 6d to 31s 6d; red and mixed, 29s 6d to 30s 6d per quarter of 36 stones. The price of new malting barley is hardly fixed yet. Old oats are 6d to 1s per qr dearer. Old black, 21s to 22s; old short, 22s to 24s; new black, 18s to 19s; new white, 19s to 20s per qr of 24 stones. Rye, about 7½d to 8d per stone; old beans, 11d ditto. The average prices of corn, according to the official weekly return, computed by standard imperial measure, are as follows:—Wheat, 28s 6d; oats 19s 3d.

FOREIGN.

The Antwerp wheat market has shown a firm tone, and prices have even been tending upwards. The yield of wheat in some of the French country districts is stated to have been over-estimated, and threshing has been attended with some disappointment. If the quality of the grain is excellent, the quantity is somewhat deficient: it is still thought, however, in some quarters that the year's crop will prove about an average one. Foreign wheat is standing at a somewhat higher level than French, but a large number of French farmers being in want of money are pressing sales, and are sacrificing the advantages which they might derive from the situation. Business in wheat has been quiet at Paris, the milling trade having only purchased sparingly. Flour for consumption has shown little change in the French capital. Disposable wheat has remained without variation at Konigsberg and Dantzig. The Russian provincial wheat markets have been inactive; the supplies brought forward have been restricted, but they have been sufficient to meet the demand. Prices have, however, been about maintained. In the Southern Russian ports there has been some demand upon export account, and the general tendency has been good. It appears to be now considered that the harvest in Southern Russia will be attended with much less satisfactory results than had been hoped for, the wheats having suffered from excessive heat and boisterous winds. The quantity of wheat now *en route* for the Continent returned at 1,085,000 qr, as compared with 1,430,000 qr at the corresponding date of 1899. The total of 1,085,000qr representing the quantity of wheat now *en route* for Europe is made up as follows:—France, 45,000 qr; Belgium, 360,000 qr; Holland, 290,000 qr; Germany and the North, 180,000 qr; and Italy, Spain, etc., 210,000 qr.

Hamburg, Saturday.—Weather fine and seasonable. We have a firm market for all articles. New grain is as yet in scanty supply, and quality varies considerably, the effect of too much rain being perceptible in many of the samples. The imports during the last two weeks amounted to 11,893 tons wheat, 6,450 tons rye, 4,032 tons barley, 32,361 tons maize. Wheat in fair demand and firm in value. Offers of new are scarce as yet. Fine new red Holstein and Saale is selling at 28s to 28s 6d per 504lb f.o.b. Fine River Plate on the spot is held at 30s 9d to 31s 9d per 504lb f.o.b. Hard Winter 2, to arrive, 28s to 28s 6d per 480lb c.i.f. Hamburg. Prices of rye are tending upwards, 9 10-15 South Russian prompt is held at 22s 9d, 9 15-20 at 22s 3d per 480lb c.i.f. Hamburg. There is now some business doing in malting barley, finest mellow Saale having been taken for England at 39s to 41s. Our brewers took good Saale at 32s to 34s, fine up to 38s, Mecklenburg and Prussian at 30s 6d to 33s per 448lb f.o.b. Good Bohemian is offering at 35s to 37s, fine at 39s to 40s 6d; white, fair quality of Moravian is held at 41s to 42s f.o.b. Feeding barley firm; South Russian on the spot is selling at 19s 9d, September-October shipments at 18s 6d per 400lb c.i.f. Hamburg. Russian and Danubian sellers rebought here. Maize in fair demand. Mixed prompt is selling at 20s 3d, November shipment 19s 9d, January-February 19s 9d per 480lb c.i.f. Hamburg. River Plate floating, 20s 3d c.i.f.—JOHN TAYLOCK.

Hamburg, Saturday.—Barley report: Our barley crop is finished now and all housed in good condition; in fact, the average quality is a very nice one, still prices keep extremely high, as our brewers and maltsters, especially in South Germany, pay very high prices, which makes an export to England almost impossible. Perhaps when supplies increase things will alter later on.—FRANCIS M. TH. DUHNE.

Miscellaneous ..	17,000	5,000	20,000	20,000	10,000
Total	669,000	128,000	561,000	227,000	119,000

POULTRY AND PROVISIONS.

Smithfield, saturday.—The demand slow prices difficult to obtain. Fowls: Yorkshire, 2s 3d to 2s 9d; Essex, 2s 6d to 3s; Boston, 2s to 2s 3d; Sussex, 2s 6d to 3s; Welsh, 1s 6d to 1s 9d; Irish, 1s 6d to 2s; Surrey, 3s to 3s 6d. Aylesbury ducks, 3s 3d to 3s 9d; country ducks, 2s to 2s 6d. Boston rabbits, 10d to 1s 3d; fatted, 2s 6d to 3s; wild rabbits, 7d to 9d; tame, 1s to 1s 4d each. Australian, 7s 6d to 8s 6d per dozen; hares, 3s to 3s 6d; leverets, 2s to 2s 6d each; young grouse, 4s to 4s 6d; old, 2s 9d to 3s per brace. Venison, haunches, 18s to 20s each; ditto forequarters, 3d per lb.

Liverpool, Saturday.—Bacon: The market has ruled firm, but consumptive demand is only moderate and to-day buying is limited. Hams remain steady in value, and the inquiry is fair. Lard exhibits no new feature, trading is limited. Pork: Steady and unchanged. We quote finest prime mess, 68s to 72s per 200lb. Cheese.—The demand has been small, but there is a firm undertone, and values are little altered on the week. We quote finest coloured Canadian, 51s 6d to 52s 6d; white, 51s to 52s.; finest States, coloured, 51s 6d to 52s; white, 51s to 51s 6d. Second grades are in light supply, and selling readily from 42s to 50s, but there is no inquiry for lower qualities, nominally offered 20s to 35s per cwt. Butter.—A slight break has occurred in the price of Danish produce, and has somewhat influenced the value of Canadian which is in moderate demand. We quote fancy Canadian creamery, in boxes, 103s to 107s; States, 96s to 100s; finest ladles, imitation creamery and Canadian dairy, in moderate request, 78s to 80s; finest Danish, 112s to 120s; Irish creamery, 108s to 112s; Cork firsts, 90s; seconds, 87s; thirds, 86s per cwt.—HODGSON BROTHERS.

BUTTER.

Tuesday.—Bedale: 1s 5d to 1s 6d per roll of 24oz. Gainsborough: 1s 2d to 1s 4d per lb. Leeds: Danish, 120s to 126s per 112lb; Irish creameries, 112s to 116s; York lump, 14s 6d to 15s 6d per stone; ditto long rolls, 1½lb, 1s 9d to 2s; fresh butter in 1lb prints, 1s 3d per lb. Settle: 1½d to 1s 0½d per lb. Sheffield: 1s 2d to 1s 3d per lb. Spalding: 1s to 1s 1d per lb. Stone: 1s 1d to 1s 2d per lb.

Wednesday.—Barnsley: 1s 2d to 1s 3d per lb. Boston: 1s to 1s 1d per lb. Colne: 1s 1½d per lb. Goole: 1s 2d per lb. Hereford: 1s 3d to 1s 4d per lb. Keighley: 1s 3d per lb. Kirbymoorside: 1s to 1s 2d per lb. Knaresborough: (Wholesale), 1s 6d to 1s 8d per roll of 24oz. Louth: (Wholesale), 1s 1d per lb. Market Drayton: Best, 1s 1d to 1s 2d per lb; seconds, 1s to 1s 1d per lb. Market Weighton: 1s to 1s 1d per lb. Masham: 1s 0d to 1s 7d per roll of 24oz. Northallerton: 1s 4d to 1s 6d per roll of 24oz. Stockton: 1s 2d to 1s 4d per lb. Uttoxeter: 1s to 1s 1d per lb. Whitby: 1s 3d per lb. Worksop: 1s 4d per lb.

Thursday.—Brigg: 1s 1d to 1s 2d per lb. Devizes: (wholesale) 1s 1d to 1s 2d; (retail), 1s 2d to 1s 3d per lb. Driffield: 1s 1d per lb. Penistone: 1s 2d per lb. Ripon: 1s 5d to 1s 7d per roll of 24oz. Scarborough: 1s 3d per lb. Wetherby: 1s to 1s 2d per lb.

Friday.—Chester: 1s 2d per lb. Crewe: 1s 2d per lb. Derby: 1s 3d to 1s 4d per lb. Grimsby: Choicest Danish, 122s to 124s. Dutch, 112s to 116s; Canadian 106s to 110s per cwt. Helmsley: 11d to 1s per lb. Leeds: Danish, 120s to 126s per 112lb; Irish creameries, 112s to 116s; York lump, 14s 6d to 15s 6d per stone; ditto long rolls 1½lb, 1s 9d to 2s; fresh butter in 1lb prints, 1s 3d per lb. Leyburn: 1s 6d to 1s 7d per roll of 24oz. Lincoln: 1s 3d to 1s 4d per lb. Otley: 1s 6d to 1s 8d per roll of 24oz. Sandbach: 1s 2d to 1s 3d per lb. Stockport: 1s 3d per lb. Stratford-on-Avon: 10d to 1s 2d per lb. Whitchurch: 1s 1d to 1s 2d per lb.

EGGS.

Tuesday.—Bedale: 13 for 1s. Gainsborough, 13 for 1s. Leeds: Yorkshire, 10s to 11s per 120; Irish, 8s to 9s 6d; Danish, 7s 9d to 9s 6d; Austrian blues, 6s 10d to 7s 3d; ditto reds, 5s 9d to 6s 3d. Settle: 12 to 13 for 1s. Sheffield: 12 to 13 for 1s. Spalding: 13 for 1s. Stone: 13 or 14 for 1s.

Wednesday.—Barnsley: 10 and 11 for 1s. Boston: 11 and 12 for 1s. Colne: 1s 8d per score. Goole: 13 for 1s. Hereford: 12 to 13 for 1s. Keighley: 10 for 1s. Kirbymoorside: 12 and 13 for 1s. Knaresborough: 11 or 12 for 1s. Market Drayton: 13 or 14 for 1s. Market Weighton: 13 or 14 for 1s. Masham: 13 or 14 for 1s. Northallerton: 12 to 13 for 1s. Stockton: 10 or 11 for 1s. Uttoxeter: 1s 6d to 1s 7d per score. Whitby: 11 for 1s. Worksop: 1s 10d per score.

Thursday.—Brigg: 13 or 14 for 1s. Devizes: 14 to 16 for 1s. Driffield: 14 for 1s. Penistone: 12 for 1s. Ripon: 12 or 13 for 1s. Scarborough: 9 or 10 for 1s. Wetherby: 11 or 12 for 1s.

Friday.—Chester: 12 and 13 for 1s. Crewe: 11 and 12 for 1s. Derby: 10 and 11 for 1s. Grimsby: Australian, 8s 10d to 9s 11d; Russian, 8s 6d to 9s 4d; Danish, 8s 3d to 9s 4d; Swedish, 8s 6d to 8s 8d per 120. Helmsley: 13 for 1s. Leeds: Yorkshire, 10s to 11s per 120; Irish, 9s to 9s 6d; Danish, 8s to 9s 3d; Austrian blues, 6s 10d to 7s 3d; ditto reds, 5s 9d to 6s 3d. Leyburn: 13 or 14 for 1s. Lincoln: 12 or 13 for 1s. Nantwich: 12 and 13 for 1s. Otley: 12 or 13 for 1s. Stockport: 10 for 1s. Whitchurch: 11 and 12 for 1s.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

A great authority on British Agriculture has passed into the silences. It seems difficult to write of an English harvest without thinking of Sir John Lawes and wondering what his annual estimate would be. The services which he rendered to farmers receive fitting appreciation elsewhere than in these market columns, but on Friday at Mark Lane one could but be struck by the fact that the sad news from historic Rothamsted was the first utterance on all lips. Before the Government gave us averages of English wheat yields we had them from the famous farm in the Southern Midlands, and Sir John Lawes had the immense gift of being able to criticise his own estimates, and of freely warning farmers when he had reason to believe that Rothamsted figures could not be trusted for the entire kingdom. Thus in 1897 he warned us that his estimate was probably too low, and he has similarly told the trade when he thought his own part of the country had been more than usually fortunate. This high intellectual honesty and freedom from bias is a great bequest which all who have to deal with statistics will do well to cherish. Of the wheat crop, now mostly harvested, it may to-day be said that there is a general agreement that the magnificent July handed to the harvest month a crop "worth" 29 bushels to the acre. How much has been actually realised? That is the question. The answers vary from twenty-seven bushels to practically the original twenty-nine, but the mood of the latest moment is rather pessimistic, and few farmers believe in twenty-eight bushels having been actually exceeded. The area under wheat shows a decline of 156,000 acres, which, at twenty-eight bushels per acre, reduces the feed by 4,368,000 bushels, apart from the character of the season.

The foreign harvests are beginning to group themselves about as follows:—"Probably better than last year": Spain, Roumania, Bulgaria, Russia"; "Probably inferior to last year": England, France, Germany, Austria, Hungary, the United States, and Canada. The total production of wheat in the first group averages 80 to 84 million qrs., in the second group 145 to 155 millions. The situation, therefore, is as a whole modified in sellers' favour, and when the first rush of autumnal deliveries is over, this is likely to become increasingly apparent.

The markets have been supplied pretty fairly with new wheat, rye, winter tares, and winter oats, but of ordinary spring-sown barley and oats very little is as yet to hand. The new wheat ranges from 29s. to 32s., the new rye from 26s. to 29s., the winter tares from 56s. to 64s., and the winter oats from 17s. to 20s. per qr. These are not high prices, except for tares, but they represent a small profit on production, whereas the cereal year just concluded opened too frequently at a slight loss. The demand for new samples is encouraging.

Some small crops may thus be reckoned according to the advices which August brought:—

MIXED CROPS IN 1900.

Tares	750,000 qrs.
Rye	275,000 ,,
Beans	1,000,000 ,,
Peas	650,000 ,,
Linseed	100,000 ,,

The last three estimates are rather high for the acreage, but we fancy it has been by no means a bad year for pulse, and the few English growers of linseed speak well of that crop.

The old cereal year ended on Friday night, and the following preliminary estimate of imports is submitted:

Wheat	15,011,000 qrs.
Barley	4,210,000 ,,
Oats	7,284,000 ,,
Maize	13,312,000 ,,
Flour	8,532,000 sacks.

The year's trading has been healthy, and no speculative waves have broken the even course of legitimate business. The South African and Chinese wars have been almost *too* absolutely ignored, for while "in quietness and confidence" there is "much strength," it is difficult to see how either of these virtues would feed us in case of a political crisis such as there has admittedly been encountered more than once during the twelvemonth's diplomacy. The new cereal year opens with the following prices ruling on the Continent, etc. The foreign market prices have been in each case reduced by us into English money for quarters of 480lb. weight.

	Wheat.	Rye.
Paris	34s. 9d.	23s. 9d.
Marseilles	34s. 3d.	—
Antwerp	29s. 3d.	—
Berlin	33s. 9d.	31s. 3d.
Amsterdam	27s. 9d.	22s. 9d.
St. Petersburg	29s. 6d.	18s. 9d.
Buda-Pesth	28s. 3d.	23s. 6d.
New York	28s. 3d.	—

The dearness of rye in Germany should be noted, for it may affect and increase the demand for wheat in that country. The London average is 30s. for wheat, and about 27s. for rye. At these prices Russia and Holland may be tempted to ship the minor staple, but for wheat our offer of 30s. is obviously "no catch" in the present state of the Continental markets. America is affected by the freights, 3s. 6d. per qr. (with insurance and lighterage), which makes the minimum selling price 31s. 9d., and this price is made with difficulty even for really fine winter wheat.

During the cereal year ended 31st August London white flour (credit terms) advanced 2s. per sack, opening at 26s. 6d. and closing at 28s. 6d. Town Household flour similarly rose from 23s. 6d. to 25s. 6d. per sack. The price of the quartern loaves (credit and delivery) opened at 5d. and closed at 5½d. Top price and fine Hungarian flour, as used for fancy bread and pastry also show 2s. per sack nett advance on the cereal year. Town Household flour, cash ex mill, is 2s. 3d. dearer on the twelvemonth, but 3s. 6d. cheaper on the two years. Ordinary flour of recent years was dearest in May, 1898, when 39s. 9d. cash terms was reached, and was cheapest in February, 1895, when 17s. 9d. was accepted. A range of 22s. per sack shows that possibilities of profit and loss in the flour trade are still considerable, and that the idea of free trade levelling value has not been justified in practice to the extent which theory alone would have indicated.

Supplies of cereals on passage at the beginning of a new cereal year are as follows:—

	Wheat. Qrs.	Barley. Qrs.	Maize. Qrs.
Sept. 1, 1900	1,945,000	313 000	701,000
,, 1899	1,654,000	346,000	823,000
,, 1898	1,089,000	150,000	752,000
,, 1897	921,000	430,000	580,000
,, 1896	1,163,000	310,000	1,103,000

These figures indicate that September should have fair supplies of all the three leading staples, but they argue no depressing or overwhelming arrivals. The wheat total includes 850,000 qrs. of Californian, the bulk of which will not arrive until later than Michaelmas.

The four leading staples begin a new cereal year at the following prices per ton:—

	£ s. d.
Wheat	6 14 6
Barley	6 19 0
Oats	6 14 0
Maize	5 0 0

The demand for maize has been good of late, but on the Friday and Saturday there was a decided pause. Five pounds per ton is cheap enough, but buyers have been rather spoilt by the extremely low terms ruling of recent years. It was feared a year ago that cheap maize would, if the wheat market rose, lead to much adulteration, but the difference of £1 14s. 6d. per ton is evidently not enough to tempt many, and if wheat ever became really dear a mixture of maize might have its advantages. The mixed loaf is less digestible, and at the same time less nourishing than one of pure wheat, but it is doubtful if it is inferior to certain loaves which a West End fancy calls for. It is greatly to be regretted that the British people put so high a value on white colour, and that a certain moderate amount of rougher meal is not tolerated in the loaf. Black bread was doubtless unpleasant, and the sign of poverty, but the period of its prevalence ceased before the present reign, and science ought to be heard when it tells us that excessively fine grindings are neither the best to nourish us nor the easiest to digest.

Forward speculation on new oilseed crops has begun in earnest with the new cereal year; in fact, it had been well launched by the third week in August. On Sept. 1 the following prices were paid for futures:—

Russian linseed, November shipment	49s. 6d.
Argentine linseed, February shipment	46s. 6d.
Cawnpore rapeseed, April shipment	41s. 9d.
Guzerat rapeseed, April shipment	43s. 9d.
Bombay poppyseed, April shipment	40s. 9d.
Egyptian cottonseed, January shipment	£6 0s. 3d.

Thus we have presumptive values for something like six months ahead. The general conclusion to be derived from the above figures is that oilseeds will be maintained at a good price all through the winter, and that the large new crop of Roumanian rapeseed will not be very depressing in its influence, the deficiency in Indian linseed fully balancing the increase in the other oilseeds.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The market to-day was not brisk, but the Hungarian Minister of Agriculture estimates the world's wheat production at 24,000,000qrs. less than last year, and this strengthens holders. Foreign wheat made 32s. 6d. for some fine South Australian, 32s. for long-berried New Zealand, and 31s. 6d. for short-berried. English sales were slow, 30s. to 32s. for most samples both old and new. Some fine old South Russian maize made 25s. 6d., but Argentine was not so strong as on Friday, and 21s. 6d. was taken. American was 6d. up on the week; 21s. is asked and 20s. 9d. not refused to a good buyer. Barley was quiet, 27s. to 32s. for new English. Oats were 3d. dearer for heavy grades, but 304lb. kinds were rather out of favour. Some Mexican beans found buyers at 29s. to 29s. 3d. per quarter, and Egyptian split lentils made 12s. per cental.

CLOSE OF THE MARKET.

By Telephone, 2 *p.m.*

TRADE WAS FIRM, BUT SALES WERE NOT PUT THROUGH WITH EASE. PRICES AS PREVIOUSLY GIVEN.

THE FLOUR TRADE.

MARK LANE, Sept. 3.

The market to-day was slow at 6d. rise in the leading kinds; that is to say millers insisted but bakers resisted, and business was therefore reduced to narrow channels. Town households were in better request than other English kinds. American flour was a quiet market, with patents rather better than the bakers' grades. Hungarian flour was in fair request at 38s. for good types. French flour was neglected. Some fine Oregon flour made 24s. 9d., and 25s. is now asked. Although the finest milling offals easily reach (and surpass) £6 per ton, there is bran still to be had at £4 2s. 6d., and pollard at £4 10s. For the finest Midlothian oatment £15 10s. is paid, and £13 is asked for Aberdeen.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—	Aug. s. d.	Oct. s. d.	Dec. s. d.
Aug. 27 noon	6 7	6 8	6 9
4 p.m.	6 7	6 8	6 9
Aug. 28 noon	6 7	6 8	6 9
4 p.m.	6 7	6 8	6 9
Aug. 29 noon	6 7	6 8	6 9
4 p.m.	—	6 8	6 9
Aug. 30 noon	—	6 9	6 10
4 p.m.	—	6 9	6 11
Aug. 31 noon	—	6 9	6 11
4 p.m.	—	6 9	6 11
Sept. 1 noon	—	6 9	6 11
To-day noon	—	6 8	6 9

A few speculative sales for March delivery were put through at 6s. 11d. per cental.

August sales on the Term Market were 37,800,000 centals, of which 260,000 centals were taken for actual delivery.

Maize is quoted 4s. 2d. to 3d. per cental for Sept, Oct., and Nov. delivery., but 4s. is accepted for Dec.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., report cloverseed firm ; America in particular, is cabled to be rapidly advancing her quotations. Trifolium moves off slowly ; business in this article has this season proved somewhat disappointing. As regards alsyke, white, trefoil, and especially Italian ryegrass, very full prices are asked. New mustard and rapeseed find buyers on former terms. Seed rye and winter tares are inquired for. In both canary and hempseed, the movement of values is against buyers. There is more doing in blue peas, whilst haricot beans have advanced 1s per qr.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report : The market continues to harden ; 1899 hops are being secured by consumers. The new crop comes very sparingly to hand ; those that have been picked come down less than half of last year.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour : There has been a fair trade to-day at 3d. to 6d. advance on the week, both spot and forward. —T. S. MEDILL, Mark Lane.

The trade for milling offals is unchanged at last week's prices.—RICHARD DOGGETT, Mark Lane.

Wheat arrivals moderate. A quiet trade at 6d. and 1s. per qr. advance. Flour is 3d. and 6d per sack dearer. Maize and barley 3d. higher. Oats quiet, unchanged.—COVENTRY, Mark Lane.

Offals—Bran and pollard in fair request. As compared with last week's prices rather firmer. Weather fine, counteracting in some measure damage done by recent heavy rains. —GREENHILL BROTHERS, Belfast, September 1.

Flour—The firmness noted last Wednesday has continued, and sellers now hold for 6d. per sack advance, at which some business for shipment is practicable. Grain—Indian corn has been strong during the week, and 4½d. per boll advance paid. Beans are 3d. dearer, and there is a like improvement on pease to arrive. Oats are unchanged. Barley scarce. Millstuffs—Bran and thirds are in sellers' favour.—MCKINNON AND MCDONALD, Glasgow, September 1.

Wheat quiet with a small trade. White wheat ½d. per cental dearer. Red unchanged. Flour a quiet trade at Tuesday's prices. Maize — The demand has been disappointing owing to lower advices from America, and only a moderate consumptive trade has transpired for mixed at ½d. to 1d over last Tuesday. European and Plate are steady at an ½d. improvement. Barley is firm for feeding and ½d. dearer. Brewing has a good demand and full prices are obtainable. Beans steady with a moderate trade. Peas firm with a fair business at ½d. advance. Oats have a good trade for English but without alteration in values. Foreign are firm, and ½d. dearer. Oatmeal is dull, unchanged. Oilcake has a better inquiry and prices in sellers' favour—ROSS T. SMYTH, Liverpool, September 1.

Mark Lane, Sept. 3rd, 2 p.m.
[SPECIAL.]

There is a little corner in cotton-seed, and nothing is to be had under £7 per ton on spot.

THE BALTIC, MONDAY, 1 p.m.
STATE OF TRADE.

Cargoes of wheat near at hand are rather dull, but for future shipment the market is firm. Australian, Manitoban, and Russian all show a strong feeling. American is irregular. American maize cargoes are rather less firm from the close of last week, and Argentine cargoes are neglected. Barley is fairly strong, and so are American oat cargoes for future shipment.

BUSINESS DONE.

WHEAT.—Argentine, 29s 6d, on passage ; Australian, 30s 9d, arrived ; Californian, 31s 3d, Sept. shipment ; Manitoba, 32s 6d, Sept. shipment ; No. 1 Northern, 31s 6d, Sept. shipment ; best Duluth, 32s 3d, Sept. shipment ; Russian Azima, 31s, Sept. shipment ; Russian Ghirka, 30s 6d, Oct. shipment.

MAIZE.—American, 20s 3d, on passage ; ditto, 20s 3d, Sept. shipment ; ditto, 19s 9d, Dec. shipment ; ditto, 19s, Feb. shipment (new crop) ; Bessarabran, 25s, Sept. shipment.

BARLEY.—Roumanian, 19s 3d, October shipment (new crop) ; Persian, 17s 9d, Sept. shipment ; Odessa, 19s 3d, October shipment ; Oregon, 23s 6d, October shipment.

OATS.—White Labau, 13s, September shipment ; Vologda, 13s 9d, September shipment ; Canadian, 15s 3d, September shipment ; Clipt White (38lb), 15s, September shipment.

LINSEED.—Argentine, 48s, January shipment (new crop).

COTTONSEED.—Egyptian, £6, January shipment (new crop).

PROVISIONS.

London, Monday.—The arrivals from foreign ports last week were 9,153 bales bacon. The bacon market was again very flat last week, and prices were further reduced some 3s to 4s in all descriptions of goods. At the close of the market on Friday there seemed to be more steadiness. Prices ruling were :—Irish, 54s to 60s up to 66s ; Danish, 52s to 60s up to 66s ; Canadian, 52s to 56s up to 58s. Butter was very slow indeed, and very little business of any sort doing. Prices were about the same as previously reported. Danish, 110s to 118s ; French, 86s to 110s ; Irish, 96s to 110s ; Canadian, 100s to 106s. Lard was steady. American, 35s 6d to 37s 6d ; Irish, 44s to 54s ; Danish, 44s to 46s.

FEEDING STUFFS.

London, Monday.—Linseed Cake.—Market firmer and likely to go dearer owing to the extreme scarcity of foreign supplies and high price of linseed. Decorticated cotton cake 2s 6d dearer, undecorticated also 2s 6d up. Linseed very firm at recent advance.

English linseed cake	£8	0	0	to	8 5 0	ex mill

—ROBT. AND JOHN HEWETSON.

CATTLE.

Metropolitan Market, Islington.

Monday, Sept. 3rd, 1900.

	British.	Total.	Sept. 4th, 1899.
Beasts	1,349	1,349	1,270
Sheep and lambs	5,999	5,999	6,182
Calves	5	5	9
Pigs	20	20	—
Milch cows	69	69	49

Quotations per 8lbs (sinking the offal).

ENGLISH.

	Inferior. s. d.	Second. s. d.	First. s. d.
Beasts	3 2 —	4 4 —	5 0
Sheep	3 4 —	5 4 —	6 0
Lambs	5 4 ..	5 8 ..	6 2
Pigs	2 4 ..	3 6 ..	4 2

Milch cows, per head, £— to £—.

British arrivals include as follows :—Scotland, — ; Eastern Counties, 24 ; Midland, Home and Western Counties, 1,194 ; Devon, 40 ; Ireland, 83.

We note to-day a rather larger supply in the beast market, though fat beasts showed practically no increase but those there being a steady demand ; rates ruled from 1d to 2d per 8lb in favour of the seller. Except for middling description Shorthorns, all on offer with fair buyers. Less demand for fat butchering cows, but no alteration in price can be noted, owing to a short supply. Fat bulls were in good request, and made 2d per 8lb more, as also did rough cattle from the south-western districts.

The following are top quotations per 8lb. (sinking the offal) :—

	To-day.	Sept. 4th, 1899.
Devons	4s 8d to 4s 10d ..	4s 4d to 4s 6d
Herefords	4s 10d to 5s 0d ..	4s 4d to 4s 6d
Runts	4s 10d to 4s 11d ..	4s 4d to 4s 5d
Lincolns	4s 4d to 4s 6d —	3s 10d to 4s 2d
Irish	4s 4d to 4s 6d ..	4s 0d to 4s 2d
Fat cows	3s 10d to 4s 0d ..	3s 4d to 3s 6d

To-day's supply numbered 210 less than on Monday last, and included about 540 from the Eastern counties, 210 Scotch and 1,900 Irish. Best quality wether sheep met a slow but steady trade at late rates ; other grades were a shade easier in price. Ewes, being short in number, met with a readier sale at a slight advance in values, all on offer finding buyers.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned :—

	To-day.	Sept. 4th, 1899.
7½ to 8 stone Downs	5s 10d to 6s 0d ..	5s 6d to 5s 8d
9-stone ditto	5s 8d to 5s 10d ..	5s 4d to 5s 6d
10-stone half-breds	5s 6d to 5s 8d ..	5s 2d to 5s 4d
11-stone Lincoln	5s 4d to 5s 6d ..	4s 10d to 5s 0d
10-stone Irish	5s 4d to 5s 6d ..	4s 10d to 5s 0d
10-stone Down ewes	4s 4d to 4s 6d ..	4s 2d to 4s 4d
11-stone half-bred ditto	4s 0d to 4s 2d ..	3s 8d to 3s 10d
5-stone Down lambs	5s 10d to 6s 0d ..	6s 2d to 6s 4d
6-stone half-bred ditto	5s 6d to 5s 8d ..	5s 6d to 5s 8d

Calf trade nominal.

The few pigs on offer found buyers, but trade ruled dull and dragging ; best small breeds were quoted at from 4s to 4s 2d per 8lb.

London Central, Monday. — Good supplies ; trade slow. Beef (carcasses), 4s to 4s 2d ; hindquarters, 4s 6d to 4s 8d ; roastings, 4s 10d to 5s 2d. Sheep : Ewe, 3s 4d to 3s 8d ; wether, 4s 8d to 5s ; hindquarters, ewe, 4s 4d to 4s 8d ; wether, 5s 6d to 5s 10d. Pigs : Large, 3s to 3s 4d ; small, 3s 8d to 4s.

FOREIGN CATTLE.

Deptford, Monday.—A few beasts were due by steamer from the United States, but did not arrive in time, consequently no market was held to-day either for beasts or sheep. The following were the numbers on offer on the corresponding day last year, with the current top rates :—Beasts, 1,278, 4s to 4s 3d per 8lb to dress about 720lb ; sheep, 160, 4s to 4s 1d, to dress from 72lb to 74lb.

Liverpool, Monday.—Demand fair for best quality of cattle, at fully late rates ; middling and inferior kinds unchanged. Sheep and lambs in larger numbers ; demand good for best qualities at higher prices ; other classes if anything lower. Beef, 7d to 8d per lb ; mutton, 8d to 8d per lb ; lambs, 8d to 6d per lb. At market : 1,145 cattle and 10,125 sheep.

IMPORTS INTO LIVERPOOL FOR THE CEREAL YEAR.

Wheat	4,589,000 qrs.
Barley	348,000 ,,
Oats	256,000 ,,
Beans	105,000 ,,
Peas	33,140 ,,
Maize	3,701,000 ,,
Flour	1,746,500 sacks

At Mullingar, co. Westmeath, on the 29th, the fair was smaller than usual, and composed chiefly of two and three year old cattle, demand being very brisk for forward stores. Almost a complete clearance effected. Calves, best sorts, £4 15s. to £5 1s. ; second class, £3 15s. to £4 10s. Yearlings, first class, £7 15s. to £8 10s. ; second class, £5 10s. to £7. Two-year-olds, first class, £11 10s. to £12 15s. ; second class, £8 10s. to £10 15s. Three-year-olds, first class, £14 to £16 2s. 6d. ; second class, £11 10s. to £13 10s. ; third class, £7 2s. 6d. to £9 15s. Springers, first class, £15 15s. to £17 10s. ; second class, £12 10s. to £14 10s. Average supply of sheep ; demand slow. Lambs, first class £1 5s. 6d. to £1 15s. ; second class, £1 2s. 6d. to £1 6s. Hoggets, first class, £2 to £2 1s. ; second class, £1 12s. 6d. to £1 14s. 6d. Two-year-old and over, first class, £2 to £2 6s. ; second class, £1 15s.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK EXPRESS.")

Trade in London.

The business tone of the Islington Market was on Monday, for both prime and second quality beasts, of a healthier nature, not that there was any increase in the demand, but that there was a rise reported at the Dead Meat Market, and a light supply at Deptford. Though not higher rates were quotable, still it should be noted the tendency was markedly that way. As usual at this season of the year, the bulk of the supply consisted of Herefords, runts, and Lincoln Shorthorns; a few Devons also put in an appearance, as well as eighty-three from Ireland, the best of these being shipped from Dublin, the remainder from Waterford. Fat cows and bulls for butchering purposes throughout the week also met with firmer trade at an advance of 2d. per 8lb. At the Foreign Cattle Market trade showed more life, sales being readily effected at an advance on Monday of 2d., as compared with the previous week, followed on Wednesday and Saturday with a further rise of 2d. per 8lb. The total number of beasts offered for sale on both markets was 4,421 (decrease 847), consisting of 1,320 British (increase 100) and 3,101 foreign (decrease 947). The latter consisted of 2,021 from the United States and 1,080 from Canada. The following were the top rates paid per 8lb. (sinking the offal):—80 to 90-stone Herefords, 4s. 10d.; 90-stone runts, 4s. 9d. to 4s. 10d.; 80-stone Devons, 4s. 9d. to 4s. 10d.; 100-stone Lincolns, 4s. 6d.; 110-stone ditto, 4s. 4d.; 90-stone Irish, 4s. 6d.; 110-stone ditto, 4s. 4d.; 90-stone States, 4s. 6d. to 4s. 8d.; 95-stone Canadians, 4s. 2d. to 4s. 4d.; ditto ranchers, 3s. 10d. to 4s.; 90-stone fat cows, 4s.; 100-stone fat bulls, 3s. 4d. to 3s. 6d. The sheep trade, which was confined to the Islington market, was firm both in regard to tone and value, wethers making last week's rates, whilst ewes, being short in number and meeting with more demand, sold readily at an advance of from 2d. to 4d. per 8lbs. Lambs are arriving in fairly good numbers, but the best are very scarce. A few extra choice Southdowns to dress about 36lbs. were shown on Monday, and made fully 4d. more than our top quotation. The total number penned was 9,820, as against 10,123 during the previous week. Best pens made per 8lbs. as follows (sinking the offal):—7½ to 8-stone Downs, 6s.; 9-stone ditto, 5s. 10d.; 8-stone Scotch, 6s.; 10-stone Downs, 5s. 8d. to 5s. 10d.; 10-stone half-breds, 5s. 8d.; 10-stone Irish, 5s. 6d.; 11-stone Lincolns 5s. 4d.; 10-stone Down ewes, 4s. 6d.; 11-stone halfbred ditto, 4s. 2d.; 5-stone fat Oown lambs, 6s. 4d.; 6-stone halfbred ditto, 6s. Calves, being short in number (60), met a firmer trade, the best making 6s. per 8lbs., or 4d. more than during the preceding week.

Trade in the West.

There have only been moderate deliveries of stock at the leading cattle markets during the past week, the result of agriculturists being just now in the thick of the harvest; but there has been considerable improvement in the quality, and a corresponding advance in values, the trade just at present being unusually firm for almost everything, either fat or store. Ripe, well-finished steers and heifers find a very free sale at from 11s. 6d. to 12s. per score (or from £21 to £23 a-piece) for animals of medium weights, and good-quality cows also make quite 11s. The veal trade is also very strong, good calves making 7½d. to 8d., and the poorer grades 6½d. to 7½d. Mutton, more especially wethers, is selling as readily as we ever remember, considering the high prices ruling—8¼d. to 8⅔d. wethers, 7⅔d. ewes, and 10d. to 11d. for best lamb (or 35s. to 40s. for Downs and cross-breds). Pigs are also selling much more readily with cooler weather, up to 10s. per score. Dairy stock continues to meet a very active sale, and barreners are worth from 10s. to 30s. per bullock more, consequent on the abundance of keep everywhere. Altogether the markets are going very strong.

Trade in Ireland.

With a number of strangers from cross-Channel, who were presumably combining business with pleasure during "Horse Show week," and a decrease of over 300 cattle and close upon 4,000 sheep, Thursday's market in Dublin was brisker than it has been for several weeks. All classes of cattle commanded a readier sale, with values more or less favouring sellers. In a few cases the advance might be as much as 20s. per head, but all round prices were from 10s. to 15s. better. Rough cattle moved off readily, and an early and satisfactory clearance was effected. Prime ox and heifer beef made from 55s. to 57s. 6d. per cwt., and for some fancy lots 60s. to 62s. 6d. was paid; second quality 50s. to 54s., and inferior 42s. 6d. to 47s. 6d. The mutton department also showed a very decided improvement, and currencies were from 1s. to 2s. per head up on all classes of sheep, fully wiping out the late depression. Prime wether mutton was worth from 6½d. to 7d. per lb.; prime ewe, 5⅔d. to 6½d.; and inferior, 5d. per lb. Medium hoggets were worth from 30s. to 42s., and best heavy hoggets from 44s. to 54s. a head. Good lambs commanded more money, and were easier to place, prices ranging from 15s. to 34s. each. Veal was scarce, and best calves made up to 8d. per lb. A limited show of milch cattle and prime springers and new milch cows in active demand, some extra good ones making up to £22 and £23. Store cattle at the various large sales held during the week sold at very satisfactory prices. The rise in cattle and sheep did not extend to the pork department, where trade was slow and prices much the same as last week.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—The supplies of fat cattle have been small, but about the same as last week, and the trade also has been much similar, the best class of cattle easily maintaining last week's high prices and all kinds selling well. Fat sheep and lambs have been forwarded in exceedingly large numbers; there has been a very good demand, and the best class of shop sheep and lambs have sold well. Others and secondary sorts have been slightly in buyers' favour. Fat calves were a large and good show, and met a dear trade, while pigs, which were more numerous, sold rather cheaper. In the store market there have been large supplies of both sheep and lambs. For those of good quality there has been a good inquiry at satisfactory prices, about equal to those current of late. Secondary classes have been somewhat stiffer, however; some of these have been left over unsold. There is very little doing among store cattle just at present, farmers waiting until after the harvest. Very few were offered for sale, and those, if good, have been fairly well sold. A much larger show of milch cows met considerably more inquiry and a good trade. Quotations:—Best beef, extreme top, 9s. per stone, and from 8s. 6d., current 8s. to 8s. 6d. per stone; mutton from 7½d. to 8½d. per lb.

LONDON.

London Central, Wednesday.—Fair supplies and steady sale. Arrivals of beef included 30 tons Scotch, 520 Liverpool sides, 2,100 hindquarters, and 800 forequarters American refrigerated. Beef: Scotch short sides, 4s 4d to 4s 8d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American Deptford-killed, 4s; Liverpool, 3s 10d to 4s; American refrigerated hindquarters, best, 3s 8d to 3s 10d; seconds, 3s 4d; forequarters, 2s 7d to 2s 8d; seconds, 2s 2d to 2s 4d. Mutton: Scotch, 5s 2d to 5s 6d; English wethers, 5s to 5s 4d; ewes, 3s 8d to 3s 10d; English lamb, 5s to 5s 4d. Veal: English and Dutch, 4s 4d to 4s 8d. Pork: English, 4s to 4s 4d; and Dutch, 3s 8d per 8lb.

London Central, Friday.—Good supplies, but trade ruled slow. Arrivals of beef included 40 tons Scotch, 680 Liverpool sides, 3,000 hindquarters, and 2,400 forequarters American refrigerated. Quotations:—Beef: Scotch, short sides, 4s 4d to 4s 8d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American, Deptford killed, 4s; Liverpool, 3s 10d to 4s; American refrigerated hindquarters, best, 3s 10d to 4s; seconds, 3s 6d to 3s 7d; forequarters, 2s 6d to 2s 10d. Mutton: Scotch, 5s; English wethers, 4s 8d; ewes, 3s 4d to 3s 8d; Canterbury, 2s 2d to 2s 5d; Wellington, 2s 1d to 2s 3d; Sydney and River Plate, 2s. Lamb: English, 4s 8d to 5s. Veal: English and Dutch, 4s 4d to 4s 8d. Pork: English, 4s 2d to 4s 4d; and Dutch, 3s 4d to 3s 8d per 8lb.

Islington, Thursday.—Good supply of beasts on offer for Thursday, and although chiefly consisting of fat bulls and rough cattle, met with fair support at steady rates. Sheep pens were filled to a moderate extent, but the inquiry for both wethers and ewes ruled quiet at about late currencies. 7½ to 8-stone Down wethers, 5s 10d to 6s; 9-stone, 5s 8d to 5s 10d; 10-stone half-breds, 5s 4d to 5s 6d; 10-stone Down ewes, 4s 4d to 4s 6d; 11-stone half-bred, 3s 10d to 4s. Lamb trade moved quietly; 5-stone fat Downs, 6s to 6s 4d. Calves met with a fair inquiry, the best on offer making 5s 4d to 5s 6d. Pig trade steady; neat small, 4s to 4s 2d per 8lb, offal given in. Total supplies: 100 beasts, 3,650 sheep and lambs, 60 calves, 160 pigs, and 10 milch cows.

COUNTRY.

Ashford, Tuesday.—Best beef sold well, small prime heifers and steers making 11s 6d to 12s 6d per score; medium beasts, 10s 6d to 11s 6d; and cows, 8s to 10s. Mutton: Downs and half-bred wethers, 5s 4d to 5s 8d; choice Kents, 5s to 5s 6d; medium Kents, 4s 6d to 5s; and barrens, 3s 8d to 4s per 8lb. Prime veal made up to 5s 4d per stone, and ordinary qualities, 4s 8d to 5s. Lambs of good quality seldom exceeded 6s per stone. Pork: Roasters and five to 10 score hogs, 10s per score. A few Southdown rams ranged between £5 5s and £6 16s 6d per head.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was a good attendance of buyers to meet a supply of 43 fat beasts, 70 calves, 678 fat sheep and lambs, 143 pigs, and 49 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £13 5s to £19 15s; fat calves, 80s to £6 5s; small, 20s to 60s; fat wethers, 42s to 56s 6d; fat ewes, 29s to 42s; fat lambs, 26s to 49s 6d; fat porkers, 40s to 58s; small, 29s to 38s; stores, up to 20s; dairy cows, £10 10s to £17. Fat beasts met a slower trade, without much change in values for the prime quality lots. Prime quality Devon steers made up to £19 10s; heifers, £16 10s; Shorthorn steers, £19 15s; young Angus steers, £15 5s, etc. A good show of fat sheep and lambs met with a brisk competition from a numerous attendance of buyers. A clearance made with better prices all round. Prime Hants Down wethers and ewes made 50s 6d, 54s 6d, 55s, 52s 6d, 43s, 55s 6d, 54s 6d, 56s 6d, 47s, 46s 6d, 52s, 43s, 51s, 42s 6d. Eight-months-old fat lambs, 38s, 37s, 45s, 43s 6d, 49s 6d, 44s 6d, 36s 6d, 47s, 40s, 42s, 50s, 46s, 47s. Southdown lambs, 34s, 32s. Three-months-old sucking lambs, crossbreds, Exmoors, and Scotch, 16s, 33s, 15s, 26s. Old ewes, 42s, 30s, 41s 6d, 29s 6d, 38s 6d, 35s 6d, 39s 6d. Rams, 46s, 56s, 44s, 43s, 36s. Black-face Scotch wethers, 29s 6d, 28s 6d, 28s, 27s. Store lambs, 27s 6d, etc. With a short supply of milch cows on offer, prices ruled higher, with a better demand. Store cattle, with more inquiry, found a firmer trade. Fat calves are in request, with a brisk trade. Fat porkers sold readily at late rates. Store pigs were cleared, with a fair demand. Ruling values:—Fat Devon beasts, 6½d to 7¼d per lb; ditto Shorthorn ditto, 6d to 6¾d; bulls, cows and inferior beasts, 5d to 5¾d per lb. Best quality sheep and big lambs, 8¾d to 9¼d; second ditto, 8d to 8¾d; old ewes, rams, and inferior sheep, 6¼d to 7¼d; choice fat lambs, 9d to 10d per lb. Fat calves, 6½d to 9d per lb. Fat porkers, up to 10s 6d per score.

Braintree, Wednesday.—A firm trade was found at Messrs. Balls' auction mart. Prices: Beef, 4s 6d; and mutton, 5s per stone; pork, 9s 6d to 10s per score. Numbers penned: Beasts 30, fat sheep 100, hogs 50, Londoners and store pigs 100.

Brigg, Thursday.—The supply of horned stock was below the average, and business was of a sluggish description. Milch cows and in-calvers, £13 to £17; drapes, £9 to £12 each. Other kinds about late rates. A fair number of sheep, mostly ewes, and prices ranged from 36s to 42s per head.

Bristol, Thursday.—There was a moderate supply of beef, for which trade was slow. Best qualities made 62s, second qualities 58s to 60s. Five hundred fat beasts were sold at the docks this week. Mutton and lamb were in good supply, and trade was very slow. Best wethers fetched 7⅞d to 8d, ewes 6d, and lambs 8d. There were 600 pigs, bacoaers making 9s, porkers 9s 9d to 10s. Very few store cattle were on offer, for which there was scarcely any inquiry. Bristol Fair will be held next week.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under	9s 0d
Under 10 sc 10 lbs	Not exceeding 2½ in.	8s 6d
Under 11 sc 10 lbs	Not exceeding 2⅔ in.	7s 9d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND Co., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 224; sheep, 946; pigs, 434; horses, 42. Beef, 7s to 8s per stone; mutton, 5s 4d to 6s; pork, 5s 9d to 6s 6d. A few more store beasts, but trade slow. Fat beasts a fair show, prices unchanged. Fat sheep, very little alteration in the trade. Stores, a good number to hand. Lambs, a fair trade. Ewes rather slow. Fat pigs, not quite so brisk as last week. Stores, fair trade all round.

Canterbury, Saturday.—There was a fair supply of both sheep and lambs, the quality of most of the former being good. Small lambs ranged from 11s to 17s, and others strong and forward in condition made up to 22s to 26s, the latter being almost ready for the butcher. Ewe tegs but poor in condition were selling at from 28s to 33s. Old sheep, realised from £1 to 32s. A fair trade, but a few pens of lambs were not sold.

Carlisle, Saturday.—Larger supplies of Irish store cattle, a number of which were suitable for at once tying up for stall-feeding. Fair attendance and inquiry at about late values. Smaller heifers made prices from £6 10s to £8 10s; and the more useful qualities from £10 10s to £17 10s. Pigs, a small show and slow sale at prices up to 26s.

Chester, Thursday.—Supplies were in excess of demand, and market was very quiet both for dairy and store stock, but holders refused to accept lower rates, and last week's prices were maintained. Smaller show of sheep; trade quieter. Quotations:—Welsh cows, £14 to £21; calves, £13 to £19; barrens, £9 to £13; heifers, £8 to £14; stirks, £5 to £8; sheep, 22s to 26s.

Dorchester, Saturday.—Good supply, with fairly active trade, both for beef and mutton. Good offer of well grazed beasts, for which good demand. Heifers and calves ranged from £14 to £17; cows and calves, £13 to £15; barreners, £25 to £33 per pair. Fat heifers made up to £21; seconds to £17. Firm trade for mutton; ewes, 41s to 47s; wethers, 47s to 51s: lambs, 28s to 33s.

Dublin, Thursday.—More buyers in evidence, and demand all round good and well sustained all through. Prime finished cattle made more money, rougher sorts perhaps not quotably dearer, but the better demand induced an earlier and more satisfactory clearance. Brisker trade for all classes of sheep and lambs, and a good clearance effected. Cattle (best), 54s to 55s per cwt. Other descriptions, 28s to 31s per cwt. Mutton, 5d to 7½d per lb.—GANLY, SONS, AND Co.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 317, calves 52, sheep 1,830, lambs 844, pigs (fat and sows) 7, sucking pigs 154, pigs (stores, not more than ten) 85, pigs (stores, more than ten) 18, horses 2, colts 3. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 9½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Leicester, Saturday.—Slightly improved supplies of stock, in good condition. Milch cows in demand, at £16 to £25 per head. Bullocks, flat, £9 to £14 each. Calves in slow demand.

Lincoln, Friday.—The supply of beasts was limited almost to cows, which found buyers at from £14 to £20 each. The few other animals offered fetched late rates, no improvement whatever being noticeable. There was an average show of sheep and a fairly satisfactory trade was done. Store lambs sold principally at 21s to 28s, though a few made as high as 32s. Store ewes realised 20s to 32s, and breeding ewes fetched all prices between 32s and 52s. In the pig department stores were parted with at 25s to 40s, and suckers at from 15s to 20s each.

Lincoln, Friday.—The supply of beasts was very limited—16—but trade was only fair. Year ings, £7 to £9; young bullocks, £10 to £12; milch cows, £16 to £22 per head. Sheep totalled 340, and a fair trade was experienced. Lambs from 20s to 34s; ewes, 26s to 54s each.

Newcastle, Tuesday.—Better trade and improved prices for the best stock. Numbers:—Cattle, 1,750 sheep and lambs, 9,476 calves, 64 pigs. Prices (sinking the offal):—Beef, 5s to 8s 6d; pork, 7s to 7s 9d per stone; mutton, 6d to 8½d; lamb, 8d to 8¾d; veal, 5d to 9d per lb.

Norwich, Saturday.—The supply of store beasts was larger here to-day, shorthorns and Irish being especially offered; trade ruled quiet at previous rates. Fat beasts, which were in about average supply, brought 7s 6d to 7s 9d and 8s per 14lb. The supply of store sheep and lambs was not large; there was a fair demand, and lambs commanded an advance of 1s per head; breeding ewes were quoted at 35s to 50s; and shearlings at 40s to 46s per head. Fat sheep, which were in moderate supply, moved off readily at 8s 6d to 9s and 9s 6d per 14lb.

Peterborough, Wednesday.—1,05 beasts, 520 sheep, 140 pigs, and 2 calves. Beef, 7s 6d to 8s 3d per stone. Sheep, 6½d to 8¾d per lb. Lamb, 8d to 9d per lb. Pork, 5s 6d to 6s 6d per stone. At Saturday's market: 59 beasts, 1,772 sheep, 44 pigs, 11 calves, and 20 horses.

Romford, Wednesday.—An average supply of fat beasts and trade a little better. Best animals made 4s 6d to 4s 8d, and middlings 4s to 4s 2d per stone. Calves in short supply and trade fair, at 4s 10d to 5s per stone. Sheep in average supply and trade a little better; best sheep made 5s 6d to 5s 8d, and middlings 5s 2d to 5s 4d. Lambs in short supply and trade fair, at 6s to 6s 4d per stone. No store beasts on offer. Pig trade about the same. The market was visited by several large buyers from Gosport, Aldershot, and Salisbury.

Sheffield, Tuesday.—There was not much demand for milch beasts, and consequently there was only a moderate show. The better qualities made from £15 to £23; and the poorer from £13 to £15.

Shrewsbury, Tuesday.—Grand trade for all fat stock with scarcely one quarter of the quantity required on offer, buyers being present from all parts. High prices all round for same. Small supplies. Quotations: Lamb 7d to 9d. Beef 6½d to 7¾d; mutton, 8d to 9d; and veal 7½d to 9½d per lb. Porker pigs, 9s 6d to 10s 6d; and bacons, 8s 6d to 9s 6d per score. Cows, with calves, up to £—. Numbers offered: 405 cattle, 42 cows with calves, 1,884 sheep and lambs, 68 calves, 70 fat, 136 porket and 143 store pigs.

Spalding, Tuesday.—An improved trade for beef, best quality, 7s 6d to 8s 6d; cow beef, 7s per stone. Mutton was better, selling well at 8¾d per lb for half-breds, and 7¾d to 8d for Lincolns. Store sheep, 42s to 46s a head.

Taunton, Saturday.—Small attendance, medium supply, and a moderate trade.

Thame, Tuesday.—There was a shorter supply of stock, but a great improvement in the trade, and a clearance was effected at better prices. Mr. Bond's sale comprised 80 fat beasts, and a few heifers and calves, 282 fat sheep and lambs and stores, 81 fat and weaning calves, and 161 fat and store pigs. Fat bullocks made £17 to £21 15s; fat heifers, £14 to £23 7s 6d; heifers and calves, £15 to £16 2s 6d; fat wethers, 45s to 56s; fat ewes, 34s to 48s; fat lambs, 28s to 39s 6d; store ewes, 27s to 42s; fat calves, £3 to £4 10s; cow calves, 25s to 57s; bull calves, 14s to 42s; fat pigs, 10s per score. Stores a good trade.

Wakefield, Wednesday.—Much firmer tone for both beef and mutton, with prices in favour of dealers. Prime beef made 6½d to 7d per lb; other sorts, 5d to 6½d; lambs, 9d per lb; small sheep up to 8½d; strong sheep, 7½d to 8d; ewes and tups, 6d to 7d. Numbers penned:—Fat beasts, 1,324; sheep and lambs, 2,782.

Wolverhampton, Wednesday.—Beasts a fair supply, and fair trade. Lambs small supply, good demand. Sheep moderate supply, slow trade. Calves small supply, fair demand. Beef, 5½d to 7½d per lb; lamb, 8½d to 8½d per lb; mutton, 6d to 8½d per lb; veal, 6½d to 8d per lb. Milch cows large supply, fair trade, much cheaper. Bacon pigs, 9s 3d to 9s 6d per score; porkets, 9s 6d to 9s 9d per score; sows, 7s 6d per score.

Worcester, Saturday.—Fat cattle in moderate supply, and fair trade at late rates. Large entry of sheep, and quiet trade, without change in values. Fat calves and lambs in request, but not much demand for pigs. Best beef, 7d; inferior, 6d; wether mutton, 8d; ewes, 6d; lamb, 8d to 8½d; and veal, 7d per lb.

York, Friday.—Calves, 8d per lb: small sheep, 8½d to 9d per lb; large sheep, 8½d per lb; ewes, 6d to 7d per lb; lamb, 9d per lb; small pork pigs, 6s 6d per stone; large pork pigs, 6s per stone.

FOREIGN.

Deptford, Wednesday.—Beast supplies totalled 1,036, being a decrease of 125 as against last Wednesday's figures, and comprised 585 United States and 451 Canadian. A good demand prevailed, a sharp clearance being effected at stiffer prices. United States sold 4s 5d to 4s 8d; Canadian best, 4s 2d to 4s 4d; ranchers, 3s 10d to 4s per 81b to sink the offal. No sheep offered.

FEEDING STUFFS.

London, Thursday.—Linseed.—The demand has been moderate, and shipments for the week fully up to present requirements; at the close, however, prices are better, owing to speculative demand. Linseed cakes firm. London made, £8 to £8 5s. Russian, £7 15s to £7 17s 6d ex dock. American Westerns, at £7 12s 6d to £7 17s 6d. Cotton cakes continue steady. London made, £4 5s to £4 7s 6d. Rapeseed continues firm, but not much business doing. Cottonseed continues very quiet, owing to the scarcity of offers caused by the difficulty in obtaining freights.—THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes.—There is only a limited quantity of foreign on offer, for which there has been a steady trade during the past week, and values may be quoted 2s 6d per ton dearer. Russians are only obtainable in small lots at an advance of 1s 3d per ton. Americans do not offer on spot, but for early arrival are the turn dearer. English sell rather more freely at 2s 6d per ton more money, and are good value. Cotton Cakes.—A fair business has been done in Egyptian at last week's prices, and holders are inclined to advance prices. English sell quietly at a slight advance. Decorticated are only in retail demand, and values remain dear and unaltered on account of scarcity, while a steamer parcel of meal just arrived also offers at last Monday's quotations. Rape Cakes.—Unchanged. Maize Germ Meal.—The market is almost bare of stocks, and quotations are nominal for both American and English. Rice Meal.—The tone of the market has slightly improved, and landed parcels are now held for an advance of 2s 6d per ton.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—At to-day's market home-grown wheat of the old crop meets a fair demand at 6d per qr advance on the prices of last Tuesday. All descriptions of foreign are also 6d per qr dearer. Barley unaltered. Oats meet a steady sale at full prices. Beans rather in favour of sellers. Flat maize steady at last week's prices. Round Odessa, from extreme scarcity, commands 3d per qr more money. Cottonseed: Without material change in prices the market during the past week has been quiet, and only a moderate business done at £6 11s 3d spot and passage. Oil seed cakes: A quiet demand with steady market.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £8 17s. 6d. PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £8 15s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £4 12s 6d PER TON. ALL F.O.R. HULL.

WOOL.

London, Friday.—Wool, English, per pack of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 6d to 1s 7d; scoured good, 1s 7d to 1s 7¾d; scoured average, 1s 5d to 1s 6d; greasy average to fair, 10½d to 11½d; New South Wales, scoured average, 1s 3d to 1s 4d; greasy average, 8½d to 9½d; South Australian, greasy average, 6½d to 7d; New Zealand, scoured average, 1s 4½d to 1s 5½d; greasy average, 8½d to 9½d; Cape, scoured superior, 1s 6d to 1s 8d; fleece average, 8d to 9d; greasy average, 6½d to 7d; Natal, scoured, 1s 2d to 1s 3d; greasy average, 7½d to 7¾d. Crossbreds, greasy, Victorian, good to superior, 10d to 1s; New Zealand, fine, 9d to 10d; ditto medium, 7¾d to 8½d; ditto coarse, 6d to 7d.

Bradford, Thursday.—The tone of the market is rather better, whilst merinos have not gone down any further. Crossbreds and English are now quite steady. Mohair remains quiet, though there is a little doing in fine descriptions at full rates. There is no improvement to record in regard to yarns and pieces.

Canterbury, Saturday.—Trade continues dull at recent prices. Kent fleeces do not exceed 6d per lb; and lambs' wool, from 4½d to 5d.

Leicester, Saturday.—Wool dull and depressed. Consumers are now more cautious in operating in merinos and choice cross-breds. There is a fair turnover in the secondary cross-breds, while Shropshires are steady. In yarns there is fair activity in completing old contracts, but no great influx of new orders.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—A large supply of vegetables was offered, but trade ruled quiet. Good supplies of fruit were available, and met a fair demand. Greensuth:—Cabbages, 2s to 4s; marrows, 2s 6d to 3s 6d per lady; scarlet beans, 1s 6d to 3s per sieve; carrots, 1s 6d to 2s 6d; turnips, 3s to 3s 6d; parsley, 1s 6d to 2s; mint, 2s to 2s 6d per dozen bunches; horseradish, 1s to 1s 6d per bundle. Potatoes, 3s to 5s per cwt. Fruit: English grapes, 1s to 3s; Channel Islands, 6d to 1s 3d per lb; Dema, 4s 6d to 5s per barrel; English apples, 2s 6d to 5s; pears, 2s 6d to 6s per bushel. Californian, 7s 6d to 9s 6d per half case; French Williams, 2s 6d to 5s per box; greengages, 2s to 3s; plums, 2s to 4s per half-sieve; peaches, 3s to 8s per dozen; Valencia melons, 6s to 10s per case; bananas, 5s to 10s per bunch; lemons, 10s to 20s per case.

POTATOES.

Borough and Spitalfields, Saturday.—Arrivals of home grown potatoes this morning have been moderate, but the trade has been dull, and prices difficult to maintain. English—Beauty of Hebrons, 3s 3d to 4s; Early Puritans, 3s 3d to 4s; Snowdrops, 3s 3d to 4s; Early Regents, 3s to 3s 6d; Professor Maerker, 3s to 3s 6d; and Up to Dates, 3s to 3s 6d per cwt.

London (King's Cross), Saturday.—Trade fair; prices hardly so firm; blight in most samples. Puritan, 60s to 80s; British Queen, 60s to 80s; Up to Date, 60 to 75s; Snowdrop, 70s to 90s; Blackland, 60s to 65s.—COUPE AND TAYLOR.

HOPS.

Canterbury, Saturday.—Hop picking will be general by the 4th. The crop is found to come down short of expectations, though excellent under good management. The crop is not expected to exceed one-half the yield of last year.

Worcester, Saturday.—Fair trade in all classes of 1899 Worcesters, and growers generally ask 10s to 15s per cwt more money than they were willing to accept a month ago.

Worcester, Saturday.—There is no change to report in our market this week; the trade remains very quiet, but prices continue very firm. The reports from the plantations vary, but on the whole are favourable, especially in the best grounds, but it is now evident that there are many grounds where very few hops will be produced. Picking commences next week, but will not become general until the week after.—PIERCY AND CO.

MANURES.

Liverpool, Friday.—There is a somewhat active inquiry for basic slag for autumn delivery, and annexed are the values of the various tests. An increased demand is experienced for feeding stuffs, and late rates are well maintained on this market owing to the firmness at the ports of shipment abroad. Nitrate of soda, best quality, i.e., guaranteed 95 per cent., pure, in bags, £8 2s 6d to £8 7s 6d per ton; East India bone meal, in bags, £4 5s per ton; kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton; linseed cake, American thin oblong, prime, in bags, £7 12s 6d to £7 16s 3d per ton; linseed cake, English, prime, in bulk, £8 to £8 7s 6d per ton; linseed cake, foreign, prime, in bags, £7 17s 6d to £8 per ton; cottonseed cake, N.A., decorticated, sound, in bags, £6 10s to £6 15s per ton; cottonseed cake, English decorticated, prime, soft, in bags, £6 15s to £7 per ton; cottonseed cake, English, undecorticated, prime, in bulk, £4 5s to £4 7s 6d per ton; cottonseed cake (crushed), 20 to 25 per cent. oil, prime, in bags, £6 15s per ton; maize germ meal, English, prime, in bags, £5 2s 6d per ton; rice meal, Rangoon, as imported, in bags, £4 10s to £4 11s 3d per 240lb; Indian meal, coarse to fine grinding, prime, in bulk, 11s 3d to 11s 9d per qr, 416lb; linseed, fine bold feeding, in bags, £3 1s to £3 2s 6d per cwt; N.A. cloverseed, new red, fair to good, in bags; D.N.S. Brand superphosphate of lime, guaranteed, 25 to 27 sol., in bags; D.N.S. Brand, superphosphate of lime, guaranteed, 30 to 31 sol., in bags; D.N.S. Brand superphosphate of lime, guaranteed, 35 to 36 sol., in bags, per ton, nominal; basic slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, £1 11s to £1 12s 6d per ton; basic slag, prime quality, guaranteed, 35 to 40 per cent. phos., in bags, £1 12s 6d to £1 13s 6d per ton; basic slag, finest quality, guaranteed, 38 to 45 per cent. phos., in bags, £1 16s to £1 17s 6d per ton, at the producing depots.—H. JONES LANGAR AND CO.

8. South Tyne Agricultural Society's Show, at Bellister Parks.
9. Gillingham Agricultural Society and Farmers' Club Show, at Gillingham.

THE BALTIC.

Wheat cargoes were advancing during the last four days of August, but September came in with a weaker tendency. Prices recorded during the week include Californian at 31s. 6d., Argentine at 29s. 9d., Siberian at 29s. 6d., No. 1 Northern at 29s. 6d., hard winter at 28s. 6d., North Russian at 29s. 6d., Walla Walla at 29s. 9d., Blue Stem at 31s., New Zealand at 30s., Australian at 32s., Azoff 30s. 9d., Odessa Ghirka at 30s. 3d., fine Azima at 32s., Roumanian at 30s., Bulgarian at 29s., No. 1 Chicago spring at 31s., best Manitoba at 31s. 7½d., and No. 2 red winter at 29s. 6d. per qr.

Maize is a quiet trade, but far from inactive at the root of it, as may be imagined from the fact that several cargoes of American new crop for February shipment have been placed at Liverpool for 4s. per cental, and 3s. 11d for March is accepted. London is more conservative, and is not buying much ahead of November; for shipment in that month 20s. is paid. The cargo sales of the week include Galatz at 22s. 6d., Bessarabian at 23s. 6d., and Argentine at 21s. 3d. per qr.

Barley sales show no eagerness to acquire cargoes either on passage or for future shipment; but the following sales may be recorded: Odessa, 20s.; Nicolaieff, 19s. 9d.; Oregon, 26s. 6d.; Californian, 25s. 6d.; Gaza, 23s. 6d.; and Roumanian, 416lb. sample, 24s. 6d. per qr.

Oats are 3d. dearer to buy, but the large shipments from Russia oppose a steady barrier to price advance. Recorded transactions include:—New Irish at 16s. 6d., white Canadian at 15s. 4½d., American mixed at 14s. 1½d., and St. Petersburg at 13s. 6d. per qr.

Other cargo sales of the week comprise:—Azoff rye at 24s. 3d., Smyrna beans at 27s. 9d., Canadian peas at 28s. 3d., Calcutta linseed at 54s. 3d., linseed oil at £32, Roumanian rapeseed at 41s. 9d., Ravison at 30s. 3d., Calcutta poppyseed at 45s., and Egyptian cottonseed at £6 17s. 6d. Cargo arrivals last week were one wheat, one maize, one beans. The wheat and maize were from Buenos Ayres, and the beans were from Saffi. Arrivals Jan. 1 to Aug. 31 were:—257 of wheat, ten of maize, thirty-four of barley, eighteen of beans, nine of oilseeds, and ten of various staples, such as dari, millet, etc. These arrivals are for the ports of call.

The Outbreak of Foot and Mouth Disease near Rhyl.

Two fresh outbreaks of foot and mouth disease occurred on Wednesday, near Rhyl. The stock at the vicarage grounds, Dyserth, as well as that on a farm close by, are affected. It is feared that the disease is gradually spreading. The Board of Agriculture have resident inspectors in the district, and the affected farms are guarded day and night.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending August 25th 1900:—

| | | |

LIVE STOCK.

OUR ILLUSTRATIONS.

A few years back, at the dispersion sale of Longhorn cattle at Calk Abbey, then the property of Sir John Hooper, with a view to breeding some good cross-bred cattle, Mr. Watson made a selection for that purpose, since using good, heavy-fleshed, Shorthorned bulls, at the same time not losing sight of the dairy qualities of their dams. As beef-makers, the plate on page 309 represents three sold at his sale in September last, two of which were bought by a local feeder, he securing the "Champion Cups" at the Cockermouth and Whitehaven Christmas Fat Shows, and the third or right-hand beast was purchased by Mr. Tickle, of Hill Side Farm, Warrington. He secured similar honours at the Warrington Fat Stock Show, Christmas, 1899, thus repeating his honour of 1898 by a beast bought at this sale the same year. Any person who will pay Mr. Watson a visit on Friday, the 7th September, will meet with a hearty welcome, see the few grand dairy cattle of similar cross, and cannot but pronounce that Mr. Watson, in the words of our American friends, has succeeded in producing what they call a dual purpose cow.

The Highland bull Laoich 1260 was exhibited at the Royal Show at York, when he won for the Earl of Southesk, of Kinnaird Castle, Brechin, first prize in his class, and in addition the champion prize of £15 offered by the Highland Cattle Society for the best Highland bull. Laoich was bred by Mr. John Stewart, Ensay, Portree, Inverness-shire, and is by Caetharnach Buidhe 719, dam Shellay 3rd by Morair.

The Shire filly Dunsmore Combine was bred by Mr. P. A. Muntz, M.P., of Dunsmore, Rugby, by whom she was exhibited at the London Shire Horse Show in the spring. Dunsmore Combine is a chestnut by Dunsmore Willington Boy 13021, out of that celebrated mare 14655 Dunsmore Gloaming by Harold 3703, and won at the Shire Horse Show first prize in the class for three-year-olds and the cup for the best animal in the younger female classes.

STOCK AND SHOW NOTES

By Herdsman.

A New York correspondent of a morning newspaper states that it is estimated that in Chicago, New York and other big cities in the United States more than ten thousand horses have been killed by the heat this summer.

The Council of the Norfolk Agricultural Association have arranged to hold next year's Spring Horse Show at the Agricultural Hall, Norwich, on March 30th, 1901, and the Summer Show on Wednesday and Thursday, June 19th and 20th, 1901.

Alfred Mansell and Co.'s first store stock sale of the season will be held on Thursday next, September 6th. An unusually large entry of first-class cattle has been received. The show of polled Angus and polled Angus-Shorthorn crosses, breeds which are much sought after in this market, will be one of the best ever seen in the Shrewsbury Smithfield, all of which are consigned by old and well-known breeders. Shorthorns will also be well represented, a really good lot of bullocks and heifers coming from the usual consignors, whilst there will be a good display of Herefords. A large number of the foregoing are cattle in forward condition and fit for finishing off for Christmas beef. There are also a number of good lots of well-bred cattle of different breeds, not quite so forward, but suitable for wintering in the yards, whilst special entries of 250 Clun wethers are also to hand, as well as Clun ewes. All cattle are weighed and the weight announced as each lot passes through the sale ring.

The annual autumnal sale of Shropshire sheep in Bingley Hall, Birmingham, will be held on Thursday next, September 6th, by Messrs. Lythall and Walters, for which sale about 150 grand shearling rams of great size and substance, and 500 shearling ewes of undeniable breeding, are catalogued. Entries are made by the old-established Royal prize-winning flocks of Messrs. A. S. Berry, A. Bradburne, T. F. Cheatle, P. S. Mills, T. S. Minton, E. Nock, H. C. G. Parker, and M. Williams, and the catalogue also comprises drafts from the well-known flocks of the Earl of Dartmouth, The Earl of Strathmore and Kinghorn, Messrs. Adcock, Clive, Dee, Gerrard, Instone, Joliffe, Kemp, Nevett, Pilgrim, H. Williams, and others. Several winners at leading shows this season are themselves included in the sale.

A number of Hackneys and harness horses will be sold by auction at Peterborough Repository, on Wednesday, September 5th, 1900 (the day of the Peterborough Foal Show), by Messrs. Sexton, Grimwade, and Beck. Catalogues of the sale are now ready, and may be obtained of the auctioneers.

I have been informed that the recent shipment to Canada of 106 Shropshire sheep by Alfred Mansell and Co., for Mr. W. C. Edwards, M.P., per the s.s. Lycia, comprised the following high-class specially selected animals from the following flocks:—Twenty beautiful shearling ewes from Messrs. Evans, sired by such celebrated sheep as Montford Monarch 10016, bred by Mr. T. S. Minton, by the 120gs. Royal winner Phenomenon 8680; Star of the Morning 10145, bred by Mr. A. E. Mansell, by Dream Star 8977 (a son of the famous Montford Dreamer); Star of Fame 10144, bred by Messrs. Evans, by Star of the West 8764, by Hold Tight 6141. Messrs. Evans also supplied a high-class ram by Star of the Morning from a ewe by the renowned Rare Stamp 4761, and owning as its grandsire The Rector 1769, winner first R.A.S.E. Ten grand ewes were from Mr. Harry Williams' noted flock, all of which were sired by the Royal winner, Manchester Guardian 9569, or Sam's Best 9668, bred by Mr. Nevett, by The Thorpe Deemster 8269 (a son of the 190-guinea The Deemster). Twenty very choice ewes were from the Yorton flock, the property of the late Mr. W. Nevett, owning as their sires such well-known rams as Corrie Varkie 9418, bred by Mr. Buttar, by the renowned Lord Patriot 4627, Buttar's Jubilee 9378, by Bonaparte 7330, The Thorpe Deemster 8269, by The Deemster 7165, Rare Brand 9199, a son of the famous sire Rare Stamp 4761, the progenitor of upwards of sixty showyard winners. Then from Mr. T. S. Minton were selected twenty-five extra good ewes, sired by the 120-guinea Phenomenon, a first prize Royal winner, by the 175-guinea Montford Dreamer; Montford B 10007, bred by Mr. Minton, by Downton Jubilee 9455, a Royal winner by Parish Councillor; Montford A 10006, by the same sire from a Fair Star ewe. It will be remembered that in 1895 thirty-two sons by Fair Star at the Harrington sale averaged £42 3s. Mr. Minton also supplied seven good rams bred on the same lines. Fifteen good ewes and eight very smart ram lambs were from Mr. T. Davies's carefully-bred flock, and were sired by Long Harry 10405, bred by Mr. R. C. Pryce, by the 70-guinea Old Harry 8666; Danegelt 9876, bred by Mr. R. Brown, by Old Castle Choice 9162; Ness Schoolboy 9138, bred by Mr. W. Nunnerley, by Baron Thorpe 5013. Altogether this comprised one of the most valuable collections of Shropshires which has ever been exported, and should put Mr. Edwards in the front rank as a breeder of this popular breed of sheep.

A couple of fine black Berkshire pigs, selected by Mr. Tait, Her Majesty's steward, from the stock on the Prince Consort's Farm, Windsor Park, have been sent to Queensland.

The fine herd of Black Polled cattle belonging to Col. W. N. Tufnell, of Langleys, Chelmsford, which is to be sold by auction by Messrs. Thornton and Co., on Thursday, October 11th, has been in existence about ten years, and was started with the purchase of a very good cow, Black Beauty of Roos, from Mr. Arthur Egginton's herd in Yorkshire, from whom was also obtained the bull Tinto 7937. The issue of these highly bred animals was the fine bull Lord Monken 9341, who is now healthy and active in his tenth year. For several years he was successfully exhibited, winning first as a yearling at the Essex Show and was placed among the prize winners as an aged bull at the Royal at Leicester, 1896. There are a good lot of young stock by him for sale, showing his great value as a first-class sire.

Purchases were afterwards made from Mr. C. W. Schroeter's large herd at Tedfold, Sussex, and Mr. F. Crisp's of Southgate, several of the animals being descended from the herds of the Earl of Aberdeen, Mr. W. Stewart, Mr. A. Mackenzie, and other good breeders in Scotland. At the dispersion of Lord Rookwood's herd some purchases were made, including Corksie 2nd of Down Hall 22213, the dam of Castilla and Corniche, both prize heifers at the Northamptonshire Show. In 1894 the handsome bull Eureka 10826, a son of Kinochtry Erica, was purchased from the Tedfold herd. He became a well-known prize bull, winning first at the Bath and West of England Show at Taunton as well as other prizes. Doodle 13314, a son of Sir George McPherson Grant's Gold-seeker of Ballindalloch, was purchased from Mr. C. P. Sykes, of West Ella, Yorkshire. He too has been a very successful prize bull, and is still in service, several of the lots for sale being by him.

Lord Southesk's Highland Bull Laoich, First at York.

Col. Tufnell's herd has been exhibited since 1892 with marked success. A list of the prizes is given at the end of the catalogue. The animals are in excellent health and in a good breeding state. Most of the cows have strong, good, hairy calves running with them, and are again forward in calf to Lord Monken 9341, Doodle 13314, or Pluto of Southgate 17937, bred by Mr. F. Crisp. They comprise nearly the whole of this very choice prize herd, and can be well recommended to breeders of Black Polled cattle in the south of England, or to gentlemen who may be forming a herd.

On the 13th inst. Messrs. Thornton and Co. will sell a number of Shorthorns, the property of the Marquis of Exeter, as well as the small choice herd belonging to the late Mrs. Franklin, of Syston Old Hall, at Burghley Park. Many of the animals for sale, the descendants of Sea Gull, trace to the celebrated cow Innocence, entered in the second volume of the Herd Book, who, as well as her dam, were both by Mr. Charles Colling's

celebrated bull Windsor 698, a son of Favourite 252. Innocence bred Empress, the dam of the famous bull Emperor 1014, who was illustrated, in his sixteenth year, in the second volume of the Herd Book. Dove, dam of Ringdove, lot 15, a granddaughter of the well-known prize cow Sea Gull, is lineally descended from the old Innocence tribe. She has maintained its merit to the present day, as she was entered, with her offspring, Pet, Petrel, and Telemachus 34th, at the Yorkshire Show at Doncaster, and took the reserve place in the large family class. There are a number of this tribe for sale, as well as of the Louisas, descended from Mr. Charge's Mary by Western Comet 689, from which family was bred the famous bull Telemachus 27603, winner of upwards of £1,071 in prize-money and cups, from 1869 to 1875.

The late Mrs. Franklin's small select herd, removed from Syston Old Hall, Grantham, will also be sold. The animals are full of good blood, some of them being descendants of Sea Gull; others are bred from the stock of the late Hon. Chas. Fitzwilliam and the old Alnwick and Gate Burton herds. The bull Czar of Ruddington 66895, bred by Mr. P. L. Mills from the best Scotch strains, was used, and at present in service and for sale is Bestwood Red Robin 76155, by Mr. Ecroyd's Red Robin, from a beautiful cow of the Blanche tribe.

On the following day (September 14th), the herd of Shorthorns bred by Mr. John Cooper will be sold at Brook Hill, East Haddon, Northampton. This herd was started in 1876, with purchases from Mr. J. Beasley, of Chapel Brampton, and Mr. Bagshaw, of Newton, two of the oldest breeders in Northamptonshire. There are a number of the old and favourite J tribe, which are lineally descended from Mr. Robt. Colling's Princess, the ancestress of the old Gwynne family. The Vestris, an excellent milking tribe, well known in the herd of Mr. I. N. Edwards, of St. Albans, came from Mr. Drake, of Shardeloes, Bucks. The Knightleys, of which there are some beautiful specimens of the Fawsley family, came from Mr. Sheldon, of Brailes, and Capt. Ashby, of Naseby. There are also a few representatives of the Duchess Sarahs from Althorp. The most numerous tribe is the well-known old Daisy, obtained from Mr. Basset, of Pilton, Barnstaple, who had them from the late Rev. W. Holt Beever.

On Monday, the 20th August, Messrs. Alfred Mansell and Co., of Shrewsbury, shipped, per the s.s. Teutonia, from Hamburg, to the order of Messrs. G. Harding and Son, of Waukesha, thirty-two very high-class Rambouillet Merino rams, specially selected from the leading German flocks by Mr. Alfred Mansell, of the above firm.

The s.s. Morayshire, which left London on Monday for Fremantle, has on board six valuable pedigree bulls, which have been selected by the Hon. W. T. Loton, M.L.C. of Western Australia, who is now on a visit to this country, for his model farm in the Swan district. He returns to the colony in about a fortnight's time.

CATTLE.

Sale of the Endale Herefords.

On Tuesday Messrs. A. and D. Edwards sold by auction the whole of the well-known Endale herd of pedigree Hereford cattle, the property of Mr. Edward Yeld. In calling attention of breeders to the catalogue, the auctioneers pointed out that the herd had been in existence for nearly a century, Mr. Edward Yeld's grandfather having won a first prize in the Hereford classes at the Herefordshire Show in the year 1801. The late Mr. G. Yeld then continued breeding very successfully for a number of years, amongst his herd being the prize winning bull Commerce, No. 354. Mr. Edward Yeld had been carrying on the herd at Endale for the last twenty-seven years, and had bred over 200 prize winners at the Royal, Bath and West of England, Herefordshire and Worcestershire, Leominster, and Ludlow Shows. A large and representative company assisted in the dispersion, and excellent prices were realised.

Prize List.

COWS AND CALVES.

	Gs.
Royal Princess, s Lead On ..... Mr. Morris, Pembridge	26
Her heifer calf ..... Mr. Morris	10
Wilton Primrose, s Hope ..... Mr. Reynolds, Ludlow	20
Her buff calf ..... Mr. A. Benn	16
Royal Primrose, s Royal Hero — Mr. J. Somer, Upton-on-Severn	24
Her heifer calf ..... Mr. Benson, Berrington, Tenbury	15
Hero's Princess, s Royal Hero ..... Mr. Somer	21
Royal Cynthia, s Cavalier — Mr. T. Lawson Walker, Knightwick	24
Endale Cynthia, s Royal Hero .... Mr. Foster, Bridgnorth	40
Queenie, s Royal Hero ..... Mr. Vaughan, Builth	19
Her bull calf ..... Mr. S. Robinson, Lynhales	13
Lady Hope 4th, s Hope On ..... Mr. Tom Vale	16

Leominster Daisy, s Lead On ..... Lord Llangattock	81

TWO-YEAR-OLDS.

Rhoda Lind, s Rhodesia ..... Mr. T. Lawson Walker	15
Douglas Pearl, s Endale Hero ..... Mr. Hyslop	26
Nancy, s Lysander .. Mr. J. Melling, Lady Halton, Ludlow	21
Double Lily, s Knight — Mr. Price, Ladymeadow, Leominster	22

YEARLING HEIFERS.

Crinkie, s Great Hero ..... Mr. Somer	20
Luna Yet, s Endale Hero .... Mr. Thomas, Garth, Brecon	11

Mr. F. S. Lewin, Holbrook, acted as stewards. The entries were about the same as last year. The foals were good, but they did not come up to quite the same bloom, and there was a general feeling that the fixture was this year somewhat too late. The judges had not a very difficult task in awarding the prizes. They gave the chief honour to a horse foal by Smith's Dimple Dick, bred by Mr. Geo. Stedman, Stowupland, as likely to grow into the best cart horse, but there were some who preferred the horse foal by Quilter's Prince Wedgewood, bred by Mr. Geo. W. Hammond, which was second. A filly foal by Quilter's Prince Wedgewood, bred by Mr. W. Ling, Tunstall, was third; a horse foal by Smith's Dimple Dick, bred by Mr. Geo. Skeet, Badingham, was highly commended, and another horse foal, by Smith's Prince Albert, bred by Mr. H. Hawes, Hasketon, commended. The sale was preceded by luncheon, at which the President of the Suffolk Horse Society, Sir Cuthbert Quilter, Bart., M.P., presided. He was supported by the Earl of Stradbroke, many members of the Society, and a large number of visitors, including Mr. A. A. Dangar, from New South Wales, Messrs. Abraham, from New Zealand, and other gentlemen.

Subjoined are the prices realised at the sale, which was evidently a very satisfactory one:—

NOMINATION FOALS.
(The property of the Suffolk Horse Society.)

	Gs.
Filly foal, breeder, Mr. W. Ling, Tunstall, s Quilter's Wedgewood .... His Highness Prince Dhuleep Singh	17
Horse foal, breeder, Mr. H. Hawes, Hasketon, s Smith's Prince Albert ..... Mr. Alfred Smith	17½
Horse foal, breeder, Mr. F. Smith, Stutton, s Berners's Windsor Chieftain ..... Mr. Rising, London	15½
Horse foal, breeder, Mr. Geo. Stedman, Stowupland, s Smith's Dimple Dick .. Mr. Hy. Clarke, Worlingworth	17
Horse foal, breeder, Mr. Geo. Clarke, Foxhall, s Berner's Windsor Chieftain ..... Mr. A. H. E. Wood, Sudbourne	15

THREE CHAMPION BULLOCKS, BRED BY MR. JOHN R. WATSON, THE MOSSES FARM, WRIGHT GREEN STREET, COCKERMOUTH.

HORSES.

Suffolk Horse Show and Sale at Ipswich.

The third annual sale of pedigree Suffolk horses, held under the auspices of the Suffolk Horse Society, took place on Thursday, at Gippeswyk Park, Ipswich, the auctioneers being Mr. Alfred Preston, in conjunction with Mr. Fred Smith, secretary of the Society. The sale attracted a large number of agriculturists and several colonial buyers. As usual, the sale was preceded by a show of nomination foals, entered for competition in accordance with the Breeding Scheme of the Suffolk Horse Society. The judges were:—Mr. Robert H. Wrinch, Harkstead, and Mr. Walter Whitlock, Great Yeldham, while Mr. W. Shipley, M.R.C.V.S., Great Yarmouth, was the veterinary surgeon, every animal two years old and upwards being sold with veterinary's certificate of soundness. Mr. W. H. Hewitt, Copdock, Mr. Edwin H. Preston, Worlingworth, and

Horse foal, breeder, Mr. Geo. Skeet, Badingham, s Smith's Dimple Dick ..... Mr. Gerald Smith, Bealings	18½
Filly foal, breeder, Mr. Jas. Youngman, Charsfield, s Pratt's Golden Grain ..... Mr. Chas. Pratt, Melton	17½
Filly foal, breeder, Mr Samuel Orford, Campsey Ashe, s Quilter's Prince Wedgewood ..... Mr. Rising	14½
Horse foal, breeder, Mr. J. Punt, Bealings, s Smith's Prince Albert ..... Mr. A. H. E. Wood	14½
Horse foal, breeder, Mr. W. Durrant, Butley, s Quilter's Prince Wedgewood ..... Mr. Gerald Smith	13½

FOALS.

From Sir J. Gorrell Barnes, Stratford St. Mary.

Horse foal, breeder owner, s Hewitt's Mars — Mr. H. Biddell, Playford	10

From Mr. W. R. Hustler, Cockfield.

Hailstone, horse foal, s Johnstone's Sunshine — Mr. A. H. E. Wood	13

From Mr. Leonard Smith, Hasketon.

Filly foal, breeder owner, s Pratt's Golden Grain — Mr. A. H. E. Wood	35
Horse foal, breeder owner, s Cook's Border Minstrel — Mr. Chambers	19
Filly foal, breeder owner, s Smith's Dimple Dick — Mr. A. H. E. Wood	25

From Mr. H. E. Smith, Walton.

Horse foal, breeder, owner, s Cordy's Homocea — Mr. W. Everitt	17½

From Mr. W. Thompson, Dallinghoo.

Filly foal, breeder, owner, s Smith's Prince Albert — Mr. Chas. Pratt	25
Filly foal, breeder, owner, s Smith's Dimple Dick — Mr. W. Whitlock, for Mr. Geo. Courtauld, Halstead	16
Lord Bobs, horse foal, breeder, owner, s Cook's Border Minstrel ..... Mr. Edwd. Quilter, Bentley	36

From Mr. Geo. Rope, Blaxhall.

Horse foal, breeder, owner, s Tuffer's Vespasian — Sir Cuthbert Quilter, Bart., M.P.	10

From Mr. E. Tydeman, Stonham.

Horse foal, s Mumford's Tattler ..... Mr. Chambers	13

From Mr. R. Cuthbert, Letheringham.

Khaki, horse foal, breeder, owner, s Pratt's Golden Grain — Sir Cuthbert Quilter	34

MARES AND FOALS.

From Mr. E. F. Quilter, Bentley, Ipswich.

Patience, 1st class breeder Mr. H. Cotswold's Exors., Trimley St. Martin, s Biddell's Prince Albert — Col. Batten, Devonshire	30
Filly foal, 1st February, 1900, s Berner's Windsor Chieftain — Sir Cuthbert Quilter	30

MARES AND FILLIES.
From Mr. Charles Hugh Berners, Woolverstone Park.

Woolverstone Joan, f 1898, s Berner's Windsor Chieftain — Col. Bullen — Gs. 52

Woolverstone Dorothy, f 1898, s Berner's Windsor Chieftain — Mr. W. F. Grimwood — 40

From Mr. E. B. Quilter, Bentley.

Violet, f 1897, breeder, Mr. G. Stedman, Stowupland, s Mumford's Tattler — Sir Cuthbert Quilter — 50

Bentley Lass, f 1898, breeder, Mr. F. C. Le Starkie, Woodlands, Farnboro', Hants, s Starkie's Dr. Jim — Mr. Ludbrook — 41

Confusion, f 1898, breeder, Mr. A. B. Corrie, St. Osyth, s Corrie's Pilgrim — Mr. W. Balls, Mutford — 36

From Mr. John Symonds, Thistleton Hall, Burgh.

Diamond Jubilee, f March, 1897, breeder, owner, s Everitt's Warrior — Mr. Kindred, Cransford — 60

From Mr. Geo. Rope, Blaxhall.

Blaxhall Lorna, f 1899, breeder owner, s Smith's Wedgewood — Mr. Geo. Symonds, Burgate — 42

From Sir Cuthbert Quilter, Bart., M.P., Bawdsey.

Bawdsey Christabel, f 1898, breeder owner, s Quilter's Prince Wedgewood — Mr. Geo. Symonds, Burgate — 42

Bawdsey Snapshot, f 1898, breeder owner, s Quilter's Prince Wedgewood — Earl Stradbroke — 34

From the Right Hon. the Earl of Stradbroke, Henham Hall.

Duchess, f 1899, breeder, owner, s Earl of Stradbroke's Farmer — Mr Wm. Whitlock — 24

From Mr. W. Henry Hewitt, Copdock.

Orange Pip, f 1899, breeder, owner, s Hewitt's Mars — Sir Cuthbert Quilter — 52

Gippeswick Lass, f 1899, breeder, Mr. G. W. Hammond, Easton, s Quilter's Prince Wedgewood — Mr. T. Bixby, Copdock — 45

From Mr. A. J. Smith, Rendlesham.

Rendlesham Lady, f 1897, breeder, owner, s Smith's Wedgewood — Mr. Geo. Symonds — 43

Rendlesham Merry, f 1898, breeder, owner, s Smith's Wedgewood — Mr. A. A. Dangar — 53

From Mr. E. Le Heup Cocksedge, Beyton Grange.

Glitter, f 1893, breeder, owner, s Wolton's Dauntless — Sir J. Gorrell Barnes — 46

From Mr. George Courtauld, Gosfield.

Blossom, f 1893, breeder, Mr. J. G. Everett, Falkenham, s Condor — Sir J. Gorrell Barnes — 46

Veta, f 1898, breeder, Mr. F. F. Girling, s Biddell's Playford Glory — Mr. C. Girling — 38

GELDINGS.
From Mr. F. C. Starkie, Woodlands, Farnborough, Hants.

Matt, f April, 1898, s Starkie's Dr. Jim — Mr. Chas. Pratt — 55

From Mr. Fred. Smith, Woodbridge.

Prince, f 1894, s Smith's Wedgewood — Mr. Chas. Pratt — 55

From Mr. J. Fox Haggar, Burstall, Ipswich.

Captain, f 1894, breeder, Sir W. N. Abdy, Bart., Manifold Wick, Tolleshunt Knights, s Sir W. N. Abdy's Gosbeck Hero — Mr. Bentall, Heybridge — 55

From Mr. W. H. Hewitt, Copdock.

Ronald, f May, 1899, breeder, owner, s Hewitt's Mars — Mr. Chambers — 14½

STALLIONS.
From Mr. W. P. Harris, Church Farm, Brome, Scole.

Brome Rodney, f May 6, 1893, breeder, owner, s Smith's Freston Tip Top — Col. Bullen — 20

From Mr. A. H. E. Wood, Sudbourne Hall.

Sudbourne Brownie, f 1897, breeder, Sir Cuthbert Quilter, M.P., s Quilter's Prince Wedgewood. Passed at 155 gns.

Sudbourne Park, f 1898, breeder Mr. W. Wilson, Raydon, s Heywood's Lowestoft — Mr. Dangar — 90

Sudbourne Sirdar, f 1898, breeder Mr. W. E. Long, Hurts Hall, Saxmundham, s Pratt's Eclipse. Passed.

Sudbourne Bouncer, f 1898, breeder Mr. Thos. Pettit, Iken Hall, Wickham Market, s Pratt's Eclipse — Mr. Dangar — 60

From Mr. Wm. Everitt, Levington, Ipswich.

Butley Marquis, f 1895, breeder Mr. W. Easthaugh, Butley. Passed.

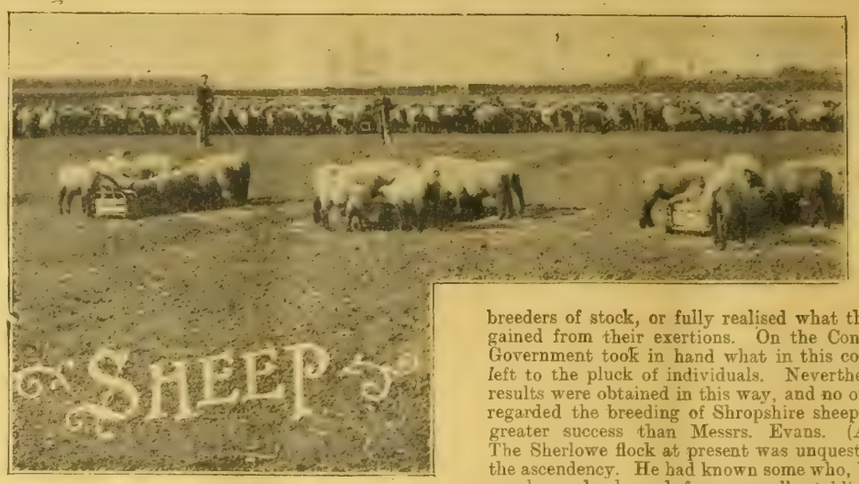
Stratton Warrior, f 1898, breeder Mr. Spencer Dawson, Stratton Hall, s Everitt's Warrior — Mr. E. F. Quilter — 73

Horse Sale at Glasgow.

A sale of horses was held on Wednesday by Messrs. Dixon and Wallace, when there were 119 animals catalogued, consisting of harness, van, and cart horses, as well as a few cobs and ponies. Trade during the sale was of a satisfactory character. Mr. Wallace occupied the rostrum as auctioneer. The ages of the animals ranged from five to ten years, and they were from 12.2 to 17 hands high. A number of the horses were guaranteed sound in wind, free from vice, and quiet in all harness. Harness and cart horses experienced the best demand and sold well. Cobs had a fair dear-selling trade. Best carriage-horses sold up to 36gs.; secondary and inferior, six to 18gs.; cart horses, to £35, and down to 6gs., according to style and action; best vanners, to 32½gs.; secondary and inferior, six to 16gs.; cobs, eight to 22gs.; and ponies, five to 14gs. A good clearance was effected at a late hour.

Unsound Beef.—Fred Wade, a farmer of Mixenden, was summoned by the Halifax Corporation, on Tuesday, for having deposited in his premises, for the purpose of sale, four pieces of beef, weighing 194lb., which were discovered to be unfit for food. A fine of £20 and costs was imposed, the chairman remarking that the only question was whether a fine would meet the case, or whether the seriousness of the offence should not be met with a term of imprisonment. The fine was paid.

Ballintubber, co. Roscommon. Held on 25th August. Small fair; very slow demand. Calves, first class, £3 10s. to £5 15s.; second class, £2 5s. to £4 5s. Yearlings, second class, £6 to £7 10s. Two-year-olds, first class, £12 15s. to £13 10s.; second class, £9 to £11 15s. Three-year-olds, second class, £14. Springers, first class, £17 to £18 13s. 4d.; second class, £13 to £15. Good demand for ewes suitable for breeding purposes. Lambs, first class, £1 6s. to £1 8s. 3d.; second class, £1 2s. to £1 5s. Hoggets, first class, £1 19s. to £2 2s.; second class, £1 13s. Two-years-old and over, first class, £2 0s. 6d. to £2 10s.; second class, £1 13s. to £1 19s. Young pigs, eight to ten weeks old, sold at from 17s. to 25s. each.



Sale of Mr. D. Buttar's Shropshires.

The annual draft of pedigreed rams and ewes from the famous Corston flock, belonging to Mr. David Buttar, was exposed for sale at Corston. The sheep put through the ring were in every respect equal, if not superior, to any lot ever seen there, and amongst the rams were some of the highest breeding and merit; whilst sheep for crossing purposes, and of strong and robust constitution, were obtainable. At the luncheon which preceded the sale, Mr. P. A. Muntz, M.P., presided, and in proposing the health of Mr. Buttar, referred to the ever-increasing popularity of the breed, and to the high standing now attained by the Corston flock. Sixty rams were catalogued for sale, but No. 3 on the list—a sheep of great value—had died as the result of an accident. The remaining fifty-nine brought prices ranging from 6½ to 100 guineas, the latter price being paid by the Earl of Strathmore for the splendid ram which took first place at Stirling, and was highly commended at York. The fifty nine rams fetched the total sum of £892 0s. 6d., being an average of about £15 3s., as compared with last year's yield of £14 15s. 6d. Fourteen extra rams were sold at prices from five to seven guineas, the average for these being £5 13s. 3d. Eighteen pens of nice ewes, which were greatly admired, found ready purchasers at from 56s. to 136s. 6d. each, the average bringing out the sum of about £4 4s. The total sum drawn by the sale was as follows:—Fifty-nine catalogued rams, £892 0s. 6d.; fourteen extra rams, £79 5s. 6d.; eighty ewes, £335 7s. 6d.—£1,306 13s. 6d.

Mr. W. Thomas's Shropshires.

Mr. William Thomas's annual sale of Shropshire sheep was held at the Beam House, near Shrewsbury, on Tuesday. Prices were:—Shearling rams: 14gs., Mr. A. Everall; 15gs., Mr. F. Gregory; 14gs., Mr. Everall,; 9gs., Mr. Russell; 10gs., Mr. Russell; 9gs., Mr. Reynolds; 8gs., Mr. J. G. Eve; 8gs., Captain Mytton; 7gs., Mr. William Roberts; 8gs., Mr. Richards; 7½gs., Mr. Brache; 5½gs., Mrs. Rogers; 6gs., Mr. J. Harding. Pasture rangers: 13gs., Mr. Joseph Everall; 9gs., Mr. Edward Griffiths; 8½gs., Mr. J. Davies; 10gs., Mr. Reynolds; 8½gs., Mr. Gregory, Walford; 12gs., Mr. Basnett; 8½gs., Mr. Roberts; 10gs., Mr. J. Corden; 10gs., Mr. A. Everall; 8gs., Mr. J. Cureton, Hordley; 11gs. (to let), Mrs. Rogers; 6gs., Mr. Hilton; 13gs., Mr. J. Gregory; 10gs., Mr. Richard Bromley; 8½gs., Mr. Moore; 8gs., Mr. Wackerell; 9gs., Mr. Vaughan; 8gs., Mr. Morris, Wood Eaton; 8½gs., Mr. Morris; 7gs., Mr. Griffiths; 7½gs., Mr. Maxwell; 5½gs., Mr. Wilde; 6gs., Mr. Prince; 5gs., Mr. J. Crane; 6½gs., Mr. J. Rogers. Ewes: 5gs. and 4gs., Mr. Muntz; 110s. and 62s., Mr. P. A. Evans; 57s. 6d., 55s., 57s. 6d., and 62s. 6d., Mr. Ledger; 3½gs., Mr. Russell; 52s. 6d. and 47s. 6d., Mr. Maxwell; 57s. 6d., Mr. Bellyse; 60s., Mr. Timmis; 57s. 6d., Mr. J. T. Nickels; 52s. 6d., Mr. T. Rogers; 50s., Mr. Brocklehurst.

Sherlowe Sale of Shropshire Sheep.

On Friday, the 24th ult., this annual event took place at Sherlowe, near Wellington, Salop, in the heart of the Shropshire sheep-breeding country. The sale was a great success, the sheep being worthy in every way of the high reputation this grand old flock enjoys among the admirers of the popular Shropshire. Luncheon was served in the usual style in a marquee in front of the house, at which all leading breeders were present, and notwithstanding harvest operations an excellent all-round company assembled. After full justice had been done to the good things provided, the chairman (Mr. P. A. Evans) proposed the usual loyal toasts, which were duly honoured. Mr. A. E. Mansell then proposed the toast of "Messrs. Evans, and Success to the Sale." He said he could conceive of no greater pleasure than that of drinking the health of Messrs. Evans, the sons of the late Mr. J. Evans, of Uffington, who was an ideal breeder of stock. (Applause.) He did not think the country quite appreciated the efforts and the anxieties of breeders of stock, or fully realised what the country gained from their exertions. On the Continent the Government took in hand what in this country was left to the pluck of individuals. Nevertheless, good results were obtained in this way, and no one had, as regarded the breeding of Shropshire sheep, achieved greater success than Messrs. Evans. (Applause.) The Sherlowe flock at present was unquestionably in the ascendency. He had known some who, by making purchases haphazard from a well-established flock, had eventually got around them a very valuable lot of sheep. It was safe to predict a very prosperous future for Shropshires since Australia now had the breed in great favour. At every sale of Shropshire sheep this season rams had been bought for exportation to Australia and New Zealand, and his advice to them was to breed sheep that would meet the demands of that trade, remembering that none but the best would be required. He concluded by a reference to the reputation Mr. P. A. Evans had won as a judge in the premier showyards of the country. The chairman, in reply, acknowledged the extent to which the flock was indebted to the enterprise of his late father for the high qualities they now possessed. He had taken every opportunity to learn from him his views in the breeding of pedigree stock, and he had not regretted the interest which he had always shown in Shropshire sheep and Shorthorn cattle. The demand by foreigners for sheep of the Shropshire breed was never greater than it had been during the past few months, so that no difficulty was likely to arise in disposing of their stock as long as they were able to offer the best. (Applause.) Mr. George Evans also suitably responded. An adjournment was then made to the sale ring, when Mr. Alfred Mansell, in opening the sale, alluded to the antiquity and the present outstanding merits of the Sherlowe sheep. The bidding started in that quick, brisk way that always characterises a good sale. No. 1, a magnificent shearling, after starting at 50gs., eventually became the property of Mr. J. E. Farmer (Ludlow) at 120gs. No. 2 filled a commission for Canada at 38gs. No. 3, a very typical sheep, with beautiful fleece and skin, was bought for Australia for 70gs. No. 4, one of the smartest, went to Mr. R. P. Cooper's flock at 53gs.; while No. 6, a long, good ram, with a capital head, was bought by Mr. S. Nevett for 40gs. For No. 7 there was a sharp competition; he was a sheep of great bone and substance, and was purchased by Sir Joseph Pulley's agents at 70gs. No. 9 was bought for the Hon. Victor Cavendish for the Holker flock; others also made excellent prices. The first six rams made the high average of 70gs. each, the forty-two sheep making an average of nearly 20gs. each. The ewes also sold well, the best going to Holker. A highly and very satisfactory sale was completed by 4 o'clock.

Shropshire Breeders' Sheep Sale.

Messrs. Alfred Mansell and Co. held their annual sale of pedigree Shropshire sheep in Shrewsbury Smithfield on the 25th ult., when about a thousand rams and ewes were catalogued. The attendance of buyers was large, and competition was brisk. The prices made included:—Six rams from Colonel Sandbach, Abergele, 6gs. to 10gs.; three from Mr. J. Corden, Great Chatwell, 6gs., 6gs., and 7gs.; fourteen from Mr. S. F. M. Nevett, 7½gs. to 18gs.; ten from Mr. H. Williams, Newton-on-the-Hill, 7gs. to 19gs.; ten from Mr. H. C. G. Parker, 5½gs. to 8½gs.; five from Mr. P. Everall, 5½gs. to 7½gs.; eight from Mr. R. C. Pryce, 6gs. to 7gs.; three from Mr. J. S. Harding, Bridgnorth, 6gs. to 8½gs.; six from Mr. M. Williams, Whiston Hall, 8gs. to 9gs.; twelve from Mr. J. H. James-Moore, 7½gs. to 13gs.; four from Mr. W. Nunnerley, Kenwick, 6gs. to 8gs.; nine from Mr. R. Raywood Harley, 6gs. to 9gs.; eight from Mr. T. Cartwright, The Buildings, 5½gs. to 7½gs.; two from Mr. W. Dickin, 5½gs. and 6gs.; four from Mr. T. G. Juckes, 5½gs. to 14gs. Ewes made up to 62s.

Sale of the Leconfield Lincolns.

Mr. Robert Fisher, the well-known breeder and sheep judge, had his annual sale of Lincoln long-woolled sheep on Wednesday, when a goodly number of farmers and sheep breeders assembled at Leconfield. Eighty very large framed, well fleeced shearlings were submitted for competition by Mr. Sugdon, and it was evident that high prices were to be the order of the day. After some spirited bidding the first sheep was knocked down to the bid of Mr. H. Dudding, of Riby Grove, Stallingborough, Lincolnshire, for 110gs. The remainder met with ready purchasers. The best prices were 71, 50, 20, 16, 28,

22, 23, 19, and 5 guineas by Mr. Church, who was buying for exportation to the Argentine. Mr. H. Dudding secured other rams at 67 and 20 guineas, Mr. Marris, of Kirmington, gave 38. 26. and 24 guineas, and Mr. G. M. Gale, of Atwick, 26 guineas. Messrs. Wright, of Nocton Heath, Mr. Miller, of Birkenhead, and Mr. Williamson, of Nottinghamshire, were amongst the buyers. The whole flock of eighty were sold, the total sum realised being £1,267 7s., or an average of £15 17s. each.

Southdown Rams at Glynde.

The tenth annual sale of Southdown rams and ram lambs was held at Glynde, Sussex, on the 24th ult. There were 213 rams and ram lambs on the catalogue, and the sale was conducted by Messrs. Herbert Morris and Son, of Lewes, and Messrs. Drawbridge and Ansell, of Haywards Heath. The sheep included in the sale were the property of the following flockmasters: The Earl of Ashburnham, Lord Northbourne, Sir James Duke, Bart., General Gadman, J.P., Messrs. D. Aylwin, R. Bannister, T. Bushby, W. P. Hampton, W. O. Hammond, A. Heasman, R. Lambe, H. Padwick (Thorney Island), A. Parks, A. D. Potter, H. M. Simmonds, F. Stanford, J. Tompkins, W. S. Wallis, R. A. Warren, and Mrs. Stephenson Clarke. The sheep were better than last year, taking them throughout in quality, class, and size. The highest price of the sale was that realised by a shearling ram belonging to Mr. Heasman, of Littlehampton, which fetched 20gs. A considerable number of sheep which were not disposed of at the auction changed hands during the afternoon. Mr. Ansell commenced selling at 11.30, the results being as follows:—

Property of Mr. H. Padwick, Manor House, West Thorney, Emsworth: Shearling ram, at 4 guineas, Sir Meyrick Burrell.

Property of Mr. Thomas Bushby, Wes: Preston Manor, near Worthing: Ram lambs, five at 3 guineas, Mr. Mercer, of Bourne Street.

Property of Mrs. Stephenson Clarke, Brook House, Haywards Heath: Shearling ram, at 6 guineas, Mr. Scrase.

Property of Mr. W. P. Hampton, Lingdon Abbey, Dover: Shearling rams, six at 4 guineas, Mr. Scrase.

Property of Mr. John Tompkins, Ancharring, Worthing: Ram lambs, one at 7 guineas, one at 3 guineas, Mr. Bannister; one at 10 guineas, and one at 9½ guineas, Mr. Pickard; ram lamb, at 5½ guineas, Mr. Bannister.

Property of Mr. F. Stanford, Middleton Manor, Bognor: Shearling ram, at 5½ guineas, Mr. Berry.

Property of Mr. A. Heasman, Court Wick, Littlehampton: Shearling rams, one at 10 guineas, one at 8½ guineas, one at 8 guineas, Mr. Sturgeon; one at 20 guineas, Mr. Porter; one at 15½ guineas, two at 8 guineas, Mr. Simmonds; one at 14½ guineas, Mr. W. Brown.

Property of Mr. W. T. Wallis, Southerham, Lewes: Full-mouthed rams, two at 4 guineas, one at 3½ guineas, Mr. R. Brown, jun.; one at 6 guineas, Mr. Porter.

Property of Mr. R. A. Warren, Preston Place, Worthing: Yearling rams, two at 4 guineas, Mr. Russell; one at 4 guineas, Mr. Hassell.

Property of Mr. H. M. Simmons, Eastbourne: Ram lambs, one at 5 guineas, Mr. Bannister; two at 5 guineas, Mr Scrase; three at 4 guineas, and one at 3 guineas, Mr. Aylwin; one at 4½ guineas, Sir Meyrick Burrell.

Property of Mr. W. O. Hammond, St. Albans Court, Kent: Shearling rams, one at 6½ guineas, two at 5 guineas, Messrs. J. and H. Robinson; one at 7½ guineas, Mrs. Plumptree; one at 7 guineas, Mr. Bray.

Property of Mr. A. Parks, Sidley, Bexhill: Two-tooth rams, one at 10½ guineas, Mr. Plumptree; one at 5½ guineas, the East Sussex County Council.

Property of Sir James Duke, Laughton, Shortgate: Shearling rams, one at 10 guineas, Mr. Luther Martin; one at 4 guineas, Mr. Holding.

Property of the Right Hon. Lord Northbourne: Shearling rams, one at 5 guineas, one at 5½ guineas, and one at 5 guineas, Mr. Haynes (Lavant); one at 7 guineas, one at 5 guineas, Mr. A. Wadman (Firle); one at 5½ guineas, Mr. Haynes; two at 4 guineas, Mr. Holding.

Property of Mr. Thomas Bushby: Ram lambs, one at 3 guineas, Sir Meyrick Burrell; one at 3 guineas, Mr. Scrase; one at 3 guineas, Mr. Thompson (Laughton).

Property of Mr. John Tompkins: Ram lambs, one at 3 guineas, Mr. Haynes; one at 4½ guineas, Mr. Bannister; two at 4 guineas, Mr. Lee; one at 7 guineas, and one at 6 guineas, Mr. Pickard.

Property of Mr. A. Heasman: A shearling ram at 10½ guineas, Mr. Sturgeon.

Property of Mr. H. M. Simmons, Eastbourne: Ram lambs, two at 3 guineas, Mr. Aylwin; one at 3 guineas, Mr. Bannister.

Property of Mr. W. O. Hammond: Ram lambs, two at 4 guineas, Sir Meyrick Burrell; one at 4 guineas, Mr. A. Wadman.

Property of Mr. H. M. Simmons, Eastbourne: Ram lambs, one at 3 guineas, Mr. Bannister; one at 3 guineas, Mr F. J. Gorringe (Laughton).

Sale at Hereford.

Messrs. Alfred and Dearman Edwards's first special sale this season of stock ewes and rams was held on Wednesday at Hereford. The attendance was large, and some good prices were realised. Four Shropshire rams, the property of Mr. A. P. Turner, The Leen, were disposed of as follows:—Mr. Paul Foley, two, 10gs. each; Mr. Bishop, Tarrington, one, 5½gs.; and Mr. Murch, Huntington, one, 7½gs.; shearling ram, the property of Mr. E. Farr, Court of Noke, 5gs., Z. Watkins, Brinsop; twenty Shropshire ewes, the property of Mr. W. Haves, Burghope, Mr. Webb, Gloucester, 47s. each; fifteen ditto, Mr. C. Green, Credenhill, 47s. each; forty stock ewes, the property of Mr. J. Nott, The Woodhouse, Mr. C. Hodgetts, Birmingham, 37s. each; twenty ditto, the property of Mr. C. Lewis, Breinton, Mr. C. Hodgetts, 40s.; twenty stock ewes, the property of Mr. T. Lewis, Stretton Grandison, 35s., Mr. C. Hodgetts; forty stock ewes, the property of Mr. A. Farr, Chipps House, Mr. Powell, 40s.; twenty yearling ewes, the property of Mr. Phillips, Wellington, 43s., and twenty ditto at 42s., Mr. Meredith; twenty-five stock ewes, the property of Mr. Inmus, Knookes Court, Mr. Moore, Field's Place, 45s.; Clun Forest ewes fifteen, the property of Mr. H. J. Bishop, Little Trington, 36s., and fifteen at 36s., Mr. C. Hodgetts; twenty ditto, the property of Mr. D. Cave, Hall End, Much Cowarne, 36s., Mr. P. Pitt; fourteen ditto, 35s., Mr. Webb, Gloucester; thirty two Cheviot ewes, the property of Captain E. L. A. Heygate, Lower Buckland Farm, Mr. A. Allington, 29s.; fifteen ditto, the property of Mr. A. Pearman, Mr. C. Green, 36s.

Ram Sale at Haverhill.

At Haverhill Mr. Charles Boardman, in conjunction with Mr. Ernest Prentice (secretary Suffolk Sheep Society), held his annual special sale of Suffolk sheep on the 24th ult. The highest price realised for a ram lamb was for one from Mr. Thos. Goodchild, which made £9 10s., being purchased by Mr. Geo. Unwin, of Baythorne Hall; ten others were purchased by Mr. R. Smith for £5 each, and one for the same amount by the Hon. Mrs. Ives. The highest price realised in a consignment of ram lambs from Mr. A. V. Rugg'es-Brise, of Spains Hall, was 67s. 6d. Good prices were realised for Suffolk ram lambs, sent by Mrs. Lowe, of Gosfield Hall, 130s., 125s., 90s., etc. The highest price in the consignments sent by Mr. D. M. Gurteen, of Hanchett Hall, was 67s., and that in the lot of Mr. J. T. Stockburn, of Clare, 82s. 6d. One exceptional ram lamb in a consignment from Messrs. W. B. and J. Gurteen, of Wilsey Farm, sold at £8 10s., while another realised £4 15s. The ewes from registered flocks averaged from 30s. to 23s.

Sale of Rams at Lockerbie.

Messrs. Smith and Dalgleish, auctioneers, held the opening ram sale for the season at Lockerbie on Thursday. For good rams there was a brisk competition, and satisfactory prices were obtained. The market was topped by a fine ram consigned by Mr. Moffat, Garwald, for which Mr. David Bell Irvine, Knockhill, paid £17. Other rams out of this famous stock were secured by Mr. Haddow, Castle Crawford, at £15; Mr. Hunter, Glenochar, at £12; Mr. Johnstone, Alton, at £11 10s.; and Mr. Smith, Twiglees, one at the same figure. The Garwald lambs also made the highest average of the day, £8 16s. 4d. A well-proportioned ram out of the Craigdarroch consignment made the second highest price of the day, £16, and was bought by Mr. Johnstone, Craigieburn. A fine ram out of the Attonburn consignment was secured by Mr. Hunter, Glenochar, at £11. The pick of the Craigieburn lot was purchased at £10 by Mr. Johnstone, Archbank. Border Leicester rams also sold well, the top price of £11 being got for one consigned by Mr. Smith, Lenston, East Lothian, the buyer being Mr. Drysdale, Granton, another out of the Skipmyre lot selling at the same price.

Sale of the Dunsmore Shropshires.

The annual sale of Shropshire rams and ewes, the property of Mr. P. A. Muntz, M.P., was held at Dunsmore, Rugby, on Friday, Messrs. Lythall and Walters being the auctioneers. The flock has been most successful in the showyards this year, and consequently the sale was very largely attended. A company of about 250 were present, including nearly all the leading breeders and several foreign buyers, and the biddings were very brisk, and a most satisfactory trade resulted. The Royal winning rams sold at 100gs. (Colonel W. Worswick), 65gs. and 36½s. (Colonel Sandbach), 46gs. (Captain Townshend), 26gs. (G. Brown), and 16gs. (Colonel Worswick). Other rams sold at 70gs. (M. Williams), 52gs. (P. L. Mills), 31gs. (J. Darling), 26gs. (F. J. Stanhope), 25gs. (Duke of Sutherland), 20gs. (T. Holdcroft), 15gs. (Duke of Grafton), 17gs. (J. W. Phillips), 15gs. (let to W. Thomas), 15gs. (Captain Townshend), 15gs. (J. Goodman), 12gs. (J. T. Glover), 12gs. (F. J. Sumner), 11½gs. (F. E. Muntz), 11gs. (J. W. Sanders), 11gs. (Mrs. Perry Herrick), 11gs. (Berridge), 10½gs. (T. Johnson), 10gs. (J. P. Arkwright), 10gs. (John Smith), 10gs. (J. R. Jones). Ewes sold at 120s. per head and 95s. (R. G. Huddlestone), 105s. (Dr. Wall), 77s. 6d. (J. Darling), 77s. 6d. (Captain Townshend), 72s. 6d. (Colonel Sandbach), 70s. (F. J. Stanhope), etc.

The forty-three rams averaged £20 14s. 6d., and the sixty ewes £3 16s. 6d.

Sale of Sir J. B. Lennard's Southdowns.

The sale of this old established flock of Southdown sheep was held at Woodingdean, on the Sussex coast, near Brighton, on Friday last. Several breeders from the eastern counties were present, as well as a large company of local breeders. There was a good demand for the ewes, although they were in rather poor condition, but they sold up to 105s. each. Pagham Harbour Co.). Among the other good purchasers were Lord Brassey, the Earl of Derby, Messrs. L. Currie, J. Drew, Sir R. Glyn, J. H. Mathews, and Garrett Taylor. The rams and ram lambs found a ready sale, Mr. J. Drew paying 1gs. and 12gs. respectively for two lambs, the Duke of Grafton securing the best yearling at 15½gs., and Earl of Derby's agent another at 10gs. The sale was considered one of the best of the season, the shearling ewes fetching £3 15s. 10d. each, the yearling rams an average of £7 16s. 8d., and the ram lambs £5 15s. The entire flock of 350 sheep realised £1,234 8s., or just over 70s. a head. A few Large White pigs were also sold at farmers' prices.

Ilsley Fair.

On Monday, Messrs. Franklin Gale and Newton held their annual sales of Hampshire Down and Cotswold rams and ram lambs from several well-known flocks, about 140 lambs being offered. There was a good demand, and nearly all the lambs were cleared at prices which showed a decided advance on the previous fair. The result of the sale of each selection is appended:

Hampshire Downs.

The first draft offered was twenty shearling rams and ram lambs from Mr. John Kelly's celebrated South Moreton flock, and every lot found a purchaser at prices averaging £4 9s. 6d., one lamb making 6gs., and several others 5½gs.

The next offered was twenty ram lambs from the Childwick flock, the property of Sir J. Blundell Maple, M.P. This is the first occasion on which lambs from this flock have been submitted to auction at Ilsley, and not a single lamb failed to change hands. The top average was made by them, viz., £4 19s., about half the number making from 5 to 6½gs.

Thirty-nine shearling rams and ram lambs from the flock of Mr. K. R. Mackenzie next came to the hammer, and the majority of the lots were readily disposed of, 6gs. being the highest price and the average £4 11s.

Mr. W. T. Twidell's selection of 30 ram lambs concluded the sale of Hampshire Downs, and here again a clearance was effected. Amongst this lot there were several very nice specimens which were keenly competed for, one lamb making 7gs., one other 6½gs., and two 6gs., while the average was £4 13s. 6d.

Cotswolds.

Thirty ram lambs from Mr. Henry Akers' celebrated Black Bourton flock were very well received, 7gs. being made for one lamb, and six others 6gs. and 5½gs., the average price being £4 16s. 6d.

Carlisle Sheep Fair.

Carlisle Fair was held on Saturday week, and was attended by graziers from all parts of the kingdom. The business was, as has been the case for many years, confined to the two auction marts, where about 26,000 sheep and lambs, consigned by the principal graziers in the South of Scotland and Cumberland, were offered for sale. The wretched weather affected the trade, and prices were from 1s. to 1s. 6d. down from those current at recent markets.

Dorchester September Sheep Fair.

At this special sheep fair, held on Saturday, about 4,000 sheep and lambs were penned, and, with plenty of necessitous buyers present from over a very wide area, a speedy clearance was effected at an improvement of 2s. to 3s. a head on working lambs, and quite 4s. a head on better class lambs. A general run for horn ewes was from 38s. to 42s., but these were very ordinary lots; horn wethers, 41s. to 43s. 6d.; horn lambs, 25s. to 32s. Down ewes made 35s. to 44s.; wethers, 39s. to 46s.; best lambs, 34s. to 37s. 6d.; working ditto, 34s. to 37s. 6d.; cross-bred lambs, 31s. to 36s. Both Mr Ensor and Messrs. Duke and Son held extensive auction sales, which were attended with highly gratifying results.

Glasgow and Leith Wool Sales.

There has been no change of importance during last month in the Scotch wool markets. There was a good attendance of buyers at the Leith sales on 7th and 8th, and half-bred and cross wools were in demand at an advance on previous rates, but Cheviots were not so much in request and were unchanged in price. Blackfaced was rather neglected. At the Glasgow sales on 22nd the number of buyers was not up to the average, and little was done publicly. Half-bred and cross again attracted most of the bidding, while Cheviots were not wanted to any extent. In Blackfaced the quantity sold by auction was small, but a fair amount has been taken up privately for the home trade, and there have also been some shipments to America. Prices realised:

	Washed		Unwashed	
	s. d.	s. d.	s. d.	s. d.
Half-bred hoggs	0 [illegible] to 0 9½		0 [illegible] to 0 [illegible]	
Ditto wedders	0 7 to 0 7½		0 [illegible] to 0 [illegible]	
Cheviot hoggs	0 8 to 0 9½		0 [illegible] to 0 [illegible]	
Ditto wedders	0 7 to 0 8		0 6½ to 0 7	
Cross-bred hoggs	0 6 to 0 6½		0 5½ to 0 5½	
Laid Cheviot	0 5 to 0 5½		0 3½ to 0 4	
Blackfaced white	0 5 to 0 5½		0 4½ to 0 5	
Ditto laid	[illegible]		[illegible]	

For Sutherland wool [illegible] were to be realised.

J. and W. Greig

SHOWS.

The Dublin Show.

Horses and Sheep at Balls Bridge.

The summer show of horses and sheep held annually by the Royal Dublin Society was held last week at their permanent showyard at Balls Bridge, Dublin. The show opened on Tuesday, when there was a good attendance. Although this year there is a falling off in the number of entries, the actual number of horses in the show is not less, dual entries representing the falling off of thirty-nine in the total of 1,397. Thoroughbred brood mares with foal at foot, for instance, number thirty-two against twenty-five last year, but in the harness and trotting classes there is a slight falling off, which, as a rule, counts double in the two styles of harness. On Wednesday, the show was visited by the Lord Lieutenant who has almost recovered from his recent illness, and the Countess Cadogan, accompanied by a large party from the Vice-regal Lodge. The visit was a semi-State one, and his Excellency was escorted by a squadron of the 21st Lancers.

Horses.

THOROUGHBRED HORSES.

In the class for Thoroughbred Stallions under ten years old to get weight-carrying hunters or high-class harness horses there were only four entries, and after a long consultation the judges gave the first place to Court Ball, the property of Mr. D. Owens, Strokestown, co. Roscommon, a splendid brown horse nine years old, bred by Mr. K. Forest Todd, Rabley Hall, Barnet, sire Royal Hampton, dam Polka. In Class 2, thoroughbred stallions to get racers, there were ten fine entries, but the event was not equal to last year. The judges had some difficulty in ultimately arriving at a decision, but they finally selected Astrologer and Royal Mask for equal first place. Astrologer, the property of Mr. William Pallin, of Athgarvan Stud, Curragh, was bred by Mr. Chaplin, of the Blankney Stud, and is a very handsome and stylish chestnut, fifteen years old, by Hermit—Stella. The bracketed winner, Royal Mask, owned by Mr. Edmond Mitchell, of Derryvullen, Enniskillen, is by Mask—Princess Victoria. Royal Mask is, generally speaking, a stronger and finer horse than Astrologer. The Croker Challenge Cup—the only cup awarded to-day—was again given to Royal Mask, who got in last year as the best weight-carrying thoroughbred stallion in the show. The brood mares are not quite so fine a class as in former years.

The yearling colts and fillies are, as is always the case, one of the finest features of the thoroughbred classes. Ambergate, a fine, neat, level yearling, by Bend Or—Queen Helen, and owned by Lord Fermoy, took first prize among seventy competitors, from whom he stood out conspicuously. In the yearling fillies nothing finer has been seen at Balls Bridge for some years than the first prize-winner, a bay filly by Buckingham—Capri, and bred and exhibited by the Greenfield Stud Company, Tipperary.

HUNTERS.

The class for weight-carrying hunters up to 15st. had sixty-two entries, but the merit was very small. Many of the horses should never have been shown at Balls Bridge, but the supposed clearing of high-class hunters from Ireland induced many with second-class animals to send them up. The first prize went to a chestnut gelding, the property of Mr. Charles H. Reade, Donishall, Carnew, County Wicklow, sired by Passion Flower. It is a fine, upstanding species, every inch a hunter. Sir Larry, also sired by Passion Flower, and owned by Mr. Rice, of Lucyville, Whitehouse, Belfast, got second place. In Class 10, for hunters up to 13st. and 14st., five years and upwards, which was one of the redeeming features of this section, the first prize went to Canon Arthur, a chestnut five-year-old, sired by Canon, and owned by Mr. A. T. McNeille, Dollanstown, County Westmeath, Messrs. Slocok, of Carlow, getting second award with Delight, a brown five-year-old, by Narcese. There were 161 entries, and the process of weeding out the best half-dozen was a very long and tedious one.

The class for hunter mares from 13st. to 15st., five years old or upwards, had sixty-five entries, and a very passable lot they were, though not including anything of superior merit. Mr. William Blacker, of Castlemartin, Newbridge, got first place with an unnamed brown five-year-old sired by Goldbill, and in every respect a perfect huntress. Kate, a chestnut roan, owned by Mr. J. J. Gilmour, Lishoy House, Omagh, got second place. The section for young horses suitable for hunters displayed much more merit than the made hunter classes. The four-year-old mares up to 13st. to 15st., with twenty-two entries, were a very atractive lot, but the four-year-old geldings, with a similar qualification, were not so good as last year. The class for four-year-old mares or geldings, the awards in which were not announced, was very strong, containing seventy-nine entries of more than average merit. The first prize went to a very useful looking chestnut gelding named Don Juan, sired by Conqueror, and owned by Mrs. H. H. Fetherstonhaugh, of Thurles. The second prize went to England, being awarded to Carlton Atsay, a gelding bred in Yorkshire, and sired by Downey Bird. Carleton is owned by Mr. Noel Partridge, of Castle Hill, Blackingley, Surrey, and well deserves the blue rosette. Mr. Nathaniel Morton's bay mare Emerald, by Mascarille, got third place, and also the gold medal for the best young mare.

The three-year-old geldings were a small but good class, and Mr. William Bootham, of Miley Hall, Blessington, got first place with Navan, a bay sired by King of the Nest, by Favo; and Old Gold, a chestnut sired by Sydenham, dam by Hercules, owned by Mr. A. T. Brown, of Marr Grange, Doncaster, was awarded second place. Old Gold richly deserved his place, and will yet be heard of in the prize ring. The two-year-old colts, entire, out of half-bred mares, looked well, and the first prize went to May Boy, owned by Mr. Patrick Turley, of Castlewellan, which also got the gold medal offered by the Hunters' Improvement Society, for the best two-year-old entire colt got by a thoroughbred sire on the Royal Dublin Society's register, and out of a mare registered in the Hunters Improvement Society's record of hunter mares and sires.

The class of geldings to carry up to 14 and 15 stones contained among its thirty-five entries some very good animals. Mr. H. B. Warren, Garrendenny Castle, Carlow, was first with a chestnut five-year-old of his own breeding. Mr. Thomas Donovan, Fernhurst, Cork, came second with Klondyke, a stylish brown six-year-old, bred by Sir Richard Musgrave, co. Waterford, and got by Mesmerist. Mr. Ernest Bellaney, Esker House, Lucan, furnished the third prize-winner in Tact, a five-year-old, bred in co. Tipperary. The class for four-year-old mares or geldings to carry up to 15 stones was headed by Glenart, a brown gelding, bred at Dromore, co. Down, belonging to Mr. David Johnston, Gracehill, Lurgan, and sired by Prime Minister. Mr. Patrick McCaffrey, Armagh, was second with Miss Orr, a chestnut mare, bred in co. Cork, and got by Mackintosh. A gelding by Southern and bred at Leitrim, and owned by Mr. H. Croskery, Ballywarren, Downpatrick, was third.

Among the four-year-old gelding hunters up to 14 to 15 stones, Mr. Nathaniel Morton, Brookville, Ballymena, was first and third with Wooloomolloo and Rathkeltar respectively. The first-named was the winner at Belfast, and has plenty of substance, though a bit coarse, and not moving as well as could be desired. Mr. Joseph Sheehy, Rathkeale, co. Limerick, was second with a useful horse, Roving Devil, a bay, after Fra Diavolo, by Robert the Devil. Mr. James Flood's Sacaru, from Athboy, was fourth.

ROADSTERS AND HARNESS HORSES.

The roadsters and harness horse classes are largely represented by English and Scotch exhibitors. In the class suitable for roadsters or harness Mr. H. H. Smiley, of the Inver Stud, Larne, with Fandarin, a bay gelding, defeated the two cracks, Ayrshire Adonis and Ayrshire Extravagance. Mr. Nathaniel Morton's Condy II., and Country Maid are also a perfect pair in almost every respect.

In the double harness class Mr. Godsell, Stroud, Gloucestershire, took first honours with a very dashing, grand-stepping pair of brown geldings named Lord Bath and Duke of York, which again won the first prize in the tandem class. He also got the second honours in the latter class with a dun and chestnut, not so well matched as the other, but the chestnut gelding, which led, was a grand stylish stamp, with great strength over the hocks and knees and the finest of bone and feet under. Messrs. E. and A. Baxter took first prize in the double harness pony class with a very handsome pair of bays named Musk and Miss Howard. These were again deservedly first in the pony tandem class.

Amongst the fast trotters in sulkies Lord William Beresford, Dorking, Surrey, competed against a fine group of American-bred horses with a very handsome symmetrical grey named Piloter. In the mile record he again appeared, but he was here unable to meet the rakish, out-stepping Americans.

JUMPING.

The jumping was carried out over the usual course, which includes six obstacles. The first event had forty-eight entries, and the ultimate selection of the winners occupied a considerable time. The jumping was much superior to last year, most of the horses being well up to their work in the showground. The first prize was awarded to Tim, a black gelding, the property of Captain A. W. Hayley, Ballina, Derry Moate, who performed without the slightest trace of a mistake. The other awards were:—2, Mr. N. Morton's The Sparrow; 3, Mr. Robert Nixon's Defiance; 4, Mr. St. J. H. Donovan's Ardfert. After the decision of this event there was a parade of handsomely turned out four-in-hand coaches, six in number. The second event was also over the course, for young horses suitable to make hunters, and resulted as follows:—1, Mr. N. Morton's Wooloomolloo; 2, Mr. John Copeland's Mafeking; 3, Mr. S. Baillie's Merry Monk; 4, Mr. S. Baillie's Oswald. A prize for cobs, in which two competed, concluded the jumping, and the huge crowd of fully 20,000 spectators dispersed.

Sheep.

Seldom has such a fine show of sheep been seen at Ball's Bridge. The number stand much in the same proportion as last year, but with the exception, perhaps, of the Shropshires, which used to make the finest display of this section. The Border Leicesters made up the feature of this section. It was not altogether the superlative merit so much as the want of weeds that was specially noted, but Mr. Doyne's challenge cup group presented as fine a lot of prize-winning animals as one might wish. His first prize winning two-shear and shearling rams were grand typical sheep, with great backs, fine, well-poised heads, and great shoulders and ribs; while as a test of the even merit of the breed it may be mentioned that, in Class 2, of twelve entries, every animal disappointed of a prize was awarded a consolation ticket by the judges.

The Roscommons, though not presenting the same level character, made up a fine section. They attracted the general admiration of a number of foreign visitors by their fine massive physique, and it is interesting to note that while Ireland contributes the smallest breed of British cattle, she owns the largest breed of sheep. Roscommons have been making great strides since uniformity and fixity of type was secured by the introduction of the Flock Book a few years ago, and they own the distinction of being now on richer lands, a prime mutton breed, as well as a good wool-carrier. In connection with the latter a novel and interesting feature was shown by Mr. Flanagan in exhibiting two hogget rams and a pair of hogget ewes clipped according to the regulations, but with a tuft of the lamb's wool left behind the shoulder to give an indication of their wool-bearing properties. This tuft measured in case of rams nineteen inches, and seventeen inches in the ewes, of very fine staple, and as the growth of wool since the sheep were shorn on the 2nd March measures just six inches, the growth for twelve months would amount to thirteen and 11¼ inches respectively.

There was a very pretty show of black faces, nearly all shown by Mr. Barton. The type was led by the older first winner, Young Rostrevor, a grand prize-winning ram, which was second in Belfast as a yearling, first in Dublin last year, and third in Belfast, and first in Belfast and again in Dublin. Among short wools Shropshires are, of course, by far the most important, but they did not make the same fine show as they have done in the past. There were a number of good specimens from Meyne House and Aghavee, but the dispersal of Mr. Naper's flock at Loughcrew has evidently detracted greatly from the tone of this breed. Southdowns were shown for the first time, and made but a poor show. Oxford Downs were greater in numbers, but not so even as might be desired, while the Hampshires, though a smaller section again, contained a couple of very finely-ribbed, well-placed specimens of the breed in Mr. Wm. Young's first winners.

Judges.

HORSES.—Referee: Rt. Hon. The Earl of Coventry. 1, Balfour Place, Park Lane, London, W. Heavy-weight Hunters: Captain D. Beatty, The Moat, Rugby; Mr. William Forbes, Callendar House, Falkirk, N.B. Medium and Heavy-weight Hunters: Mr. Maxwell Angas, Whissendine, Oakham; Hon. A. E. Parker, Bangor-on-Dee, Wrexham. Light and Medium-weight Hunters: Mr. Charles J. Cunningham, Wooden, Kelso, N.B.; Mr. T. R. Miller, The Manor House, Cricklade, Wilts. Roadsters, Saddle Horses, Cobs and Riding Ponies: Mr. Tresham Gilbey, The Grange, Bishops Stortford; Mr. W. G. Lambarde, 12, Sloane Court, London, S.W. Medium and Light-weight Hunters and Three-year-olds: Mr. R. A. Barkley, Palgrave Priory, Diss; Mr. E. P. Rawnsley, Girsby Manor, Lincoln. Thoroughbreds and Brood Mares: Mr. A. Alexander, Cockburn Hill, Balerno, Midlothian; Hon. Cecil Parker, Eccleston House, Chester. Hunter Brood Mares and Entire Colts: Mr. C. M. Prior, Adstock Manor, Winslow, Bucks; Mr. T. Warner Turner, Welbeck Abbey, Worksop, Notts. Harness Classes and Hackney Cars and Cabs: Mr. W. G. Lambarde, 12, Sloane Court, London, S.W.; Mr. John Thompson, Knockmaroon House, Castleknock, Co. Dublin. The Pembroke Cup, the Hunters' Champion Cup, the Produce Cup, and Group Prizes: Capt. D. Beatty, Mr. Maxwell Angas, Mr. Charles J. Cunningham, and Mr. R. A. Barkley. Jumping Competitions—Wednesday: Col. H. de Robeck, The Kennels, Naas; Mr. Percy La Touche, Newberry, Kilcullen. Thursday: Capt. R. H. Fowler, Rahinston, Enfield; Mr. Percy Maynard, Ratoath. Friday: Mr. James B. Charters, Annebrook, Mullingar; Major Trocke, Hillbrook, Parsonstown.

SHEEP.—Border Leicesters: Mr. John Twentyman, Hawkrigg House, Wigton, Cumberland. Roscommons: Mr. Samuel Johnston, Fohena, Ahasoragh. Lincolns: Mr. E. H. Cartwright, Keddington Grange, Louth. Black-faced and Cheviots: Mr. William Whyte, Hatton of Eassie, Glamis, N.B. Shropshires: Mr. Andrew E. Mansell, Harrington Hall, Shifnal. Oxford Downs: Mr. Frederic Street, Somersham, St. Ives, Hunts. Hampshire Downs, South Downs, and other Breeds: Mr. Henry Lambert, Babraham, nr. Cambridge.

CHALLENGE CUPS AND SPECIAL PRIZES.

The Croker challenge cup, value £50, and silver medal for the best weight-carrying thoroughbred stallion, awarded to Edward Mitchell, for Royal Mark.

The Pembroke cup, value £100, and silver medal, presented by the Earl of Pembroke for the best animal in Class 13 to 21 inclusive, bred in Ireland by exhibitor: G. J. Ball's chestnut gelding by Royal Meath.

Produce cup, value £10, for the best mare or gelding in Classes 8 to 21 inclusive, a prize winner, the produce of a prize thoroughbred stallion of this or previous shows of the Society since 1881: W. H. Rice's Sir Larry.

Gold medal, offered by the Hunters' Improvement Society for the best filly in Class 19: Patrick M'Caffrey's Cathleen (1036).

Gold medal, value 10 guineas, offered by the Hunters' Improvement Society, for the best two-year-old entire colt got by a thoroughbred sire: Patrick Turley's May Boy (1048).

The Breeders' group: Four prizes of £10 each, to be paid to the breeders of the animals in the winning group, and the Society's silver medal to the owner of the stallion, for the best group of four animals exhibited in any of the classes

from 8 to 21 of this year's prize list, the produce of the same registered stallion, won by a quartette of N. Morton's Master of Hounds: H. H. Smiley's Duke of York; N. Morton's Emerald, and H. H. Smiley's Spartan; sire Mascarille by Master Kildare.

Prize List.

HORSES.

STALLIONS.

Thoroughbred Stallions, under ten years old: 1, D. Owens, Strokestown (Court Ball)

Thoroughbred stallions, not eligible to compete in Class 1: William Pallin, Athgarvan Stud, Curragh, Co. Kildare (Astrologer), and Edward Mitchell, Derryvullen, Enniskillen (Royal Mask).

BROOD MARES

Thoroughbred mare, with foal at foot: 1, Laurence Hope, Clongriffin, Enfield, Co. Meath (Darkie); 2, Daniel Byrne, Prospect, Milltown (Balisarda); 3, Richard Shaw, Curragh View, Kildare, (Curragh Star); 4, R. G. Nash, Finnstown, Lucan (Sea Dream); r and hc, D. R. O'Callaghan, Brackenstown House, Swords, co. Dublin (Moira); c, S. Rait Kerr, Rathmoyle, Edenderry, King's County (Hippolyte); E. Kennedy, Barcarath, Straffan (Magnitude); R. C. Dawson, Cheghrata, co Dublin (Glenwood Rose); Miss Roche Kelly, Castlebagot, Hazlehatch (White Rose); Joseph R. O'Reilly, Sans Souci, Booterstown (Sapphe). Best thoroughbred colt foal at foot in this class: 1, D. R. O'Callaghan (Moira); r and hc, R. G. Nash (Sea Dream) Best thoroughbred filly foal at foot: Miss Roche Kelly (White Rose); r and hc, R. C. Dawson (Glenwood Rose).

Mares calculated to produce weight-carrying hunters, or high-class harness horses, with foal at foot: 1, Thos Clarke, Trimgate Street, Navan (Helen); 2, Richard George Carden, Fishmoyne, Templemore (Grey); 3, William Healy, Ballymee House, Doneraile, co Cork (Nosey); 4, James Stewart Kincaid, 4, Ailesbury Road, Dublin (Scene Shifter's Pride); 5, Richard George Carden, Fishmoyne, Templemore (Lady Clare); r and hc, J. O'Sullivan, Clonakilty, co. Cork (Zerlina); hc, J. L. Handcock, Wellingtonbridge, Wexford (Victoria). Best colt foal at foot in this class: Lieut.-Col T. Hussey de Burgh (Miss Mack). Best filly foal at foot: Thomas Clarke (Helen).

Mare, not exceeding six years old, to produce weight-carrying hunters, or high-class harness horses, with foal at foot: 1, William C. Merrey, Park View, Blessington (Delia); 2, Robert Panton, Crosscool Harbour, Blessington, co. Wicklow (Primrose Dame); 3, Mrs. Boyd-Rochfort, Middleton Park, Castletown, Westmeath (Rose); 4, Maurice M'Nally, Newtown, Rathcoole, co. Dublin (Lyrist); 5, R. G. Nash, Finstown, Lucan (Goodwood); r and hc, John T. Byrne, Cherrywood House, Loughlinstown (Minnichaha II.) Best colt foal at foot in this class: Robert Panton (Primrose Dame); r and hc, R. G. Nash (Goodwood). Best filly foal at foot: Maurice M'Nally (Lyrist); r and hc, Mrs. Boyd-Rochfort (Rose).

YEARLINGS.

Thoroughbred yearling colt: 1, Lord Fermoy; 2, Michael F. Miller, Ballylopen, Charleville; 3, Lord Fermoy, Rockbarton, Kilmallock; 4, R. G. Nash, Finnstown, Lucan (Little Boy); r and hc, Michael Smith, Curraghtown, Navan; hc, D. R. O'Callaghan and T. F. Sparrow, Williamstown, Kells, co Meath; c, Patrick Quinlan, Knockmoy, Bruff; Thomas M'Mahon, Bree House, Castleblayney; Colonel R. T. Bond Moorefield, Newbridge, co. Kildare (Follow Me); W. T. Trench, Redwood, Birr; John W. A. Harris, Victor Stud, Kilmallock, co. Limerick; J. C. O'Sullivan.

Thoroughbred yearling filly: 1, The Greenfields Stud Company, Tipperary (Manager, J. Peard, King Street, Cork); 2, Michael R. Cleary, Galtee House, Hospital, co. Limerick; 3, Thomas L. Plunkett, Portmarnock, Baldoyle (Sly-foot); 4, Harris Bros. (Rose Donald); r and hc, Lord Fermoy; hc, Thomas M'Mahon and R. H. Metge, Athlumney, Navan; c, Lord Fermoy; John W. A. Harris (Dress Rehearsal); D. R. O'Callaghan (Cheerful Duchess); Timothy Sheehan, Glountane, Mallow.

HUNTERS

Weight-carrying hunters, up to 15 stone, five years old or upwards: 1, Chas. H. T. Reade, Donishall, Carnew; 2, W. H. Rice, Lucyville, Whitehouse, Belfast (Sir Larry); 3, Nathaniel Morton, Brookville, Ballymena (Carelinty); 4, Thomas Donovan, Fernhurst, Cork (Perfection); r and hc, Samuel M'Morran, Lisbarnett, Comber, co. Down (Washington); hc, Daniel Byrne (Dispatch); c, S. Rait Kerr, Rathmoyle, Edenberry, King's County, and R. L. Blackham, Ballymount, Clondalkin (Sabin).

Hunter gelding, up to 14 stone to 15 stone, five years old or upwards: 1, H. B. Warren, Garrendenny Castle, Carlow (Guy Fawkes); 2, Thomas Donovan (Klondyke); 3, Ernest Bellaney, Esker House, Lucan (Tact); 4, Nathaniel Morton (Master of Hounds); r and hc, Wm. Gregg, Glenbrook, Castlereagh, co. Down (Groomsport); hc, Hon. A. Roche, Old Court, Doneraile (Skibbereen); c, W. F. M'Keever, Parsonstown Manor, Barterstown, co. Meath (Long Tom), and John H. Lambert, Redmount, Ballinasloe (Tipperary Chief).

Balfe, South Park, Castlerea (Golden Vale); 3, Studdert and Fletcher, Grennanstown, Athboy; 4, Studdert and Fletcher, c, R. G. Nash, Finnstown, Lucan (Royal Duke); hc, Messrs. Slocock, Carlow (Lord Bob); M. Quinn, 21, Montpelier Hill, Dublin (The Gem); c, John H. Lambert, Redmount, Ballinasloe (Odd Socks); Messrs. Slocock, Carlow (Favourite); A. J. M'Neile, Dollanstown, Kilcock (Colonel Frank).

Four-year-old mare, up to 13 stone to 13 stone: 1 and 2, John B. M'Roberts, Ballycran, Drumbeg, co Down (Dundee), 3, James Milling, The Square, Comber (Miss Hubby); r and hc, John Carpenter (Merry Girl); hc, John Kernohan, V.S., Ballymena (Mint Sauce).

Four-year-old mare or gelding, up to 12 stone to 13 stone: 1, Mrs. H. H. Fetherstonhaugh, Thurles (Don Juan); 2, Neil Partridge, Castle Hill, Bleechingley, Surrey (Carleton); 3, Nathaniel Morton, Brookville, Ballymena (Emerald); 4, Miss Norah Persse, Newcastle, co Dean (Cadet); r and hc, Richard J. Huston (Kathleen); hc, M. Quinn (Mollie Morgan); c, David M'Kelvey, Greenbrook, Ballinderry, co. Down (Ardmarcin)

Three-year-old gelding: 1, Walton Beddington, Moss Hall, Blessington (Navan); 2, Andrew J. Brown, Marigrange, Doncaster (Old Gold); 3, George J. Ball, Moorside, Nuul; r, hc, and c, Lowton and Sons, Curraghhill, co Cork (Paddock Bay and Bridgetcher); hc, James Lawson and Sons (Huntsman); c, William Boobbman, Miley Hall, Blessington (Ranji)

Three-year-old fillies: 1, Patrick M'Caffrey, Lower English Street, Armagh (Cathleen); 2, Andrew J. Brown (Wexford); 3, Daniel Kiernan, Balrath, Mullingar (Sweet and Gay); r and hc, Capt. H. E. de Comyn Wheeler, Willfield, Stradbrook, Dublin (Ladysmith); hc, Mrs. Boyd-Rochfort (Flying Dutchman); c, P. J. O'Connor, 49, Queen Street, Dublin (Melody), and R. H. Metge, Athlumney, Navan

Two-year-old colts, entire: 1, Patrick Turley, Decoment, Castlewellan (May Boy); 2, Richard George Camden, Fishmoyne, Templemore (The Dutchman)

One-year-old colt, entire: 1, R. G. Nash, Finnstown, Lucan (Bay Duke); 2, Miss Marion de S. Harman, Barrowmount House, Goresbridge, co. Kilkenny (Ballyhenry)

ROADSTERS, SADDLE HORSES, AND COBS.

Horses suitable for Roadsters or harness: 1, H. H. Smiley, Inver Stud, Larne (Mandarin); 2, 3, and hc, Andrew Watson, North Main Stepps, near Glasgow (Ayrshire Adonis, Ayrshire Extravagance, Lord Kilbride); r and hc, P. T. Cumisky, Tankerville, Balbriggan (Hard Held).

Riding horse, suitable for covert or park hack, 15 hands and over: 1, Robert M'Bride, North Street, Belfast (Gay Lad); 2, J. Bromley Jones, 9, Princess Street, Cork (Victoria); 3, Nathaniel Morton (Great Expectations); r and hc, S. Graham, Holywell, Antrim (Sunset); hc, George A. Moorhead, Tullamore (Willie).

Cobs, over 14 and under 15 hands: 1 and c, Alex. Gemmell, Chelston, Ayr (Lord Burnham and Ayrshire Golden Lily); 3, John Jones, Whitegate Stud, Wrexham, N. Wales (Whitegate Squire); r and hc, J. Brown, 48, Moore Street, Glasgow (Gentleman John); hc, Alex. Morton, Gowanbank, Darvel (Contention II.).

HARNESS HORSES

Double harness, not less than 15.3 hands: 1, E. Godsell, Stroud, Gloucester (Lord Bath and Duke of York; 2, Robt M'Bride (Redlight and Starlight); 3, Alexander Gemmell (Ayrshire Phenomenon and Ayrshire Performer); r and hc, Robert M'Bride (Sensation and Searchlight)

Double harness, over 15 and under 15.3 hands: 1, Nathaniel Morton (Candy II. and Country Maid); 2, A. Wilson (Ayrshire Adonis and Ayrshire Extravagance); 3, Robert M'Bride (King George and Greylight); r and hc, Alex Gemmell (King of the Forest and Ayrshire Squire)

Double harness, over 14.2 and not exceeding 15 hands: 1, Alex Gemmell (Ayrshire Golden Lily and Ayrshire Hope); 2, James Hamilton, Aldersyde, Uddingston, N.B. (Ace of Hearts and Queen of Hearts).

Class 28.—Tandems, over 14.2 hands: 1, Mr. Godsell (Lord Bath and Duke of York); 2, Mr. Godsell (Heathfield Squire and Norbury Squire); 3, Mr. M'Bride (Starlight and Sunshine).

Class 30.—Single harness, not less than 15.3 hands: 1, R. M'Bride (Brilliance); 2, R. M'Bride (Starlight); 3, A. Gemmedl (Ayrshire Phenomenon)

Class 31.—Single harness, over 15 and under 15.3 hands: 1, R. M'Bride (King George); 2, N. Morton (Country Maid); 3, R. M'Bride (Sunshine).

Class 32.—Single harness, over 15 hands: 1, E. Godsell (Lord Bate); 2, A. Wilson (Ayrshire Adonis); 3, Messrs. Baxter (Lady Nell)

Class 33.—Single harness: Over 14 and not exceeding 15 hands: 1, N. Morton (Sir Ronald); 2, W. Cropper; 3, J. Jones (Whitegate Squire).

Class 34.—Single harness, over 13 and not exceeding 15 hands: 1, N. Morton (Sir Ronald); 2, Messrs. Baxter (Miss Howard).

Class 35.—For the best harness horse, the property of a lady, and driven by a lady, in single harness: 1, Miss Mary Godsell (Heathfield Squire).

PONIES

Double harness, 14.2 hands and under: 1, E. and A. Baxter (Musk and Miss Howard); 2, Mrs. Gemmell (Uriah Heap and Talk of the Town); r and hc, J. Brown (Lady Bang and Lady Go-Bang).

Class 37.—For the best pair, 14.2 hands and under, driven tandem: 1, E. and A. Baxter, Hutton Hackney Stud, Brentwood, Essex (Musk and Miss Howard); 2, Mrs. Gemmell, Chelston, Ayr (Uriah Heep and Talk of the Town); 3, John Brown, 48, Moore Street, Glasgow (Lady Bang and Lady Go-Bang)

Class 38 Ponies over 13 and not exceeding 14 hands, single harness: 1, J. Jones (Whitegate Fairy); 2, Mrs. J. Jones (Lovely Lottie).

Class 39 – Single harness ponies, 13 hands or under: 1, J. Garratt (McGinty); 2, G. E. Franklin (Pom Pom).

RIDING PONIES

Ponies, over 13 and not exceeding 14.2 hands: 1, Miss M. Cochrane, Quilley, Coleraine; 2, Denis Brennan, Kilcullen, co. Kildare (Young Tom).

Ponies, 13 hands or under: 1, George E. Franklin, The Field, Derby (Pom-Pom); 2, Alexander Morton (Little Britannia); r and hc, Evans and Co., Abbey House, Waterford (Timepiece); hc, J. R. Adam, 60, St. Vincent Crescent, Glasgow (Zenith); c, James M'Cartney, Central Horse Bazaar, 42, May Street, Belfast (Charlie).

TROTTING HORSES

(To be driven in Sulkies, over a style, and price to be considered.)

Class 42 – Ponies, 14 hands or under: 1, Mrs. Gemmell, Chelston, Ayr (Uriah Heap); 2, John Jones, Whitegate Stud, Wrexham, N. Wales (Whitegate Fairy); r, William Townsley, 372, Newtownards Road, Belfast (First and Last); hc, Michael Horan, 27, Ellis's Quay, Dublin (Kathleen).

Class 43.—Over 14 hands: 1, Lord William Beresford, The Deepdene, Dorking, Surrey (Piloteer); 2, James Gilmore, 60, Melling Road, Aintree, Liverpool (Harry G.); 3, William Townsley, 372, Newtownards Road, Belfast (General White); r, Frederick C. C. Stewart, The Lodge, Dunmurry, co. Antrim (The Quaker).

Class 44.—Fast trotting horses, to be driven in Sulkies, one mile record: 1, James Gilmore, 60, Melling Road, Aintree, Liverpool (Harry G.); 2, William Townsley, Belfast (General White); 3, Michael Horan, 27, Ellis's Quay, Dublin (Flying Fox); r, B. C. Muntz, 68, William Street, Dublin (Empress))

SHEEP

[illegible]

Class 2.—Shearling rams: 1 and 2, C. M. Doyne; 3, William [illegible]

[illegible]

Class 5.—Pen of three ewes of the same flock, having reared lambs up to July 1st this year, bred by the exhibitor: 1, C. M. Doyne; 2, [illegible]

[illegible]

Class 7.—Two shearling ram lambs: 1, C. M. Doyne; 2, [illegible]

Class 8.—Shearling ram: 1, Patrick Keane, Templepatrick, [illegible]

Class 9.—Pen of three shearling ewes, the property of the exhibitor: 1, Matthew Flanagan; 2, John Keane; c, P. J. Fitzmaurice; r, Patrick Keane

Class 10.—Pen of three shearling ewes, the property of the exhibitor: 1, Richard George Carden; 2, Thomas L. Hodgins; r, Richard George Carden; hc, Thomas L. Hodgins and John R. Lloyd, Trevallyn, Newgale, co Pembroke

Class 11.—Pen of three ewes of the same flock, having reared lambs up to July 1st this year: 1, P. J. Fitzmaurice, Elphin; 2, Matthew Flanagan; r, Captain Longworth-Dames, Greenhill, Edenderry

Class 12.—Pen of three ewes of the same flock, having reared lambs up to July 1st this year, bred by the exhibitor: 1, P. J. Fitzmaurice; 2, Matthew Flanagan; r, John Keane; hc, P. J. Fitzmaurice

LINCOLN

Challenge cup, value £10, for the best [illegible] in the Lincoln Classes, bred and owned by exhibitor: Richard J. Carden, Fishmoyne

Silver cup, value £10, presented by the Lincoln Sheep Breeders' Association for the best [illegible] Shearling ram which has been [illegible] in the register of the Association: Richard G. Carden

Class 13.—Two shearling rams: 1 and 2, Richard George Carden; r, Thomas L. Hodgins; hc, Thomas L. Hodgins and John R. Lloyd, Trevallyn, Newgale, co Pembroke

Class 14.—Shearling ram: 1, 2, and 3, Richard George Carden; r, Richard George Carden; hc, Thomas L. Hodgins; c, Richard George Carden

Class 15.—Pen of three ewes [illegible] this year, bred by the exhibitor: 1, Richard George Carden; 2, Thomas L. Hodgins; r, Richard George Carden; hc, Richard Reynell

Class 16.—Pen of three shearling ewes [illegible] Richard George Carden; rec. for 2, Thomas L. Hodgins.

Class 17.—Pen of three ewes of the same flock, having reared lambs up to July 1st this year: 1, Richard George Carden; 2 and r, Thomas L. Hodgins; hc, Richard Reynell.

Class 18.—Pen of three ewe lambs of the same flock, dropped this year, bred by the exhibitor: 1, Richard George Carden; 2, Thomas L. Hodgins; r, Richard George Carden.

BLACK-FACED

Class 19.—Two-shear ram and upwards: 1, 2, and r, H. D. M. Barton, The Bush, Antrim.

Class 20.—Shearling ram: 1 and 2, H. D. M. Barton; 3, Robert Hassard, Desertcreat, Dungannon, co. Tyrone; r, H. D. M. Barton.

Class 21.—Pen of three shearling ewes [illegible] 1 and 2, H. D. M. Barton; r, Robert Hassard

SHROPSHIRE WOOLLED

Challenge cup, value £10, for the best three shearling rams in the Shropshire Classes, bred and owned by exhibitor: Robert F. H. White, Aghavoe, Abbeyleix; r, Richard Barter, St. Anne's Hill, Cork

Special prize of £5, or a gold medal, presented by the Shropshire Sheep Breeders' Association for the best Shropshire ram in the show: Robert F. H. White; r, R. Hamilton Stubber.

SHROPSHIRE

Class 22 – Two-shear ram and upwards: 1, R. Hamilton Stubber; 2, The Earl of Longford; r, John C. Gow, Ballystokes, Downpatrick, co. Down.

Class 23.—Shearling ram: 1 and 2, Robert F. H. White, Aghavoe, Abbeyleix; 3, Richard Barter; r, Richard Barter; hc, Robert F. H. White; c, Richard Barter.

Class 24.—Pen of three ram lambs of the same flock, dropped this year, bred by the exhibitor: 1, R. Hamilton Stubber; 2, James Lenox Naper; r, [illegible] Hamilton Stubber; hc, Miss Rose [illegible] c, Richard Barter.

Class 25.—Pen of three ewes [illegible] lambs up to July 1st this year: 1, The Earl of Longford; r, R. Hamilton Stubber.

Class 27.—Pen of three ewe lambs [illegible] this year, bred by the exhibitor: 1, Robert F. H. White; 2, James Lenox Naper; r, The Earl of Longford; c, Richard Barter

SOUTHDOWNS

Class 28.—Shearling ram: 1, 2, 3, r, and hc, Captain Longworth-Dames; [illegible]

Class 29.—Pen of three ewes [illegible] this year, bred by exhibitor: 1, Captain Longworth-Dames; 2, Richard Barter; r, R. Hamilton Stubber; hc, Miss Rose [illegible] Mahony; c, Richard Barter.

Class 30.—Pen of three ewes [illegible] and 2, Captain Longworth-Dames

Class 31.—Pen of three ewe lambs [illegible] this year, bred by exhibitor: 1, Captain Longworth-Dames; 2, Richard Barter; r, R. Hamilton Stubber; hc, Miss Rose [illegible] Mahony; c, C. Cuffe, Clonskeagh, co. Dublin; r and c, Captain Longworth-Dames

BERKSHIRES

Class 32.—Shearling boar: 1, Wm. Young; 2, [illegible] Trim, co. Meath; 3, Wm. Young; r, John C. Hanbury.

[illegible] bred by exhibitor: 1 and 2, Wm. Young.

Class 34.—Shearling [illegible]

Class 35.—Pen [illegible] bred by exhibitor: 1 and 2, H. D. M. Barton

Cheshire.

On Wednesday the annual show of the Cheshire Agricultural Society took place at Congleton. The weather was favourable, and accordingly there was a large attendance not only from different parts of the county, but also from North Staffordshire and from Lancashire. The entries totalled up to 1,208, the main sections contributing being dogs and horses with entries of 365 and 308 respectively. Seeds and vegetables were responsible for 158 entries, cattle 135, cheese and butter 77, honey 69, and implements forty. The total was just over 100 less than the number at Northwich last year, but double the number at Macclesfield in 1898.

There was a large number of entries in the Dairy section, and the competition was so keen that the day was well advanced before the awards were made and the cheese tent was thrown open to visitors. For some years it has been complained here and there that Cheshire cheese-making is falling off. Little support for this assumption could be derived from yesterday's display, for the entries were numerous and the quality was generally allowed to be quite up to the average.

Cattle made a capital show. The winner of the £10 prize was a beautiful red and white Shorthorn cow owned by Mr. H. Ker Colville, of Market Drayton, who also took the second card with a very promising beast. Other premier cards were taken by T. Rawes and Sons, Newcastle, Staffordshire; F. Miller, Birkenhead; Richard Hull, Nantwich; C. W. Kellock, Audlem; Richard Clarke, Warrington; Samuel W. Gould, Lymm; Lord Crewe, G. D. Lloyd, Rossett; A. John Solly, Congleton; and M. Pinkstone, Ringway. In the class for bulls above two years old the competition was extremely keen, the judges experiencing considerable difficulty.

Heavy horses have improved greatly in Cheshire of late years, a result which is largely attributed to the action of the Tarporley Hunt Club. The members have introduced into the county two Shire stallions, which are gratuitously placed at the service of farmers, and the results are being seen in improved agricultural horses. Amongst the lighter breeds some of the best of north-country horses were again exhibited. A fine lot of hunters is always forthcoming, and a pretty display was headed by Mr. Charles Griffiths' Lady Templar, a winner at the Royal Show at Maidstone, and since then successful elsewhere. In the class for Hackney mare or gelding Mr. A. L. Goodson took honours with Heathfield. For quality in the heavy horse section Mr. Kenworthy was once more well to the front. At this show it is not usual to look for any distinctive superiority amongst the sheep, but the long-woolled classes were fairly well represented.

Judges.

Cattle: Mr. G. Ashburner, Kirkby-in-Furness; and Mr. J. Westgarth, Penrith. Heavy Horses: Mr. H. R. Hart, Cannock, and Mr. J. Paisley, Huntingdon. Light Horses: Major Kearsley, Nantwich, and Mr. H. U. Wilson, Holmes Chapel. Sheep: Mr. S. F. M. Nevett, Shrewsbury, and Mr. J. V. Williamson, Corwen. Cheese and Butter: Mr. F. Bebbington, Manchester, and Mr. H. J. Fish, Whitchurch.

Prize List.

CHEESE.

Four white cheeses, made in the year 1900, not less than 50lbs. weight each: 1, John Williams, Hollin Green, Sound, Nantwich; 2, J. A. Jackson, Tattenhall; 3, William Moore, Blakenhall. Four coloured cheeses, made in the year 1900, not less than 50lbs. weight each: 1, Norman Dale, Tarporley; 2, I. A. Brown, Tarporley; 3, Benjamin Dutton, Nantwich. Four white cheeses, made in the year 1900, not less than 25lbs. nor more than 50lbs. weight each: 1, Joseph Williams, Audlem; 2, John Williams, Nantwich; 3, Samuel Evans, Chester. Four coloured cheeses, made in the year 1900, not less than 25lbs., nor more than 50lbs. weight each: 1, Richard Dutton, Ellesmere; 2, Richard Booth, Crewe; 3, Seymour A. Bonell, Audlem.

BUTTER.

Three pounds of butter: 1, Miss Edith Dale, Brereton; 2, Philip Reade, Swanley; 3, Mrs. G. Robinson, Nantwich.

CATTLE.

Bull, above two years old: 1, T. Rawes and Sons, Newcastle, Staffs; 2, F. Miller, Birkenhead; 3, I. A. Brown, Tarporley. Bull, above one and under two years old: 1, F. Miller; 2, I. A. Brown; 3, T. C. Heath, Newcastle, Staffs. Bull, under two years old, bred in the Society's district: 1, R. Hull, Nantwich; 2, G. Lewis, Weston; 3, The Earl of Crewe. Calf: 1, C. W. Kellock, Audlem; 2, The Earl of Crewe; 3, T. C. Heath. Shorthorn cow, in milk, of any age: 1 and 2, H. Ker Colville, Market Drayton. Pair of dairy cows: 1, R. Clarke, Warrington; 2, S. S. Raingill, Ringway; 3, I. A. Brown. Dairy cow, in milk: 1, S. W. Gould, Lymm; 2, S. S. Raingill; 3, T. C. Heath. Best dairy cow, in calf: 1 and 3, The Earl of Crewe; 2, T. C. Heath. Best heifer, under three years old, in milk or in calf: 1, G. D. Lloyd, Rossett; 2, H. Ker Colville. Heifer, under two years old: 1, H. Ker Colville; 2, S. W. Gould, Lymm; 3, I. A. Brown. Heifer calf: 1, S. W. Gould; 2, J. R. Newton, Warburton. Channel Island cow: 1, A. J. Solly, Congleton; 2, F. Stanway, Wildboarclough. Labourer's cow: 1, M. Pickstone, Ringway; 2, A. Cooper, Somerford; 3, T. Evans, Barthomley. Offered by the Congleton Local Committee to residents within nine miles from Congleton Town Hall: Bull, any age: 1, R. Goodwin, Biddulph; 2, N. Thompstone, Siddington. Pair of dairy cows, in milk, or in calf: 1, C. Bibbey, Astbury; 2, J. Hill, Congleton. Dairy cow, in milk or in calf: 1 and 3, C. Bibbey; 2, W. S. Billington, Sandbach. Heifer, three years old: 1, P. Hollinshead, Stoke-on-Trent; 2, C. Bibbey. Heifer, two years old: 1, W. S. Billington, Sandbach; 2, C. Bibbey; 3, A. J. Solly, Congleton. Best heifer calf, not over twelve months old: 1 and 2, W. S. Billington. Richard Clarke, Warrington, won the "Day" challenge cup.

HEAVY HORSES.

Shire stallion, foaled prior to the year 1897: 1, Thomas Lowndes, Tutbury. Shire stallion, foaled in 1897: 1, J. W. Kenworthy, Kelsall; 2, Thomas Jeffs, Helsby. Shire stallion, foaled in 1898: 1, J. W. Kenworthy; 2, F. W. Lowndes, Tutbury. Pair of agricultural horses, mares, or geldings: 1, J. W. Kenworthy. Mare or gelding, for agricultural purposes: 1, Earl Egerton of Tatton; 2, S. S. Raingill; 3, Arthur Nicholson, Leek. Brood mare and her foal, for agricultural purposes: 1, James Colclough, Alsager; 2, Eli Pennington, Senr., Adlington. Brood mare, foaled prior to the year 1897, the property of an exhibitor principally dependent on farming: 1, F. W. Lowndes; 2, Chas. Baker, Congleton; 3, Jas. Gould, Lymm. Foal for agricultural purposes: 1, Lewis Dodd, Bickerton; 2, James Colclough; 3, Chas. Baker. Gelding or filly, for agricultural purposes, foaled in 1897: 1, John W. Chadwick, Lawton; 2, S. S. Raingill; 3, Wm. Millington, Gawsworth. Gelding or filly for agricultural purposes, foaled in 1898: 1, Jas. Gould; 2, Robert Canning, Nantwich; 3, Robert Dodd, Eaton. Colt or filly for agricultural purposes, foaled in 1899: 1, N. Thompstone, Siddington; 2, Richard Clarke, Warburton Park; 3, F. W. Lowndes. Pair of cart horses for agricultural purposes: 1, Charles Baker; 2, Charles Corbishley. Draught horse, mare or gelding: 1, Charles Baker; 2, J. W. Chadwick. Brood mare, with foal at foot: 1 and 2, Charles Baker. Gelding or filly, two years old: Joseph Nixon, Congleton; 2, John Beckett, Rode Heath. Yearling gelding or filly: 1, N. Thompstone; 2, I. Ford, Barthomley.

LIGHT HORSES.

Hackney stallion (open): 1, J. Makeague, Newton-le-Willows; 2, J. W. Macfie, Chester. Brood mare, for breeding roadsters, in foal or with foal at foot: 1, Wm. Ferguson, Butley; 2, A. C. Sparkes, Altrincham; 3, John Beckett, Rode Heath. Foal, likely to make a roadster: 1, Wm. Ferguson. Colt or filly, foaled in 1899: 1, Wm. Ferguson.; 2, A. C. Sparkes. Hackney mare or gelding, foaled in 1898: 1, Lees Knowles, M.P., Pendlebury; 2, Jas. Laithwood, Congleton. Hackney mare or gelding, foaled in 1897: 1, Lees Knowles, M.P.; 2, Jas. Laithwood. Hackney mare or gelding, foaled prior to 1897: 1, A. L. Goodson, Knutsford; 2, G. Pimlott, Altrincham. Brood mare, for breeding hunters, in foal or with foal at foot: 1, Charles Griffiths, Northwich; 2, John Ravenscroft, Plumbley; 3, James Storrar, jun., Chester. Foal, likely to make a hunter: 1, Thomas Rutter, Bunbury; 2, R. Prescott, Northwich. Hunter, colt, or filly, foaled in 1898: 1, Massie Harper, Congleton; 2, A. Haslewood, Buxton. Hunter, mare or gelding, foaled in 1898: 1, Isaac Farish, Northwich; 2, T. Brassington, Nantwich. Hunter, mare, or gelding, foaled 1897: 1, John Prescott, Kinderton; 2, Evan Langley, Tarporley. Hunter, mare or gelding, foaled prior to 1897, to carry 14 stone and upwards: 1, Arthur Brocklehurst, Prestbury; 2, H. Reginald Cooke, Nantwich; 3, Alfred Ashton, Holmes Chapel. Hunter, mare or gelding, foaled prior to 1897, to carry under 14 stone: 1, Alfred Ashton; 2, Arthur Brocklehurst; 3, Joseph Lewis, Northwich. Cob, mare, or gelding, 13.2 and not exceeding 14.2: 1, Alfred S. Day, Crewe; 2, W. Galbraith, Market Drayton. English or Eastern mare, not exceeding 14.2: 1, G. Norris Midwood, Tabley; 2, J. J. Edge, Mobberley. Stallion polo pony, not exceeding 14.2: 1, G. Norris Midwood. Pony, mare or gelding, over 12.2, and not exceeding 13.2: 1, Alfred S. Day; 2, J. Makeague, Newton-le-Willows. Pony, mare or gelding, 12.2 and under: 1, John Beckett, Rode Heath; 2, W. H. C. Holt, Congleton. Offered by the Tarporley Hunt Club: Brood mare, likely to breed a hunter with foal at foot: 1, Charles Griffiths, Northwich; 2, John Ravenscroft, Plumbley. Foal, likely to make a hunter: 1, R. Prescott; 2, Joseph Millington, Middlewich; 3, Walter Harrison, Manley.

SHEEP.

Long-woolled ram, of any age: 1, John E. Ward, Middlewich; 2, O. Russell Ward, Great Warford. Shearling long-woolled ram: 1, John E. Ward; 2, Charles Hollinshead, Elton. Long-woolled tup lamb: 1, John Hill, Congleton; 2, John E. Ward. Three long-woolled ewes, of any age, having had lambs this year: 1, John E. Ward; 2, O. Russell Ward. Three long-woolled shearling ewes: 1, O. Russell Ward; 2, John E. Ward. Three long-woolled ewe lambs: 1, J. H. Richardson, Leighton; 2, John E. Ward. Short-woolled ram, of any age: 1, Arthur Nicholson, Leek; 2, John Barnett, Market Drayton. Shearling short-woolled ram: 1, J. W. Kenworthy, Kelsall; 2, J. E. Bourne, Market Drayton. Short-woolled tup lamb: 1, J. E. Bourne; 2, John Barnett. Three short-woolled ewes, of any age, having had lambs this year: 1, John Barnett; 2, Arthur Nicholson. Three short-woolled shearling ewes: 1, J. W. Kenworthy; 2, John Barnett. Three short-woolled ewe lambs: 1, J. W. Kenworthy; 2, John Barnett.

Lancaster Agricultural Show.

The thirty-seventh annual meeting of the Lancaster Agricultural Society was held on Wednesday at Lancaster. The weather was unsettled, but the show was one of the best which the society has held, all classes being well filled. There was an increase in the total number of entries as compared with last year—1,163 against 931. There were eighty-three cattle entries, as against 108; ninety-five sheep, as against 104; 138 heavy horses, as against seventy-four; eighty-two Hackneys, as against forty-seven; forty-six hunting and harness, as against forty-seven; 106 saddle and harness, as against eighty-five. There was a considerable increase in the entries of dogs and poultry. One of the principal animals in the cattle section was Mr. John Handley's Lord James Douglas, which has won honours at the leading shows of the country, and which now appeared in good form. Mr. Richard Hall, of Lancaster, was, as usual, prominent in the dairy section with animals of a fine dairy type, and the leading farmers of the district were well represented in the local classes. In sheep there was a fine display of Wensleydales and crossbreds, and such well-known exhibitors as Messrs. Gibson and Son, Kendal; Lord Henry Bentinck, and Mr. R. J. Huddleston, Kendal, appeared in the list of winners. In the heavy horse department there was a large number of animals from the Fylde district. Messrs. Whinnerah, of Carnforth, won with their yearling which received notice at the Royal Lancashire Show, and Mr. John Gornall, of Nateby, and Colonel Bird, Garstang, also exhibited fine horses of the Shire type. Mr. Gornall's two-year-old beat Mr. Victor Cavendish's entry, which had won at the North Lonsdale Show the day before. A feature of all the horse sections was the large number of special prizes which were offered, for which the competition was very keen. In the Hackney section most of the winners were animals which had been previously noticed in Lancashire showyards.

Judges.

Green Crops and Roots: Mr. W. Wilcock, Quernmore, and Mr. John Hutchen, Garstang. Cheese and Butter: Mr. E. G. Smith, Lancaster. Horned Cattle: Mr. A. Dobson, Sowerby, and Mr. J. Howard, Gargrave. Sheep: Mr. A. Ewan, Kirkby Lonsdale; Mr. W. Carr, Clitheroe; and Mr. H. Toppin, Penrith. Heavy Horses: Mr. L. R. Duckworth, Bury, and Mr. Joseph Hill, Congleton. Hackneys: Mr. A. C. Carr, Chester. Hunting and Harness Horses: Mr. Whitfield, Liverpool. Saddle and Harness Classes: Mr. R. Whitfield and Mr. A. C. Carr. Hunters: Mr. R. Whitfield. Leapers: Mr. R. Burrow, Mr. J. Turner, and Mr. M. Tyson.

Prize List.

HORSES.

AGRICULTURAL

Yearling gelding or colt: 1, E. and J. Whinnerah, Warton; 2, E. Thompson, Westby. Yearling filly: 1 and 2, Colonel C. H. Bird, J.P., Cockerham. Two-year-old gelding: 1, J. Gornall, Nateby; 2, D. Simmon, Cockerham. Two-year-old filly: 1, J. Gornall; 2, T. A. Eaves, Woodplumpton. Three-year-old gelding: 1, R. Parker, Milnthorpe; 2, J. Dobson, Burton. Three-year-old filly: 1, W. Cottom, Milnthorpe; 2, E. Willacy, Nateby. Colt foal: 1, H. Mackereth, Whittington; 2, D. Simpson. Filly foal: 1, V. C. W. Cavendish, Cark; 2, E. Thompson. Brood mare, which has produced a foal in 1900: 1, V. C. W. Cavendish; 2, T. Longton, Morecambe; 3, E. Arkwright, Cockerham. Mare, any age: 1, W. Cottam; 2, E. Willacy. Pair of draught horses in gears, three years and upwards (competitors to reside within twenty-five miles of Lancaster Town Hall): 1, Colonel C. H. Bird; 2, E. Willacy. Three-year-old gelding or filly: 1, W. M. Pye, Thurnham. Mare, three years and upwards, the property of a tenant farmer: 1, W. Cottam. Filly in the heavy horse classes, any age not exceeding three years: 1, V. C. W. Cavendish. Foal, yearling, two-year-old, or three-year-old shire filly: 1, V. C. W. Cavendish. Shire mare, filly, or filly foal: 1, V. C. W. Cavendish. Collection of horses, for agricultural purposes, the property of a tenant farmer, to consist of one brood mare and two young horses: 1, E. Thompson; 2, T. Longton. Collection of three young animals in the agricultural classes, three years or under: 1, T. Longton

HACKNEYS.

Yearling colt, gelding, or filly: 1, R. M. Birley, Houghton Hall; 2, L. Knowles, M.P., Pendlebury. Two-year-old gelding or filly: 1, L. Fish, Barton; 2, W. Lawson, Blackpool. Three-year-old gelding or filly: 1, W. Lawson; 2, J. Clarkson, Carnforth. Colt filly: 1, R. M. Birley; 2, R. Burrow, Whittington. Filly foal: 1, T. B. Sykes, Poulton-le-Fylde; 2, H. T. Parke, Withnell Fold. Mare, which has produced a foal in 1900: 1, J. W. Liver, Barnacre; 2, L. Fish. Pony mare, three years and upwards, not exceeding 14 hands: 1, R. Harrison, Chorley; 2, H. T. Parke. Foal or yearling (colt, gelding, or filly), or two-year-old (gelding or filly), within fifteen miles of Lancaster Town Hall: 1, E. D. M'Naughton, Milnthorpe; 2, Col. W. H. Foster, M.P., Hornby Castle; 3, R. Burrow. Foal, yearling, two-year-old, or three-year-old filly: 1, T. B. Sykes. Pony mare, filly, or filly foal: 1, L. Fish

HUNTING OR HARNESS.

Yearling colt, gelding or filly: 1, Colonel W. H. Foster, M.P.; 2, J. Kidd, Milnthorpe; 3, Exors. of Richard Dowthwaite, Priest Hutton. Two-year-old gelding or filly: 1, J. Kidd; 2, R. Ball, Bolton-le-Sands. Three-year-old gelding: 1, Exors. of T. Dixon, Priest Hutton; 2, J. Hartley and Co., Carnforth. Three-year-old filly: 1, R. Newsham, Hornby; 2, T. A. Cornthwaite, Burton. Colt foal: 1, E. Barton, Carnforth; 2, A. Orr, Hornby. Filly foal: 1, H. L. Storey, Lancaster. Brood mare, which has produced a foal in 1900: 1, E. Barton; 2, J. S. Rigg, Appleby; 3, H. L. Storey. Three-year-old gelding or filly: 1, W. Lawson. Foal, yearling, two-year-old, or three-year-old filly: 1, R. Ball. Collection of horses in the light horse sections to consist of one brood mare and two young horses: 1, R. Burrow; 2, A. Orr. Hackney mare or gelding, over 14½ hands: 1, T. Mitchell, Bradford; 2, Mrs. F. Holmes, Shipley; 3, J. R. Irving, Blackburn. Cob, mare, or gelding, not exceeding 14½ hands: 1, Mrs F. Holmes; 2, W. Lawson. Hackney or cob, mare or gelding, any height (confined to residents within ten miles of Lancaster Town Hall): 1, E. Cousins, Lancaster; 2, Misses Leeming, Lancaster. Single turnout, including horse over 14½ hands, harness, and two or four wheeled conveyance: 1, T. Mitchell; 2, Mrs. F. Holmes. Single turnout, including cob (14½ hands or under), harness, and two or four-wheeled conveyance: 1, Mrs. F. Holmes; 2, C. V. Howarth, Poulton-le-Fylde. Turnout, including horse or pony (any height), harness, and two or four-wheeled conveyance (confined to residents within ten miles of Lancaster Town Hall): 1, J. W. Liver; 2, E. Cousins. Milk kitter's turnout: 1, W. Nelson, Ashton; 2, J. W. Fox, Aldcliffe.

CATTLE.

Short-horned bull, two years and upwards: 1, J. Handley, Milnthorpe; 2, T. Thompson, Hest Bank. Yearling short-horned bull: 1, W. Atkinson; 2, J. Handley. Bull calf, not less than six months old: 1, W. Richardson, Kendal; 2, J. Handley. Shorthorn stock and dairy cow, in calf or milk: 1, R. Hall, Lancaster; 2, T. Thompson. Two-year-old Shorthorn heifer, in calf or milk: 1, W. Bateman, Halton; 2, Lady Henry Bentinck. Heifer calf, not less than six months old: 1, D. A. Warbrick, Garstang; 2, R. Metcalfe, Quernmore. Two dairy cows, in calf or milk: 1, R. Hall; 2, J. Makinson, Kirkby Lonsdale.

TENANT FARMERS' CLASSES.

Shorthorn bull, two years and upwards: 1, J. Towers, Nether Kellet; 2, W. Bateman. Yearling bull: 1, T. Bainbridge, Carnforth; 2, J. Bibby, Carnforth. Bull calf, not less than six months old: 1, T. Bainbridge; 2, W. Bateman. Two-year-old heifer, in calf or milk: 1, W. Bateman; 2, J. W. Fox. Yearling heifer: 1, R. Hall; 2, W. Bateman. Heifer calf, not less than six months: 1, R. Metcalfe; 2, R. Hall. Two dairy cows, in calf or milk: 1 and 2, R. Hall. Collection of three female animals, consisting of one cow, one two-year-old, and one yearling: 1, Lady Henry Bentinck; 2, R. Hall. Male or female in the cattle classes, any age, the property of a tenant farmer, resident within seven miles of Lancaster Town Hall: 1, R. Hall. Fat heifer: 1 and 2, Executors of J. Smith, Catterall Hall. Pair of bullocks, not having any broad teeth: 1, H. Dawson Greene, Whittington Hall; 2, J. Baxter, Overton. Collection of cattle, the property of a tenant farmer, to consist of one male and three female animals, any age: 1, R. Hall

SHEEP

DOWNS of any breed, and other Short-woolled.

Ram, one shear and upwards: 1, R. J. Huddleston, Natland Park; 2, J. Gibson and Son, Natland Hall. Ram lamb: 1, H. L. Storey, Lancaster; 2, R. J. Huddleston. Three one-shear gimmers: 1, J. Gibson and Son; 2, R. Huddleston. Three ewes: 1, J. Gibson and Son; 2, R. J. Huddleston. Three gimmer lambs: 1, W. Cottam, Oxcliffe Hill; 2, J. Gibson and Son.

WENSLEYDALE.

Ram, two-shears and upwards: 1, T. Woof, Sedbergh; 2, J. Gibson and Son. Shearling ram: 1, J. Gibson and Son; 2, T. Thompson. Ram lamb: 1, Lord Henry Bentinck; 2, J. Towers, Nether Kellet. Three one-shear gimmers: 1, Lord Henry Bentinck; 2, J. Gibson and Son. Three ewes: 1, J. Gibson and Son; 2, Lord Henry Bentinck. Three gimmer lambs: 1, Lord Henry Bentinck; 2, J. Ireland, Bulk. Three half-bred one-year gimmers: 1 and 2, J. Gibson and Son. Pen of three ram lambs, of any long-woolled breed: 1, T. Thompson; 2, Mrs. E. Milner, Slyne Hall. Pen of sheep, consisting of one male and three female (any breed): 1 and 2,

J. Gibson and Son; 3, R. J. Huddleston.

CHEESE AND BUTTER.

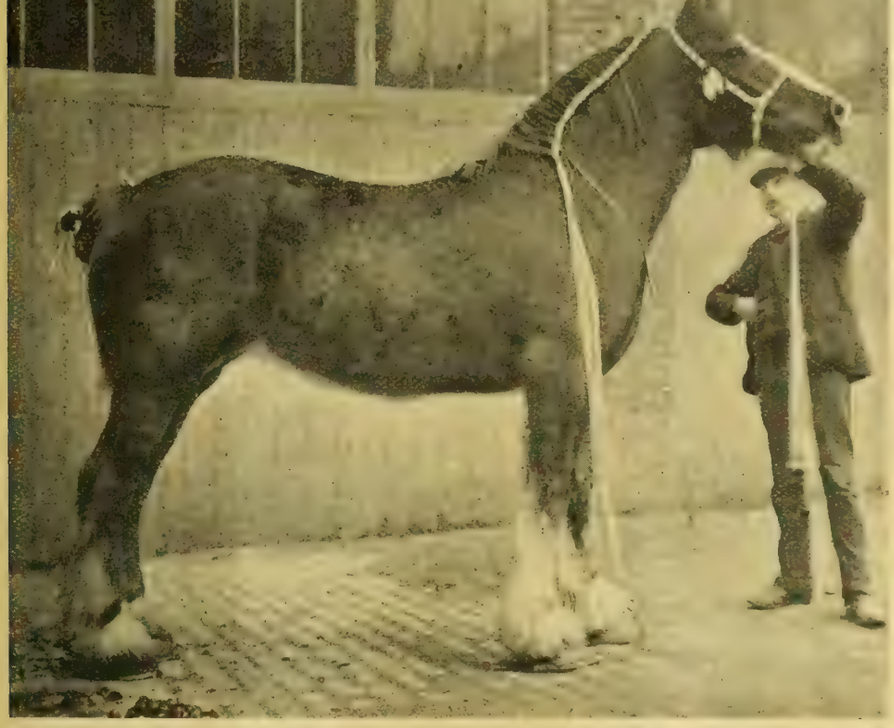
Dairy of cheese, not to weigh less than 112lb.: 1, J. Shepherd, Churchtown; 2, R. Hall, Forton. Butter, 3lb., made up in 1lb. or ½lb., without salt: 1, W. Clegg, Inglewhite; 2, W. G. M. Townley, Hardcragg; 3, W. Atkinson, Overthwaite. Fresh butter, 3lb. made in 1lb. or ½lb., with salt added: 1, W. G. M. Townley; 2, Sarah Orr, Hornby; 3, Elizabeth Nelson, Ashton.

GREEN CROPS, ETC.

Swedish turnips (limited to tenant farmers within ten miles of Lancaster Town Hall): 1, W. Wilson, Bare; 2, E. Cook and Sons, Red Bank; 3, A. Kilshaw, Hillam. Mangold wurtzel: 1, W. Wilson; 2, A. Kilshaw. Two statute acres of Swedish turnips: 1, W. Wilson; 2, A. Kilshaw. Six roots of long mangold wurtzel grown within twenty-five miles of Lancaster Town Hall: 1, J. Parker, Lancaster; 2, S. T. Parker, Parker; 2, J. Parker. Six roots of Swedish turnips: 1, W. Wilson; 2, J. Thornton, Heaton. Six roots of turnips (any variety, not swedes): 1 and 2, S. T. Parker. Three cabbages: 1, S. T. Parker. Potatoes of fluke shape: 1, J. Parker; 2, S. T. Parker. Round potatoes: 1, J. Parker; 2, S. T. Parker. Sheaf of wheat: 1, H. Mackereth, Ashton; 2, J. Gorst, Quernmore. Sheaf of oats: 1, R. Gerrard, Glasson; 2, W. Nelson, Ashton. Sheaf of barley: 1, J. Gorst; 2, W. Nelson. Sheaf of beans: 1, J. Gorst; 2, T. Taylor and Sons, Heaton. Three dishes of potatoes: 1, J. Parker; 2, S. T. Parker.

The Warwickshire at Coventry.

Favourable weather greatly assisted to make a success of the show of the Warwickshire Agricultural Society, which took place on Wednesday and Thursday last at Coventry. It was unfortunate that the entries showed some falling off as compared with last year, the totals being 622, against 724, but as compared with 1894 the decrease was still greater, the figure on that occasion being 886. The greatest falling off is in regard to horses, which may be due in some measure to the demands which the war has made upon breeders. The cattle entries, however, show a fairly substantial increase, the total being, in fact, a record one for the society. The detailed figures are as follows:—Horses 269, against 341 in 1899; cattle 180, against 156; sheep 39, against 57; pigs 17, against 24; goats 0, against 20; dairy produce 67, against 78; and implements 50, against 38. The usual encouragement is given to labourers, for whom field competitions, including ploughing, hedging, draining, and thatching are arranged. Premiums have also been awarded for long service, to shepherds for rearing lambs, and to cottagers for neatly-kept gardens.



Mr. P. A. Muntz, M.P.'s, Shire Filly "Dunsmore Combine," the Best Filly at the Shire Horse Show.

Horses.

AGRICULTURAL HORSES.

In the agricultural section the entries show a great reduction, for the total dropped from 166 last year to 108. The class for two-year-old Shire stallions, though meagre, is one of the most important. Mr. P. A. Muntz, M.P., one of Warwickshire's most successful breeders, capture first and second with Dunsmore Judge and Dunsmore John o' Gaunt. Lockinge Lord, Mr. J. Parnell's yearling colt, winner of premier honours in his class, has several awards to his credit. He is a thick, strong-bodied colt. There is not a great deal to choose between him and Mr. P. A. Muntz's bay, which is not, however, so forward. The class for yearling fillies produced some grand entries. The fight for supremacy lay between Halstead Violet, from the stables of Mr. J. Bradley, and Mr. J. Parnell's Rokeby Hora. There are only two exhibits in the class for yearling gelding, where Mr. J. P. Toone's chestnut leads. The same animal gets second in the local filly or gelding class, the first card going to a filly of really good quality with close and stylish action and excellent limbs. She belongs to Mr. W. Drackley.

A weighty two-year-old filly, Rokeby Hypatia, of Mr. Parnell's comes to the front in her class. She beat Mr. Muntz's Buscott Flora, which stood first at Burton and other shows. Mr. J. P. Toone is the only exhibitor of two-year-old geldings, and he gains a first for a compact short-legged horse, Victor. A useful filly is that of Mr. Scotforth. Six roots of globe or tankard mangold: 1, S. T. J. Oldacre's, which secures leading place in the local class for two year olds. She is closely followed by a well-made animal from the stable of Mr. W. Drackley. Mr. J. P. Toone's two-year-old gelding, Victor, remains a victor in the local class, and two of Mr. J. Parnell's fillies are first and second among the three-year-olds; his Cowdale Starlight, a fine big animal full of quality, except that it is rather out of hair, being first, and Tatton Juliet following closely. To Messrs. J. Gowling and Sons goes the first and only award for three-year-old gelding. In the closed class for three-year-old fillies Black Lady, a useful mare of excellent quality belonging to Mr. E. Bostock, is in the leading place, Mr. J. Spencer being second. First award among the three-year-old geldings (local) is assigned to Messrs. J. Gowling and Son, and to one

to Mr. J. Harrison. The winner in the next class for fillies of four years and upwards is one of the most notable horses in the show. Embargo, from the Dunsmore stud of Mr. P. A. Muntz, has already many honours to her name, and the judges gave her the Shire Horse Society's silver medal for best Shire horse, as well as first card in her class. Her merit is not so great as that of Lockinge Lord, but then the latter, being a previous winner, is not eligible. Mr. P. A. Muntz also wins the second card in the four-year-old filly class with his Dunsmore Grachly, a big, roomy mare with remarkably good limbs and feet, but rather out of condition. A brown belonging to Mr. W. Wynn is foremost in the corresponding class for geldings. The four-year-old fillies are a very good lot. They are headed by Mr. Tickle's Heiress and Mr. J. P. Toone's Primula, the former of which carries off the challenge bowl for the best cart horse shown by a Warwickshire farmer. A powerful draught horse is Mr. W. Wynn's which is placed in the front rank among the four-year-old geldings (local), and she has a strong competitor in Mr. E. B. Wynn's Jolly. There are some useful workable animals in the large class for pair of horses most suitable for agricultural work.

Another noteworthy animal finds a premier place among the Shire mares with foal, Lockinge Belle, from the stables of Mr. P. A. Muntz, who also gains second prize. The local class for brood mare with foal is well filled, and is headed with Mr. W. Tickle's Heiress, Primula (Mr. J. P. Toone's) being a good second. There was keen competition for the prize offered for foals, and that which secured first prize for Mr. P. A. Muntz; out of Dunsmore Golden, is a foal which has won all over the country. [illegible] tenant farmers' foals are led by Mr. J. P. Toone's Primeval.

HACKNEYS AND HUNTERS.

The Hackney classes are well filled with animals of good average quality. Mr. F. J. Batchelor's Famous ranks best in the class for best mare or gelding exceeding fifteen hands, and in that he must with foal at foot. Another first goes to him by Wild Agnes, the best in the class for mare or gelding over fourteen and not exceeding fifteen hands. Mr. E. Nichols, Mr. E. Peacock, and Mr. W. King are the other winners of premier cards.

Mr. E. Nichols also secures first in the hunting section for half-bred yearling colt with a promising colt sired by Hackwell. The same pen for fillies is headed by Mr. R. W. Smirthwaite's Mr. G. H. Hardy has an excellent filly, but has to be content with second place. A very pretty mare is the two-year-old half-bred of Mr. J. Hawkins, which captures first honours in its class, with Jeddah, belonging to Mr. E. Nicholls, ranks second. In addition to the best prize for two-year-old half bred filly, Mr. R. W. Smirthwaite's Fiery Star secures a silver medal of the Hunters' Improvement Society. She is a very stylish hunter with good points. Another Victor is forthcoming in the local class for two-year-old filly or gelding. This animal belongs to Mr. S. Tidy, and gains premier position, defeating Mr. P. S. Danby's Sunstroke. Among the mares adapted for breeding hunters, with foal at foot, Mr. H. R. Roe is first with Finale, a mare full of quality, with a well-grown foal. Florence, from the stables of Mr. F. T. Cooper, though also very meritorious, has to be satisfied with second place. A similar class is arranged for local breeders, and produces a lot of excellent mares, Mr. H. Ansell's Columbine, a speedy creature with very close and true action, claiming first prize and the Hunters Improvement Society, while Florence is again second.

There are eight animals shown in the three-year-old class. Mr. B. Wall's Masterman is a handsome upstanding gelding, full of quality, and well deserves first place. His most serious competitor is Sirdar, belonging to Mr. E. Hoyle, which is given second card. Only one prize is awarded in the local class for three-year-old filly or gelding likely to grow into a hunter, and this is won by Mr. H. E. Thornley. A very fine hunter is Mr. J. H. Stoke's mare which captures first award and medal in the "best hunter" class, where Mr. W. J. Cheney's Prattler is only able to reach second place. There is also a closed class for hunters, in which Mr. J. W. Lea took premier position with a well-proportioned and workable gelding, Limerick, Mr. J. Harrison's Naomi, a mare which has taken prizes before, being given a second. There is a very full show of light-weight hunters, and competition was very keen. Mr. J. H. Stokes is adjudged first, but there is not a great deal to choose between his bay gelding and that of Mr. Drage. A third bay gelding, curiously enough, captured the third award. In the next two classes for mid-weight and weight carriers Mr. J. H. Stokes is first again, his hunters showing plenty of breeding and quality. Mr. J. Drage takes a second and third. About a dozen good animals are entered in the local class for mare or gelding, where Mr. P. S. Danley scores a leading success, and Mr. E. Kemp is second.

Cattle.

SHORTHORNS.

The cattle classes, of which there were twenty-two, were well filled, totalling 180 entries. Shorthorns open the list, and are included in the first nine classes. The class for old bulls has filled well, both as regards numbers and quality. Mr. R. P. Cooper's Duke Carolus 14th, which heads them, is a prize-winner at Bingley Hall. Messrs. Bewley Brothers' Ewerby King, which is in the second place, is a very nice roan, two years and three months in age and little inferior to the winner. Mention may also be made of two other very good animals in the class, Chorlton Essence, belonging to Mr. C. F. Hobson, Eccleshall, and Edward 8th, the property of Mr. W. F. Inge, Tamworth. The local class for bulls up to two years of age brings out a set of very useful beasts. Mr. Bostock's Prince William, a roan of just under twenty months, is massive, but the point which gave him the first position was his even flesh. Mr. W. R. Dewhurst's Stanley, a roan of nineteen months, on the other hand, is inclined to be fat and to grow coarse. Another very nice bull is Ewerby Sirdar, belonging to Messrs. Gowling and Son. There is a very good entry in the open class for young bulls, and in this Prince William is defeated by a Scotch-bred red bull, Rotherfield Augustus, belonging to Colonel Makins. Mr. Dewhurst's Stanley is in this instance relegated to the position of reserve, while Saturn, a red bull belonging to Mr. R. P. Cooper, which has been successful in other show rings, is passed over. There is a moderate amount of competition for the Shorthorn Society's prize offered for the best bull in Warwickshire calved in 1899. Mr. Dewhurst's Stanley is more fortunate in this class, as he is given the award. The reserve is a very stylish red, Jasper Prince, belonging to Mr. J. H. Wheatley, of Berkswell Hall, Kenilworth. The class for cows of any age in-calf or in the encouragement of pure bred milking Shorthorns is numerically strong. It brings out two very well known animals in Mr. C. W

Brierley's Autumn Queen and Col. Makins's Welsh Gem. The former wins. In the next class for cows above three years which have calved within nine months, Autumn Queen is again first, but Welsh Gem has to take third place to a younger white cow, called Ingrams Queen, also the property of Mr. C. W. Brierley. The open class for heifers under three years old is not very great, though a worthy prize-winner is found in Mr. Brierley's Lavender Queen. In Fair Lass Mr. James Booth also shows a nice heifer. The tenant farmers do not do better in the similar class which is confined to them. The pairs of heifers under two years of age provide a very good exhibition, though it can hardly be said that the pairs are in all cases particularly well matched. This was the case with Mr. Brierley's pair, Queenly Duchess and Royal Jewel. Queenly Duchess is a splendid roan heifer, just over twenty-one months of age, and there is not another heifer in the class to equal her. Her companion, however, "pulls her off" considerably, though it has to be admitted that she is superior to Mr. Cooper's second. Mr. Cooper's couple are a fourteen months' roan, and Longley Gazelle, a red of fifteen months, and though better matched neither possess the quality of Queenly Duchess.

LONGHORNS.

The Warwickshire is one of the few shows where even the smallest measure of encouragement is given to Longhorns, and there were three classes moderately well filled. Mr. Jasper Selwyn's Wootton Wonder, a dark brindle, three years and a half in age, was placed first. Romeo II., belonging to Mr. W. Hanson Sale, is younger, but at the same time a nice specimen of the breed. Mr. Selwyn is also the owner of the bull placed third. Mr. Sale was much more successful in the class for cows, as he obtained both the first and second awards. Daisy's Fairest and Best beat her companion, Barton Sunshine, though the latter was first at the Royal Show this year. The other cow was, however, out of condition at that time, and was not taken to York. In fact, this was her first appearance in the showyard this year, and the placing confirmed that of last year's Warwickshire show at Leamington. A nice brindle-and-roan belonging to Mr. Joseph Green, Whitley Fancy, well filled the third place. Mr. Selwyn and Mr. Sale had matters all their own way in the heifer class, the former showing a very stylish brindle called Black-eyed Susan, which defeated Mr. Sale's red-and-white Rose of Sharon.

OTHER BREEDS.

The two classes for Kerries and Dexters were monopolised solely by Dexters, not a Kerry being shown. There were six bulls shown, and with a nice two-year-old red called Tod Sloan, Lieutenant-General the Hon. Somerset Gough Calthorpe headed the list, with Mr. Stallard's Malvern Signor a good second. There were four more cows and heifers. La Mancha My Fancy, which most pleased the judges, is the property of Mr. B. de Bertodano. The competition she met with from Mr. Stallard's Malvern Smart was fairly close. The animal was shown with success at Gloucester and the Royal.

In the class for bulls of any other acknowledged pure breed there were only three beasts shown, and the Earl of Coventry secured his only cattle successes with a couple of Herefords, Mercury and Barber, which were first and second respectively.

Jerseys took both prizes in the corresponding class for cows or heifers, the winner being Major Beech's Musk, and the second Mr. C. A. Smith-Ryland's Daisy.

The five dairy classes were well filled. The catalogue revealed no difference in the qualification for the first two classes in this section, but the result was very different. The first brought out a number of good animals, but few of them appeared well adapted to the special purpose for which the classes were provided. Mr. F. J. Stanhope's Ada was an easy winner. The second class, on the other hand, was a very fine one. Mr. Danby's Lady Northmoor is a valuable cow in every way for dairy purposes. Mr. T. O. Lloyd's roan scarcely showed so good an udder and it was in the same direction that Mr. Danby's Lady Langford fell off to third position.

Sheep.

This section was one of the weakest, there being only thirty-nine animals shown as against sixty-seven in 1899, and ninety-five in 1895. Quite a notable ram was the Oxford Down of Mr. George Roberts, which was awarded the special prize for best short-woolled shearling ram in the yard. Running it very closely for championship honours was the Hampshire ram from the flock of Mr. Denston Gibson, of Leamington. There was very little competition in most of the classes. The three Shropshire shearling rams were each of good enough type to be given a prize, though Mr. Gibson's exhibit, which so narrowly missed championship honours, was easily the first. Mr. A. S. Berry took both second and third cards. There were some very fair pens of ten ewe lambs, Mr. B. Wall, of Coleshill, being first with a half-score of neat, matchy animals. The two pens of ten ewes were of excellent type, Mr. Charles Pratt's first prize ewes being well-fleshed, finely coated creatures. Second award went to Mr. H. E. Thornley. Mr. Pratt again scored in the class for five ewes, taking both first and second prizes with the ten which were successful in the larger class, and which were remarkable for size, firmness, and coating. The best two Shropshire ram lambs belonged to Mr. B. Wall, who had as his chief competitor Mr. D. Gibson.

The class for shearling rams of any acknowledged pure breed other than Shropshires contained the championship animal, Mr. George Roberts's handsome Oxford Down. The same competitor captured the second prize with another Oxford of great substance, with a fine square back and good wool. Mr. Roberts was the only competitor in the class for five shearling ewes. The ten ewe lambs belonging to Mr. B. Hanbury soon caught the eye of the judges. Mr. J. Phipps Smith was the second winner. There were also some useful lambs in the class for ten cross-bred ewes.

Pigs.

Swine fever regulations have resulted in decreasing exhibits in the pig section during the past few years, but the few pigs which were shown were, however, above the average in point of quality. A fine specimen of the Tamworth breed was the Knowle Hiawatha of Mr. D. W. Philip. The boar has all the characteristics of the breed, and was, in fact, one of the finest seen at the Warwickshire show. Other good animals were shown in the various classes by Mr. J. Hicken, who captured three firsts.

Judges.

Agricultural horses: Messrs. J. P. Hiorns, Maidstone, and H. Smith, Nottingham. Hunting horses, Hackneys, ponies, etc.: Messrs. W. H. Robson, Wiltshire, and John Hill, Shropshire. Jumping and driving: Captain Beatty, Rugby. Cattle (Shorthorns): Messrs. T. Parton, Crewe, and J. P. Terry, Aylesbury. Longhorns: Mr. W. Shaw, sen., Lichfield. Kerry and Dexters: Mr. H. D. Betteridge, Cambridge. Coventry master butcher classes: Messrs. T. Beasley, sen., Rugby, and Joseph Roberts, Kenilworth. Sheep: Messrs. T. S. Minton, Shrewsbury, and J. Bryan, Witney. Pigs: Mr. J. Barron, Derby.

North-East Somerset.

The North-East Somerset Farmers' Club held their annual show on Wednesday at Farrington Gurney. The show was favoured with fair weather, which assisted in making the meeting a success. Agricultural horses occupy the leading place in the catalogue. Mares and foals turned out capitally. Mr. G. F. King took the leading premium, the gift of Sir J. H. Greville Smyth, Bart., with his handsome black, Chewton Smart, by her side being a promising bay filly foal by Buscot Harold. Sir W. H. Wills, Bart., M.P., was second with Jolly, her filly foal being by Calwich Prince. The restricted class for foals was headed by Mr. Hassell, of Chew Stoke, with one by Pride of the Mill. Mr. E. Thompson, of Pensford, was second with a roan colt by Delight, and Mr. J. Loxton, Queen Charlton, third. The yearlings were more noticeable for quality than numbers, and the result was similar to that in the mares, Mr. G. F. King being first, Sir W. H. Wills, Bart., M.P., second, and Messrs. Haydon and Paget reserve. Positions were reversed in the two-year-olds, when Sir W. H. Wills was first with Rickford Lady Harold, and Mr. G. F. King second with Chewton Earl. Nags made a good show. Both prizes and the reserve number in the brood mare class were captured by Mr. Brightric Gee, respectively with Kitty, Malago Maid, and Zoe. Mr. H. J. Candy, Ston Easton, and Mr. J. Clare, Hallatrow, wer first and second in the locals. The foals of the present year were a promising lot, Mr. Clare, Hallatrow, and Mr. E. Dewdney, Chewton Mendip, taking the prizes.

The hunters generally were well up to the requirements of neighbouring packs. Weight-carriers (13st.) brought out three competitors. The judges' award went in favour of Messrs. Flower and Mattick's four-year-old Norman. The hack class for entries not exceeding 15.2 was a praiseworthy one all round. Mr. Frank Leigh's bay, Banjo, by Fitzroy, was well to the fore. There were some superior ponies shown, the best in the judges' opinion being Mr. S. Wait-Tomkins' brown gelding, Mr. A. E. Gould's admired bay, Little Wonder, being placed second.

Both of the senior bull classes fell to the entries of Mr. G. F. King. In a strong class of bull calves Mr. King took first and second prizes, with two of Viceroy's offspring, Sir W. H. Wills, Bart., being third. The Channel Islands competition, thanks to the support of Sir Greville Smyth, Bart., Colonel Barton Scobell, Sir W. H. Wills, Bart., M.P., and Mrs. Hippisley, made a pretty display. The sheep classes did not fill very well.

Judges.

Agricultural Horses: Mr. T. Chapman, Orchard Portman, and Mr. J. Caple, Bitton. Nag Horses and Jumping: Mr. J. E. Gough, Bodenham, Leominster, and Mr. B. Heap, Weston-super-Mare. Cattle: Mr. J. Watts, Fairgreen, Chipping Norton, and Mr. G. Taylor, Cranford. Channel Island: Mr. W. E. Budgett, Henbury. Sheep and Pigs: Mr. Jeffry Matthews, Winterbourne, and Mr. J. Gage, Walton, Clevedon.

Prize List.

HORSES.

Cart mare and her foal: 1, G. F. King, Keynsham (Chewton Smart); 2, Sir W. H. Wills, Bart. (Jolly); r, S. J. Knight (Dundry Blossom).

Foal, draught or agricultural: 1, Messrs. Haydon and Paget, Midsomer Norton (Hero of Mendip); 2, A. W. Hull, Ston Easton; r, S. J. Knight (Dundry Swell).

Foal of the present year, by Delight, Orchard Portman, Pride of the Mill, or English Pride: 1, W. Hasell, Chew Stoke; 2, E. Thompson, Pensford; 3, J. Loxton, Queen Charlton; r, G. P. Caple, Stanton Prior.

Horse or filly, foaled in 1899, draught or agricultural: 1, Sir W. H. Wills, Bart., M.P. (Rickford Jewel); 2, G. F. King (Chewton Markeaton Harold); r, Messrs. Haydon and Paget, Midsomer Norton (Mendip Conqueror).

Gelding or filly, foaled in 1898, draught or agricultural: 1, Sir W. H. Wills, Bart. (Rickford Lady Harold); 2, G. F. King (Chewton Earl); r, S. J. Knight.

Pair of horses, draught or agricultural: 1, E. Thompson, Pensford (Blossom and Captain).

NAG HORSES.

Mare with foal: 1, 2, and r, Brightric Gee, Bristol (Kitty, Malago Maid, and Zoe); c, E. Dewdney, Chewton Mendip (Sunbeam).

Mare in foal, or with foal at foot: 1, H. J. Candy, Ston Easton (Polly); 2, J. Clare, Hallatrow (Kathleen).

Foal, field or road: 1, J. Clare, Hallatrow (Birdie Bright); 2, E. Dewdney, Chewton Mendip (Guardsman); hc, H. J. Candy, Ston Easton; J. Clare, Hallatrow (Countess).

Horse or filly, field or road: 1, E. Dewdney, Chewton Mendip (Scotch Lassie); 2, J. Clare, Hallatrow (Emerald).

Gelding or filly, foaled in 1898, field or road: 1, Brightric Gee (Yorick); 2, E. Dewdney (Watchman); hc, J. Clare (Ruby).

Hunter, gelding, or mare, equal to thirteen stone, over a hurdle: 1, Messrs. Flower and Mattick, Ston Easton (Freeman); 2, J. F. Fowler, Norton Malreward (The Druid); 3, J. Clare, Hallatrow (Royal); hc, T. Blanning, Halatrow.

Hunter, gelding, or mare, equal to thirteen stone, over a hurdle: 1, Messrs. Flower and Mattick (Norman); 2, J. Baldwin, Bath (Cahirmee); hc, Brightric Gee (Dauntless).

Harnessed roadster, not under 14 hands: 1, H. Poole, Marksbury; 2, J. and G. Watts, Corston; 3, W. Holbrook, Marksbury; hc, R. H. Killen, Farrington Gurney.

Hack, not exceeding 15.2 hands: 1, F. Leigh, Westbury-on-Trym (Banjo); 2, Dr. Fuller, Long Ashton; 3, Mrs. Ella Pillers, Keynsham (Game Chicken); hc, W. Bendall, Priston.

Harnessed roadster, not under 13 hands: 1, Oliver Reakes, Emborough; 2, Dr. H. W. Aubrey, Bristol.

Pony, not exceeding 13 hands: 1, S. Wait Tomkins, Henbury (Great Heart); 2, A. E. Gould, Redland (Little Wonder); r, H. Poole, Marksbury (Dapper); c, R. Bailey, Bristol (Game Bantam).

Gelding or mare in harness, to assist in general farm work: 1, R. H. Killen; 2, R. Petheram, Whitchurch (Kitty); r, W. Holbrook, Marksbury; hc, W. W. Keel, Stanton Drew.

JUMPING.

Jumper (members only): 1, Brightric Gee (Dauntless); 2, W. W. Mattick, Radstock (Legs and Wings); r, W. W. Keel, Stanton Drew (Topthorn).

Open: 1, J. Baldwin, Bath (Diana); 2, C. A. Daniel (Newcastle); 3, Brightric Gee (Dauntless).

Jumper not having previously won a prize (open): 1, Glenross Bros., Frome (Pale Face); 2, C. A. Daniel, Atworth (Sportsman); 3, W. T. Weaver, Dunkerton.

CATTLE.

Bull, above two years: 1, G. F. King (Chewton Oxford Cornelius).

Bull, above one and under two years: 1, G. F. King (Bapton Victor's Champion).

Bull calf, under a year: 1, G. F. King (Chewton Count Victor); 2, G. F. King (Chewton Belvedere Victor 2nd); 3, Sir W. H. Wills, Bart., M.P., Blagdon (Lord Roberts); r, R. H. Killen, Farrington Gurney; c, R. Batt, Clapton, Bath; c, E. C. Flower, Ston Easton.

Dairy cow: 1, E. Dewdney; 2, G. F. King.

Heifer, above two and under three years old: 1, G. F. King (Scotch Favourite 6th); 2, Sir W. H. Wills, Bart., M.P., Blagdon (Charity 4th).

Pair of heifers, above one and under two years: 1, Sir W. H. Wills, Bart., M.P. (Charity 5th); 2, G. F. King (Silverlocks 2nd).

Pair of heifer calves: 1, G. F. King.

Dairy cow: 1, E. Dewdney; 2, J. Weaver, Winford; 3 and c, A. C. James, Ston Easton; r, O. Reakes, Emborough; hc, W. C. Lyde, Stowey; c, W. Blinman, Farrington Gurney; c, R. H. Killen.

Heifer, above two and under three years old, suitable for dairy purposes, bred by the exhibitor: 1, J. H. Flower; 2, E. Dewdney; r, W. Blinman; hc and c, H. Gibbons.

Pair of heifers, above one and under two years old: 1, H. Gibbons; 2, E. Dewdney; r, R. H. Killen.

Pair heifer calves: 1 and 2, W. C. Lyde, Stowey; r, E. Dewdney; hc, R. H. Killen.

Channel Island cow: 1 and 2, Colonel Scobell, Kingwell Hall; r and hc, Sir J. H. G. Greville Smyth, Bart., Ashton Court; c, Mrs. Christine Hippisley, Ston Easton.

SHEEP.

Down or short-woolled ram over one year old: 1, S. Pritchard, Wilmington; 2, S. Bennett, Chew Stoke.

Cross-bred or long-woolled ram, over one year old: 1, S. Bennett.

Down or short-woolled ram, under a year old: 1, H. and J. Miles, Radstock.

Cross-bred or long-woolled ram lamb, under a year old: 1, J. F. Fowler, Norton Malreward.

Five six-tooth ewes: 1, S. Pritchard; 2, J. B. Parker.

Five four-tooth ewes: 1, S. Pritchard; 2, J. B. Parker.

Five two-tooth ewes: 1, I. Weaver, Winford; 2, J. B. Parker; hc, S. Pritchard.

Five chilver lambs: 1, S. Pritchard.

Airedale.

The holding of the Airedale Show during Bingley Feast week always assures a gratifying local attendance, and when the weather is favourable, as it was on Thursday, there is generally a large influx of visitors from the surrounding districts. In the sections specially appealing to the agricultural community there are horse and cattle classes limited to within a radius of ten miles, classes for animals which have never won a first prize, and open classes. The response on the part of local farmers was, however, very meagre, causing much disappointment to the Council. Numerically the show was an average one, and the quality was of a high order, though in the horse and cattle departments there were not many fresh aspirants for honours, as the Bingley meeting comes nearly at the end of the season. The total number of entries was 1,780, as against 1,885 in the previous year, and 1,860 in 1896. All these totals were exceeded at the two days' shows in 1897 and 1898, when the aggregates were 1,951 and 1,947. The sectional entries for 1900 and 1899 were as follows, the figures for Thursday being given first:—Cattle, 43 and 54; horses, 152 and 156; sheep, 28 and 26; pigs, 0 and 31; poultry, 304 and 335; butter and eggs, 18 and 23; dressed poultry, 6 and 6; pigeons, 613 and 631; rabbits, cats, and cavies, 320 and 288; dogs, 286 and 325; stands, 10 and 10. The prizes were of the value of £600.

Agricultural horses were rather light in numbers. The greatest interest centred upon the judging of the

aged mares and geldings, the coveted ticket falling to Messrs. Oldroyd, of Newsam Green, Woodlesford, for Lawns Sunflower, which has been in the ring fifty-seven times, and has won as many prizes. Her victor at Keighley—Messrs. Prince and Son's Duke was unplaced. The leading two-year-old was Mr. Henry Yates's (Cleckheaton) Girton Bluebell, the winner of the cup and two first premiums at Tong, and prizes at Bradford and elsewhere. As a rule, the Hackney classes were also thinly filled, and where the competition was very keen it arose chiefly through the meeting of the entries by Mrs. Fred Holmes, of Shipley, and Mr. G. C. Waud, of Bingley. In a restricted saddle class Mr. Waud scored with Frivolity, defeating the equally well-known Pickwick. The Baildon breeder sucessfully introduced into the ring The Doctor, brother of Sam Weller, but through some misunderstanding his two entries in the driving local class were late in parading, with the result that Mrs. Holmes's famous Love Letter had a walk over. The star of the Staveley Grange Stud continued in the ascendency. In the open pony saddle class, not exceeding 14 hands, Mrs. Holmes brought out for the first time Madam, and this handsome chestnut prevented Mr. Waud from getting at the top of the list with a mare that was likewise unknown in the ring. Love Letter, the property of Mr. Holmes, managed to lower the colours of Mr. Waud's Frivolity, but when the pair were shown in harness the tables were turned. Notwithstanding this defeat, Love Letter has thirty-seven first prizes to her credit. Mr. Waud supplied the winning sire in Cullingworth, which was placed at Islington, besides furnishing the best tandem team. The other prize-takers included Messrs. W. Hurst, Sandal; W. Sugden, Cullingworth; A. Illingworth, Halifax; Robert Burrow, Kirkby Lonsdale; James Lee and Sons, Hipperholme; and John Robinson, Hull. Through the efforts of Mr. D'Arcy Wyvill, who was accompanied on the showground by Sir Barrington Simeon, M.P., the Government sent three troop horses from York to enable farmers to see the stamp of mounts needed by the War Office.

The Gainford Hall herd accounted for eight of the cattle prizes, and a couple of awards were won by animals from Green Head, Milnthorpe. Mr. George Harrison was represented by Shorthorns which have over and over again figured in the prize list, and his representation, together with the rest of the exhibits, made a grand display. Sheep were rather select, but the quality was good.

Judges.

Horses: Messrs. C. W. Brierley, Brimfield, Herefordshire, and L. R. Duckworth, Bury. Cattle: Messrs. T. Leake, Swillington, and E. F. Jordan, Driffield. Sheep and Dressed Poultry: Messrs. T. Graham, Kirkbythorpe Hall, and R Mallinson, Rawdon.

Prize List.

HORSES.

Draught or agricultural colt, gelding, or filly, one year: 1, Oldroyd Bros., Woodlesford; 2, H. Yates, Cleckheaton. Draught or agricultural colt, gelding, or filly, two years: 1, H. Yates; 2, A. Lindley, Sandal. Draught mare or gelding, any age: 1, Oldroyd Bros.; 2, A. W. Hainsworth, Farsley. Mare or gelding, for agricultural purposes, which has never won a first prize: 1, S. E. Murgatroyd, Luddendenfoot; 2, Dibb Bros., Cottingley. Hackney colt, gelding, or filly, one year: 1, W. Hurst, Sandal; 2, R. Berry, Hipperholme. Hackney colt, gelding, or filly, two years: 1, W. Sugden, Cullingworth; 2, R. Burrow, Whittington, Kirkby Lonsdale. Hackney gelding or filly, three years: 1, A. Illingworth, Halifax; 2, J. Rhodes, Pontefract. Hackney brood mare and foal: 1, R. Burrow; 2, W. Sugden. Hackney foal: 1, J. Lee and Sons, Hipperholme; 2, R. Burrow. Trade or business turnout: 1 and special: E. H. Brayshaw, Bradford; 2, J. Seed, Bingley; 3, J. Robinson, Shipley. Trade or business turnout, comprising mare or gelding with heavy vehicle: 1 and special, Co-operative Society, Bingley; 2, T. Taylor. Hackney mare or gelding, shown in saddle, exceeding 14 hands: 1, G. C. Waud, Baildon; 2, Mrs. Holmes, Staveley Grange, Shipley. Pony, shown in single harness, not exceeding 14 hands: 1, G. C. Waud; 2, W. Brigg, Frizinghall. Hackney mare or gelding, shown in single harness, exceeding 14 hands: Mrs. F. Holmes. Pony, in saddle, not exceeding 14 hands: 1, Mrs. F. Holmes; 2, G. C. Waud. Hackney mare or gelding, three years old and upwards, that has never taken a first prize: 1, G. C. Waud; 2, L. Snowden and Sons, Starbeck. Hackney mare or gelding, not exceeding 15 hands: 1, Mrs. F. Holmes; 2, G. C. Waud. Hackney mare or gelding exceeding 15 hands: 1, J. Robinson, Hull; 2, E. Barrett, Skipton. Selling class: Horse or mare suitable for riding or driving purposes: 1, H. Daniel, Hutton Ambo, York; 2, J. A. E. Mitchell, Keighley; 3, J. H. Greenwood, Apperley Bridge. Draught stallion: 1 and 2, A. Lindley. Hackney stallion: 1, G. C. Waud; 2, W. Sugden. Pony in harness, not exceeding 14 hands: 1, G. C. Waud; 2, A. P. Robinson, Wakefield. Pony in harness, not exceeding 14 hands, which has never taken a first prize up to the time of entries closing: 1, G. C. Waud; 2, H. Wilkinson. Pony in saddle, not exceeding 14 hands, which has never taken a first prize up to the time of entries closing: 1, Mrs. F. Holmes; 2, W. Brigg. Horse or mare in single harness: 1, G. C. Waud; 2, Mrs. F. Holmes. Pair of horses in harness, tandem or otherwise: 1, G. C. Waud.

SHORT-HORNED CATTLE.

Bull calf, under twelve months: 1, G. Harrison, Gainford Hall, Darlington; 2, J. Handley, Green Head, Milnthorpe; 3, Crosland Bros., South Stainley Shed, near Leeds. Bull calf, over one year, and under two years: 1, G. Harrison; 2, J. Evans, Burton, near Lincoln; 3, Mrs. E. Gill, Silsden. Bull calf, over two years: 1, J. Handley; 2, G. Harrison. Heifer calf, under twelve months: 1, G. Harrison; 2, Mrs. Cass; 3, R. Garnett, Eldwick. Heifer, over twelve months and not exceeding two years: 1, G. Harrison; 2, T. Atkinson, Redvales, Bury; 3, W. Walsh, Bingley. Heifer, over two years: 1, G. Harrison; 2, T. Adamson, Bolton; 3, T. Atkinson. Cow, any age: 1, G. Harrison; 2, S. W. Hackney, Chapeltown Road, Leeds; 3, T. Atkinson. Two Shorthorns: 1, G. Harrison; 2, T. Adamson. Cow, for dairy purposes: 1, Dibb Bros., Cottingley; 2 and 3, W. Walsh. Cow or heifer, any age: 1 and 2, W. Walsh

SHEEP.

Best long-woolled ram: 1, J. Bellas, Woodside, Penrith Ram lamb, any pure breed: 1 and 2, T. Leake, Swillington. Three ewes or gimmer shearlings, long or short woolled: 1 and 2, T. Bellas. Three long-woolled gimmer lambs: 1, T. Leak. Three cross-bred ewes or gimmer shearlings: 1, G. Smith, Eastburn, near Crosshills; 2, W. Coates, Lower Laithe, Barrowford; 3, J. Bellas. Three cross-bred gimmer lambs: 1 and 2, C. Smith, Headen. Ram, any age and breed, confined to residents within the parish of Bingley, and which has never taken a first prize: 1, J. Seed, Bingley; 2, Bailey Bros., Keighley.

DRESSED FOWLS, BUTTER, AND EGGS.

Couple of dressed chickens: 1, W. Lancaster, Ewsick; 2, Mrs. C. Simpson, Bingley; 3, Mrs. Cass, Spellcroft. Two pats or prints of butter: 1, Miss Lawes, Clayger, Burnley; 2, Mrs. W. E. Mudd, Thornthwaite, Ripley; 3, Mrs. Joseph Marston, Snowden, Otley. Dish of seven new-laid white hen eggs: 1 and 3, R. Uttley, Ovenden; 2, Mrs. Cartwright, Penistone. Dish of seven new-laid coloured hen eggs: 1 and 3, R. Uttley; 2, H. Hartley, Ovenden.

Settle.

The North Ribblesdale Agricultural Society held their annual show on the 25th ult. at Settle, when there was an exceptionally good display of cattle, the entries this year in this department being fifty more than a year ago. In one class no less than twenty-three head of cattle entered the ring, and the task of deciding on their merits occupied a very considerable time. The special prize of £10, given by Mr. Walter Morrison, M.P., for the best bull in the district was, as usual, keenly competed for, as were the specials offered by the president of the Society (Mr. T. B. P. Ford), the vice-president (Mr. C. A. L. Swale), Mr. J. A. Farrer, and others. Sheep comprised blue-faced, half-bred, and Scotch specimens. With a view to improving the quality of the wool, and to encourage farmers to use such salve, clip, or wash as will not discolour or spoil the wool or falsely add to its weight, a special prize is to be added to next year's premiums.

In the horse classes the most interesting contest was that for the best hunter which had regularly hunted with the Craven, Pendle Forest, or Vale of Lune hounds during last season. The verdict of the judges in placing Mr. Oscar Greenwood's Star first after a hard struggle with the chestnut exhibit of Colonel Foster, M.P., was a popular one. The Hackney Horse Society's silver medal went to Mr. Burrow, of Kirkby Lonsdale.

Judges.

Cattle: Mr. Richard Ewbank, The Temple, Leyburn, and Mr. George Lancaster, Stock Farm, Bracewell, Gisburn, Clitheroe. Horses: Mr. Joseph Towers, Nether Kellet, Carnforth, and Mr. Richard Thornton, Gibstick Hall, Winmarleigh, near Garstang. Sheep: Mr. William Dinsdale, Manor House, Carperby, Aysgarth, and Mr. Richard Faweett, West Shaw, Hawes.

Prize List.

CATTLE.

Two bullock calves (calved since 1st September, 1899): 1, W. Frankland, Settle; 2, W. Cookson, Giggleswick. Two bullock stirks (not having more than two broad teeth): 1, J. Makinson, Melling, Lancaster; 2, J. Cottam, Nether Kellet, Carnforth. Bull calf (calved since 1st September, 1899): 1, A. A. Watkins, Austwick, Lancaster; 2, R. Lamb, Giggleswick. Bullock calf (calved since 1st September, 1899): 1 and 2, W. Rhodes, Westhouse, Kirkby Lonsdale. Pair of bullocks (calved since 1st August, 1899): 1, W. Frankland; 2, W. Cookson. Bull, under two years old (proof of age to be given), to be located within nine miles from Settle Market Cross, and to serve cows of members at 5s. each for six calendar months from show day, and subject in all other respects to the rules of the Society: 1, L. Carr, Mewith Head, Bentham. Yearling bull (proof of age to be given): 1, R. Ewbank, Austwick, Lancaster; 2, J. Lawson; 3, Mrs. Chamley and Son. Heifer calf (calved since 1st September, 1899): 1, J. Maudsley; 2, W. Rhodes. Yearling heifer (not to have more than two broad teeth): 1 and special, G. Bargh, Scaleber, Gargrave; 2, J. Heseltine, Horton, Settle. Two-year-old heifer (not to have more than four broad teeth): 1, W. Coultherd, Clapham, Lancaster; 2, R. Metcalfe and Sons, Hawes. Heifer, in calf (or calved and in milk) and not to have more than six broad teeth: 1, R. Metcalfe, Settle; 2, W. Coultherd. Cow, in calf or milk: 1, R. D. Taylor, Hellifield; 2, J. Sladen, Austwick, Lancaster; 3, R. Metcalfe and Son. Two-year-old heifer (not to have more than four broad teeth): 1, G. Bargh; 2, W. Clark. Dairy cow or heifer, in calf or milk: 1, J. Makinson; 2, S. Foster, Settle. Dairy cow, in calf or milk: 1, J. Makinson; 2, S. Foster. Heifer, in calf, or calved and in milk, and not to have more than six broad teeth: 1, G. Bargh; 2, J. Simpson.

SHORT-HORNED.

Open to tenant farmers.—Heifer calf, in the hands of the breeder, or purchased within thirty days of birth, calved since 1st September, 1899: 1, W. Rednayne, Clapham Station, Lancaster; 2, W. Bentham, Cragg Hill, near Settle. Yearling heifer, in the hands of the breeder, not to have more than two broad teeth: 1, W. Bentham. Cow, in calf or milk: 1, Sedgwick Bros.; 2, S. Foster. Two young stock cows or heifers, under 12cwt. each on show day: 1, R. Metcalfe and Son; 2, W. Cookson; 3, Wooler Bros., Long Preston. Three heifers or cows, in calf or milk: 1, A. A. Watkins; 2, R. Metcalfe and Sons; 3, J. Metcalfe.

ANY BREED.

Fat cow or heifer: 1, G. J. Beardall, Settle; 2, J. Cottam. Beast, fed on Thorley's food: 1, H. D. Green. Best beast on the field in any unlimited class, age considered (bulls excluded): 1, W. Frankland; 2, J. Maudsley. Two dairy cows (not entered in any other class), in exhibitor's possession on show day, not more than one month calved or within two months of calving: 1, W. H. Wolfenden; 2, A. A. Watkins. Bull calf, calved since September 1st, 1899: 1, R. Lamb; 2, Mrs. Chamley and Son. Heifer calf, calved since September 1st, 1899: 1, W. Rhodes; 2, W. Redmayne. Group of animals, consisting of cattle (one male and two females), sheep (one Wensleydale tup and two ewes), ewes of any distinct breed (the best of any distinct class): 1, T. and W. Hunter. Heifer calf of any breed, calved since September 1st, 1899: 1 and 2, J. Maudsley. Cow or heifer, fat or calver: 1, J. Makinson; 2 and 3, W. Rhodes.

HORSES.

Foal, for road or field (led in the ring): 1, A. Orr, Hornby; 2, R. Burrow, Whittington, Kirkby Lonsdale; 3, A. S. J. Musgrave, Settle. Yearling colt or filly, for road or field: 1, Colonel Foster, M.P., Hornby Castle; 2, W. L. Simpson, Settle; 3, W. Buxton, Settle. Two-year-old gelding or filly, for road or field: 1, E. and J. W. Phillip, Hellifield; 2, W. Morphet, Long Preston; 3, G. E. Maud, Burton-in-Lonsdale. Three-year-old gelding or filly, for road or field: 1, J. Clarkson, Carnforth; 2, R. Newsham, Hornby Castle; 3, W. Edmondson, Earby. Foal, for draught purposes (led in the ring): 1, T. Askew, Slyne, Lancaster; 2, A. Orr. Yearling colt or filly, for draught purposes: 1, H. Meckereth, Whittington, near Kirkby Lonsdale; 2, [illegible] Settle. Brood mare, for draught purposes: 1, H. Meckereth; 2, J. B. Dewhurst, Skipton; 2, R. Taylor, Hackney or roadster brood mare: 1, R. Burrow; 2, E. and J. W. Phillips. Hunting brood mare: A. Orr; 2, J. Sanderson, Wigglesworth, Settle. Brood mare, for draught purposes: 1, H. Meckereth; 2, J. B. Dewhurst. Horse or mare, exceeding 14½ hands, for saddle: [illegible] age, saddled and ridden before the judges: 1, J. [illegible] Barnacre, Garstang; 2, J. Cookson; 3, L. Hasleh. Shetland Pony, not exceeding 11½ hands, saddled and ridden before the judges: 1, A. S. J. Musgrave; 2, J. Thompson, Carnforth; 3, J. Whipp, Settle. Hackney or pony mare [illegible] [illegible] engine for the purpose of [illegible] Hackney Horse Society's silver medal. R. Berry, Kirkby Lonsdale.

SHEEP.

Blue-faced tup lambs, in the hands of the breeder: 1 and 2, W. Rhodes, Lundholme, Westhouse, Kirkby Lonsdale; 2, R. Ewbank, Lookand Green, Ayrshire, Lancaster. Shearling tup, to cross with a white-faced or half-bred ewe: 1, W. Rhodes; 2, R. Ewbank. Tup of any age: 1, W. Rhodes; 2, R. Burrow, Gate, Sedbergh. Pen of three gimmer lambs, in the hands of the breeder: W. Rhodes. Pen of three gimmer shearling gimmers, in the hands of the breeder: 1, W. Rhodes; 2, R. Burrow. Pen of three gimmers (not over one year old for breeding purposes) that have suckled lambs this season: 1, W. Rhodes; 2, R. Ewbank. Shearling tup, suitable to cross with a Scotch ewe: 1, W. Rhodes; 2, R. Burrow. Tup of any age, suitable to cross with a Scotch ewe: 1 and R. Ewbank. Tup (Teeswater, Wensleydale, or Leicester): W. Rhodes.

HALF-BRED AND SCOTCH SHEEP.

Pen of three half-bred gimmer lambs, in the hands of the breeder, from a Scotch ewe, and not fed for the butcher: 1, W. Robinson, Kettlewell, Skipton; 2, W. Carlisle, Bell Busk; 3, R. Clapham, Staggarth, Bentham. Pen of three half-bred gimmers, from a Scotch ewe: 1 and 2, W. Coultherd, Clapham, Lancaster. Pen of three ewes, of any age, from a Scotch ewe: 1, J. Walker; 2, W. Garnett, Swabeck, Giggleswick. Scotch tup lamb, in the hands of the breeder: J. M. Akrigg and Son, Hind Field, Garsdale, Sedbergh; 2, Mrs. Chamley and Son, Scotland House, Horton-in-Ribblesdale. Scotch shearling tup: 1 and 2, T. Rawlinson, Park House, Kirkby Lonsdale. Scotch tup, any age: 1 and 2, T. Rawlinson. Pen of three Scotch gimmer lambs, in the hands of the breeder: 1, T. R. Bownass; 2, Mrs. Chamley and Son. Pen of three Scotch shearling gimmers, that have been on less than two months in the hands of the exhibitor, and kept solely on high land: 1, T. Blackburn; 2, T. R. Bownass. Pen of three two-shear Scotch ewes, kept solely on high land and for breeding purposes, and that have suckled lambs this season: 1 and 2, T. and W. Hunter. Pen of three Scotch stock ewes (to be kept over a year for breeding purposes), that have suckled lambs this season: 1, W. Robinson; 2, J. Swinbank, Beecroft Hall, Horton-in-Ribblesdale. Scotch tup: T. Rawlinson. Pen of good-bred sheep or lambs, dipped with the All-Round Sheep Dip: W. Rhodes. Pen of three tups or sheep in the show (any breed), dipped with Barratt's Dip: W. Rhodes.

Herefordshire Horse Show.

The Herefordshire Horse Show, held on Wednesday on the Wyeside Ground at Hereford, contrasted very favourably with the previous exhibitions. This year Lord Llangattock is president. There are nearly 400 entries, and the judges were:—Hunters: Sir R. D. Green Price, The Grove, Presteign, Radnorshire; and Mr. T. O. Springfield, Swainsthorpe, Norwich. Hacks and harness: Mr. S. B. Carnley, Norbury Stud, Alford, Lincolnshire; and Mr. T. H. Hutchinson, Manor House, Catterick. Cart horses: Mr. John T. C. Eadie, Manor House, Barrow-on-Trent, Derby; and Mr. F. Coney, Lower Court, Cotheridge, Worcester.

The hunters were a remarkably strong lot, and the competition was exceptionally keen. The yearlings formed the poorest lot. The principal prize-winners were R. C. B. Cave, Colwall; T. C. and T. H. Downes, Richards Castle; F. E. Gough, Bodenham; J. and N. Gray; J. T. Rogers, How Capel; T. L. Walker, Docklow; C. de Cliff Vigors, Eardisley; Miss A. Edwards, Malvern; H. R. Evans, Weobley; G. H. Green, Leominsterline; T. Nicholls, Abergavenny; E. R. Apperley, Cheltenham; A. W. [illegible], Brockhampton. Second and third awards were to C. and L. H. Downes; W. Till, Treworgan; R. C. B. Cave; J. T. Rogers; A. J. N. Pilliner; J. Ingram, Leominster; R. O. Backhouse, Sutton; A. Allington, Hereford; D. A. G. Birchley, Colwall; T. L. Pugh, Little Dewchurch. The special prize was won by Misty Son, owned by Miss Edwards, the second being Mr. Walker's Voracious. In the local champion class T. H. Whiteman, Ashton Court, Leominster, took the prize offered jointly by the North and South Herefordshire Hunts, with a fine [illegible] gelding.

In the Hackney class T. Nicholls, Abergavenny, obtained the first award, and Mr. Allington second. The hacks were not numerous, but the majority of them, in point of merit, were exceedingly good. The first prizes fell to E. R. Apperley, Mrs. A. W. Foster, Mrs. A. K. Apperley (Cheltenham), and Mr. G. H. Godsell.

The cart horses made a fine show. While some were high-priced animals others were nearly up to the standard. The chief winners were R. Green, The Whittern; J. James; J. Edwards, Monnington; F. and A. Edwards, Byford; W. H. B. Cave; F. W. Barling, Ross; Mrs. E. Morgan, Pontrilas; S. J. Cotterell, and H. Hodgkiss, Holme Lacy. A special prize offered in classes for local Sires was won by Mrs. F. Morgan.

The Hunters Improvement Society's medals were to C. and L. H. Downes, for brood mares; Mr. H. R. Evans, for fillies; Miss A. Edwards, for geldings; and Messrs. J. and N. Gray, for hunters of either sex.

Worsley.

The annual show of the Worsley and District Agricultural Society was held on the 25th ult. in Worsley Park. In the heavy horse Mr. W. [illegible], M.P., was prominent, showing the best horse. Cu-

sidering the influence of Earl Ellesmere's stud, the display of heavy horses was disappointing. In light horses Mr. Lees Knowles, M.P., Mr. Levi Fish (Preston), Mr. W. Lawson (Blackpool), Mr. Norman Read (Blackburn), Mr. Edward Hoyle (Bacup), and Mr. R. Harrison (Chorley) secured some of the principal cards. This section was chiefly noticeable by reason of the presence of animals from a distance, most of which had previously won honours. Mr. Hoyle was awarded the cup for the best hunter with his bay mare Countess. In cattle Mr. F. Miller, of Birkenhead, had entered several famous bulls, but they failed to put in an appearance, and animals owned by Mr. Thomas Atkinson (Bury), Mr. Thomas Adamson (Lostock Junction), Messrs. W. and O. Gregory, and the Bridgewater Trustees were to the front.

Prize List.

HORSES.

Draught or agricultural stallion: 1, Exors. of T. Valentine; 2, Clifton and Kersley Coal Co. Draught or agricultural mare, four years and upwards: 1, Victor C. W. Cavendish, M.P.; 2, Oswald Russell Ward. Draught or agricultural gelding, four years and upwards: 1, Jackson Brothers; 2, Peter Davies; 3, John W. Pollitt. Draught or agricultural brood mare: 1, Victor C. W. Cavendish, M.P.; 2, W. Lindsay; 3, Oswald Russell Ward. Confined to the Society's district. Draught or agricultural gelding or mare: 1 and 2, Jackson Brothers; 3, Pendleton Co-operative Society. Draught or agricultural three-year-old gelding or filly: 1 and 2, Jackson Brothers; 3, George Johnson. Draught or agricultural two-year-old gelding or filly: 1, Thomas Wild; 2, Robert Heaton. Draught or agricultural foal: 1, Jackson Brothers; 2, Thomas I. Taylor. Open to the United Kingdom.—Roadster stallion: 1, Lees Knowles, M.P.; 2, James Carter; 3, W. H. Cresswell. Roadster brood mare, with foal at foot: 1, Levi Fish; 2, Lees Knowles, M.P.; 3, William Ferguson. Roadster foal: 1, Levi Fish; 2, Lees Knowles, M.P. Confined to the society's district. Roadster, two or three-year-old gelding or filly: 1, E. Maltby; 2, John J. Cookson. Roadster yearling, colt, mare, or gelding: 1, Edward Hoyle; 2, Samuel Isherwood; 3, Alfred Ashton. Roadster, 15 hands or over, to be shown in saddle: 1, A. L. Goodson; 2, George Ledson. Cob, under 15 hands, to be shown in saddle: 1, William Lawson; 2, G. Ledson; 3, John Heath. Pony, under 14 hands, to be shown in saddle: 1, D. Bradshaw; 2, Levi Fish; 3, Richard Harrison. Pony, under 13 hands, to be shown in saddle: 1, Richard Harrison; 2, H. R. Bannister. Cob, under 15 hands, to be shown in saddle: 1, F. Ellis, jun.; 2, Thomas Ward. Pony, under 14 hands, to be shown in saddle: 1, D. Bradshaw; 2, F. Ellis, jun.; 3, John J. Cookson. Groomed cart horse, in gear: 1, Samuel Higginbottom; 2, W. and O. Gregory.

CATTLE

Open bull: 1, Thomas Atkinson; 2, Thomas Adamson. Cow, any breed, in milk or in calf: 1, Thomas Atkinson; 2, W. and O. Gregory. Cow, Channel Islands, in milk or in calf: 1 and 2, Bridgewater Trustees. Two-year-old heifer: 1, Thomas Atkinson; 2, Thomas Adamson. Confined to the Society's district.—Bull, under two years old: 1, Thomas Adamson; 2, Roger Walker. Pair of cows, for dairy purposes: 1, James Parker; 2, John Heaton. Cow for dairy purposes: 1, James Parker; 2, John Heaton. Two-year-old heifer: 1, Thomas Adamson; 2, W. and O. Gregory. Yearling heifer: 1, Thomas Adamson; 2, Richard Rigby. Heifer calf: 1, Thomas Adamson; 2, Thomas I. Taylor. Special prizes, given by the Bridgewater Trustees. Two-year-old heifer: 1 and 2, W. and O. Gregory. Yearling heifer: 1, Richard Rigby; 2, Peter Boardman. Calf, under twelve months old: 1, W. Hurst; 2, Thomas I. Taylor. Bull, under three years old: 1, John Seddon; 2, Roger Walker.

Paris International Horse Show.

The International Horse Show, organised by the Direction des Haras of the French Ministry of Agriculture in connection with the Paris Exhibition, opened on Sunday in the grounds of the annexe to the Exhibition at Vincennes, and will remain open to the public daily from nine a.m. to 5 p.m. until Monday, the 10th inst., when it will close after an auction sale on that day. According to the official catalogue, which has just been issued, a total of 1,718 animals have been entered for the show, of which 1,191 are sent by exhibitors in France and 527 from exhibitors of other countries. Of the latter, England has entered 62 horses; Austria, 20; Belgium, 154; Denmark, 1; Germany, 96; Holland, 40; Hungary, 44; Italy, 3; Russia, 89; and Turkey, 18.

The animals will be judged by a jury, the members of which will be divided into sections. Purely French breeds will be judged by French members of the jury, but in the case of breeds open to all nationalities French judges will be assisted by judges from the various countries represented. The judges from the United Kingdom are the Hon. Cecil T. Parker, of Eccleston, Chester (Section 1, English thoroughbreds); Colonel Allan Maclean, of Brook House, Bracknell, Berks (Section 2, Arab and Barb stallions); Mr. Christopher Wilson, of Rigmaden Park, Kirkby Lonsdale (Section 3, Arab and Barb mares); Mr. C. W. Tindall, of Wainfleet, Lincolnshire, and Mr. Frederick Wrench, of the Irish Land Commission, Dublin (Section 18; Hackneys, ponys, Shires, Clydesdales, and Suffolks). The judging will commence at eight a.m. on Tuesday, the 4th inst., and will be continued on the following days until finished.

Mushrooms In some districts in South Leicestershire mushrooms are being gathered by the cartload. In others they are being spudded in the same way as thistles, the prices given being insufficient to repay the cost of distribution.

As a proof of the unusual abundance of stone fruit this season, a correspondent informs the *Standard* that at Newbury Market on Thursday several tons of plums were on offer, and heavy sales took place, the price being remarkably low. Large quantities of ripe plums in sound condition only realised one halfpenny per pound.

Britain's Peril: an Empty Bread-basket.

Thomas G. Read's Solution.

Early in 1897, and again in 1899, the question of our food supplies in time of war was discussed in the House of Commons.

In 1897, the scheme placed before Parliament to reduce the danger was a system of national granaries. They would prove no remedy, as the grain stored would chiefly consist of foreign wheat, and thus no arrangements could be made to automatically replace the reserve during times of peril. Should the war last some time, the contents of the granaries having been eaten and our home producers neglected, the time of agony would simply have been prolonged.

In 1899, national granaries did not occupy such a prominent position, the debate being chiefly on the insurance by the Government in some form or another of maritime risks in time of war. Such a solution appeared to be impracticable.

A noticeable feature of the debate was that any suggestion that we should produce more food at home was cheered.

The reason we do not produce more wheat is because it does not pay to grow under our present system. Were we to pay a bounty on home-grown wheat to counteract the loss on production, we should soon be producing half our requirements, and, were this wheat kept in ricks for six months, we should commence each year with one year's supply in the country—six months' in our rick-yards, and six months' in our wheat-fields. Although a bounty on home-grown wheat would cause a decrease in the price it has been suggested it would increase the price of bread. No example can be produced where a bounty has had any other effect than to decrease the price of the actual article receiving the bounty. Take the effects of the export bounty paid by certain countries on sugar, in order to attract money to them that otherwise would go elsewhere. The export bounty causes the sugar that has received the bounty to be sold at a low price abroad, whereas that consumed in the country paying the export bounty not having received any is sold at a high price, because the producers refuse to sell unless they receive an increase in the price equal to the bounty they could obtain by exporting. Thus the want of a bounty causes sugar to be high priced where an export bounty is paid.

It has been suggested that all the money paid as a bounty on home-grown wheat would go into the pockets of the landlords. Surely the labourers would obtain a large part of the bounty by increased wages; if they did not more labour would not be attracted back to the land. The landlords could hardly invent a means of obtaining the labourers' share.

The occupiers would not be likely to pay rent higher than the returns justified.

The landlords would justly receive an increase in their rent-rolls, as their share, as much derelict land and unprofitable pasturage would be again placed under the plough to produce food for the people, and, besides giving employment, would yield rent.

The original advocates of free trade expressed no wish to interfere with the home producer. Well, to counteract the loss on the production of wheat in this country, by such means as a bounty, is the complement of free trade in wheat, as it would prevent our farmers from being interfered with, and would make them free to grow wheat without suffering a loss.

How much bounty would be required to counteract the loss on production?

The following detailed estimate is believed to be a fair average of the cost of producing an acre of wheat in this country:—

Twelve carts of manure, at 5s. per cart, £3; ploughing, 10s.; rolling, 1s.; harrowing twice, 2s.; seed, 7s. 6d.; drilling, 2s.; harrowing after the drill, 1s.; striking up, 1s.; water farrowing, 1s.; harrowing in spring, 1s.; rolling, 1s.; hoeing over, 2s. 6d.; harvesting, 15s.; thatching, 2s.; thrashing, 7s.; carting out, 5s.; rent, 12s.; taxes, 2s. 6d. Total expenses of producing one acre of wheat, £6 13s. 6d.

The average yield of wheat in this country is about 29 bushels per acre: thus a bushel costs about 4s. 7¼d. to produce, and, since there are eight bushels in a quarter, the cost of producing a quarter of wheat is on an average about 36s. 10d. in this country. If we add 3s. 2d. per quarter to pay for the farmer's time and labour and interest on the money invested, we find that our home producers should have 40s. per quarter returned to them for their wheat.

It is proposed that the average price of wheat for the year being taken the returns should be made up to about 40s. per quarter by paying a bounty the next year sufficient to produce such returns.

Should the bounty be paid on the acreage harvested, or on the quantity produced?

It has been suggested that were it paid on the acreage harvested, bad farmers would receive as much per acre as good. Surely every farmer would in his own interest endeavour to grow as large a crop per acre as possible.

Were it paid on the quantity produced the amount received per acre would vary considerably. If 10s. per quarter were paid, the farmers growing 40 bushels per acre would obtain 50s. per acre bonus, besides, at 30s. per quarter, £7 10s. for the wheat, or altogether £10 per acre for the crop; whereas men with poor land producing 20 bushels per acre would obtain 25s. per acre bonus, and £3 15s. for the wheat, or altogether—£5 per acre for the crop. That is, the farmers who sadly require help would have 25s. per acre bounty and those who do not require it as badly would obtain 50s. per acre.

Were the bounty paid in two instalments, the first on the acreage harvested and the second on the number of quarters thrashed, it would help men with poor land, besides tending to encourage good farming; but it is believed that a bounty on the acreage harvested is the more practical, as there is little doubt that could be more cheaply and more easily determined than the quantity thrashed.

If inspectors were employed to see that the quantities returned were thrashed an army of inspectors would be required, whereas the acreage harvested could be quickly checked by the Ordnance Survey maps.

It is quite probable that if a bounty were paid on the quantity thrashed there might be a tendency for some farmers to exaggerate the yield; but, juggle how you may, you cannot make an acre of land other than an acre.

If the market returns were taken as the quantity thrashed the wheat would have to be sold before the bounty could be paid.

If paid on the acreage harvested the wheat might remain in the rick long after the bounty had been paid. The growers, in return for the bounty, should undertake to reserve their wheat for at least six months in ricks built on pins, so that rats and mice could not reach it, and they should be prepared to sell the grain at a fixed price, should such a course appear in the best interests of the nation.

It is probable that the Government would never have to interfere concerning the sale of wheat, as speculators would not be likely to force up the price when there was a possibility of the Government stepping in to keep it at a reasonable figure.

Much wheat is now thrashed just after harvest, because the farmers require the money the grain will return to pay various accounts, which become due at Michaelmas; if the Government lent money at a low rate of interest on the wheat-ricks many small farmers would be able to reserve their wheat who, under present conditions, cannot afford to do so. Thus a small farmer, with some bullocks fattening for Christmas beef, would be able to borrow money from the Government on his wheat-rick, and when he sold his bullocks could pay this back. The Russian Government have lent their own farmers money on wheat. Our annual wheat crop is not worth £10,000,000. If we produced six months' supply each year, or 15,000,000 quarters, and our farmers received about 40s. per quarter in return for that, our annual crop would be worth £30,000,000. That would be an increase in the returns from wheat growing in this country of over £20,000,000 per annum. An increase in the amount of money circulating in our rural districts would improve the position of all industries in this country. Not only would agriculture be revived, but the whole nation would reap considerable advantages.

How can we raise the revenue to pay a bounty on home-grown wheat?

Why not from the foreigner by import duties on wheat?

The original advocates of free trade never proposed abolishing all customs duties—merely such as hindered the trade of this country.

Import duties usually increase the price of an article about 50 per cent. of the duty; thus in France, where an import duty of 12s. 3d. per quarter is levied on wheat, the price is usually 6s. higher than in this country.

It appears that were a bounty paid on home-grown wheat that the revenue to pay it might be obtained in such a manner, without hindrance to trade, by import duties on wheat as to cause them to counterbalance the decrease in price that would take place owing to a bounty.

Last year we imported over three-fourths of the wheat we consumed, and the average price in this country was about 25s. per quarter—thus if we had levied import duties of 5s. per quarter on wheat from foreign countries and 2s. 6d. per quarter on that from our Colonies, we would have raised sufficient revenue from the exporters of wheat to have paid our home wheat growers a bounty of 15s. per quarter without the consumers of this country contributing a farthing. A bounty of 15s., plus the market price of 25s. per quarter, would have returned our farmers 40s. per quarter for their wheat without any increase in the price of bread.

On February 10th, 1898, during the debate on the Address, the President of the Board of Trade stated that the bounties given for shipping were of a different order from the sugar bounties; they were really given in the form of subsidies to establish quick communication by sea, and services were performed for them. It appears that no more important service can be performed in return for a subsidy than securing the nation from famine and surrender. We spend many millions each year on our Navy and on our Army for the protection of

the country, and it appears very foolish to run the risk of these large establishments proving useless in time of need, because we do not insure the production of six months' supply of bread at home, although we have so many acres of derelict land and unprofitable pasturage from which our forefathers used to produce magnificent crops of wheat.

It has been suggested that were a bounty paid on home-grown wheat, logically, similar relief could not fairly be withheld from any other industry similarly affected—for instance, the hop industry, the sugar industry, and the iron trade; but it appears it has to be proved that an uninterrupted supply of such products is of equal importance for the safety of the whole nation as a secure supply of wheat. For some years England has given bounties for shipping in order to be able, in time of war, to have the use of certain ships as cruisers. Annually ten shillings per horse has been paid to certain owners so that the Government, in time of need, may be able to obtain a number of horses. To encourage an increased supply of horses, suited for our cavalry, the Government annually finds money, which is paid away as premiums or bounties, for thorough-bred sires; and the Government pays £2 bounty to men serving in the Foot Guards, who, on completing their three years with the colours, are willing to extend to seven years, and those enlisted for seven years who extend to twelve years.

Thus we have many precedents, which will permit us to pay away money to encourage an increased growth of wheat in this country, in order to secure us from the peril of famine and surrender in time of war.

No change of our fiscal policy is involved; if it were, such a fact should condemn our fiscal policy, as the safety of a nation should be above all doubt.

It is to be hoped that many voters at the forthcoming General Election will cause the candidates to understand that our present hand-to-mouth system, of obtaining our daily bread chiefly from those who may some day be hostile, is a matter which must be altered in the near future.

The Deering Harvesting Machinery at the Paris Exhibition.

To write of all the United States exhibits that received awards would fill volumes, says Captain A. H. Mattox, official Press representative of the United States Exposition. But there are several exhibitors from the United States who, for the great expense attending their exhibition in Paris, its elaborateness, and superior quality, deserve (he says) special mention. One exhibit that has attracted the attention, surprise, and admiration of foreigners from every nation, as well as American, which carried off the honours of a Grand Prize, two gold medals, and a silver medal, is that of the Deering Harvester Company, of Chicago. Again, at Paris in 1900, as at the World's Fair of Chicago in 1893, the Deering Harvester Company has proven itself worthy of its laurels, a leader, as it always has been, in its line of manufacturing, and then at Paris has added laurels to their fine records of mechanics from the United States.

The Deering Harvester Company at Paris has received the highest recognition given any company engaged in the manufacture of similar machines.

From its beginning in 1858 with the Marsh Harvester, a machine which revolutionised harvesting machines, and again in 1878 with the Appleby Automatic Twine Binder, which further revolutionised existing methods, up to the present time with its modern automobile mower, the Deering Harvester Company maintains its position as foremost.

The Deering Harvester Company has been neither sparing in its expenses nor efforts to make its exhibits interesting and instructive. Its general exhibit in the American Annex attracts greater crowds from day to day than any other exhibit on the Champ de Mars. The farm scene at one hand of which is a bronze medallion of Obed Hussey, one of the inventors of the reaper, and the other one of C. W. Marsh, inventor of the harvester, with its miniature mower in operation drawn by two horses with a landscape fading away in the distance presents a panorama of great interest, especially to foreigners who have never seen an American farm, and it is true to life.

The model of the factory, though inadequately representing the original, covering as it does 85 acres of ground, when considered in connection with the photograph of the 9,000 employés which is seen just below the model in the exhibit, gives a slight conception to the spectator of the magnitude of the concern whose exhibit is before him. No one feature of the exhibit better demonstrates to the public the fact that the Deering Harvester Company is a progressive one, constantly on the lookout for improvement or innovation, than the automobile mower on its revolving pedestal, the first one ever invented and exhibited to the world. This machine, the result of six years of effort and six years of success in the fields of America, deserves more attention and is worthy of more to those interested in agriculture than any other one thing in this great universal exposition. This machine is, in fact, a mowing machine of the most perfect type, having a petroleum motor mounted thereon, of sufficient power to meet all requirements. A picture of this machine is found in the official Retrospective Exhibit of the Exhibit depositing, giving the development of harvesting machinery prepared by the Deering Harvester Company, of Chicago (by request of the Exposition authorities and by appointment of the Department of Agriculture of the United States of America).

Besides the automobile mower, the general exhibit comprises the regular machines manufactured by the company, a self-binding harvester, a reaper, two mowers, and hay rake, all of the above machines with the exception of the hay rake being provided with roller and ball bearings, an innovation introduced for the first time in harvesting machinery by the Deering Harvester Company in 1891. These machines, of exquisite finish, show the highest development in the art of harvesting machinery and are minutely examined by many admiring spectators. The adaptation of ball and roller bearings was for a long time bitterly opposed and fought by other manufacturers, but the success was so marked that competitors, in keeping with their past history, forced to accept the inevitable, made a half-hearted attempt by introducing only roller bearings, and now some even claim the credit of having been the originators.

The world has had many benefactors, but none has been more truly a benefactor than William Deering, of Chicago, to whose efforts are due, not only the introduction of the modern twine binder, but also that of the single strand manila and sisal binding twine. After his introduction of the Appleby automatic binder, Mr. Deering saw the need of a twine which at once possessed the essential qualities of strength and suppleness; he therefore applied to Mr. Fitler, a rope manufacturer of Philadelphia, who undertook the manufacture of several hundred tons of the twine according to Mr. Deering's ideas, on condition that Mr. Deering assume all costs and responsibility. For some years the twine was furnished by rope manufacturers, but in 1885 the Deering Harvester Company felt that the time was opportune to begin the manufacture of twine for its own machines; it immediately set to work and began the manufacture, which has constantly increased, so that at the present time the annual output exceeds 30,000 tons, over one-third of the entire world's output of this commodity. The twine exhibit of the Deering Harvester Company at the Paris Exposition is instructive in its aims in that an attempt is made to present to the eye of the spectator the various processes employed in thus obtaining the fibre and in the manufacture of the twine.

This Manila fibre is derived from a species of plantain or banana tree which grows on the Philippine Islands. Sisal is obtained from the leaves of a plant belonging to the cactus family, which thrives chiefly along the gulf coast of Yucatan. Fibres are shown in the various stages of preparation, as well as the waste materials used for fuel and the manufactured article. At one end of the glass case, wax figures of a Philippino in the act of cutting a wild banana stock and a Mexican cutting a Sisal leaf are graphically shown, while at the other end a small farm scene is presented with a model twine binder, which shows the use of the twine. Above the farm scene is suspended a miniature binder with a sheaf of wheat about to be bound. Many coloured photographs of the machines at work in the factory with their operators further illustrate the greatness of this branch of the business.

A special feature of this great Exposition of 1900 lies in the fact that so many retrospective exhibits of the different arts have been made, but none have succeeded better than the "Deering Retrospective" exhibit of the development of harvesting machinery in the United States' section of the Department of Agriculture. In the autumn of 1898 the Deering Harvester Company was nominated to the French authorities by the Hon. Ferdinand Peck, U.S. Commissioner-General, as a proper party to whom to entrust the making of the official retrospective exhibition. This exhibit is truly a novelty, as it is the first of the kind ever attempted.

In glass wall cases on three sides of the space and in seven transverse cases, all occupying an area of 1,000 square feet, are exhibited nearly 200 models, paintings, and photographs showing the various machines in operation and farm scenes from all parts of the world. The models, about 100 in number, have been made according to the drawings and descriptions found in old cyclopedias and records of the patent office. Every record which could be found was consulted, and every American manufacturer of harvesting machinery examined and approved the models of machines made by him or his predecessors. The machines exhibited are those which mark the various stages in the development of the art, for it comprises within its scope the whole history of harvesting machinery, from the beginning with the Gaul machine down to the modern twine binder. The whole history of modern methods of harvesting may be divided into three great epochs:—

1. The epoch of the reaper, invented in England in 1826 by Patrick Bell, and in America by Obed Hussey, and successfully put in the market in 1833.

2. The epoch of the hand-binding harvester, invented by C. W. Marsh in 1858, and manufactured up to the year 1875 by the Deering Harvester Company.

3. The epoch of the twine binder, invented by John F. Appleby in 1858, adopted and introduced by the Deering Harvester Company in 1878.

That the Deering Harvester Company was selected as the proper party to make the official retrospective exhibit becomes obvious, as by its efforts the two great epochs, that of the hand-binding harvester and that of the automatic self-binding harvester, were ushered in. Up to 1858, the year of invention of the Marsh harvester, all the grain was bound upon the ground; but by this invention the labour was reduced more than one-half, two labourers now doing as much as five formerly. For many years manufacturers of reapers forgot the Marsh harvester, but the tide of opinion was against them, and they were forced to recognise its superiority as an effective machine.

The last epoch, that of the twine binder, was ushered in by William Deering's adoption of the Appleby twine binder, the first, and, as it has proven, the only practical twine binder.

Mr. Appleby, in 1858, when a boy of eighteen on a farm, expressed the belief that he could make a machine which would bind grain automatically, whereupon he was jeered by his employer. He constructed a knotter which is the last of one shown in the retrospective exhibit. This knotter is of the kind used to-day to bind nine-tenths of all the grain in the world, and is used by all manufacturers with one exception.

The "Deering Retrospective Exhibit" has been pronounced by many competent persons to be the finest at the Paris Exhibition of 1900, and has had many illustrious vistors, such as M. Loubet, President of the Republic, who showed great interest and asked many questions in regard to models. He was accompanied on his visit by M. Picard, Commissioner General; M. Delauney Belleville, Assistant-Commissioner-General; M. Millerand, Minister of Commerce, and many other notables, all of whom were delighted. Among the many others who have honoured these efforts by a lively interest and a kindly sympathy may be mentioned M. Leon Bourgeois, formerly Prime Minister; M. Cambon, Ambassador of France to the United States at Washington, and Mme. Réjane, the greatest living actress of France.

Other exhibits made by the Deering Harvester Company are the following:—

On the third floor of the American Annex, near the Corn Kitchen, may be found a Corn Harvester in a miniature field of corn, which is placed here to serve an object lesson.

The Deering Harvester Company has many special machines, used to make the different parts for the myriads of machines which are sent out to all parts of the world to meet the constantly growing demand.

Three of these machines are on exhibition in the department of special machinery. Besides all of the exhibits before mentioned, the Deering Harvester Company, in the Civil Engineers' building of the Exposition, has a model of its works, and in a special department of the Exposition, at the Bois de Vincennes, displays a very interesting exhibit, in a paper twine-making machine. The remarkable and elaborate exhibit made by the Deering Harvester Company at the Paris Exposition of 1900 shows the high and enviable position this Company occupies in the mercantile and producing world, and is in reality far greater than can be inferred from its seven exhibits at the Paris Exposition of 1900.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

14470.—J. J. Christian, of London, for an invention for "Improved machine or apparatus for ticking hay, picking potatoes, and similar purposes."

14580 J. Voss and J. Prok, of London, for an invention for "Improvements in ploughs."

14013 G. J. Grapes, of London, for an invention for "A new or improved hoe."

Patents Sealed.

9029.—P. Ehmke, of Neustettin, Germany, for an invention for "Mowing."

9103.—L. Biddle, of Syston, Leicestershire, for an invention for "Fruit, flowers, and the like gathering."

9521 A. Dandoleit, of Munich, Bavaria, Germany, for an invention for "Improvements relating to pedal cycles."

The Dublin Wool Sales. At the sale rooms, Usher's Quay, Messrs. Grady Sons, and Co. held their third auction of wool for this season when 137 bales of various grades of Irish-grown wools were submitted for competition. There was a good demand for bright parcels with quality, the prices for such showing [illegible] up to the level ruling at the July sale, but for Scotch and other coarse sorts the bidding was languid and low prices the rule. There was a good attendance of buyers and prices reported by the trade. The following prices were realised: Super and Downs [illegible] to 8d; Hogs 7½d to 8d; super and medium [illegible] to 7½d; inferior [illegible] to 6½d; Scotch [illegible] to 6d.

WATERLOO ROUND CAKES,

Acknowledged as the Best Feeding Cake in the Market for all Classes of Stock, and especially the Young.

Prices, samples, and particulars free on application to Ayre Bros., The Avenue, High Street, Hull, or to the

WATERLOO MILLS CO., LIMITED, HULL

"WORTH ITS WEIGHT IN GOLD."—*Prof. Buckman.*

Used on the Royal Farms. Known in all parts of the world. Supplied to Colonial Governments.

STEPHEN PETTIFER & SONS'

"SANTOVIN,"

THE LEADING BRITISH AUTHORITY ON THE PRACTICE AND SCIENCE OF THE

Farm, Live Stock, Dairy, Milling, Malting, Hops, &c.

(Registered as a Newspaper at the General Post Office.)

Vol. LXXXIII. No. 3598. LONDON, MONDAY, SEPTEMBER 10, 1900. THIRTY-TWO PAGES PRICE 3D.

SOCIETIES.

THE NATIONAL ASSOCIATION of ENGLISH HOP GROWERS.

(Founded June, 1894.)

PRESIDENT.—COLONEL BROOKFIELD, M.P.

HON. TREASURER.—E. ALBERT WHITE, ESQ., Beltring, Kent.

SECRETARY.—THOMAS IRONMONGER.

CENTRAL OFFICE.—61, HOP EXCHANGE, BOROUGH, LONDON.

GENERAL OBJECTS.

To promote united action among English hop growers as a body for the improvement of the industry.

To promote, support, or oppose such legislative and other measures as may affect the industry.

To collect and publish, for the benefit of members, special statistical and other useful information relating to English and foreign hop culture.

To arrange for arbitrations in cases of dispute between sellers and buyers of hops, for the avoidance of litigation.

ANNUAL SUBSCRIPTIONS.

Ordinary members, 3d. per acre of hops under cultivation; honorary members, £1 1s.; hop factors, £1 1s.

KENT OR ROMNEY MARSH SHEEP BREEDERS' ASSOCIATION.

FOURTH ANNUAL SHOW AND SALE OF REGISTERED KENT OR ROMNEY MARSH RAMS, under the management of the above Association, will take place on FRIDAY, SEPTEMBER 28TH, 1900, IN THE CATTLE MARKET, ASHFORD, KENT, COMMENCING AT 10.30 A.M. SHARP.

The entries, which number 445, have been made by the following breeders:—The Right Hon. Earl Sondes, Mr. A. Amos, Mr. J. P. Barnes, Mr. G. Buley, Mr. N. Clayton, Mr. F. de B. Collard, Mr. G. Farmer, Mr. C. File, Messrs. C. File and Sons, Mr. Arthur Finn, Mr. J. H. Harvey, Mr. E. P. Hogben, Mr. W. E. Long, Mr. J. D. Maxted, Mr. W. Millen, Mr. F. Neame, Mr. L. H. Page, Mr. J. E Quested, and Mr. H. Rigden.

The judging will take place at 9 a.m. on Friday, September 28th, and the Sale will commence at 10.30 prompt. Refreshments will be obtainable on the Sale ground as usual.

The annual dinner, to which members and the public are invited, will take place at the Saracen's Head Hotel, Ashford, under the presidency of the Right Hon. A. Akers-Douglas, M.P., on Thursday, September 27th, at 7 p.m. Tickets, price 5s. 6d., to be obtained at the Hotel.

Catalogues and all information in respect to the Show and Sale to be obtained from W. W. CHAPMAN, Secretary, Room 32, Fitzalan House, Arundel Street, Strand, London, W.C.

FROME DISTRICT AGRICULTURAL SOCIETY'S GREAT EXHIBITION AT FROME, WEDNESDAY, SEPTEMBER 26TH NEXT.

Prizes above the value of £500 in cash, three Gold Medals and plate for Cheese, Butter, Working Dairy, Horses, Cattle, Farm Servants. ALL ENTRIES CLOSE SEPTEMBER 12TH NEXT. Schedules of the Secretary.

T. C. HARDING, Auctioneer, Frome.

SOCIETIES.

RUGBY AND DUNCHURCH AGRICULTURAL ASSOCIATION

CATTLE, HORSE, AND FOAL SHOW WILL BE HELD AT RUGBY, ON WEDNESDAY, SEPTEMBER 12, 1900, when £370 will be given in Prizes.

Entries close September 1, 1900.

EDWIN TAIT (Auctioneer), Secretary and Treasurer, 2, Albert Street, Rugby.

BIRMINGHAM AUTUMNAL SHORTHORN SHOW AND SALE

The FORTY-EIGHTH GREAT SHOW and SALE will be held at Bingley Hall, Birmingham, on THURSDAY, SEPTEMBER 20TH.

240 Head of Highly-descended COWS, HEIFERS, and BULLS, including many prize winners, are entered from the most noted Breeders,

And will be SOLD by AUCTION, by Messrs. LYTHALL and Co., without any further reserve than entering them at not more than £21 each.

Judging at 8 30. Sale at 11 o'clock.

Admission 1s. Catalogues 7d., free by post.

W. H. LYTHALL, Secretary.

SHAP AGRICULTURAL SOCIETY.

The THIRTY-EIGHTH ANNUAL SHOW will be held at SHAP on WEDNESDAY, SEPTEMBER 19TH, 1900.

Prizes will be given for Jumping, Flat and Handicap Trotting Races, open to all comers.

For particulars apply to THOS. GELDART, Secretary.

Mill Flatt, Shap.

MONTGOMERYSHIRE AGRICULTURAL ASSOCIATION.

ANNUAL HORSE SHOW AT WELSHPOOL, THURSDAY, 13TH SEPTEMBER, 1900.

Classes for Shire Horses, Agricultural Geldings, Hunters, Hackneys, Ponies, Leaping, Turn-Outs and Trotting.

General entries close SEPTEMBER 3rd; for Leaping, &c., SEPTEMBER 10th.

JOHN EVANS, Secretary.

24, Broad Street, Welshpool.

HITCHIN FOAL SHOW and SALE.

TUESDAY, SEPTEMBER 18TH.

CHARLES CROUCH, Secretary.

Ridgmont, Aspley Guise, Beds.

NEWBURY HORSE SHOW.

TENTH ANNUAL SHOW, SEPT. 12, 1900. President, E. WINTHROP, Esq., Barton Court, Newbury.

ABOUT £374 IN PRIZES.

H.I.S. and S.H.S. Gold and Silver Medals.

Schedules, etc.,

F. ROBINSON, Asst. Sec. Broadway, Newbury.

AGRICULTURAL EDUCATION.

UNIVERSITY COLLEGE OF NORTH WALES, BANGOR.

A constituent College of the University of Wales AGRICULTURAL DEPARTMENT. IN COLLEGE COURSES. 1. A complete course in theoretical and practical Agriculture extending over two years, and suitable for farmers and land agents. 2. Advanced course for a third year in Agricultural Chemistry. 3. Short course of eleven weeks, commencing in October and consisting of Agriculture, Chemistry, Bookkeeping, and Land Surveying. The degree of B.Sc. in Agriculture of the University of Wales may be taken by students who pursue a three years' post matriculation course of study at the College. LLEDWIGAN FARM (300 acres) has been taken by the College for teaching and experimental purposes. Diploma (two years) and Degree (three years) students will in future follow courses for at least one year at the farm under the supervision of the Professor of Agriculture. Special arrangements will be made to take farm pupils for practical instruction only. The College is recognised by the Surveyors' Institution as a place of approved professional instruction for land agents. The cost of board and lodging, with tuition fees, varies from £30 to £40 for the College year. The Scholarship examination will commence on September 18.

Prospectus, with full particulars as to Scholarships and Diplomas, may be obtained from JOHN EDWARD LLOYD, M.A., Secretary and Registrar.

July 17th, 1900.

ROYAL (DICK) VETERINARY COLLEGE, EDINBURGH.

Trustees: The Lord Provost, Magistrates, and Town Council of Edinburgh.

J. R. M. DEWAR, F.R.C.V.S., Principal.

SEVENTY-EIGHTH SESSION commences OCTOBER 2nd, 1900.

The INAUGURAL ADDRESS will be delivered on October 3rd by Sir JOHN GILMOUR, Bart., of Montrave.

For Prospectus apply to the Principal.

THE YORKSHIRE COLLEGE, LEEDS, AND THE MANOR FARM, GARFORTH.

Complete Course of Agricultural Education. Lectures in College and at the Farm from October to March. Special provision for practical instruction. Fee, £10. Students are prepared for the N.D.A. Examination. There is also a special course for the B.Sc. Degree.—Prospectus from the REGISTRAR.

AGRICULTURAL COLLEGE, UCKFIELD, SUSSEX,

With Farm and Complete Equipment for Home and Colonial Farming. Successful preparation for outside examinations.

PRINCIPAL . . . W. J. MALDEN.

EDINBURGH UNIVERSITY AGRICULTURE COURSE.—For prospectus, regulations for degree of B.Sc., and for Garton Lectures on Colonial and Indian Agriculture, apply, CLERK SENATUS.

COUNTY COUNCIL OF KENT COUNTY COUNCIL OF SURREY

South-Eastern Agricultural College, Wye, near Ashford, Kent. This Residential College gives a complete Scientific and Practical Training to future Farmers, Land Agents, etc. Preparation for the Examinations for the National Diploma in Agriculture and the Surveyors' Institution. Resident Staff of seven Professors and Lecturers. Farm of 270 acres. Next Term begins October 1st.—For Prospectus and further particulars apply to the Principal, A. D. HALL, M.A., late Scholar of Balliol College, Oxford.

AUCTION SALES.

SALES OF PURE BRED STOCK

JOHN THORNTON & CO. will SELL by AUCTION as follows:—

THURSDAY NEXT, SEPTEMBER 13.—The MARQUIS OF EXETER'S SHORTHORNS at Burghley House, Stamford.

FRIDAY NEXT, SEPTEMBER 14.—Mr. JOHN COOPER'S SHORTHORNS, at East Haddon, Northampton.

WEDNESDAY, SEPTEMBER 19.—Mr. DAVID MUTTON'S JERSEYS, at Plumpton, Sussex.

THURSDAY, SEPTEMBER 20.—Mr. S. A. LEIGH'S JERSEYS, some SOUTHDOWN YEARLING EWES, and choice BERKSHIRE PIGS, at Frog Firle, Lewes.

FRIDAY, SEPTEMBER 21.—The late Mr. R. DEWHURST'S SHORTHORNS at Shelford House, Burton Hastings, Nuneaton.

REGISTER OF BRITISH LIVE STOCK BREEDERS.

HORSES.

HACKNEYS.

MOORE, HENRY, Burn Butts, Cranswick, Hull. — Pedigree Stud of HACKNEYS, including many prize-winners; yearlings, two years, and others.—Can be seen on application to Henry Moore.

HACKNEYS.—JOHN N. ANTHONY, Sedgeford, near Lynn, Norfolk, breeder of Pedigree Hackneys. On hand, Colts and Fillies by most of the leading sires.

LLOYD, WALTER, Heaselands, Hayward's Heath, Sussex.—Small but select Stud of PEDIGREE HACKNEYS, Mares, Fillies, and Colts of best blood, including stock by Champion Ganymede, Agility, Winnal Fireaway, Model II., and other noted Stallions, at moderate prices. Appointments to view the stud (which is 1½ miles from Hayward's Heath Station, L.B. and S.C. Railway), on application to the owner, as above.

CLEVELANDS

HORSFALL, F. WILSON, Potto Grange, Northallerton.—Breeder of pure-bred CLEVELAND BAY and YORKSHIRE COACH HORSES. This stud has won far more prizes than any other again this year, and has won twice as many as any other during the last fifteen years with Clevelands. Many Royal and Great Yorkshire prize-winners for sale. One of the Stud Horses is Champion Broomgrove Pride 1249—first and champion R.A.S.E. Show, Maidstone, 1897; first R.A.S.E. Show, Birmingham, 1898; first and champion Great Yorkshire, Leeds, 1898; only times shown; fee £5 5s. Also breeder of pure-bred Shorthorns. Bulls and heifers for sale. Amongst others added to this herd in 1899 were Daisy Perfection, Richmond Daisy, and Highland Daisy, all bought at the Duke of Northumberland's Sale, at 210 guineas, 72 guineas, and 72 guineas respectively. Also breeder of Sussex black pigs, and several breeds of white poultry.

SHIRES.

MUNTZ, P. ALBERT, M.P., Dunsmore, Rugby. — SHIRE-BRED STALLIONS, COLTS, MARES, and FILLIES. About a hundred of all ages. Prize-winners London and other leading shows. Also high-class Shropshire SHEEP, winners first prize at Royal Agricultural, 1886, second in 1887, and first in 1888.—Apply, THOMAS EWART, Dunsmore Farm, Rugby.

CONCHAR, JOHN, Wylde Green, Birmingham.—Breeder of SHIRES and HACKNEYS. Some gold Colts and Fillies for Sale. Five minutes from Station.

TAUNTON, H. PERCY, Redlynch, near Salisbury, Wiltshire. Shire-bred STALLIONS MARES, FILLIES, and GELDINGS of the most fashionable breeding always for sale at moderate prices. The animals are kept entirely out of doors and in natural condition.

PONIES.

THE LARGEST STUD of SELECTED WELSH PONIES IN WALES.—Dinarth Hall Pony Stud Farm, Colwyn Bay, North Wales. Over 120 Ponies now on hand, including forty Brood Mares of the pure Welsh type, and several high-class Ponies, great goers, with style and action. 150 prizes won in 1898 and 1899. Ponies purchased from this Stud have won first prizes at Manchester, Birmingham, and Maidstone Royal Shows; also first and medal Crystal Palace, 1899. Sale in 1899 included two Entire Ponies purchased by the Government for Cyprus, several to America and France. Stud Horse JULIUS CÆSAR II. 5666, sire of first prize two-year-old pony filly, the first of his produce exhibited, London Hackney Show, 1900.

MILLER, W. S., Forest Lodge, Brecon, S. Wales, extensive Breeder and Exporter of the best class of WELSH MOUNTAIN PONIES and COBS. References and particulars on application.

MONTEFIORE, Rev. D. B., Mursley, Winslow, Bucks.—Prize PONIES always FOR SALE. Arab Polo Pony Stallion "Mootrub" (32), winner of a championship, silver medals, and many prizes. Particulars on application.

CATTLE.

HOME FARM, WOKEFIELD PARK,
Five miles from Reading.

IMPORTANT UNRESERVED AGRICULTURAL SALE.

SIMMONS & SONS are favoured with instructions from HERBERT C. ALLFREY, Esq., to SELL by PUBLIC AUCTION, on the Premises, on FRIDAY, SEPTEMBER 21ST, 1900, the whole of the valuable
LIVE AND DEAD FARMING STOCK,
including
26 GRAND CART HORSES AND COLTS (several of which are fit for London work), the celebrated Entire Horse WOKEFIELD WILLIAM, one of the best Shire Breeders in England.
101 HEAD OF CATTLE
(chiefly high-class two and three-year-old cross-bred Bullocks and Heifers, for which the Home Farm has long been famous),
210 HAMPSHIRE DOWN SHEEP,
50 SWINE, AND 100 HEAD OF POULTRY,
and a first-rate assortment of
AGRICULTURAL IMPLEMENTS,
including 17 capital Carts in excellent order, Cattle Cart, Pig ditto, 2 Reapers and Binders, good Drill, 5 Rolls, 7 Ploughs, 4 Mowing Machines, Sets of Harness, Harrows and Drags, Timber Carriage and Timber Bob, etc., etc.

Full particulars in future advertisements, and of the Auctioneers, Blagrave Street, Reading, Henley-on-Thames, and Basingstoke.

N.B.—No lots can be included in this Sale.

THURSDAY, SEPTEMBER 13, next.
APPLESHAM FARM, SHOREHAM, SUSSEX.
About 2½ miles from Shoreham and Lancing Stations, L.B. & S.C.R.
Highly important SALE of SHEEP and DAIRY CATTLE.

MR. C. STRIDE has been favoured with instructions from Mr. WALTER WHITE (who is quitting and relinquishing farming) to SELL by AUCTION on the farm on the above date, the whole of his well known hill flock of DORSET DOWN SHEEP, consisting of about 1,500 EWES and LAMBS in ages as follows:—
219 two tooth ewes,
196 four tooth ewes,
179 six tooth ewes,
204 full mouthed ewes,
325 ewe lambs,
335 Wether lambs, rams and ram lambs.
This flock has been in the White family for seventy years, and since being brought into Sussex from Dorsetshire by Mr. Walter White ten years ago, has been crossed with the Southdown.
The Ewes are very prolific and hardy of constitution, possessing the quality of the Southdown with greater size and scale. They will be sold in their natural condition, and work on the Downs for their living until day of sale.
Together with
48 GRAND HEAVY MILKING DAIRY COWS AND HEIFERS,
all with calves at foot or due to calve.
All the above cows and heifers are a Shorthorn and Hereford cross, were bred on the farm from cows specially selected for their milking qualities, and are well worth the attention of buyers.
The remainder of the Dairy Stock, with the Horses and tackle, will be sold on THURSDAY, SEPTEMBER 27 next.
Sale to commence at 1.45 with the Cows.
Luncheon obtainable on the premises.
Catalogues of the Auctioneer, Auction and Estate Agency Offices, 63, East-street, Chichester.

MONDAY NEXT, SEPTEMBER 17TH, 1900.

TENDERS.

ARMY CONTRACTS.

FORAGE AND PAILLASSE STRAW.

SEALED TENDERS for the SUPPLY of FORAGE and STRAW for Paillasses, for Military Services, during six months, from the 1st NOVEMBER, 1900, will be received until 12 o'clock noon, on WEDNESDAY, the 26th day of SEPTEMBER, 1900, by the Officers in charge of the undermentioned Districts:—

Scottish District	Edinburgh.
North Eastern District	York.
North Western District	Chester.
Western District	Devonport.
Southern District.....	Portsmouth.
South Eastern District	Dover.
Eastern District.....	Colchester.
Thames District.....	Chatham.
Woolwich District ..... (omitting Oats and Hay)	Woolwich.
Home District	23, Carlton House Terrace, S.W
Aldershot District..... (omitting Hay)	Aldershot.

Forms of Tender and Conditions of Contract may be obtained on application at the above-named District Headquarter Offices, by letter addressed to the Assistant Adjutant-General, or in person between the hours of Ten and Four o'clock, and no Tender will be entertained unless made upon the form so obtained.
The Tenders must be properly filled up, signed and dated; and no Tenders will be noticed unless delivered in time, at the above-named District Offices, under sealed envelope, marked "Tender" on the outside.
A. MAJOR,
Director of Army Contracts.
War Office, Pall Mall, S.W.,
September, 1900.

BOROUGH OF SHOREDITCH.
HORSE PROVENDER.

TENDERS are invited for the supply of CLOVER, OATS, BRAN and MAIZE, for three, six, or nine months from SEPT. 29th, 1900, for about fifty Horses.
Sealed Tenders on forms to be supplied accompanied by marked samples, endorsed "Tender for Provender," to be sent to the undersigned not later than Wednesday, Sept. 19th, 1900, at noon.
(Signed), H. MANSFIELD ROBINSON,
Solicitor and Clerk.

TENDERS.

TENDERS FOR FLOUR.

THE CONJOINT FLOUR COMMITTEE of the Spanish and Portuguese Synagogue and the United Synagogue are about soliciting TENDERS for the supply of about 1,600 to 1,800 sacks of best HOUSEHOLD FLOUR, to be made of sound English Wheat, the Flour to be delivered free of all charges in such quantities and at such times and in such places in London as may from time to time be directed.
The grinding of the Flour must begin about the end of October, and be completed within six weeks, a mill being exclusively set aside for the purpose. The preparation of the mill, as well as the grinding of the Flour, will have to be carried out under the superintendence of the Jewish Ecclesiastical Authorities.
Millers desirous of tendering can obtain full particulars and copy of form of tender on application to Mr. P. Ornstien, Secretary of the United Synagogue, 2, Charlotte Street, Portland Place, London, W.
No Tender will be received after three o'clock in the afternoon of Thursday, the 20th September, nor unless made on the printed form provided for the purpose. The committee do not bind themselves to accept the lowest or any tender.
Sept. 6th, 1900.

CONTRACTS FOR WHEAT FLOUR AND WHOLEMEAL.

THE PRISON BOARD is prepared to receive TENDERS for the supply of the above to the following prisons, viz.:—
Aylesbury, Bedford, Birmingham, Bodmin, Bosttal, Brecon, Bristol, Cambridge, Canterbury, Cardiff, Carlisle, Carmarthen, Carnarvon, Chelmsford, Dartmoor, Derby, Devizes, Dorchester, Durham, Exeter, Gloucester, Hereford Holloway (with Newgate), Hull, Ipswich, Knutsford, Lancaster, Leeds, Leicester, Lewes, Lincoln, Liverpool, Maidstone, Manchester, Newcastle, Northallerton, Northampton, Norwich, Nottingham, Oxford, Parkhurst, Pentonville, Plymouth, Portland, Portsmouth, Preston, Reading, Ruthin, St. Albans, Shepton Mallet, Shrewsbury, Stafford, Swansea, Usk, Wakefield, Wandsworth, Warwick, Winchester, Worcester, Wormwood Scrubbs, and York.
Forms of tender, with all necessary particulars, can be obtained at any of the prisons, or at the Prison Commission Office, Home Office, Whitehall, London, S.W., where also samples may be seen.
Tenders must be delivered at the Prison Commission Office, prepaid, not later than noon on Tuesday, the 18th of September, 1900.

METROPOLITAN CATTLE MARKET, ISLINGTON.
CONTRACT FOR HAY, STRAW, CLOVER MIXTURE, OATS, AND BRAN.

THE CATTLE MARKETS COMMITTEE of the CORPORATION of LONDON will meet at GUILDHALL, on WEDNESDAY, the 19th SEPTEMBER, 1900, at half-past two o'clock p.m. precisely, to receive TENDERS for the supply of the finest upland ENGLISH MEADOW HAY, STRAW, CLOVER, ENGLISH MIXTURE, RUSSIAN OATS, and BRAN, to the Metropolitan Cattle Market, Islington, for a period of TEN MONTHS, from 25th November next to 25th September, 1901.
A printed form of tender, with conditions, may be had on application at the Town Clerk's Office, Guildhall, or at the Office of the Clerk and Superintendent at the Market.
The Committee do not bind themselves to accept the lowest or any Tender.
Tenders must be delivered by hand at the Hall-keeper's Office, Guildhall, on Wednesday, the 19th September, 1900, between the hours of half-past One and half-past Two o'clock.
MONCKTON.
Guildhall,
September, 1900.

BREAKFAST—SUPPER.

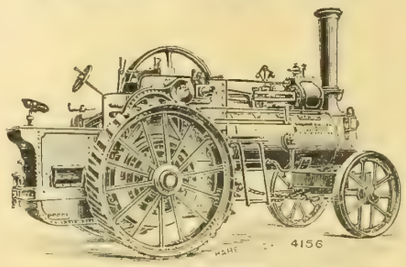
PARIS EXHIBITION, 1900.—GRAND PRIZE AND GOLD MEDAL.

RANSOMES, SIMS & JEFFERIES,

MANUFACTURE LTD.,

THE BEST THRASHING MACHINERY,

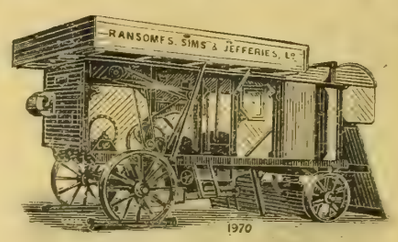
TRACTION ENGINES.



THESE Engines are well proportioned, simple, and easy to manage, and are suitable for drawing and working Thrashing Machinery, for Steam Cultivation, Sawing, Pumping, etc.

FINISHING THRASHING MACHINES SUPPLIED TO HER MAJESTY THE QUEEN AND H.R.H. THE PRINCE OF WALES.

These Machines produce a perfectly uniform sample of full-size grain, free from tail corn, and make all the usual separations in the most perfect manner.



Complete Illustrated Price Lists free on application to—

ORWELL WORKS, IPSWICH.

MACKINDER'S PORRIDGE MEAL FOR WEANING CALVES.

Price 11s. per cwt., free at all Stations.

See directions for use. Testimony from every county.

Wm. Joscelyn, Esq. (Suffolk), writes:—"I find my calves do better on your Porridge Meal than anything I have ever used."

Mr. Harry Fidler (Wilts) writes:—"Your Porridge Meal keeps calves remarkably clean, mastering the one great difficulty in calf-weaning."

Order through Merchants, Chemists, or direct from

MACKINDER'S LAMB FOOD MILLS, LINCOLN.

Best are Cheapest.

J. RANDS & JECKELL'S COVERS

FOR WAGGONS, ENGINES, AND MACHINES

Are guaranteed Rot-Proof and Waterproof. Experience has proved them to be "The Best in the Market."

It will answer your purpose to procure Samples, Prices, and Testimonials before placing order elsewhere.

Any size to order made up complete with Brass Eyelets and Cords. Quality A, 2/6; B, 3/-; C, 3/6 per sq. yard.

Five per cent. discount for Cash. Carriage paid on orders of £2.

J. RANDS & JECKELL, IPSWICH.

SACK, RICK CLOTH, & TENT MANUFACTURERS.

By Special Royal Warrant to H.R.H. the Prince of Wales.

SILCOCK'S CALF MEAL

CALF REARING.

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 *per cwt., carriage paid. 5 cwt. lots,* 12/-.

BIBBY'S

"CREAM EQUIVALENT"

for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.
One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."
We asked our readers to tell us which of these groups were fed on New Milk and 507 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."
The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

FLOCK DECADENCE.

The most regrettable feature in the preliminary statement of the Agricultural Returns of Great Britain is the decline in the number of sheep found in the country last June, compared with those recorded either in 1899 or 1898. It may be said that the shrinkage appears to be no greater than was expected, inasmuch as for several decades fewer sheep have always been wintered after bad turnip seasons, and the crop of 1899 was not merely an indifferent one but a complete failure in many places. The actual decrease from the return of 1899 is 646,528, from 27,238,754 to 26,592,226, or 2.4 per cent. When we take into consideration the fact that the average number of sheep in Great Britain was, taking the decade 1867 to 1877, about two millions over our return of the present year, matter for very grave reflection presents itself to our attention. The return of 1867, the first year of agricultural returns being gathered, gave the number of sheep as 28,919,101, and ten years later it stood recorded as 28,161,164. Those disastrous years 1879 and 1880 brought that terrible plague, liver rot, to sweep off entire flocks of sheep, and the decline in numbers was shown by the statistics of 1882 to have brought down the return of that year to 24,319,768. Ten years later, however, in 1892, the recovery had been very nearly great enough to make the British flocks once more approach approximately to the high standard of the sixties and seventies, for it was 28,734,704. This circumstance is particularly noteworthy, proving as it does incontestably, that it has not been agricultural depression, or the changes in systems of farming caused thereby, which have caused the enormous declines in sheep numbers of recent years, but the very considerable proportion of drought summers and bad turnip years which have been experienced since 1892.

In his preface to the returns of 1893, Major Craigie wrote as follows:—"Turning to sheep, which had in 1892 again reached the average level of 1871-5, although it had not quite arrived at the high-water mark of sheep farming of 1873-4, it is matter of regret rather than surprise to find that sheep farmers have not been able to maintain the advance in 1873, but have had to confess to a serious diminution in their flocks." The severity of the drought summer of 1893 caused the number returned the following June to be only 25,861,500. The return was still less in 1895, but the following year there came once more a considerable increase, entirely attributable to a better turnip season. Then another drought summer led to fluctuation in the reverse direction, but advances were once more shown by the returns of 1898 and 1899, British flocks in the latter year swelling to 27,238,754. Now, however, we have to confess to a most humiliating revelation of the state of things, inasmuch as we must go back five years, to 1895, to find a less number of sheep recorded.

We will explain why the sustentation of flock numbers to their normal standard ought not to depend so much on the realisation of a good turnip crop as it has been made to do in the past. Major Craigie, in prefacing the returns of 1894, had to admit a loss of near three million sheep in two years, but he offered the following consolation for the deplorable result: "It is to be remembered that the numbers of sheep have always been subject to considerable variation, and if the 25,862,000 now returned are from four and half to five millions under the record of the exceptional years of 1874 and 1868 the present total is still larger than the flocks of 1882 by more than a million and half."

But although the flocks of Great Britain have fluctuated to this enormous extent in the past, there appears to be not the slightest reason why they should be permitted to do so in the future. All the most intelligent, careful, and skilful flockmasters avoid such severe fluctuations, or, in other words, are not subject to them, simply because they take precautionary measures to prevent the failure of one crop from causing so great a calamity as the partial unstocking of their farms. They grow more cabbages, mangels, thousand-headed kale, and kohl rabi than the generality of their fellow farmers, and, by not carrying all the eggs in one basket, manage to avoid the evil which, in very truth, has proved utterly ruinous to vast numbers. The drought summer of 1899, so far from being fatal to the winter fodder crops last named, caused them to produce fairly good returns. Those who had most of them were not only best off, but found themselves able to keep their usual numbers of sheep throughout last winter, without the slightest diminution.

But there is yet another way by which the evil might be entirely overcome, which is by growing many more ensilage crops and making considerable provisions of silage to take the place of turnips in those winters when they prove so very scarce. Investigation into circumstances will show that a great many fresh green crops for silage could be grown without displacing any raised at present. For instance, thousands of acres of stubble lands, which now remain totally barren or merely weed-growing from harvest until June, and sometimes July, might be made to produce an ensilage crop of trifolium, vetches, rye, winter barley, or winter oats, without drawing much nutriment from the soil or damaging the prospects of the turnip crop intended to be raised. If this were done at all generally, and such catch crops were cut in May and June, and placed green into ensilage stacks, such large provisions of winter food would be made that we should no longer hear of flocks diminishing by the million owing to failure of turnips.

There is one item in the preliminary returns just published of a rather puzzling nature. The lambs are fewer than the ewes, for whilst the latter are 10,350,326, the former are only 10,278,031. How, then, can the fact of there having been in June last 72,295 fewer lambs than breeding ewes be accounted for? There might have been more lambs fattened than usual, and sent to the shambles last spring, perhaps, but presumably not to this extent. The lambing crop was certainly not so prolific as it is sometimes, but there were a great many twins in some flocks, and no one entertained the supposition that there were fewer lambs than ewes on the aggregate. The return of June, 1899, showed 278,480 more lambs than ewes, and that of 1898, 2,503,472 more. In every previous year since 1895, when the ewes were first given separately, the lambs have exceeded them.

SAMPLES.

By a Man of Mark Lane.

The Secretary for War, I am informed, has directed that the provisions of the War Office letter of March 31st, relating to furloughs for Militiamen, to enable them to take part in harvesting work, may be extended to any men whose services are urgently required by employers of labour. The total number of furloughs granted for all purposes must not, however, exceed fifty per cent. of each unit; and the conditions laid down in the War Office letter referred to will be applicable to all.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to September 1st, 1900, were £41,988,663 against £42,188,660 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £71,704,657 against £44,404,578 to the same date in the previous year. The Treasury balances on September 1st, 1900, amounted to £5,212,852, and at the same date in 1899 to £3,703,975.

The Board of Trade (Customs) returns for the past month show, on the face, satisfactory results; but considerable allowance has to be made for the inflation of prices, which have largely increased values of both raw materials and manufactured articles. Our home exports for August were valued at £24,984,000, an increase of £2,726,000 upon those for the corresponding month of last year, or nearly 12¼ per cent., while the total for the year so far shows an increase of nearly 12¾ per cent. Imports were valued at £42,097,000, an increase of £1,403,000, or over 3½ per cent., making the average augmentation for six months 6½ per cent. Re-shipments represented a total of £5,409,000, an increase of £355,000, equal to fully 6 per cent., but the result for the whole period is a fractional decline compared with last year.

The exports for the month, according to the summary, show an increased value of £1,627,000 in raw materials (chiefly coal and wool), and, as regards manufactures, yarns and textile goods have fallen off to the extent of £684,000, due to the stoppage of the China trade, and machinery and millwork record a slight reduction, but other branches, including metals and metal manufactures (£933,000), new ships (£234,000), apparel, chemicals, and other articles, all show improvement.

Of imports, with the exception of reductions in tobacco, chemicals, and (happily) manufactured articles, the summary exhibits expansion chiefly in articles of food and drink, whether duty free or dutiable, metals, and raw materials for sundry industries. As regards the imports of corn, those of wheat for the month were rather smaller, but the value greater, at £2,264,000, and the quantity received since last harvest (say September 1st) has been 15,170,000 quarters, against 15,630,000 quarters in the preceding twelve months. As to the export of spirits and beer and ale, the increase in the former has been chiefly to South Africa, and the decline in the latter mainly to the exports of spirits and beer and ale, the States, South Africa, and Australia have taken more.

Dr. Timbrell Bulstrode, one of the members of, and Mr. Charles J. Huddart, secretary to the Food Preservatives Committee, have, during the past month, visited Amsterdam, Hamburg, nd various places in Denmark, for the purpose of studying the dairying industry and the methods of transport of dairy produce, with special reference to the milk and butter supplies in Holland, Germany, and Denmark, and the butter export trade, in relation to the use or non-use of chemical preservatives. The commissioner and the secretary are proceeding to Ireland during the present week with a like purpose in view, and propose to give special attention to the south and west of Ireland, although visits will also be paid to the Province of Ulster in the same connection. The committee will probably spend the rest of the month in their study of the above matters in Ireland prior to reporting.

THE DAIRY.

Canada and English Cheesemaking.

The Minister of Agriculture for the Province of Quebec, Canada, has recently been examining into the manufacture of cheese in the province. Believing that there were certain defects in the method of manufacture now followed in the province, he has referred the matter to a special commission. After carrying out certain experiments in Quebec, the manufacturer and chemist in charge of the investigation have come to England to seek the co-operation and assistance of Mr. F. J. Lloyd, whose "Report on the Manufacture of Cheddar Cheese," recently published by the Board of Agriculture, had attracted the attention of the Minister of Agriculture for Quebec.

Mr. E. Bourpeau and Mr. G. Henry, who are carrying out this inquiry, have paid a visit of several days' duration to the cheese school of the Bath and West of England Society, where they have had the double advantage of not only seeing the cheese made by the instructor, Miss Cannon, but of meeting Mrs. Sage, who, as the previous teacher at the school, carried out all the practical part of the many investigations made by Mr. Lloyd between 1890 and 1898.

Messrs. Bourbeau and Henry have also visited Mr. James McAdam at Castle Douglas, who is preeminent as a maker of Scotch Cheddar. Mr. McAdam's system is similar in the main to that used in Canada, but has been greatly modified as a result of the exceptional experience, skill, and study which he has devoted to this industry. By the changes which have been so introduced, an attempt has been made to overcome some of the defects of the Canadian system, and the commissioners were keenly interested in both the operations and conversation of their genial host.

Messrs. Bourpeau and Henry will remain in England for some time, in order to complete their investigations. Among other things they are remaining to examine some experimental cheeses made by them in Canada before they left, and which are expected to arrive in England shortly. This enterprising action on the part of the province of Quebec shows how keen is the desire of our colonies to take every step that may lead to progress, and there can be no doubt that the cheese-makers of the province will reap a rich reward. That Canadian cheese can ever hope to compete with the best home-made article is not probable; but that it may take the first place among imported cheese is possible and not unlikely.

Cheese Fairs.

The annual fair for summer-made cheese was held at Ashbourne on Tuesday. There was a larger pitch than usual, over 10 tons—all Derbys—and the quality all round was very fair. Business ruled flat throughout, very few buyers being present, and only a few lots changed hands; the highest figures did not exceed 50s. to 55s. per cwt. The general figures realised were from 40s. to 50s. At the close a number of dairies returned home unsold.

At Nantwich, on Thursday, was held the monthly chees fair. There was for sale 55 tons, or about an average for September. There was a considerable attendance of buyers, and in a little over an hour a clearance was effected, at an advance of 10s. per cwt. over the rates quoted last month. Fine Cheshire realised from 62s. to 67s., and medium qualities 52s. to 60s. per cwt.

PRACTICE WITH SCIENCE.

The Hadlow Experiments.

On Tuesday last the members of the Permanent Nitrate Committee paid their annual official visit to the agricultural experiment station conducted by Mr. F. W. E. Shrivell, F.L.S., at Golden Green, Hadlow, Tonbridge, under the direction of Dr. Bernard Dyer.

The experiments, which have before been described in our columns, are now in their seventh year, and some thirty different kinds of vegetables and fruits are kept constantly under cultivation and observation, with a view to studying the most economical methods of manuring them. Each kind of vegetable has allotted to it annually a space of nearly one-eighth of an acre, subdivided into six plots, each measuring one-fiftieth of an acre in area. Two of these plots are annually treated with London dung alone, at the rate of twenty-five loads (about 12½ tons) per acre on one plot and fifty loads (about 25 tons) per acre on the other, without the addition of any chemical fertilisers. Of the other plots, three receive the lighter dressing of dung, with the addition of phosphates and quantities of nitrate of soda, varying in different cases from a minimum of 1 cwt. to a maximum of 6 cwt. per acre. One plot on each section receives no dung, but merely an annual dressing of chemical fertilisers. All the plots on which phosphates and nitrate of soda are used, with or without dung, are again subdivided into two, one-half receiving a dressing of some form of potash salts, the other half being left undressed with potash.

Year by year the results of the experiments show that the use of heavy dressings of purchased dung entails an extravagant outlay and produces far less satisfactory results than a judicious combination of a lighter dressing of dung with chemical fertilisers; while in some cases—as, for example, Brussels sprouts—it has been year after year demonstrated that it is more economical to rely upon chemical fertilisers and dispense with dung altogether. The most economical chemical dressings to combine with dung are found, as might be expected, to vary for different crops. During the first six years the seasons were for the most part dry, but this year the summer has been wetter, and the plots look, perhaps, better than in any previous year.

In our brief notice of last year it was mentioned that a number of fruit plots were planted, such as plums, black and red currants, raspberries, and gooseberries. The fruit trees being yet young, it is early to say much about the effects of manures, but the chemical dressings certainly give increased colour to the foliage, and the active life of the leaves appears to be prolonged; for, where dung alone is used, the leaf is often already yellow and dropping off. More wood, too, is apparently being made where chemical fertilisers are used, as compared with the plots getting dung alone.

The summer lettuces look particularly fine this year. Hundreds of the lettuces already cut have weighed over 3lbs. each, and the quality as regards tenderness and crispness is most remarkable where the produce has been grown rapidly with the aid of phosphates and nitrate of soda, as compared with dung alone. The onion crop, both as regards winter or tripoli onions and as regards summer onions, is exceptionally fine, and both these crops show very markedly the value of the chemical manures used in conjunction with dung. The main crop potatoes at present show very markedly in their foliage the effect of the heaviest dressing (4cwt. per acre) of nitrate of soda. The tops are still green and growing vigorously, whereas on the plots receiving dung alone without chemical fertilisers the tops are ripening off. From the aspect of the haulm—which, however, cannot always be relied upon- it would appear as though the heaviest dressing of nitrate of soda will give a very much greater crop of potatoes than where fifty loads of dung per acre are used. The effect of the chemical dressings is also shown very markedly on Brussels sprouts, cauliflowers, and cabbages, the leaf development in all cases being most strikingly greater, where nitrate of soda and phosphates are used, than on the merely dunged plots. The celery crop, too, is very fine this year, even on the plot receiving only chemical fertilisers, which, in the case of this crop, is this year receiving—in addition to a large dressing of phosphates—as much as 8 cwt. of nitrate of soda per acre. The beetroots on the phosphated and nitrated plots are far larger and better developed than on the most heavily dunged plot.

Adjoining the vegetable plantations is a series of plots of lucerne, which have been down for some years, and of which Dr. Dyer contributed an account to the current number of the Journal of the Royal Agricultural Society. The effect of nitrate of soda on this crop has been year after year very striking, and the results are attracting a good deal of interest. The discovery, made some years since, of the power of leguminous plants to assimilate directly, through the micro-organisms of their root nodules, the free nitrogen of the atmosphere, thus rendering them capable of reaching maturity independently of the supply of combined nitrogen, whether from the soil or from manure, has led many people to the too hasty conclusion that leguminous crops, owing to their potential independence in this respect, are necessarily unresponsive to nitrogenous manure. This is not the case, and ample evidence has been furnished, at Rothamsted and elsewhere, that leguminous plants, although they undoubtedly gather nitrogen from the air, do also absorb, in the ultimate form of nitrates, the combined nitrogen existing in or supplied to the soil. There are at Hadlow four lucerne plots, one receiving phosphates and potash salts only, the other three receiving phosphates and potash salts with dressings of nitrate of soda varying from 1 cwt. to 4 cwt. per acre. By far the best plot hitherto has been that receiving only 2 cwt. of nitrate of soda per acre. The plots have been already twice cut this year, and on the occasion of the recent visit the third crop was still standing, and the superiority of the plot receiving 2 cwt. of nitrate of soda per acre over the other plots was strikingly manifest. These results have led Dr. Dyer and Mr. Shrivell to add peas and beans this year to their vegetable experiments. The result is that nitrate of soda has proved for French beans to be a valuable addition to dung, phosphates, and potash salts. Where no nitrate of soda was applied, but merely dung, phosphates and potash salts, the beans are over, and the leaves have died off: but where 2 cwt. of nitrate of soda per acre has been used in addition to the other dressings beans are still being picked, and Mr. Shrivell roughly estimates that the produce will be probably double that of the plot receiving no nitrate of soda. In the case of peas, although the nitrate of soda has produced a marked effect on the growth, no such striking difference will appear in the yield. These experiments will be repeated next year.

Mr. Shrivell is an extensive hop farmer, and on another field on his farm is the now well-known experimental acre of hops, the results from which have been year by year chronicled in these columns. Although Mr. Shrivell's hops, like others of the neighbourhood, have passed through a very severe attack of aphis, persistent washing and careful treatment have pulled them well through. On the experimental plots the effects of manuring are very strongly visible. One experimental plot receives dung alone, and the produce here is obviously exceedingly small compared with that of the plots receiving 4 cwt., 6 cwt., and 8 cwt. of nitrate of soda per acre, with phosphates and potash, but without dung. The plot grown with phosphates and potash salts alone, without any nitrate of soda, depending simply upon the natural nitrates of the soil, shows, as usual, the smallest crop of all. The plots, like the rest of the garden and the other gardens on the farm, now look throughout very healthy and clean. The hops throughout the farm, apart from the experimental acre, have this year been dressed with dung, phosphates, and 3 cwt. of nitrate of soda per acre. The quantity of the last-named fertiliser is decidedly smaller than that which has hitherto produced the best effects on the experimental acre, but it is to be borne in mind that the nitrated plots on the experimental acre receive no dung at all, while Mr. Shrivell is this year using dung throughout.

It may be added that Mr. Shrivell is always pleased to show the experimental plots to visitors, who should, however, write beforehand to enable him to make an appointment. Golden Green is between four and five miles from Tonbridge Junction station.

Mr. Rider Haggard on "Town v. Country."

The following letter has been addressed to the *East Anglian Daily Times* by Mr. H. Rider Haggard:—

Sir,—At the end of your article to-day on the growth of London and the depletion of rural East Anglia you ask "Why should not Mr. Rider Haggard become a seer?" Well, for what it is worth, here is the vision.

Unless this exodus from the country to the towns is stopped, or greatly checked, the decadence of England—gradual or sudden—is not far off. It may be said that even if this island ceased to be great, her colonies and dependencies would still flourish. Perhaps, but of what use is it to the withered heart that the toes and fingers have developed an individual life? Already those who run may read signs and tokens of this national decadence. What else, for instance, is the love of excitement that has become so universal? What the loud-voiced boasting and the passion for exaggeration? What the contempt for that which is old-fashioned, and steady-going, and dull? Does it not mean that already the nervous system of the people has been weakened by city life, and by those things which come from cities? And when the nerves are shaken or shattered, for how long will the body remain sound? And when the collective body ceases to be sound, how will it face the gathered enmity of jealous Powers, and uphold the vast burden of Empire under which it labours? Providence made man to dwell upon the land, and thence by his pure and honest daily toil to win food for himself and his offspring, and with that food, strength, health—a mind, slow, perhaps, but not easily disturbed even in the worst shocks of private or public woe, reverence for the works of Nature, and, through them, for Him by whom they were created; and last, though not least, unfailing fecundity, that strength of nations, the lack of which brings them to gradual yet certain ruin. But the Englishman of to-day deserts the country and crowds into the town. What he finds there, we know; and what the fruits of his finding to the people and to the individual are, and must be, we know in their full calamity, or if we do not, the lesson is written large in the records of the human race. What we do not know is how that calamity may be averted.

Yet, trying in some measure to fit myself to the seer's cloak which you are so good as to offer for my wear, I will venture a suggestion.

It will be noted that of late, more than in any former time, we have set up two great idols to worship—the Gog of Trade and the Magog of a somewhat immoderate Imperialism, which twain really are one idol. Trade follows the flag, therefore the flag must go everywhere, "even at the cost of war"—that is the argument—or one of them. In short, the flag is the source, not only of Empire but of wealth, the wealth which has become so necessary and admired among us that a man cannot even offer to represent his fellows in Parliament unless he is prepared to spend from one to two thousand pounds whilst searching for that arduous honour. The country of the trader has always been and must always be the country beloved by the luxurious rich; the country of the agriculturist, that of health, and rough, hard-won plenty, not of startling and unequal gains. We choose the first—Rome, not Sparta, is our model.

To apply these premises, this is my suggestion: that it should be pressed on Governments that in the end it will profit them nothing if they gain the whole world and lose their own land. The Gog of Trade may fall. A few more strikes, another ten shillings on the price of coal, a little more foreign competition, and what will happen to his feet of clay. The Magog of the new Imperialism, that of the spread-eagle variety, may prove unmanageable, and no longer feed the maw of his brother, Trade. But the home soil always remains to be the mother and the great precep or of those who tend it. Shall the earth that has borne so many generations of our island race cease to bear? Shall her kind breast be suffered to run dry? This, more than any other, is the vital question of our age. Yet we all know the stereotyped answer of the politician. "My dear sir, these are economic changes with which it is impossible for Governments to interfere."

I ask what is the use of a Government that will not or cannot face an economic change which, as men of reasonable intelligence, they must see is drawing their country into danger. But this no Government attempts, perhaps because they can see no remedy which would not interfere with the prospect of their obtaining votes at the next election.

Yet, as I think, there are remedies. "We repeat that our village life must be made more attractive." I quote from your own article. Well, how can it be made more attractive? To my belief in one way only by Ownership, the ownership not of the land but of the money. That which men own they love, by that which they love they will hide, leaving families who will love it also. In short, given such ownership as is present to my mind, the yeomanry which made England, but now is vanished, would out in the condition of affairs created by the conquering trader class, would rise again to keep her great. Of course the objections to such a remedy are obvious. Any such measures, involving as they must do capital outlay, would be unpopular with the great towns whose citizens want the money to spend upon their own enterprises, and wars such as has begun in China, which they hold to be necessary to the opening of new markets. Also it is urged that if they wish, men can take a farm; a very different thing, by the way, to owning the farm. Well, they can and do, often more readily than their means justify. One such poor man, getting into difficulties through an insufficiency of capital, hanged himself in a barn near my gate the other day.

Now, to come to the point. Under conditions and restrictions, which it is useless to elaborate here, I would have made it possible for that man, a worthy and hard-working person, to obtain, in place of a rope, the capital he needed, or even the money to purchase his little holding, should the owner be willing to sell; and, if not, another. In short, I suggest State aid for selected tillers of the land, in order to keep our population on the land, and to preserve our country from pressing and incalculable dangers.

Would it pay? For my part I think it would, since a small man, working with his family, can make a living, where the former, contending with an expensive and inefficient labour supply would starve. At the worst, the risk would not be overwhelming. I believe—though this is mere guesswork—that a hundred millions (about the cost of a single South African war) would cover the total cost of the experiment made on a large scale and for a period of years. If Governments can find money to settle soldiers in the Orange River Colony, why cannot they find it to settle them upon the unpeopled fields in, let us say, the Eastern Counties? Our interests in the Orange River Colony, with which we do a large trade in precious stones and other things, are great, but are not our interests in the English counties greater? A man is more precious than the gold of Ophir, said Isaiah long ago, and the remark still applies—even to the diamonds of Kimberley.

Sir, can none who have the strength to force a hearing be found to urge upon Governments dominated by our trader classes, and, in the main, elected by the voice of towns, to do the will of towns, the elementary fact that they are killing, or suffering to die of sheer neglect, the goose of rural life which lays the golden egg of a healthy and normal national manhood—that with the dwindling of the people country born and bred, will dwindle their own and their nation's prosperity, power, and renown, which cannot long draw vital and inspiring breath from the crowded streets of cities? I am, etc.,

H. Rider Haggard

Ditchingham, August 29, 1900.

An East Anglian Comment.

The *East Anglian Daily Times* makes the following useful—even valuable—remarks on Mr. Rider Haggard's letter above printed:—

We frankly confess that Mr. Rider Haggard's vision is clear, sane, and honest. Never have we printed a letter with keener appreciation than we publish the epistle which appears in our columns today. It is the letter of a man who, freeing himself from the paroxysm of the moment, has allowed his own prescience to indicate a clear and immediate danger. Aye, we emphasise this phrase—"a clear and immediate danger." This is too grave a subject to be made political capital of. It has too momentous an issue associated with it. It has been approached by Mr. Haggard in too reverential a [illegible] to be made the dail of the mere politicians, of the mere men with whom the science of government means only the success of party-dom. Yet whether this be politic-sm or not—and we protest this is not our purpose—his frank and knightly tilt against a false Imperialism which would rear a new Golgotha, and build up a false shrine of debt as glowing as an Eastern gin-palace in its fascinations, for the sake of adventurous piracy abroad, when the land at home is perished for want of the tool of sympathy—this must command the appreciation of all followers of the faith that makes for popular progress. His chivalrous demand for the establishment of a system (we pray he may not dislike our phrase, but it is an instance of personal perplexity as in harmony with the old time battle that besought in Parliament and out of it but a multiplicity of the privilege of ownership in the interest of the State. The leaders of Europe point too significant a lesson on this head to permit of even the most wanton of statesmen disregarding it. Denmark is too potent a factor in the supply of the daily necessities of this State—most of which could be supplied from this country—to permit of a heedless recognition of its importance. Thus Mr. Rider Haggard's protest against the policy which, framed only in the interest of the landless, gives the more Parliamentary spendthrifts to reach St. Stephen's, the men who would debauch constituencies through objects with which they have no sympathy, has the true note of the reformer. And would that our Legislature of the self-seekers contented only of using it to their own social and financial ambitions. There be men who have used the House of Commons as they would manipulate the figures on the chess-board, as pawns in the story of their sordid ambitions; and these have been oftenest the men who have poured out their purses most freely for the behoof and unmanliness of the electors. All these declarations of Mr. Rider Haggard are well. They reveal the man whose soul is greater than shibboleths and platitudes.

We descend to a depth deeper than Mr. Rider Haggard has penetrated in his remarkable letter. We go to a depth suggested by his denunciation of a mock Imperialism which mingles its Mafeking hurrahs with the death-shrieks of its victims. Aye, how many men have reflected that the cost of this war—and only one touch of the points remained in dispute, so averted Mr. Chamberlain on the eve of the outbreak of hostilities—would have established two million men on the land—three acres and a cow holding, and allowed £50 to each in the pound. We had Mr. Haggard in his character of village reformer. We rejoice in his appearance as the man who perceives in our villages the hope of our more or past. Village life is now bereft of every element of benefit of the lighter side, which, paradoxical as it may relates man for his more stalwart work of the day. It has even yet, however, associated with it the priceless treasure of unpolluted air, and, as a sequel, good health.

Our purpose is to ask Mr. Rider Haggard to take the lead in this business of village redemption. The Mark Lane Express has, as he well knows, a better right to speak for the tenant-farming class of the villages than any other journal in England. It has appealed again and again—appealed alike with the vociferation of threats and with the gentle supplication of entreaty, to the villages to take their political destiny into their own hands. What has been the result? While the urban centres, in which men are herd in fœtid dens, and which add little to the sum of England's manliness, have dominated the attention of Parliament, simply because they have cultivated a Bashan bull-like shout, the villages, with grievances far more portentous than their own, have become their emissaries and satellites. Let us take two instances: A Bill was introduced into the House of Commons the other day whose purpose was to sanitarise the villages. Did the villages, did the farmers, did the labourers raise a word either in favour of the half-hearted Bill or of the principle? This principle is that the State should assert itself as eagerly to secure the sanitation, which means the morality, of the villages as it should to secure the sanitation of the towns. They raised never a word. Take Mr. Rider Haggard's own admirable proposal for State-aid for selected tillers on the land. Appeal with [illegible] to the village electors, be they farmers or be they labourers, and they would relinquish it at once in favour of any quack cry coming from the towns. Nay, if any [illegible] Mr. Haggard, and beg you to forgive this Anglo-Saxon, and [illegible] Socialism, every hair of their particular head would rear on end in magnificent protest. We want a man who is gifted with the spirit of prophesy, and who will not hesitate to prophesy to the world. Mr. Rider Haggard has partially taken upon himself the role. We beg to persuade him wholly to the ambition. May we outline his first aims:—

1. Ownership of the soil by the cultivator.
2. State-aid for these selected tillers.
3. [illegible] of a [illegible] Imperialism for the benefit of the people at home.
4. The [illegible] Parliament without imposing upon them a fine almost [illegible]

This policy would not [illegible] the towns; [illegible]

purpose would not alienate the God of Trade and the Magog of true Imperialism. In the towns they already know that the denudation of the villages means the concentration in the centres of active life of a mass of undisciplined labour. It means, indeed, the underselling of trade rates; it makes for the unholy concentration of life; and, in the end, it induces social immorality and economic trouble. In the towns they desire relief from this demoralising competition. We might, as a fact, have the towns with us in this purpose. Its realisation would make for the saner life of those towns, and the more regular life of the villages. It would make, in a measure, for true Imperialism, and for the fecundity of the soil. To this in all sincerity we inspire Mr. Haggard. May he not relapse from the fine ambition of his letter. What we want is the organisation of the village elector in a strenuous purpose.

MILLING.

The Preparation of this Year's Crop for Grinding.

The trade in flour has been steady at about late rates, but offals of all sorts, especially bran and sharps, continue to make good prices. English wheat has only been in small supply, and in some parts has been making from 1s. to 2s. more per quarter for moderately good samples. It is not often that quality and condition vary so much as is the case this year. Odd lots are very good, and mill well, but the bulk is decidedly inferior to the last two crops, and will give more trouble to the miller than is usually the case.

The fine condition of the wheat from the harvests of 1898 and 1899 will have had the effect of spoiling country millers to some extent, who were able to reduce the grain with very little trouble during those years, whereas the present crop will call for especial attention and manipulation of rolls and coverings. Those members of the trade who have been able to instal a drying apparatus will have the advantage, because a great deal of the crop will come to hand in bad condition, and will need the application of hot air so as to do in some measure what the sun has failed to effect, and to counteract the ill-effects of recent rains.

Foreign Wheat and the Use of Washers.

Everyone agrees, too, that the crop is a much smaller one, and this really means that millers will have to use more foreign sorts. This, again, points to the necessity for another set of appliances—a washing plant, consisting of a washer and whizzer, the latter being necessary to get rid of the bulk of the moisture before submitting the damp wheat to the action of the hot and cold air in the dryers. A great revolution has been experienced with regard to these two machines—the washer and the dryer—and they can now be bought from most milling engineers at very cheap rates. A few years ago both washers, whizzers, and dryers were cumbrous machines, and the prices charged for them were prohibitive to many millers, while still more could not spare the room necessary for their erection. But all that is altered now. The large horizontal washers have been supplemented by small and neat-looking machines; the whizzer has been made smaller, and yet has a great deal more capacity; and the dryers have been got into a great deal less space, while they are equally effective.

Water and Heat as Profit-Makers.

In mentioning these machines as being more than ever before, perhaps, necessary to millers, the writer does not at the present time propose to go into the various ways of treating different wheats in washers and dryers. It is only desired to point out the broad principles which guide their use, for washing and conditioning have outgrown their infancy, and will ultimately be adopted by the great body of British and Irish millers. Some years ago elaborate dry cleaning depended more on space and power than on necessity, but as the demand for whiteness in flour increased millers had to bow to the inevitable and spend more money on machines, and the writer of these articles predicts exactly the same in regard to the application of water and heat as profit-makers in scientific milling. Twenty years ago the public were not so particular and did not so much mind being supplied with a dark flour. Nowadays the miller who turns anything on to his first break except perfectly clean wheat may as well close his mill at once. What, therefore, proved to be the case with dry cleaning will be repeated in the case of what has been called "laundrying."

The Object of Conditioning.

What wheats millers will have to use to replace the scarcity of the home-grown product depends upon several things, not the least of which is the cleaning plants they possess. But the aim is ever the same—to bring all sorts into that state in which they are best fitted for making flour, and this assumes that they are brought into exactly the same condition, a difficult operation unless the miller has adequate means for applying water and heat. Whizzers now run at 700 revolutions, or even more, per minute, and may be depended upon to get rid of all superfluous moisture, while they will leave some wheats in an efficient milling condition without any further trouble. In buying wheat dryers, millers should also make sure that the particular machines they examine are capable of passing a larger volume of warm air through a thin layer of descending grain. Of course, efficiency depends upon the inflow and outflow of a constant stream of warm air, always bearing in mind that an exposure of five minutes to a temperature of 130 degrees is more beneficial for most wheats than one of 200 degrees or more for two minutes. At the same time, there is less risk of over-drying than under-drying; it is leaving the wheat too soft which is to be feared. It will not be in the power of every miller to wash, but that is no reason why they should not instal a drying apparatus. There are several on the market, both cheap and efficient. What small millers want is a machine which will take up little space, use little power, and require little attention. The necessity for dryers will more than ever make itself felt this year. A good deal of the wheat will want ripening and hardening, in order to facilitate its reduction.

Economic Transmission of Power: Distance Between Bearings.

Arising out of the last article on the economic transmission of power about the mill, a question has been asked as to what is the proper distance between the bearings which support the shafting. The question is a very important one, because if the bearings are too near there will be more friction and consequent loss of power, while if they are placed too far apart the shaft will have a tendency to bend. No haphazard method should be employed, and most authorities give the following formula for finding the distance in feet between the bearings, the shafting being supposed to carry its own weight only:—Five times the cube root of the shaft diameter in inches squared. To take an example, let the diameter of the shaft be 2 inches. The square is 4, and the cube root of 4 is, approximately, 1.6. This multiplied by 5 gives 8, so that a shaft of 2 inches diameter should have bearings 8 feet apart. When the ordinary proportion of pulleys, etc., are carried on the shaft, multiply the cube root, etc., by 4.8, instead of 5. As another example, let the diameter of the shaft be 4 inches. The square is 16, and the cube root of 16 is, approximately, 2.5. This multiplied by 4.8 gives 12 feet, the correct distance between the bearings.

MILLER-FARMER.

Funeral of Sir John Lawes.

The funeral of Sir John Bennet Lawes, of Rothamsted, took place at Harpenden Parish Church on Tuesday. The service was conducted by the rector of Harpenden, assisted by the Rev. W. K. Suart and the Rev. W. A. Long. The mourners were Sir Charles Bennet Lawes and other members of the family. Among a very large gathering of friends who attended were Sir J. Henry Gilbert, F.R.S. (colleague of the late Sir John Lawes), Sir John Evans, F.R.S. (trustee and chairman of the Lawes Agricultural Trust Committee), Dr. Horace Brown, F.R.S., Professor H. E. Armstrong, F.R.S., Mr. Herbert Rix (representing the Lawes Agricultural Trust Committee), Dr. J. Augustus Voelcker (the Consulting Chemist to the Royal Agricultural Society), Mr. J. E. Compton-Bracebridge (the Assistant Director), and Mr. William Carruthers, F.R.S. (the Society's Consulting Botanist), Professor Tilden, F.R.S. (the Chemical Society), Mr. A. B. Kempe, M.A., Major P. G. Craigie (Board of Agriculture), the Earl of Verulam, Sir W. T. Thiselton-Dyer (Royal Botanic Gardens, Kew), Dr. Rudolph Messel (Society of Chemical Industry), Mr. William Marriott (Royal Meteorological Society), Mr. Spencer Pickering, F.R.S. (Woburn Experimental Fruit Farm), Mr. S B. L. Druce (Farmers' Club), Mr. T. Elborough, Dr. Bernard Dyer, F.C.S., Professor R. Warington, F.R.S., Mr. T. S. Dymond, F.C.S., Mr. H. J. Toulmin (Mayor of St. Albans), Mr. E. P. Delaham (deputy town clerk, St. Albans), Mr. James McDougall, Mr. George Oakley, Mr. Thomas Bennet, Mr. George Berry, and Mr. George Murdoch. [We are requested to state that Mr. E. W. Stanyforth (chairman of the Chemical Committee of the Royal Agricultural Society), Sir Ernest Clarke, and Mr. Martin J. Sutton were unavoidably prevented from attending the funeral.]

At Longford Fair, held on the 6th inst., the demand was slow, except for cattle in forward condition. Calves, first class, £3 to £6; second class, £2 5s. to £5. Yearlings, first class, £10; second class, £5 15s. to £8. Two-year-olds, first class, £13 10s.; second class, £8 10s. to £12. Three-year-olds, first class, £16; second class, £13 2s. 6d. to £14. Springers, first class, £18 to £20; second class, £13 to £15 10s. Very small supply of sheep, good demand. Lambs, first class, £1 7s. to £1 10s.; second class, £1 2s. to £1 5s. Hoggets, first class, £2 4s.; second class, £1 15s. Young pigs, eight to ten weeks old, first class, 21s. to 24s.; second class, 15s. to 18s. 6d. each.

BARLEY AND MALT.

By Hordeum.

Barley Growing Stagnant.

The returns of the area under cultivation for barley are out, and for the third successive year they show no diminution. They exhibit a stagnancy that is like the lull before the storm. Although it may not pay to grow barley, it pays still less to cultivate wheat. Hence, after the temporary or spasmodic spurt in wheat, the inevitable relapse has set in, and with a heavy decrease in acreage for wheat we find a very slight gain in barley.

The actual figures are 1,990,265 acres in 1900, as against 1,982,108 last year, and 1,903,666 in 1898. This shows a gain of 8,157 acres of barley against a loss of 156,939 of wheat.

Of the total loss of arable land, after allowing for the increase in oats, much might be said, but for the present it must suffice to direct attention to barley.

Diminished Demand

directly causes diminished prices, and, after all is said and done, the chief factor in the whole position is the price secured. So long as a good return can be assured, we might be sure that the area grown would not diminish. Prices are steadily going down, and have been doing so for years. Unfortunately with barley more than with any other crop, market quotations do not truly reflect the prices obtained by the grower.

Averages at the best are very apt to prove delusive, and in no other commodity is this so true as with barley; the range of prices is very wide, and the quantities and values fluctuate immensely.

A glance at the table showing the Imperial weekly averages given in the market reports each week shows this. In one week last year (August 12th) the total quantity of barley returned was only 184qrs., whilst in the corresponding week a year later (August 11th last) is stood at 311qrs. In a few weeks this quantity rises to over 200,000qrs., yet the strange thing is the fluctuation in the average price is relatively very slight, the minimum quotation being 22s. 6d., whilst the maximum for the whole year was 28s. last October at the opening of the new season.

The Best Price

given for much malting and seed barley it is well known was more than half as much again. Some exceptional lots changed hands at more than double the money.

Leaving these out of the question, the real problem that growers have to face is, What is likely to be the ruling price this season? Shall we still go on the descending scale? Will it pay to hold on, or will it be best to sell promptly?

Properly, an increased consumption of beer ought to lead to improved demand for barley, with the corresponding hardening of values. In reality the larger demand for beer is met by ever-increasing use of substitutes for malt by brewers. This year also there can be no doubt that the increased consumption of beer by the public has been met by brewers by the ingenious but well-known plan of

Reducing Gravities.

The plain English of this is making a larger quantity of beer from the same quantity of malt and its substitutes. The dealings of the year show clear proof of this. Some of the larger breweries have already reported a diminution in the actual number of barrels of beer sold and an increase in the amount of beer duty paid. But the sums paid do not amount to anything like the amount they should do if the gravity of all the beer brewed had been maintained at the former level. In these cases we have the stereotyped expressions from the Board of the firm determination to keep up the credit of the beers in every way. Such expressions do not mean much.

Unhappily, we can never get at the truth of the matter, as it is impossible from the manner in which the returns are made to know truly how much beer is really made. As I have so often shown, a brewer can make ten barrels of beer from the quarter of malt or three barrels.

The Duty Paid

is the same in both cases, and the quantity of beer officially returned as having been made is four barrels.

The one solid fact the country has to face is the very serious one that the area of land devoted to barley growing has dropped for the third year in succession below the two million acre limit. With market prospects standing as they do, will this area be increased or still further diminished. A little depends probably upon the weather of the next two months, but there is every probability of a good time for preparing for getting in wheat.

The real question to many is rapidly getting down to the keenly practical one: Does it pay to grow barley even for maltsters' use? Year by year the average is getting lower and lower, but still worse is it in the sense that the best or top prices for malting barleys are decreasing much more than the averages show. It would be of great interest and utility if we could ascertain how much of this year's crop will fetch 35s. or over.

By Lupulin.

Home Notes.

The Borough.

The new hops arriving this week do not appear to have aroused much interest amongst buyers, although the buoyancy of general values has been well maintained. The business has been mainly in 1899's, which are being dealt with freely at advancing rates, some transactions in the better parcels showing improvement to the extent of 10s. on the currency of previous week. Holders of good yearlings are very firm, and several of them, being encouraged thereto by the poor results of last week's pickings, have withdrawn from offering. The unsold balance of last year's crop is now reduced to very narrow limits, and we shall soon hear of important transactions in the new growth, and according to general expectation values will be established on a basis that will be far in excess of the average of the past few years. But, as I have repeatedly stated, the key of the market is held by growers, and upon their action depends the course of the trade to be done therein.

The Output of the Crop

seems likely to be less than the general estimate, as development has not proceeded, and so many of the cones are small, that the weight will be, as it has thus far been, disappointing. A skilful and usually successful grower told me of his experience being very discouraging, as a plot of fifteen acres, which is generally fruitful, had only given him twenty-one pockets this season. A friend near Maidstone writes: "I have no doubt the average crop will be less than at present estimated, and many grounds are in an uncertain state through mould, which the cold nights cause rather to increase. I do not intend picking anything that is not worth £5 at the time of picking. If other growers make up their minds to do likewise the trade would be improved, also the prospects for another season." A correspondent at Plaxtol says: "The crop in this district is almost a total failure. An average of 3cwt. is more than will be picked. The new growth will, I believe, come short of estimate in every district." From Herefordshire a careful observer writes: "I think that in estimating the crop at two-fifths of last year I put it too high. Most of the yards I have been through since beginning of this month will not yield above 1 to 2 cwts. per acre." In a Kentish parish, generally famous for its good crops, the average is set at 5cwts. per acre, or a total yield of about seventy tons, the same gardens having grown nearly 200 tons last year.

Picking is now in full activity everywhere except in the Midlands, where it will be general this week. In all directions, with few exceptions, I hear of the rapidity with which the workers are getting through the gardens. Fortunately there are here and there gardens whose sheltered position or other favourable circumstances will enable their owners to come out well at the end, for where a planter can bring 10cwt. to 12cwt. per acre of sound clean hops to market he will benefit this season by his good fortune and justify the remark in the *Standard* that some growers have made their hops "pay handsomely." I trust there will be many with this satisfying experience.

In confirmation of these remarks I may quote the results of inquiries instituted by an eminent contemporary concerning the condition of all English crops. It is found that, disheartening as was the aspect of the hop crop at the beginning of August, when its average condition was represented by the figure 72, it had fallen off 7 points during the month, standing on September 1st at only 65. The average condition for the past five years on September 1st works out at 83.4, so that the present outlook is 18.4 below this average, equalling a deficiency of over 21 per cent., and as this calculation includes the record year of 1899, it will be seen that the present comparison is even more favourable than it would be if a longer period of averages were taken into account.

Imports and Exports.

During August very few hops arrived, the total being 2,210 cwt., of which the U.S.A. sent us 1,308 cwt. This total is over 800 cwt. less than arrived in August last year. The exports for the month were 1,076 cwt., against 436 cwt. in 1899, thus the balance against our market in August last year was 2,576 cwt., and this year it is only 1,134 cwt.

We are now in a position to ascertain the result of our foreign trade during the "hop year," extending from September 1st to August 31st. It is gratifying and should be encouraging to English planters to find we only imported in 1899-1900 146,434 cwt., while in the previous corresponding season 225,996 cwt. were dumped upon our market. These figures show a falling off in imports of no less than 79,462 cwt., and as exports during same periods have been practically the same, the balance against us for the year stands as above. I trust we shall see still further reduction in the new season, and it can be safely estimated from all foreign reports I have received that this will probably be the case.

The military doings of the gallant President of the Hop Growers 'Association,

Colonel Brookfield,

present a record of the greatest interest. Evidently his desire for active service has been fully gratified, as he has been engaged in several important actions, has conducted expeditions with large forces of artillery, cavalry, and infantry, and has been invariably successful in all that he has undertaken. Having been promoted to the command of a brigade, and placed on the staff of General Hunter, his conduct in the field has gained for him the honour of special mention in dispatches from Lord Kitchener to the Command-in-Chief, and the confidence reposed in him by his superiors is evidenced in his appointment as Military Governor of Bethlehem and afterwards of Fouriesburg. Having escorted the wife and children of ex-President Steyn from Fouriesburg to Bloemfontein, he was on August 10th awaiting further orders in the capital of the Orange River Colony. Personally I consider that having done his duty to his country so efficiently, Colonel Brookfield deserves a well-earned rest. I hope, therefore, soon to hear of his return home, where he will be welcomed most heartily by his hosts of friends.

Steinberg Brothers' Report.

Once again we have pleasure in presenting to you our annual report.

The weather has from the beginning been anything but beneficial to the growth of the young plant. The winter was mild, and dragged on for many months into the present year, and when the hop-plant made a start, late in the month of May, it was checked by frost on and off to the end of June, and at that time it was in a very backward and weakly state. In addition to the late start, fly appeared early in July, and left such heavy deposits that the hop crop of 1900 was threatened with a general blight. Washing was energetically resorted to by most growers, and persevered with; but, in spite of this, it seemed that the vermin would not be conquered. However, real tropical heat set in about the middle of July, and, holding for several weeks, had the desired effect of destroying the vermin. Unfortunately, the weather became very changeable during August, and at this critical time for the plant, wet, cold, and heavy gales again checked it; therefore, it is not to be wondered at that we are forced to the conclusion to-day that only a small crop of hops, which we believe, on the whole, will be of good quality, can be gathered. Although not a large crop, it will, however, be a most remunerative one to those of our friends who have again spared nothing to obtain a crop.

Picking is now in full swing, and new hops have been sent to market, for which, up to the present, there is by no means a brisk demand. A few parcels have changed hands at prices varying from £4 to £6, but these being chiefly early varieties, they are no criterion whatever as to what prices will be when good hops are about, and the market is in a settled state.

The acreage this year is smaller by 575 acres, and in taking an average of 7 cwt. per acre of 51,308 acres under cultivation, we arrive at a total of 359,156 cwt., which we have reason to believe will be only possible to harvest under the most favourable conditions.

On the Continent the hop crop will be smaller to 15 per cent. to 20 per cent. against that of last year, and the old stocks which are on hand there are only small. America will also produce about 30,000 cwt. less than last year.

With the brewing trade in a highly satisfactory condition all over the world, we do not think we are wrong when we predict good prices this season for the hop grower. STEINBERG BROTHERS.

45, Borough High Street, London, S.E.,
September, 1900.

Messrs. W. H. and H. Le May's Annual Report of the Hop Crop.

Although the date of issuing our annual circular on the world's hop crop is a fortnight later than that of last year, owing to the lateness of the season, we are only now able to judge the probable yield of the English growth.

We have made, as usual, a very exhaustive examination of the hop gardens of England, and the conclusion we have come to is that the crop cannot reach, under the most favourable circumstances from now, half of the actual growth of last year, or about an average of 7 cwt. per acre. The quality generally will be exceptionally good, as the sparseness of bine enables the hop to get all the sun and air, so that the cones are likely to be very full of lupulin, although, owing to the lowness of the temperature, many will be small. The Government have just issued their annual return of the hop acreage, and they give a total of 51,308 acres, being a decrease from that of last year of 535 acres.

We estimate that—

			cwt.			cwts.
31,514	acres in	Kent will average	8	per acre,	making	252,112
4,823	,,	Sussex ,,	6	,, ,,		28,938
2,221	,,	Hampshire ,,	6	,, ,,		13,326
7,287	,,	Hereford, Worcester ,,	5	,, ,,		62,755
3,964	,,					
1,300	,,	Surrey, Gloucester ,,	8	,, ,,		1,512
47	,,					
138	,,	Shropshire, Suffolk ,,				
4	,,					
		Making a total growth of				358,703

Our reports from the Continent agree that the crop there, taken as a whole, will be less than that of last year, some putting it at 15 per cent., and others as much as 25 per cent. less. Now, as the Continent did not keep sufficient hops for her own consumption last year, but had to reimport hops from England to make up her deficiency, we feel justified in estimating that the utmost that the higher prices ruling in England this season will be able to draw from there will not exceed 50,000 cwt. (last year they sent us 54,296 cwt.).

With regard to the American hops, we are creditably informed that the crop cannot reach that produced last year. Sonoma is put down at about half. Washington and Oregon about the same as last, and New York State at about two-thirds. As stocks of 1899 are almost exhausted there, we feel ourselves on sure ground in putting the greatest quantity she can export to England at 100,000 cwt. (last year she sent to England 92,238 cwt.).

Thus, taking our estimate of the English growth at 350,000 cwt., the probable import from the Continent at 50,000 cwt., and that from America at 100,000 cwt., gives only a total of 500,000 cwt. to satisfy our brewers, exporters, bakers, and manufacturers of non-alcoholic beers. We estimate their total requirements at least at 800,000 cwt.; for we find, according to the excise returns, that 37,153,051 barrels of beer paid duty last year. Now this at 2¼lbs. per barrel, which no one can say is an overwhelming amount of hops to use (and it is well known that export and stock beers want at least double this weight), makes 746,378 cwt. required by our brewers, whilst our export trade, yeast makers, and non-alcoholic beer brewers, require at least 50,000 cwt.

The stocks in the hands of brewers will be thinned low before another crop can be gathered to supply the deficiency between the production and consump-

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interst and benefit to the members of the society*

tion during the next twelve months, and the position of the market this time next year will be very different if the 1901 crop should happen to be a short one. This being the position of affairs, hop-growers are warranted in their expectation of realising such a price for their crop as will fairly pay them for all the trouble they have had during one of the most trying seasons ever known; they have had to combat one of the most serious aphis attacks, and only those who washed early and persistently will secure a fair crop. They also experienced one of the most severe gales when the hops were in a most delicate condition, and also great changes in the temperature during the time the burr was developing into hop cones.

We advise growers to be most careful in picking and drying; the price likely to be realised this year will warrant a little extra outlay in having the hops picked clean.—67, Boro' High Street, London, S.E., September 6th, 1900.

Manger and Henley's Hop Report.

From the start the hops felt the effects of the phenomenal crop grown last year, and presented a very weakly appearance; then followed an unusually heavy attack of vermin, which seemed to poison the bine, and has been only overcome by frequent washing. Where this was neglected the result is disastrous.

The dry summer retarded the progress of the plant, and it was only with great difficulty and good cultivation that the bine could be got to the wires or top of the poles.

At the beginning of August (when the burr was just formed and very tender) a heavy storm came from the S.S.W., repeated three days later from the N.E. accompanied with a low temperature—which whipped and injured the hops, reducing the prospect considerably, and making them develop very slowly and finish up small in size.

North and West Kent, Bastard East Kent, and West Sussex will grow very few. There will be some very choice hops in the best parts of East and Mid Kent, and a few favoured parishes in the Weald, if nothing further arises to damage them.

The yield in Worcester and Hereford promises to be about 6 cwt. per acre. Farnham is very short.

The acreage is reduced 535 acres in the year; it is now 51,308 acres. We expected this after the unremunerative prices which prevailed last year, and it must continue to decline if the growers do not receive a fair price to compensate them for the anxiety, worry, and cost of production.

This is a year when it is most difficult to estimate the growth gardens and districts being so various; but we venture to think it cannot exceed 7 cwt. per acre all round, or about £180,000 Old Duty.

We do not anticipate the Continental crop will interfere with us; it is a little less, on the whole, than last year, and their stocks are quite exhausted. The States and Pacific Coast will also yield less, their surplus not being sufficient to create any uneasiness in our minds. They have already a steadily rising market, which should influence ours.

Although the brewers have a good stock in hand, the fact that all over the country there is full employment for all who are willing to work must have its influence on the consumption, and we see no reason why this short crop—which is certainly less than half of last year's—should not be absorbed by them if we only exercise a little patience.

59, Borough, London, Sept. 5th, 1900.

From the Plantations.

THE FARLEIGHS AND DISTRICT.—Picking has commenced in earnest, although there is no doubt everyone has begun too soon; but there were signs of red mould, and it was thought they would go off. What have been picked come down very light, and the pickers get over the ground very fast. No doubt hops this year will be very much overset, and therefore the price should be more than is talked about at present.

Foreign Notes.

Nuremberg.

New crop hops are now arriving pretty freely, and attract much attention from buyers. First cost prices, *i.e.*, the prices paid to growers, are approximately as follows for the best qualities:—Marktwaare, 95s. to 100s.; Hallertau, 110s. to 120s.; Wolnzach, 115s. to 130s.; Spatt, 125s. to 135s.; Saaz, 140s. to 150s.; Wurtemberg, 110s. to 120s.; Baden, 105s. to 115s.; Alsace, 100s. to 110s. It is found, however, that the green hops are unusually heavy with moisture this season; there is, therefore, great loss in the final drying, and quotations to brewers are advanced proportionately.

The quality of the new growth gives general satisfaction, but the traders now accept the fact of deficiency in the total growth, which it is estimated as being nearly a fourth less than last year.

Much variation both in quantity and quality is reported from most of the districts. In Bohemia and Bavaria there are many remarkable instances, where, side by side with plantations producing hops which for richness in lupulin and delicacy of aroma leave nothing to be desired, are others where the cones are but partially developed, and are lacking in those special qualities usually characteristic of the produce of these celebrated grounds. There is, therefore, little doubt that as soon as the choicer growths are available they will be speedily taken up by brewers, who will not be unwilling to pay full prices for them.

The following Reports

present in brief a survey of the present prospects:—

SPALT.—Hops are looking well, and a crop of excellent quality is expected.

HERSBRUCKER.—Though improvement is evident, the crop will be less than last year.

HOHENSTADT.—The yield will be about one-third below last year. Quality is good generally.

AISCHGRUND.—Early hops are of good quality and colour.

HALLERTAU.—Picking is in progress; crop will be one-third less than last year.

WOLNZACH. Crop will be of excellent quality if weather remains favourable, but is perceptibly below last year's yield.

KINDINGER.—A crop about equal to last year's in quantity and of sound and well-devloped hops will be gathered.

UPPER FRANCONIA.—Weather being favourable to development, hops are in good condition.

PLANSITZ.—Early hops have been sold at 85s. to 88s. Late varieties ripen slowly. The total yield will be smaller than last year.

BADEN.—Quality of early hops is satisfactory, but the crop will be only an average.

WURTEMBERG. Early hops being picked, and later sorts have grown out well during past fortnight.

TETTNING.—Yield is on the whole satisfactory, and quality is very good. Present values are 115s. to 120s.

ALSACE AND LORRAINE.—The crop is now estimated at about a fair average.

NEUTOMISCHEL.—The hop cones are growing out well and promise a good crop.

NASSAU.—Weather has favoured development, but the yield will probably not exceed two-thirds of last year.

AUSTRIA.—High gardens are suffering from drought, but those in valleys are more satisfactory.

SIEBENBURG.—Crop promises to be of excellent quality. Early hops were very sound and more attractive than they have been for some years. The yield will not be very abundant.

VIENNA.—Rainfalls have assisted development, and both quality and quantity now present better prospects than previously.

Burgundy.

The crop prospects are far from satisfactory, and it is not thought probable that any surplus will be available for exportation. Local values are rapidly advancing, the latest quotations being 125 francs (about 100s. per cwt.), and planters are very confident that higher prices will be realised when the time for actual business in the new crop arrives.

Belgium.

A temporary calmness has fallen upon the market, and speculative figures for the 1900 crop are rather lower than they were. The "bears" are offering only 82½ francs for Alosts, but sellers decline to recede below 85. There are sellers of Poperinghes at 95 francs, buyers refusing to operate at this figure. In the meantime the trade in yearlings, though not very active, is sufficiently firm to maintain both Alosts and Poperinghes at 65 to 67½ francs.

The New Crop

is favourably reported upon in regard to quality, but the yield cannot be increased, and there is no doubt that it will be less than half that of last season. In the Assche districts it is said that very few hops will be gathered.

Holland.

The plants in the Vlymen district have developed well, so that it is now expected that about half of last year's crop will be harvested. The outlook for quality is good if the weather remains suitable during the picking season.

America

The anticipation of shortage in the new crop has aroused brewers to activity, and parcels of yearlings are being readily taken up at New York at somewhat higher prices. The tone of the market is very firm, with distinct tendency towards further advancement. Inquiries from England have come to hand, but in the face of higher quotations no business has resulted.

The 1900 Crop is Estimated

by several experts at various figures, but all agree that it cannot reach the yield of last year, and that the deficiency will be so substantial as to produce a decided effect upon market values.

The following calculation is made by a firm who are engaged in the production of hop extract, and who, being extensive buyers, are not likely to put their figures lower than are warranted by the actual position. They estimate the production thus: California, 40,000 bales; Oregon, 75,000; Washington, 70,000; New York, 45,000, making a total of 190,000 bales, which is 30,000 less than the ascertained crop of last year.

An Oneida correspondent of the *American Agriculturist* says that prospects favour growers. He remarks:—"Allowing the same crop per acre as last year, the ploughing up means 20 per cent. less crop. Correspondingly, if we are growing as many bales as last year, the existing 80 per cent. acreage must produce 25 per cent. better crop to make the bales. Clearly this increase is not in yards. A well-posted dealer tells me he thinks many more acres were ploughed up than anyone is aware of. With less bales in New York State, Cal. Wash, and Ore, with the stock of old hops the lightest ever known, and the consumption continually increasing, why is not the situation very strong?"

The Syndicate of Hop Commissioners of Nuremberg.

This body publishes an annual circular at this season, and from their latest issue I translate the following remarks concerning Continental prospects:

"The harvest will be retarded this year by about a fortnight.

"The wet and cold weather which prevailed in May and June was very unfavourable to the development of the plant, but since then the fairly constant heat has sensibly improved the growth. Nevertheless, the yield will be without doubt inferior to that of the preceding year.

"In the Bavarian districts of Hersbruck, Lauf, Altdorf, Aischgrund, and Hallertau the crop will be about four-fifths of that of 1899, but in the Spalt country the yield will probably surpass that of last year. We estimate the total production of Bavaria at 240,000 quintals, against 290,000 in 1899.

"Wurtemberg will produce nearly the same quantity as last year, and the same may be said of the Duchy of Baden.

"The produce of Alsace will hardly reach 75,000 quintals, against 100,000 in 1899.

"The district of Posen and Eastern Prussia promise to yield about the same quantity as they did last year.

"The total crop of the whole of Germany may be estimated at 500,000 quintals, in place of the 1899 crop, which amounted to 565,000 quintals.

"The Austrian crop is valued at 50,000 quintals less than last year, but the yield in Russia may be taken as about on an equality with that of 1899.

"We estimate that, taking into consideration the stock held by brewers, this year's crop will fairly meet their requirements, and although prices cannot be so low as during last season, they will be at least sufficiently moderate and accessible."

World's Production and Consumption of Hops.

To the Editor of the MARK LANE EXPRESS.

Sir,—I take the liberty to communicate to you statistics which will be sure to interest those of your readers who are hop growers.—Sincerely yours,

C. BECKENHAUPT.

Altenstadt, Wissembourg, Alsace,

WORLD'S PRODUCTION AND CONSUMPTION OF HOPS.

Showing:—

1. Consumption of beer, from the statistical table of the *Gambrinus* (Brewers' Journal, Vienna).
2. Consumption of hops, from the statistical table of the *Gambrinus* (Brewers' Journal, Vienna).
3. Production of hops (average figures from the statistical tables of German Hop Growers' Society, the *Gambrinus*, the *Allgemeine Brauer und Hopfenzeitung*, and Messrs. Barth and Sons (Nurnberg).
4. Over and under production of the year.
5. Total stock at the end of the year.

Year.	Consumption of beer. hl.	Consumption of hops. cwt.	Production of hops. cwt.	Over and under product	Total stock at the end of the year.
1884	149,012,960	1,514,900	1,606,450	+57,450	57,450

(*For Hop Market Reports, see pages* 335, 337.)

Langport Horse Fair.—The annual horse and colt fair was held on Monday last, and was largely attended, both by graziers and dealers from various parts of the country. There were upwards of 500 animals on offer—hardly so many as last year, but the quality was quite up to the average. Working horses were scarce, and consequently dear, but there were more suckers on offer than usual. The colts generally were in very good condition, and the prices for the best animals were from £35 to £50, inferior colts realising from £30 to £35; cart suckers, £10 to £17; nag suckers, £6 to £10; worked horses, £25 to £45.

FARM PROSPECTS

Bedfordshire.

Since the 26th ult. we have been favoured with splendid harvest weather, which has enabled all farmers of good land to sing "Harvest Home!" But their song is somewhat saddened by the pessimistic reports of the yield, even on well-farmed land. The threshing machines tell a gloomy tale, and I am much afraid that the year 1900 will be

A Disappointing One

for the much-abused agriculturist. I wonder how many of your readers saw the letter in the *Daily News*, August 31st, from an anonymous Wiltshire correspondent, headed "On adding field to field." I don't think those who know me will say that I have no sympathy for the poor and the agricultural labourers, but I am compelled to state that this letter signed "Præsagus" shows the most absurd ignorance of the hard-pressed farmer's real position. This letter was cleverly and bravely answered by "A Farmer's Wife" last Tuesday. If an ordinary farmer (those who have no speciality) is year by year growing corn at a loss, if his capital is constantly diminishing, how can he farm as his father did before him, who lived in the good old times, when the English people were

Wise enough to Protect Home Industries,

and the greatest of these is agriculture? It grieves any Englishman's heart to see the way our land is fast going out of cultivation, but it is worse than cruel to blame the farmer for it. It is only adding insult to injury.

The beginning of this week I travelled 125 miles to the south of England. I

Saw Enough to Sadden

any true lover of his country, for I came to the conclusion that agriculture is fast going to the deuce, thanks to the so-called free trade fetish. If we could but live on thistles we could defy the foreigner to do his darned worst, but when Great Britain in the future is beset by her many foes—when we hold in our trembling hands our last crust of bread—this anonymous *Daily News* correspondent will be ready to own that we can't keep out the foreigner on thistles. He and his brother free traders will then curse themselves because in the day of their power they short-sightedly prevented the farmers from growing sufficient

Precious Wheat

in our sea-girt home to make us independent of the foreigner and strong to fight him. A gentleman in this county who farms the glebe land in his parish threshed his wheat the other day, and was heard to say, "There's nothing of it. There won't be enough pieces to pay for the parson's sermons. I don't know how the singers and the ringers will get on. The parson will have to make his sermons precious short next year."—T. S. (Sept. 6th).

Cumberland.

The first and last Fridays of August were bad. The one blew and poured and laid the heavier cereal crops flat. As a consequence right and left reapers had during the month to be used instead of one self-binder. More labour and expense, and the quality somewhat injured, have had to be put up with, and then next came a damper on the other Friday, which for a day or two stopped leading.

Leading

now, however, is in full swing; lads from school are employed, and green crops are very good. So all is well that ends well. But is all well? Is it well to be so dependent for cereal food and other food on foreign supplies? These supplies are, as far as wheat is concerned, six million tons less than last year, and the oat decrease is nearly three million tons! Barley and rye are also short, the former more, proportionately, than wheat and oats put together. And what does that mean? It means

Bad Beer and Whisky,

but not less drinking, though Sir Wilfrid Lawson became the father of twenty twins, and every one of them talked twice as much as their father. It is time to think about home. Africa is far away, and China is farther. Workers at home, and under no handicap, is the need of our day. Forty millions with mouths to feed cry for a change in the management of our land, and the spending of our money and of our men.—H. M. K. (Sept. 7th).

Gloucestershire.

Beautiful weather to finish the harvest, and all the late crops are gathered in prime condition, but I never remember

Corn Spoiling

so much in a short time as in the warm wet days from the 22nd to the 26th ult.; luckily, a drying wind then stopped further damage. What little threshing has been done is very disappointing in this district, which is not farmed badly. There will be more crops of wheat under than over 20 bushels per acre, about half what it was in 1898. Other corn will be better, but

None up to the Average.

Roots, especially swedes, continue to grow well, and the meadows are getting full of grass. The young seeds are also a better plant than it has been for some years past, so the prospects of keep are very promising, yet the price of store stock keeps very disappointing.

Hop-picking

will commence on Monday, and as the warm weather has forced them on since they came out of bine I think we compare favourably with neighbouring districts. Apples and pears are coming down a fair crop, but the price very low. J. H. W. (September 7th).

Shropshire.

Weather continues fine, though the sky is cloudy, and a few drops of rain fall. The dry weather is just as needful for stubble cleaning as harvest. A new American cultivator like a horse rake, with some of the tines inverted and a nice seat for the driver, is all the go here. When cleanly worked a little trifolium or vetches sown for early cutting would be a great advantage. Grass and turnips flourish luxuriantly now.—J. G. (Sept. 7th).

Somerset.

With the exception of a few late sown pieces the corn harvest in the Bath district is finished. Wheat, oats, and barley are fairly well filled in the ear, but the two former are very irregular in bulk, much of the wheat being thin on the ground, and the oats patchy. Barley appears the most bulky crop, but the quality of the grain is much below that of last year.

Hay is a good average crop and well made, though many fields laid up for cutting are now being

Fed with Stock,

presumably on account of the labour difficulty. Roots are good, but some are damaged owing to delay in hoeing. Grass has been fairly plentiful, and the pastures are at present looking fresh and sound. Fruit is abundant, and potatoes are good, and generally free from disease. The frequent and great variations of temperature appear to have adversely affected dairy cattle, and the

Yield of Milk

has been short. Other live stock is doing fairly well; there is a free sale for all kinds at moderate prices. The labour question and the greatly increased cost of imported feeding stuffs are the chief causes of complaint just now.—C. P., September 7th.

Somerset.

The weather has been a good average for agriculture. Wheat on heavy soils in the Taunton district good; on light land plain, thin, and weedy. Barley, the chief crop, is far below an average in bulk of corn or straw, showing the effect and loss from the root crop of last year, barley in the main following. Sample not so bright and good as last year. Hay well made, and may be considered average. The roots of late have greatly improved, in fact, saved by the rain received in July and some since, and will be a fair crop, whilst the grass is set growing and making keep plentiful.

Potatoes up to the last few weeks bid to be good, but since, in most cases, the haulm has died away, giving a smell

Indicative of Disease.

Apples, plums, and pears plentiful. Cattle and sheep healthy and doing well. Harvest completed, and nothing spoilt. Labour busy hoeing late turnips, trimming hedges, sowing catch crops, and cleaning stubbles. Good prices for all produce is much needed to meet expenses.—A. B. (September 6th).

South Lincolnshire.

The weather during the past fortnight has been much more favourable than its predecessor, and we have been able to gather in the crops almost without interruption and in good condition. Almost all the white corn is made safe, and several fields of beans an second crops of clover are in stack. Threshing is in full swing, but the corn carrier will not have such a tight job as last year. Various reports are heard as to yield, but as far as can be ascertained we may estimate it from

Two to Three Sacks per Acre Less

than last year; have heard of one 6qrs. per acre, but it was the heaviest crop I have seen, and plenty of straw for 8qrs. The average will not be more than nine sacks per acre. Oats are coming out very badly, about 7qrs. per acre. Of course, there are exceptions. I heard of one farmer getting 11qrs. Not much barley threshed at present, about 4qrs. to 5qrs. per acre. Beans and peas are somewhat of a failure, having been attacked by fly and dying off too soon. I think I need not quote market prices, as farmers all over are fully aware of them. I hear of a good sample of oats being sold to-day at 15s., and wheat at from 28s. to 30s. I

Scarcely Dare Mention Potatoes

as I fear when we get fully into lifting them that we shall be very disappointed with them. They looked very promising a month since, but now they very much resemble fields of beans. Keep is plentiful, and stock are doing well. Beef and mutton sell well, but stores are as dear in proportion. Not many Michaelmas fairs in the district, but some good grazing land sold to-day at Sutton at about £90 per acre. Weather still fine, but barometer is falling.—R. M. W. September 8th.

Sussex.

In the Weald harvest is now practically completed. Very little threshing yet done, but what has been is with

Disappointing Results

wheat being much lighter both in yield and weight than was anticipated at one time. No doubt a good deal of this is due to the crop having ripened off so quickly. Oats are short in straw, and many pieces came in two crops, ripening unevenly, and where this is the case the sample is bound to be inferior. Very little barley grown, but good will be below average. Peas fairly good. Every prospect of good crops of roots and seed, generally a good plant. Abundant crops of fruit. Live stock, breeding well and better prices have been realised for both beef and mutton. The Lisbon question will be a question by some more serious every year.—W. S. C. (September 8th).

Wiltshire

We have had an excellent season so far as the weather is concerned; sufficient rain to prevent drought and to suit the roots to perfection, but not sufficient to do much harm to the corn or to seriously prolong the harvest, which is now about completed in this district.

Wheat is Yielding Well,

and must be a large crop on good land, but on inferior soils it is a very small one, and everywhere of inferior quality to the last three seasons. Barley is of greater bulk than last year, but of very inferior quality. Oats are a decidedly light crop. Roots are extra good but suffer from lack of hoeing, labour being scarce and dear. Hay was abundant on the cultivated land, but lighter on the old pastures. Sheep are selling at about 8s. per head for ewes and 5s. for lambs above the low prices of last year, due, no doubt, to the abundant food supply. All classes of cattle are making fair prices.—J. S. (September 8th).

Foreign Prospects.

GERMANY.—The weather has been fine and seasonable and eminently serviceable for the ingathering of the last of the cereal crops.

DENMARK.—The weather in the first half of August was unsettled, but since with relatively drier weather a good harvest might be considered as assured. The harvest compared with last year's is somewhat later. The rye is cut and partially carried, and although the return is not yet known, the yield of straw in some localities is extraordinarily abundant. The potatoes stand well, and the early planted will give a large output.

BELGIUM.—Very favourable weather has been experienced in the past week, and all the cereal crops may be considered as ingathered.

SPAIN.—This year's harvest is considered a rather good one, and in some localities the wheat crop is said to be even rather better than last year's; but, on the contrary, in other places the yield is inferior to that of last season through drought and heat.

HOLLAND.—The weather has been more propitious, and enabled farmers to carry the last of their outstanding crops, so that there is now not much left on the fields.

HUNGARY.—In the principal districts of production the maize promises a satisfactory yield. The Minister of Agriculture estimates the crop of wheat at 16,876,000qrs., against 17,729,000qrs. in 1899. At Budapest the wheat market has ruled quiet with no material change in values.

RUSSIA.—The temperature, except in the Kuban, was above the normal range throughout the empire, while the rainfall exceeded the mean. In the Baltic Provinces a medium yield of the winter cereals is expected, and in places a good outturn, excepting Courland, where meteorological conditions militated against the development of the crops and the rye will only reach an average. Wheat, however, will give a better yield. The condition of the oats and barley is favourable. In the Volga Governments the harvest is not so good as was anticipated. In Samara the rye was carried with favourable weather, and wheat cutting has since followed. Fair statistical reports are heard from Ufa, Perm, and Orenburg, good crops is having a favourable ripening process. In Saratoff rain and snow have somewhat injured the wheat, and yield estimates have to be reduced 25 to 50 per cent.

ROUMANIA.—The cereal crop promises to give an exceptionally good yield this year. In the upper districts of Botosani, the yield, it is represented, will be an average, but a little under it in Bovrino. On the richer land in Ialomitza the crop will give 4 to 5 kilo per pogon, or even more, it is said. Farmers are now busy in preparing the land for the autumn sowings.

UNITED STATES.—The [illegible] says maize is maturing favourably, and promises to be of excellent quality with [illegible] beginning early. Wheat is [illegible] yet [illegible]

CORN MARKETS.

LONDON.

Mark Lane, Monday.— Malt: The inquiry continues limited. Barley: Advanced 3d per qr. Wheat: A slow trade. Oats steady. Maize: 6d per qr dearer on the week. Flour: Improved 6d per sack.—NIXON, GOWER, AND Co.

Mark Lane, Wednesday.—Both old and new crop English wheat continue in such diminished supply as to render business next to impracticable, but more of the latter is soon expected both here and on the country markets. Although the quality varies a good deal, taken as a whole, conditions are satisfactory. Fine white (old and new) up to 32s 6d, and red of similar sample, 31s 6d, 504lb delivered. American descriptions are well supplied on spot, but arrivals are not heavy, while holders are assisted by rising freights. The firmness of wheat only naturally influences the market for flour, sellers remaining quite indifferent, at the abnormal quietness which still exists, and, in view of the present situation, look forward to even a better range than that now ruling. Grinding barley continues to denote firmness, and Persian still supplies the main requirements, the quantity on hand being still kept down. Flat maize was easier to-day, and offers failed to meet with any ready response, and 20s 6d ex ship accepted, 20s 9d being named ex quay. Round corn firm and unchanged. Although the market for oats again pursued a dragging course, there was nothing to influence any actual recession, but the small consumptive business passing pointed in buyers' favour.

Mark Lane, Friday. — Dulness pervaded the general department of the Corn Exchange to-day, but firmer freights prevent offers being lower, and render some little relief to the present existing monotony. Flour unaltered for both English and American brands, and consumptive inquiries at unremunerative rates are not entertained. A close bid, within 3d per sack of the market value, was made for a good line of the latter, but refused; while in view of the present situation, holders look forward to better times. The London Millers' Association made no alteration at this afternoon's meeting. While there was again a general disposition on the part of consumers of oats to pause, with shipments of Russian coming up fast, holders were less reticent in their demands, and the tendency points downwards. Flat maize is fully 3d lower on the week, although steady to-day at the decline, but bids were disappointing, and 20s 4½d quoted ex ship, 20s 9d landed. Round corn firm. The market for beans and peas remains scarce and unaltered, more especially the latter, and buyers find is difficult to transact except at late stiff figures.

COUNTRY.

Ashford, Tuesday.—There was no great amount of new corn on offer, owing to farmers being too busy to thrash. Wheats were firm, and in some cases a little dearer on the week. White wheat made 30s to 33s, and red 30s to 31s per quarter. New white oats fetched 19s to 22s; old ditto, 20s to 23s; new black oats, 16s to 17s for medium qualities, and 18s to 20s for fine ones; grinding barley, 20s to 22s; new mazagan beans, 28s to 30s; old ditto, 30s to 32s; new ticks, 29s to 31s; old ditto, 32s 6d to 33s 6d; small maize, 26s to 27s; flat ditto, 23s to 24s per quarter. Flour unchanged.

Aylesbury, Saturday. — Average attendance, with increased quantity of wheat on offer, trade for which was quiet at late rates, viz., 28s to 31s per imperial quarter. No change in barley, oats, or beans.

Banbury, Thursday.—Wheat (white), 28s to 30s per qr; wheat (red), 28s to 30s per qr; beans (new), 33s to 34s per qr; oats (new), 19s to 21s; old, 18s to 19s per qr. English wheat is still in small supply, and fully maintains the rates of last week.

Boston, Wednesday.—A better attendance, and an improvement in the trade. Wheat, 28s 6d to 29s; oats, 17s to 18s; black peas, 50s to 60s; beans, 28s to 30s; maize, 22s 9d.

Cambridge, Saturday.—During the week the wheat trade has been very steady, without much animation. The supply is limited, and prices tend against the buyer. We have had a fine week, and the condition is somewhat better. At this market to-day there was a small show of wheat, which found buyers readily at the full prices of last Saturday. Red, 27s to 31s, and white up to 31s per 504lbs. Barley was in rather larger supply, and quality appears better than expected. Prices range from 28s to 35s for malting lots.

Canterbury, Saturday.—A steady trade at firm prices. New wheat and black oats are rather thin. Ruling prices:—White wheat, 31s to 33s; red ditto, 30s to 32s; grinding barley, 21s to 24s; white oats, 18s to 21s; ditto black, 16s to 20s; peas, 30s to 32s; tick beans, 30s to 32s; mazagans, 28s to 29s; flat maize, 22s to 23s; round ditto, 27s to 28s per quarter; winter tares, 7s 6d to 8s per bushel.

Carlisle, Saturday.—Small supply of oats in our market to-day. Good demand for old. New samples very poor quality. Old, 22s to 24s; new, 17s 6d to 18s 6d per 336lb.—THOMAS ROBINSON.

Chester, Saturday.—Small trade passing in English grain. New wheat of good quality commanded slight advance; old oats were scarce, and full prices were made. Quotations:—Wheat new, 4s 1d to 4s 2d; old, 4s 5d to 4s 6d per 75lb; grinding barley, 3s to 3s 6d per 64lb; beans, new, 5s to 5s 6d per 80lb; oats, new, 2s 3d to 2s 4d; old, 3s to 3s 6d per 46lb; Indian corn, 10s 9d to 11s 3d per 240lb.

Colchester, Saturday. — There was only a moderate supply of wheat here to-day; samples in condition sold readily at the extreme price of last week. Barley was more freely offered, but prices are as yet somewhat irregular. Oats, beans, and peas firm.—FRANCIS AND Co.

Dorchester, Saturday.—Moderate attendance and fair supply of corn. New English wheat was freely offered, but many of the samples were of indifferent quality. Trade was very dull, and prices were with difficulty maintained. Foreign wheat a dragging trade. Little doing in barley. Feeding stuffs quiet.

Glasgow, Wednesday.—To-day there was a small attendance at our Corn Exchange. Wheat and flour steady at last week's prices. Indian corn firm at 1½d to 3d per boll advance on the week. Canadian pease firm, and the turn dearer. Bran, 2s 6d per ton dearer. Thirds firm at late rates. Other articles steady, but quotably unaltered.—GIBSON AND CLARK.

Guildford, Saturday.—Short supply of all kinds of grain. Wheat, 28s to 33s per qr; barley, top price, 33s 6d per qr; several lots bad in colour.—LEGGATT, BLAKE, AND TYE.

Hereford, Wednesday.—Quiet market. Few more samples of new grain offering at, for wheat about 3s 6d per bushel of finest quality. Quotations: Wheat—white 3s 6d to 3s 10d, red, 3s 6d to 3s 8d per bushel; barley, 3s to 3s 9d; oats, 2s 3d to 3s; beans, 3s 10d to 4s; maize, 2s 8d to 3s 10d; vetches, winter, 4s to 6s; and spring 3s 6d to 5s.

Ipswich, Tuesday.—Small supply of wheat. Trade firm for all descriptions. New, 29s to 30s; old, 30s to 32s; white, 33s per qr. Grinding barley firm. Maize steady. Oats quiet. Beans and peas firm.

Leicester, Saturday.—Moderate supplies of home-grown wheats, and the new samples were rather variable in condition and irregular in price. Old wheats, 31s to 33s per 36 stones. Barley a slow trade. Fine oats firm.

Leeds, Tuesday.—We have to report a quiet but firm market for wheat. Foreign limits continue unaltered, buyers offering in vain less money. Old English commands higher prices; new is rather neglected, the business passing is limited. Beans 3d to 6d dearer. Maize and oats unchanged.—DUNNS AND Co

Leeds, Friday.—Buyers are still cautious about supplying their wants, which they can do without any advance upon Tuesday's prices for all descriptions of English and foreign wheats, the tendency of values if anything being in their favour. Beans the turn dearer. Peas, barley, oats, maize, and flour firmly held.

Lincoln, Friday.—Fair supply of new English wheats, condition indifferent, prices may be quoted 28s per qr. Old wheats very firm. No change in foreign wheats. Good show of new oats. Prices: Black, 16s to 17s; white, 18s to 19s. Old oats dear. Maize, peas, and beans firm.

Liverpool, Friday.—Wheat a moderate trade at late rates. Flour very steady with rather more doing at extreme prices for foreign. The Liverpool Millers' Association make no change in the minimum price of bakers. Mixed maize moves steadily into consumption at last market's figures. Small round, owing to extreme scarcity, asks 2d to 3d advance. Plate is in fair request at unchanged values. Barley is firm for malting at 6d to 1s advance, with a good trade doing. Feeding firm and in fair request. Beans firm, inactive. Peas are unchanged with a better inquiry. Oats firm, with more inquiry for English; foreign kinds are steady at quotations. Oatmeal, small trade at late rates. Oilcake firm with a good demand at an advance of 2s 6d to 5s per ton.—SEGAR AND TUNNICLIFFE.

Manchester, Thursday.—English wheat meets a quiet sale, at prices which are 6d per qr lower on the week. Foreign, 1d per cental easier. Flour keeps quiet: prices unchanged on the week. English oats are steady, with a fair demand. Foreign also unchanged. Peas and beans are without new feature. Indian corn is slightly favouring the buyer.

Newark, Wednesday.—Wheat a quiet trade at rather less money than last week. Barley a few samples showing, but prices are irregular, the malting trade having scarcely begun. Oats at about prevous rates.

Newcastle-on-Tyne, Saturday.—The weather keeps unsettled, and checks harvest operations. To-day's market had the usual attendance. Wheat closed firm for old samples, but new opened irregular and ended unsteady. Flour no change. Barley for malting opening up without fixed prices as yet. Old oats not so strong, new coming in at fairly handy prices. Beans, peas, and maize no material alteration.

Newcastle-on-Tyne, Saturday.—The demand for wheat at our to-day's market was slow. Factors, however, refused to take below last week's prices. Maize ruled firm, and 3d to 6d per qr over last week's prices was maintained. Beans and peas 6d dearer on the week. Scotch oats firm at late rates. Foreign in favour of buyers. Flour no change.—JOSEPH POLLARD AND Co.

Newport, Wednesday.—Wheat firm in price, but showed little change on the week. Maize was firm and 6d dearer. Barley, 3d to 6d dearer. Oats and beans showed no change. Flour (fines), 24s. Offals very firm.

Northampton, Saturday.—Small market. Not much of anything on offer; what was sold was at about last week's price. White wheat, 31s to 32s; red, 29s to 31s; new red wheat, 28s to 29s; barley, 25s to 28s; oats, 19s to 21s; old fine, 23s; beans, 30s to 35s.

Norwich, Saturday.—Very little new wheat offering at our market to-day, and the trade was about the same as last week. Fine weather has mostly prevailed during the past week, and harvest in this district is practically finished. Wheat, red, 29s to 31s per qr, weight 63lbs. per bushel imperial. Corn Inspector's return for the week ending September 3rd, 1900:—Wheat, 483-2, 27s 4½d. Barley, 40, 23s 9d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat in good supply; best samples maintained their values, while common sorts were 6d less. More barley offering, of various qualities, but at present maltsters are holding off buying, and prices are not settled. New oats, quality inferior, and but little doing. Old are in seller's favour. Old beans scarce and 6d to 1s higher. New, dry, making from 33s to 34s per 532lb.—ROBERT HUBBLE.

Oxford, Saturday.—Not much wheat showing, but it meets a steady demand at fully last week's prices. A few samples of barley offering; prices irregular at present, 28s to 35s.

Peterborough, Saturday.—A fine week has enabled most of our farmers to finish their harvest, and we have had a fair attendance at market. Wheat trade was slow at about 6d less money. Barley very irregular in quality and price. Oats not much in demand, but values about as last week.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was an average attendance at our Corn Exchange to-day. All stuffs are firmly held; if anything, an upward tendency, but not much doing, and anything that is in the favour of the buyers. Flour is very inactive at present. Weather very fine with summer heat by day.—ORLANDO DAVIS AND Co.

Reading, Saturday. — Business to-day ruled firm, there being a more plentiful supply of wheat than at last market. Prices remain unaltered from those recently quoted. The barley supply was only limited, despite which trade ruled slow, last week's prices prevailing. Other sorts of corn came to hand in average quantities, and sold steadily at unaltered quotations.

Romford, Wednesday.—The wheat trade was 6d per quarter dearer than last week. There was a very small supply owing to the farmers being busy with ploughing. Red wheat made 30s to 31s 6d, and white wheat 30s to 32s per qr.

St. Neots, Thursday.—A very small supply of new wheat, and no old. 30s was about the value of best samples. A few samples of barley were offering, but hardly enough business done to determine values.—ELGOOD AND SON.

Salisbury, Tuesday.—There was a small attendance, but the supply of grain was larger than for some weeks past. Trade was firm throughout. New barley came to hand in excellent condition. Quotations:—Wheat, 27s to 34s; oats, new, 17s to 21s; ditto, old, 20s to 23s; barley, 28s to 33s; beans, 32s to 36s.

Sheffield, Tuesday.—Poor attendance. Old wheats is dearer; new wheats same as last week, but variable in quality. Indian corn and beans 6d a quarter dearer. Oats about the same. Quotations:—Wheat, white, 33s to 33s 6d; red, 32s to 33s per 504lb; oats, old white, 26s; ditto old black, 22s per 336lb; peas, grinding, 28s to 29s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small, 26s to 29s; ditto American mixed, 22s 6d to 23s per 480lb.

Spalding, Tuesday.—Wheats were a shade lower, selling at 28s 6d to 29s per qr, whilst last week the top price was 30s. New oats, 17s to 18s. Not much doing in barley. Old beans dear. Nothing much doing in peas. Wheat and oats varied in quality and condition very much.

Stockton, Wednesday.—There were a few samples of new crops showing in very moderate condition, which made 29s 6d per qr. In foreign wheat the trade remains very firm, and owing to scarcity white wheats are fully 9d dearer on the week. Red wheats and oats sold at last week's prices. Maize was 6d to 1s dearer.

Sunderland, Saturday.—Little grain offering at this day's market, and prices remain nominally unaltered from last week. Arrivals nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Both old and new barley sold at last week's full prices, with rather a small supply. Feeding stuffs unchanged.

Wakefield, Friday. — Harvest is nearing completion, quality and condition of the new crop vary considerably, the yield is reported below an average. Foreign: Hard white and fine strong red wheats are held for 6d advance, which tends to check business. New English wheat more freely offered, without change in value. Malting barley begins to be looked after, but business is still limited, and prices difficult to quote. Maize, beans, and oats unchanged.—DUNNS AND Co.

Wakefield, Friday.—Californian wheats have advanced 6d per quarter during the past week, and English is quoted firm at late rates. A quiet tone prevails on our market to-day, and malsters as yet show little inclination for new Yorkshire barley, which is in rather better supply than last week. We quote no alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Winchester, Saturday.—A moderate supply of new wheat on our market to-day, which met a slow but firm trade at fully last week's prices. Old wheat scarce and dear. Barley quiet at late rates. Oats fair demand at unaltered prices. Round maize 6d dearer. Flour 24s to 25s.—FEAR, COLEBROOK AND Co., LD.

Wisbech, Saturday.—Moderate supply of grain; samples of new wheat are improved in condition. New red, 28s to 30s.; old up to 32s; new oats, 17s to 19s; old up to 21s. Barley irregular in quality and price.—JAMES FLETCHER.

Wolverhampton, Wednesday.—A fair attendance, but business quiet. Quotations:—English wheat (old), 33s to 33s 6d per 216lb; spring, 6s 4d; Duluths, 6s 6d per cental; old oats, 14s 6d to 15s 6d; new oats, 10s to 11s 6d; old beans, 14s to 15s; new beans, 12s 6d to 13s 6d per 196lb; flat maize, 23s 6d to 24s per 480lb.

Worcester, Saturday.—Trade quiet; old wheat scarce and firmly held. New samples varied in quality and came rather cheaper. Foreign quiet, at late rates. Maize, 3d to 6d dearer. Barley, oats, and beans unchanged. Wheat, white, 29s to 31s; red, 28s to 30s per qr.

Worksop, Wednesday.—Fair attendance and a few samples of new wheat in fair condition on offer. New barley was also fair, but new white oats were scarce, in bad condition, and unsaleable. White wheat, old, 30s to 31s; ditto new, 27s to 28s; new malting barley, 28s to 30s; grinding barley, 24s to 26s; white oats, old, 24s to 26s; ditto new, 18s to 19s; black oats, old, 21s to 22s; ditto new, 17s to 19s; maize, flat, 23s to 25s; ditto round, 27s to 28s per qr.

York, Saturday.—A few new samples of wheat are on offer, generally in moderate condition, and sell at about last week's prices. The following are the quotations:—Fine old white, 31s to 32s; old red and mixed, 30s to 31s; new about 2s per quarter of 36 stones less in each case. Malting barley is of irregular quality, and prices can hardly yet be quoted. Old short oats, 24s to 26s; old black, 21s to 22s; new short, 18s to 19s; new black, 18s to 19s per qr of 24 stones.

FOREIGN.

The Antwerp wheat market has ruled firm, with a regular current of business. We are still without definite official information as to the results of the French harvest, but it appears to be thought that an average will be maintained with difficulty, and that the wheat crop will scarcely exceed 100,000,000 hectolitres. The event of the last few days in France has been a commercial congress at Dijon; a feeling of considerable indecision prevailed at this congress with respect to the future of the French wheat trade; the milling trade of the south showed little disposition to purchase, alleging that prices were too high. Wheat quotations would, no doubt, be strengthened if French farmers did not press sales for, say, a month, but, so far from their pursuing a policy of reserve of this kind, they have been offering their wheat freely, and buyers have not been slow to profit from this tendency. Business in wheat has been inactive at Marseilles; last week's sales only amounted to 4,000 quintals. At Paris holders of wheat have demanded and obtained an advance of 2½d per quintal. Flour for consumption has not shown much change in the French capital, but a firm tone has prevailed. Disposable wheat has shown little variation at Konigsberg and Dantzic. The Russian provincial markets have been quiet, but business has, upon the whole, been pretty well maintained. In the Volga district the tendency has been firmer; flour has advanced, the demand having become more active. In the southern Russian ports prices have also shown more strength. The quantity of wheat now *en route* for Europe is returned at 1,070,000qr, as compared with 1,420,000qr at the corresponding date of 1899. The total of 1,070,000qr was made up as follows:—France, 85,000qr; Belgium, 340,000qr; Holland, 310,000qr; Germany and the North, 120,000qr; and Italy, Spain, etc., 215,000qr.

Hamburg, Saturday.—Barley report: Market rules firm, but quiet. Prices are fairly maintained, although the demand is by no means brisk. Still several parcels of choice Saale and Bohemians have been taken for export to England, and for further lots there are bids in the market, but holders are unwilling to make any concession, as freights from the interior are very high in consequence of shallow water in our river. A very fine selection is possible, as a good many samples are shown, and should supplies further increase per haps holders will have to give way.—FRANCIS M. TH. DUHNE.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—The plentiful supplies this morning met with a fair demand. Fowls: Yorkshire, 2s 3d to 2s 9d; Boston, 2s to 2s 6d; Surrey, 3s to 3s 6d; Sussex, 2s 6d to 3s 3d; Essex, 2s 3d to 2s 9d; Welsh, 1s 9d to 2s, Irish, 1s 6d to 1s 9d; Geese, 3s 9d to 4s 6d; Aylesbury ducks; 2s 6d to 3s; country ducks, 2s to 2s 6d; Bordeaux pigeons, 10d to 1s; feathered ditto, 7d to 9d; wild rabbits, 8d to 1s each; Australian, 7s 6d to 10s per dozen; hares, 2s 3d to 2s 9d; leverets, 1s 6d to 2s 6d each; young grouse, 4s to 4s 9d; old, 2s 9d to 3s; young partridges, 3s to 3s 6d; old, 1s 6d to 1s 8d per brace. Venison haunches, 16s to 22s each; ditto forequarters, 3d per lb.

Berkeley, Wednesday.—About ten tons of prime single Gloucester (summer make) were brought in, and realised higher prices than late quotations, viz., from 56s to 60s per cwt.

Liverpool, Saturday.—Bacon: There has been a steady consumptive demand, and the market rules firm, with improving tendency and generally healthy tone. Hams move somewhat slowly, and the quotations, especially for long cut, are easier. Lard rules fairly steady at the quotations; there is a fair inquiry. Cheese.—The market has developed more firmness this week under the influence of improving cables, and more disposition on the part of dealers to operate on cool fresh landed goods, and quotations show an advance of 1s to 1s 6d on the week, and closing firm. We quote to-day finest cool coloured Canadian 52s 6d to 54s; white, 52s to 53s; finest States coloured, 49s 6d to 50s 6d; white, 49s to 49s 6d. Second grades, in light supply, sell more readily from 44s to 45s, but lower qualities ruled dull and neglected, offering from 20s to 35s per cwt. Butter.—The market for finest qualities rules steady, with only a moderate demand. There is a better inquiry for medium grades, which are in light supply. We quote to-day fancy Canadian creamery, in boxes 103s to 107s; States, 96s to 100s; finest ladles, imitation creamery, and Canadian dairy, 80s to 88s; finest Danish, 114s to 120s; Irish creamery, 108s to 112s; Cork firsts, 90s; seconds, 88s; thirds, 86s per cwt.—HODGSON BROTHERS.

Newport, Wednesday.—Good supply and fair trade. Cheese: Cheddars, 56s to 58s; singles, 50s to 54s; truckles, 56s to 60s; Cheddars, 56s.

BUTTER.

Tuesday.—Bedale: 1s 5d to 1s 6d per roll of 24oz. Gainsborough: 1s 2d per lb. Leeds: Danish, 120s to 126s per 112lb; Irish creameries, 112s to 116s; York lump, 14s 6d to 15s 6d per stone; ditto long rolls, 1½lb, 1s 9d to 2s; fresh butter in 1lb prints, 1s 3d per lb. Settle: 11½d to 1s 0½d per lb. Spalding: 1s 1d per lb.

Wednesday.—Barnsley: 1s 2d to 1s 3d per lb. Boston: 1s to 1s 3d per lb. Colne: 1s 1½d per lb. Goole: 1s 3d per lb. Keighley: 1s 2d to 1s 3d per lb. Kirbymoorside: 1s per lb. Knaresborough: (Wholesale) 1s 0d to 1s 0d (retail), 1s 0d to 1s 0d per roll of 24oz. Louth: (Wholesale) 1s 1d per lb. Market Weighton: 1s per lb. Masham: 1s 4d to 1s 5d per roll of 24oz. Northallerton: 1s 0d to 1s 0d per roll of 24oz. Stockton: 1s to 1s 3d per lb. Whitby: 1s 3d per lb. York: 1s 4d per lb. Hereford: 1s 3d to 1s 4d per lb. Market Drayton: 1s 1d to 1s 2d per lb. Uttoxeter 1s 1d to 1s 2d per lb.

Thursday.—Birmingham: 1s 3d to 1s 5d per lb. Brigg 1s 1d to 1s 2d per lb. Bristol: Canadian creamery, 108s to 110s for best; Irish centrifugal, 110s to 114s. Driffield: 1s 1d per lb. Penistone: 1s 3d per lb. Ripon: 1s 3d to 1s 4d per single roll of 24oz. Scarborough: 1s 3d to 1s 4d per lb. Wetherby: 1s 1d to 1s 2d per lb.

Friday.—Chester: 1s 2d per lb. Crewe: 1s 1d and 1s 2d per lb. Derby: 1s 3d per lb. Easingwold: 1s 2d to 1s 3d per lb. Grimsby: Danish, 118s to 122s; Dutch, 106s to 112s; Canadian, 100s to 110s per cwt. Helmsley: 10d per lb. Leeds: Danish, 120s to 126s per 112lb; Irish creameries, 112s to 116s; York lump, 14s 6d to 15s 6d per stone; ditto long rolls 1½lb, 1s 9d to 2s; fresh butter in 1lb prints, 1s 3d per lb. Leyburn: 1s 7d to 1s 8d per roll of 24oz. Lincoln: 1s 3d per lb. Otley: 1s 6d to 1s 9d per roll of 24oz. Stratford-on-Avon: 10d to 1s 2d per lb. Whitchurch: 1s 1d to 1s 2d per lb. Sandbach: 1s 2d to 1s 3d per lb. Nantwich: 1s 2d per lb.

EGGS.

Tuesday.—Bedale: 11 or 12 for 1s. Gainsborough: 13 for 1s. Leeds: Yorkshire, 10s to 11s 6d per 120; Irish, 9s to 9s 6d; Danish, 8s to 9s 8d; Austrian blues, 6s 10d to 7s 3d; ditto reds, 5s 9d to 6s 3d. Settle: 12 to 13 for 1s. Sheffield: 10 to 12 for 1s. Spalding: 13 for 1s.

Wednesday.—Barnsley: 10 or 11 for 1s. Boston: 11 or 12 for 1s. Colne: 1s 8d per score. Goole: 13 for 1s. Keighley: 10 or 11 for 1s. Kirbymoorside: 12 and 14 for 1s. Knaresborough: 10 or 11 for 1s. Louth (wholesale), 14 for 1s. Market Weighton: 13 or 14 for 1s. Masham: 13 or 14 for 1s. Northallerton: 11 to 13 for 1s. Stockton: 10 or 11 for 1s. Whitby: 11 for 1s. Worksop: 2s per score. Hereford: 13 for 1s. Market Drayton: 11 or 12 for 1s. Uttoxeter: 1s 7d to 1s 8d per score.

Thursday.—Birmingham: 9 or 10 for 1s. Brigg: 13 or 14 for 1s. Driffield: 13 or 14 for 1s. Penistone: 11 for 1s. Ripon: 11 or 12 for 1s. Scarborough: 10 for 1s. Wetherby: 11 or 12 for 1s.

Friday.—Derby: 10 for 1s. Easingwold: 12 or 13 for 1s. Grimsby: Austrian, 6s to 7s; Russian, 5s to 6s 10d; Danish, 8s 6d to 9s 6d per 120. Helmsley: 13 for 1s. Leeds: Yorkshire, 10s 6d to 12s per 120; Irish, 9s 3d to 9s 6d; Danish, 8s to 9s 8d; Austrian blues, 6s 10d to 7s 3d; ditto reds, 5s 9d to 6s 3d.; Leyburn: 12 or 13 for 1s. Lincoln: 13 for 1s. Nantwich: 11 and 12 for 1s. Otley: 11 and 12 for 1s. Sandbach: 11 and 12 for 1s. Stockport: 9 for 1s. Stratford-on-Avon: 1s 3d to 1s. 5d per score. Whitchurch: 10 and 11 for 1s.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Good supplies of vegetables met a slow sale. Fruit, in fair supply, met a steady trade. Potatoes slow. Cabbages, 3s to 3s 6d; marrows, 1s to 2s per tally; cauliflowers, 2s per dozen; scarlet beans, 3s 6d per bag; carrots, 2s 9d; turnips, 2s 6d; parsley, 1s 6d; leeks, 3s; mint, 2s per dozen bunches; horseradish, 1s per bundle; Valencia onions, 5s 6d per case; Dutch, 4s per bag. Fruit: English grapes, 9d to 2s; Channel Islands, 8d to 1s 3d per lb; Denia, 4s 6d to 8s per barrel; English apples, 1s to 4s 6d; pears, 1s 6d to 5s per bushel; Californian, 7s 6d to 9s per half-case; French Williams, 2s 6d to 5s per box; greengages, 1s to 3s; plums, 1s 6d to 3s 6d per bushel sieve; peaches, 2s to 7s 6d per dozen; English melons, 9d to 1s 9d each; Valencia, 5s to 10s per case; bananas, 5s to 10s per bunch; pineapples, 1s 3d to 4s each; oranges, 17s to 24s; lemons, 8s to 18s per case. Potatoes, 3s 6d to 4s 6d per cwt.

POTATOES.

Borough and Spitalfields, Saturday.—Moderate supplies, slow demand, and prices lower. English Beauty of Hebrons, 3s 3d to 4s; Early Puritans, 3s 3d to 4s; Snowdrops, 3s 3d to 4s; Early Regents, 3s to 3s 6d; Professor Maerker, 3s to 3s 6d; and Up-to-Dates, 3s to 3s 6d per cwt.

London (King's Cross), Saturday.—Trade good; prices not quite so firm, some foreign coming had a depressing effect on the market. Snowdrops, 70s to 90s; Puritan, 65s to 80s; British Queen, 70s to 80s; Blacklands, 60s to 65s.—COUPE AND TAYLOR.

HOPS.

Canterbury, Saturday.—A considerable acreage has already been cleared. It is impossible now that the bulk can exceed one-half that of last year. Mould has affected some of the gardens, but the bulk of the crop will be of excellent quality, the recent rains and the sprightliness of late picking to enable the fruit to open off exceptionally well.

Worcester, Saturday.—Hop picking commenced this week in several grounds, and a few days' time in the remaining will be general. One or two samples were offered at market to-day, and showed fine quality for the time, but there is very little demand for new hops at present. Some trade is passing in yearling Worcesters which command fair prices.

Worcester, Saturday.—A few samples of the new crop were on offer at our market to-day, but very little business was done, growers often preferring to keep their samples in the privacy of the cart; sales noted. Picking is to be generally commenced during next week, and a better variety of samples will be on offer at our next market. Very little trade doing in last year's hops, but prices are very firm.—PIERCY AND CO.

HAY AND STRAW.

Whitechapel, Saturday.—Supplies of hay moderate. Best meadow, 80s to 110s; inferior to good, 50s to 75s; best clover, 90s to 120s; inferior to good, 50s to 80s; mixture and sainfoin, 70s to 90s; and straw, 25s to 30s per load.

Bristol, Tuesday.—The supply of hay was small, and there was a fair demand at last week's prices. Old meadow, 75s to 85s; new meadow, 60s to 70s; new clover, 80s to 90s; and straw, 40s to 45s.

Leeds, Tuesday.—A good demand for hay, and prices are firm. Prices:—Meadow hay, best quality, 75s to 80s; inferior ditto, 60s to 70s; best clover, 90s to 100s; inferior ditto, 70s to 80s; best mixed, 80s to 90s; inferior ditto, 60s to 70s per stone; straw, 30s to 34s per load.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The weather for the first ten days of September has been highly favourable to the completion of harvest work in the north and west of England. The rain in Scotland, however, has been heavy, and it is feared that a good deal of the oats in the Highlands will not ripen at all this season. The English barley crop is now better spoken of than was the case a fortnight ago. Much of it, certainly, is stained, but the early threshings were indiscreet, and gave the markets an unduly unfavourable notion of what the bulk of the crop was. As regards yield, thirty-two bushels is accepted by most authorities. There are plenty of parishes in East Anglia where this is much exceeded, but the poor yields in counties like Wilts and Somerset, Hereford and Worcester, Devon and Cornwall, have to be considered. The yield of oats is extremely irregular; many growers in the south have less than four quarters to the acre, while five quarters are common in Lincolnshire, and six have been attained in the north and north-west on favoured farms. The average for the whole country is not expected to exceed thirty-six or, at most, thirty-seven bushels. The French wheat threshings go on briskly, and reveal a deficiency in weight per bushel, as well as in yield per acre. French imports in 1901 may easily be considerable.

We have had for the first eight months of 1900 almost exact an average rainfall; but too much of it fell in August.

	RAINFALL. This Year.	Fifty Years' Average.
January	2·75	1·80
February	3·81	1·62
March	1·10	1·63
April	0·72	1·80
May	0·98	2·10
June	2·73	1·99
July	1·20	2·70
August	3·06	2·40
	16·35	16·04

The damp condition of too many of the new samples witnesses all too obviously to the frequent and heavy character of the August "showers," but the land is not at all lacking in kindly moisture for starting the growth of catch crops and for nourishing roots, and at the same time even low-lying fields are seldom in any way waterlogged. Farmers should sow autumn wheat early this year.

During the cereal year the total sales of wheat at the statutory markets are reckoned to have been 40 per cent. of the total yield. This is a figure which has been foreseen and represents, in fact, the usual calculation by statisticians. Barley sales are larger by 45 per cent. This is thought to be somewhat above the average rate of market sales for the last quarter of a century; farmers, for one thing, tend to brew less ale at home. Oats show that the local and home demand is still the greatest by far. Market sales represent little over 7 per cent. of the total crop production. The direct sales off the farm to horse owners are a feature of this trade.

The average values have been :—

CEREAL YEAR'S AVERAGES. 1899-1900.	s.	d.
Wheat	26	4
Barley	25	0
Oats	17	4

The best wheat average of recent cereal years was in 1897-8, when 36s. 2d. was averaged; the worst was 1894-5, when 21s. 5d. was the mean. The best barley average of recent years was in 1890-1, when 28s. was reached, while the worst year was 1894-5, with 21s. 5d. as the mean. Oats were dearest in 1891-2, when 20s. 8d., an excellent price, was the mean. In 1895-6, on the other hand, the depression was extreme, and only 14s. 1d. was averaged.

Details of breadstuffs imports for the cereal year have now been compiled from official returns, and the imports are seen to have been moderate on the whole.

WHEAT AND FLOUR IMPORTS COMPARED. Cereal year.	Wheat (in qrs.).	Flour (reduced to qrs.).
1899-1900	15,011,000	7,151,000
1898-1899	15,338,000	7,508,000
1897-1898	15,310,000	6,625,000
1896-1897	14,906,000	6,646,000

The disconcerting point about these figures is that the proportion of flour imported has increased considerably since 1897. The wheat imports then were larger, those of flour smaller than on the past twelvemonth. English millers have reason to view these figures with interest :—

FARMERS' WHEAT SALES.	Qrs.
1899-1900	7,324,000
1898-9	7,871,000
1897-8	5,704,000
1896-7	5,843,000

The crop of 1899 was more than 547,000 qrs. inferior to that of 1898, so that the 7,324,000 qrs. sold have reduced stocks of old English wheat to a small compass.

The fairly liberal stocks of imported produce prevent the exhaustion of old English wheat from greatly affecting the trade.

American and English wheat stocks at the beginning of a new cereal year thus compare :—

	American.	English.	Total.
Sept. 1, 1900	6,246,000	2,215,000	8,461,000
,, 1899	4,340,000	2,350,000	6,690,000
,, 1898	740,000	680,000	1,420,000
,, 1897	1,935,000	827,000	2,762,000

Thus, the two great wheat trading countries start a new campaign with 1,771,000 qrs. increase in their known resources.

The wheat supplies on passage to the United Kingdom are as follows :—

	Qrs.
Russian	85,000
Californian	855,000
American	385,000
Argentine	330,000
Australasian	215,000
All other countries	15,000
Total	1,885,000

Imports of the week comprised 390,000 qrs. of wheat, 95,000 sacks of flour, 269,000 qrs. of maize, 80,000 qrs. of barley, and 145,000 qrs. of oats. Stocks of foreign oats are known to be heavy, and of barley light. Of maize they are probably about an average.

Of barley there are 390,000 qrs. on passage, against 355,000 qrs. last year, and of maize 775,000 qrs., against 845,000 qrs. last year. The markets are decidedly firm for maize. Owing to the large shipments from America there are pauses and hesitations at different exchanges, but the trade as a whole is excellent, and as America shipped freely in September last when 16s. 3d. was accepted for cargoes, supply is naturally pushed on when 20s. 3d. is quoted. The price of Argentine after a brief decline is again appreciating as the shipments from La Plata have not come up to expectations. The round maize of Russia, Roumania, and Asia Minor is in more demand than supply, and as a consequence value ranges 3s. to 3s. 6d. above the terms for flat.

Barley is a very small trade as yet. It is not until October is with us that this trade assumes its full dimensions. The Persian consignments at an 18s. level have come in very handy this summer.

Oats are a liberal supply of cheap Russian sorts at 14s. and 14s. 6d. per quarter. America is sending a slightly superior article at 15s., and the Canadian oats at 15s. 6d. to 16s. are preferred to the American. Fine heavy oats from Sweden and Finland are very scarce. There is also a market spot scarcity of tares, of cottonseed, and of buckwheat, so that holders of these staples are doing well. The new crop of linseed in Russia is said to be very disappointing.

THE BALTIC.

Wheat cargoes are slow, but firm. A moderate trade of a speculative nature has been done in American spring wheat for March shipment at 33s. 6d. per qr.—a price arguing belief in a fairly substantial rise during the winter. For October shipment 31s. 9d. is taken. Other sales include finest Duluth at 32s. 6d., Californian at 31s. 6d., Walla at 30s., Oregon at 31s. 9d., Argentine at 30s. 3d., Roumanian at 29s., and fine Azima, Odessa shipment, at 31s. per qr.

Maize, despite large recent shipments from the United States, makes 20s. 3d. for October shipment, Odessa makes 26s., Galatz 22s. 6d., Argentine 21s. 6d. Barley has made 19s. 6d. for a large cargo of South Russian, 18s. for arrived Persian, and 26s. 9d. for new Californian brewing just shipped. The other sales of the week include Roumanian rye at 26s., Canadian peas at 28s. 9d., and Smyrna beans at 28s. per qr.; American linseed cake at £7 13s. 9d., Egyptian cottonseed at £7, linseed oil at £33 5s., rape oil at £29, and cottonseed oil at £21 10s. per ton.

The following is a return of the grain and seed-laden vessels due to arrive within a week :

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The hot, fine weather in London to-day—it was 77 degrees in the shade at noon on the Corn Exchange—caused trade to open with reserve, and prices have ceased advancing. New English wheat was in improved condition, and the 32s. freely paid for good, heavy samples gave the market an air of greater firmness than it actually possessed. Foreign wheat was not saleable at any advance. Barley was a small trade. Persian at 18s. 6d. and Californian at 27s. were the sorts chiefly in evidence, and *they* were not plentiful. Maize was irregular, the weather is against a large retail use. The price of oats was tending in buyers' favour. Miscellaneous sales include good new Essex mustard-seed at 13s. per bushel, Dutch carraways at 36s., Larache canary-seed at 35s. per 464lb., Smyrna dari at 26s. for best, buckwheat at 29s. for finest, French and Torrified barley at 24s. per qr.

(*For Close of Market see foot of Column.*)

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

A FAIR TRADE WAS DONE IN WHEAT AND MAIZE AT CURRENCIES. IN OATS AT 3d. TO 6d. DECLINE. LINSEED AND ALL OILSEEDS WERE HELD FOR MORE OR LESS FANCY PRICES. A RISE OF 5s. PER TON IN OILCAKES WAS EFFECTED.

THE FLOUR TRADE.

MARK LANE, Sept. 10th.

The market to-day was fairly well attended, as the big exhibition at Islington brings many bakers to town. But prices were certainly no better from last week. Town households at "a full 24s. 6d." sold fairly well, and country patents made 24s. for best. The great majority of country-made roller flour samples came at 22s. per sack. American sorts, patents and baker's, about kept old rates. Barley meal was in fair request at 19s. for best, bean meal at £8 for best, pea meal at £6 17s. 6d. for medium, pea chips at £9 5s., the finest Farina at 10qs., American maize starch at £9, maize cones at 18s. 6d. for No. 1 feeding, uncleaned rice at 6s. per cwt. and rice cones at 22s. per sack. The close of the market was in favour of holders for bran, pollard, and middlings, while rice meal was generally held for 2s. 6d. to 5s. per ton advance on the week.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—	Sept.	Oct.	Dec.
	s. d.	s. d.	s. d.
Sept. 3 noon	6 7	6 8	6 9
4 p.m.	6 7	6 8	6 9
Sept. 4 noon	6 7	6 8	6 9
4 p.m.	6 7	6 8	6 9
Sept. 5 noon	6 7	6 8	6 9
4 p.m.	6 7	6 7	6 9
Sept. 6 noon	6 7	6 7	6 8
4 p.m.	6 7	6 7	6 8
Sept. 7 noon	6 6	6 7	6 9
4 p.m.	6 6	6 8	6 9
Sept. 8 noon	6 6	6 8	6 9
To-day noon	6 7	6 7	6 8

Some sales for March delivery were put through at noon to-day at 6s, 10d. per cental.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

THE BALTIC, Monday, 1 p.m.

State of Trade.

Wheat cargoes are fairly steady, but sales are rather difficult. Barley for future shipment is a little pressed on sale. Oats and maize are quiet, but not lower from Saturday.

Business Done.

Wheat.—Californian, 31s 6d, arrived; Argentine, 29s 6d, arrived; fine South Australian, 32s, on passage; Red Winter, 29s 9d, on passage; Red Winter, 30s, prompt shipment; No. 1 Northern, 31s, prompt shipment.

Maize.—Roumanian, 20s 9d, new crop, January shipment; American, 19s 9d, October shipment.

Barley.—Roumanian, 19s, October shipment; Californian, 26s 3d, October shipment.

Oats.—No. 2 White Clipped American, 14s 9d (new crop), October shipment; St. Petersburg, 13s 3d, prompt shipment.

Linseed.—Calcutta, 56s 9d, arrived.

Cottonseed.—Egyptian, £7 1s 3d, on passage.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour, a steady trade at last week's full prices.—T. S. Medill.

The trade for milling offals remains unaltered, with buyers objecting to the high prices which are now current.—Richard Doggett, Mark Lane.

Wheat, liberal arrivals. A slow trade at prices of last Monday. Flour steady in value. Barley dull, unchanged. Oats, heavy arrivals, 3d. per qr. cheaper.—Coventry, Mark Lane.

There is still a fair demand for early trifolium and other seeds for autumn sowing. Winter tares are in better supply and the term cheaper. A large business is passing in Irish grasses. The French crop is the smallest for many years, and growers will not sell. Owing to the bad crop reports of red clover from America, Germany, and France, there has lately been a large trade in yearling seed, and prices have advanced considerably. To-day's values for English show an advance of from 10s. to 12s. since close of last season. English red clover is now being harvested, but in most cases the yield is expected to be very light. New Essex mustard now offering, quality fine but prices not yet fixed. Bird seeds are firm.—J. Picard and Co., Mark Lane.

Offals: Bran and pollard in good request, prices firm. Weather favourable for harvest operations.—Greenhill Brothers, Belfast, September 8.

Flour.—The market continues quiet, with here and there some demand at prices under replacing values. Grain: Indian corn has continued firm, and a further advance of 1½d per boll paid. Beans are unchanged. Pease firm and about 3d per boll higher on spot. Barley very scarce. Canadian oats not being so plentiful are 1½d. up. Mill stuffs: Bran and thirds in good demand at full prices.—McKinnon and McDonald, Glasgow, September 8.

Wheat a moderate trade at late rates. Flour very steady, with rather more doing at extreme prices for foreign. The Liverpool Millers' Association make no change in the minimum price of bakers. Maize.—Mixed maize moves steadily into consumption at last market's figures. Small round, owing to extreme scarcity, asks 2d. to 3d. per cental advance. Plate is in fair request at unchanged values. Barley is firm for malting at 6d. to 1s. advance, with a good trade doing. Feeding firm and in fair request. Beans firm, inactive. Peas are unchanged with a better inquiry. Oats firm, with more inquiry for English; foreign kinds are steady at quotations. Oatmeal small trade at late rates. Oilcake firm with a good demand at an advance of 2s. 6d. to 5s. per ton.—Ross T. Smyth, Liverpool, September 8.

New oats appeared on Dundee market as early as August 16, and are now in fairly good supply at all Scotch markets south of the Grampians. Very wet weather has delayed harvest north of the chain, and we fear that with a low temperature setting in many fields in Inverness, Elgin, and other northern counties will now never ripen.—Dundee, September 10, 1900.

Norwich.—Milling offals.—The good sale of middlings and pollard has been fortunate for millers, and has helped to turn the scale where the price of 22s. for sound roller-made flour has been rather discouraging. The price of the maize germ meal from America has also been raised, and English-made shares in the general stiffness.

Dublin.—The Irish wheat crop.—In Ireland the wheat crop is estimated at twenty-six bushels per acre on 53,797 acres, or 1,398,722 bushels altogether. This must be added to ordinary calculations of the yield for Great Britain when the wheat crop of the United Kingdom is being considered.

Edinburgh.—Oatmeal.—Oatmeal millers to the number of fifty have banded themselves together to protect the purity of their trade, and to guarantee purchasers against adulteration. We may regret that a proposal to admit the press to their meetings has been negatived, but the present law of libel seems in many ways designed solely in the interest of the evil-doer, and we can perceive how names might have to be mentioned the printing of which would render the original speaker liable to prosecution.—Our Edinburgh Correspondent.

SEEDS.

London, Monday.—Messrs John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., report a strong market for clover seeds. American advices indicating a still higher level of values. Full prices are asked for alsyke, white trefoil, and timothy seeds. Perennial and Italian rye-grasses are still tending upwards. Seed rye and winter tares keep exceedingly firm. There is no fresh feature in the trade for birdseeds. Blue peas and haricot beans are steady in value and demand.

CATTLE.

Metropolitan Market, Islington, Monday, Sept. 10th, 1900.

	British.	Total Sept. 11th 1899.
Beasts	1,479	1,479 — 1,745
Sheep and lambs	6,310	6,310 — 7,253
Calves	—	— 6
Pigs	15	15 — —
Milch cows	70	70 — 65

Quotations per stone (sinking the offal).

ENGLISH.	Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	3 4 —	4 4 —	5 0
Sheep	3 3 —	5 2 —	6 0
Lambs	4 —	— —	— —
Pigs	3 4	— —	4 4

Milch cows, per head, £15 to £22.

British arrivals include 0 Lothians, Northern —, Eastern Counties 41, Midland Home and Western Counties 1,433, Devon, 60; Ireland, 136.

There was a rather larger supply of beasts on offer to-day than last Monday, arrivals from Midland Counties and Ireland being somewhat heavy, while Scotch were very moderate, consequently late rates were quoted for all grades, a number of sales at a decline of 1d to 2d per stone. But few cattle of prime beef were in evidence, and choice Lincolns and Herefords were readily sold at about late rates, and fairly good to ready sales at about same rates as early last week were effected.

The following are top quotations per 8lb. (sinking the offal):—

	To-day.	Sept. 11th, 1899.
Devons	4s 10d to 4s 11d	4s 4d to 4s 6d
Herefords	4s 10d to 4s 11d	4s 4d to 4s 6d
Runts	4s 10d to 4s 11d	4s 4d to 4s 6d
Lincolns	4s 4d to 4s 6d	3s 10d to 4s 2d
Irish	4s 4d to 4s 6d	4s 0d to 4s 2d
Fat cows	3s 6d to 3s 8d	3s 6d to 3s 8d

In the sheep market the supply showed an increase compared with last Monday, and included two-thirds from the Eastern counties and 1,000 from Ireland. Best qualities were in short supply, and sheep scarce sold readily at late rates, but mealy descriptions were slow of sale, even at a reduction of 2d per 8lbs. Ewes were in short supply but steady in value. For lambs there was little inquiry; best quality small breeds however, maintained last week's rates.

Undermentioned quotations are at per 8lbs (sinking the offal) and are for the best of each class pointed:—

	To-day.	Sept. 11th, 1899.
7½ to 8 stone Downs	5s 10d to 6s 0d	5s 6d to 5s 8d
9-stone ditto	5s 8d to 5s 10d	5s 4d to 5s 6d
10-stone half-breds	5s 6d to 5s 8d	5s 2d to 5s 4d
11-stone Lincoln	5s 3d to 5s 4d	5s 0d to 5s 2d
10-stone Irish	5s 4d to 5s 6d	5s 4d to 5s 6d
10 stone Down ewes	4s 4d to 4s 6d	4s 0d to 4s 2d
11-stone half-bred ditto	4s 0d to 4s 2d	3s 8d to 3s 10d
5-stone Down lambs	5s 10d to 6s 0d	5s 2d to 5s 4d
6-stone half-bred ditto	5s 4d to 5s 6d	5s 6d to 5s 8d

Pig trade slow, except for best small breeds, which made 4s 6d per 8lb.

St. Ives (Hunts), Monday.—Beasts 570, sheep, lambs 2,127, pigs 131 horses 5. Beef 7s 3d to 8s 0d; mutton, 7s to 9s 4d; lamb 8s 9d; pork, 6s 9d to 7s; sows 5s to 5s 9d. Fat beasts good demand, stores slow. Fat sheep good demand, stores slow. Fat and store pigs ditto. Milch cows, fair trade, prices £14 to £23.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 1,803. To-day's supply, compared with last market day (Saturday), showed an increase of 414, and consisted of 1,215 from the United States and 678 from Canada; besides the above number 182 in the country were held back, the majority arriving and offered for sale being ranche cattle. Owing to the warmer weather and larger supplies expected in the north, trade ruled slower at a slight decline in value, a clearance of part on the quay. The following were the quotations, offal given in:—Best States, 4s 6d, 10-stone ditto, 4s 3d to 4s 4d; Canadians to 9-stone Canadians, 4s 2d to 4s 4d; Runners, 3s 10d to 4s. There were no sheep on the market. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 2,560, 3s 11d to 4s 2d per 8lb to dress about 72¼lb; sheep, 1,836, 4s 2d to 4s 4d per 8lb, to dress from 65lb to 72lb.

Liverpool, Monday. Trade slow for cattle, and last week's rates barely maintained except for finished quality. Demand slow for sheep and lambs, and prices lower all round, especially so for middling and inferior sorts. Beef, 7d to 8d per lb; mutton, 8d to 8½d per lb; lamb, 8d to 9d per lb. At market: 1,630 cattle and 11,365 sheep.

PROVISIONS.

London, Monday.—The arrivals from Ireland for the last two weeks were 6,105 bales bacon, and from foreign ports last week, 9,717 bales bacon. There was a marked improvement in the demand for bacon, and notwithstanding a considerable increase in the arrivals from Denmark, prices hardened to the extent of some 2s against buyers, at the close the market was fairly well sold up. Prices ranged:—Irish, 56s to 62s up to 66s; Danish, 54s to 62s up to 66s; Canadian, 54s to 58s up to 60s. Butter of all descriptions opened a very slow market and buyers found plenty of room in their favour, and quotations can almost be said to be nominal. Danish, 110s to 118s; French, 84s to 88s; Irish, 84s to 88s; Canadian, 100s to 108s. Lard in steady demand and unchanged prices.

FEEDING STUFFS.

London, Monday.—Feeding stuffs are very firm and mostly dearer, with rather a slow trade. Linseed cake 2s 6d, rice meal 2s 6d, and cotton cake 7s 6d up. Linseed 2s dearer.

English linseed cake	£5	5 0 to 5 7 6		ex mill
American Calcutta linseed cake	7 17 6	to	—	ex quay
American Western linseed cake	7 15 0	to	—	ex quay
Russian rape cake	7 [illegible]	to	—	ex quay
Feeding cake (Schmidsen's S P.K. (guar. 12 p.c. oil)	[illegible]			ex Liverpool
Decorticated cotton cake	6 17 6	to	7 0 0	ex quay
Decorticated cotton meal	[illegible]			ex quay
London made cotton cake	[illegible]			ex mill
Egyptian cotton cake (in bags)	4 12 6	to	—	ex quay
Bunton decorticated AK grades (bags included)	4 [illegible]			on rail, Bunton
Rangoon Rice Meal	4 12 6	to	4 15 0	ex warehouse
American linseed in bulk, per [illegible]	[illegible]			ex quay
Calcutta linseed in bags, per 480 lbs	2 17 0	to	—	ex warehouse

—Rigby and Jen Hewes.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: [illegible] what they were estimated. Yearling hops are going into consumption at increased value.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK EXPRESS.")

Trade in London.

Though there was a rather larger supply of fat beasts at the Islington Market on Monday (none on sale on Thursday), and but little corresponding increase in the demand, trade from start to finish was of a decidedly steadier character, notwithstanding the higher rates—1d. to 2d. per 8lb. asked and obtained—this remark applying to both prime and second quality, of which a clearance was made. Fat bulls, being short in number and wanted, also made better prices, whilst fat butchering cows were easier to purchase. Both Runts and Irish are now arriving in larger numbers, the latter being consigned from Dublin and Waterford. Rough cattle were difficult to cash, owing to so many having been seized on account of tuberculosis. At Deptford trade on Wednesday was sharp at an advance of fully 1d. per 8lb., but on Saturday was a shade slower and easier. On that day only a little more than half of the arrivals were put on the market, 1,150 being withheld. The total number on offer for sale on both markets was 3,929 (previous week, 4,421), consisting of 1,430 British (increase 110) and 2,499 foreign (decrease 602). These latter comprised 2,358 from the United States and 136 from Canada. The following were the top rates paid per 8lb. (sinking the offal):—90-stone Herefords, 5s.; 80-stone Devons, 4s. 10d.; 90-stone Runts, 4s. 11d.; 100-stone Lincolns, 4s. 6d.; 110-stone ditto. 4s. 4d.; 90-stone Dublins, 4s. 6d. ;95-stone Waterfords, 4s. 4d.; 90-stone States, 4s. 6d. to 4s. 8d.; 88-stone Canadians, 4s. 4d. to 4s. 6d.; 100-stone fat cows, 4s.; 100-stone fat bulls, 3s. 6d. to 3s. 8d. The sheep trade, which was confined to the Islington Market, was of a slow nature, but for the best Downs and halfbreds late rates were well maintained, whilst middling quality, of which too many were forwarded, met with forced sales, with rates ruling in favour of the buyer. A clearance of these; on the second market day (Thursday) a good many were turned out unsold. For lambs the general top rate was 9d. per lb., but 9½d. to 9¾d. per lb. was paid on Monday for a few pens of extra choice Southdowns to dress about 68lb. Plenty of ordinary lambs made no more than 8d. The total number of sheep and lambs penned was 8,860, as against 9,820 during the preceding week. Best pens made per 8lb. as follows (sinking the offal):—7½ to 8 stone Downs, 6s.; 9-stone ditto, 5s. 10d.; 8-stone Scotch, 6s.; 10-stone Downs, 5s. 8d. to 5s. 10d.; 10-stone halfbreds, 5s. 8d.; 10-stone Irish, 5s. 6d.; 11-stone Lincolns, 5s. 6d.; 10-stone Down ewes, 4s 6d.; 11-stone halfbred ditto, 5s. 4d. to 5s. 8d. Calves numbered fifty-five, trade for which was much slower, except for the very choicest, which made 6s. per 8lb., sinking the offal.

Trade in the West.

The store sheep trade is as good now as it has been for a long time past, prices all round showing a rise of from 3s. to 6s. a head compared with this time last year; but the improvement is more marked in respect to lambs than as to ewes, this being due to the large amount of keep now available for the use of this class of stock. Another factor influencing the trade is the splendid root crop prospects, which has seldom ever been better. Store bullocks are also finding a ready sale, barreners in fresh condition even more so than milchers, though these are, like barreners, making good prices, ranging from £24 to £33 per pair for the best, and £16 to £22 for plainer kinds. Fat bullocks of the steer or heifer class make 11s. 6d. to 12s. per score (or from £18 to £23 apiece); whilst cows are an equally firm trade at 10s. 6d. to 11s. Fat sheep are, from scarcity, very dear, others making up to 8½d. per lb., and ewes 7½d. Lamb is also in demand at very fair prices—10d. to 11d. per lb. Other stock is proportionately dear, the prospect all round being very hopeful indeed.

Trade in Ireland.

Although there was an excellent attendance of local and cross-Channel buyers at last Thursday's Dublin market, their presence was to a great extent neutralised by the very large increase of over 700 cattle and 1,100 sheep, and prices retreated to from 10s. to 15s. per head on the former, and from 1s. to 2s. per head on the latter, as compared with the market of the previous week. Trade for beef opened well, and last week's terms were generally repeated in the morning for prime cattle, but subsequently a quieter tone prevailed, and market closed with average beasts fully 1s. per cwt. cheaper, and lean, rough cattle considerably lower. Choice ox and heifer beef, 56s. to 60s., and for some fancy lot 62s. per cwt.; medium, 50s. to 55s.; inferior, 42s. 6d. to 47s. 6d. per cwt. Best qualities of wether mutton met with a steady trade, but on average sheep there was a falling off, and middling descriptions of shipping hoggets underwent a very decided shrinkage in price. Dairy cattle in larger supply with slow sale, except for best springers and new milch cows, which made from £20 to £22 each, average selling from £10 up. Not many stores in market, but at some large country fairs stock has been going briskly at good prices. Some very large sales of rams and ewes will shortly take place in Dublin. The pig market was liberally supplied with ordinary hogs, but choice light-weight descriptions scarce, and held firmer figures. Heavy pigs in slow demand at about 2s. per cwt. lower. Best light hogs, 44s. to 46s. per cwt.; coarse, 34s. to 36s. per cwt., and inferior from 30s. per cwt. Number of cattle in market, 3,772; sheep and lambs, 8,858.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—The supplies of fat cattle have been rather larger, and the quality generally fairly good. There has been a good demand and prices have been good, especially for the best class, last week's rates being easily maintained. Fat sheep and lambs have again been a very large show, though not quite so large as last week; there has been a fair trade, but prices have been rather lower than last week, and except for the best class of young shop sheep a reduction of about 1s. had to be taken. Fat calves an exceeingly large and good show; best sold dear, others rather cheaper. Pigs, an average show, sold dear. In the store market there were fair supplies of sheep, which met a moderate demand, the best class selling at about the same prices as last week, and some of the secondary quality remaining unsold. Store cattle were a considerably larger show, and generally of better quality. There has been more inquiry, and all offered were easily disposed of at fully late rates. Large numbers of milch cows have again been offered, and they have met a dear trade. Quotations:—Best beef, 8s. 6d. to fully 8s. 9d. per stone; current, 8s. to 8s. 6d. per stone; mutton from 7½d. to 8¼d. per lb.

LONDON.

London Central, Wednesday.—Fair supplies and trade steady for all descriptions, excepting mutton, which was quiet. Arrivals of beef include 420 Liverpool sides, 1,600 hindquarters, and 800 forequarters American refrigerated. Beef: Scotch short sides, 4s 6d to 4s 10d; long, 4s 2d to 4s 4d; English, 4s 2d to 4s 4d; American Deptford-killed, 4s 1d to 4s 2d; Liverpool, 4s 1d to 4s 2d; American refrigerated hindquarters, 3s 8d to 4s; forequarters, 2s 8d to 2s 10d. Mutton: Scotch, 5s; wethers, 4s 4d to 4s 6d; ewes, 3s 6d to 3s 8d; Dutch, 3s 8d to 4s; English lamb, 4s 8d to 5s. Pork: English, 4s to 4s 4d; and Dutch, 3s 8d to 4s. Veal: English and Dutch, 4s to 4s 4d per 8lb.

London Central, Friday.—Fair supplies on offer, and firm trade for all kinds, with the exception of mutton, which ruled very slow. Arrivals of beef include 60 tons Scotch, 640 Liverpool sides, 3,500 hindquarters, and 2,000 forequarters American refrigerated. Quotations:—Scotch beef, short sides, 4s 6d to 4s 8d; long, 4s 2d to 4s 4d; English, 4s 4d to 4s 6d; American, Deptford-killed, 4s to 4s 2d; Liverpool, 4s 1d to 4s 2d; American refrigerated hindquarters, 4s to 4s 2d; forequarters, 2s 10d to 3s; New Zealand hindquarters, 3s 1d to 3s 2d; forequarters, 2s 2d to 2s 3d. Mutton: Scotch, 5s; wethers, 4s 4d to 4s 6d; ewes, 3s 6d to 3s 8d; Dutch, 3s 8d to 4s; Wellington, 2s 2d to 2s 4d; Canterbury, 2s 3d to 2s 6d; Sydney, River Plate, 2s to 2s 1d. English lamb, 4s 8d to 5s; New Zealand lamb, 2s 10d to 3s. Pork: English, 4s 2d to 4s 8d; Dutch, 3s 8d to 4s. Veal: English and and Dutch, 4s to 4s 4d per 8lb.

Islington, Thursday.—There was to-day, compared with last Thursday, a slight decrease in the number of beasts on offer, the supply consisting of middling quality butchering cows and fat bulls, for which there was a rather slacker demand, and consequently a slower trade, rates ruling slightly in favour of the buyers. In the sheep market the number penned showed a decrease of 750, the supply including 140 Irish. Wether sheep of best quality made Monday's rates, but other grades were easier. The few ewes on offer found early buyers, and were steady in value. Best quality lambs scarce, and rates consequently were steady; half meaty sorts difficult to cash. Leading pens made per 8lb as follows (sinking the offal):—7½ to 8-stone Downs, 6s; 9-stone, 5s 10d; 10-stone Irish, 5s 4d to 5s 6d; 10-stone Downs, 5s 8d to 5s 10d; 10-stone half-bred, 5s 8d; 10-stone ewes, 4s 4d to 4s 6d; 11-stone Lincolns, 5s 6d; 5-stone fat Down lambs, 6s; 6-stone halfbred ditto, 5s 4d. There being less demand for calves, sales were more or less forced at a slight decline in value, best being quoted at 5s 10d per 8lb. The pig trade was slow, top value 4s 6d per 8lb.

COUNTRY.

Ashford, Tuesday.—Best steers and heifers were quoted up to 13s per score; medium beasts, 10s 6d to 11s 6d; and cows, 8s to 10s. The inferior kinds of mutton were harder to sell. Choice Downs made 5s 4d to 5s 8d; best Kents, 5s to 5s 4d; medium Kents, 4s 6d to 4s 10d; and barrens, 3s 8d to 4s per 8lb. Veal and lamb were unchanged, but pork sold rather better, small roasters going up to 10s 6d per score.

Basingstoke, Wednesday.—At Raynbird and Sons' sale yard there was a good attendance of buyers to meet a supply of 39 fat beasts, 69 calves, 606 fat sheep and lambs, 282 pigs, and 68 head of store cattle, for which the following prices were realised:—Fat beasts, £13 to £20 10s; fat calves, 80s to £5 15s; small, 25s to 52s 6d; fat wethers, 41s to 59s; fat ewes 24s to 39s 6d; fat lambs, 36s to 49s 6d; fat hogs, 56s to 70s; fat porkers, 46s to 54s; small, 25s to 42s; store pigs, 15s to 25s; dairy cows, £7 10s to £16 15s. The trade for fat beasts was without fresh feature, last week's prices ruling in most cases and a clearance made. A clearance very nearly made of the supply of sheep and lambs, good quality wethers and young ewes made full prices. Big lambs in less demand, but a better trade for ewes and lambs in store condition. Milch cows and heifers are shown in shorter numbers and are making more money. Store cattle meet a great trade. Fat calves are a ready sale at late rates. Fat porkers were cleared with a firm trade all-round. Store pigs are dearer with a good demand.

Boston, Wednesday.—A moderate show of cattle. Best bullock beef, 7s 9d to 8s 3d; cow beef 6s 9d to 7s 3d per stone; store beasts, £16 to £17; young steers, £9 10s to £11 10s; milch cows; £18 to £21; heifers in calf, £16 to £18 10s; calves, 65s to 68s; wether mutton, 8d to 8¼d; ewe mutton, 5½d to 6d per lb; lambs, 24s to 32s; Hampshire rams, £3 10s to £4 5s.

Braintree, Wednesday.—At Messrs. Balls' auction mart a good all-round trade prevailed. Numbers penned: Beasts 37, fat sheep 247, hogs 28, store pigs 375, milking cows 5, calves 12, and store sheep and lambs 700. The supply of beasts was limited, sheep and pigs preponderating. Store lambs sold well, cows and calves met a ready sale. Prices: Beef, 4s 8d to 5s; and mutton, 5s to 5s 6d per stone; pork, 8s to 8s 6d per score.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under..	8s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in.	8s 0d
Under 11 sc 10 lbs ..	Not exceeding 2¾ in.	7s 3d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 372; sheep, 815; pigs, 263; horses, 5. Beef, 7s to 8s per stone; mutton, 4s to 5s 8d; pork, 5s 9d to 6s 3d. Very few store beasts to hand Fat beasts a large show, and fair trade. Fat sheep, a good number to hand, and a good trade at late rates. Stores, not so many to hand, and trade slow. Fat pig trade trade not quite so good as last week. Stores, a fair trade all ound.

Canterbury, Saturday.—Short supply of lambs, which met slow sale. A few very strong Kents went up to 26s, but average animals ranged from 14s to 21s; old sheep, 22s to 28s; useful heifers were selling at about £7 10s. A number of rough cows and calves were also offered.

Carlisle, Saturday.—Large supply of Irish store cattle this last week, consisting chiefly of useful wintering heifers. With the improvement in the weather the attendance was larger and trade more active at full prices, which were quoted at £5 5s to £8 10s for smaller sorts, and £10 10s to £14 10s for the most useful winterers. Stall-feeders made prices up to £17 10s. S nall supply of pigs, and slow sale at 20s to 25s.

Dorchester, Saturday.—Small supplies came to hand. Milch beasts made a very good trade. Heifers and calves sold from £14 to £17; cows and calves, £11 to £13; barreners, £16 to £26; fat bullocks, £13 to £19 10s; fat cows, £14 to £17. Sheep met a fair trade; ewes made from 38s to 44s; wethers, 46s to 51s; lambs, 28s to 34s 6d; crossbreds, 31s to 36s.

Dublin, Thursday.—A well sustained demand for all choicely finished cattle, and prices fully equal to the enhanced values of last week. Inferior and thinly meated cattle much in excess of demand, with prices perhaps a shade weaker. Clients are requested to note that it would be better not to cut the tails of cattle before forwarding. Fair demand for all classes of sheep and lambs at about late rates. Cattle (best), 32s to 35s per cwt. Other descriptions, 28s to 31s per cwt. Mutton, 5¾d to 7¼d per lb. Lambs, 18s to 35s each.—GANLY, SONS AND CO.

Dumfries, Wednesday.—Average supplies. Beef in good demand, making 38s per live cwt. Horned bullocks made up to £19; Galloway bullocks, to £21; polled bullocks, to £15 10s; Galloway bullocks, to £21; Ayrshire bullocks, to £16; polled heifers, to £15 15s; Highland bullocks, to £14; and calving cows and heifers, to £14 each.

Edinburgh, Wednesday.—Supplies were small, and a dull trade was reported; shorthorned bullocks, 14 guineas; polled, £15; stirks to £10; best shorthorned cows, £22 to £27; Cheviot sheep, 34s to 50s; half-breds the same figure.

Glasgow, Wednesday.—Numbers: 743 cattle, and 10,687 sheep and lambs; trade fair. Prices for top Scotch cattle, 66s to 68s per cwt; top Irish, 60s to 62s; top mutton, 8d to 8¼d per lb; secondary, 7d to 7¾d; top lambs, 8¾d to 9d. Dead meat firm. Best Scotch beef, 6½d to 6¾d; best States, 6d; cows, 5½d to 5¾d.

Leicester, Saturday.—Fair attendance, with better supplies of stock in good condition. Trade steady. Milch cows in demand at £16 to £20 each. Bullocks £10 to £14 per head. Calves a slow trade.

Lincoln, Tuesday.—Good show of beasts, and a fair trade. Prime beef, 7s 6d to 8s; lower qualities, 6s 6d to 7s 6d per stone. The supply of sheep was small, and trade was good. Ewe mutton, 6½d to 7d; wether ditto, 8d to 9d; lamb, 8¾d to 9d per lb.

Lincoln, Friday.—The supply of cattle was very small, being almost confined to milch beasts, there being scarcely any store beasts on sale. Milch beasts made from £14 to £20, each. There were several pens of sheep, but no trade was done buyers being absent at the ram fair.

Newcastle, Tuesday.—Good average supplies, prices easier for sheep and lambs, and higher for veal. Numbers:—Cattle, 1,726; sheep and lambs, 9,907; calves, 68; pigs, 567. Prices (sinking the offal):—Beef, 5s to 8s 6d; pork, 7s to 7s 9d per stone; mutton, 5½d to 8d; lamb, 7¾d to 8½d; veal, 5½d to 9d per lb.

Norwich, Saturday.—There was a heavy supply of store cattle on offer here to-day; the demand was, however, also good, and previous prices were about maintained. Fat beasts, which were in average supply, were firm at 7s 6d to 8s per 14lb. The supply of store sheep was moderate; a good business was passing at slightly higher rates, lambs making 25s to 35s, and keeping shearlings 40s to 47s per head. Fat sheep brought 8s to 8s 6d and 9s per 14lb. Rains yesterday and to-day have somewhat improved keep prospects in Norfolk.

Romford, Wednesday.—There was about an average supply of fat beasts, and trade about the same. Best animals made 4s 6d to 4s 8d, and middlings 4s 2d to 4s 4d per stone. Calves were in short supply, and trade was a little better, at 5s to 5s 2d per stone. Sheep were in large supply, and trade was a little slower. Best sheep made 5s 6d to 5s 8d, and middlings 5s to 5s 2d per stone. Lambs were in short supply, and trade was slower, at 6s to 6s 4d per stone. There was a slow demand for the few store beasts on offer. Some inquiries were made for pigs, owing to the approach of the season. Small porkers made 4s to 4s 2d, and large hogs, 3s to 3s 4d per stone.

Salford, Tuesday.—There was a slight increase in the number of cattle, and a good demand at late rates. The supply of sheep and lambs was about 500 less than last week. There was a brisk demand for both, and the tendency of prices was in favour of the sellers. Fewer calves on offer, and an improved trade at better prices. Quotations:—Cattle, 5½d to 7d; sheep, 6¾d to 8¼d; lambs, 7d to 8¾d; calves, 5¼d to 7¼d per lb. At market—Cattle, 2,026; sheep and lambs, 11,237; calves, 95; pigs, 76.

Sheffield, Tuesday.—About an average show of milch beasts. A fair trade was done, the best qualities making £18 to £22; secondary, £12 to £15 10s.

Shrewsbury, Tuesday.—Numbers offered—370 cattle, 16 cows with calves, 3,471 sheep and lambs, 91 calves, 25 fat, 132 porket and 38s store pigs. Larger supply of fat cattle and sheep, which met with a good demand. Pigs were brisk all round. Cows with calves firm. Quotations: Beef, 6¾d to 7¼d; mutton, 8d to 9d; and veal, 7¼d to 8¾d per lb. Porket pigs, 9s 6d to 10s 6d; and bacons, 8s 6d to 9s 6d per score. Cows, with calves, up to £22.

Spalding, Tuesday.—A very good trade for both beef and mutton. Of beasts there was a short supply; best quality, to 8s 3d per stone; cow beef, 7s 6d. Stores sold well. Mutton dear, making quite 8d per lb: half-breds, ½d per lb. more. Breeding ewes sold well.

Stockton, Wednesday. There were 151 cattle, 2 calves, 315 sheep, 320 lambs, and 223 pigs on offer. Best cattle were very scarce, and trade was firm at 8s 3d per stone; rougher kinds 7s to 7s 6d. There was a good demand for young sheep and lambs, at 8d to 8½d per lb; rough sheep, 5d to 6½d per lb.

Taunton, Saturday.—Small supply fairly good attendance, medium trade.

Thame, Tuesday.—There was a fair supply of stock, but

the trade was not very fast, except for choice quality, which made fully late rates. Mr. Bond's sale comprised 98 fat beasts and a few down calving heifers, 278 fat sheep and stores, 63 fat and weaning calves, 105 fat and store pigs, and 15 cart horses. Fat bullocks made £17 to £21 5s; fat heifers, £14 to £22 15s; down calving heifers, £12 to £15; wether sheep, 44s to 63s; fat ewes, 32s to 46s 6d; fat lambs, 29s to 37s 6d; store and Scotch lambs, 12s each; fat calves, £3 to £5 4s; weaning cow calves, 22s to 63s; bull calves, 17s to 41s; fat pigs, 9s 6d per score. Stores a better trade. Cart horses made £11 to £20.

Wakefield, Wednesday.—Larger supply of both beasts and sheep, and prices easier all round. Best beef, 6¾d per lb; other qualities, 5d to 6½d; best small, 8½d. Strong sheep, 7½d to 8d; heavy and fat sheep, 6½d; ewes and tups, 5d to 6d. Numbers penned:—Fat beasts, 1,408; sheep, 3,252.

Wolverhampton, Wednesday.—Beasts a good supply, and fair trade for best. Sheep and lambs fair supply; slow trade. Calves small supply, fair demand. Milch cows, very large supply; prices in favour of buyers. Beef, 6d to 7¼d per lb; mutton, 6½d to 8½d per lb; lamb, 8d to 8¾d per lb; veal, 7d to 8d per lb. Bacon pigs, 9s 3d to 9s 6d per score; porkets, 9s 6d to 10s per score; sows, 7s per score.

Worcester, Saturday.—Moderate supplies and trade quiet generally. Prices were firm for best quality cattle, but there was not much demand for other sorts. Wether mutton sold for rather more money. Firmer trade for pork pigs. Beef, 6½d to 7¼d; inferior, 5d to 6d; wether mutton, 8d to 8¾d; ewes, 7d; lamb, 8d to 8½d; and veal, 8d per lb. Pork pigs, 9s per score.

Worksop, Wednesday.—A good show of stock and an excellent attendance, and a brisk all-round trade. Best beef made good money, realising up to 8s; secondary, 6s 6d to 7s 6d per stone; veal, 10d per lb. Good show of sheep; best 7½d to 8½d; ewe and other mutton, 5d to 6d per lb.

FOREIGN.

Deptford, Wednesday.—Beast supplies 1,020, being 16 head less than shown on Wednesday last, and comprised 884 United States and 136 Canadian. With brisk demand trade ruled sharp, and prices dearer at 4s 6d to 4s 8d for the former and 4s 4d per 8lb, to sink the offal, for the latter. No sheep to hand.

WOOL.

London, Friday.—Wool, English, per packet of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 6d to 1s 7d; scoured good, 1s 7d to 1s 7½d; scoured average, 1s 5d to 1s 6d; greasy average to fair, 10½d to 11½d; New South Wales, scoured average, 1s 3d to 1s 4d; greasy average, 8½d to 9½d; South Australian, greasy average, 6½d to 7d; New Zealand, scoured average, 1s 4½d to 1s 5½d; greasy average, 8½d to 9½d; Cape, scoured superior, 1s 6d to 1s 8d; fleece average, 8d to 9d; greasy average, 6½d to 7d; Natal, scoured, 1s 2d to 1s 3d; greasy average, 7½d to 7¾d. Crossbreds, greasy, Victorian, good to superior, 10d to 1s; New Zealand, fine, 9d to 10d; ditto medium, 7¾d to 8½d; ditto coarse, 6d to 7d.

Bradford, Thursday.—The tension at market is being relieved, and although there is very little business so far in fine wools, top makers show a distinctly firmer attitude, and prefer to hold rather than sell at present rates. Coarser descriptions of crossbreds continue to be freely bought, but at very cheap rates. There is a little more doing in English wools. The yarn trade remains quiet.

Canterbury, Saturday.—Staplers are not eager buyers, and present quotations do not induce holders to press sales. Kent fleeces, 6d; lambs' wool, 4d to 5d per lb.

Leicester, Saturday.—Wool trade continues depressed, with only a small turnover. Merchants are unwilling to make concessions, but are finding business impossible without doing so. Yarn spinners are fairly busy, though the local trade is not so good as it was. The only houses well employed are those engaged on Government contracts.

FEEDING STUFFS.

London, Thursday.—Linseed.—Owing to moderate shipments, a good Continental demand, and an increased inquiry for oil, prices have improved considerably. Linseed cakes are dearer. London made, £8 5s to £8 7s 6d. Russian, £7 17s 6d ex dock. American Westerns at £7 12s 6d to £7 17s 6d. Cotton cakes are again dearer in sympathy with seed. London made £4 7s 6d to £4 10s. Rapeseed continues firm and dearer. Cottonseed has been a strong market in Hull, but scarcely anything doing to London; Alexandria is excited.—THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes.—The market is again dearer in the absence of any offers from abroad, and stocks of all descriptions are practically exhausted and very little on passage. Americans are firmly held for £7 15s to £7 17s 6d per ton ex dock, and at last Monday's price for October-November shipment. Russians are scarcely to be got, but any small parcels in warehouse command 2s 6d per ton more money on the week. English crushers are firm at an advance of 5s per ton. Cotton cakes.—Only a few very small parcels of Egyptian are to be found in warehouse, for which buyers are compelled to pay a large advance, and English are also relatively dear. Decorticated are unchanged in value at which there is a very small inquiry. Bright meal is quoted the turn cheaper. Rape cakes.—Unchanged. Maize germ meal is the turn dearer ex dock and for September-October dispatch from the west; English is also dearer. Rice meal.—A large business has been done for October-January shipments at £4 11s 3d per ton ex ship, and the same price is now asked for January-March. Spot values are 5s per ton dearer.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—To-day the market is very firm at the extreme prices of last Tuesday, for old English wheat; a few samples now offering, varying in quality and condition, prices averaging 28s, 29s 504lbs. Foreign steady, at full rates, some descriptions being 3d per quarter dearer on the week. No change in barley. Oats fully as dear, except for inferior new, which are rather cheaper to buy. Beans continue with an upward tendency. Flat maize unaltered from last wek. Round Odessa from scarcity commands 3d per qr advance. Linseed.—The market, since last week, has gathered considerable strength. In cottonseed, since our last issue there has been a stronger tone owing to moderate supplies here and light shipments. Oil seed cakes.—All kinds are 2s 6d per ton dearer on the week. Deliveries good, but fresh orders not plentiful.—KEIGHLEY MANSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 2s. 6d. PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 0s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 5s 0d PER TON. ALL F.O.R. HULL.

MANURES.

Liverpool, Friday.—Basic slag continues in increased inquiry for autumn deliveries, and a fair amount of sales have transpired at the following rates. Feeding stuffs are firmly held, at advancing rates in some instances, and are moving more freely into consumption. Nitrate of soda, best quality, i.e., guaranteed 95 per cent., pure, in bags, £8 2s to £8 7s 6d per ton; East India bone meal, in bags, £4 5s to £4 7s 6d per ton; kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton; linseed cake, American thin oblong, prime, in bags, £7 12s 6d to £7 16s 3d per ton; linseed cake, English, prime, in bulk, £8 0s to £8 10s per ton; linseed cake, foreign, round, prime, in bags, £7 17s 6d to £8 10s per ton; cottonseed cake, N.A., decorticated, prime, fairly soft, in bags, £6 10s to £6 15s per ton; cottonseed cake, English, decorticated, prime, very soft, in bags, £6 15s to £7 per ton; cottonseed cake, English, undecorticated, prime, in bulk, £4 15s to £4 17s 6d per ton; cottonseed cake, crushed, 20 to 25 per cent oil, prime, in bags, £6 15s per ton; maize germ meal, English, prime, in bags, £5 2s 6d per ton; rice meal, Rangoon, as imported, in bags, £4 7s 6d to £4 10s per ton; Indian meal, coarse to fine grinding, prime, in bulk, 11s 6d to 12s per 240lb; linseed, fine boil feeding, in bags, £3 1s to £3 3s per qr, 416lb; N.A. cloverseed, new red, fair to good, in bags, per cwt.; D.N.S. Brand superphosphate of lime, guaranteed, 25 to 27 sol., in bags, per ton; D.N.S. Brand superphosphate of lime, guaranteed, 30 to 31 sol., in bags; D.N.S. Brand superphosphate of lime, guaranteed, 35 to 36 sol, in bags, nominal; basic slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, £1 11s to £1 12s 6d per ton; basic slag, prime quality, guaranteed, 35 to 40 per cent. phos., in bags, £1 12s. 6d. to £1 15s 6d. per ton; basic slag, finest quality, guaranteed, 38 to 45 per cent. phos., in bags, £1 16s to £1 17s 6d per ton, at the producing depots. H. JONES LANGAR AND CO.

Imports of Butter and Cheese.

The remarkable way in which the imports of butter have regularly increased for many years is, state Messrs. Weddel and Co., in their review for the season 1899-1900, again exemplified by the year which closed on the 30th June last. In the year ended June, 1891, the total import of butter was 102,500 tons, and for the year ended June, 1900, it was 170,700 tons, which shows an average annual increase in the decade of 6,800 tons. This growth has been on the whole very uniform, any disturbance in its uniformity being more attributable to the deficient seasons in our Colonies and foreign countries than to the bountiful seasons at home. Twice in the decade has the import of butter from Colonial sources fallen off slightly from the previous year, viz., in 1896 and 1898, while only once has there been any decrease in the foreign supply, and this occurred during the present year. In 1896 the Colonial supply fell off 5,000 tons, principally due to drought in Australia, but from foreign countries this deficiency was more than wiped out, as the increased import from these sources exceeded 16,500 tons.

In the present year the position has been reversed, for while the foreign import fell away to the extent of 9,000 tons, the supply from the Colonies exceeded that of last year by 15,000 tons, thus leaving a gain in the quantity of imported butter of 6,000 tons on the year. Distinguishing the two sources of supply for the past ten years, the import of Colonial butter has been augmented by 34,600 tons, and that of foreign by 33,600 tons, so that the increased import for the period is fairly divided between Colonial and foreign sources. If, however, the last five years be taken, it will be seen that the growth of Colonial butter has far exceeded that from foreign countries. During this quinquennial period the annual import of Colonial butter has increased by 24,500 tons, while that of foreign has virtually made no progress whatever. It is but fair, however, to note that the effect of an abnormal increase in Colonial and an unusual deficiency in foreign for this past year modifies to a great extent this position. Still, on the whole, the progress in the import of Colonial butter far exceeds that made by foreign.

If we examine in detail these two classes of imports, it will be seen that the Australasian Colonies have increased their quota since 1891 by 13,400 tons, and Canada by 11,100 tons. Turning to foreign countries, Denmark, as was to be expected, shows the greatest development in the supply of imported butter, which has increased in the past ten years by 28,678 tons. Next come Russia and Holland with increases respectively of 7,207 tons and 6,589 tons. Sweden, which made a steady progress from 1891 to 1896, has since then declined, and this year sent 1,400 tons less than ten years ago. France and Germany are rapidly falling away, and the latter country will soon cease its supply altogether. Five years since it was 6,000 tons annually, this year it was 1,850 tons. France, which in 1891 sent 26,000 tons, has regularly declined, and this year sent only 16,800. Among the countries sending smaller quantities, Argentina, Belgium, and Norway are all gradually increasing their supplies, but their totals are comparatively small, as they together contribute only 6,400 tons out of a total foreign supply of 133,000 tons. The United States has been erratic in its supplies during the decade, and up to now has not made butter specially for export to the United Kingdom as all the other foreign countries have done. Consequently it is only when supplies from elsewhere fail that American butter is sought for by British buyers. The large amount of salt in American butter, although suitable for the American palate, prevents it ever becoming popular in the United Kingdom.

As regards the coming season, Messrs. Weddel say: "The Canadian supply most probably will show another large development, but it is unlikely that the United States will supply more than they have done in the past season. From the Continent of Europe larger imports are almost certain to come, as owing to the drought and heat which existed during the latter half of 1899 the Continental production was very largely restricted and the imports from this source alone, during the year ended 30th June, were reduced by 8,000 tons. In the ordinary course of things, therefore, an augmented supply may be expected during the coming season. In regard to the production of butter in the United Kingdom, a moderate increase may be anticipated.

There is no such increase to be reported in the import of cheese as in butter. Cheese is year by year becoming less an article of general consumption, owing, undoubtedly, to the growing poverty of the working classes, who formerly largely relied upon this commodity in their dietary, but are now able to purchase more butcher's meat instead. During the decade the import of cheese has grown by only 24,500 tons, while that of butter has increased by 71,000 tons. The home supply has decreased by 17,000 tons. Distinguishing the sources of supply of cheese, it is seen that the import of Colonial cheese has increased since 1891 by 31,500 tons, while that from foreign countries has diminished to the extent of 6,900 tons. The actual imports of both kinds in 1891 were—Colonial, 43,228 tons (of which 41,375 came from Canada), and foreign, 60,816 tons. In 1900 the figures are—Colonial, 74,702 tons (70,549 being Canadian), and foreign, 53,903 tons.

In Colonial imported cheese it is thus seen that Canada virtually has the field to itself, for the only other Colonial cheese which finds its way here is New Zealand, but the amount of this kind is comparatively insignificant, being only 4,000 tons out of a total import of 128,600 tons. Australia has during several seasons since 1891 sent small quantities, but they are not worth quoting. The Canadian import shows a steady increase from 1891 to 1898, but since then it has declined by nearly 5,000 tons, apparently because the Canadian dairymen have turned their attention more particularly to the export of butter, which has increased in the period by 6,000 tons. Although the import of New Zealand cheese is comparatively small it shows on the whole a steady increase, the total for the five years ending 1895 being 10,980 tons, while for the last five years it is 14,089 tons.

From foreign countries the decline in the import of cheese is mainly from the United States, which sent 10,000 tons less in 1900 than in 1891. France also is losing its cheese trade in British markets, and is being supplanted by Belgium. In 1891 France supplied over 3,000 tons; this year the import was below 2,000 tons. Belgium in 1891 supplied less than 1,000 tons, but now contributes 2,500 tons. The import trade in Dutch cheese remains almost absolutely stationary. In 1891 it amounted to 15,300 tons, in 1899 it was 15,600 tons. This year, owing to exceptionally high prices here, which stimulated the manufacture, it reached 17,000 tons, but this seems likely to be only a temporary increase.

Speaking of the prospects for next season Messrs. Weddel and Co. say with regard to butter it would be almost unreasonable to expect an equal increase, but still there is every appearance of a large augmentation in the supplies during the season of 1900-1.

In summing up the prospects for next season, Messrs. Weddel say:—"The manufacture of cheese during the past two seasons has proved more profitable than the making of butter, and as there appears a reasonable prospect of this state of things continuing during another season, the supply of cheese is likely to be enlarged, especially if the weather for the remainder of the cheese season continues favourable for its manufacture."

Stack Fire at Lowestoft. On Tuesday afternoon a fire broke out on the premises of Mr. W. R. Seago, known as Pope's Farm, Norwich Road, Lowestoft. The fire originated in a part of a screw stack, and spread quickly to two ricks of barley and oat stack, the whole of which were destroyed. The fire is supposed to have been caused by children playing in the vicinity, and the damage is estimated at £200.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Shire stallion Hitchin Ringleader is the property of Mr. Arthur Ransom, of Hitchin, Herts, for whom he won at the Bath and West Show first and champion prizes; at the Royal Show at York, however, he only secured a second prize. Hitchin Ringleader was bred by Mr. E. E. Harcourt-Vernon, of Grove, Retford, his sire being Calwich Heirloom 14547, dam Grove Vera, by Harold 3703.

The Aberdeen-Angus bull Diaz was exhibited by Mr. W. S. Adamson, Careston Castle, Careston, Forfarshire, at the Royal Agricultural Society's Show at York, when he won first prize in his class, and in addition the champion gold medal offered by the Polled Cattle Society for the best Aberdeen-Angus animal exhibited. Diaz 14272 was calved in 1896, and is by Enthusiast of Ballindalloch 8289, dam Pride of Burnshangie, by Pilchard 7827, his breeder being Mr. Patrick Chalmers, Aldbar Castle, Brechin.

STOCK AND SHOW NOTES

By Herdsman.

The attention of meat dealers and butchers throughout the kingdom has recently been directed to a new process of preservation, the invention of a German patentee, which it was claimed would revolutionise previous methods of dealing with meat supplies during the voyage from South America and other sources of importation. The first consignment of meat brought across from South America under treatment by the new method arrived at Liverpool by Messrs. Houlder Bros.' steamer the Southern Cross, and it was examined with considerable interest.

Unfortunately for the hopes of the promoter of the new treatment (says the Liverpool correspondent of the *Yorkshire Post*) it would appear that either the meat suffered from some practical defect in the application of the system or the system itself does not possess the advantages claimed. The consignment immediately upon arrival in Liverpool was examined in the ordinary course by the inspector appointed by the Corporation, with the result that a large proportion was seized and condemned at once as unfit for human food. As to the remainder it was offered in the market, the mutton being sold at 2d. per lb. and the beef at something under 3d. per lb. The ordinary price obtainable for North American chilled beef at present is about 5¼d. per lb."

Three sales of Jersey cattle are announced at early dates by Messrs. John Thornton and Co. The first consists of about thirty animals from the old established English-bred herd of Mr. D. Mutton, of the Triangle, Plumpton, Sussex, and a few animals from Mr. R. J. Pope, Beresford Manor. This sale will also include some pure-bred Berkshire pigs from Mrs. Hepburn, Chailey, Lewes, and will take place on Wednesday, September 19th. The herd of Jersey cattle at Plumpton was founded in 1872 by the purchase of an excellent Jersey cow from the Duke of Richmond's dairy at Goodwood, which had been bred from the Island stock for upwards of a century. The result of this careful breeding from the best old dairy strains has been the raising of a herd of excellent milkers.

The second sale is of pure-bred Jersey cattle, pure-bred yearling Southdown ewes and Berkshire pigs, the property of Mr. S. Austen Leigh, at Frog Firle, three miles from Berwick Station, on the L.B.S.C. Railway, between Lewes and Eastbourne, on Thursday, September 20th. The herd at Frog Firle was founded in 1877 by the purchase of some good cows from the Island of Jersey, bulls being specially selected from some of the best milking strains in this country. The herd has been hardily and carefully bred with especial regard to the milking qualities. The accommodation being limited, it has been decided to part with all the young stock without exception; all the two-year-old and yearling heifers are to be sold, some of them being good enough for exhibition. Many of them are by Athol Brose 2nd 5064, bred by Mr. D. Mutton, whose herd has been so long bred with the view of obtaining the hardiest cows and heaviest milkers and butter producers. A few heifers are also included from Mr. F. Barchard's well-known herd at Horsted Place, in the same county. These are chiefly of the old Dauncey and Empress strains.

The next sale is of about sixty first-class pure-bred cattle, bred by Mr. Herbert Padwick, on Tuesday, September 25th, at the Manor Farm, West Thorney, three miles from Emsworth Station on the London Brighton and South Coast Railway, and five miles from Havant. Thorney, formerly an island on which stood an old monastery, comprises about twelve hundred acres, and is mostly farmed under the Manor farm. About thirty years ago the Island was connected with the mainland by banking out the estuary of the sea, which formerly flowed on its north side, and thus a large area of reclaimed land was added to the holding. This produces poor grass, but is fairly good land for growing young cattle. There is better and sheltered pasture on the Island, where a herd of Jerseys, established by the present proprietor's grandfather, has been in existence a great number of years. About 1879 considerable improvement took place, a few good cows were purchased, and particular attention was given to the selection of the bulls. About a hundred cows are kept in milk for supplying butter to Brighton, many of them yielding upwards of 14lbs. weekly, and some of the cows have given a thousand gallons in the year. The herd having outgrown the accommodation, about sixty young cows and heifers, many in full milk and others coming on for winter dairying, as well as the bulls Edward 4th and Goodwood, will be offered for unreserved sale. The animals for sale are young and mostly in full profit, having recently calved, or are forward in calf, coming on for winter dairying. They are robust in constitution without coarseness, and live out of doors winter and summer, or in the strawyards. Milk fever is unknown for the past ten years, and the animals by their robustness and large rich milking properties are well adapted to go into pure-bred herds or to enrich the yield of the ordinary cows in large dairies.

Lord Tredegar's shows are fixed this year for Tuesday and Wednesday, November 27th and 28th next.

The entire herd of Shorthorns bred by the late Mr. Robinson Dewhurst will be sold on September 21st, at Shelford House Farm, Nuneaton, by Messrs. Thornton and Co. The animals have mostly been bred on the farm, except the bulls in service; they are of well-known and distinguished families. The Queens, originally from Mr. W. Mitchell, of Cleasby, are descended from Fairy Queen, bought of Mr. J. Bousfield, Croft House; Sir Charles Knightley's old Walnut tribe traces from Lady Winsome Walnut, bought of Mr. G. Thompson, Mousley End; the old Daisies from Florence Daisy, both of which were by Grand Duke Winsome 57414, the son of that magnificent cow Winsome Colleen by Duke of Connaught; and the Votaresses, a great milking tribe, are bred from the stock of Captain D. H. Mytton, of Garth, Welshpool. The bull Baron Bridekirk 4th 62119, first used, was bred by Mr. J. Barnes, Baurgh Syke, Cumberland, and was son of Prosperity, first prize bull at the R.A.S.E. Show at Windsor in 1889. He was followed by Mr. Morris' Statesman 66400, who became the sire of several prize winners at the Birmingham shows and sales. Shelford Imperial 69571, a prize winner, was next used, and succeeded by May King 78986, a fine bull, sold afterwards for exportation to South America; and Baron Underley 74027, a bull of exceptional quality, also sold at a high price for exportation. At present in service is the handsome roan bull Staffordshire Duke 71659, winner of several first prizes, bred by Mr. C. J. Morris, Wood Eaton, and by Mr. J. Deane Willis' Captain Quadroon, a well known sire used by Mr. Morris in Staffordshire, and Mr. J. W. Barnes at Aik Bank, Cumberland; he was the winner of several prizes in each country.

There is a great foreign demand this year for the Barton flock of Lincolns. The fifteen rams Mr. John Anderson advertised for sale by auction at Lincoln by Messrs. Calthrop and Brigg have been sold to go to South America; also fifteen other rams out of the same flock, making thirty in all, which were to leave per steamer Hyanthes from Liverpool Docks on Saturday, 8th inst., for Buenos Ayres.

The ss. Port Elliott, which left the Thames last week for Sydney, took out two magnificent roan Shorthorn bulls, bred respectively by the Right Hon. Lord Brougham and Mr. C. A. Scott Murray, of Hambleden.

The Board of Agriculture on Monday issued an Order modifying the restrictions imposed upon cattle remaining within the affected area in Flintshire and Denbighshire, no further cases having developed themselves. Butchers and cattle dealers will be permitted to move their cattle about within the area, and this will enable stock to be killed at the various slaughter-houses, instead of on the farms, an operation which has caused great annoyance and inconvenience to the tenants.

CATTLE.

Bull Sale at Carlisle.

On Thursday Messrs. Harrison and Son, Carlisle, held a sale of Shorthorn bulls, about seventy being forwarded from breeders in the north of England, including Lord Brougham, Lord Barnard, and others. There was a good attendance of buyers, and the best class of bulls met a good and satisfactory sale. In the open class Lord Brougham was first with Boreas, which sold for 56gs. to Mr. Millar, for the Earl of Derby; second, Mr. Fisher, Knells, with Royalist, 29gs.; third, Mr. Hewson, Parton, Baron Warthol, 50gs.; commended, Mr. Dalton, Snowhope Close, Stanhope, British Lad, 42gs. Bulls not exceeding two years—1, Messrs. Muncaster and Sons, Dolphenby, 65gs., to Mr. Dudding, Riby Grove, Lincolnshire; 2, Lord Barnard, 36gs.; 3, Lord Brougham, 37gs.; commended, £25, Mr. Thompson, Demesne.

Sale of Mr. J. Watt's Shorthorns.

On Wednesday, at Knowlefield, Carlisle, Messrs. John Thornton and Co., the London auctioneers, disposed of Mr. James Watt's herd of Shorthorns. The weather was fine, and the attendance at the luncheon and sale was numerous, the Queen and the Prince of Wales, the Duke of Buccleuch, the Earl of Derby, and other landed gentry being represented. Sir Wilfrid Lawson was one of those actually present, a number of the animals in the catalogue being of his own well-known Benson strain. In the Knowefield herd three notable strains of Shorthorn blood have been blended. The famous Bates Duchesses and Booth's Countesses have been blended in the Lancasters and Field Marshals of Cruickshank blood. Several animals in the herd have either been bred by the Queen and Prince of Wales or have descended from stock bred at Windsor and Sandringham. Many of the younger animals in the Knowefield herd are direct descendants of the famous bull New Year's Gift, which was sold at the Queen's sale for 1,000 guineas. Before that sale Mr. Watt had bought a bull calf by that high-priced sire out of the Field Marshal cow Daisy. It was named Knowefield, turned out well, and, after standing at the head of the Knowefield herd for several years, was sold at a high price to go to the Argentine. His descendants of the first, second, and third generations are well represented in the herd. He was replaced at the head of the herd by New Year's Promise, by Knowefield, out of Butterfly Princess. For cows and heifers the highest price paid was 50gs. for Duchess Deans, a six-year-old cow, the purchaser being Mr. Tait, for the Queen. The highest price paid for a bull was 35½gs.

Transactions in Store Stock.

[From the Irish Department of Agriculture and Technical Instruction.]

The fair at Templemore, co. Tipperary, on the 3rd September was a small one. Brisk demand; nearly all the cattle exposed sold. Yearlings, first class, £8 15s. to £10; second class, £7 5s. to £8 15s.; third class, £6 12s. 6d. to £7. Two-year-olds, first class, £12 to £13; second class, £10 to £11. Springers, first class, £18 10s. to £21 5s.; second class, £12 10s.; third class, £10 10s. Good demand for sheep. Lambs, first class, £1 7s. to £1 8s.; second class, £1 3s. to £1 6s. Hoggets, first class, £2 to £2 2s.; second class, £1 16s. to £1 18s. Two year-olds and over, second class, £1 18s.

At Newry Fair, co. Down, held on 3rd September, the demand was good. Calves, second class, £3 13s. 9d. to £4 10s. Yearlings, first class, £8 15s.; second class, £6 to £7 2s. 6d.; third class, £3 16s. 3d. to £5. Two-year-olds, first class, £11 5s. to £12 2s. 6d.; second class, £8 3s. 9d. to £9 10s.; third class, £5 16s. 3d. to £7. Springers, first class, £16 to £20; second class, £13 to £14 12s. 6d.; third class, £8 15s. to £10 5s.

The fair at Galway was held on the 4th September, being smaller than usual, composed to a great extent of second and third class cattle of a rough description; demand brisk for well-conditioned cattle, but others rather difficult to sell. Calves, second class, £3 7s. 6d. to £4; third class, £1 17s. 6d. to £2 15s. Yearlings, second class, £5 10s. to £7; third class, £3 15s. to £4 5s. Two year-olds, first class, £10 10s. to £11 10s.; second class, £7 15s. to £9; third class, £5 2s. 6d. to £7. Three-year-olds, first class, £13 10s. to £14; second class, £10 10s. to £11 15s.; third class, £7 7s. 6d. to £9 5s. Springers, second class, £10 7s. 6d. to £12 10s.; third class, £8 10s. to £9 15s.

At Ennis Fair, co. Clare, held on September 3rd, there was a small supply of cattle, composed chiefly of three-year-olds, for which there was smart demand. Springers scarce and selling well. Yearlings, first class, £8 to £8 15s.; second class, £6 5s. to £7 15s.; third class, £5 to £5 10s. Two-year-olds, first class, £11 to £12 15s.; second class, £8 15s. to £10 15s.; third class, £6 15s. to £7 10s. Three-year-olds, first class, £15 to £16 15s.; second class, £11 10s. to £14 10s.; third class, £9 to £10 10s. Springers, first class, £15 to £18; second class, £11 10s. to £14 10s.; third class, £8 to £9 10s. Large supply of sheep, moderate demand. Lambs first class, £1 5s. to £1 7s.; second class, £1 1s. to £1 4s. Hoggets, first class, £2 to £2 5s.; second class, £1 17s. to £1 19s. Two years old and over, first class, £2; second class, £1 9s. to £1 16s.

At Londonderry Fair, held on the 4th inst., all classes of cattle sold well. Calves, first class, £4 12s. 6d. to £5; second class, £2 11s. 3d. to £3 4s. 2d. Yearlings, first class, £8 to £9 10s.; second class, £5 10s. to £7 7s. 6d.; third class, £3 to £4 5s. Two-year-olds, first class, £12; second class, £8 to £9 10s.; third class, £5 10s. to £7. Three-year-olds, third class, £7 12s. 6d. Springers, first class, £16 10s. to £19 2s. 6d.; second class, £11 7s. 6d. to £14 7s. 6d.; third class, £7 12s. 6d. to £9 7s. 6d. Very small supply of sheep, demand slow. Lambs: First class, £1 5s. to £1 8s.; second class, £1 1s. to £1 3s.; third class, 12s. to 15s. Hoggets, first class, £2 to £2 3s.; second class, £1 10s. to £1 16s. 6d.; third class, 17s. 6d. to £1.

Ballinasloe Fair, co. Galway, was held on the 5th inst. It was a large one, and composed almost exclusively of first and second class ewes suitable for breeding purposes, for which there was brisk demand, and a complete clearance effected. Lambs, second class, £1 1s. to £1 5s.; third class, 14s. to 18s. 6d. Hoggets, second class, £1 11s. 6d. to £1 14s. Two years old and over, first class, £1 19s. to £2 3s. 6d.; second class, £1 12s. to £1 18s.; third class £1 6s. to £1 10s. Young pigs, eight to ten weeks old, sold at from 17s. to 22s. 6d. each.

HORSES.

Stock Breeding in Ireland.

The very important question of the improvement of the breeding of horses and other live stock, to for some months engaged the serious attention of the Department of Agriculture and Technical Instruction. The department are now appointing special committees to assist it in preparing schemes applicable to the various districts of the country in accordance with which the aid of the department may be systematically administered. The preliminary meetings of these committees were held on Friday, 31st ult., at the offices of the department.

The following are the names of the members of the committees:—

Special Committee on Horse Breeding.—The Vice-President, the Secretary, the Assistant Secretary in Respect of Agriculture, ex-officio; P. La Touche, Esq., F. S. Wrench, Esq., P. J. O'Neill, Esq., J.P., T. M. Carew, Esq., Hugh P. Ryan, Esq., Edward M. Archdale, Esq., M.P., A. R. Bourne, Esq., Major Balfe, D.L., Nicholas B. King, Esq., Peter Fitzgerald, Esq., T. Pallin, Esq., V.S., Joseph R. O'Reilly, D.L., and Lord Rathdonnell and Captain Cecil Fetherstonhaugh, D.L., nominated by the Royal Dublin Society.

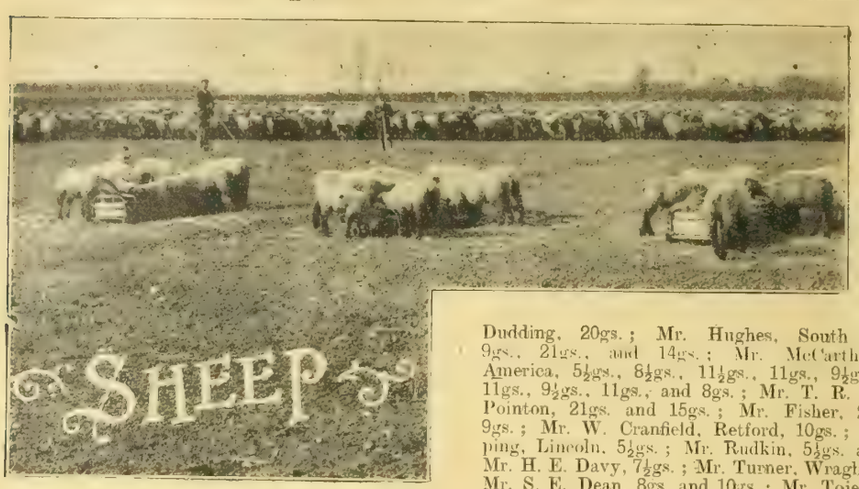
Live Stock Exclusive of Horses Committee.—The Vice-President, the Secretary, the Assistant Secretary in respect of Agriculture, ex-officio; Colonel N. T. Everard, D.L., James Byrne, Esq., J.P., Wm. Field, Esq., M.P., Toler R. Garvey, J.P., Richard Barter, Esq., J.P., A. W. Shaw, Esq., M. J. Cleary, Esq., M.R.C.V.S., C. U. Townshend, Esq., J.P. (nominated by Royal Dublin Society), Captain Lewis Riall, D.L. (nominated by Royal Dublin Society), C. M. Doyne, Esq., D.L., F. Shaw Taylor, Esq.

Woodbridge Annual Horse Show.

In presenting their annual report and balance-sheet for 1900, the committee of this show state that they are glad to be able to report a highly successful show, and at the same time a slight increase in the amount of their balance in hand. Taking into account the unusual claim on the generosity of the public in connection with the war in South Africa, and also the extra call for support arising from the visit of the Suffolk Agricultural Society to Woodbridge, the committee have pleasure in reporting that as regards the number of entries and quality of exhibits the spring show of 1900 compares most favourably with previous years. The receipts at the gate however were less than last year, owing no doubt to the fact that Bank Holiday falling late in the season the show could not be held on that day without ignoring to a great extent the breeders' interests. The committee desire to thank all those to whose generous support the success of the show is mainly due, and confidently anticipate their continued co-operation with a yet more favourable result in the future. They also appreciate the ability and energy of their secretary, Mr. G. Shipman, in making a success under the difficult circumstances above referred to.

G'asgow Horse Market.

The first of the September horse markets was held in the Cattle Market on Wednesday. The weather was favourable—so favourable that there was a felt absence of farmers, who were engaged at the harvest. The supply of horses was a moderate one, both for numbers and quality. There was a distinct absence of big horses, though a few very good ones were on sale. Generally the strings were made up of medium but useful kinds. For draught horses business was in no way brisk, but a few were reported as selling, and the trade was largely with contractors, and one or two dealers from a distance at—say—prices £40 to £60 in value. Harness horses had an indifferent demand. The lateness of the season and the indifferent weather are having their effect on coaching circles. Prices had a very restricted range. The best class of draught horses made prices to £85, and harness horses to 40gs. Mr. Crawford, of Kilmarnock, reported having sold draught horses to £85, and a few selling, at an average trade: Mr. Daniel Riddell, of Blackhall, Paisley, sold cart horses to £80, and down to £30, and business quiet; Mr. Murray, Glasgow, sold draught horses up to £65—little doing in harness. Rates went similar among smaller holders. A large margin of stock was left unsold.



Lincoln Long-wool Sheep Breeders' Sale.

On Friday the eleventh annual ram sale of the Lincoln Long-wool Sheep Breeders' Association was held at Lincoln, when about 350 rams were offered. The sheep were put up at 5gs. each, and on the whole the sale was a good one. No sensational prices were made, but the averages were fair, and the sales more even than is sometimes the case. The total sum realised was over £2,617.

Mr. H. Smith, jun., Cropwell Butler, Notts (auctioneers, Messrs. T. B. Richardson and Son):—Mr. A. Hughes, Buenos Ayres, 15gs. and 10gs.; Major-General Wilson, Rauceby Hall, 6gs.; Mr. Gooseman, Bradley, 10gs. and 5½gs.; Mr. H. Dudding, Riby Grove, 15gs.; Mr. Langford, 6gs.; Mr. T. R. Casswell, Pointon, 6gs.; Mr. Parker, Ingleby, 5½gs.; Mr. A. H. Hanker, Holland, 3½gs. Aggregate, 87½gs.; average, £9 3s. 9½d.

Mr. J. Pears, J.P., The Mere, Lincoln (auctioneer, Mr. W. A. Richardson):—Mr. Tojeiro, South America, 6gs., 6gs., and 5½gs.; Mr. H. Dudding, Riby Grove, 40gs.; Mr. W. Bayles, Welton, 25gs.; Mr. Hanker, Holland, 15gs.; Mr. Hesseltine, Killington, Malton, 17gs. and 11gs.; Mr. C. Featherstone, 12gs., 5½gs., and 5½gs.; Mr. W. Sergeant, Ranby, 5½gs. and 7½gs.; Mr. Giles, Peterborough, 7gs.; Mr. Davies, Tathwell, 9gs.; Mr. Bygott, Ulceby, 11gs.; Messrs. Tomlinson and Hayward, 5½gs.; Mr. E. G. Allen, Louth, 6½gs. Aggregate, 200½gs.; average, £11 13s. 11½d.

Mr. G. T. Melbourn, Nocton Heath (auctioneer, Mr. J. E. Walter):—Mr. Bishop, Berks (Hungerford), 6gs. and 6gs.; Mr. Brooke, Revesby, 6½gs.; Mr. Hughes, South America, 6½gs.; Mr. Rowland, Fishtoft, 6½gs.; Mr. Harrison, Barlings, 6gs.; Mr. McCarthy, 6½gs., 9½gs., 6gs., 6gs., and 6gs.; Mr. Atkinson, Kirkstead, 5½gs.; Mr. Johnson, 5½gs.; Mr. J. T. Needham, Huttoft, 11gs. and 11gs. Aggregate, 104½gs.; average, £7 6s. 4d.

Suffolk Sheep Sale at Ipswich.

On Friday Messrs. Robert Bond and Sons, in conjunction with Mr. Ernest Prentice, secretary of the Suffolk Sheep Society, held their second special sale of pedigree Suffolk sheep for this season at Gippeswyk Park, Ipswich. The importance of the sale attracted a large number, not only from various parts of the Eastern Counties, but also from more distant parts of the country. The catalogue contained some 1,500 Suffolk ewes and ewe lambs, and over 300 rams, and the prices realised were on the whole satisfactory.

The first lots were from Mr. W. T. S. Peck, Brockford, who sent fifty shearling ewes and rams, bred by Mrs. Lowe, Mr. J. W. Eagle, and Mr. S. R. Sherwood. One lot of ten made 75s., the next twenty 73s., and a third 61s. Forty shearling ewes belonging to Mr. Harry Long, Ringshall, made 62s. and 55s. in two lots; and the same number, belonging to Messrs. F. J. and C. Haward, Thorndon, made 63s. and 61s.

The Roydon Hall registered flock, the property of Mr. A. H. Cobbald, were next offered. There were about 200 shearling ewes, bred by Mr. G. Arthur Paley, Mr. J. D. Cobbald, and Mr. J. J. Scott. Mr. J. C. Dawson secured the first lot of ten at 76s., and the next three twenties fetched 66s., 63s., 59s., and 62s. respectively. The others made from 61s. to 56s.

Then came 270 shearling, two-shear, and three-shear ewes, the property of Mr. Arthur H. Cobbald, Eldo House, Bury, and Rise Hall, Akenham. Mr. Woodiwiss took the first two lots of twenty shearling ewes at 65s. and 57s.; Mr. T. Haward, Mr. Warnes, and Mr. Barker three lots at 55s. 50s., and 53s.; and two others made 50s. each. The two-shear fetched 44s. and 45s., and the three-shear 51s.

The Sladburies Farm flock was next offered. The first three lots of ten shearling ewes fetched 90s. each to Mr. H. Munson, who also bought another at 80s. The two next went to Mr. P. Hay (for Sir Cuthbert Quilter, Bart., M.P.), at 75s. and 71s. Mr. Munson secured the first three lots of ten two-shear ewes at 90s., 80s., and 77s., and the same gentleman took all the three-shear ewes, the first two tens at 120s. and 105s., and the rest at 80s. and 70s. The full-mouthed ewes made from 80s. to 60s., to Mr. Munson, while Mr. J. B. Dimmock bought one lot at 53s. Ten choice ewe lambs went to Mr. S. Traylen, at 135s. Mr. Percy Heaton bought another lot at 92s. 6d., and Mr. Harvey one at 85s.

There was a good demand for ewe lambs. Forty sent by Mr. E. J. Cheney, Brockford Hall, made 35s. and 32s. 6d., in two lots, and a score sent by Mr. Harry Long, Ringshall, went to Mr. Percy Noble at 40s.; 120 consigned by Mr. Thomas Keeble, Bentley Hall, sold well, the first three lots of twenty making 57s., 50s., and 47s.; and two others 52s. and 45s. 6d., the buyers including Mr. Wentworth Reeve, Mr. Munson, and Mr. A. Fenning. One hundred consigned by Mr. William Long fetched 39s., 34s. 6d., 32s. 6d., and 27s.

Mr. J. W. Eagle, Walton-on-the-Naze, sent a score rams, one by Walton Gunner II. making 9gs., another 5gs., and several others made 4½gs. and 4gs. Three by Baronet IV. were knocked down at 5gs. each. Mr. Clarke bought one of Mr. Henry Lingwood's rams at 9½gs., and Mr. A. Mumford another at 5½gs. Eleven belonging to Mr. S. R. Sherwood, Playford, made a good average. Mr. R. Sherwood taking one at 15gs., Mr. Grenville one at 13gs., Mr. P. Hay (for Sir Cuthbert Quilter) one at 10gs. and another at 9½gs. The rest made about 4½gs. Mr. D. Abbott Green, Finringhoe, however, made the highest price of the day, viz., 19gs.; two others sold at 9gs. each, another at 5gs. In Mr. Thomas Keeble's second consignment was one which fetched 13gs., to Mr. R. L. Everett, and another 11gs. to Mr. A. Hayward, while Mr.

Nunn gave 7½gs. for a third. Mr. Clement C. Smith sent half-a-dozen, one going to Mr. R. L. Everett at 10gs. Mr. P. Hicks gave 12gs. for one belonging to Mr. Holmes White. The other consignors of rams included:—Mr. Herbert E. Smith, Mr. W. H. Borrett, Mr. Thomas Goodchild, Mr. A. H. Mumford, Mr. Percy A. Noble, Sir Hugh Edward Adair, Mr. Samuel Scott, and Mr. C. F. Marriner. Several made 7gs., others 5gs., and a good many 4gs. Two shearling rams, belonging to Mr. Alfred Smith, fetched 9gs. and 7½gs. respectively, to Mr. A. Pratt; one other sold at 5½gs., and two more at 5gs., and two at 4gs. and 4½gs.

Sale of the Kirmington Lincoln.

The seventh annual sale of these pure-bred Lincoln rams, the property of Mr. George Marris, Kirmington House, was offered for sale by Messrs. Briggs and Calthorpe, and Messrs. Dickenson and Riggall on Thursday. These rams have made a distinct advance in favour during the last few years, and the average of Thursday was £11 14s., an advance of £2 9s. upon the previous year. Fifty rams were submitted, only six of which remained unsold. Mr. Hughes, of South America, was the principal purchaser, he giving 36gs. and 30gs. for two sheep, the sire of which is Laughton Anchor. Mr. Coates, of Searby, gave 26gs. for a sheep by one of Mr. Dudding's rams, Riby Martin.

Sale of Shropshire Sheep at Bingley Hall.

The autumnal sale of Shropshire sheep was conducted on Thursday in Bingley Hall, Birmingham, by Messrs. Lythall and Walters. There was a good company present, and a brisk trade. Mr. A. Bradburne's rams sold up to 10gs.; Mr. E. Nock's 26gs., 19gs., 13gs., 10gs., 10gs., 10gs.; Mr. A. S. Bury's up to 10gs.; Mr. M. Williams's 15gs., 10gs., 10gs., 10gs.; Mr. H. Williams's 17gs., 12gs., 11gs., 11gs., 11gs., 10gs.; Mr. T. F. Cheatle's up to 10gs.; Mr. H. C. G. Parker's up to 12gs.; Mr. C. H. Jolliffe's up to 10gs.; Mr. Gibson's up to 15gs.; Mr. P. L. Mill's 12gs., 11gs.; Earl of Strathmore's up to 10gs.; Mr. P. A. Clive's up to 9gs.; Mr. G. Gerrard's up to 10gs.; Earl of Dartmouth's ewes up to 54s. each; Mr. A. S. Bury's 80s., 66s., 61s.; Mr. M. Williams's 61s., 60s., etc.; Mr. Instone's up to 60s.; Mr. T. F. Cheatle's up to 70s. Principal buyers were the Marquis of Zetland, the Earl of Macclesfield, the Earl of Warwick, Sir H. Wiggin, Bart., Lieutenant-Colonel Innes, Colonel Leach, Messrs. Ramsden, T. H. G. Newton, P. L. Mills, Royston, R. O. Williams, F. J. Sumner, W. Darlington, H. S. O'Brien, etc. Ten rams were sold for exportation to South America.

Mr. J. E. Farmer's Shropshires.

On Tuesday Mr. J. E. Farmer's (Felton) annual sale of Shropshire sheep and store cattle was conducted by Messrs. Alfred Mansell and Co., when the following prices were realised:—

Shearling Rams.—The Rev. and Hon. Bridgman 20gs., Mr. O'Brien 13gs., Mr. T. Cooper 7gs., Mr. Cordon 18s., Mr. T. Cooper 6gs., Mr. H. Horton 6gs., Lord Coventry 12gs., Mr. J. Downes 7gs., Mr. Rogers (The Leys), 6½gs., Mr. J. Rawlings 8gs., Mr. T. S. Minton 7gs., Mr. T. Cooper 5½gs., Mr. W. Ainsworth 7gs., Mr. W. L. Danford 5½gs., Mr. Russell 8gs., Mr. Ainsworth 8gs., Mr. Jones (Chander Castle) 8½gs., Mr. F. R. Hill 9gs., Mr. Russell 8gs., Mr. T. Cooper 5½gs., Mr. W. L. Danford 5½gs.

Shearling Ewes.—Four shearling ewes, Mr. Green £5 15s. each, five ditto Mr. Evans £5, Mr. Russell £3 7s. 6d. and £2 10s., Mr. Coxon £2 15s. and £2 12s. 6d., Mr. Evans £3 5s., Mr. Pooler £2 7s. 6d., Mr. Baxter £2 5s., Mr. R. R. Twiddy £2 9s., Mr. T. McMicking £2 5s., £2 9s., Mr. Pooler £2 10s. 6d., Mr. H. Lloyd £2 10s.

Sale of the Dunsmore Shropshires.

The annual sale of Shropshire rams and ewes, the property of Mr. P. A. Muntz, M.P., was held at Dunsmore, Rugby, on August 31st, Messrs. Lythall and Walters, of Birmingham, being the auctioneers. The flock has been most successful in the showyards this year, and consequently the sale was very largely attended. The biddings were very brisk, and a most satisfactory trade resulted. The Royal winning rams sold at 100gs. (Colonel Worsley-Worswick), 65gs. and 36gs. (Colonel Sandbach), 46gs. (Captain Townshend), 26gs. (G. Brown), and 16gs. (Colonel Worsley-Worswick). Other rams sold at 70gs. (M. Williams), 52gs. (P. L. Mills), 31gs. (J. Darling), 26gs. (F. J. Stanhope), 25gs. (Duke of Sutherland), 20gs. (T. Holdcroft), 15gs. (Duke of Grafton), 17gs. (J. W. Phillips), 15gs. (let to W. Thomas), 15gs. (Captain Townshend), 15gs. (J. Goodman), 12gs. (J. T. Glover), 12gs. (F. J. Sumner), 11½gs. (F. E. Muntz), 11gs. (J. W. Sanders), 11gs. (Mrs. Perry Herrick), 11gs. (Berridge), 10½gs. (T. Johnson), 10gs. (J. P. Arkwright), 10gs. (John Smith), 10gs. (J. R. Jones). Ewes sold at 120s. per head and 95s. (R. G. Huddlestone), 105s. (Dr. Wall), 77s. 6d. (J. Darling), 77s. 6d. (Captain Townshend), 72s. 6d. (Colonel Sandbach), 70s. (F. J. Stanhope), etc. The forty-three rams averaged £20 14s. 6d., and the sixty ewes £3 16s. 6d.

Leconfield Park House Ram Sales.

Sixty shearling long-wool rams (Flock Book No. 43), bred by Mr. J. R. Langdale, Leconfield Park House, were offered for sale by Mr. H. Sugdon. The company present was smaller than usual. The highest price obtained was 13½gs., given by Mr. Dale, of Buttercrambe. Mr. Heward, of Kipling Cole's, gave 8½gs.; Mr. Stubbings, of Grindale, 8gs.; and Mr. Featherstone, of Caythorpe, 7½gs. Twenty five of the sheep were returned. The remaining 35 were sold at an average price of £6 9s. each.

Scotch and Border Lambs.

A special sale of Scotch and Border district lambs was held at Annan. The stock consisted of half-bred, Suffolk cross, cross-bred, and Cheviot lambs. There was a brisk demand for lambs. Prices for cross-breds and half-breds made about the rates of the special sale a fortnight ago. Cumberland buyers were fairly well represented, and bought several lots. Compared with the prices of the corresponding sale of last year lambs were considerably higher.

Lamb Sale at Hawick.

Messrs. Andrew Oliver and Son concluded their two days' special lamb sale at Hawick by selling 9,800 Cheviot wedder lambs, 2,200 Cheviot ewe lambs, 1,300 Leicester cross lambs, and 650 black-faced lambs. Small lambs were in most request, and, compared with the corresponding sale of last year, they advanced in price from 2s. 6d. to 4s. 6d. per head. The fine lot from Nether Cassock topped the sale at 18s., while another choice lot of Deadwater made 17s. 6d. The Cheviot ewe lambs concluded the sale, and these met the dearest trade of the season so far, prices being fully 2s. up from last sale a fortnight ago.

Sale of the Quarrington Rams.

Mr. Fred Ward, of Quarrington, held his annual sale of shearling rams on his premises at Quarrington on Tuesday, when Messrs. Hincks and Turner offered by auction eighty animals. Bidding was brisk, and the sale, on the whole, was more than satisfactory. Only three out of the eighty rams were passed, and the amount realised was £807 19s. 6d., or an average of £10 19s. 10d. each. The highest price paid for one animal was 40gs., by Mr. R. Wright, of Nocton. Mr. A. W. Dean, of Dowsby Hall, paid 36gs. for a son of Riby Quarrington 70gs., a ram with a splendid countenance, and one which was good enough for any flock in the country. Another of Nocton Profit's sons was secured by Mr. R. Mowbray, of Gosberton, for 23gs. Mr. McCullough, who was purchasing for shipment to South America, secured several rams, for which he paid 104gs. The top price was 20gs. for a magnificent son of Bourne Big Neck, whilst one of Riby Quarrington 42gs. cost him 17gs., sons of Riby General and Quarrington Knight II. 15gs. each, one of the Dowsby Impressive's progeny 13gs., and two others by Nocton Profit and Bayard's Champion 12gs. each. For New Zealand Mr. Harrison purchased eight rams, and these fetched from 6 to 9gs. Major-General Willson, of Rauceby, paid 17gs. for a son of Quarrington Prince, and 10½gs. for one by Nocton Sandow. Another of Quarrington Prince's rams was sold to Mr. Gooch for 18gs., and the same gentleman purchased one by Riby Quarrington 70gs. for 9gs. A ram sired by Scopwick 98 went for 14gs., the purchaser being Mr. Gilliatt, of Spalding. Nineteen guineas was the price paid by Mr. Smith, of Navenby, for a nice compact sheep on short legs, a shearling by Quarrington Duke, and another fine descendant from Scopwick 98 made 18½gs., Mr. Barnes, of Helpringham, becoming its owner. Twelve and a-half guineas was paid by Mr. W. Barnes, of Terry Booth, for a ram by Riby 70gs., and 12gs. each by Mr. Hilton, of Wellingore, for sons of Nocton Profit and Quarrington Prince, and by Mr. E. Bailey, of Birthorpe, for one from Nocton Sandow. Two rams by Riby Quarrington 70gs. each made 11½gs. Mr. Redford, of Sempringham, and Mr. Sharpe, of Swineshead, securing them. Three very good rams were sold at 11gs. each, their purchasers being Messrs. J. E. Casswell (Laughton), Webster (Martin), and Pick (Lenton). The remainder were sold at prices ranging from 5gs. to 10gs.

Battle Fair.

Battle (Sussex) sheep and lamb fair was held on Thursday. The weather being fine, there was a very large attendance of farmers and sheep breeders. The catalogues comprised upwards of 2,600 sheep, lambs, and rams. Selling started briskly at the first and was well maintained, the whole of the lots being sold and fetching very good prices. In some instances there was keen competition for the better class lambs and sheep. Southdown wether lambs were sold from 35s. 6d. a pen of twenty from Mr. H. Comber, of Westmeston, to 24s., and ewes from 32s. to 24s. Some of the cross breds realised 31s. The highest price of the sheep was 48s. 6d. for a pen of twelve wether tegs from Sir Arundel Ashburnham's flock, and 47s. 6d. for a pen of ewe tegs from the same flock; Kent ewes were knocked down at 34s., and Southdown sheep at 45s. to 23s. There were 25 rams under the hammer, the highest price being 9gs. for a Southdown four tooth ram, bred by Mr. T. Bushby, and from Kidbrooke Farm the property of Ashburnham and ten fine Southdown ram lambs. Three of these were sold before the sale for 6gs. a piece, but the others did not bring nearly so much, the best price being £4.

Blandford Fair.

There was a very full attendance of buyers at this fair, which was held on Monday. The Corporation of Blandford again offered a prize of 5gs. for the best pen of 100 Down wether lambs. The judges were Mr. J. J. Forrester, of Bryanstone, and Mr. George E. Richards, of Wimborne. The pen sent in by Mr. Edward Lock, Bryanstone, undoubtedly proved the best on the field; it was a grand lot of lambs, but they were run very close by a very excellent pen of Mr. Edward Cave, of Shapwick. The placing of the two pens in this order of merit was confirmed by the purchasers at the auction, the winning pen making 52s. per head at Messrs. Senior and Godwin's sale, and Mr. Cave's from 50s. 6d. to 51s. 6d. at Mr. Ensor's. The number of sheep penned—a very large proportion of which were lambs—was nearly 9,000, Mr. T. Ensor having about 5,600 catalogued and Messrs. Senior and Godwin nearly 4,000. The prices obtained were from 3s. to 5s. per head in advance of those current at last year's fair.

Bury St. Edmunds Fair.

The annual Bury sheep fair was held on Tuesday. The most important part of the fair was the sale conducted by Messrs. Simpson and Sons, at which there was a good attendance of buyers. The sale commenced with the Suffolk rams, and all those from the best flocks made good prices. Several Cotswold rams realised fair prices, while Oxford Down ram lambs, of which there was a good show, made a brisk trade, from 8½gs. to 4½gs., and ewes and lambs made decidedly more money than of late. Another feature of the sale was the disposal of Mr. J. Sturley Nunn's Whelnetham flock (registered No. 212). Of the Suffolk ram lambs, eleven from Mr. E. P. Frost's (West Wratting) registered flock made from 70s. to 44s. 6d.; shearling rams from Mr. B. B. Booth's, Plashwood Park, realised about 44s. 6d. Two shearlings from Mr. R. P. Fyson, Great Barton, fetched 50s. and 45s. respectively. A two-shear Suffolk ram, from Mr. J. Scott's (Thorp registered flock, made 50s.; eight ram lambs, from the registered flock of Mr. H. E. M. Davies' Exors., Herringswell, realised prices ranging from £4, £3 10s., £3 5s., down to £2 15s., and a Suffolk ram lamb, from Col. H. McCalmont, M.P.'s Cheveley flock, fetched £3. Ten ram lambs, from Mr. C. Morbey, Soham, made from £2 17s. 6d. to £2 5s., whilst a Suffolk shearling ram, from Sir E. Walter Greene's (Nether Hall), realised £6 6s. Nine ram lambs, from Mr. R. Barclay's (Higham registered flock, ranged in prices from 55s. 6d. to 42s. 6d. A ram lamb from Mr. J. Wood's (Hengrave) flock made £4 10s., another £4, another £3 15s., and two others £3 10s. Sixteen from Mr. P. Eagle, Risby, secured purchasers at prices ranging from £6 6s. down to about £3, and just over half a score, consigned by Mr. J. T. Stockburn (Clare), sold at from £7 7s. to £3 each. Out of a lot of twelve, from Mr. H. Northend (Moulton), the highest price made was £5, and a score from Mr. R. Burrell's Westley Hall flock, went at prices ranging from £8 8s., £4 15s., £4, down to £2 15s. Of a dozen from Mr. Thomas Goodchild (Great Yeldham), one made £8 8s., another £7 17s., two £6 16s., and two £5 15s., the lowest price in the consignment being £4 14s. 6d. Mr. G. B. Robins' (Moulton) consignment of nine, went at from £3 16s. 6d. to £2 10s. Five shearling rams, from Mr. C. Morbey (Soham), averaged about £2 10s. Ten ram lambs, from Mr. A. H. Cobbold, Eldo House, made from £4 5s. to £2 10s. Messrs. F. and S. Traylen's (Great Barton) consignment of seven ram lambs, ranged from £5 15s. 6d. to £2 17s. 6d. Mr. E. Swann, Dunstall Green, sent three ram lambs, for which the top price was £2 12s. 6d. Shearlings from Mr. W. N. Champion's flock, Riddlesworth, ranged from £2 5s. Out of Mr. J. Fyson's Clee Hall consignment, the top price was £2 15s. Four shearlings, from Mr. W. Boocock's (Gazeley), made 50s. each, and others from Mr. W. E. Cawston, from £2 10s. to £2 2s. 6d. Long-woolled shearling rams, from Mr. T. Thornton's (Cavenham House), ranged from £3 17s. 6d. downwards.

Pedigree Cotswold rams bred by Mr. F. Cheshire, Eastington, Gloucestershire, made good prices, ranging from £8 8s., £5 15s. 6d., £4 10s., down to £3. Thirty grand Oxford Down ram lambs, from the Kelmscott flock, the property of Mr. E. W. Hobbs, made from £5 5s. to £3 13s. 6d. A score of Oxford Down ram lambs, the property of Mr. J. White, Home Court, Bampton, Oxon, made from

£8 8s. down to £4 4s., whilst a similar number from Messrs. Treadwell, Adams, and Worley's flock, ranged from £8 18s. 6d. down to £5 5s. Southdown shearling rams, from Earl Cadogan's, K.G. (Culford), realised from £6 6s. to £2 7s. 6d., others from Col. H. McCalmont, M.P., averaging about £2 5s.

Among the Suffolk ewes, those from Mr. J. Stirley Nunn's flock went as follows: Shearling ewes 73s. to 56s., two-shear ewes 76s. to 64s., three-shear ewes 65s. to 55s., full-mouthed ewes 55s. to 46s., ewe lambs 46s. to 36s., two rams £7 7s. and £5 5s. respectively

Buckingham Fair.

This fair was held on the 1st inst., when there was a large consignment of sheep and the attendance of dealers and farmers was large. Messrs. Geo. Bennett and Sons' pens were occupied by very useful drafts of ewes and lambs, which with few exceptions sold at very satisfactory prices. With one exception the sixteen shearling rams, bred by Mr. Treadwell, of Astwell, were a very level good lot, and excluding the one mentioned, made an average price of £6 5s., the highest price being 8gs., reached by two of the sheep. All sold readily. Upon the auctioneer introducing these sheep, Mr. Treadwell remarked that he had been breeding Oxford Downs for over fifty years. Mr. A. J. Robarts, of Tile House, sent as usual a very nice consignment of fifteen ram lambs, which also met a ready sale, and averaged £3 2s. 8d., the highest price being £4 5s. Lord Penrhyn consigned four ram lambs from his Little Hill Farm at Wicken. These averaged £2 10s. 8d., the highest price being £3.

Messrs. Harrison and Sons had a very large number of sheep (upwards of 1,000) consigned to them again this year from most of the best flocks in the neighbourhood. The sale included consignments of Oxfordshire Down rams and ram lambs. Lord Penrhyn's ram lambs were sold at prices ranging up to £4 5s., to Messrs. C. Lepper, Wm. Hedges, J. Robertson, Jeff, Treadwell, Withington, Evered, Batchelor, Phipps, etc. Mr. Robert Dickens's seven went for 50s., and Western sheep 40s. to 45s. Mr. E. Gillett also had five shearling rams, which sold at from 5½gs. to 6gs., as well as Messrs. Coates, Hedges, Roots, etc.

Cirencester.

The September fair was held on Monday last, and was the largest fair of sheep ever held at Cirencester, upwards of 5,000 sheep being penned. There was a large attendance, and a great number of buyers from all parts of the country, especially for breeding ewes and theaves, but the trade for rams and ram lambs was not so good as at the August fair, contrary to general expectations. Mutton was scarce and dear, and best qualities made up to 8½d. and 9d. per lb., while fat ewes sold better. Stock sheep sold well, with a good trade, ewes making from 37s. to 42s. a head, and anything like good theaves realised up to 50s. a head. Good lambs sold readily up to 32s. and 33s. each. Of the rams and ram lambs, only the best sold. Pigs dear.

Mr. C. F. Moore sold Cotswold rams and ram lambs for Mr. Russell Swanwick, of the Royal Agricultural College Farm, which averaged from 3gs. to 5½gs. For Mr. J. B. Stevens, of Ogbourne, he sold twenty-four Hampshire Down ram lambs, which averaged £5 15s. 6d., making up to 8½gs., which price was paid by Mr. E. Fowler, of Aston. For Mr. Henderson, M.P., of Buscot Park, fourteen Hampshire Down ram lambs were sold at an average of £4 10s. 6d. Of Oxford Down ram lambs an unusually nice lot of sixteen from Mr. Jefferies, of Black Bourton, was sold by Mr Moore at an average of £6 16s. 6d., Mr. F. P. Bullev, of Marston Hill, giving the top price, 9gs. He also sold ram lambs of the same breed for Mr. A. Mace, of Kelmscott, at an average of £5 15s.6d.

Mr. A. F. Hobbs was entrusted with extensive consignments of mutton, stock sheep, and ram lambs. The mutton sold readily at prices already quoted. For the Earl of St. Germans he sold 100 Oxford Down theaves from the Down Ampney estate, which averaged 42s. a head, and 100 ewes, which made an average of 38s. a head. For Mr. J. H. Large, of Crudwell Manor, he also sold Oxford Down ewes at an average of 45s., and for Mr. W. T. Stevens, of Ranbury, at an average of 43s.; while smaller lots from other breeders, including Mr. R. Cole (Wiggold), Mr. R. Cole (Fairford), Mr. T. J. Penson (Fairford), Mr. H. Penson (Eastleach), Mr. J. Plumbe (Ashton Field), and others, he sold ewes and theaves at from 36s. to 45s. a head. The trade for ram lambs was not particularly brisk, but Mr. Hobbs found purchasers for a large proportion of those entrusted to him. Of the Oxford Down ram lambs the following results were reported:—Mr. J. H. Large's twenty (Crudwell) averaged 3½gs.; Mr. William Arkell's thirty (Kempsford), averaged 5gs.; Mr. R. W. Hobbs's thirty (Kelmscott), averaged £5 11s. 9d., the highest price being 7gs. to Mr. E. Parson, Coates; Mr. W. T. Stevens's twenty (Ranbury), averaged 4gs.; Mr. W. Reading's twenty (Langford), averaged £5 13s. 6d., the highest price being 7½gs. to Mr. W. Arkell, Kempsford; and Mr. Hugh Baker's fifteen (Chedglow), averaged £4. The same auctioneer also had a consignment of thirty Hampshire Down ram lambs from Mr. W. F. Hobbs (Langford), which realised an average of £5 2s. 6d., the highest price being 9gs., paid by Mr. W. Large, Cirencester.

Messrs. Acock and Tayler sold Oxford Down shearlings for Mr. Herbert Lord, of Lillybank, Charlton Kings, at an average of 5gs.; and for Mr. T. James, Charlton Kings, at an average of 5½gs.; while Oxford Down ram lambs from Mr. G. Adams, of Pidnell, Faringdon, sold at from 5½gs. to 9gs., Mr. Raymond Lewis, of Shawswell, purchasing at the latter figure, the whole twenty being all but cleared. Of the Cotswold breed this firm offered twenty shearling rams from Mr. F. Craddock, Eastington, and twenty from Mr. W. Houlton, of Broadfield, which met with a poor trade.

Messrs. Castle and Pope, in addition to several lots of mutton and stock sheep, sold six Cotswold shearling rams for Mr. John Fowler, of Aston, at an average of 6gs., and a dozen ram lambs at about 2gs. each.

Peterborough Ram Fair.

This fair was held on Wednesday, when the attendance was good. The small show of Lincolns made no fancy prices, Down rams, which are now the more popular at Peterborough, being a fair trade at prices ranging from 4gs. to 12gs. The whole of the rams penned, however, were not sold. Messrs. Fox and Vergette sold 182, including animals from the folds of Mr. Buxton, which made from 4gs. to 12gs.; Mr. Young, from 5gs. to 12gs., several of which realised 10gs.; Mr. Scott Murray, from 4gs. to 9gs.; Colonel Blake, from 3gs. to 5gs., and several others averaging 6gs.

The Bakers' Exhibition at Islington.

The eighth annual Confectioners, Bakers, and Allied Traders' Exhibition opened at the Agricultural Hall on Saturday, and will be continued throughout the week. The object of the exhibition, which is to improve trade generally by giving an opportunity to its various members of seeing the latest improvements in everything appertaining to their business, is fully attained in the present exhibition. The stalls contain every article that could be required for bread and pastry making, from the flour to the cart in which to deliver the finished article. The stalls are most tastefully and attractively set out, and the whole show is of an eminently practical nature. A feature is the model bakery in which the whole of the process of bread-making is carried out by machinery, and the turn-out for the week will be about thirty thousand loaves. Competitions of all kinds connected with the business, including bread-making and pastry-making, are to be held, and for the window-dressing competitions a special terrace of inviting shops has been erected. In the course of the week three scholarships available at the National School for Confectioners, as well as numerous other prizes and medals for proficiency and excellence in all branches of the work, will be awarded.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending Sept. 1st, 1900:—

SHOWS.

Bath Horse Show.

The seventeenth exhibition in connection with the Bath Horse Society was held on Wednesday and Thursday. The entries were numerous, and attractions for the general public were liberally provided. The committee were fortunate in obtaining, through the kindness of Messrs. Louis W. and Walter Winans, the presence of some of those gentlemen's famous trotters and pacers, which, as on the previous day, gave exhibitions of their powers, although the course was not altogether favourable. One feature of the American trotting exhibition was the appearance of Mr. Walter Winans' Lake Erie and Princell, the holders of the world's two-mile pair-horse record, who were shown to pole in a speed wagon.

The judges were the Rev. Cecil Legard, Mr. Digby Collins, Mr. H. Fusby, Mr. C. E. Galbraith, and Mr. E. Burbidge.

Hunters.

The entry in the open hunters, heavy weights—15 stone and upwards—numbered five, and at roll-call there was not an absentee; Mrs. R. Charteris, of Grosvenor Square, London, being represented by Perfection, a bay gelding; Mr. J. Drage, of Northampton, with his grey gelding, Snowdon; Mr. J. H. Stokes, Market Harborough, with Pasha, a chestnut; Mr. T. Blackman, of Corsham, with a bay gelding, Sportsman; and Mr. F. R. Fry, of Keynsham, with his chestnut, Merry Boy. Small as the class was, its quality was fairly good, most of the entries being known previously to the ring. Pasha was selected for first honours; he is a handsome chestnut, with a good stride, a five-year-old, and by Turco. The grey of Mr. J. Drage was placed second; he is also a five-year-old, and is by Belgrave; and Mr. Frank Fry's Merry Boy, by Maroni, was held in reserve.

The restricted class for weight carriers which had not won a prize of £10, or upwards, in a hunters' class, prior to the last day of entry, brought a much more satisfactory entry, for thirteen turned out in the ring from a list of fifteen in the catalogue. The result was to place the winners in the same order as in the previous class. Both Pasha and Snowdon were entitled to show in this class, and Mr. Stokes's chestnut again headed the list. Mr. Drage took second place with Snowdon; a smart six-year-old grey gelding, the property of Mr. G. W. Sumner, Market Harborough, was put third. A compact chestnut gelding, Wine Bibber, the property of Mr. J. G. Ruddle, Devizes, was given the reserve rosette, and Mr. F. Fry's Merry Boy, which was reserved in the open class, was commended. Mr. J. Pethick's chestnut gelding Parapet and Mr. J. B. Till's Queen were also the recipients of commended rosettes.

The 14-stoners (open) made up a small field, and the judges had little trouble in making their selections, for the winners stood fairly out. In point of merit they were placed as follows:—Mr. J. Drage's grey, Brampton, and Mr. E. Hoyle, of Bacup, with Countess, a bay six-year-old, by Spendthrift; and Major D. F. Boles, of Minehead, reserve with Meath, a bay gelding by Miads. For the like class for horses not having previously won a £10 prize there was a strong entry, sixteen being ridden in. The preliminary tests over, there was still half of the class before the judges, who at the finish found themselves unable to get away from Brampton, Mr. Drage's grey, which won in the open class. Second prize was captured by another of Mr. J. H. Stokes' entries, this time by Royal Flush, a chestnut four-year-old, by King of Trumps, Messrs. Apperley and Louis, of Cheltenham, standing third with a nice-looking brown named Sporting Luck, and Mr. G. W. Sumner reserve with Pytchley, a six-year-old bay gelding. The judges were so well pleased with this class that they endorsed their slips "very good."

A strong class of novices occupied the attention of the judges for some time, and the first went to the second in the last class, Mr. Stokes's Royal Flush. Messrs. Apperley and Louis were placed second with Sporting Life. Mr. Sumner's Pytchley was third, and a powerful grey gelding, Victor, also from Mr. Sumner's stable, was reserved. Mr. Stokes secured another first in the four-year-old hunter class with a brown mare, Treasure. Mr. Stokes was second with Royal Flush, and Mr. Gulley's Moor Bird was third. For the silver cup offered by Captain Forester, open to the first six hunting classes, four came out—Mr. Stokes's Pasha, the winner of the open heavy weights; Mr. Drage's Brampton, winner of the open 14 stone class; Mr. Stokes's Royal Flush, second in the four-year-old and restricted 14-stone classes; and a brown mare Treasure, also owned by Mr. Stokes. The judges subjected them all to a severe test, and the cup was eventually awarded to Mr. Drage's Brampton, which displayed plenty of galloping power, as well as weight-carrying abilities. Treasure was reserved.

The yearlings led out were fairly up to the standard of promise usually met with at the exhibition. Mr. C. Wakely, of Axminster, produced the winner in a chestnut colt, named Ruby, bursting a distinguished ancestry, which includes the redoubtable Hermit. Mr. O. N. Holt-Needham was second with Topaz, by Yard Arm. To Mr. J. L. Nickisson, of Bracknell, Berks, went the third prize, for March Wind, a chest-

nut, by Whisperer. The reserve rosette was handed to Mr. C. C. Gouldsmith, of Cirencester, for his chestnut gelding Matrimony, by Yard Arm; Mr. E. Hoyle, of Bacup, and Mr. W. Palmer, of Barnet Gate, Herts, were commended.

The open two-year-olds followed, and were led by hand. Eight had entered, and all were present, making up a class which was in every way replete with interest. That old exhibitor, Mr. T. H. Miller, of Sherborne, eventually won with Mainsail, another of Yard Arm's splendid progeny. The winner is a fine-coloured bay and, with ordinary good fortune, should be heard of another day. Mr. C. Kelway-Bamber, of Chelmsford, was given the second rosette for his chestnut mare Homely Lass, Mr. Holt-Needham's Dancing Girl being third and Mr. J. E. Taylor, of Chippenham, reserve with Letty Lind. Mr. S. Berry (Bath), Mr. W. R. Emmott (Chipping Sodbury), and Mr. J. Walmesley (Chippenham) were commended.

Another strong class was shown in the three-year-olds, there being a good muster and plenty of quality. Mr. J. C. Barton, of Fairford, Gloucestershire, had the honour of leading this excellent lot with a grand brown gelding named Sportsman, by Perfection. The winner has strength, form, and pace, and should develop into one of the best. Mr. O. N. Holt-Needham stepped in and took possession of the second prize with Killarney, a chestnut filly, by Yard Arm; Mr. B. Wall, of Coleshill, Birmingham, was third with a chestnut gelding named Masterman, by Master Maurice; and Mr. L. H. Taylor, of Chippenham, was held in reserve. The commendeds included Mr. Frank R. Fry's black gelding Game Cock, Mr. T. M. de Cliffe Vigors' (Eardisley, Herts) Maid of Ross and Roulette, Mr. E. Hoyle's Sirdar, and Mr. T. H. Miller's Marquis.

About half a dozen entries competed for the Hunters' Improvement Society's silver medal, and it was won by Mrs. A. R. Poole, Dursley, with a bay filly by Yard Arm, Mr. F. Ward, of Bath, being reserve with Lady Beatrice.

For brood mares, in addition to the three prizes for the class £12, £8, and £5 the Hunters' Improvement Society offered its gold medal. Eight entered, and Mr. O. N. Holt-Needham took the leading premium with his bay Goodcraft, by King Crafty, with a foal by Yard Arm; Mr. L. H. Taylor, Chippenham, second with Platypus, whose foal is by Grand National; and Mr. W. H. Barber, Henley-on-Thames, third with his mare Sunbeam, a nice chestnut, with a foal by Yard Arm.

The Hunters' Improvement Society's gold medal for mares was not awarded, but the Society's silver medal, open to the nine classes of hunters, fell to Mr. T. H. Miller's bay gelding Mainsail, which won in the open two-year-old class, Mr. Holt-Needham's Goodcraft being held in reserve.

Hacks and Riding Horses.

Hacks and riding horses opened with weight-carrying cobs up to at least 15st., not over 15 hands high, and not less than four years old. There was not a large entry, and the winner was forthcoming in that pretty chestnut Golden Drop, owned by Mr. D. S. Carr, of Twerton, Mr. William Foster being next in order of merit with Mel-Valley Modjeska, a stylish brown mare by Anconeus II.: Mr. J. Pethick's Plympton third, and Dr. J. Fuller, of Long Ashton, reserve with Lady Louise.

There were no restrictions for covert hacks, action was not deemed necessary, and height was optional. There was a good entry, and competition was fairly sustained. This event ended in a win for Nobleman, the chestnut gelding of Messrs. Apperley and Louis, Mr. G. P. Finch, of Exeter, standing second with one of Tel-el-Kebir's progeny, a chestnut gelding named The Parson, and Mr. E. Hoyle, of Bacup, whipped in the prize list with his bay Bonaparte: Mr. L. Unwin, Tiverton, taking reserve with a really good-looking bay mare, Dainty.

Hacks between 14.2 and 15.3—outside previous £10 winners—were fairly well represented. Dainty, the reserve in the previous class, was now under the different conditions quite to the fore. Miss F. Hawkins, of Porlock, took second with Graceful, a four-year-old bay; another lady exhibitor, Mrs. Edward Martindale, of Paddington, being close up with a five-year-old dark chestnut mare named Rosie Morn; and The Parson, which was second as a covert hack, had now to be content with reserve position.

The saddle horses between 13.2 and 14.2 were quite a nice lot, notwithstanding that ten-pounders could not compete. Mrs. A. K. Apperley won with her chestnut gelding Silver Star; Messrs. M. Tucker and Son, of Bath, stood second with their bay mare, Lady Vix; Major Duncan, of Harley Street, London, third, with a bay mare by Conjurer II., named Enchantress; and Dr. J. Fuller again reserve with Lady Louise.

The entries for novices not exceeding 15.3 hands was a taking class having regard to the ruling conditions. It gave Mrs. Martindale her opportunity, and with Rosie Morn, which took a third prize earlier in the judging, she topped the lot, somewhat closely pressed by Dr. J. Fuller, whose bay mare Mignon carried off second honours; Mr. J. W. Riddler, of Minehead, being third; and Mrs. Beamish, of Bath, reserve.

The open ponies, not exceeding 13.2 hands, brought out a pretty string, which was headed by Miss B. Platt's South Kensington Lucy Glitters; Mr. Arden, of Exeter, second with Magpie, one of Lord Bang's; Prince Charming, the property of Mrs. A. K. Apperley, third; and Master M. Fry's Novice reserve. The Hackney Society's silver medal was subsequently awarded to the winner of this class, Lucy Glitters.

The whole of the five pairs entered for the double harness event put in an appearance, some well known exhibitors being well represented. For instance, Mr. C. J. Wertheimer, of Bourne End, Bucks, had Hopwood Squire and Jubilee King, chestnuts; Mr. G. F. Johnson, of Woodbridge, Suffolk, sent his bays, Searchlight and Brilliance; Mr. J. Pethick, his black browns, Lord Bang and Lord Bang II.; Messrs. Godsell's browns, Lord Bath and Duke of York; and Mr. E. Ames well upheld the honour of Bath with a pair of bay geldings, Marvel and Movement. The chestnut pair of Mr. Wertheimer's settled down at once, and went exceedingly well, and the same can be said of Mr. Johnson's bays. Messrs. Godsell's horse, however, would not lay down to work, and in any other hands than Mr. Alfred Butcher's they might just as well have been driven back to their stalls, but that good whip by his patience did something. It came, however, a little too late to be of real service, and a third prize was all that the judges could give on form. Mr. Wertheimer's chestnuts were first, and Mr. Johnson's bays second, Mr. E. Ames' bays being held in reserve.

The single harness classes opened with an exhibition by the celebrated American trotters and pacers, the property of Mr. Louis W. Winans and Mr. Walter Winans. The first illustration of pace was given by Eggnog, which was shown in a speed wagon, and Barney F., a winner of many races (mile trial, 2min. 17sec.). The Messrs. Winans drove their flyers, and the pace attained was watched with great interest by the spectators.

The single harness class for entries under 14.2 hands filled and turned out well, to the extent of a dozen. The top half were fairly close, and gave the judges some little trouble. The leading prize went to Lord Go Bang, shown by Mr. G. E. Franklin, of Derby, an entry which in the open riding class was unnoticed. Mr. A. S. Day, of Crewe, was second with his chestnut mare Sunshine, and Lucy Glitters, the winner of the riding pony event and the Hackney Society's medal, third; Mr. J. Pethick's Phyllis was reserve.

The not less than 14 hands 2 inches brought out a really first-class lot, the public quite appreciating the efforts of the competitors, pace and form being of high quality. Messrs. Godsell's chestnut, Heathfield Squire, headed the list, and Lord Bath, from the same stable, was second, Mr. W. Pearson, of Harrogate, being third; Silver Star and Hopwood Squire both h.c.

Further exhibitions by the celebrated Winans' trotters followed, including a spin round by Princell and Lake Erie, the holders of the world's two miles pair horse record. Their speed was marvellous for harness horses.

The open tandem was well won by Mr. Selman's (Bristol) team, Mr. G. F. Johnston being second, and Mr. R. I. Weight third.

The class for harness horses not less than 14.2, restricted to those animals which have not won a £10 prize previous to the last day of entry, went to Mr. W. Foster's showy brown mare Mel-Valley Modjeska, which was second in the open hack class on Wednesday. Mr. E. Ames's Marvel was second, and an aged bay gelding, Sir Robert, the property of Dr. G. King-Martyn, was third.

There was a good entry in the class for cobs or ponies under 14.2, which have not won a £10 prize, and here Major Duncan's smart bay mare Enchantress earned the chief prize, while a very capable second was found in Mrs. Apperley's speedy little black gelding Prince Charming, Dr. Francis, Brecon, was third with his brown mare Garton Lass, and for his bay gelding, Metpool Swell, Mr. Selman, Clifton, secured the fourth prize. Dr. Fuller's mare, Lady Louise, was awarded the reserve rosette.

Mrs. Apperley obtained the first prize in the next class for ponies no. over 13.2, and which had not won a prize of £8, with Prince Charming. Mrs A. N. Budd's dun gelding, Little Nipper, was second, and Mr. G. H. C. Arden, Exeter, was reserved with his bay mare, Magpie.

The local class for ponies and cobs, not less than 14 hands, which had not won an £8 prize, gave Mr. E. Ames's Marvel another prize, this time at the top of the list. Dr. G. King-Martyn was second with Baden-Powell. Mr. R. I. Weight was third with Lord Kitchener. Mr. L. W. T. Vachell's gelding Odd Spots was reserved.

The under 14 hands local class was won by Mrs A. M. Budd's Little Nipper. Mr. R. Monk's grey mare, Patchwork, the property of Mr. L. W. T. Vachell, took the third prize. Mr. J. White's mare, Nancy, was reserved, and Mr. Berry's Jorrocks commended.

A class for harness animals not over 15 hands, the property of exhibitors residing within three miles of the Bristol Corn Exchange, only brought three entries, the first prize going to Mr. S. R. Selman's bay gelding Metpool Swell. Mr. R. I. Weight's Lord Kitchener [illegible] and Mr. W. H. P. [illegible] Princess third.

The open [illegible] over 14.2 [illegible] every one [illegible] and [illegible] with [illegible] and [illegible] Lucy Glitters, the property of Mr. G. F. Franklin, was placed first. Miss A. M. Budd's Little Nipper, and Miss B. Platt's Lucy Glitters, the winner of the Hackney Horse Society's medal, Wednesday, was third. Mr. A. S. Day, of Crewe, was reserved with Darkie Bess. Miss Apperley's Prince Charming and Messrs. Godsell's Jorrocks were commended.

The open [illegible] for pairs over 14.2 brought out a [illegible] on Wednesday [illegible] Mr. G. F. Johnson's pair of [illegible] were second in the tandem class, and Mr. [illegible] Searchlight, Little Nipper and Lucy Glitters were third. Mr. R. I. Weight's grey and roan pair were reserved.

Four came out for the [illegible] Hackney Horse Society for the best [illegible] more or getting not less than 14.2. The medal was awarded to Mr. C. J. Wertheimer's grand chestnut gelding Hopwood Squire, who [illegible] ning pair in the open 14.2 class. Mr. W. S. Cunard's grey gelding Silver King was reserved.

The open tandem class—not less than 14.2—brought out the [illegible] Mr. Wertheimer's Hopwood Squire and Jubilee King, chestnuts; Mr. J. Johnson's bays, Searchlight and Brilliance; Mr. J. Pethick's [illegible] Lord Bang and Lord Bang II.; Mr. E. Ames' bays, Marvel and Movement; Messrs. Godsell's [illegible] chestnut, Northity Squire and Heathfield Squire; and Mr. J. Walmesley's [illegible] Songster. A better lot no one could wish to see in the ring. The leader of Mr. Johnson's [illegible] little too mettlesome, which prevented the team being seen at its best. Mr. Wertheimer's [illegible] were given first prize; they [illegible] pick team, but essentially [illegible] to hold [illegible] Messrs. Godsell were second; Mr. [illegible] boys third; and Mr. Johnson's [illegible] remainder being commended.

A further exhibition of American trotters followed, and Mr. J. Burrell, the winner of the open [illegible] event the previous day, [illegible] well-known local trotter Secret Service.

Mr. S. Campbell Cory's presentation cup, value £25, to the best [illegible] gelding [illegible] harness, was practically the [illegible] prize of the division. It was open without [illegible] only those from Classes 21 to 25 inclusive. At first this might look like a big entry, but owners knew to a "T" their chances, with the result that only Messrs. Godsell's Heathfield Squire and Mr. Wertheimer's Jubilee King were entered. The cup was awarded to Heathfield Squire, and it was [illegible] judges to get away from this entry when in single harness. In case of [illegible] Jubilee King was held in reserve.

An exciting harness class was the trotting competition, for which two prizes were offered, providing there were five entries, [illegible] to be considered. There were only [illegible] of whom turned up. Mr. Selman's Lord Cardigan, and Mr. G. C. Lane's Nellie. The former got off badly, and did the mile course in 4mins. 4secs.; Nellie, accomplishing it in 3mins. 33secs., won the [illegible]

Jumping.

[illegible] featured [illegible] The first [illegible] and then over [illegible] including hurdles, bush gate, [illegible] and water. The best [illegible] Mr. Butcher's bay mare Miss May, ridden by Miss May Butcher. Mr. J. Wheeler's Red Letter also cleared all the jumps very cleanly. Mr. C. A. Daniell's roan gelding New [illegible] and Mrs. Blockley was equally successful with her chestnut gelding Alfred, but the pace at which the jumps were negotiated [illegible] slow. Stag, a grey gelding owned by Mr. Grundy, jumped well, but was [illegible] round. Mrs. Blockley's Alfred was given the first [illegible] Stag was placed second and Mrs. Wheeler's Red Letter third. Mr. Grundy's Swallow was reserved.

The next jumping [illegible] walls, and open water, the winners of first and second prizes in the last competition being barred. Mr. G. Reynolds's brown gelding [illegible] a smartly-executed [illegible] Mr. J. Ford's Easter Morn was second, and Mr. W. W. Grundy's Swallow third. Mr. [illegible] second with The Rogue.

The jumping for the second day opened with an [illegible] numerous entry, but the first and second winners of the previous day [illegible] course her chances were gone. Mr. Olver's Barmaid did well, except at the water. Mr. Grundy's Swallow

Miss May, ridden by Miss Butcher, was not quite so amiable as on the previous day, and consequently did not jump so well. Mr. F. W. J. Firkins' Artist showed good form and pace, taking everything in style, and Mr. Wheeler's Red Letter, next in order, cleared everything, much amusing the crowd by the free way it kicked out between the jumps. Newcastle, ridden by Mr. T. Blinman, went round in workmanlike style, but was a trifle disappointing at the water. For several others the loose rails proved a trap. These were not too high for the horses, but they ought to be made white so as to let the jumper know what is wanted. The second round opened with Red Letter, which took the course very well, but a tell-tale splash proved that the water had not been successfully negotiated. The next called in was The Rogue, ridden by Mrs. Martindale, and the lady gave a very good show. Mr. Wheeler's Laddie was a little wild, but it cleared everything which had to be jumped freely and well. Diana, belonging to Mrs. Blockley, but ridden by a stable lad, took all obstacles, putting in a remarkably fine leap at the water. This ended the second round, and the judges proceeded to hand out their selections, Diana proving to be first choice, Laddie second, The Rogue third, and Red Letter reserve.

There was more good jumping in the class for timber, stone walls, and open water. Artist, which had such scanty justice in the first jumping of the day, was fortunate enough to catch the judge's eye, and so survived for the second round, as did also Red Letter, Fear Not, The Rogue (ridden by the owner, Mrs. Edward Martindale), and Diana, Mr. J. Baldwin's aged bay mare, whose rider made the usual mistake of too powerfully applying the whip within a length or two of the water, which means a complete footbath. The judges did not apply the closure so promptly as in the previous events, and a third round was called, in which the following participated: Red Letter, which did well except at the rail; Fear Not, the little pony which was in best form, and to the delight of the spectators cleared everything. On the first prize being awarded to Fear Not, the small steed was accorded an ovation; second prize went to Red Letter; The Rogue was given third; and Artist, which distinctly deserved a higher place, had to be content with reserve position.

Uttoxeter Horse Show.

The third annual show promoted by the Uttoxeter and District Horse Society was held on Thursday. The entries exceeded those of previous years. The light horses formed an excellent show, many well-known winning animals being put into competition. The principal prize winner was Mr. R. Hussey, of King's Bromley. In the class for best mare for breeding harness horses he won with Maud. The Hackneys, on the whole, were a very fair lot. Mr. Hussey's Atroich Surprise was first. The same exhibitor was successful in the class for two-year-olds, geldings or fillies. Mr. Hussey's Bog Myrtle topped his class for three-year-old geldings or fillies. The Shire classes were very good in quality, the local element coming out strongly. Mr. Brandon, of Aston Hall Farm, Stone, won the Shire horse medal with May Queen. The foals were a particularly good lot, the colt foal cup being won by Mr. Everard's Bardon Bobs. In the filly foal class the first prize and cup were awarded to Mr. Victor Cavendish's Holker Minerva. The two-year-old geldings were numerically weak, and the three-year-olds were topped by Mr. Lowe's Royal Excelsior. Mr. Muntz's Lockinge Belle, which has won some valuable prizes, was beaten by a local mare, namely, Mr. John Orme's Rimler. In the harness, hunter, and saddle classes there were an excellent show of stock, the principal winners being Sir Peter Walker, Bart.; Mr. G. H. Stokes, Market Harborough; Mr. Connop, Brailsford; and Mr. Robert Hussey. Mr. Hussey's Maud won the Hackney Horse Society's medal.

Foal Show at Otley.

The eighth annual foal show in connection with the Wharfedale Agricultural Society was held in the Otley Cricket Field on Saturday, when there was an excellent exhibition of brood mares, foals, working sheep dogs, agricultural and garden produce. The entries were quite equal both in quality and quantity to previous years. The judges were as follows: Heavy mares and foals, Mr. J. Oakes, Manchester; light mares and foals, Mr. Anthony Orr, Hornby; sheep dog trials, Mr. R. S. Piggin, Long Eaton; agricultural produce, Mr. James Bailey, Keighley, and Mr. Thomas Leake, Swillington; garden produce, Mr. Arthur Rhodes, F.R.H.S., Guiseley. The awards were as under:—

Prize List.

Heavy brood mare (open): 1, Oldroyd Bros., Woodlesford, Leeds (Lawn's Sunflower); 2, W. H. Dawson, Otley; 3, J. Dale, Arthington (Cheskell Blossom). Hackney brood mare (open): 1 and 3, D. Hopkinson's executors, Bradford (Golden Belle and Lady Bradford); 2, J. W. Booth, Calverly (Daisy Bell). Hunter brood mare (open): 1, F. W. Dolby, Leeds; 2, T. L. Smithes, Ripley. 3, M. Mulberie, Arthington. Agricultural brood mare and foal (eight miles radius), the property of a tenant farmer: 1, J. Dale; 2, C. Watkinson, Clifton, Otley; 3, A. Rendell, Baildon. Agricultural brood mare and foal, the property of a tenant farmer farming not less than fifty acres of land within the boundaries of Bramham Moor country: 1, C. Watkinson; 2, W. Proctor, Weston, Otley. Heavy colt foal (open): 1 and 3, W. H. Dawson; 2, C. Watkinson. Heavy filly foal (open): 1, J. Sale; 2, G. Escreet, Cookridge; 3, A. Randell. Heavy foal by Bramhope Stud horses: 1, J. Dale; 2, G. Escreet; 3, A. Rendell. Heavy foal by Yorkshire Echo: 1, A. Greenwood, Wilsden, Bradford; 2, T. Dawson, jun., Cookridge. Heavy foal, bred by a tenant farmer (eight miles radius): 1, J. Dale; 2, G. Escreet; 3, A. Randell. Hackney colt foal (open): 1, J. H. Greenwood, Apperley Bridge; 2, J. Lee and Sons, Hipperholme; 3, W. Johnson, Wetherby. Hackney filly foal (open): 1, J. Yates, York; 2, J. M. Tankard, Baildon; 3, J. Hodgson, Esholt. Hackney foal by Ganymede: 1, J. H. Greenwood; 2, J. Lee and Sons; 3, W. Johnson. Hackney foal by Hayton Performer: 1, J. M. Tankord; 2, Parkinson Bros., Burley-in-Wharedale; 3, J. Hardisty, Otley. Hunter foal (open): 1, T. L. Smailes; 2 and 3, J. Ingledew, Bedale. Hunter foal, by the Right Hon the Earl of Harewood's Ismeno: 1, E. A. Brotherton, Arthington Hall; 2, P. P. R. Garnett, Otley; 3, J. H. Ingle, Otley. Light foal, bred by a tenant farmer (eight miles radius): 1, J. H. Greenwood; 2, Parkinson Bros.; 3, R. Dykes, Headingley.

Barrow-in-Furness.

The annual show of the Barrow-in-Furness Agricultural Society took place on the 1st instant, and with fine weather and a good entry the Society can congratulate themselves upon a successful day. Heavy horses have always been the strong section of the Barrow Show, and this year they were more numerous than on any previous occasion. Of the seventy-five entries in this department of the show a fair proportion went to the Holker representatives, the five-year-old bay mare, Boro Quality, a hack belonging to Mr. Cavendish, gaining the Shire Horse Society's silver medal, as well as leading in the open class for mares in foal or with foal at foot. In the light horse classes there were 104 entries, bringing the total horse exhibits up to 179. The most notable feature here was the fact that Mr. Tom Mitchell's ubiquitous and well-nigh unconquerable Sam Weller had to make way for the fine chestnut gelding Featherby Squire, owned by Mr. Irving, of Blackburn. The Eccleshill representative, however, had his revenge later in the day by heading a strong driving class. Mr. Liver's exhibit, Marie, to which second place was assigned, boasts Danegelt lineage.

Of the eleven classes over which sixty-six cattle entries were spread two only were open, the others being confined to Lonsdale north of the sands, and to Cumberland south of the Esk. Sheep were twice as numerous as a year ago, and in the poultry section the increase was equally substantial.

Judges.

Cattle and sheep (other than Herdwicks)—Mr. J. Graves, Heskett Hall, Wigton, and Mr. J. Vickers, Churchfield, Kirkby Lonsdale. Herdwick sheep—Mr. J. B. Bland, Scar Green, Calder Bridge. Heavy horses—Mr. Jas. Cliffe, Castle Hill, Kelsall, and Mr. M. Marshall, Stranraer, N.B. Light horses—Mr. J. E. Cook, The Moorlands, Axby, Yorks, and Mr. George Mulcaster, Burgh-by-Sands, Carlisle. Pigs—Mr. William Boulton, Croft House, Barrow-in-Furness, and Mr. James Kendall, Gleaston.

Prize List.

CATTLE.

Open.—Short-horned Bull, one year old and upwards: 1 and 2, G. Ashburner, Low Hall, Kirkby-in-Furness; 3, W. Watson, Millom Castle, Millom. Short-horned Cow or Heifer, one year old and upwards: 1, J. and R. Barrow, Burblethwaite Hall, Grange-over-Sands; 2, J. K. Shepherd, High Brow, Millom; 3, G. Ashburner. Confined to exhibitors residing in Lonsdale, north of the sands, and such parts of Cumberland south of the River Esk.—Short-horned Bull, two years old and upwards: 1, W. Watson. Short-horned Bull, above one and under two years old: 1 and 2, G. Ashburner; 3, J. Tyson, Manor Farm, Furness Abbey. Short-horned Bull Calf, under one year, and not less than 5 lunar months old: 1, G. Ashburner; 2, W. J. Graveston, The High, Greenodd; 3, J. K. Shepherd, High Brow, Millom. Short-horned Cow or Heifer, in calf or milk, three years old and upwards: 1, W. Dowbiggin, New Hall, Millom; 2, J. K. Shepherd; 3, G. Ashburner. Short-horned Heifer, in calf or milk, two and under three years old: 1, C. C. Curtis, Raikes Moor, Barrow-in-Furness; 2, J. and R. Barrow, Grange-over-Sands; 3, G. Ashburner. Short-horned Heifer, intended for breeding, above one and under two years old: 1, V. C. W. Cavendish, M.P., Holker Hall; 2 and 3, G. Ashburner. Short-horned Heifer Calf, under one year and not less than four lunar months old: 1, V. C. W. Cavendish, M.P.; 2, J. Dacre, Newby Bridge; 3, J. and R. Barrow. Cow, adapted for the dairy: 1 and 2, J. Barton, Gargreave, Kirkby-in-Furness; 3, W. Case, New Close, Barrow-in-Furness. Cow, adapted for the dairy, and owned by a ratepayer resident with the borough: 1 and 2, W. Case; 3, J. Jackson, Roose, Barrow-in-Furness.

SHEEP.

Confined to exhibitors residing in Lonsdale, north of the sands, and such parts of Cumberland south of the River Esk. Ram, of the Leicester or Long-woolled breed, one year old and upwards: 1, J. Phizacklea, Bell Hall, Kirkby-in-Furness; 2, T. K. Postlethwaite, Stank, Barrow-in-Furness. Ram Lamb, of the Leicester or Long-woolled breed: 1, J. Newton, The Haws, Millom; 2, W. B. Coward, Colt Park, Ulverston. Pen of Three Leicester or Long-wool Ewes: 1, J. Newton; 2, R. Rigg, Wells House Farm, Cartmel. Pen of Three Ewe Lambs, of the Leicester or Long-wool breed: 1, W. B. Coward; 2, R. Ormandy, Breast Mill Beck, Dalton-in-Furness. Shropshire or other Down Ram, one year old and upwards: 1 and 2, J. Ratcliffe, Boarbank Hall, Grange-over-Sands. Shropshire or other Down Ram Lamb: 1, R. Rigg, Wells House Farm, Cartmell; 2, J. Ratcliffe. Pen of Three Shropshire or other Down Ewes: 1 and 2, J. Ratcliffe. Pen of Three Shropshire or other Down Ewe Lambs: 1, J. Ratcliffe; 2, R. Rawsthorne, Gate Side, Cartmel. Herdwick Ram, one year old and upwards: 1, J. Dove and Son, Field Head Outgate, North Lancashire; 2, J. Newby, Aulthurstside, Broughton-in-Furness. Herdwick Ram Lamb: 1, J. Newby; 2, J. Dove and Son. Pen of Three Herdwick Ewes: 1, J. Dove and Son; 2, T. and J. Hodgson, Fell Side, Bootle, Cumberland. Pen of Three Half-bred Shearling Ewes, from Herdwick or horned Scotch ewes, by a Leicester, long-wool, or Down ram: T. K. Postlethwaite, Stank, Barrow-in-Furness. Pen of Three Half-bred Ewe Lambs, from Herdwick or horned Scotch ewes, by a Leicester, long-wool, or Down ram: T. K. Postlethwaite.

HORSES.

HEAVY HORSES.

Open to the United Kingdom.—Mare, either in foal or with foal at foot: 1, Victor C. W. Cavendish, M.P., Holker Hall (Boro' Quality); 2, W. Dowbiggin, New Hall, Millom (Scottish Mysor); 3, W. Dowbiggin (Sallie). Three-year-old Gelding or Filly: 1, W. Cottam, Low Levens, Milnthorpe (Beauty); 2, J. Teasdale, Ulverston. Two-year-old Gelding or Filly: 1, H. Meckereth, Low Hall, Whittington, Kirkby Lonsdale; 2, Victor C. W. Cavendish, M.P. (Holker Mother Shipton). Yearling Colt: 1, E. and J. Whinnerah, Warton, Carnforth (Searchlight); 2, T. Allonby, Sandscale Farm, Dalton-in-Furness. Yearling Filly: 1, Victor C. W. Cavendish (Holker Kinswoman); 2, W. Dowbiggin. Foal, to be shown in halter: 1, Victor C. W. Cavendish, M.P. (Holker Quality); 2, W. Huddleston, Roose Cote, Barrow-in-Furness; 3, W. Dowbiggin. Three Agricultural Mares, served by any of the Holker Shire horses in the season 1900, to be competed for by tenant farmers only: Exors. of G. Robinson, Biggar, Walney, Bute. Turnout—Horse (Mare or Gelding), Cart, and Gear—the whole to be the property of the exhibitor, who must be a tenant farmer: 1, W. Cottam, Low Levens, Milnthorpe (Beauty); 2, Exors. of G. Robinson, Bute; 3, C. C. Curtis, Raikes Moor, Barrow-in-Furness (Blossom). Pair of Agricultural Horses (Mares or Geldings), must be bred by and be the bona fide property of the exhibitor, to be shown in gears, confined to district of North Lonsdale: 1, J. Teasdale, Trinkelt, Ulverston; 2, W. and J. Barton, Gascow, Ulverston. Shire Mare, Filly, or Filly Foal, that is registered or eligible for registration in the Stud Book: 1, Victor C. W. Cavendish, M.P. (Boro' Quality); 2, H. Mackereth, Low Hall, Whittington, Kirkby Lonsdale (Holker Moonlight). Horse (Mare or Gelding), in the Agricultural Class, confined to the district of North Lonsdale: 1, J. Towers, Nether Kellet, Carnforth (Kellet Belle); 2, J. Teasdale, Trinkelt, Ulverston; 3, J. Edmondson, Ulverston. Mare or Gelding, for agricultural purposes, insured with the Horse, Carriage, and General Insurance Co.: 1, J. Teasdale; 2, W. Huddleston, Roose Cote, Barrow-in-Furness (Echo Star).

LIGHT HORSES.

Open to the United Kingdom.—Mare, either in foal or with foal at foot: 1, A. Orr, The Priory, Hornby, Lancaster; 2, R. M. Birley, Hoghton Hall, near Preston; 3, L. Fish, Blacow Stud, Barton, near Preston. Three-year-old Gelding or Filly: 1, The Exors. of T. Dixon, Priest Hutton, Carnforth (Major); 2, J. Clarkson, Carnforth (Lady Derby); 3, J. Kidd, Haverflatts, Milnthorpe (War Eagle II.). Two-year-old Gelding: 1, N. Dixon (Sir Thomas); 2, A. Haslewood, Fairfield Stud, Buxton (Chaser). Two-year-old Filly: 1, L. Fish; 2, E. D. McNaughton, St. Anthony's, Milnthorpe. Yearling Colt or Gelding: 1 and 2, R. M. Birley. Yearling Filly: 1, J. J. L. Irving, Park Gate, Blackburn (Thomasina); 2, H. Ainslie and Co., Lindal Moor, Ulverston. Foal, to be shown in halter: 1, H. T. Parke, Withnell Fold, Chorley; 2, R. M. Birley; 3, G. Fell, Flookburgh, Cark-in-Cartmell. Hackney Mare or Gelding, to be shown in saddle: 1, J. J. L. Irving, Blackburn; 2, T. Mitchell, The Park, Eccleshill, Bradford. Pony, not exceeding 14 hands, to be shown in saddle: 1, H. T. Park.

HUNTERS AND TURNOUTS.

Hunter, four years old and upwards, to carry not less than 12 and up to 14 stones (saddle and bridle included): 1, J. J. L. Irving (The General); 2, C. H. Wilson, Oxenholme, Kendal. Turnout—Horse, Harness, and Vehicle (mare or gelding exceeding 14½ hands high)—the whole to be the property of the exhibitor: 1, T. Mitchell, The Park, Eccleshill, Bradford (Sam Weller); 2, J. W. Liver, Bornacre House, Calder Vale, Garstang (Marie). Tradesman's Horse, Harness, and Vehicle (mare or gelding not exceeding 14½ hands high): 1, H. T. Parke, Chorley (Handy Jane); 2, H. T. Parke (Cassius). Tradesman's Turnout on Springs, four wheels, horse, harness, and vehicle to be taken into consideration, confined to the borough of Barrow-in-Furness: 1, J. Hunter and Co., Barrow-in-Furness; 2, A. Brooks, Barrow-in-Furness; 3, J. and H. Charles, Barrow-in-Furness (Samson). Tradesman's Turnout, on two wheels: 1, J. Hunter and Co.

Peterborough Foal Show.

Peterborough Foal Show took place on Wednesday. The judges were: Hunter foals, Mr. A. Britten, Great Billing, Northampton; Hackney foals, Mr. Wm. Dickie, Wolferton, King's Lynn; Shire foals, Mr. T. Forshaw, Carlton-on-Trent, Newark; and Mr. Jos. Grimes, Palterton, Chesterfield. The number of entries was seventy-three, as against seventy-one last year. Lord Rothschild won in the Shire colts with a grand roan foal who quite stood out from the rest of the class. The president (Mr. Victor C. W. Cavendish, M.P.) won in the filly class with his Belper Champion Stalmine, by Premier out of Melody, the best filly seen out this year, and he was also awarded the championship for the same animal.

Prize List.

Hunter foals: 1, J. H. Sedgeley, Church Langton, Market Harborough; 2, Francis Perceval, Thenhaugh, Wansford; 3, the Earl of Sandwich; r, Harold Martin, Wainfleet; hc, the Earl of Sandwich; c, Rev. W. Hopkinson, Sutton Grange, Wansford.

Hackney foals: 1, A. Collen, Saffron Walden; 2, John Tibbett, March, Cambs; 3, J. Tibbett, jun., Doddington, March; r, Dr E. Waller, Peterborough.

Shire colt foals: 1, Lord Rothschild, Tring Park, Herts; 2, E. H. Cartwright, Keddington, Louth; 3, P. A. Muntz, Dunsmore, Rugby; r, Captain Duncombe, Waresley Park, Sandy; hc, George White, East Markham, Tuxford; c, C. J. Morris, Thorney, and John Tibbett, jun.

Shire filly foals: 1, Victor C. W. Cavendish, Holker, Carke-in-Cartmel, Carnforth, Lancs; 2, William Horrell, Thorney; 3, Lord Rothschild; r, Captain Duncombe; hc, William Richardson, Doddington, March (twice); c, Hamer Towgood, Little Shelford, Cambs.

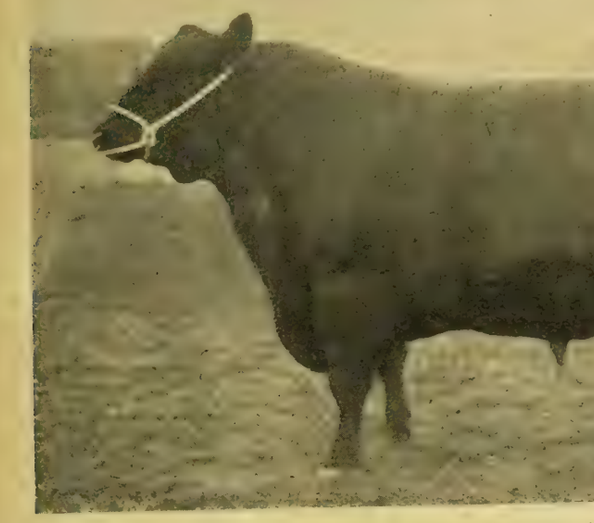
Shire foals, the property of tenant farmers residing within thirty miles of Peterborough and farming not more than 200 acres: 1, W. R. Odam, Newboro'; 2, F. Stokes, Tansor, Oundle; 3, S. Neaverson, Glinton; r, W. R. Odam.

Shire foals, by Stroxton Tom: 1, William Horrell; 2, William Richardson; 3, J. Tibbett, jun.; r, F. Stokes; hc, F. Palethorpe, Holme (two foals); c, W. J. Thompson, Crowland.

Champion prize: Victor C. W. Cavendish; r, Lord Rothschild. With the same exhibit Victor C. W. Cavendish secured the subscription silver challenge cup, value £30, for the best Shire foal in the show. Lord Rothschild receiving the reserve ribbon for his filly entered in Class 4.

Craven.

The Craven Agricultural Show was held at Skipton on the last day of August. The entries did not come up to those of the last two years, there being 1,414 this year, against 1,689 in 1899 and 1,667 in 1898. The decreases mainly occurred, however, in minor sections, such as poultry and pigeons, for cattle numbered but nine less, while the entries in regard to horses were sixteen more than last year. Sheep, for which good grazing is found on the fells which surround Skipton, maintain the excellence of their quality, and the Shorthorn cattle have rarely, if ever, made a better display. The Shorthorns, indeed, were the feature of the show. Tenants in the Craven district do not seem to have taken seriously to horse-breeding as a means of revenue in these keen times, and knowing the conditions that obtain it was not surprising to find that many of the entries in this section came from outside districts. Although the bulk of the draught horses in the district are Shire bred, there is still a sprinkling of the Clydesdale blood and not a little crossing, and this was seen in one or two notable instances in the yard. The heavy horses, however, were not of great account, and perhaps better class was shown by the light horses, which, again, provided greater competition. Here were to be found the descendants of some of the best-known Yorkshire horses. Hackneys were not so strong in the pedigree classes as might have been expected, but still there was a very respectable entry, led by the mares of Mr. Hartley, of Blackburn, and Mr. Burrow, of Whittington, both of whom have won many prizes. Sheep, as has been indicated, were numerous, and the judges were particularly complimentary in regard to the younger classes. Annexed is the



Mr. W. S. Adamson's Champion Aberdeen-Angus Bull, "Diaz."

Prize List.

CATTLE.

SHORTHORNS

(Open to local competition.)

Bull, over eighteen months and under three years old: Mrs. E. Gill, Silsden. Bull, under eighteen months old: 1, W. Robinson, Sriths, Bolton Abbey; 2, R. Ewbank, Lawkland, Settle. Cow in calf or milk, of any age: 1, R. Wrathall, Skipton; 2, W. Williamson, Stirton. Cow, for dairy purposes: 1, R. Wrathall; 2, J. Clay, Bradley. Cow or heifer (with not more than six broad teeth up), in calf or milk: 1, J. Clay; 2, W. Frankland, Thorlby, Skipton. Heifer (with not more than four broad teeth up), in calf or milk: 1, G. Barge, Scaleber, Gargrave; 2, R. Wrathall. Cows, in calf or milk (not being pure-bred Shorthorns), of any age: 1, R. Wrathall; 2, W. Williamson. Yearling heifer: 1, W. Walsh, Bingley; 2, W. L. Land, Brockabank, Gargrave. Bull calf, under twelve months old: 1, W. Robinson; 2, Mrs. Cass, Spofforth. Heifer calf, under twelve months old: 1, Mrs E. Gill; 2, T. Thornton, Skipton. Pair of bullock stirks (not having any broad teeth up): 1, S. Spensley, Highgate, Gargrave; 2, J. Spensley and Sons, Thorlby, Skipton. Fat cow: 1 and 2, R. Wrathall. Fat heifer: 1, F. Newall, Easby, Skipton; 2, J. Teale, Eastburn, Crosshills. Cow or heifer (with not more than six broad teeth up), in calf or milk: 1, J. Clay; 2, W. Frankland. Heifer (with not more than four broad teeth up), in calf or milk: 1, Mrs. Earnshaw, Banknewton, Gargrave; 2, R. Lund, Cracoe. Yearling heifer: 1, W. Walsh; 2, R. Lund. Heifer calf, under twelve months old: 1, Mrs. E. Gill; 2, J. Pratt, Bell Busk. Open to bona-fide farmer within the Skipton Poor Law Union, whose chief means of livelihood is derived from farming, and whose farms do not exceed eighty acres in extent: Cow, not exceeding four years, for dairy purposes: 1, F. Roberts; 2, J. Clay. Heifer, under two years old, bred by exhibitor: 1, W. Williamson; 2 and 3, R. Lund. Open to farmers who have used not less than one ton of compound cake or meal during three months preceding the show day: Bull, cow, or heifer, over eighteen months: 1, Mrs. E. Gill; 2, R. Wrathall; 3, W. Williamson. Bull, heifer, bullock, stirk, or calf, under twelve months. 2, Mrs. E. Gill; 3, W. A. Proctor.

HORSES.

(Open to the United Kingdom.)

Hackney stallion: 1, G. C. Waud, Baildon; 2, W. Sugden, Cullingworth. Shire or Clydesdale stallion: 1, A. Lindley, Sandal; 2, Major Tottie, Bell Busk. Brood mare for Hunters or coaching: 2, W. Wilkinson, Thornton-in-Craven. Brood mare for Hackneys: 1, R. Burrow, Whittington; 2, W. Sugden. Brood mare for draught: 1 and 2, Oldroyd Bros., Newsam Green, Woodlesford. Draught mare or gelding four years old and upwards: 1, Oldroyd Bros.; 2, J. Clark, Burnley. Three-year-old gelding or filly, for Hunters or coaching: 1, J. Kidd, Haverflatts, Milnthorpe; 2, C. Lord, Coniston Cold. Two-year-old gelding or filly, for Hackneys: 1, R. and P. Hartley, Balderstone, Blackburn; 2, E. Pratt, Haxhills, Silsden. Two-year-old gelding or filly, for draught: 1, H. Yates, Cleckheaton; 2, J. B. Deadhurst, Skipton. Three-year-old gelding or filly, for Hunters or coaching: 1, J. Kidd; 2, J. Harker and Co., Carnforth. Three-year-old gelding or filly, for Hackneys: 1, J. Clarkson, Cantcliffe; 2, C. Edmondson, Earby. Three-year-old gelding or filly, for draught: 1, Oldroyd Bros., Woodlesford; 2, J. B. Deadhurst. Hackney Foal: 1, J. Lee and Son, Happerhouse; 2, R. Brear, Drighlington. Draught foal: 1, J. Clark, Hapton, Burnley; 2, H. Yates; 3, A. W. Hewson, the Priory. Foal, by the champion Hackney stallion West Rolang M.P.: 1, R. Wilcock, Bradley Mere, Keighley; 2, S. Baugh, Hellifield; 3, G. Baugh, Screeton, Gargrave; 4, T. Clark, Silsden. Draught foal: 1, J. Crook; 2, W. H. Dawson, Otley. Yearling colt, gelding, or filly, for Hackneys: 1, W. Sugden, Cullingworth. Yearling colt, gelding, or filly for draught: 1, J. Clark; 2, Major Tottie, Bell Busk. Gelding or filly, for Hackneys, not to exceed 15½ hands, ridden: 1, E. Howarth, Nelson; 2, F. de B. Pan, Barrowford. Colt, not to exceed 14½ hands, ridden: 1, Manley and Hartley, Nelson; 2, H. Wilkinson, Keighley. Horse or mare, shown in single harness: 1, E. Howarth; 2, E. Barrett, Skipton.

SADDLE OR HARNESS

(Open to the United Kingdom.)

Horse or mare, any age, not exceeding 14½ hands, shown in single harness: 1, Mrs. F. Holmes, Shipley; 2, H. Wilkinson. Horse or mare, any age, exceeding 14½ hands, shown in single harness: 1, Capt. Preston, Gargrave; 2, T. Ellison, Skipton. Mare or gelding, for Hackneys, any age, ridden: 1, Mrs. F. Holmes; 2, C. Edmondson, Earby.

SHEEP

WENSLEYDALE OR LONGWOOL

(Open to the United Kingdom.)

Ram, two years old and upwards: Exors. of the late T. Willis, Carperby, Aysgarth. Shearling ram: Exors. of the late T. Willis, and S. W. Ryder, Middlesmoor, equal firsts. Tup lamb: 1, J. Ireland, Lancaster; 2, Exors. of the late T. Willis. Pen of three ewes, of any age: Exors. of the late T. Willis. Pen of three shearling gimmers: Exors. of the late T. Willis. Pen of three gimmer lambs: 1, Exors. of the late T. Willis; 2, J. Ireland.

MOUNTAIN SHEEP (SCOTCH BREED)

(Open to local competition.)

Black-faced ram: 1, T. Blackburn, West Hall, near Ilkley; 2, J. F. Liddle and Sons, West End, Dacre Banks. Shearling ram: 1, W. Robinson; 2, G. H. G. Garnett-Orme, Greenfield, Buckden. Tup lamb: 1, W. Robinson; 2, T. Blackburn. Pen of three ewes: 1 and 2, W. Robinson. Pen of three shearling gimmers: 1, G. Barker, Fiddling Clough, Earby; 2, T. Blackburn. Pen of three gimmer lambs: 1, G. H. G. Garnett-Orme; 2, W. Robinson.

LONG SHEEP

(Open to local competition.)

Ram, of any age: Walton Bros., Rawtenstall. Tup lamb: 1, Walton Bros.; 2, S. Lund, Laycock, Keighley. Pen of three ewes or shearlings: Walton Bros. Pen of three gimmer lambs: 1, E. Smith, Cowling; 2, T. Harrison, Hart Hill, Crawshawbooth.

HALF-BRED.

(Open to local competition.)

Pen of three half-bred blackfaced Scotch ewes: 1, R. Lund; 2, S. Spensley. Pen of three half-bred blackfaced shearling gimmers: 1, J. Robinson; 2, R. Lund. Pen of three half-bred blackfaced gimmer lambs: 1, W. Carlisle, Bell Busk; 2, W. Robinson. Pen of three ewes, half-bred lonk: 1, J. Teale, Eastburn, Crosshills; 2, W. Walsh, Bingley. Pen of three half-bred lonk shearling gimmers: 1, George Smith, Eastburn, Crosshills, Keighley. Pen of three half-bred lonk gimmer lambs: 1 and 2, C. Smith, Howden. Pen of three wether or gimmer lambs, out of half-bred Scotch ewes by longwoolled ram (first cross from Scotch ewe): 1, J. Spensley and Son; 2, S. Spensley. Pen of three fat lambs, any breed or cross: 1, J. Spensley and Son; 2, S. Spensley.

PIGS.

Boar, Tamworth, Berkshire, or Suffolk, any age: 1, A. Dewhirst, Dudley Hill; 2, G. Dean, Whalley. Boar of any breed: 1, H. H. Owtram, Ellel, near Lancaster; 2, A. Dewhirst. Sow of any breed: 1, A. Dewhirst; 2, T. Veevers, Brierfield. Gilt for breeding purposes, under nine months, any breed: 1 and 2, A. Dewhirst. Boar of any breed: 1, A. Mason; 2, E. Holmes, Newmarket Street, Skipton. Boar, under nine months, any breed: F. Smith, Crawing. Sow of any breed: 1, R. Walker, Skipton; 2, D. Duckworth, Cononley. Gilt for breeding purposes: 1, G. E. Dixon; 2, M. Rishworth, Cowling.

BUTTER

(Open to local competition.)

Basket of butter, not less than 2lb.: 1, Miss Howard, Clitheroe; 2, Miss Howard, Greenmount, Tottington; 3, Miss Metcalfe, Thrushcel; 4, Mrs. Ogden, Sowerby, Keighley.

CHEESE

(Open to local competition.)

Two Wensleydale or Cheddar cheeses, made in 1900. Stilton shaped: 1, Mrs. W. Thwaite, Oughtershaw, Skipton; 2, Mrs. [illegible]. Two Cheshire cheeses, made in 1900. Shaped: 1, [illegible]; 2, [illegible]; 3, Mrs. W. Thwaite, Oughtershaw, Skipton; 4, Mrs. Varley, Mrs. Lund, Scosthrop, Ripley; 5, Mrs. R. Metcalfe; 6, Mrs. Briggs, Pendleton, Clitheroe.

Mid-Somerset.

The forty-eighth annual exhibition of the Evercreech and Mid Somerset Agricultural Society took place on Tuesday at Shepton Mallet.

The show tent, as ever, one of the features of the show, and the [illegible] committee secured one of the best entries on record. Several changes have been introduced, and the prizes in one of the classes have been increased in value, with beneficial results as regards the entries. The dairy test prizes for cows, of course, attracted the most interest. The first award was for English dairy cows, and the leading award fell to Mr. W. G. Norman, of Cannard's Grave, Shepton Mallet, whose entry yielded 23lb. of milk and secured twelve lactation points. Mr. E. Creed, of Gilcombe, Bruton, stood second with 23lb. of milk and eleven lactation points, and Messrs. Tilley Bros., of East Compton, Shepton Mallet, third, with 22lbs. of milk and twelve lactation points. This class was open only to competitors residing within ten miles of the town market cross. A like restricted class for cows which had calved since Midsummer Day, 1900, was a win for Mr. A. J. Thorn, Ashwick, Oakhill, whose entry yielded 34½lbs. of milk; Mr. T. Wilcox, Prestleigh, Shepton Mallet, carried off second award for a result of 32lbs. of milk and three lactation points; and Messrs. Tilley were again third, this time with a yield of 30lbs. of milk. There were only two entries in the Channel Island test, Mr. C. C. Tudway, Wells, and Mr. A. J. Thorn, of Pilton, Shepton Mallet. Both cows were Jerseys. The first-named exhibitor was winner with Mayfair 2nd, bred by Mr. A. Gibbs, the yield being 16lbs. The second prize cow Sunbeam gave 11½lbs. of milk.

The cattle generally were excellent, and quite up to county form. The old bulls included entries from several well-known Shorthorn breeders. Mr. G. F. King's Chewton Oxford Comelius headed the class; Mr. John Little standing second with Vain Lord, originally from the herd of Mr. T. N. Hulbert. For the bulls calved since Michaelmas, 1898, there was a good representation, quite a dozen being set out. The Chewton Keynsham breeder was again to the fore, this time Mr. King winning with Bapton Victor, an acquisition from Mr. J. D. Willis's herd; Mr. Sidney Hill, of Langford, took second with Wilbur; Mr. Graham Bush, of Bitton, reserve with Bitton Augustus; Mr. George Haskins, of Horfield Green, near Bristol, secured a highly commended rosette. The bull calves were rather disappointing. Dairy cows in the aggregate were one of the best lots ever got together at a district show, and the judges expressed unstintingly their approbation. For the class for cows in calf or milk nearly 20 were shown. Mr. R. Clapp, of Alston Manor Farm, Weare, Axbridge, took the lead with a very fine model of a dairy cow; Mr. Arthur Hiscock, jun., Motcombe, second. The minor honours were shared by Messrs. G. F. King, Arnold Hall, J. Day, jun. (Huxham, East Pennard), J. Hoddinott (Shepton Mallet), H. J. Davies (Hurlington, Shepton Mallet), Mr. J. Day, jun., of East Pennard, headed the class for pair of dairy cows, and Mr. Robert Clapp, of Axbridge, had a like honour for two heifers in calf. For a pair of heifer calves (after Michaelmas, 1899), Mr. Sidney Hill, of Langford, was the winner. The four Channel Island classes filled well, several well-known patrons of the breed being represented. The bull class was headed by Mrs. J. M. Spencer's Jersey Joan, Mr. Tudway, of Wells, standing second with Brasenose. The last-named exhibitor was second in the cow class with Mayfair 2nd, and first also in the heifer calf class. The fat stock was not numerous, but what there was looked uncommonly well. In the ox class every entry received some notice at the hands of the judges. The winner was a massive Devon steer, shown by Mr. Hugh P. S. Leathead, of Cannington. In the [illegible] heifers Mr. J. D. Allen, of Shepton Mallet, headed the class.

The horse classes generally filled well, both agricultural and other departments showing a really first-rate lot of quality. The heavy-weight hunters resulted in a win for Colonel, the chestnut gelding of Messrs. J. Nixon Gray and Co., of Cardiff, and the same exhibitors also carried off the leading premium for the light-weight class, the winner on this occasion being the bay six year old gelding Spectator. Messrs. Fowler and Mattick, of Ston Easton, headed the local hunting class with a four-year-old brown gelding named Jester. The driving class resulted in a win for Mr. R. J. Weight's (Bristol) Lord Bang. The brood mares were few and fairly good, and the young stock generally was full of promise. In the agricultural classes several old competitors met, and recent results were generally upheld.

Judges.

Cheese: Messrs. William Cary (London), G. F. Butcher (Bath), J. E. Way (Wells), Ernest F. Hill (Evercreech). Milk test: Mr. L. Robinson (Evercreech). Cattle: Messrs. Henry Butler (Badminton) and J. C. Lock (Saltford). Channel Island: Mr. W. E. Budgett (Henbury). Hunters and hacks: Messrs. Robert Lemon (Sherborne) and R. W. Burn-

ham (Hull). Cart horses: Messrs. J. Nix (Derby) and Thomas Chapman (Taunton).

Prize List.

CHEESE.

Four Cheddar cheese, not less than 60lb. each (open): 1, T. C. Candy, Cattistock; 2, H. G. Ashman, Shepton Mallet; 3, Herbert W. Watts, Stounton; 4, Henry White, Puddleton; 5, O. N. Holt-Needham, Castle Cary; 6, F. W. J. Crocker, Cattistock; r, H. J. Weeden, Ibberton; h c, F. and M. Portch, North Cadbury; E. Dewdney, Chewton Mendip; c, N. J. Sims, Bruton; John Day, Huxham.

Four cheese, not less than 56lb each (open only to the County of Somerset): 1, John Day, Shepton Mallet; 2, H. G. Ashman; 3, Walter W. Keel, Stanton Drew; 4, C. Candy, Shepton Mallet; 5, Edmund Pearce, East Chinnock, Yeovil; r, William A. H. White, Beckington; h c, N. J. Sims; Alfred Stone, Shepton Mallet; T. L. Jackson, Wincanton; c, James Bartlett, Galhampton; c, Mrs. M. A. Portlt Wincanton; Henry Cannon, Evercreech.

Four cheese, not less than 56lb each (open to those only who have not taken a first prize): 1, T. C. Candy; 2, Walter W. Keel; 3, Edmund Pearce; 4, Herbert W. Watts; 5, H. G. Ashman; r, Edwin C. Sims, Meare; v h c, A. Osborne, Mapowder; h c, R. and C. Tucker, Steeple Ashton; James Bartlett, Galhampton; c, Albert White, South Petherton; Henry White, Puddletown; Frances Osborne, Sandford Orcas; Henry Cannon, Evercreech; Joseph H. Butler, Evercreech.

Small dairies: Four cheese not less than 56lb. each, produced from dairies not exceeding 30 cows: 1, Alfred Stone; 2, Henry White; 3, H. J. Weeden; 4, Walter W. Keel; r, A. E. Crocker; h c, Albert White, South Petherton; c, John C. Moody, Castle Cary.

Loaf cheese (six in number): 1, Walter W. Keel; 2, George Lester, Martock; 3, J. Board, East Pennard; r, Henry White; h c, John Brunt, Hilfield Cerne; c, C. Candy, Shepton Mallet.

Champion cup for the best lot of cheese in the show: T. C. Candy, Castle Cary.

DAIRY TEST PRIZES.

Dairy Cow, not Channel Island, giving the most and richest milk: 1, W. G. Norman, Shepton Mallet; 2, Edward Creed, Gillcombe, Bruton; 3, Messrs. Tilley Bros., Shepton Mallet; h c, John Harding, Shepton Mallet; c, J. M. Green, Stoke Lane.

Dairy cow, not Channel Island, having calved since Midsummer Day, 1900: 1, A. J. Thorn, Oakhill; 2, T. Wilcox, Shepton Mallet; 3, Messrs. Tilley Bros., Shepton Mallet; v h c, E. White, Wells; h c, G. A. Reakes, Binegar.

Channel Island cow or heifer, giving the most and richest milk: 1, C. C. Tudway, Wells; 2, J. D. Allen, Shepton Mallet.

CATTLE.

Bull, of any age: 1, G. F. King, Chewton Keynsham (Chewton Oxford Cornelius); 2, John Little, Trowbridge (Vain Lord); r, Sidney Hill, Langford; h c, G. T. Chafyn Grove, North Coker.

Bull, calved after Michaelmas, 1898: 1, G. F. King (Bapton Victor's Champion); 2, Sidney Hill, J.P. (Wallace); r, H. G. Bush, Bitton (Baton Augustus); h c, George Haskins, Hanham Green (Priam); J. Thorley, Faringdon.

Bull calf, calved after Michaelmas, 1899: 1, J. Thorley; 2, Arthur Hiscox, jun., Motcombe; r, T. C. Candy, Cattistock; h c, Arnold Hall; George G. White, Galhampton, Bath.

Dairy cow, in calf or in milk, or to have calved within eight weeks of the show: 1, Robert Clapp, Axbridge; 2, Arthur Hiscock, jun.; h c, G. F. King; Arnold Hall, Chilcote, Wells; T. Day, jun., East Pennard; John Hoddinott, Shepton Mallet; H. J. Davis, Shepton Mallet.

Two dairy cows in calf and in milk: 1, J. Day, jun., East Pennard; 3, Edward Creed, Bruton; r, Arnold Hall; h c, Robert John Hoskins, Shepton Mallet; Tilley Bros.

Two heifers, calved before Michaelmas, 1897, in calf and in milk: 1, Robert Clapp, Weare, Axbridge; 2, J. Day, jun.; 3, A. J. Mullins, Ansford, Castle Cary.

Two heifers in calf: 1, Robert Clapp, Axbridge; 2, O. N. Holt-Needham, Castle Cary; r, John Little, Trowbridge.

Two heifer calves, calved after Michaelmas, 1899: 1, Sidney Hill; 2, J. D. Allen, Shepton Mallet; r, G. G. White, Bath.

CHANNEL ISLAND BREED.

Bull of one year and above: 1, Mrs. J. M. Spencer, Oakhill; 2, C. C. Tudway, Wells; r, C. C. Tudway; hc, Robert Poole Wheadon, Ilminster; c, Mrs. J. M. Spencer; W. W. Hughes-d'Aeth, Wincanton.

Cow or heifer in milk: 1, Robert Poole Wheadon, Ilminster; 2, C. C. Tudway; 3, J. D. Allen, Shepton Mallet; r, C. C. Tudway.

Heifer calved after Michaelmas, 1899, in calf or in milk: 1, C. C. Tudway, Wells; 2, Mrs. J. M. Spencer, Oakhill; r, Robert Poole Wheadon.

Heifer calf calved after Michaelmas, 1899: 1, C. C. Tudway; 2, C. C. Tudway; r, C. M. Moody, Evercreech; r, Robert Poole Wheadon.

FAT STOCK.

Fat ox: 1, Hugh P. S. Lovibond, Cannington; 2, W. D. Saunders, Grenton, Bridgwater; r, J. Thorley; h c, Nathaniel Benjafield, Shaftesbury; J. D. Allen, Shepton Mallet.

Fat heifer: 1, J. D. Allen; 2, O. N. Holt-Needham; r, Henry Hoddinott, Frome.

HORSES.

Hunter, equal to over 14 stone: 1, J. Nixon Gray and Co., Cardiff; 2, William H. Munckton, Long Sutton; h c, Charles Wakely, Axminster; John Day, jun., East Pennard.

Hunter, up to 13 stone: 1, J. Nixon Gray and Co.; 2, Edgar Bown, Sherborne.

Hunter, mare or gelding, three years old or over, allowance to be made for age in judging: 1, Flower and Mattick, Stoke Easton; 2, J. Day, jun., East Pennard; r, Flower and Mattick; h c, C. S. Creighton, Shepton Mallet; J. Day; A. C. Clarke, Shepton Mallet; T. W. Whitney, Shepton Mallet.

Nag horse, driven in harness: 1, R. J. Weight, St. George, Bristol; 2, W. H. Burston, Taunton; r, H. Banfield, Honiton; h c, Norman Stephens, Glastonbury.

To the lady who rides best: Equal 1, Mrs. Hubert Watts, Wells, and Miss Gertrude Burston, Taunton.

Pony not exceeding 13 hands, to be driven: 1, S. Wait Tomkins, Cribbs Causeway; 2, J. Stone, Bath; r, R. Monk, Kingswood, Bristol.

To the lady who drives best: 1, Miss Lucy Burston, Norton, Taunton; 2, nominee of Oliver Reakes, Emborough, Bath; r, Miss May Dyke, Shepton Mallet.

Fencer, any height: 1, P. Blockley, Madeley, Staffs; 2, B. Sims, Cheltenham; 3, Walter W. Grundy, Worcester; r, C. A. Daniell, Atworth, Melksham.

Fencer, any height (local): 1, Glencross Bros., Garth, Frome; 2, J. Coles, Frome; 3, W. T. Weaver, Dunkerton, Bath; r, Glencross Bros.; h c, H. L. Hall, Oakhill, Bath; Walter Cooper, Wells.

Brood mare and foal at side: 1, O. N. Holt-Needham; 2, T. W. Whitney, Shepton Mallet; r, Robert Parker, Shepton Mallet.

Filly or colt, hunter, foaled in 1900: 1, Henry Clark, North Wootton; 2, Joshua Clare, Oakhill; h c, Robert Parker, Shepton Mallet; c, G. F. Tilley, Huntspill.

Foal, calculated to make hunter: 1, Henry Clark; 2, Joshua Clare; h c, Joseph Salisbury, Shepton Mallet; Robert Parker, Shepton Mallet; G. F. Tilley, Huntspill.

Filly or gelding, hunter, foaled in 1897: 1, J. Nixon Gray and Co., Cardiff; 2, O. N. Holt-Needham; h c, Medford Millard, Wedmore; T. H. Miller, Sherborne.

Filly or gelding, hunter, foaled in 1898: 1, O. N. Holt-Needham; 2, C. Kelway-Bamber, Chelmsford; h c, J. Nixon Gray and Co.; T. H. Miller, Sherborne; c, Ernest Dewdney, Chewton Mendip.

Filly or colt, hunter, foaled in 1899: 1, Charles Wakely, Axminster; 2, O. N. Holt-Needham; h c, Robert Parker, Shepton Mallet; Hunters' Society medal, T. Rowley, Huntspill.

Brood cart mare in foal, or with her foal at side: 1, James Webber, Huish; 2, Sir W. H. Wills, Bart., M.P.; 3, H. Percy Taunton, Salisbury; r, C. M. Moody, Evercreech; c, G. F. King, Chewton Keynsham; W. H. Brake, Bridgwater; George Cowing, Calne.

Cart filly or colt: 1, C. M. Moody; 2, W. H. Brake, Bawdrip; r, C. M. Moody.

Cart filly or colt, got by Nyn Admiral, foaled in 1900: 1, W. Rugg, Shepton Mallet; 2, G. Sidney Cox, Frome; r, M. Muldment, Batcombe.

Cart filly, foaled in 1898: 1 and medal, James Webber, Puxton; 2, H. Percy Taunton, Salisbury; r, George Cowing, Calne; c, W. H. Brake, Bridgwater.

Cart gelding, foaled in 1898: 1, Harry Chambers, Bridgwater; 2, G. F. King; r, John Lovell, Shepton Mallet; c, J. D. Allen, Shepton Mallet.

Cart filly or colt, foaled in 1899: 1, G. F. Anstee, Chippenham; 2, Sir W. H. Wills, Bart., M.P.; r, H. Percy Taunton, Salisbury; h c, C. M. Moody; G. F. King; c, R. C. Tilley, Huntspill.

Royal and Central Bucks.

The Royal and Central Bucks Agricultural Association held their annual show on Thursday at Aylesbury. Entries were good, and this, combined with fine weather, made the meeting a great success. The number of entries in the 79 classes was 564—21 of agricultural labourers and servants, 14 of butter, 68 of roots, 158 of agricultural horses, 144 of hunters and nags, 82 of horned stock, 43 of sheep, and 34 of pigs. Entries of agricultural labourers continue to decrease, those of butter remain about stationary, roots showed an increase of about a dozen, horses a considerable falling off in both classes, horned stock were fewer by 17, sheep exactly the same, and pigs were nearly double the number penned at Bletchley.

Agricultural Horses.

The judging was got through expeditiously and satisfactorily under the new arrangement of appointing two sets of judges. Miss Alice de Rothschild's fine brown mare, Lily, which excited so much admiration last year at Bletchley, put in an appearance, and with equal success, winning, with a promising filly foal by Markeaton Royal Harold, first prize for mare and foal of 1900 in a very strong class. The foal was also awarded first prize in her class against severe competition, and Lily was again selected to receive the Shire Horse Society's silver medal, with her foal and Mr. Thomson's mare as reserves. There were two fairly good classes of old mares, Mr. John Thomson's Woodperry Watercress, a strong brown mare of good blood, being placed first in the open class, while a wonderfully well-preserved fourteen-year-old mare, Duchess of Bridgwater, with a pretty head, shown by Mr. Arthur Ransom, was second. In the local class a sturdy broad-chested brown mare, Flower, shown by the executors of the late Mr. W. Flowers, was first, and a lighter mare of Mr. Rowland's, Creslow Gipsy, second. Messrs. Flowers also furnished the winner in the three-year-old mares' class with the singularly named Sea Poppy, a handsome brown, which also won for her fortunate owners the Marquis of Londonderry's champion prize, while Flower, just mentioned, brought them in Lord Rothschild's second champion prize. Mr. R. W. Hudson's Danesfield Madge, first in a good two-year-old mare class, did credit to her owner's famous Shire stud. Mr. Hudson had another very gratifying success in the Mentmore Cup class, his promising bay colt, Beachendon Royal Harold, winning the valuable cup in a very good class of youngsters. Mr. Rowland's second prize filly, Creslow Belle III., was also awarded Sir R. J. Harvey's champion prize for the best mare the property of and bred by a tenant farmer; Messrs. Flowers supplying the reserve number with Beachendon Lassie, third in the class. Mr. John Harper's good-looking light bay or sandy, as he laughingly described it himself was first in a meritorious class of geldings, four years and upwards, and with his two companions, also won for the same gentleman the valuable team prize from some formidable competitors. The younger geldings' classes were not well filled, but Mr. Alfred Lepper's red roan three-year-old and Mr. Hudson's two-year-old, first in their respective classes, were useful animals. The valuable Ferdinand de Rothschild Memorial Cup, presented by Miss Alice de Rothschild, for gelding or mare four years old and upwards, although limited to tenant farmers within seven miles of Waddesdon, produced a good competition, and the prize was for the second time awarded to Mr. Tom Kingham, for a nice light chestnut, Drayman, Mr. G. C. Terry's handsome dark chestnut being reserved. Mr. Arthur Ransom, who sent several good representatives of his well-known Shire stud, but did not meet with the best of luck, supplied the winner in a nice class of colt foals with a scion of Careful. The Executors of the late Mr. Charles Paine won the President's prize for cart foal by Royal Alfred 2nd.

Light Horses.

The Farewell Challenge Cup appeared, presumably, in the catalogue for the last time, Messrs. Flowers, who have won it twice previously, again carrying it off with Royal Dispatch, by Bumptious. This very handsome trophy now becomes their absolute property. It is a somewhat singular coincidence that Mr. B. F. J. Gates, who won the cup last year, while Messrs. Flowers' representative was only reserve number, this year occupied just the same position that this year's winner did then, their relative positions being thus exactly reversed. Royal Dispatch was also first in a local hunters' class. Some very nice foals were shown, Mr. T. R. Seaton supplying the winning number. The Meyer de Rothschild's Memorial Cup was again stoutly contested for, and Mr. John Thomson's popularly-named Khaki proved the winner. The Hon. Mrs. Howard, who met with a good many disappointments, received a solatium in the valuable prize presented by Messrs. Chinnery and Freeman for hunting mare and foal. Mr. W Manning, who generally sends a few good things, won two first prizes for hunters, one of his representatives being also awarded the President's Champion Prize for tenant farmers. Mr. J. H. Stokes supplied the best hunter, horse or mare, in the open class, Mr. C. Brooks, with Goldstick, being successful in that for local horses. Mr. W. Smith was first for general purposes nag with a nice chestnut mare, Miss Nelly.

The jumping and driving competitions were very popular, and, as usual, provoked keen competition.

Cattle.

Although not very numerous, the animals shown here were mostly much above the average in regard to quality. The selections from the late Mr. H. Wyatt's valuable Shorthorn herd, which have usually made a brave show in these classes, were much missed, and in their absence Miss Alice de Rothschild had it almost all her own way. She was first for bulls, two-year-old and upwards, with a fine animal, Royal Prince; first for bulls, one year and under two; second in the same class with Landsman; third for bulls under one year with Provost; first for cow in milk or calf with a big strawberry roan cow, Bructer Queen, with a pretty little calf by her side; third in the same class with Waddesdon Beauty, a red cow; first and third for heifers with a compact, finely-bred red, Rose of Underley 6th, and Roan Duchess; first and second for pairs of heifers, one to two years; first for ditto not exceeding one year, with a nice white and a roan; second for three dairy cows; first and second for fat oxen, with a well-fed Shorthorn and a black polled ox; first for fat cow or heifer with a meaty black poll heifer. Her fine cow, Bructer Queen, was also awarded both the champion prizes—Mr. Leopold Rothschild's and the president's. Colonel Makin supplied the first prize bull under one year with a promising roan. Mr. Alfred Lepper was first in the important class for three milking cows in fairly good company. Lady de Rothschild, with her sweetly pretty light fawn Jerseys, won first prizes for heifers under three years, for three Jerseys for dairy purposes, also her own first and second prizes for Channel Islands or Ayrshire cows, and the second prize for champion cow. Mr. H. Landon, who was second to Miss Rothschild for pairs of heifers, had the honour of beating her in the class for three dairy cows, not Jerseys. Mr. Landon, who always enters some useful animals, was also first in the local class for dairy cows.

Sheep.

The show of sheep was an interesting though only a small one. Miss Rothschild was very successful here also, winning firsts for fat ewes, fat wethers, breeding ewes, and theaves, the latter also taking the champion prize. It would be difficult to find anywhere a better lot of sheep than these four pens of Oxfordshires. Mr. W. G. Amos was first for rams with a good Oxford, and Mr. Joseph Clarke for store ewe lambs with five nice Hampshires, and for ten ewes, untrimmed, besides being three times second. Mr. R. E. Horwood was first with a useful lot of theaves, and Mr. J. R. Simons carried off Lord Rothschild's valuable prize in the important class for twenty ewes with a good pen.

Pigs.

The show of pigs was much the best we have seen for years, there being scarcely an indifferent animal in the pens, while many were of superlative excellence. Mr. C. A. Barnes beat several of our best local breeders in the boars' class with a fine well-bred Berkshire, which was also accorded championship honours, Mr. Richard Fowler's sow being reserve number. Mr. Fowler was first in the local class for sows with a valuable Berkshire sow and ten strong pigs. In the open class Mr. J. H. R. Horwood was first with a large well-bred sow of the same breed. He was also first for two fat pigs in a good class, while Mr. R. E. Horwood, besides three seconds and a third, was first for yelts, with two nice level animals.

A Gold Medal has been awarded to the Campbell Gas Engine Co., Limited, for an exhibit of gas and oil engines at the Paris Exhibition. In addition to this, no less than seven members of the company's staff, foremen, and workmen, have been awarded silver and bronze medals for the work which they have done in connection with the exhibit.

SOCIETIES.

British Dairy Farmers' Association.

A meeting of the Council was held at 12, Hanover Square, London, on Wednesday, September 5th. Present: Professor Long (in the chair), Mr. Wm. Ashcroft, Mr. Geo. Barham, Mr. A. Dunlop, Mr. W. J. Grant, Mr. P. McConnell, Mr. S. P. Page, Mr. S. J. Pocock, Mr. J. H. Ross, Mr. G. F. Roumieu, Mr. J. A. Smith, Mr. J. F. Spencer, Mr. A. Stapleton, Mr. A. Tisdall, Mr. J. Welford, Mr. J. Willcox, Mr. F. J. Lloyd (consulting chemist), and the secretary (Mr. Wm. C. Young).

A report was received from the Finance and General Purposes Committee, on whose recommendation cheques amounting to £90 5s. 7d. were passed for payment.

The Education and Journal Committee brought up a report with reference to their arrangements for forthcoming numbers of the Society's Journal. The report was agreed to.

Upon the recommendation of the Conference Committee it was decided, after discussion, that the Dairy Conference for 1901 should be in one of the British counties, leaving the exact locality to be hereafter determined upon.

The Show Committee reported to the Council their proposals in regard to advertising catalogue and awards (the latter to be printed separately), demonstrations in scone-baking, to illustrate one of the uses of butter-milk; trussing demonstrations, refreshments, band, fodder, and other matters connected with the Dairy Show next month. The report was adopted.

A list was prepared of members of the Council retiring by rotation (eligible for re-election) and of new candidates nominated.

Nominations were made of a president and vice-presidents for the ensuing year, and the general meeting of members was fixed to be held on the second day of the Dairy Show, October 10th, at 2 p.m.

The Royal Lancashire.

A quarterly meeting of the Council of the Royal Lancashire Agricultural Society was held on Monday in Liverpool. Mr. Geo. C. Hale presided.

The secretary (Mr. James Birch) reported that the approximate financial result of the Rochdale Show would be about £750. He said that the year's working had proved very satisfactory. In reply to a question by Mr. W. J. Fitzherbert-Brockholes, of Garstang, the secretary said that he had been in communication with the society's botanist with respect to the adulteration of agricultural seeds, and he expected a reply from him shortly.

A long discussion next took place as to whether Mr. T. Miller, an exporter of pedigree Shorthorn cattle, was entitled to the prize which he won in the county class at the recent Rochdale Show. It was pointed out that when Mr. Miller made his entry the secretary called his attention to Rule 30, which provides that an exhibitor in this section must have the whole, or at least two-thirds of his holding within the County Palatine. Mr. Miller replied that he considered he was perfectly justified to show, as his business was in Liverpool. It was also announced that no protest had been made, although a number of exhibitors had raised the point as to Mr. Miller's right to exhibit in the local class. Mr. J. Mercer (Widnes) contended that the wording of Rule 30 was so lax that there might be a loophole for Mr. Miller to slip out of, and especially seeing that the secretary had accepted his entry. He suggested that the best course would be to withhold the prize money for the present, and to take counsel's opinion as to the wording of the rule. Mr. T. Backhouse (Liverpool) seconded Mr. Mercer's proposal. The secretary further stated that Mr. Miller had replied that the whole of his holding was in Lancashire, and that he only had his residence in Cheshire. It was also, he said, invariably the custom of the society not to consider these matters unless there had been a protest lodged. Mr. Lawrence Rawstorne (Preston) pointed out that if counsel advised that the word "holding" covered the word "office," the sooner the rule was altered the better. It was decided that the secretary should procure further information from Mr. Miller as to his business, and that the society's legal adviser should be consulted on the point.

The secretary announced that at the Rochdale Show Mr. F. Stapleton Bretherton presented a £10 cup for the best draught horse, suitable for agricultural purposes, the property of a tenant farmer, principally depending on farming for a living. This was originally won by Mr. J. Fox, of Corless Mill, Ellel. A representation was, however, afterwards made by Messrs. Jackson Bros., of Middle Hulton, near Bolton, to the effect that they had not been brought into the ring when the competition for the cup was taking place, and that their horse, having been placed above the entry of Mr. Fox's in a previous class, they were entitled to the trophy. After a prolonged discussion the matter was deferred for further investigation.

A letter was read from the secretary intimating that he desired to retire from that position at the end of the present financial year. The chairman spoke in eulogistic terms of the valuable services Mr. Birch had rendered to the Society, and said he was extremely sorry to hear that he had decided to resign his position. Mr. J. T. Wood (Liverpool) referred to the earlier days of the Society, and said that Mr. Birch had played an important part in bringing the Society from a state of chaos and the verge of bankruptcy to one of the most flourishing organisations in the country. (Hear, hear.) The Society was in a sound, healthy condition, and he trusted that Mr. Birch would be induced to reconsider his decision. Captain Withington (Warrington) suggested that Mr. Birch should hold the position for, at all events, another year. Mr. Birch expressed his thanks for the kind remarks that had been made, but said he regretted that he could not alter his decision. Mr. J. W. Fair spoke of the desirability of the offices of the Society being situated in a more central position—for instance, at Preston, but said that if Mr. Birch could be persuaded to continue to undertake the duties for a little longer the offices should not be changed until he had resigned from the post of secretary. The further consideration of the matter was ultimately postponed until the next meeting at Preston. The chairman said that nothing definite had been decided with regard to the selection of the site for next year's show, and the consideration of the matter was deferred.

Somerset County Agricultural Association.

The Sites Committee held a meeting at the Municipal Offices, Taunton, on Tuesday last. The secretary read a letter from the secretary of the Taunton Local Committee offering the Association two sites for selection for the Taunton meeting next year, namely, No. 1, a site known as the Horse Show Ground, situated on the Holway Road, about fifteen acres; No. 2, a site adjoining the Vivary Park, with foot passengers' entrance from the Vivary gates at the top of High Street, and entrances for the heavy traffic through Wilton, acreage up to seventeen acres. The committee then viewed both sites, accompanied by Messrs. W. A. Wrenn (Mayor of Taunton), A. E. Perkins, M. Fardoe, and Samuel Kidner, and their secretary (Mr. W. R. J. Greenslade). After such view the Sites Committee deliberated, and were unanimous in approving the selection of site No. 2, adjoining Vivary Park, subject to the usual conditions being entered into by the Taunton Local Committee.

The Royal Counties Agricultural Society.

A meeting of the council of the above Society was held at the Town Hall, Basingstoke on Wednesday, September 5th. Present: Mr. W. M. Harries (in the chair), the Mayor of Winchester (Mr. Alderman Marks), the ex-Mayor of Winchester (Mr. Councillor Forder), Sir W. Pink, Rev. A. G. Barker, and Messrs. S. H. Allen, J. Burbidge, C. Barfoot, T. J. Cottrell, P. Chasemore, H. J. Gibbs, G. Judd, F. M. E. Jervoise, E. Lyne, W. Newton, W. E. Pain, W. Perkins, R. Robey, J. Stratton, E. Whitfield, Charles Simmons (treasurer), and the secretary, Mr. Franklin Simmons.

Letters of apology were read from Viscount Baring, Sir William D. King, and Messrs. A. F. Jeffreys, M.P., T. Sturton, G. Adams, W. H. Dunn, and J. Willis-Fleming.

The Secretary read telegrams received from Her Majesty the Queen and H.R.H. the Duke of Connaught acknowledging the votes of sympathy on the occasion of the death of H.R.H. the Duke of Saxe-Coburg. The replies were ordered to be entered on the minutes.

The Chairman proposed a vote of sympathy and condolence with the family of the late Sir Henry Simpson, whose valuable services to the Council he warmly eulogised. This was seconded by Mr. James Stratton and unanimously carried.

The Secretary read a letter from the Town Clerk of Winchester conveying a resolution of the Corporation of that city thanking the council of the Society for their courteous reception on the occasion of the opening of the Winchester meeting in June last. The Mayor of Winchester stated that the local committee's accounts in connection with the Winchester Show showed a surplus of about £168, and that at a meeting of the subscribers it was unanimously resolved to hand the same to the Royal Counties Society. He therefore had much pleasure in carrying that resolution into effect, and regretted that bad weather and other circumstances had affected the financial success of the show. The chairman briefly thanked the Mayor of Winchester and the ex-Mayor for the energy and interest which they had evinced in promoting the success of the show, and for the valuable contribution towards the Society's funds.

The Secretary submitted the draft report of the Finance Committee with reference to the Winchester meeting, and it was resolved that any deficit arising therefrom should be dealt with by arrangement with the Society's bankers rather than by sale of invested capital. The auditors to the Society were re-appointed for the present year.

The date of the annual general meeting was fixed for Wednesday, November 28th.

The date for the Weymouth (1901) show was fixed for Tuesday, June 4th, and three following days. The secretary reported that Lord Portman had consented to accept the office of president in connection with the Weymouth show, and that the local arrangements were proceeding satisfactorily.

A discussion took place as to the probable effect of the decision of the Royal Agricultural Society to establish a permanent showyard in the vicinity of London on the shows of the Royal Counties Society, and a committee was appointed to inquire into the matter and make a report to the council.

The council unanimously decided that the brood mare Patience, exhibited by Mr. T. D. John and awarded the first prize in Class 55 at the Winchester Show, was not eligible to take the prize inasmuch as she did not comply with the conditions of entry.

Agriculture at the British Association.

In the Economic Science and Statistics Section the presidential address was given by Major P. G. Craigie. In opening, he claimed that the right production, the proper treatment, and the wise grouping of garnered facts concerning men and his relations to the State as a member of society, constituted a study second in importance to no other form of research. Such discussion as ought to be possible in that section should prove, moreover, a factor of (no small moment in its bearing on the) advancement of science in its broadest sense, whether physical, economic, or political. He came, not as some of his predecessors in the chair, with eminence won either in the highest fields of politics or earned by patient work in the cloistered retreats of academic study, but rather as representing those who formed the hewers of woods and drawers of water from the economic controversialists of the day. Of all

Statistical Work

the enumeration of the units of population must ever take the foremost place, and on the eve of the census to be taken before many more months have passed, a reference to that great impending task could hardly be omitted. In common with all students of the machinery of census-taking, he was sure he echoed the feelings of the section, as he did those of the Royal Statistical Society, who had long laboured in this direction, in deeply regretting that the first census of the twentieth century was not to possess the distinction many had hoped to see conferred upon it of being by preliminary announcement—as he hoped it might prove to be in ultimate fact—the first of a series, not of decennial, but of quinquennial, countings of the people. The growing complexity of social conditions and speed of life in all its functions at the present date, contrasted with the leisurely movements of a hundred years ago, would alone and amply justify a more frequent stock-taking of the inhabitants of Great Britain than had been the practice in the past. The practical wants of our much multiplied system of local government could not fail ere long to bring about the granting of an intermediate numbering, even if for a moment other considerations over-ruled the more academic pleas of statisticians for this reform, or the arguments which he believed to be sound, for a permanent census office, a permanent Census Act, and a trained and continuous census staff to whom preparation of the machinery beforehand and detailed elaboration of the results after the actual census year might with real economy be entrusted. In the near future the attention of statistical critics would doubtless be drawn again to the massive collection of materials respecting local taxes, their growth and pressure which might be looked for from the final report of the Royal Commission on Local Taxation. This was the field in which he first made some inquiry during his residence in a Yorkshire township thirty-four years ago, when local government and local rates of necessity came home with primary concern to one who happened, like himself, to be the sole inhabitant householder of an area constituted for several purposes a unit of local administration.

Quite as full of difficult problems and disputed, non-comparable figures, the President continued, would be found to be the use of statistics of

Production and of Trade.

The varying and scanty records of one period might have to be viewed in connection with and interpreted by the better and fuller data of the day, and the conditions of one country might have to be compared with those of another, while the puzzling variations in the system employed had to be allowed for and discounted in the conclusions. Perhaps the difficulties of just comparison between the records of one time and another, or one State and its neighbour, came home with peculiar emphasis when the statistics dealt with related to [illegible] In the records of the numbers of animals there was room for much misunderstanding. Horses were defined differently in different countries, sheep being in lambs, or not, [illegible] one thing in one country and another in another. These were but examples of the danger of [illegible] too close reliance on figures of this kind in international comparisons. In any attempt to compare the returns of the imports of the past twenty or thirty years, even in those valuable statistics, as between one country and another, the [illegible] with respect to [illegible] and as usually compared [illegible] part of the address dealt with agricultural statistics. In conclusion, he pointed out that if there had been, as he had shown, such [illegible]

facts on which a conclusion could be built as to the past history of the relative growth of live stock or of cereal culture and the supply of bread stuffs, how much greater must the difficulty be of those who attempted, on the basis of such data, to forecast the course of events for a generation yet to come! The prime qualifications for safe statistical deductions were redoubled caution in handling calculations, a very guarded use of data giving records of single and isolated years, and a wise reservation in any prophetic pictures of the future of agricultural production, whether of wheat or cotton, in meat or in wood, of the contingency always present, of altered conditions which ever and anon in the past had altered and falsified the predictions of earlier observers.

Mr L. L. Price moved a vote of thanks to the President, of whose work at the Board of Agriculture he spoke in terms of high praise.

The Bishop of Ripon seconded the motion, which was supported by Mr. S. Bourne, F.S.S., and carried.

Experimental Work in Agriculture.

In the Economic Science and Statistics Section, over which Major Craigie presided, Dr. Saunders, Director of the Canadian experimental farms, gave an account of the satisfactory results of experimental work in agriculture carried on in the Dominion under Government organisation. He stated that in 1886 an Act was passed by the Parliament of Canada, authorising the Government to establish a central experimental farm and four branch experimental farms in different parts of the Dominion. The results of twelve years' experience had shown that these institutions had been highly beneficial to the farming community. Experimental research had been carried on along the lines prescribed by the Act by which these farms were established, and much information had been accumulated and distributed freely to the farmers of Canada. Benefits had thus been conferred on Canadian farmers in connection with all the more important farm crops, in the development of stock and dairy industries, in the production of fruits, in the growing of trees for shelter and timber, and in the advancement of other branches of arboriculture. Much attention had been given to experiments relating to the maintenance of the fertility of the land, to the best methods of cultivating the soil, to a proper rotation of crops, to the best time for sowing and the selection of the best and most productive varieties for seed. By freely spreading the information gained, supplemented by a liberal distribution of samples of the best and most productive cereals, crops had been improved, and the attention of farmers generally awakened to the importance of adopting such measures as would result in increased crops. The steady advancement which had taken place within recent years in Canada, and the increasing prosperity of agricultural industries, might, in large measure, be attributed to the useful work of these experimental farms established and maintained by the Government in different parts of Canada.

Mr. Somerville, the recently-appointed Professor of Agriculture at Cambridge University, said many of them had for the past few years been endeavouring to formulate suitable schemes for the improvement, on scientific lines, of the agriculture of Great Britain, and, more recently, of Ireland. Experiment by Act of Parliament was apt to be hampered by restrictions; but in Canada the legislation which authorised the work had, with advantage, been so comprehensive as to leave the workers with a practically free hand. One leading distinction between our own efforts and those of Canada or the United States was that we relied much more upon local effort. There was no experimental work in agriculture, and almost no agricultural work of an educational kind, in this country which was supported entirely from Government sources. But the requirement of local co-operation had ensured local interest. He was assured by farmers that the somewhat extensive work carried on during recent years in connection with various agricultural colleges, aided by the Board of Agriculture, had been of practical value, and, moreover, it had set farmers thinking about possible improvements of method.

Mr. Hall, Principal of the Agricultural College at Wye, remarked that, as some of the best experimental work in agriculture had originally been done in this country, it was rather unfortunate that our haphazard methods of encouraging it should contrast somewhat unfavourably with the more complete and consistent methods officially employed in Canada. There was little actual research work done here, except at Rothamsted. He doubted how far it was effective to throw upon teachers the work of research.

Mr. Hughes commended the experimental work done in Canada, which, he said, was of special interest in this country, as we depended upon Canada for so much of our food supply.

Growth of Beet.

The next subject discussed in the same section was "The Economic Possibilities of the Growth of Beet Sugar in England," upon which a paper was read by Mr. Hall, of the South-Eastern Agricultural College. The somewhat unfavourable view taken by the reader of the paper was confirmed in the course of debate by Dr. Ginsburg. Mr. F. P. Walker followed with a historical sketch of the chief phases of agricultural labour. Mr. J. C. B. Kershaw afterwards read a paper in which he discussed the theory of a connection between trade fluctuations and agricultural prosperity.

THE WEATHER.

Monday (September 3rd).—A well-developed anticyclone covered the British Isles, the barometer being very high, and rising in most places, but falling slightly in the north under the influence of a disturbance which was moving eastward beyond the Shetlands. Except for a strong wind in the Hebrides, moderate to very light breezes were reported very generally from a northerly to easterly direction over nearly the whole of England, and from the westward over the rest of the kingdom. Fair to very fine and dry weather prevailed extensively during the day, apparently no rain being registered anywhere. There had been a considerable fall of temperature at the majority of stations in the night, minima little short of the freezing point occurring in Scotland and Ireland, Nairn being as low as thirty-three degrees.

Tuesday (September 4th). The anticyclone was still the controlling power in the weather over the western half of Europe, its centre remaining over a great part of the United Kingdom. During the day, however, the barometer exhibited a general downward tendency, and the system appeared to gravitate towards the Continent. Very light breezes were experienced all over our islands, the westerly current spreading southward, and the easterly breeze was limited to a few places along the western end of the Channel. The sky was dull and overcast locally in Scotland and Ireland; but, as a rule, very fine autumnal weather was in the ascendant, no rain being reported anywhere, though it was tending towards wet in the north. The night had been cool in many districts, with temperatures about forty degrees, and in the afternoon there were few maxima as high as sixty-five degrees.

Wednesday (September 5).—The leading feature of the atmospheric conditions over Western Europe was again the extensive anticyclone which has maintained its ground since the beginning of the week, but it seems to be dissolving very slowly, as the barometer was everywhere on the decline throughout the day. There were some signs of cyclonic disturbances trying to spread down upon us from the north, westerly to south-westerly breezes having become general round our coasts, but they had hardly any strength, and did not look like freshening. Rain had set in over Scotland in the night, and it continued most of the day. England and Ireland, on the other hand, had splendid weather, clear and sunny in the south, rather more cloudy in the north. Moderately low temperatures occurred in a few places at night, the afternoon being seasonably warm, London rising to 71deg.

Thursday (September 6th).—A cyclonic disturbance which passed eastwards beyond our northern coasts ocasioned a moderate amount of rain over Scotland during Wednesday night; but on Thursday the influence of the anticyclone centred over the southern districts extended to all parts of the kingdom, the barometer having commenced to ascend again in many localities, and seemed to give promise of a continuance of settled conditions for the present. Gentle easterly breezes were reported along all the southern coasts, and equally light westerly brezes everywhere else. Locally about the Bristol Channel and in the neighbourhood of London the atmosphere was rather foggy in the first part of the morning; but with this exception, and a litle overcast sky at some places in the North, the day witnessed a repetition of the very fine autumnal weather of previous days, the afternoon temperatures being at about seventy degrees in many districts.

Friday (September 7th). Meteorological reports showed that the conditions over Western Europe were undergoing changes of considerable magnitude, the barometer being on the decline, the recent anticyclone had passed away from our shores to Central Europe, and a cyclonic system had appeared off the West of Scotland. The general outlook, therefore, had become much more unsettled, but although overcast, dull, or gloomy in most parts of the kingdom, only the northern and north-western regions experienced light to moderate rain, there being some fog along the southern and south-western coasts. Notwithstanding the change in the prevailing type, the winds remained extremely light in force everywhere, the direction being from between south-west and south-east. Except in a few localities, the night had been mild, most of the temperatures being up in the fifties; the afternoon values generally being in the sixties, London touching seventy-five degrees.

Saturday and Sunday (September 8th and 9th). The weather during the two days was of an indefinite description, an anticyclone endeavouring to spread in from the south-westward, while depressions were skirting the northern coasts, others apparently being about to approach the western coasts. Over most localities the winds were generally from some north-western point of the compass, and very light in force. There was a good deal of fair to very fine weather, but not of the same character as was experienced on previous days, and at times most districts had rather a dull, threatening sky, with now and again some gentle falls of rain. Temperature was mainly in the fifties at night, and in the sixties in the afternoons, London rising to seventy degrees each day.

THE GARDEN.

Since the new moon came in on the 25th ult. there has been a decided improvement in the weather on the whole. We still get an occasional wet day, but, as a rule, the sun shines more or less brightly most days, and fairly high temperatures are maintained, but the nights are getting decidedly cool now.

Potatoes of all the earlier varieties will in most cases be ripe enough by this time to be lifted, and, as a rule, this had better be done at once, before the spores of disease can be washed down to the roots by more rain. In this and many other districts the haulm is now pretty generally affected by the mur-rain, and as it is scarcely possible to prevent the germs or spores falling to the ground, they are in time sure to reach the roots, unless these can be got up and stored before this occurs, particularly if we get any more rain. With few exceptions, however, the late kinds are not yet sufficiently matured to allow of the crops being safely lifted, so that these must "take their chance," so to speak, for a little longer, though where the haulm is at all badly diseased it will be advisable to cut off and burn the haulm at once.

In all probability the late or main crops of potatoes will suffer worse from the disease than the earlier kinds, and it is by no means unlikely that we may have potatoes unusually scarce and dear before the new crop comes in again next season. In order to avoid as far as possible any shortage of the kind, great care should be taken in lifting, sorting, and storing the crop, getting the tubers out of the ground at the earliest possible date consistent with a sufficient degree of ripeness, laying the crops out thinly in a dry place, and sorting out all that exhibit the least signs of disease, not only when storing, but at frequent intervals subsequently.

All tubers intended for seed must be left in the ground until thoroughly ripe; when lifted it is a good plan to lay these out in some sunny, sheltered spot until they become quite green.

We are now using a batch of "Schoolmaster" potatoes grown on the "lazy-bed" system, and without any manure whatever. In spite of the wet season these are most delicious, cooking dry and floury, with a sweet nutty flavour. By this system the beds are raised so much above the level of the alleys between them that they cannot possibly become sodden, and consequently the tubers are much more dry and firm in character than those grown on the level.

A plot had better be prepared now for the July-sown cabbages, which ought to be fit for planting out about the middle of the month. If they stand at all thickly in the seed-beds or rows, some of the strongest had better be thinned and planted out as soon as possible.

Early apples and pears are ripening fast now, and as a rule the crops are good. The former should be eaten as far as possible straight from the tree, but pears are better gathered a few days before they are quite ripe, and stored until mellow. Mr. Gladstone is a very pretty early apple, and the earliest of all to ripen; other good early dessert kinds are Irish Peach, Devonshire Quarrenden (this is a very favourite market variety), Kerry Pippin, and Worcester Pearmain. The best early culinary apples are the good old Keswick Codlin, the Manx Codlin, Cellini, and Lord Suffield.

All the lateral growths on vertical cordon fruit trees, whether apples, pears, or plums, should now be cut back to within one or two buds or eyes of the base, so as to form spurs.

Beds of begonias are in great beauty now, and in a season like this beat the "geraniums" hollow. Many of the fibrous-rooted or winter-flowering begonias also "bed out" capitally, blooming very profusely, and affording an excellent effect.

Whether a previous batch of cuttings of the "bedding" and other geraniums has been inserted previously or not, a good number had better be got in at once, either in pots or boxes. Keep them out of doors as long as the weather remains fine, and then remove to a sunny and well-ventilated house or pit. Insert cuttings of petunias, marguerites, heliotropes, and others in a frame over a very gentle hotbed at once.

LETTER TO THE EDITOR.

The Thistle Pest.

Sir, I have found that these troublesome weeds may be eradicated by chopping them off with a sharp hoe about an inch and a half or two inches underground, on the principle that if they are prevented from forming leaves, the roots of necessity must die. They are not so likely to shoot again if cut off below the surface. The botanical name of the perennial sort, which gives such trouble on grass land in the summer, is "Cirsium pratense." Yours, truly,

Constant Reader.

NEWS NOTES.

Drogheda, co Louth.—Held on 27th August. Small fair; demand fair. Calves, first class, £4 15s. to £5. Yearlings, first class, £8 to £9; second class, £6 15s. to £7. Two-year-olds, first class, £9 15s. to £10 10s.; second class, £9 to £9 10s. Three-year olds, first class, £11 15s. to £14; second class, £11 to £11 5s. Springers, first class, £16 to £21; second class, £12 to £13.

Farm Fire near Colchester.—On Wednesday evening a fire broke out at Eight Ash Farm, Copford, in the occupation of Mr. Miller. A barn, with stabling, cow-houses, and a shed were destroyed, together with several implements and stacks, representing the produce of three acres of winter oats, nine acres of barley, and an acre of peas.

Paris Exhibition Awards.—With their exhibits in Group 7, Class 35, at the Paris Exhibition, Messrs. Bamford and Sons, of Uttoxeter, have obtained a gold medal award for the "Royal" mowers and reapers, the "Rapid" corn-grinding mills, the "Progress" double-action haymaker, and the new patent "self-feeding" chaffcutter. A special silver medal has also been obtained this week at the Warwickshire Show, Coventry, for Messrs. Bamfords' "self-feeding" chaffcutter, with new patent self-acting stop motion. The improvements in this machine securely protect the attendant from personal injury, and also prevent straining or breakage of the shafts and gearing, through blockage or choking of the feed rollers, that so frequently cause breakdowns in ordinary chaff cutters.

A Death-dealing Horse.—An extraordinary double fatality is reported from Shere, a village near Guildford. A day or two ago a lad named Cumper, in the employment of Mr. Arthur Vaughan, a baker, was found by his master lying in an unconscious state in the stable, suffering from a compound fracture of the skull. It appeared that while descending a ladder the youth slipped and fell, and was kicked by a horse which was standing in one of the stalls. Cumper succumbed to his injuries, and at the inquest the coroner made a startling statement. He explained that in the ordinary course the deceased lad's employer would have been in attendance to give evidence, but, while the youth lay in a precarious condition at the hospital, Mr. Vaughan went for a ride on the horse that dealt the fatal kick, was thrown, and killed on the spot. The jury returned a verdict of accidental death.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

TENDERS.

EDMONTON URBAN DISTRICT COUNCIL.

TENDERS FOR OATS.

The Edmonton Urban District Council invite TENDERS for the supply and delivery of OATS at the Edmonton Sewage Farm, or at the Cemetery, Hyde Side, Edmonton, for the period between the 30th September, 1900, and the 31st March, 1901, or the 30th September, 1901, at the option of the Council.

Forms of tender and full particulars may be obtained of Mr. G. Eedes Eachus, Engineer to the Council, Town Hall, Edmonton.

It will be a condition of Contract that the firm whose tender may be accepted shall pay to all workmen in their employ not less than the Trade Union Rate of wages in force within the District.

Tenders endorsed "Tender for Oats" (with samples) to be delivered at my office not later than 12 o'clock (noon) on Tuesday, the 25th day of September instant.

The Council do not bind themselves to accept the lowest or any tender, and any person whose tender may be accepted will be required to enter into a proper contract with bond and to supply sureties to be approved by the Council, such contract and bond to be prepared executed and completed in every respect at the expense of the Contractor.

By Order,
WM. FRANCIS PAYNE,
Clerk to the Council.

Town Hall, Edmonton.
September 13th, 1900.

CONTRACTS FOR WHEAT FLOUR AND WHOLEMEAL.

THE PRISON BOARD is prepared to receive TENDERS for the supply of the above to the following prisons, viz.:—

Aylesbury, Bedford, Birmingham, Bodmin, Bosttal, Brecon, Bristol, Cambridge, Canterbury, Cardiff, Carlisle, Carmarthen, Carnarvon, Chelmsford, Dartmoor, Derby, Devizes, Dorchester, Durham, Exeter, Gloucester, Hereford Holloway (with Newgate), Hull, Ipswich, Knutsford, Lancaster, Leeds, Leicester, Lewes, Lincoln, Liverpool, Maidstone, Manchester, Newcastle, Northallerton, Northampton, Norwich, Nottingham, Oxford, Parkhurst, Pentonville, Plymouth, Portland, Portsmouth, Preston, Reading, Ruthin, St. Albans, Shepton Mallet, Shrewsbury, Stafford, Swansea, Usk, Wakefield, Wandsworth, Warwick, Winchester, Worcester, Wormwood Scrubbs, and York.

Forms of tender, with all necessary particulars, can be obtained at any of the prisons, or at the Prison Commission Office, Home Office, Whitehall, London, S.W., where also samples may be seen.

Tenders must be delivered at the Prison Commission Office, prepaid, not later than noon on Tuesday, the 18th of September, 1900.

TENDERS (*Continued*).

VESTRY OF ST. JOHN, HAMPSTEAD.

TENDERS FOR FORAGE.

The Vestry invite TENDERS for the supply of HORSE PROVENDER for one year from 29th September, 1900. Forms of Tender may be had and full particulars obtained on application to C. H. Lowe, M.I.C.E., Surveyor, at the Vestry Hall. Tenders to be delivered at my office by 4 p.m. on Thursday, 27th September.

No Tender will be received unless accompanied by £10 in cash or bank notes (not to be enclosed), as an evidence that the Tender is made *bona fide*; the amount to be returned if Tender not accepted, but to be retained in the other case until contract is duly signed. In the event of a Tender being withdrawn the deposit will be forfeited.

The expenses of preparing and stamping contract to be paid by the contractor.

The Vestry do not bind themselves to accept the lowest or any Tender.

By Order,
ARTHUR P. JOHNSON,
Vestry Clerk.

Vestry Hall, Hampstead.
12th September, 1900.

TENDERS FOR FLOUR.

THE CONJOINT FLOUR COMMITTEE of the Spanish and Portuguese Synagogue and the United Synagogue are about soliciting TENDERS for the supply of about 1,600 to 1,800 sacks of best HOUSEHOLD FLOUR, to be made of sound English Wheat, the Flour to be delivered free of all charges in such quantities and at such times and in such places in London as may from time to time be directed.

The grinding of the Flour must begin about the end of October, and be completed within six weeks, a mill being exclusively set aside for the purpose. The preparation of the mill, as well as the grinding of the Flour, will have to be carried out under the superintendence of the Jewish Ecclesiastical Authorities.

Millers desirous of tendering can obtain full particulars and copy of form of tender on application to Mr. P. Ornstien, Secretary of the United Synagogue, 2, Charlotte Street, Portland Place, London, W.

No Tender will be received after three o'clock in the afternoon of Thursday, the 20th September, nor unless made on the printed form provided for the purpose. The committee do not bind themselves to accept the lowest or any tender.

Sept. 6th, 1900.

RAILWAY ANNOUNCEMENT.

GREAT NORTHERN RAILWAY

ALEXANDRA PALACE
GREAT DOG SHOW,
SEPTEMBER 25, 26, AND 27, 1900,
Under the patronage of
THE KENNEL CLUB.

THE INTERNATIONAL KENNEL CLUB.
Patron: H.R.H. The PRINCE OF WALES.

THE LADIES' KENNEL ASSOCIATION.
Patron: H.R.H. The PRINCESS OF WALES.

The Great Northern Company will convey Dogs, etc., for Exhibition at this Show from Inverness, Aberdeen, Perth, Dundee, Glasgow, Edinburgh, Newcastle, York, Hull, Leeds, Halifax, Bradford, Wakefield, Liverpool, Manchester, Huddersfield, Burnley, Blackburn, Bolton, Sheffield, Barnsley, Rotherham, Derby, Nottingham, Leicester, Lincoln, Grimsby, Boston, Spalding, Lynn, Wisbech, Peterboro', Cambridge, and other towns on and in connection with their system, to Wood Green and Alexandra Palace Stations.

Through Vans will be run for the convey ance of Dogs for Exhibition at this Show where necessary.

☞ The Rates charged will in no case exceed those in force by any other route.

RETURN TRAFFIC.

Arrangements will also be made for the return of the traffic in Through Vans at the close of the Show, and Exhibitors wishing to avail themselves of these facilities shou'd consign and address their exhibits "Per Great Northern Railway," and be careful to write their names and addresses distinctly on the backs of the direction labels issued by the Show Committee.

A Great Northern representative will be in attendance at the Show, prepared to give every information to exhibitors, and to facilitate the removal of their exhibits. The removal order issued by the Secretary should be sent to the Superintendent of the Line, King's Cross, at commencement of the Show.

For further information apply to the Superintendent of the Line, Great Northern Railway, King's Cross Station, London, N.

CHARLES STEEL,
General Manager.

London, King's Cross, July, 1900.

FARM, FIELD AND FIRESIDE.—An Illustrated Agricultural, Rural, and Domestic Journal, published weekly, price One Penny. Contains in a condensed form valuable and most useful information to all interested in the Farm, the Dairy, Live Stock, the Stable, Poultry, Bees, Garden, and the Household. The average sale of Farm Field and Fireside is greater by many thousands of copies per week than that of all its immediate contemporaries combined. Can be obtained everywhere. Price One Penny. Offices:—1, Essex Street, Strand.

HALL'S
SANITARY
WASHABLE
DISTEMPER
(PATENTED)
A NEW SANITARY WATER PAINT,
HAS GREAT ADVANTAGES.
SOME OF WHICH ARE AS FOLLOWS:—

It sets hard, Kills Vermin, and Disinfects.

It is washable in 3 weeks, does not scale, and can be Painted or Varnished. Made in two qualities, for inside and outside work.

It is made in Dark Rich Shades as well as in Light Tints, contains no Lead, and does not Turn Black.

It only requires the addition of Water to make it ready for use, so that anybody can apply it.

It is Cheaper, Cleaner, Healthier, and more Artistic than Wall Paper.

It makes an excellent Shading for Greenhouses, the inside quality lasting about 9 months, the outside quality several years

Sold by Leading Chemists, Drysalters, and Ironmongers, and Manufactured by—

BIBBY'S

"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.
One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."
We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."
The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

Mark Lane Express Agricultural Journal.

The Only English Journal devoted exclusively to Agriculture.

MONDAY, SEPTEMBER 17, 1900.

Correspondents are requested to address all communications for the Editorial Department to THE EDITOR, "Mark Lane Express," 1, Essex Street, Strand, London, W.C.

Advertisements, Subscriptions, and business communications should be addressed to THE PUBLISHER, "MARK LANE EXPRESS," 1, Essex Street, Strand, London, W.C.

A STRANGE DECISION.

A recent case in the Ripon County Court seems to call for somewhat serious comment. It dealt with the responsibility of a railway company in the matter of carriage of live stock. The owner of three head of cattle sued the North-Eastern Railway Company for damages, which he estimated at two pounds, on account of the refusal of the servants of such company to carry such cattle from Masham to Ripon for the live stock mart. It appears from the evidence produced in the case that the plaintiff gave notice to the station master at Masham on the Saturday that he intended to send his cattle on the Monday morning. His story was that he was told when he arrived with the animals at the station on the Monday morning that they could not be forwarded by the market train, as there was not room in the trucks. It appears from the evidence that the Board of Trade had made a special regulation by which the railway company should be entitled to attach two cattle trucks to the morning train from Masham to Ripon on Monday. It further appears that farmers who had stock to dispose of were in the habit of making arrangements to share trucks between themselves. It was further stated that in this particular instance the only truck available for cattle had been filled with sheep unknown to the station master—a contention which we cannot possibly understand as having anything whatever to do with the case. The contention of the plaintiff was to the effect that if there had been a reasonable arrangement of the animals consigned by this particular train, the plaintiff's cattle could have been included, and that he could reasonably have expected that they would have been delivered in due course and in plenty of time for the market for which he intended them.

The defence which was raised by the railway company was that as the plaintiff had not ordered a truck, and had been content to take his risk of there being room in a truck ordered by another person, the company could not be held liable for the delay. There was some suggestion as to the possibility—or, perhaps, probability—of a special train being made up if a definite order had been given; but the evidence upon this point does not seem to have been very convincing, particularly as the truck which would be necessary was at the other end of the distance to be covered. The judge decided that the station master was justified in the action that he took, and that the risk of the cattle not going fell upon the plaintiff himself. He had the chance of ordering a truck for himself, but relied upon sending the cattle in another person's truck. Seeing that it was a misunderstanding, his Honour came to the conclusion that the justice of the case would be met by a verdict for the defendants, but without costs. With the greatest of respect to the learned judge, we cannot help thinking that the decision is a mistaken one. The railway company had clearly gone to the trouble of obtaining power from the Local Government Board to attach a limited number of cattle trucks to a particular passenger train for market purposes. A railway company is not in the position of an ordinary trader, for it possesses more or less of a monopoly, and when Parliament grants such a privilege it is naturally necessary that certain duties should also be imposed. In this particular case the North-Eastern Railway Company had a right to object to any other railway being made to compete with it, but, on the other hand, it had certain duties to perform. In all reasonableness, the first duty is to accept such goods as are delivered to it for transit. It can hardly be right for a railway company to advertise special arrangements for market purposes, and then to try and escape liability by raising technical points. This case makes us think that there is some ground for the people in the North-East who are anxious to see some competition.

SAMPLES.

By a Man of Mark Lane.

Owing to the comparatively favourable early rainfall in the districts where the early sowings of gingelly are most largely made, the area sown with the crop this year up to the end of July has been, according to the first report of the Madras Department of Land Records and Agriculture, very considerably in excess of the average for recent years, and still more markedly above the sowings of the crop last year. The excess is most marked in the Carnatic districts, where about double the average area has been sown. In the Deccan districts there has been some deficiency. On the whole the crop is a promising one, though it suffered in some parts for want of rain in June. The total area sown is 381,800 acres, as compared with 319,200 in 1899.

The Bombay Department of Land Records and Agriculture has now issued its preliminary memorandum on the ground-nut crop in the Bombay Presidency for the season of 1900-1901. The estimates are made up to August 5th, and it is stated that the oil-seed is cultivated mainly

in the British districts of the Deccan, Belgaum of the Karnátak and the adjoining native States. The information received is very incomplete. In Khándesh rain for sowing was deficient, and has restricted area sown. Elsewhere season favourable. The area under the oil-seed, however, will not reach the normal owing to extended cultivation of food-grain crops consequent on last year's scarcity. Dearness of seed is also reported from places. The sown crop is progressing satisfactorily.

Not long ago there was great lamentation in the United States about the introduction of the Russian thistle. It was regarded as a calamity, like the sparrows in America and the rabbits in Australia. Now, however, matters are regarded differently, for the *National Stockman* speaks of it as "another supposed evil turns out as a blessing in disguise." It tells us that some sections of the West have just harvested their Russian thistle hay, and that the crop this year is a good one. It adds:—"Such announcements as this would have been regarded as plain lies a few years ago, but now they are merely a statement of facts. The Russian thistle is becoming an important adjunct to the wintering of stock in some parts of the grazing country. Live stock likes thistle hay, and, according to reports of ranchmen, does well on it."

Discussing in a Transatlantic contemporary the practical results of agricultural education in the United States, Mr. J. R. Dodge, at one time Statistician to the Department of Agriculture in that Republic, says that the inculcation of scientific principles in the agricultural colleges and their application on college farms have eliminated much of the uncertainty and waste of labour in the cultivation of the land. The work of the farmers' institutes and the dairy schools has, he affirms, brought directly to the farming classes the means of greater precision and efficiency, vastly improving the results of labour. These influences, he thinks, are year by year becoming more pervading, with cumulative effect; and there never was in the past a time when so little effort or expenditure in agriculture was wasted as there is now. The economy of production, as rendered necessary by competition and low prices, is effectually taught in the theory and practice of modern agricultural education, and evidence of the successful application of such instruction, he declares, is abundant.

The Crop Bulletin for August, published by the Ontario Department of Agriculture, states that the yield of fall wheat is above the average, notwithstanding the losses sustained by winter-killing on low and undrained land and the injury occasioned by dry, backward weather in spring in many localities. The crop has been harvested for the most part in excellent condition, the heads being large and well filled, and the grain plump, with the straw bright and clean. It is free from rust or smut except in a few instances. The grain ripened somewhat unevenly, and in some parts was over-ripe when cut, and shelled when handling. The weather was, as a rule, highly favourable for harvesting operations, which took place in the great majority of cases from the middle to the end of July. Several correspondents note better returns from early than from later sown wheat. The principal cause of injury next to the losses from frost was the ravages of the Hessian fly, which was reported more especially in the western part of the province. The cut-worm and other pests also did some damage. Of spring wheat the yield will be in excess of the average, although the conditions have not been altogether favourable.

In their first forecast of the til crop of 1900 the Department of Land Records and Agriculture for the North-Western Provinces and Oudh state that rain commenced late, about the middle of July, and sowings were in progress till near the close of that month. Germination is good; but in only a few districts has the crop grown sufficiently to require weeding. Prospects are good so far; but rain is generally required. This report relates to condition up to August 10th. The Central Provinces Department has also issued its first forecast on the same crop. It is stated that owing to the deficiency of the rainfall the sowings were effected much later than usual, and are not yet complete in Saugor and Damoh. Sowings were on the whole successfully carried out on a larger scale than usual. Germination was generally good, and the early sowings suffered less than cotton from the long spell of dry weather in June and beginning of July. In only some parts of Mandla and Nimar was resowing necessitated. Damage from insects is reported from Narsinghpur and Nimar. It is probable that the recent heavy rain has caused the insects to disappear. The condition of the young plants is at present satisfactory, and prospects are favourable. The cold weather crop, which is of importance in the southern districts, is not yet in the ground.

A month or six weeks ago it was hoped (says the *Statist*) that the drought in Queensland was broken. But the rain which then fell abundantly has not been followed, and apprehension is again springing up. Much good, of course, has been done by the rains; but the drought is not completely brought to an end. Still, it is to be recollected that we may have good summer rains. Outside of Queensland the outlook is favourable. Speaking generally, the drought is at an end in New South Wales and the other colonies. In New South Wales more particularly it is gratifying to learn that vegetation is making most satisfactory progress. Some time ago it was said that during the long drought the soil had in many cases been practically swept away, that the land had been turned into what was very little better than a sandy desert, and that the dust and sand had been blown away, except where it was swept into hollows or stopped by fences of some kind. The most gloomy forecasts were, therefore, formed; but the *Statist* is glad to say that recent information tends entirely to overturn these gloomy forebodings. Everywhere almost the vegetation is making most satisfactory progress, and it looks as if the country would be in as good a condition as ever in a very little while.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to September 8th, 1900, were £44,061,601, against £44,099,660 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £75,836,638, against £46,518,425 to the same date in the previous year. The Treasury balances on September 8th, 1900, amounted to £3,503,809, and at the same date in 1899 to £3,501,128.

PRACTICE WITH SCIENCE.

Agricultural Education in Essex.

The agricultural work of the Essex Technical Instruction Committee is carried on at, or organised from, the County Technical Laboratories at Chelmsford. These include laboratories and class-rooms fitted up for practical instruction in the sciences upon which agriculture depends, a building for the travelling dairy school when resident at Chelmsford, workshops, and store rooms for the apparatus for external lectures, and within ten minutes' walk a large garden with potting shed, and glass house for horticultural instruction. The committee have recently issued a pamphlet giving a brief account of the work carried on by them. It includes a winter school of agriculture, a school of horticulture, classes for instruction in agricultural chemistry, botany, zoology, and dairy bacteriology. Normal science classes, travelling dairy school, external lecture classes, field meetings, agricultural excursions, field experiments, laboratory work, agricultural analysis, etc.

The complete course of instruction in the winter school of agriculture comprises three three-weeks' courses, each course being held in turn during the three weeks immediately preceding and succeeding the Christmas vacation, and therefore at a time of year when young farmers or farm pupils can be spared from the farm. The subjects of the three courses are:—Course 1, the soil; Course 2, farm crops; Course 3, farm stock. The lectures upon agricultural biology and chemistry are accompanied by practical laboratory work, and those upon practical agriculture by field demonstrations, but no instruction in the actual processes of the farm is given, it being held that these must be learnt upon the farm itself. The course of instruction is free to selected students, but no grant is made towards travelling expenses or the cost of board and lodging.

The classes for instruction in agricultural chemistry, botany, zoology, and dairy bacteriology are held usually once a week during the winter months from eleven to five, and are open to all persons engaged in agricultural pursuits. The dairy bacteriology class is intended for students of the travelling dairy school, who are thus afforded an opportunity for the practical study of the bacteria of milk and the relation of bacteria to the production of butter and cheese. The classes are free to selected students and travelling expenses are paid.

External lectures and classes are given in suitable localities throughout the rural parts of the county. They have been important factors in securing the establishment and the successful carrying on of the schools of agriculture and horticulture at Chelmsford. The courses vary in length from four to twelve lectures or more. The principal agricultural subjects taught are:—(*a*) Agricultural chemistry: the soil, manures, crops, foods, feeding, etc. (*b*) Biology: plant life, animal life, insects, bacteriology, etc. (*c*) Horticulture: vegetable culture, fruit culture, flower culture, cottage gardening, etc. (*d*) Agriculture: ploughing (with competitions), shepherding (practical), farriery (practical), treatment of live stock, thatching (practical), hay-cutting and straw-binding (practical), etc. (*e*) Poultry keeping (three-day courses). (*f*) Bee-keeping.

THE DAIRY.

The Price of Milk.

As the time for making Michaelmas milk contracts is at hand, I beg to draw the attention of dairy farmers that send milk to London to the fact that dairymen are paying more this year than they have been paying for some years past.

No farmer in the Eastern Counties has to my knowledge received less on the new contracts than 1s. 8d. per seventeen pints for the six winter months, or 9½d. per imperial gallon, and the prices that have been ruling for the six summer months are from 1s. 3d. to 1s. 5d. for the barn gallon.

If the farmers are to be anything like adequately rewarded for their never-ending toil they must get at least 1s. 8d. in the winter and 1s. 4d. in the summer for seventeen pints, or 9½d. and 7½d. per imperial gallon.

There is no conspiracy here to rush up the price to the consumer. In the East of London, where milk is sold at 3d. to 4d. per quart in quantities of a farthing's-worth upwards, the farmer gets about 2d. per gallon more than the farmers that send into the North and West of London, where the milk is sold in much larger quantities at 4d. to 5d. per quart.

M. MACPHERSON.
Asst. Sec., Eastern Counties Dairy Farmers' Society,
129, Angel Lane, Stratford.

The Position of the Butter Market.

Messrs. W. Weddel and Co., in their monthly market report, say that the arrival of Australian butter on the market has begun earlier this season than ever before. Already three shipments have arrived, consisting of 4,700 boxes in total, and other shipments will arrive weekly except for the week ending September 23rd. The total arrival of Australian butter in August was 1,561 cwts., against 1,833 cwts. last year, but that came on the very last day, while this year the first arrival was in the middle of the month. The butter is mostly fresh-made winter butter, but it finds few customers, and the great bulk is going into cold store until a demand for it arises. For the "choicest" grade holders are asking 110s. to 112s. per cwt., but accepting a shilling or two less. "Finest" makes 104s. to 106s. In Canadian supplies a big falling-off has taken place compared with last year. For the eight weeks ended September 1st this year the import was 60,317 cwts., against 86,477 cwts. last year, or 26,160 cwts. deficiency. For the month of August the imports of colonial butter are 14,053 cwts. less than in 1899, while the imports of foreign butter are 23,321 cwts. short for the month, thus making a total deficiency in import for August of 37,374 cwts. The prices for Canadian butter are 104s. to 106s. for "choicest" quality.

There is a very strong "bear" movement just now among agents selling Australian and New Zealand butter. This occurs at the beginning of every season, only this year it is stronger than usual. Whether this movement originates with those agents who are dealers as well as commission agents it is difficult to decide, but that it is carefully nurtured by both Australian and English agents who are dealers is beyond any doubt, as it plays distinctly into their hands. The object of these agents is to drive prices down at the beginning of the season so that they can buy the output of Australasian factories at a low figure, and thus secure large profits for themselves.

The great and rapid rise in the Copenhagen official quotation at the end of July and the beginning of August has already expended itself, and, for the last three weeks, it has been very difficult to maintain the price at its present level of 105 kroner. The market value has declined during the past fortnight, and the quotation is quite out of harmony with landed values. The imports of Danish butter during August were 118,496 cwts. against 131,910 last year, and 150,814 for the year before. France, Holland, and Sweden all show similar reductions; hence it is difficult to understand the present opinion of buyers, who are imagining that

the market will be flooded with butter and prices will sink to a record. The holders of these views may find to their sorrow that "it is always the unexpected that happens." A few months hence they may wonder how they could ever have imagined such a thing. The Agricultural Returns for Great Britain show that on the 4th of June this year the milking herd was 50,000 cows below last year, which was 97,000 above 1898. This shortage of cows will cause a deficiency in English butter of over 3,000 tons, and it is most probable that the Continental milking herds are similarly reduced, as the drought which brought about the reduction in Great Britain was equally severe on the Continent.

The demand for Canadian cheese on the spot is good, and the speculative c.i.f. demand is improving. Prices on the spot are 52s. to 53s. per cwt. for "choicest," and 50s. to 1s. for "finest." C.i.f. prices are quite 3s. above these figures. The exports of cheese from Montreal between 1st May and 25th August this year are 114,000 cheeses in excess of the same period last year.

LETTERS TO THE EDITOR.

Income-Tax Overcharges.

Sir,—The preparations of the Inland Revenue for the demand for first payment of Income Tax, at the rate of 5 per cent. upon the amount of the income, are well advanced, and the blue notices of charge are now being delivered. Your readers who have made returns which have been ignored, or who have been assessed for the current year at a sum greater than the average of their profits for the three years ending April 5th, 1900, must at once give notice of appeal, in accordance with the instructions on the notice of charge. If they can furnish an account of their business transactions (which is very simple by employing the "Taxpayers' Cash Book"), the best course is to appeal to the "Special Commissioners," as these gentlemen are Government officials, and, not being rival tradesmen, nor influenced by personal, political, or other local feeling, may be relied upon to act with the greatest fairness. Moreover, if they find that the profits of the three years named show an average profit less than the amount upon which they paid tax for 1899-1900, they should give notice of appeal in respect of that year also, and claim repayment of the amount overpaid. There is no time to lose in business appeals, while a claim to set-off a loss in farming or business against income from other sources must be lodged before October 6th next.

Many people are now entitled to make a claim for three years to April 5th last, where the income arises from investments, even when dividends are paid "free of Income Tax," and the tax recoverable might amount to over £30.

We shall be pleased to advise your readers gratuitously whether they are entitled to any repayment, on their sending us full particulars of their incomes from all sources, and a stamped directed envelope for reply.—Yours faithfully,

THE INCOME-TAX ADJUSTMENT AGENCY, LTD.
12 and 13, Poultry, London, E.C.,
September 11th, 1900.

The Thistle Pest.

Sir,—As I am greatly troubled by thistles on my farm, I am glad to read the letter of "Constant Reader" in your last issue, and hope that the means of eradicating them which he suggests is really effective. There are on my farm several distinct varieties of thistle, three of them being particularly troublesome.

(1) A tall thistle flowering at the top with large blooms and multitudinous seeds, which, if allowed to ripen, blow all over one's land and one's neighbours' too. This kind, I think, is propagated only by seeds, and may be easily got rid of by being cut down an inch or so below the ground when the thistle first comes into bloom.

(2) A shorter variety which, as it propagates itself by running roots, is more difficult to eradicate, though it may be weakened and prevented from coming into flower by being mown down.

(3) This, perhaps, is the most troublesome of all. It is known in this country as a moss thistle; it grows very close to the ground, and takes a very flat shape, and it propagates itself not only by seed—one bloom growing in the centre of each thistle—but if cut off the roots send out shoots again. I do not think I exaggerate when I say that in a field of 23 acres the thistles in it would cover at least half an acre, and the amount of herbage that they render useless would be at least another half acre.

I hope some of your readers will give their experience of how to deal successfully with this pest.—Yours faithfully, WARWICKSHIRE.
September 12th, 1900.

A Dalziel's telegram from Bordeaux states that a forest fire has been raging in the Landes since Friday. 12,000 acres of pine have already been destroyed, and there is no means of checking the flames.

BARLEY AND MALT.

By Hordeum.

The Barley Show.

The schedules of the forthcoming barley show at the next Brewers' Exhibition are at last issued, although even now the list of classes is not quite complete. The number of special and extra prizes is much greater than in any former year, and there are no less than five additional classes, without reckoning Kent, for which good barley county prizes are offered, but the terms and conditions are not finally determined, although it is expected they may be in time for the competition this year.

The total number of awards offered is upwards of 270, ranging from 50-guinea cups and gold medals down to diplomas. Many substantial prizes are offered in cash, should winners prefer to take it, or plate. The value of diplomas is, however, in some cases considerable, as on many occasions in the past winners of the MARK LANE EXPRESS seed diplomas have readily fetched high prices from seedsmen and others

For Seed Purposes.

With a long lot of barley an extra 10s. or 15s. per quarter means a very substantial sum. Each year the quantity of barley so disposed of at this Exhibition increases.

Probably the chief good which has been accomplished through the show has been its influence upon the opinions of growers as to the benefit and ultimate economy of good seed. Many of our best seedsmen have fought splendidly for very long the battle of good seed against bad. They have had very little to thank the Royal or other of the great societies for, having to depend upon their own exertions at their own charges.

It has often been a difficult matter for them to convince a sturdy grower that it is a good thing to use seed costing as much as 10s. per bushel. Still, happily, many have been so convinced, and the greatest credit is due to several good firms for their persistence and liberal action.

Seven Firms of Seedsmen

now offer prizes at the Exhibition for the seed-barley used, and in addition several of them also offer very substantial sums, in some cases over £50, for the same barleys if manured with the special manures of these firms.

Other dealers and chemical manure makers also offer very numerous and substantial prizes. Amongst these the Anglo-Continental (late Ohlendorff's) Guano Works not only retain the premier place which they were the first to take many years ago, but they have this year more than trebled the value of the prizes offered, as well as added a complete class, in which the prizes offered run to £40. Notwithstanding the large number of classes, the winners of first prize in every class are open to take two guineas if they have used Ohlendorff's guano. Several other firms offer nearly as much, including the Permanent Nitrate Committee, Fison's, Webb's, and others.

The New Classes

include the important county of Norfolk, where, through the generosity of Messrs. F. and G. Smith, the honoured name of Mr. Clare Sewell Read will be associated with the county prizes, it may be hoped for many years to come. Few men have done so much for the agriculture of the whole country, as well as for his own county, as Mr. Read, and it ought never to be overlooked that he has given one and more often two days each year for many years past to the arduous task of judging at the Brewers' Exhibition.

The next East-Anglian county, Suffolk, not only retains the foremost place, but its rich list of prizes has been further added to by the liberality of Capt. Pretyman, who is a much more staunch and able friend to agriculture than is commonly recognised or known. It is greatly to be hoped that both East and West Suffolk will be sufficiently well represented to merit both Capt. Pretyman's and Sir Cuthbert Quilter's special prizes, as well as the large number of others offered from various sources.

The new class for the

Best Threshing Machine

is very likely to bring to the front in a most useful way the thorny question of proper threshing. It will be interesting to learn how the judging in this class will be conducted. Inferior barleys with thick tough skins, which stand no chance of recognition for malting purposes, may nevertheless be quite faultless so far as any defect arising from the machine is concerned. If, therefore, entry of a lot of such samples with the sole view to take the silver medal for threshing should be made, it may tend to lower the standard of quality of the majority of the exhibits which has tended to show such marked and steady improvement year by year. Old frequenters of the show can remember how very poor many samples used to be, but last year scarcely a single sample was sent up that did not merit some recognition from the judges.

What will happen this year is being watched with great keenness by various interested parties.

LITERARY NOTICES.

We have to acknowledge the receipt of a copy of the "Statistical Year Book of Canada for 1899, issued by the Department of Agriculture, Ottawa. This is the fifteenth year of issue, and the present volume, consisting of over six hundred pages, contains several new features.

From the New Zealand Department of Agriculture we have received a copy of its seventh annual report. It is a bulky volume, containing much useful information and many illustrations, statistical tables, etc.

There recently appeared in the *English Illustrated Magazine* an article by A. L. Bensusan on "The Cruelties and Torture Practised in Training Performing Animals." This, together with some additions from other sources, has now been published in pamphlet form, in the hope "that when its contents are generally known all exhibitions of trained animals will steadily be discountenanced." If animals cannot be taught to perform without being tortured as the writer describes it will be the wish of every lover of dumb animals that the writer's hopes may be realised.

Messrs. Thomas Kennedy and Co.'s catalogue of select Dutch flower roots, etc., for 1900-1901 has now made its appearance. The collection offered has been selected with their usual care from the best growers in Holland, and contains only such kinds as are known to be of undoubted value. Messrs. Kennedy's address is High Street, Dumfries.

The September number of the *Badminton Magazine* is a good one. Now that the hunting season is close upon us, the paper by Arthur W. Caten on "Hunting Changes—Old Masters and New" will be read with considerable interest. Another topical contribution is that by the Hon. A. E. Gathorne Hardy, who has something to say concerning the partridge. Daniele B. Varé describes "Some Types of Continental Sportsmen"; Lady Mabel Howard gives an account of an interesting riding tour; L. H. De Visme Shaw gives some hints re "Rabbiting," and Arthur H. Sharp gives a graphic description of "Sport in Portuguese East Africa"; whilst fiction is represented by a good story, entitled "Tommy, a Bombay Boy," from the pen of George Raven Dale.

Messrs. Barr and Sons, of 11, 12, and 13, King Street, Covent Garden, London, have now issued the 1900 edition of their catalogue of hyacinths, tulips, narcissi, crocuses, gladioli, and other bulbs and tubers for either spring, summer, autumn, or winter flowering. As in former years it is alphabetically arranged, and is thus easily referred to. They have also published their new price list of daffodils, for which flower they are noted, having been awarded a very large number of gold and silver medals and cups, and also certificates of merit, etc.

Scottish Chamber of Agriculture.—A special meeting of directors will be held within No. 5, Saint Andrew Square, Edinburgh, on Wednesday, 19th inst., at 10.30 a.m. Business: (1) Letters from the President and Secretary Board of Agriculture *re* Holdings Act; (2) scales of compensation under Holdings Act; (3) Mr. Long's Glasgow conference—resolutions, delegates, speakers; (4) Privy Council on sheep dips; (5) arrangements for annual meeting, conference, etc.

The Sulphate of Ammonia Committee have now issued in pamphlet form a report on and the results of the competitions for prizes given by them during the season of 1899. The report is written by Mr. John Hunter, County Analyst, Edinburgh, and he states that while the reports on the experiments for the season show some improvement in the systems of manuring, there is still much room for improvement on the part of many agriculturists, as is evidenced by the mixtures and methods of application recorded. In these reports there are but few references made to results obtained from the use of nitrate of soda as compared with sulphate of ammonia, but where there are any they once more point undoubtedly to the increased appreciation of the latter. Experiments are being carried out this season in various parts of England and Scotland, where sulphate of ammonia and nitrate of soda are being carefully tested against each other on the one crop, and the results are being awaited with considerable interest. Mr. Hunter points out that the reduced use of sulphate of ammonia implies the conjoint use of *all* the essential manurial constituents of which lime and magnesia are sometimes quite important if not more so than phosphates and potash, as nothing else, and it is the substitution of this important but what has been the cause in the past of probably every one of the disappointments that have been experienced in the using of sulphate of ammonia. He is of the opinion that with this neglect remedied there is no other purely nitrogenous manure that will not compare unfavourably with sulphate of ammonia.

By Lupulin.

Home Notes.

The Borough.

We have not yet entered upon the rushing busy time which usually characterises the opening of our season's market. Trade has been rather quiet this week except for some activity in the demand for 1899's, several parcels of which have been sold at good prices considering their quality. I saw a range of samples the other day of very unattractive appearance, which the factor told me he could not have given away two months ago, but he had just sold them at 60s. The desire of buyers to secure these low-priced lots is, I think, sufficient answer to the statements that have been freely circulated concerning the extent of brewers' stock. Such hops would not be bought for holding, but for immediate use, and these transactions, of which there have been many, seem to prove that as soon as the bulk of the new hops is available buyers will be ready to operate. In the meantime, some sales of the new growth have been effected, but I consider that the prices are not adequate or proportionate to the value actually created by the position. Certainly we have not yet seen many choice samples. Several have come under my notice, both in the Borough and on Saturday at Canterbury, and I regret I cannot confirm the reports as to superior quality which have reached me. The hops were certainly sound and of good colour, but they were all somewhat deficient of lupulin, and, therefore, did not rub down satisfactorily. Nevertheless, they are worth more than the figures at which they have been sold, and I can only suppose that when 80s. to 90s. only have been realised, there has been some pressure to sell, of which buyers have taken advantage. In a few cases where quality is better and growers were firm, as much as £5 15s. has been paid, and in a few instances the figures of £6 to £6 6s. have been reached. It is now becoming more clearly evident that

The Crop will be Smaller

than most of the estimates. I went on Saturday through a large garden about a mile from Canterbury, where not a hop had been picked, for there were practically none for the pickers to gather. With a plentiful supply of strong bine, the fruit was conspicuous by its absence. I hear there are many such gardens in East Kent, and even where the yield promised fairly well growers are being sadly disappointed by the final results. Some few gardens are fulfilling the expectation of their cultivators, but one of the most extensive planters assured me that the average for this usually fruitful district can hardly reach 7cwt. per acre. Another grower writes me that the crop will be very light, and that all the gardens in his neighbourhood which were expected to give 10cwt. are not yielding 7cwt. Roung Wingham they are better off, but even there the average will not exceed 7cwt. to 8cwt. A Sussex grower gives me this fact. He says that from the same land which yielded 10,120 bushels in 1899 he has only picked the year a small half of that quantity. I have similar reports from almost every district in the South, and when I look at the experience of my friends in Worcester and Hereford I find that it is even worse. One correspondent says, "There is no doubt that the present crop is the smallest grown since 1890," and another tells me that his hops are coming down fully 2cwt. per acre less than his lowest estimate. The Teme Valley district is an exception to the rule, being favoured this year by the soil and other conditions, added to the attention which local planters have given to cultivation and washing. It is, however, generally admitted that the Midland Counties crop will hardly succeed in surpassing an average of 5cwt.

There is general agreement in lamenting the

Want of Unity amongst Growers,

by means of which, if it could be brought about, the value of hops could certainly be raised this year to a remunerative level. The figures named as the lowest which should be accepted for hops of fair quality is £8 per cwt., and I quite believe that it is possible to establish this value if planters determine upon it. One of my correspondents compares the growers to a bundle of sticks, "which the buyers pull out one by one and break singly across the knee, or even between the thumb and finger." This is a fair illustration of the state of affairs, and planters can only correct it by organised combination, by which the bundle of sticks could be tied together, and thus be capable of resisting all the efforts put forth to break them. The nucleus of such an arrangement already exists in the N.A.E.H.G., and I cannot help wondering why this association is not more extensively supported, when its beneficial influence in favour of the industry is so manifest.

But even without combination, I would counsel growers to take courage this season, and as far as they can to act individually in their own defence. Values are gradually but surely creeping up. I was told last week by a factor that he expected the establishment of

An Advance of £1 per cwt.

in the course of a few days. I hope to be able to record next week that this is an accomplished fact, as, if so, further upward movement is almost sure to follow very speedily. If growers are true to themselves, such results must issue from the present position; but if they are vacillating and weak, their interests will certainly be sacrificed, and the already ample profits of wealthy merchants and brewing companies will be proportionately enhanced.

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will upon contain all current information likely to be of interst and benefit to the members of the society.*

National Association of English Hop-Growers.

Annual Meeting and Report.

A meeting of planters in conjunction with the council of the N.A.E.H.G. was held at the Hop Exchange, Borough, on Monday last. The chair was occupied by Mr. Laurence Hardy, M.P., who was supported by many representative growers from East, Mid. and Weald of Kent, Sussex, Surrey, Hampshire, and Worcestershire.

Apologies for absence were read from Mr. A. Baldwin, M.P., Lieut.-Col. Bourne, and Messrs. E. Albert White (hon. treasurer), W. W. Berry, H. Fitzwalter-Plumptre, L. E. Maude, J. Chapman, J. W. Lord, A. H. Savory, J. C. Davies, and many others, all of whom cordially approved of the object of the meeting, and trusted that steps would be taken to secure adequate remuneration to growers this season for the small yield of hops of good quality that they would bring to market.

The Secretary presented an array of statistics showing that not only in England, but in almost all the other hop-producing countries of the world, the crop was expected to come down considerably short of last year's yield, while the world's requirements would probably exceed those of last year.

His statements and estimates with respect to the English growth were confirmed by the evidence of each of the growers who were present, and after discussion and careful examination of the figures proposed it was resolved that the Secretary be instructed to formulate a circular to be addressed to all English planters which should embody the results arrived at, and tender advice as to the course to be adopted by growers in bringing their hops forward.

The following was subsequently issued in accordance with the wish of the meeting:—

Most recent reports from English plantations show that hops are coming down very light and below the earlier estimates, and that the great majority of gardens will only give poor results. Inquiry into the yield thus far of various districts induced the meeting to confirm the probability of the following averages:—

Kent	7	cwts. per acre.
Sussex and Hants	6	,, ,,
Worcester	5½	,, ,,
Gloucester and Salop	5	,, ,,
Hereford and Surrey	4½	,, ,,

On this basis it appears unlikely that the total English crop of 1900 will exceed *an average of 6 cwts. per acre*, or 307,848 cwts. for the 51,308 acres at present under hop cultivation, but in the subsequent table we have set it at 320,000, as an approximately safe figure.

The crop to be gathered this year from the European continent will be undoubtedly much smaller than in 1899. Throughout a considerable portion of Bavaria a substantial reduction is evident, and on the whole it is estimated that in this country the deficiency will represent at least 15 per cent. Alsace is showing a shortage of 25 per cent., and though in Wurtemberg and Baden the crop is expected to equal last year, the estimated deficiency throughout the German Empire is estimated at 65,000 cwts., or over 10 per cent. The Austrian crop is also expected to be short of last year by at least 50 000 cwts. Belgium will hardly produce half of her yield of 1899, and about the same may be said of Burgundy.

The estimates of the American crop vary, but there is universal acceptance of the fact that the yield both in the Eastern and Western States will be substantially reduced from last year. It is considered most probable that the 1900 crop will not exceed 200,000 bales or about 320,000 cwts., but in order to cover contingencies we have taken the figure for the U.S.A. at 340,000 cwts.

The World's Crop for 1900 may therefore be thus estimated:—

England	about	320,000 Cwts.
America	,,	340,000 ,,
Germany	,,	460,000 ,,
Austria	,,	200,000 ,,
Belgium and Holland	,,	45,000 ,,
France	,,	30,000 ,,
Russia	,,	65,000 ,,
Australasia and Canada	,,	15,000 ,,
		1,475,000 Cwts.

The world's demand for hops is increasing annually, in proportion to the enlarged consumption of beer. It has been stated by the highest statistical authorities to have reached the total of 2,087,146 cwts., in 1899. Accepting this figure as approximately correct, it will be seen that the yield of the crop now being gathered will not nearly approach the requirements of brewers, as a deficiency on the year appears to the extent of over 600,000 cwts This will doubtless be met in some degree by stocks of Yearlings in the hands of the trade and their customers, but we are credibly informed that such stocks are exceptionally small on the Continent and in America and they are certainly not excessive in England.

It will be seen from the foregoing remarks that the probability of our market being over-burdened with imports this season is very remote.

We are aware that it is practically impossible to arrive at exact figures in these calculations, which must always be more or less of a speculative character. Therefore we have endeavoured in the present statement to avoid exaggeration, and have confidence in recommending our figures to your attention as being at least impartial and fairly correct. If such prove to be the case, we need not hesitate to conclude that *a substantial improvement in the value of hops is inevitable*, and as under present circumstances English growers can certainly control the course of the English market, it rests with themselves whether they will take advantage of the position, or allow others to gain the profits.

The unanimous opinion of our meeting was, that growers should be advised to be cautious in offering their hops, and to be reasonably firm in the prices they ask, as it seems very probable that such a course will bring about an active trade at gradually improving rates, especially as the quality of the later pickings is likely to be exceptionally fine.

We beg to emphasise this decision and in your own interest earnestly commend it to your consideration.

LAURENCE HARDY, Vice President, N.A.E.H.G. (Chairman).
THOMAS IRONMONGER, Secretary, N.A.E.H.G.

The chairman referred to the absence of their president (Colonel Brookfield, M.P.), who, at an age when most men with his happy surroundings would prefer to seek their personal ease, had gone out to South Africa to take part in the war being waged there on behalf of the rights of the British Empire, and who had there done most brilliant work, for which he had been mentioned more than once in dispatches, and had received the commendations of Lord Roberts. They could not forget also the excellent service he had rendered to their industry both in and out of Parliament. Colonel Brookfield having certainly taken more personal interest in English hop growing than any other member. While, therefore, they regretted his prolonged absence, they could not help being proud of him, and trusted he would soon return safe and sound to receive the thanks and personal congratulations of his numerous friends. He (the chairman) had pleasure in proposing the following resolution, requesting their secretary to forward a copy of it to the president:—

The members of the N.A.E.H.G. assembled in their annual meeting, having heard with satisfaction and pride of the gallant deeds of their president during the campaign in South Africa, most cordially congratulate him upon his successes, which they are pleased to observe have gained the special commendations of the Commander-in-Chief. Being aware that Colonel Brookfield has encountered many and imminent dangers, and has also endured severe privations, they are profoundly thankful that he has hitherto come safely through them, but they earnestly trust that he may soon return in good health to his native land, where his numerous friends and admirers are waiting to welcome him, and to thank him for the good service he has done.

This was carried with acclamation, and after a vote of thanks to the chairman the proceedings terminated.

Wests, Jones and Co.'s Report.

As our market is now being supplied with the new growth, we have much pleasure in forwarding you our annual circular.

We doubt very much if the hop plantations ever experienced a more persistent attack of blight, and this has greatly reduced the growth. Washing and good cultivation have, however, prevented a failure of the crop. Most of the hops grown promise to be perfectly clean, healthy, and of excellent quality, but we cannot, in face of the reports we are daily receiving from the plantations, estimate the crop at more than £160,000 to £170,000 old duty.

Considering the very large yield of last year, it is most satisfactory to find so few 1899 hops still in the hands of planters, showing that the consumption has not only been large, but that it is on the increase.

The accounts from the Continent report a crop smaller than that of last year, and this is also the case both in New York States and on the Pacific Coast, and in these countries high prices are demanded by the planters for their new growth. These estimates point to a crop quite insufficient for the yearly consumption, and brewers, despite the hops they may have in hand, will, before another season comes round, find the stocks of hops practically exhausted. The bulk of the present supply consists of earlies, and several parcels have been sold at from 75s., 90s., to 100s. per cwt. Bramlings have realised from 90s. to 120s. per cwt., but when our market fairly opens we anticipate a good demand at enhanced prices. The inquiry for 1899 continues, and prices are firm at the late advance.

We urge that the greatest care should be taken in picking and drying, and we feel sure our friends will be well repaid for any extra trouble they may take in these most important items. The acreage on which the presnt growth is produced is 51,308 acres, a reduction of 535 acres on that of last year.

We beg to inform you that Mr. Henry Phillips has, agreeably with his own wish, concluded his arrangement with us. He will, therefore, from now cease to represent our firm.—WESTS, JONES AND CO., 16, St. Thomas's Street, Borough, London, S.E., September 15th.

The American Crop.

The following is an extract from an article which appeared in the *American Agriculturist*, August 30th:—

"There has been a considerable reduction in acreage in this country, somewhat slight on the Pacific coast, but estimated as high as 20 per cent. over last year in New York State. In that section conservative growers estimate that it costs 10c. per lb. to produce hops, and the average price received by growers last year for their crop did not equal this in many of the hop producing centres. In consequence, many of the yards were ploughed up or neglected. The decrease in acreage on the Pacific coast is probably about 10 per cent. A conservative estimate of the 1900 crop of the U.S. would be not over 200,000 bales, or 40,000 short of last year.

"Added to the smaller acreage, a somewhat lighter yield is indicated on the remaining acres. While the weather conditions have been favourable for splendid quality and good growth, the fact that the vines bore a very heavy crop last year so exhausted them that they are not in any condition to repeat it again. This accounts for the lighter average yield in face of favourable weather conditions.

"There has been but little lice, blight, or mould, and the quality of the crop bids fair to be good. Of course, this can yet be spoiled by rainy weather during the next two weeks while picking is in progress; still, a large part of the early hops are already picked.

The surplus of the phenomenal yields of 1893, 1894, and 1895 was used up a year ago by brewers, and helped out the crop of 1896 and 1898. That left but few old hops in the market when the crop of 1899 came in, which was just about enough to supply current needs. Early returns indicated a light crop, and brewers and dealers were active buyers of all old hops offered, so that the price has advanced 1c. to 2c. in the past month with very light offerings. Reports from our correspondents in all towns of the hop counties indicate very few bales of the 1899 crops in growers' hands, and none of previous crops. No returns are higher than 5 per cent., and in many towns there is not a bale to be found.

"Every indication, therefore, points to an active demand for the new crop. Brewers' stocks are low, and they have not been able to lay up a surplus because there were none to buy. Brewers must, therefore, soon become active buyers of new hops to supply present and future needs. Dealers in the hop producing sections of N.Y. have been offering 12c. to 15c. on contract and as high as 17c. in places. On the Pacific coast they have been trying to contract at 10c. to 12c., and have been successful in securing a large part of the crop in California. It is reported that not over 3,500 bales of the 12,500 estimated for the Sonoma crop are not under contract, while only 4,000 bales are available in the Russian river section, and but two growers in Yolo County have not contracted.

"Growers are inclined to hold in N.Y., Oregon, and Washington until they get a clearer idea of the prospective crop."

Foreign Notes.

Nuremberg.

The business in new hops is extremely active, and the opening prices are distinctly in favour of growers. A few days ago quite a feverish excitement set in, but the trade has since settled down to greater steadiness, as supplies come to work more freely. Hallertau hops, being in good dry condition, are in demand at very firm prices, and the growths of middle Franconia find great favour, and are eagerly bought up, though they do not arrive as dry as they should be. Wurtembergs also have been sold in some quantity at full rates, which are gradually hardening. The arrivals by road and rail amounted to about 4,600 bales last week, the total sales being about equal to the supply. Naturally buyers are at present most interested in the choicest samples, but all grades are being dealt in, demonstrating that the stocks in the hands of consumers are not large, and that higher values may be expected in the near future.

The Most Recent Quotations

for best qualities are given as follows: Market hops, 105s. to 112s.; sealed Hallertaus, 120s. to 126s.; Wurtembergs, 120s. to 130s.; Spattland, 130s. to 140s.; Badens, 120s. to 125s.; these being first cost prices, which are considerably enhanced by the time the hops are baled, in consequence of the exceptional loss from evaporation or moisture during the final drying process.

The Gathering of the Crop

is being rapidly proceeded with, and the experience of planters thus far shows that in many districts the yield is not equal to previous estimates, although the quality and colour are generally satisfactory. In Gustenstetten, Wolnzach, Baden, and several other localities it is now certain that the yield will be at least one-third less than last year, and these pickings will therefore soon be completed. The Saaz crop is expected to be one fourth in excess of last season, and a similar result is expected in Neutomischel (Prussia).

The Ministry of Agriculture at Vienna reports that in Upper Austria the hops have fairly recovered from the checks they received during the unfavorable weather in the early part of the season, and are now well developed and sound. In Styria, the hot weather of the last three weeks has somewhat improved the prospect, and early pickings yielded well, both in quality and quantity, but the later sorts will only be an average crop, though quality will be good. The Bohemian plantations suffered much from drought, and the plants did not bloom so well as in former years. A moderate crop will therefore result The Moravian outlook has improved with more genial weather, and the cones have developed better than was expected, but the crop will be at least one-third less than last year. In Galicia the condition has not at all advanced, and a very small crop will be gathered in many districts. The Austrian yield, taken as a whole, will come down considerably short of last season.

The Russian crop is expected to be fairly satisfactory. From Kieff, Wolhynia, it is reported that the plants are generally in good condition. They are rather backward in the Dubno district, but the foliage is healthy and free from vermin. The area under hops has been enlarged since last year, and a better yield is expected.

Belgium.

The position of the speculative market has been rather pitier this week. On Wednesday, Aalst 8 marks 1900 crop were on offer on the Brussels Bourse at 85 francs, but buyers were unwilling to operate at more than 82½ francs. Poperinghe hops were dealt with at 90 francs, and dealers are quoting to brewers both Poperinghes and Alosts at 95 to 100 francs, with still higher prices for exceptional qualities. The attitude of growers remains firm; they manifest very little disposition to sell, except at higher prices than can be obtained at present. Picking is proceeding satisfactorily, being hastened by favourable weather, and in Poperinghe two-thirds of the harvest has already come down. The yield thus far does not give any promise of increase upon previous estimates, and it may now safely be accepted that the total growth will only amount to a small half of last year's crop.

Burgundy.

The shortage that has been frequently predicted is confirmed by the picking now in progress, which is finished in the neighbourhood of Dijon. The weather having been very suitable for the ultimate development of the cones, and their gathering, the quality on the whole will be exceptionally good, but the quantity will hardly reach the half of the 1899 crop, that being only a moderate one. Dealers are offering 100 to 110 francs for growers' samples at least 12s and are disappointed because before the Dijon fair, which takes place September 30th.

America.

Brewers are actively buying all the yearling hops they can find on the New York Market and have sent orders to the Pacific Coast, with the result that [illegible] bales have been secured. The market therefore holds a very firm position, and the [illegible] an upward movement of prices [illegible] market every week.

Reports from the Yards

[illegible]

I have received a letter from Mr. J. T. Gear, of Puyaleup, dated August 30th, in which he says that he [illegible] that county, that the crops in the [illegible] and with [illegible] prospect the hops will be [illegible] that has been known for years. The [illegible] favourable and would [illegible] about five years ago. But the yield will not be heavy, and growers are [illegible] to [illegible] fully one-half [illegible] picking. Many [illegible] nothing [illegible] to contract, though planters are not at all anxious to close with them, as there is a general opinion that higher prices are before them.

For Hop Market Reports, see page

SHOWS.

Yeovil.

The committee of the Yeovil Agricultural Society have cause to congratulate themselves on the result of Thursday's show at Yeovil. The quality of the stock was a great improvement on previous years, and the weather being beautifully fine the [illegible] ance of visitors was most satisfactory; in fact, the show was a success all round. With regard to the cattle, there was a very good lot in the Shorthorn bull class, and some fairly useful animals were seen in the class for bulls under two years. The dairy cows were a fair lot, and the heifers were very good. Of the sheep the judges spoke very highly; considering the drought, they were agreeably surprised. The improvement was [illegible]able, perhaps, to the new policy of classifying the breed. The Dorset sheep were very strong, and the fat sheep were also of good quality and condition, giving the judges considerable trouble. The agricultural horses were a good feature of the show. In the cart stallion class the first prize went to a big brown horse with plenty of weight and bone, and the second to a promising three-year-old likely to develop into a capital horse, but lacking feather. Brood mares were a good class, and there was little difference between first and second. Foals were tolerably good. Class 24, cart geldings or fillies, was the best, including several horses fit for the Bath and West or Royal Shows. There were four useful colts among the yearlings, and a promising animal, belonging to Mr. W. W. Tilley, of Huntspill, Bridgwater, took first prize. Hunters, hacks, driving horses, and ponies furnished a keen competition, producing some very satisfactory entries. The cheese was also worthy of the show. In Class 59, for four cheeses of not less than 56lb., the quality was high and the competition close. There was a great improvement on last year in the local classes; though there were a few inferior exhibits, the standard on the whole was good.

Prize List.

CATTLE

[illegible]

North Coker; 2, T. C. Candy, Cattistock; r, Wardlaw Bros.

[illegible]

Bull, under two years old, any breed: 1, G. Troyte Chafyn-[illegible]; 2, [illegible]

[illegible]

Mullins, Ansford; 2, John Day, Huxham; r, G. Troyte [illegible]

three years old: 1, J. Day, Huxton; 2, A. J. Mullins; r, [illegible]

O. N. Holt-Needham; 2, A. J. Mullins; r, J. Arthur, Sutton [illegible]

1, G. Troyte Chafyn-Grove; r, A. J. Rowles, Broadstone.

[illegible]

Fat ox or steer: 1, J. D. Allen, West Pennard; 2, F. Miles, [illegible]

[illegible]

Ten fat sheep: 1, S. Y. Brake, Limington; 2, W. P. [illegible]

[illegible]

[illegible] Mr. Joseph [illegible]

Pen of thirty Somerset or Dorset horn stock ewes, ten of each age, two, four, and six teeth: 1 and 2, J. H. Creed; r, G. D. Templeman, Haselbury.

Pen of thirty Down stock ewes, ten of each age, two, four, and six teeth: 1, J. Brain, Corton Denham; 2, E. Hodder, Odcombe; r, H. Dampney.

Pair of Somerset or Dorset horn ram lambs, not exceeding twelve months old: 1 and 2, G. D. Templeman.

Pair Down ram lambs, not exceeding twelve months old: 1, H. Dampney.

Pen of Somerset or Dorset horn chilver lambs, not less than thirty in number, and not exceeding twelve months old: 1, G. D. Templeman; 2, G. Troyte Chafyn-Grove; r, J. H. Creed.

Pen of Down chilver lambs, not less than thirty in number, and not exceeding twelve months old: 1, H. Francis, Sherborne; 2, H. Dampney; r, J. Brain, Sherborne.

HORSES.

AGRICULTURAL.

Cart stallion for agricultural purposes: 1, J. Bucknell, Cannington; 2, Trott and Thomas, Axminster; r, J. Bucknell.

Cart mare, with foal at foot, the property of a resident within fifteen miles of Yeovil Town Hall: 1, J. Chick, Compton Vallence; 2, C. M. Moody, Evercreech; r, G. W. Moody, Martock; hc, A. Compton, Beaminster.

Cart colt, not exceeding one year old, by Scropton Harold (Shire Horse Society, 15,829), the property of Colonel Goodden, Compton House, Sherborne: 1, R. J. Conway, Sherborne; 2, S. G. Bartlett, West Coker; r, H. Dampney.

Cart gelding or filly, foaled after 1st January, 1898: 1, H. M. Webber, Puxton; 2, H. Chambers, Othery; r, F. W. Parsons, Speckington; hc, F. Gent, Burrowbridge; c, F. B. Rowsell, Stoke St. George.

Cart yearling colt or filly, sired by either of the horses of Mr. James Bucknell, of Cannington, Bridgwater: 1, W. W. Tilley, Bridgwater; 2, W. H. Munckton, Bineham; r, W. Tucker, Chedzoy.

Two-year-old cart gelding or filly, sired by either of the horses of Mr. James Bucknell, of Cannington, Bridgwater: 1, H. Chambers; 2, F. Gent, Harrowbridge; r, J. D. Allen, West Pennard.

Pair of cart horses, to be shown in harness, the property of a resident within fifteen miles of Yeovil Town Hall: 1, F. C. Parsons, Speckington; 2, S. and A. Hiscock, West Stour and Motcombe; hc, G. W. Moody, Stapleton.

HUNTERS.

Brood mare, with foal at foot, calculated for the purpose of breeding hunters: 1 and hc, T. H. Miller, Oborne; 2, C. Wakely, Axminster; r, J. Sawtell, Yeovil.

Colt, sired by Colney Confidence (Hackney Stud Book, No. 2,410), the property of Mr. S. A. Hiscock, of North Hayes Stud Farm, Motcombe: 1, E. A. Vigar, Chilthorne; 2, S. G. Bartlett, West Coker.

Weight-carrying hunter, gelding, or mare, not having won a prize exceeding £10 previous to last day of entry: 1, T. H. Vinnicombe, Weymouth; 2, N. McLean, Sherborne; r, Sir H. A. Hoare, Bart., Stourhead; hc, E. Bown, Sherborne; c, H. Gilham, Taunton; c, J. P. Heath, Exeter.

Weight-carrying hunter, not having won a prize exceeding £10 previous to last day of entry, the property of a resident within a radius of fifteen miles of Yeovil Town Hall: 1, N. McLean; 2, E. Bown; r, R. Shingleton, Henstridge; hc, C. A. Moody, W. H. Munckton, Long Sutton.

Light-weight hunter: 1, E. Bown; 2, A. T. Drake, Sherborne.

Light-weight hunter, not having won a prize exceeding £10 previous to last day of entry, the property of a resident within fifteen miles of Yeovil Town Hall: 1, E. Bown; 2, A. T. Drake; r, Miss Ethel Palmer, Bower Hinton; hc, T. S. Cable, Evershot; Cuff Bros., Burton Pynsent; W. Corry, Over Compton; J. W. Munckton.

Special open prizes for three-year-old hunter: 1, C. and G. W. Moody, Stapleton; 2 and r, E. R. Bartlett and Son.

HACKS, HARNESS HORSES.

Hack or roadster, gelding or mare, not having won a prize exceeding £5 previous to last day of entry: 1, G. Finch, Exeter; 2, J. Brockway, West Stour; r, Dr. White, Milborne Port.

Hack or roadster, gelding or mare, not less than 15 hands high, the property of a resident within a radius of fifteen miles of Yeovil Town Hall: 1, T. S. Cable, Evershot; 2, Miss Ethel Palmer; r, Dr. Colmer, Yeovil.

Fencer, gelding, or mare, any height: 1, R. Tugwell, Tetbury; 2, F. England, Shepton Beauchamp.

Fencer, any height, the property of a resident within fifteen miles of Yeovil Town Hall: 1 and 2, England Bros., Shepton Beauchamp.

Cob, gelding, or mare, under 15 hands high, the property of a resident within a radius of fifteen miles of Yeovil Town Hall: 1, W. Corry, Over Compton; 2, J. G. Holt, North Cadbury; r, E. B. Savile, Chard.

Harness horse, gelding or mare, to be shown and driven in harness: 1, S. R. Selman, Clifton; 2, W. H. Burston, Taunton; r, W. J. Peake-Mason, Sherborne; hc, C. Wakely, Kilmington; hc, J. G. Holt, North Cadbury.

Harness horse, gelding, or mare, to be shown and driven in harness, exceeding 13.2 hands and not exceeding 15 hands high, the property of a resident within a radius of fifteen miles of Yeovil Town Hall: 1, J. G. Holt; 2, W. Corry; r, E. B. Savile.

Tandem, to be driven: 1, S. R. Selman; 2, Lock and Porter, Lopen.

Pony, driven in harness, not exceeding 13.2 hands high, the property of a resident within a radius of fifteen miles of Yeovil Town Hall: 1, B. J. Lock, Lopen; 2, C. Porter, South Petherton; 3, J. J. Brook, Yeovil; r, Mrs. Leach, Yeovil; hc, J. Warr, Alvington.

CHEESE.

Four cheeses of not less than 56lb. each, any system or make, open to the counties of Somerset, Gloucester, Wilts, and Dorset: 1, A. Osborne, Mappowder, Blandford; 2, H. White, Piddletown; 3, H. J. Weeden, Blandford; 4, E. C. Sims, Mere; 5, F. and M. Portch, North Cadbury; 6, R. and C. Tucker, Trowbridge; 7, H. G. Ashman, Shepton Mallet; vhc, H. Watts, Bath; F. W. J. Crocker, Cattistock; hc, S. Burch, Blandford; T. C. Candy, Cattistock; W. Farthing, Tintinhull; c, O. N. Holt-Needham; C. Collins, Frome; E. Pearce, Yeovil.

Four cheeses of not less than 28lb. or more than 56lb. each, any system or make, open to the counties of Somerset, Gloucester, Wilts, and Dorset: 1, T. C. Candy; 2, H. Hoddinott, Sherborne; 3, W. C. Spencer, Yeovil; hc, W. Farthing, Tintinhull; c, H. White, Piddletown; E. Pearce.

Three cheeses of not less than 28lb. each, for exhibitors (being the renter or owner of dairy) living within a radius of ten miles of Yeovil, and not having taken a prize over £5: 1, — Collins, Yeovil; 2, A. White, South Petherton; 3, E. White, Yeovil; c, T. Crabb, Sherborne.

Six cheeses of not less than 10lb. or more than 20lb. each, known as Cheddar make, open to Somerset, Gloucester, Wilts, and Dorset: 1, W. W. Keel, Bristol; 2, H. J. Weeden, Blandford; 3, W. Butler, Bruton; hc, H. White, Piddletown; c, E. C. Sims, Mere.

Three cheeses of not less than 28lb. each, or eight loaf cheeses: 1, J. Brunt, Cerne; 2, H. Cannon, Evercreech; hc, G. Lester, Martock.

Four cheeses, any make or size, made with Hanson's rennet: 1, H. D. Moorse, Wincanton; 2, T. C. Candy.

Three cheeses, any size over 40lb. each, or eight truckles under 14lb. each: 1, A. Gould, East Chinnock.

Six cheeses, known as Dorset blue: 1, Joel Trott, Weymouth; 2, E. A. Diment, Dorchester; r, R. Walden, Beaminster.

Chipping Norton.

The inhabitants of Chipping Norton gave a very hearty and hospitable welcome to the Stow, Chipping Norton, Moreton, and Northleach Agricultural Society on Wednesday. The show is held annually in rotation at the places named, so that it is four years since it was held at Chipping Norton, and on all hands could be heard expressions of gratification at the progress which had been made during these years. Charming weather favoured yesterday's meeting, and the attendance was much larger than upon any previous occasion. The society is one of the oldest in the neighbourhood, but never was it in a more prosperous condition than it is to-day. Mr. Albert Brassey, M.P., M.F.H., is the President, and he visited the show, being accompanied by the Hon. Mrs. Albert Brassey and the Misses Brassey. There was a grand show of cattle, the Earl of Coventry carrying off premier honours for two-year-old bulls with a fine Hereford, which won the champion prize of a silver medal given by the proprietors of the *Oxford Journal*. Mr. John A. Bloss was to the front in the class for young bulls amongst exhibits which had much to recommend them all round. Mr. C. E. Baring Young was first in the class for breeding cows—a class in which some excellent breeders were shown, and Mr. R. Singer was first in the next class, for heifers two years and upwards, which had not a great deal to recommend them. In the young heifer class the winner, the property of Mr. George Freeman, was an animal of superior merit, but Mr. John A. Bloss' animal ran him a good second. The animals in the class for pairs of Shorthorn or Hereford cows showed a good supply of milk, but there was only a poor entry. In the sheep classes there was only one entry for Cotswolds. The ten sheep shown in the first class (for ten breeding ewes) were grand speciments of the breed, and it seemed a pity that such a valuable lot should not have been better represented, as they were formerly the breed of the district, but they have now gone out of fashion, the Oxford Downs taking their place. The latter breed were shown in great force, and were very good, especially from the district where the Heythrop flock is well known. Mr. W. A. Treweeke, of Ryne Hill, Chipping Norton, was the winner of the first prizes in all three classes. The Hampshires were not so well represented, but some good animals were shown. The agricultural horses were in every way excellent—quite superior to what were shown at Chipping Norton four years ago, and the judges asked the stewards to give extra prizes in several classes, the animals shown being of such high merit. The show all round, in this department, was also superior to that held at Stow-on-the-Wold last year. All the classes contained some very useful animals, which would have done credit to their owners anywhere. There were five classes for Hackneys and hunters, and the competition in each was good. The jumping competitions were, as usual, a great attraction, and occupied most of the time after luncheon.

Prize List.

CATTLE.

Bull, of any breed, exceeding two years old: 1, The Earl of Coventry, Croome Court, Worcester; 2, C. E. Baring Young, Daylesford; r, Thomas Walker, Burford.

Bull, of any breed, under two years old: 1, John A. Bloss, Bourton-on-the-Water; 2, Robert Singer, Northleach; r, Fredk. E. Bee, Bourton-on-the-Water.

Breeding cow, of any breed, and being in calf or in actual milk on the day of exhibition: 1 and 2, C. E. Baring Young; r, W. H. Tremaine, Sherborne.

Heifer, above two and not three years old, being in calf or in actual milk on the day of exhibition: 1, Robert Singer, Sherborne; 2, John A. Bloss; r, John Wilkes, Honington.

Heifer, under two years old: 1, George Freeman, Sherborne; 2, John A. Bloss; r, W. H. Tremaine.

Pair of Shorthorn or Hereford cows, in actual milk on the day of exhibition: 1, Thomas Walker, Burford; 2, Thomas H. Powell, Churchill; r, John Wilkes.

Silver medal (given by the proprietors of the "Oxford Journal"), for the best horned animal in the show: The Earl of Coventry.

SHEEP.

LONGWOOLS.

Ten breeding ewes, each to have brought up a lamb this season: 1, Thomas Walker.

Ten breeding theaves: 1, Thomas Walker.

Ten ewe lambs: 1, Thomas Walker.

OXFORDSHIRE DOWNS.

Ten breeding ewes, each to have brought up a lamb this season: 1, W. A. Trewecke; 2, Frederick Penson, Charlbury; r, Mrs. Margaret A. Witts, Stow-on-the-Wold.

Ten breeding theaves: 1, W. A. Trewecke; r, Frederick Penson.

Ten ewe lambs: 1, W. A. Trewecke; 2, Mrs. Margaret A. Witts.

HAMPSHIRE DOWNS AND OTHER SHORTWOOLS.

Ten breeding ewes, each to have brought up a lamb this season: 1, John H. Gregory, Dunthrop; r, H. Sydney Waller, Farmington.

Ten breeding theaves: 1, H. Sydney Waller.

Ten ewe lambs: 1, John Gregory.

Premium, the gift of Messrs. Acock and Taylor, for the best pen of theaves in the show: 1, W. A. Treweeke.

PIGS.

Breeding sow, of any age, with a litter of pigs (her own offspring), under three months old: 1, Miss Audrey Reid, Shipton-under-Wychwood.

AGRICULTURAL HORSES.

Draught stallion, under eight years old, that has served mares within six miles of Stow-on-the-Wold, Chipping Norton, Moreton-in-the-Marsh, or Northleach during the last season: 1, Chellington Shire Horse Society; 2, James S. Wilkes, Tredington, Shipston-on-Stour; r, William E. Mayo, Shipston-on-Stour.

Mare for agricultural purposes, and foal (her own offspring): 1 and 2, William Lidsey, Lemington; 3 and r, the Misses F. and H. E. Bull, Great Wolford.

Cart gelding or filly, two years old: 1, Walter Bury, Hook Norton; 2, Misses F. and H. E. Bull; 3, Urban Rose, Churchill; r, Arthur W. Ashton, Newbold-on-Stour.

Sucking colt by any horse belonging to the Chadlington Shire Horse Co., Ltd.: 1, for colt, Viscount Dillon; 2, for filly, Joseph Hughes, Great Rollright; r, Williams and Son and C. E. Baring Young.

Yearling cart colt or filly: 1, Arthur W. Ashton; 2, The Hon. R. Hardinge, Burford; r, J. S. P. Camden, Moreton-in-Marsh.

HACKNEYS AND HUNTERS.

Hackney, under seven years old, not exceeding 15.1 hands, and capable of carrying 14 stone: 1, F. Baguley, Moreton-in-Marsh; 2, Charles Williams, Little Rollright; 3, John Wilkes; r, Wcolliams Brothers, Addlestrop.

Cob or pony, under seven years old, and not exceeding 14.1 hands: 1, G. A. G. Lousada, Shipston-under-Wychwood; 2, John Wilkes; r, W. H. Hawker, Chipping Norton Junction.

To the exhibitor, being a bona-fide tenant farmer, a member of the association, of the best horse or filly, not exceeding five years old, possession the qualities of a hunter: 1, W. J. Rogers; 2, W. H. Hawker; r, James S. Wilkes.

Weight-carrying hunter, under seven years old, the property of a tenant farmer or his son, residing within twelve miles of Stow-on-the-Wold, Chipping Norton, Moreton-in-Marsh, or Northleach, and ridden last season with the Heythrop, Cotswold, North Cotswold, Warwickshire, or Earl Bathurst's Hounds, and capable of carrying 14 stone: 1 and 2, W. H. Hawker; r, Thomas Walker.

Mare for hunting purposes, and foal (her own offspring) by a thorough-bred stallion: 1, Albert Brassey; 2, W. C. Jeffries; r, James S. Wilkes.

Gold medal (given by the "Oxford Times" Company, Ltd.), for the best hackney or hunter in the show: Captain D. St. G. Daly.

DRIVING.

Horse, 15 hands or over in height, to be driven in any two-wheel vehicle: 1, F. Baguley; 2, Woolliams Brothers.

Horse under 15 hands in height, to be driven in any two-wheel vehicle: 1, F. Baguley; 2, Woolliams Brothers; 3, H. W. Stacey Alcock; r, John Wilkes.

JUMPING.

Jumper, 15 hands or over in height: 1 and r, Captain D. St. G. Daly; 2, John Wilks.

Jumper, under 15 hands in height: 1, B. Sims, Cheltenham; 2, A. A. Stokey; r, F. Guppy, Todenham.

Jumper of any height: 1, B. Sims; 2, James S. Wilkes; 3, John Wilks.

Brough.

The twenty-fifth annual show of the Borough (Westmorland) Agricultural Society was held on Thursday. The entries showed an increase on last year, the total being 555, as against 526, whilst the quality, too, was an improvement. Glorious weather prevailed, and a large company witnessed the judging, the visitors including Sir Joseph Savory, M.P., and Lady Savory, and Mr. R. Rigg, president of the Society and Liberal candidate for North Westmorland. The judges were:—Cattle and pigs: Mr. W. Powney, Shap; Mr. A. Cleasby, Sedbergh, R.S.O. Heavy horses: Mr. T. Dawson, Gainford. Light horses: Mr. Threlkeld, Kirkoswald. Sheep: Mr. R. Thornborrow, Swaledale; Mr. G. Brown, Stotley Hall; and Mr. J. Wills, Appleby. The principal awards were:—

Prize List.

CATTLE.

Bull, two years old and above: 1, W. Dent and Son, Kaber Fold; 2, A. Burnes, Bank End. Bull, above one and under two years old: J. W. Pickering, Kaber. Bull calf, under twelve months old: 1, M. Alderson, New Hall; 2, J. Close, Winton. Cow in milk or calf: 1, C. Barker, Kirkby Stephen; 2, A. Burns, Bank End. Two-year-old heifer: 1, T. Cleasby; 2, J. Close. One-year-old heifer: 1, J. Close; 2, T. Furness, Bontage Moor. Champion bull: W. Dent and Son. Champion beast: W. Dent and Son.

HORSES.

AGRICULTURAL PURPOSES.

Brood mare, with foal at foot: 1, J. Coward, Winton; 2, W. Burton. Three-year-old gelding or filly: 1, W. Burton; 2, A. Burnes, Bank End. Two-year-old gelding or filly: 1, W. Dalton, Sandford; 2, J. Taylor, Syke Side. One-year-old gelding or filly: 1, J. E. Bailey, Tofte; 2, Messrs. Hutchinson. Foal: 1, J. Allinson, Musgrave; 2, R. Wharton, Flitholme. Farmer's turn-out: J. Coward. Horse or mare, for agricultural purposes, not exceeding 15.2 hands, three years old or upwards: 1, N. Bousfield, Duckin' Tree; 2, J. Allinson. Pair of draught horses, used in husbandry, three years and upwards: 1, W. Burton; 2, A. Burnes.

FIELD, ROAD, OR HARNESS.

Brood mare, with foal at foot: 1, P. W. Rudd, Broomrigg; 2, G. Metcalfe, Little Musgrave. Three-year-old gelding or filly: 1, T. H. Spooner, Warcop; 2, J. Patterson. Two-year-old gelding or filly: 1, J. Dixon, Riddlesay; 2, J. and J. Rudd, Row End, Soulby. One-year-old gelding or filly: 1, Major Brecks, Helbeck Hall; 2, Mrs. Dixon, King's Head, Kirkby Stephen. Foal: 1, Mrs. Dixon; 2, J. W. Harrison, Blandswath.

DALES PONIES.

Brood mare, with foal at foot, not to exceed 14.2 hands: 1, J. Coward; 2, P. W. Rudd. Two-year-old gelding or filly, dam not to exceed 14.2 hands: 1, J. Taylor; 2, W. Burton. One-year-old gelding or filly, dam not to exceed 14.2 hands: 1, J. M. Bainbridge, Belah; 2, J. Hastwell, Sandwath. Foal, dam not to exceed 14.2 hands: 1, J. Coward; 2, R. Metcalfe, Musgrave. Brood mare, not exceeding 13.2 hands, with foal at foot: 1, T. Tunstall; 2, R. W. Lambert, Burtergill. Two-year-old gelding or filly, dam not to exceed 13.2 hands: 1, J. Dent; 2, R. W. Lambert. One-year-old gelding or filly, dam not to exceed 13.2 hands: 1, T. Tunstall, Hag Gap; 2, Mrs. Binks, Field Head. Pony foal, dam not to exceed 13.2 hands: 1, R. W. Lambert; 2, J. Dent.

SHEEP.

Aged Blue-faced tup: 1, Messrs. Hutchison; 2, J. Coward. Shearling Blue-faced tup: 1, Messrs. Hutchison; 2, T. Bainbridge, Brough Castle. Two Blue-faced ewes: 1, H. and J. Abram, Bleau; 2, J. Coward. Two Blue-faced shearlings: 1, H. and J. Abram; 2, T. Bainbridge. Collection: 1, H. and J. Abram; 2, T. Bainbridge. Two half-bred ewes: 1, Messrs. Hutchison; 2, J. W. Pickering. Two half-bred gimmer shearlings: 1, W. E. Thwaites, Espland; 2, Messrs. Hutchison. Aged tup: 1, D. Closey, Hoggrounds; 2, J. Head, High Spout. Shearling tup: 1, A. and J. Sowerby, Swindle Head; 2, D. Closey. Three ewes: 1, G. Alderson, Barras; 2, J. Head. Three gimmer shearlings: 1, G. and J. Alderson, Oak Bank; 2, G. Alderson, Barras. Gimmer lambs: 1, G. Alderson; 2, J. Head. Aged tup (any breed): 1, W. E. Thwaites; 2, J. Salkeld. Shearling tup: 1, W. E. Thwaites; 2, J. Salkeld. Three Black-faced ewes: 1, W. E. Thwaites; 2, J. Salkeld. Three gimmer shearlings: 1, W. E. Thwaites; 2, J. Salkeld.

[Other shows will be found on pp. 377-382.]

FARM PROSPECTS.

Aberdeenshire.

In Aberdeenshire grain crops are ripe and ready to be cut down, but unfortunately the weather is far from what is required for harvesting operations. In the earlier portions of the county cutting is pretty well advanced, but in the later portions a commencement has only been made, and the meteorological conditions at present do not indicate a cheerful time to the farmers. So far as I have seen the crops in stook

Do not Promise the Bulk

that was anticipated before cutting. Owing to the continuous downpours of rain during the past ten weeks, turnips have naturally suffered severely. Except upon dry land with an open bottom to allow the superabundance of moisture to escape, roots will generally be a light and unsatisfactory crop. Upon stiff and retentive soils the crop will be remarkably poor indeed, and farmers having these poor crops will require to economise their supply of roots to stock. As a consequence of the bad prospect of the root crop,

The Value of Store Cattle

has been falling of late, and it may naturally be expected that a further fall in value may result. Potatoes, which until lately generally looked well, have begun to manifest signs of disease, and I hear of numerous complaints of the tubers being badly spoiled and the disease making rapid progress.

Lamb Sales

are now in full swing, and as the price of mutton is better than last year, and plenty of foggage in the fields, trade has during the past two weeks become more cheerful and prices have advanced a little; especially has the rise been noticeable in the price of cross lambs. Half-bred lambs started at the beginning of the trade with more life, hence the advance in that class has not been correspondingly great. J. B. (September 11th).

Cornwall.

Those who have not carried all their corn—and there are still a few lots about—have the benefit of ideal weather for conditioning it. Much disappointment is expressed at the wheat crop, and

On all Sides are Complaints

of bad samples and unsatisfactory yields. Before harvest wheat was generally thought to have been over average, and there was little complaint as to the prospects. Barley and oats are much more encouraging in sample and quantity, but prices remain at a low level—5s. to 5s. 6d. for 114lbs. of oats is a poor return for the expenses of cultivation. Grass is plentiful, and the

Root Crops

are generally all that can be desired. Mangolds are looking particularly healthy. One of the finest sales of stock which has been held in the county for many years has taken place during the last week, and is that of Mr. Richard Olver, of Trescowe. Mr. Olver has for many years devoted great attention to the breeding and care of his stock. It is almost invidious to individualise where there was so much to admire, but one farmer was heard to remark that the pigs were the finest lot he had ever seen.—G. G. B. (Sept. 15th).

Gloucester.

The season up to now has been "in my opinion" a productive one all round, and stock of all kinds have done well. Prices have also been a fair average. I have seen more grass in the pastures at this time of the year, and a lot less. Hay was a bulky crop, and well secured.

The Prices of Milk

to the farmer are still too low, considering what consumers have to pay for it. Corn is variable this year, as are also roots. The labour difficulty has been a real one, and wages have risen about 1s. per week. If machinery were not in extensive use I don't know what farmers would do, as with increased wages men are more independent and do less for it. Fruit of all kinds is plentiful, but of little value.—J. W. (September 10th).

Herefordshire.

We have had rather a long harvest owing to wet days and the very rough weather in August blowing the crops about, making them very bad to cut; but very little of the corn was damaged. The wheat crop is decidedly a light one, certainly not more than three-quarters of last year's crop. Barley is the best crop, and is a good average. Oats, beans, and peas cut up lighter than they looked standing, and are barely an average. Potatoes, not many grown for sale, and not a heavy crop. Grass and roots have very much improved, and we have

A Much Better Prospect

of getting through the winter with our stock than last year. Apples are nothing like the heavy crop they were last year, but, with so much cider left, will be quite enough. The hops are bad generally; many yards will not be worth picking. Taking our county through, I think we shall not get more than about 60 per cent. of an average crop, but in the good yards they have grown out well, and should be very good quality. Store stock of all kinds are selling at fair prices; beef is making from 6d. to 7d., and mutton 6d. to 8d. per lb. Good cart horses are making big prices. Labour is rather more plentiful than it was in the spring.—D. E. (September 13th).

Northampton.

Harvest is now completely finished in the district around Kettering, and there is no doubt but that here it is one of the worst we have had for many years. Not one single grain crop will be nearly an average either in quantity or quality. Threshing proves this. Wheat will hardly average 32s. per acre less in many places. Barley not much more, whilst not one good-quality sample has been shown. Oats are the worst crop of all, and many fields will

Not Yield the Amount of Seed Sown.

The same remark applies to spring beans. Winter beans, though better, are not an average. Mangolds good everywhere; kohl rabi and turnips fairly so, but only in places. Young clovers are good and grass plentiful. The cold nights and burning sun by day will, however, check their growth, unless there is a change in the weather shortly. So far, stock have done well. Beef and mutton selling well where farmers have anything fit for the butcher. As for the price of corn, it is, as usual, disappointing, and with such a diminished yield our prospects are not promising, and the good time for farmers seems to be as far off as ever. (September 13th.)

Somerset.

At the time of writing the weather is very fine, and looks settled for a spell of fine weather. The corn harvest is finished, and is put together in fairly good condition, but it is not a good crop, and the straw is very short. Wheat is under average; oats are a poor crop—in fact, I have not seen a good piece of oats this season. Young clovers are a good plant, and looking well. Mangolds, as a rule, are a good crop. Swedes are late, and will not be a heavy crop, and finger-and-toe has made its appearance in several pieces. Potatoes were a fair crop, but since the last rains the

Disease has made its Appearance,

and I hear in some cases half the tubers are diseased, so I fear the main crop will be a disappointing one. Cider apples are very plentiful, and cider will be cheap this winter. Keep is plentiful, and as hay was a good crop, and generally well made, there is a good prospect for winter keep. Cattle and sheep are doing well, and making fair prices, except ewe mutton, which is a poor trade. Dairy cows have done well, and given a fair quantity of milk, and a fair quantity of cheese has been made through the summer, but this, I hear, is not selling well at present; but, as so many are selling milk instead of making cheese, I think prices must improve again shortly.—E. D. (September 13th).

Vale of Glamorgan.

The harvest in this part of the county is now practically finished. This beautiful autumn weather has enabled farmers to gather what second crops they had. Crops have been fairly good, taking them all round; but a great drawback for those farmers facing the Bristol Channel was the storms from the 12th of August to the 18th. The losses must have been very serious; on some farms the shedding was so bad that you could not put a stock on the ground without touching barley that shed. Following that we have had excellent weather, and what we may now consider a good wind up. As to harvesting, the

Yield is not Equal to Last Year,

especially with the barley, nor has the hay crop been so heavy. Roots are certainly looking well, but the unfortunate part of it is that there is a great scarcity of sheep, as a good many large breeders sold early last year, owing to the scarcity of roots. The aftermath is now growing apace. The great difficulty in this part has been the scarcity of labour. This has for many years been a great problem in this part of the county, owing to proximity to great ironworks and coalfields. Consequently, every farmer or nearly so—had to fall back on binders and other labour-saving machines. The sowing of mustard is good. Sowing of winter tares is now going on, with every preparation for sowing wheat, as we have had occasional rains, which have done much good.—E. J. (September 13th).

Foreign Prospects.

FRANCE.—Weather conditions have permitted the steady prosecution of ploughing and sowing, and considerable progress has been made in these matters. Opinions respecting the wheat crop are still conflicting, the *Echo Agricole* adhering to the estimate of 100 million hectols., say, 71,100,000qrs; the grain is said to be mostly of excellent quality. Oats have proved rather a poor crop. Barley generally is of good quality.

GERMANY.—The return of fine weather has reduced complaints respecting the potato crop, and farmers are busy preparing for autumn cereal sowings.

RUSSIA.—Recently the mean temperature has been considerably under the normal range, and, in some localities in the Eastern governments frost is reported. The rainfall in the South and Centre of the Empire did not reach the normal quantity; but in the North, West, and East the fall was in excess of the average.

UNITED STATES.—The *Cincinnati Price Current* says recent weather has been maturing maize favourably, and an early crop somewhat exceeding 2,000,000,000 bushels is likely. Wheat is being fed more freely, except where the quality is imparted. *Bradstreet*

THE WEATHER.

MONDAY September 10th.—The barometer was rising all over the kingdom, another anti-cyclone was steadily marching in upon us from the Atlantic, and throughout the day continued to increase in intensity. As a result of this alteration, the winds drew to the northward of west generally, and in the north of Scotland blew very briskly, but elsewhere they had very little strength. With the spread of the anti-cyclone the rain showers were passing away, and fine, quiet weather was again becoming universal. The night had been mild, with most of the temperatures up in the fifties, but the afternoon was not too warm, few places touching seventy degrees.

TUESDAY September 11th.—Although an extensive portion of the great anti-cyclone still remained out on the Atlantic, at least the whole of the western half of Europe was covered by it, all the cyclonic disturbances had disappeared, and the conditions, therefore, had become of a very quiet type. Gentle westerly breezes were reported over our northern districts, and northerly to easterly elsewhere, with dry, and fair to very fine autumnal weather generally, interrupted in one or two localities by unimportant showers. A moderately cool night had been experienced in the more central parts of England and Ireland, where the temperature dropped to forty degrees and under, against minima in the fifties on the seaboard. Nearly all the afternoon readings were in the sixties, London rising to sixty-five degrees.

WEDNESDAY (September 12th).—Very fine weather was experienced again over our islands, but fog or mist was prevalent in the early morning at many of our English coast stations. A large anticyclone still embraced nearly the whole of western Europe, the central area, or region of highest barometer readings, being situated over England and Ireland. The winds were everywhere light, the direction being westerly in the north and north-westerly in the southern portion of the kingdom. The morning was cool in London, but the day was very fine and bright, and in the afternoon the thermometer in the shade registered seventy degrees.

THURSDAY (September 13th).—The type of weather was still anti-cyclonic over our islands, and the barometer was everywhere high and uniform. No rain was reported in any part of the kingdom, but fog was again prevalent over a large portion of England. The winds were very light and variable, except at the entrance of the English Channel, where a fresh easterly wind was blowing. There was a fair amount of bright sunshine, and the shade temperatures at midday touched 70deg in the South of England and the South of Ireland. The weather was very fine and bright in London, and in the afternoon the thermometer rose to 71deg.

FRIDAY (September 14th).—Fine weather prevailed again in nearly all parts of our islands, and no rain was reported anywhere in England or Ireland, while in Scotland the fall was scarcely appreciable. There was still a good deal of fog or mist in many parts of England, and the sky had become more cloudy than of late. Thursday night was rather warm, the thermometer in the south of England not falling below 55deg., although at some of the inland stations as well as in parts of Scotland the temperature was below 50deg. The day was fine, but rather cloudy in London, and the thermometer rose to 67deg.

SATURDAY AND SUNDAY September 15th and 16th).—Fine weather prevailed in most parts of our islands during the last two days, although slight rain fell in places on Saturday and fog or mist was very general. A southerly wind spread over our islands, and this was accompanied by a rise of temperature. On Sunday the thermometer exceeded seventy degrees in places, and on Sunday the readings were somewhat higher. Saturday night was warm, except in the north; and at Jersey the thermometer did not fall below sixty-two degrees. In London the highest temperature on Saturday was seventy-two degrees, but on Sunday the shade reading was eighty-two degrees, which is the highest temperature for about a month. Slight rain fell in the metropolis on Sunday evening, this being the first rain for about a fortnight.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: We have no change to notice since our last. Barley: Dull. Wheat: The trade remains quiet. Oats: Rather easier on the week. Maize: Made about 3d per qr more money. Flour: Steady.—NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—Increased firmness prevailed, the stability of freights still helping the markets, but the attendance of buyers was small, and almost an entire absence of interest attached to business throughout. New crop English wheat 6d firmer, and in continued scanty supply, while there is very little procurable either here or on the country markets. The condition fast improves while favoured by more genial weather. American descriptions 3d firmer for reds, whites being fairly plentiful. The flour market is also generally 6d firmer since last Monday, but consumers fail to follow the advance. The tone is, however, strong. The London Millers' Association made no alteration at this afternoon's meeting. Grinding barley, although now in better supply, keeps at fully late rates. Oats in continued heavy supply, and neglected at last Monday's concession. Flat maize advanced a further 3d since last Monday, while in small supply, mixed American held 21s ex ship, 21s 6d landed. Round corn unchanged.

Mark Lane, Friday.—English wheat still comes up in anything but plentiful supply, and is very sparingly submitted, while fetching enhanced rates. Fine white, 33s, and red of similar sample, 32s per qr 63lb delivered up. American descriptions were again fully maintained, and towards the afternoon holders inclined towards a higher range. The market for flour is fully 6d dearer since Friday last, and holders are by no means anxious. Town household, 25s 6d, and whites 28s 6d per sack were the prices named this afternoon by the London Millers' Association; English patents, 24s 6d to 27s, according to quality; and roller whites, 23s to 24s. American first patents quoted at 26s to 27s; second ditto, 24s to 25s; first bakers, 21s to 22s, and second 20s to 21s; Hungarian, up to 30s; and Australian patents 21s to 22s per sack, 280lb. Of feeding stuffs, grinding barley continues very steady, while the supply is not nearly over-abundant, being chiefly centred on Persian. The market for oats was less depressed at the recent decline, but to embark upon fresh engagements consumers found no difficulty in dictating reasonable terms. Flat maize is 3d to 6d dearer on the week, and scarce, round being well maintained.

COUNTRY.

Ashford, Tuesday.—Although the attendance was small, the tone of trade was very good. Wheat held its own, and all descriptions of feeding corn were firm. The first samples of malting barley were shown, but there was no amount of business done. Prices: White wheat, 30s to 33s; red ditto, 30s to 32s; malting barley, 29s to 34s; grinding ditto, 20s to 22s; white oats, 19s to 22s; black oats, 16s to 20s; maxagan beans (new) 28s to 31s; tick ditto (new) 29s to 31s; small maize, 26s to 27s; flat ditto, 23s to 24s per quarter. Flour was unchanged. Feeding cakes tend to higher prices.

Aylesbury, Saturday.—With fair quantity of wheat on the stands, trade ruled firm, and the business transacted was at the full rates of Saturday last. Barley, oats, and beans, underwent no change. New and old wheat, 28s to 31s per imperial quarter.

Banbury, Thursday.—Wheat (white), 28s to 30s per qr; wheat (red), 28s to 30s per qr; beans (new), 33s to 34s per qr; oats (new), 19s to 21s per qr; oats (old), 18s to 19s per qr. Market very firm at fully last week's quotations.

Boston, Wednesday.—Wheat, 28s to 29s; malting barley, 27s to 28s; grinding barley, 25s; oats, 16s to 18s; peas, 50s to 58s; old beans, 34s; maize, 23s 6d to 25s 6d.

Cambridge, Saturday.—During the week the wheat trade has had a hardening tone. Supplies are still short, and the small yield makes farmers hold their samples very tenaciously. We have had a week of hot weather, and the condition has improved. At this market to-day there was a better supply in improved condition, which met a ready sale at 6d over last week's full prices. Red wheat, 28s to 31s; and white up to 31s per 504 lb. Barley was in fair supply, and good lots made last week's rates. Barley, common, 25s to 28s; fine up to 32s.

Canterbury, Saturday.—Wheat scarce and firm; trade slow. A little more barley shown. Ruling prices:—White wheat, 31s to 33s; red ditto, 30s to 32s; malting barley, 28s to 35s; grinding ditto, 21s to 24s; white oats, 18s to 21s; ditto black, 16s to 20s; peas, 30s to 32s; tick beans, 30s to 32s; mazagans, 28s to 29s; flat maize, 22s to 23s; round ditto 27s to 28s per quarter; winter tares, 7s 6d to 7s 9d per bushel.

Carlisle, Saturday.—Better supply of oats in our market to-day, fair sale at previous prices. New, 17s 9d to 18s 9d; old, 22s 6d to 24s per 336lb.—THOMAS ROBINSON.

Chester, Saturday.—English wheat has been more freely delivered, but quality generally is poor. Finest samples were quoted 1d to 2d per bushel higher. New oats are turning out badly, and attracted few buyers. Beans and barley steady. Indian corn in good demand at an advance of 6d per sack. New white wheat, 4s 1d to 4s 3d; old, 4s 5d to 4s 6d per 75lb; old oats, 3s to 3s 6d; and new, 2s 2d to 2s 4d per 40lb; new grinding barley, 3s to 3s 6d per 64lb.

Colchester, Saturday.—Very moderate supply of wheat; farmers asked a considerable advance, and a rise of 1s per qr. was established without difficulty. There was a fair show of barley, but maltsters still keep out of the market, and prices are irregular. Beans, peas, and oats, very firm.—FRANCIS AND CO.

Dorchester, Saturday.—Good attendance but trade was not brisk. Large quantities of English wheat were offering but met a quiet trade, there being no change in price. Foreign wheat slightly firmer. Feeding stuffs unchanged. Grinding barley firm trade.

Glasgow, Wednesday.—To-day there was a fair attendance at our corn exchange. Wheat and flour firm, and the turn dearer. Indian corn firm at an advance of 3d to 4½d per boll on the week. Canadian peas firm at 9d per boll more money, owing to scarcity on spot. Grinding beans firm, but much unsold. Foreign oats steady at late rates. Home, old, steady. New offering freely at a decline of 9d to 1s per boll on the week. Oatmeal very quiet, and 1s per sack lower on the week. Barley firm and scarce. Bran and thirds firm and unchanged.—GIBSON AND CLARK.

Leeds, Tuesday.—There can no longer be any doubt that the English crop is a deficient one both in quality and yield, and only the liberal quantity of foreign wheat now available prevents an advance in prices. Values for shipment are gradually hardening, and sooner or later importers will have to concede more money. Market firm at 3d to 6d advance since last Tuesday, but business slow. Barley meets some inquiry. New Yorkshires range from 24s to 28s, quality generally being poor. Maize 3d to 6d dearer. Beans and oats firm.—DUNNS AND CO.

Leeds, Friday.—There is very quiet demand for wheat, with little or no change from Tuesday's prices except for fine descriptions which are the turn dearer. Maize firmly held, but no higher, as crop prospects are more favourable from abroad. Flour, oats, beans, peas, and grinding barley fully realise late values.

Leicester, Saturday.—A fair attendance of buyers and dealers. Larger supplies of wheats, in variable condition; new wheats, quiet; old wheats firm prices, 30s to 31s per 36 stones. Oats steady.

Lincoln, Friday.—Only a small supply of new wheats, for which advanced rates were asked; trade slow at 28s to 29s. Foreign wheats, 6d to 1s dearer. Few new barleys, prices not fixed. New oats 6d lower. Maize and beans 6d dearer. Peas firm.

Liverpool, Friday.—Wheat firm with good consumptive business. White wheat ½d to 1d; and red 1d to 1½d dearer. Flour is firm with a better demand at 6d advance for foreign. The Liverpool and North-Western Millers' Associations have advanced the minimum price of Bakers 6d per sack. Maize strong owing to continuation of good demand and depleted stocks, mixed American making a full 1d advance. Small round scarce and 1d to 1½d dearer. Plate firm at unchanged prices. Barley firm for feeding and malting with a good demand for Chevalier. Beans firm with a better trade doing at last market day's prices. Peas firm with a good demand at full prices. Oats, English, are firm with a fair trade. Foreign firm but quiet. Oatmeal firm, but only a small enquiry. Oil-cake is firm with a good demand, Americans making 2s 6d to 5s advance.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—A fair supply of wheat at market to-day, the trade firm, but quiet, and last week's prices were about the rule. More new barley on show, which is disposable on satisfactory terms. Oats are not in much request, and no change in value. Winter tares have receded slightly in the rate of cost. No alteration in the value of brank, maize, hemp, rye, sergo, or millet.

Manchester, Thursday.—A moderate trade has occurred in certain sections of our market to-day and during the week. English wheat though nominally the same as last week in quotation actually is slightly in favour of the buyer, but foreign descriptions are the turn dearer. Flour may be called firm at previous rates ruling. English oats are well held. Peas, beans, and barley show no change, being steady. Indian corn is 1½d per cental dearer.

Market Drayton, Wednesday.—Wheat, white, old, 13s to 13s 9d per 225lb; red, old, 13s to 13s 9d per 225lb; white, new, 12s 9d to 13s 6d per 225lb; red, new, 12s 9d to 13s 6d per 225lb. Oats, white, old, 15s to 16s per 200lb; white, new, 9s 6d to 10s 6d per 200lb. Barley, malting, 12s to 13s per 210lb. Indian corn, 11s 9d to 12s per 240lb. Beans, new, 13s to 14s per 240lb; beans, old, 17s to 18s per 240lb. Peas, white, 17s to 18s per 240lb.

Newcastle-on-Tyne, Saturday.—Wheat at our market to-day ruled steady at late rates. Maize advanced 1s per 480lb over last week's quotations. Old Scotch oats firm, new in buyers' favour. Foreign steady, no change in values. Beans and peas favouring sellers. Flour 6d dearer.—JOSEPH POLLARD AND CO.

Newcastle-on-Tyne, Saturday.—September, so far, has been a good harvest month. To-day's market was moderately attended, and buyers not anxious. English wheat slow, foreign steady and occasionally dearer. Malting barley attracting attention, but prices not yet fixed. Old oats not fast, as new being much cheaper naturally causes buyers to hesitate. Beans and peas unchanged. Flour nominally the same.—GEO. WATSON AND CO.

Newport, Wednesday.—Wheat 6d to 9d dearer. Maize strong, 6d to 9d dearer. Barley showed no change in price, neither did beans or oats. Flour (fine) was dearer, at 24s 6d. There were a few samples of English wheat of good quality on offer. There was a paucity of business.

Norwich, Saturday.—There was more new wheat on offer to-day, which was in better condition, and values firmer. Very little old wheat now offering. The weather of the past week has been principally fine, with cool N.E. breezes. Wheat, red, 30s to 31s per qr, weight 63lbs. per bushel imperial. Corn Inspector's return for the week ending September 30th, 1900:—Wheat, 2036-2, 27s 10¾d. Barley, 125, 22s 9½d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat, a good supply of new, some parcels in very fair condition; late rates fully supported in some cases 6d more obtained. The barley trade hardly yet in swing; the samples of new offering vary in quality, and prices are very irregular. New oats are mostly inferior. Old are held for high prices. The same may be said of old beans.—ROBERT HUBBLE.

Oxford Saturday.—Not much wheat offering, making 6d to 1s over last week's prices. Old wheat, 31s to 31s 3; new, 29s to 31s. Barley a little more moving, but prices still somewhat irregular.

Peterborough, Saturday.—We have had less wheat offering to-day, which met a fair sale at 6d more money than last week. The demand for barley is checked by the warm weather, and trade was slow. Oats firm at late rates.—THOMAS HILL AND SON.

Plymouth, Thursday.—To-day's market business uncertain. Wheat very firm. Maize 3d advance. Oats steady. Barley unchanged. English wheat in good demand. A few winter samples—tawny. Oats shown in good condition, but at prices above ideas of buyers.—ORLANDO DAVIS AND CO.

Reading, Saturday.—The wheat supply here to-day was scanty, and, as a consequence, trade ruled firm. Old wheat as well as new maintained last week's figures, old realising 32s to 34s per qr, and new 26s to 30s per qr. Little doing in other descriptions of corn. A few samples of new oats were shewn, but these were of poor quality.

Romford, Wednesday.—The wheat trade was the same as last week. Several samples were out of condition. There was only a small supply. Red wheat made 29s to 31s, and white wheat 30s to 32s 6d per qr.

Sheffield, Tuesday.—Poor attendance owing to farmers being busy harvesting. Beans very scarce at late rates. Maize quiet trade at same prices as last week. Quotations:—Wheat, white, 33s to 33s 6d; red, 32s to 33s; new, 31s to 32s per 504lb; oats, old white, 26s; ditto old black, 22s; new, 18s 6d to 22s per 336lb; peas, grinding, 28s to 29s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small, 26s to 29s; ditto American mixed, 22s 6d to 23s per 480lb.

Spalding, Tuesday.—The trade for wheats was firm, at a shade less money than last week, at 28s to 28s 6d per qr. Oats dropped 6d per qr. A small show of barley, which sold at late prices. Beans and peas unchanged. No quotable alteration in other articles.

Stockton, Wednesday.—There were very few samples of new crops showing. These were in fair condition, but the quality was below last year, and 30s per qr was realised. The foreign wheat trade keeps very firm, and with a continued scarcity of white wheats holders made 6d more money. Strong red wheats were in request at 6d advance on last week. Oats and maize unaltered.

Sudbury, Thursday.—Not much new wheat was on sale, price ranging from 30s to 31s; old wheat up to 32s per qr.

Sunderland, Saturday.—Farmers are still engaged with harvest work, which has made good progress this week. Very little business passing to-day. Wheat firm, and rather dearer. Oats and barley steady, and unchanged in value. Arrivals coastwise nil; foreign wheat 2,476 qrs.—E. AND F. RICHARDSON.

Taunton, Saturday.—Wheat firm at full prices of last week, with small quantity offering. Malting barley quality variable, at from 28s to 38s. All feeding stuffs firm, at late rates.

Wakefield, Friday.—The wheat trade is very firm. All hard qualities are tending against buyers, though the demand is by no means active; English wheats are quite dry and cured. The Yorkshire barleys showing a lot of poor quality and sell slowly at 22s to 26s on rails. Foreign is mostly held too high. Maize 3d dearer. Beans and oats slow.—DUNNS AND CO.

Wakefield, Friday.—Since our last report we have had a week of fine weather. To-day at our market fine foreign wheats are held for more money, which buyers are reluctant to pay, whilst English maintains late rates. A fair supply of Yorkshire barleys showing, but prices not yet fixed. Feeding stuffs firm, with maize 3d per qr dearer.—MICHAEL SANDERSON AND SON, LIMITED.

Wisbech, Saturday.—A small supply of grain; samples in better condition. Wheat steady at late rates. New 29s to 31s; old up to 32s. Oats 3d lower; new, 17s to 19s; old up to 24s. Barley, variable, 26s to 28s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—A moderate attendance and quiet trade. Quotations:—English wheat (old), 13s to 13s 6d per 216lb; springs, 6s 4d; Duluths, 6s 6d per cental; old oats, 14s 6d to 15s 6d; new oats, 10s to 11s 6d; old beans, 14s to 15s; new beans, 12s 6d to 13s 6d per 196lb; flat maize, 23s 6d to 24s per 480lb.

Worcester, Saturday.—Moderate supplies of home-grown wheat, and the new samples were rather variable in condition and irregular in price. Old wheats firm. Foreign slightly dearer. Barley favoured buyers, but maize was dearer. Wheat, white, 30s to 32s; red, 28s to 30s per quarter.

Worksop, Wednesday.—Fair attendance and a moderate show of grain, the new being in fair condition. Old white wheat, 32s to 33s; new, 27s to 29s; old red, 31s to 32s; new ditto, 27s to 28s; malting barley (best), 29s to 31s; seconds, 27s to 29s; grinding, 26s to 27s; old white oats, 24s to 26s; old black, 22s to 24; new white oats, 18s to 20s; new black, 17s to 19s; flat maize, 25s to 26s; round, 27s to 28s per qr.

FOREIGN.

The Antwerp wheat market has been pretty well maintained. The supplies of wheat brought forward upon the French country markets have been much restricted, as farmers are anticipating somewhat better prices; at the same time, a good many of them are pressed for money, and are compelled, accordingly, to accept current rates for their produce. An advance of 2½d per quintal has been noted in wheat for Lyons. The Marseilles wheat trade has shown rather more activity; last week's sales amounted to 10,500 quintals. The milling trade has been obliged to accept a moderate advance in quotations at Paris. Flour for consumption has also ruled firm in the French capital. The latest estimate as to this year's French wheat crop is that of 107,535,000 hectolitres. The average production of wheat in France for the ten years ending with 1899 inclusive was 110,739,280 hectolitres, so that this year's crop is very nearly an average one. Wheat has shown little change at Konigsberg and Dantzic. Holders of wheat have maintained an attitude of reserve at Odessa, as they consider that the wheat crops of the principal producing countries this year are appreciably smaller than those secured in 1899. The quantity of wheat now en route for Europe is returned at 1,020,000qr, as compared with 1,385,000qr at the corresponding date of 1899. The total of 1,020,000qr, representing the quantity of wheat now en route for the Continent, is made up as follows:—France, 110,000qr; Belgium, 295,000qr; Holland, 230,300qr; Germany and the North, 140,000qr; and Italy, Spain, etc., 290,000qr.

Hamburg, Saturday.—Barley report: Trade rules quiet, still holders decline to reduce their limits, so that few transactions are taking place, and the bids made for English account are difficult to carry through. Finest is, of course, looked after, but for such extravagant prices are asked and few transactions are taking place. I quote:—Fine Chevalier, Saale, and Bohemian, 34s to 36s; extra fine, 37s to 40s; choice, 41s to 43s per 1461b, f.o.b. str. here; whilst Moravians are held still above these figures, say at 39s to 44s for extra fine to choice, according to quality.—FRANCIS M. TH. DUHNE.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Moderate supplies met a fair demand. Quotations:—Fowls: Yorkshire, 2s 6d to 3s; Surrey, 3s to 3s 6d; Sussex, 2s 9d to 3s 3d; Essex, 2s 6d to 3s; Welsh, 1s 9d to 2s; Irish, 1s 6d to 2s; Geese, 4s to 5s; Aylesbury ducks, 2s 6d to 2s 9d; country ditto, 2s to 2s 4d; Bordeaux pigeons, 8d to 11d; feathered ditto, 6d to 8d; rabbits, wild, 9d to 11d; tame, 1s to 1s 2d each; Australian, 7s to 9s per dozen; hares, 2s 3d to 2s 9d; leverets, 1s 6d to 2s each; young grouse, 4s to 4s 6d; old, 2s 6d to 3s; young partridges, 3s to 3s 6d per brace. Venison, haunches, 15s to 18s each; ditto forequarters, 3d per lb.

Glasgow, Wednesday.—Arrivals of cheese in the Glasgow market were free. There was a fair trade passing. The trade is beginning to realise that the highest price has been touched. Cheddars and Dunlops, 54s to 65s per cwt. The business in Americans is somewhat restricted, owing to the dear price sought on the other side.

Liverpool, Saturday.—Bacon: There has been a steady consumptive deman for all cuts, the markets closing firm at 1s per cwt above our last quotations. Hams: The demand is dull, and of a retail character, prices, owing to free arrivals, giving way about 1s per cwt. Lard in moderate request at a slight advance over last week's rates. We quote pails and kegs, 38s to 38s 6d; prime western (in tierces), 36s per cwt. Pork, though firmly held, is without change in value. We quote finest prime mess, 69s to 73s 6d per 200lb. Cheese.—With the advance in prices, the demand is somewhat checked, buyers holding back, the market, however, closing firm. We quote to-day finest coloured Canadian, latest arrivals, 54s to 55s; white, 54s; finest States coloured, 53s 6d to 54s 6d; white, 53s to 54s. Grades under finest and full cream find ready buyers at prices from 1os to 5ls per cwt. Butter.—The demand is slow for all grades, finest being now offered at less money, with holders free sellers. Kiel has declined 4s to 5s per cwt on the week, the liberal shipments of Colonial now on the way rather earlier than usual causing an easier feeling generally on best grades. We quote to-day fancy Canadian creamery, in boxes, 94s to 105s; States, 95s to 98s; finest ladles, imitation creamery, 80s to 85s; finest Danish, 112s to 116s; Irish creamery, 105s to 110s; Cork firsts, 90s; seconds, 87s; thirds, 83s per cwt.—HODGSON BROTHERS.

Newport, Wednesday.—There was a good supply and a good demand. A clearance was effected at the following rates:—Clorphilles, 50s to 56s; fancy dairies, 58s to 64s; singles, 50s to 54s; truckles, 54s to 60s; doubles, 58s; Cheddars, 56s.

BUTTER.

Tuesday.—Bedale: 1s 6d to 1s 7d per roll of 24oz. Gainsborough: 1s 2d to 1s 4d per lb. Leeds: Danish, 108 to 120s per 112lb; Irish creameries, 104s to 110s; Yorkshire, 14s 6d to 15s 6d per stone; ditto 60oz rolls, 1½lb, 1s 2d to 1s 3d; fresh butter in 1lb prints, 1s 3d per lb. Settle: 11½d to 1s 0½d per lb. Sheffield: 1s 3d to 1s 4d per lb. Spalding: 1s per lb. Stone: 1s 2d to 1s 3d per lb.

Wednesday. Barnsley: 1s 3d to 1s 4d per lb. Easton: 1s to 1s 3d per lb. Colne: 1s 11d per lb. Goole: 1s 2d per lb. Keighley: 1s 3d per lb. Kirbymoorside: 11d to 1s per lb. Knaresborough: (Wholesale) 1s 3d to 1s 6d, (retail) 1s 6d to 1s 8d per roll of 24oz. Louth: (Wholesale) 1s 1d per lb. Market Weighton: 1s per lb. Masham: 1s 2d to 1s 4d per roll of 24oz. Northallerton: 1s 2d to 1s 4d per roll of 24oz. Stockton: 1s 2d to 1s 3d per lb. Whitby: 1s 2d to 1s 3d per lb. Worksop: 1s 6d per lb.

Thursday. Brigg: 1s 1d to 1s 2d per lb. Driffield: 1s 1d per lb. Penistone: 1s 3d per lb. Ripon: 1s 6d to 1s 8d per single roll of 24oz. Scarborough: 1s 2d to 1s 4d per lb. Wetherby: 1s 1d to 1s 2d per lb. Kidderminster: 1s 3d per lb. Devizes (wholesale), 1s 1d to 1s 2d; (retail), 1s 2d to 1s 3d per lb.

Friday. Chester: 1s 2d per lb. Crewe: 1s 1d to 1s 2d per lb. Derby: 1s 2d to 1s 3d per lb. Easingwold: 1s 3d to 1s 4d per lb. Grimsby: Choicest Danish, 120s to 126s per 112lb; seconds, 110s to 116s; Dutch, 108s to 112s; Canadian creameries, 102s to 106s per cwt; Irish creameries, 102s to 106s. Yorkshire, 14s to 15s per stone; ditto long rolls 1½lb, 1s 2d to 1s 3d

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The season has not been unfavourable for the completion of harvest in England, Germany, Scandinavia, and in the spring wheat regions of Russia, while Canada and Manitoba have completed their cereal ingatherings without frost. The Scotch and Irish wheat crops have not been so well secured, as there has been a rather heavy rainfall. Threshings of the new English wheat do not proceed with any briskness, and farmers are well advised in their present policy. Prices will probably be better in 1901 than they are to-day, and the rise should come with the first severe cold. We notice an increased proportion of 63lb. lots among the new deliveries, and this of course is an excellent sign. For fine 63lb. red 32s. is generally obtainable. At the Kentish markets 64lb. samples of white have been met with, and at 32s. 6d. they have been a good bargain. The West, we must admit, has already accepted 27s. to 28s. for new English, but these samples were neither very dry nor very heavy. The estimate of a 28-bushel yield for the United Kingdom is rather more firmly established than it was a fortnight ago. Allowing for the decline in the area under cultivation, we may reckon that we shall need 14,260,000 bushels more foreign wheat than we did last year. As the cereal season's imports of breadstuffs equalled 174,480,000 bushels (corrected returns) we may put the new cereal year's import requirements at 188,740,000 bushels, or 23,592,500 quarters. This is a considerable quantity, but out of the 53,172,000 bushels of English nominally available fully 8,000,000 bushels must probably be deducted for seed and tail corn respectively. This leaves us only 5,646,500 qrs. of English new wheat to come to the miller.

The Italian wheat crop is thus returned : –

	Bushels.
1895	114,000,000
1896	140,000,000
1897	84,240,000
1898	133,160,000
1899	128,000,000
1900	120,000,000

It is difficult to call the crop of the present year deficient, but it is evidently a disappointment after the yields of 1898 and 1899.

The statement in a popular halfpenny morning paper that the Indian wheat crop is 30,000,000 qrs. this season has been extensively reprinted, so that it is necessary to say that the real total is somewhat under 23,000,000 qrs. Possibly the Indian Government figures (which are in tons) have been inaccurately converted into quarters. We do not say that this is so, but many amateurs conclude (and not very unnaturally) that "a quarter" is a quarter of a *ton*. But a quarter (480lb.) is 3-14ths of a ton (2,240lb.).

The *Price Current* of Cincinnati reaffirms its belief that the American wheat yield will reach 550,000,000 bushels, or six million qrs. above the estimates commonly accepted.

The following is the past cereal year's return of :

AMERICAN SHIPMENTS.

Wheat :	A.P. to U.K.	6,819,000 qrs.	
"	" " Cont.	4,536,000	"
"	Cal. " U.K.	2,276,000	"
"	" " Cont.	5,000	"
	Total	13,666,000 qrs.	
Flour :	A.P. to U.K.	6,981.000 sacks.	
"	" " Cont.	1,613,000	"
"	Cal. " U.K.	452,000	"
"	" " Cont.	3,000	"
	Total	8,959,000 sacks.	
Maize :	To the U.K.	10,541,000 qrs.	
"	" Cont.	12,746,000	"
	Total	23,287,000 qrs.	

It will be seen that the U.K. is now practically the only buyer of Californian wheat, a fact which tends to give us an increasing control of the market. Could not California grow a stronger average sample? The climate is hotter, fiercer, and brighter than that of our northern and cloudy skies.

The figures brought by the last mail include a useful comparison with three previous cereal years :—

AMERICAN CEREAL YEARS.

	Wheat. Qrs.	Flour. Sacks.	Maize. Qrs.
1899-1900	13,666,000	8,959 000	23,287,000
1898-1899	18,270,000	9,340,000	21,190,000
1897-1898	20,220,000	7,810,000	24,610,000
1896-1897	10,140,000	6,800,000	21,085,000

The flour shipments have increased very noticeably. In 1897-8 we observe more than 6,000,000 qrs. more wheat shipped than in 1899-1900, but over 1,000,000 sacks less flour. There are now fifty leading sorts of American flour recognised and dealt in at Mark Lane, and Liverpool has some extra types specially consigned for its demand. The American firms do not have everything their own way either; for the mills are most situated far inland, and the wages bill is probably 25 per cent. heavier than in the United Kinghom. The flour, however, rather gains than loses by the sea passage.

Corrected returns of spring corn imports for the cereal year are now officially ascertainable, and are as follows :—Barley, 4,256,687 qrs. ; oats, 7,112,237 qrs. ; beans, 367,502 qrs. ; peas, 553,383 qrs., and maize 13,474,151 qrs. The quantities of grain at present on passage to the United Kingdom are : Wheat, 1,900,000 qrs. ; flour, 370,000 sacks ; maize, 810,000 qrs. ; barley, 410,000 qrs. ; linseed, 95,000 qrs. ; rapeseed, 3,000 qrs. ; and cottonseed, 5,750 tons. The market for maize fluctuates, but on the whole it is healthy and even vigorous. Round corn has been exceedingly scarce at Liverpool. Barley is a quiet trade, new is very rarely offered in any appreciable quantity ; 30s. seems about a level for new malting at the country markets. London value is still quite unfixed. Oats are not selling very well, either English or foreign. There is a good sale for new winter tares, also for trifolium. The latter makes 56s. to 60s. per cwt. for late white and 45s. to 48s. for late red. New Italian millet comes at 53s. per qr. Beans and peas are no more than steady in value, but lentils tend to rise in price.

The oilseed trade has been passing through a period of some excitement. Since the 1st January supplies have been 1,036,000 qrs. of linseed, 64,000 qrs. of rapeseed, and 268,000 tons of cottonseed, against 1,061,000 qrs. of linseed, 116,000 qrs. of rapeseed, and 208,000 tons of cottonseed last year. Thus there has been no real scarcity of the first two staples, while of cottonseed there has been an increased supply ; yet prices are up "all along the line," and from a year ago we quote £1 per ton rise in cottonseed, 15s. per qr. rise in linseed, and £6 per ton rise in rape oil, in which more than in the seed itself London chiefly deals. The rise in cottonseed oil on the twelvemonth is fully five guineas per ton, and in linseed oil the advance is greatest of all, £12 per ton.

THE BALTIC.

The demand for cargoes for future shipment when only we are launched on a new cereal year quickly becomes fair. Already there have been sufficient transactions to give us the following levels of value :—

Sales of cargoes on passage have been inclusive of wheat. Californian at 31s. 6d., Blue Stem at 30s. 6d., South Australian at 31s., 9d. Roumanian at 29s., Rosario at 30s. 3d., and Manitoba at 31s. 6d. Maize.—American at 21s., Odessa at 26s., and Argentine at 21s. 9d. Barley.—Californian at 26s. 3d., and Azoff at 19s. 3d. ; and oats, White Sea at 13s. ; No. 1 Canadian at 15s. 3d. and 15s., Black Libau at 14s. 9d. per qr.

The arrivals of grain and seed-laden vessels at ports-of-call for the week were 4 wheat (1 Portland (O), 1 Port Townsend, 1 Rosario, 1 Tacoma) ; total, 14.

The sailings of grain and seed-laden vessels from ports-of-call for the week were 2 wheat (1 Cardiff, 1 Runcorn), 1 beans (Ayr) ; total, 3.

Since January 1, 1900, the total arrivals have been 247 wheat, 13 wheat and barley, 1 wheat and pease, 6 flour, 10 maize, 1 maize and oats, 23 barley, 16 beans, 7 locust beans, 1 linseed, 2 canaryseed, 5 valonea ; total, 332.

Last year during the same time the arrivals were 219 wheat, 10 flour, 3 maize, 6 barley, 1 barley and beans, 1 rye, barley, and oats, 7 beans, 1 locust beans, 5 linseed, 4 canaryseed, and 7 valonea ; total, 264.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

New English wheat is in better supply to-day than at any time since its first appearance at Mark Lane on the 20th ult. ; the prices asked for the best samples are also fully 6d. better on the week. New white, weighing 62lbs. to 63lbs., were sold at 33s. per quarter, while samples of red fetched 31s. per quarter. Rye fetched 28s. 6d., and barley was in better request, but the supply was small. Feeding Persian sorts made 18s. 6d. Oats were irregular, as the supply of new was small. Beans and peas steady, but with not much demand. New English tares made 54s. per qr.

Argentine Wheat Shipments.

The past month's shipments from the Argentine Republic have been over half a million quarters, and this rate of shipment in the later months of the shipping year from the Antipodes looks as though Argentina had not only "come to stay" as a first-class shipping Power, but had made trade arrangements so far perfect that exports could in future take place pretty regularly all through the season, demand being met month by month as it arose. The price of Argentine wheat averages 30s., but there is a good choice of the different sorts, from the hard grain of Uruguay and Paraguay to the medium soft samples of Bahia Blanca and the region to the south of Buenos Ayres.

Of La Plata wheat five types are now ordinarily obtainable at Mark Lane :—

1. Argentine fair average quality.
2. Santa Fé.
3. Entre Rios.
4. Bahia Blanca.
5. Barletta.

They are well worthy of inspection, and millers should provide themselves with the standard samples supplied at a nominal charge by the London Corn Trade Association, 2, Lime street-square, E.C.

THE FLOUR TRADE.

MARK LANE, SEPT. 17th.

The close, hot weather that has now set in which would have been welcomed some weeks ago makes the flour trade very dull, business being difficult to do, but prices are decidedly better. The town households made 25s. 6d., and millers were not inclined to take less. American sorts were 3d. per sack dearer. Hungarian made 31s. 6d.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—	Sept. s. d.	Oct. s. d.	Dec. s. d.
Sept. 10 noon	6 7	6 7	6 8
4 p.m.	6 6	6 7	6 8
Sept. 11 noon	6 7	6 8	6 8
4 p.m.	6 7	6 8	6 8
Sept. 12 noon	6 6	6 8	6 8
4 p.m.	6 6	6 7	6 8
Sept. 13 noon	6 6	6 7	6 8
4 p.m.	6 6	6 7	6 8
Sept. 14 noon	6 6	6 7	6 8
4 p.m.	6 6	6 7	6 9
Sept. 15 noon	6 7	6 7	6 9
To-day noon	6 7	6 8	6 9

Maize makes 14s. 3d. for Sept. delivery, but 4s. 1d. is accepted for Dec. and 3s. 11d. for March delivery.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

Wheat cargoes are more firmly held, and merchants express confidence in prices, especially where the cargoes are not expected to arrive before Christmas. Barley is well held. Oats, owing to an excessive spot supply, are out of favour for October shipment. Rapeseed and cottonseed cargoes are held above buyers' ideas.

BUSINESS DONE.

WHEAT.—Siberian, 31s 3d on passage; Azima, South Russian, 30s 9d, on passage; ditto, 31s 6d new crop, Nov. shipment; Californian, 31s 9d, Oct. shipment; Walla Walla, 30s 3d, Oct. shipment; South Australian, 31s 9d, on passage; Argentine 30s, on passage; ditto, 29s 9d, Oct. shipment; Roumanian, 29s Oct. shipment; No. 1 Northern, 31s 3d, Sept. shipment; ditto, 31s 6d, Nov. shipment; No. 2 Red Winter, 30s 6d, Oct. shipment,

MAIZE.—American, 21s, October shipment; Argentine, 21s 9d, September shipment; Roumanian, 20s 9d, September shipment; Odessa, 20s, September shipment.

BARLEY.—Azoff, 19s 6d, September shipment; Californian, 26s 3d, September shipment.

OATS.—St. Petersburg, 13s 6d, September shipment; Canadian white, 15s 3d, September shipment.

LINSEED.—La Plata, 51s 3d, January shipment.

COTTONSEED.—Egyptian, £7 5s, on passage

GRAIN AND FLOUR FACTORS' REPORTS.

Offals—Bran and pollard continue in fair request Prices of the former, both for broad and medium qualities, have advanced 2s. 6d. to 5s. per ton within the last few days. Small bran scarce.—GREENHILL BROTHERS, Belfast, September 15.

Flour: There is an improved demand all round at 3d. to 6d. per sack advance from bottom prices. Grain: Indian corn strong at 6d. per boll advance. Beans are quiet but firm. The prospect of small supplies of peas until new crop shipments arrive has enabled sellers to make 6d. to 9d. advance on the week. Scotch and Irish new oats are now plentiful and cheaper. Canadian oats are unchanged. Mill stuffs: Bran and thirds met a good demand, and the latter are rather dearer.—MCKINNON AND MCDONALD, Glasgow, September 15.

Prices of British Grain.

Sale of Coach Horses. — Amongst the horses offered for sale at Aldridge's Repository, St. Martin's Lane, on Wednesday, by Messrs. W. and S. Freeman, were twenty horses, the property of Mr. George Whithead, of Gordon Square, W.C., which have been working the "Tantivy" coach between Folkestone and Canterbury during the past season; and forty-seven horses belonging to Messrs. W. J. Garrett and Son, of Montagu Place, Portman Square, which have worked the "Age," Oxford and London coach, up to the 9th of the present month. Both of the teams were shown in the best possible condition. Of the "Tantivy" horses fifteen were sold, and realised a total of 624gs., or an average of about 41½gs. The highest price was 100gs., which was given for a grey gelding Killarney, five years old and 16 hands high. A black gelding, Devil, seven years old and 15.3 hands high, brought 60gs.; a chestnut gelding, Prince, five years old, 15.1 hands, by Field Marshal—Constance, 52gs.; and 50gs. was paid for a grey mare, Snowstorm, six years old and 15.2 hands high. Of the "Age" coach horses twenty-seven were sold out of the forty-seven offered, and the total realised was 1,088gs., an average of rather over 40gs. The highest price, 69gs., was given for a bay gelding, Bathurst, six years old and 16 hands high. A bay gelding, Paddy, six years old and 15.3 hands high, brought 67gs., and the other prices varied from 31gs. to 57gs.

Milch cows	60	60	[illegible]

Quotations per 8lbs (sinking the offal).

	ENGLISH. Inferior. s. d.	Second s. d.	First. s. d.
Beasts	3 4 to	4 [illegible]	4 [illegible]
Sheep	5 [illegible] to	[illegible]	5 10
Lambs	6 4 to	[illegible]	6 9

Milch cows, per head, £[illegible] to £[illegible]

British arrivals include as follows: Scotland, . Essex Counties, 1; Midland, Home and Western Counties 1; Devon, 60; Ireland, 312.

In the beast market to-day the supply was larger, but the per equally to heavier arrivals from Ireland. The sheep, which were short, for which there was a ready demand, yesterday were quoted at rise to 1d., two-year-old cattle and cows one year old 1d to 2d. Both prime and second quality beasts were dow of sale even at a reduction of ½d per 8lb. Fat bulls were in steady demand, cake-fed quoted equally beasts them; fat cows were easier in price.

The following are top quotations per 8lb (sinking the offal):—

	To-day.	Sept. 18th, 1899
Devons	4s 8d to 4s 9d ..	to —
Herefords	4s 8d to 4s 9d ..	4s 4d to 4s 6d
Runts	4s 8d to 4s 9d ..	4s 4d to 4s 6d
Lincolns	4s 9d to 4s 11d ..	4s 4d to 4s 6d
Irish	4s 4d to 4s 8d ..	4s 0d to 4s 2d
Fat cows	3s 4d to 3s 10d ..	3s 4d to 3s 6d

There was an increase in the sheep market compared with Monday last. Trade for both wethers and ewes was dull, the demand being less owing to the holiday season and rates lower by fully 2d per 8lbs for wethers and 1d for ewes. Lambs were short in number; best quality sold readily at late rates. The supply included 2,500 Irish, 460 from the Eastern counties, and 300 Scotch.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:

	To-day.	Sept. 18th, 1899
7½ to 8 stone Downs ..	5s 8d to 5s 10d	5s 6d to 5s 8d
9-stone ditto ..	5s 6d to 5s 8d	5s 4d to 5s 6d
10-stone half-breds ..	5s 4d to 5s 6d	5s 2d to 5s 4d
11-stone Lincoln ..	5s 0d to 5s 2d	4s 10d to 5s 0d
10-stone Irish ..	5s 0d to 5s 2d	4s 10d to 5s 0d
10-stone Down ewes ..	4s 6d to 4s 8d	4s 4d to 4s 6d
11-stone half-bred ditto ..	3s 8d to 3s 10d	— to —
5-stone Down lambs ..	5s 10d to 6s 0d	6s 2d to 6s 4d
6-stone half-bred ditto	5s 4d to 5s 6d	5s 6d to 5s 8d

London Central, Monday. Large supplies trade very bad. Beef: Carcases, 3s 11d to 4s 1d; hindquarters, 4s 6d to 4s 8d; roastings, 5s to 5s 4d. Sheep: Ewes, 3s 6d to 3s 8d; wethers, 4s 4d to 4s 8d; hindquarters, ewe, 4s 4d to 4s 8d; wether, 5s 4d to 5s 8d. Pigs, large, 3s 4d to 3s 8d; small, 3s 8d to 4s 4d.

St. Ives (Hunts), Monday.—Beasts 650, sheep and lambs 3,323, pigs 438. Beef, 7s 4d to 8s 4d; mutton 7s to 9s 10d; pork, 6s to 7s 3d. Fat cattle good demand, stores fair. Fat sheep good demand. Fat and stone pigs fair trade. Milch cows fair trade, prices £14 to £22.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 1,144. To-day's supply compared with Monday last, showed a decrease of 400 and consisted of 649 from the United States and 495 from Canada; owing to the warmer weather a full supply reported at the dead meat market. Trade here ruled dull and dragging sales being more or less forced. The following were the quotations per 8lb., offal given in:—90-stone States, 4s 4d to 4s 6d; 85 to 90-stone Canadians, 4s to 4s 2d; Ranche ditto, 3s 8d to 3s 10d. Sheep 490, too small a supply to create competition trade in consequence very slow. Top value 4s per 8lb. The following were the numbers on offer on the corresponding day last year with the current top rates:—Beasts, 1,236; 4s to 4s 2d per 8lb. Sheep, 1,400; 4s 2d per 8lb.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., report red cloverseed dearer. American quotations coming again higher. Meantime, Alsyke, white, Timothy and Lucerne keep very firm. Full prices are asked for perennial and Italian rye grasses. Seed rye and winter tares move off slowly on former terms. Trifolium has been in slow request. For cord seeds the trade is quiet, but steady. Blue peas have advanced 2s per qr., whilst haricot beans favour holders.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

15,362. J. H. Pim, of Bradford, for an invention for "Improvements in reaping and harvesting machines."

15,[illegible]. E. J. Edwards, of Pwllheli, North Wales, for an invention for "A device for sowing seeds at differently regulated distances and depths."

Patents Sealed.

10,138. I. Galwer, of Riga, Russia, for an invention for "Improvements relating to harvesting machines."

10,155. H. G. Flemming, of London, Bridge, for an invention for "Improvements in reaping and harvesting machines."

10,214. H. K. Borchgrevink and J. F. Johnson, both of Racine, Wisconsin, U.S.A., for an invention for "Improvements relating to milk-pails."

At [illegible] sales on Thursday an increased value of about 2s per head was realised. Keeping lambs of good quality and grass fed sold well, and one with a sell. There was an exceptionally heavy consignment on the Barnard Castle and [illegible] dale Farmers' Auction Mart Company's sales. The [illegible] sold for [illegible] each, and [illegible] wethers 2s 6d each. Scotch wethers, two-crossed lambs, and fat shearlings were eagerly sought after.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

At the Islington market there was but a poor show of beasts, few of really choice quality being on sale; in fact, taking the market as a whole, the foreign supply compared more than favourably with it. The best Herefords, runts, and Devons met a ready sale, last week's rates governing all transactions, but middling quality beasts, of which too many were on offer, met with a dull and dragging trade at less money, notwithstanding which a clearance could not be made; but butchering bulls and cows, being short in number and meeting a rather better demand, sold readily at an advance of 2d. per 8lbs. A few yearling stores were on sale, these arriving from Ireland. At the foreign cattle market trade on all three days was firm and steady, both in regard to tone and value, though below-stated quotations are somewhat lower than last week owing to the quality not being so good. The total number of beasts offered for sale on both markets was 5,573, consisting of 1,605 British and 3,968 foreign, these latter comprising 2,767 from the United States and 1,201 from Canada; total increase 1,644. The following were the top rates paid per 8lbs. (sinking the offal): 80 to 90-stone Herefords, 5s.; 90-stone runts, 4s. 11d.; 80 stone Devons, 4s. 10d. to 4s. 11d.; 100-stone Lincolns, 4s. 6d.; 110-stone ditto, 4s 4d.; 90-stone Dublins, 4s. 6d.; 95-stone Waterfords, 4s. 4d.; 90-stone States, 4s. 6d.; 86 to 88-stone Canadians, 4s. 2d. to 4s. 4d.; Ranchers, 3s. 10d. to 4s.; 90-stone fat cows, 3s. 8d. to 3s. 10d.; 100-stone fat bulls, 3s. 6d. The sheep trade was again confined to the Islington market, and so far as numbers were concerned showed a material increase. Lambs, however, being shorter in number and meeting with less demand, only the very choicest maintained late rates, other qualities, of which too many were marketed, being more difficult to dispose of at less money. Prime quality Downs and half-breds were ready of sale, but were a shade easier in price; ewes being short in number were rather dearer. The total number of sheep and lambs penned was 9,440 (increase 530). Leading pens made per 8lbs. as follows (sinking the offal): 7½ to 8 stone Downs, 6s.; 9 stone Downs, 5s. 10d.; 8 stone Scotch, 6s.; 10-stone Downs, 5s. 8d.; 10-stone half-breds, 5s. 6d. to 5s. 8d.; 10-stone Irish, 5s. 4d. to 5s. 6d.; 12-stone half-breds, 5s. 2d.; 11-stone Lincolns, 5s. 4d.; 10-stone Down ewes, 4s. 6d.; 11-stone half-breds, 3s. 10d. to 4s.; 5 stone fat Down lambs, 5s. 10d. to 6s.; 6-stone half-bred ditto, 5s. 6d. The calf trade, with a short supply, was of a slower nature at a decline of fully 4d. per 8lbs. The number on offer consisted of only 30 head, the best of which were quoted at 5s. 8d. per 8lbs. (sinking the offal).

Trade in the West.

With good deliveries of stock at all the local fairs and markets, prices have been steadily maintained, with, generally speaking, a decidedly upward tendency for most things. This has been more marked in respect to sheep and lambs, the rise varying from 2s. up to as much as 6s. a head. This must be ascribed as entirely due to the abundance of keep, necessitating the retention of as large a number of working sheep and lambs as can be obtained. Whilst this continues sheep are bound to be very dear, and we believe the present month will close with higher rates than those with which September opened. Good working lambs are now worth from 33s. to 43s. apiece, whilst young ewes make 36s. to 46s. or 47s. Store cattle are also relatively dearer, barreners being still in very active request at from £22 to £28 per pair for those requiring but little in the way of finishing or to come out at Christmas. Milch beasts maintain their firmness, the present selling price being from £16 to £19 each. Fat bullocks have been a shade easier, 11s. 6d. per score being now an outside figure, and the mutton trade has also slightly favoured buyers. Veal and pork still rule firm. The outlook all round has seldom been more encouraging for farmers than at present.

Trade in Ireland.

A heavy increase of nearly 400 cattle and 1,300 sheep had an unfavourable effect on last Thursday's market, even though there was a large attendance of both shippers and home butchers. The general run of the fall on previous week might be marked at from 10s. to 20s. per head on cattle, and from 1s. to 2s. on sheep, business in both departments being of a very dragging nature, and a clearance difficult to accomplish. The inquiry for really well-finished bullocks and heifers was good, but there was a scarcity of such, and choice lots met a ready enough sale at last week's prices. Choice ox and heifer beef made from 56s. to 60s., and for some extra lots 62s. per cwt.; medium, 49s. 6d. to 54s.; and other sorts, 42s. 6d. to 47s. per cwt. The enormous supply of sheep (10,200) gave a check to trade, causing a fall on last week of from 1s. to 2s. per head. Choice veal scarce, and worth 8d. per lb.; coarse calves neglected. Prime springers and new milch cows brought prices equal to those of last week. Though there was a larger supply of pigs on market, there was no quotable change in price to be noted. Nice, light pigs were in demand.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—The supplies of fat cattle on offer this week have been larger, and the quality about an average; the best class of bullocks still continue to sell well at late rates, but for anything short of best quality trade has been rather slower, and a slight reduction in price has had to be taken. Fat sheep and lambs were forward in shorter numbers than last week; the former met a trade as nearly as possible equal to last week, except for fat ewes, which were dear at a good advance in price. Lambs met a fair trade. Fewer fat calves and pigs; both met a dear trade at high prices. In the store market there have been large supplies of sheep, the greater number of which have been of a very secondary class; while for good sheep and lambs there has been a fair inquiry at late rates; anything else has been almost unsaleable. Store cattle have been a fairly good show; those of good quality and with some condition have been easily sold at good prices, but secondary sorts have met a very slow demand, and a number of these have been unsold. Milch cows were forward in larger numbers, and trade was stiff, prices being lower than those of last week. Quotations: Top price of the best beef, 8s. 3d. to 8s. 9d. per stone; current, 7s. 9d. to 8s. 3d. per stone; mutton from 7¼d. to 8¼d. per lb.

LONDON.

London Central, Wednesday.—A slow demand again prevailed, for the fair supplies on offer. Arrivals of beef include 25 tons Scotch, 530 Liverpool sides, 1,550 hindquarters, and 600 forequarters American refrigerated. Beef: Scotch, short sides, 4s 4d to 4s 8d; long, 4s to 4s 2d; English, 4s 2d; American Deptford-killed, 3s 10d to 4s; Liverpool, 3s 10d to 4s; American refrigerated hindquarters, 4s to 4s 3d; forequarters, 2s 10d to 3s. Mutton: Scotch, 4s 8s to 5s; wethers, 4s 4d; ewes, 3s 4d to 3s 8d; English lamb, 4s 8d. Veal: English and Dutch, 3s 8d to 4s 4d. Pork: English, 4s 4d to 4s 8d; Dutch, 3s 10d to 4s per 8lb.

London Central, Friday.—Slow demand, good supplies on offer. Arrivals of beef included 60 tons Scotch, 400 Liverpool sides, 3,100 hindquarters, and 2,600 forequarters. Beef: Scotch, short sides, 4s 4d to 4s 8d; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American, Deptford-killed, 3s 9d to 3s 10d; Liverpool, 3s 9d to 3s 10d; American refrigerated hindquarters, 3s 10d to 4s 1d; forequarters, 2s 6d to 2s 10d; New Zealand hindquarters, 3s to 3s 4d; forequarters, 2s 3d to 2s 4d. Mutton: Scotch, 4s 8d to 5s; wethers, 4s 4d to 4s 6d; ewes, 3s 4d to 3s 6d; Wellington, 2s 4d; Canterbury, 2s 4d to 2s 6d. Lamb: English, 4s 8d; New Zealand, 2s 10d to 3s 2d. Veal: English and Dutch, 4s 4d to 4s 6d. Pork: Country, 4s to 4s 4d; Dutch, 3s 8d to 4s; Irish, 3s 8d per 8lb.

Islington, Thursday.—A good number of beasts, and, although the bulk consisted of fat bulls and rough cattle, trade ruled steady. Sheep entries moderate, but very slow demand for both wethers and ewes, rates being generally 2d per 8lb lower. 7½ to 8-stone Down wethers, 5s 8d to 5s 10d; 9-stone, 5s 6d to 5s 8d; 10-stone half-breds, 5s 4d to 5s 6d; 10-stone Down ewes, 4s 3d to 4s 4d; 11-stone half-breds, 3s 10d to 4s. Lamb trade dull and easier. 5-stone fat Downs, 5s 8d to 5s 10d. Calves met a moderate inquiry, the best on offer making 5s 8d to 5s 10d. Pig trade generally quiet. Neat small, 4s to 4s 2d per 8lb to sink the offal. Total supplies:—135 beasts, 3,130 sheep and lambs, 30 calves, 130 pigs, and 5 milch cows.

COUNTRY.

Ashbourne.—Scarcely an average show of horned stock at the fortnightly market, but some good calving cows and useful fat beasts. Calving cows, £20 to £23; best secondary, £17 to £19; calving heifers, £14 to £17; beef, best qualities, 6½d to 6¾d per lb; secondary, 6d to 6½d per lb. Good and useful fat beasts and spring calves were submitted by auction, the former realising up to £19 apiece, and the latter £14 to £17. A fair average show of sheep; store lamb, 25s to 28s; wethers, 35s to 40s apiece.

Ashford, Tuesday.—Owing to an over supply of horned cattle, sheep, and pigs, trade all round was slow and dragging. The choicest steers and heifers did not command more than 12s per score; while other qualities declined fully 1s per score, and sold at 9s 6d to 10s 6d for secondary quality, and 8s to 9s for butchering cows. All mutton was fully 2d per 8lb cheaper. Down wethers did not exceed 5s 6d, or Kents 5s 2d per stone, while ewes sold at 3s 6d to 3s 10d per stone. Roasting pigs were 6d cheaper on the week, but commanded about 10s per score. Lamb was cheaper, and there was little demand, but veal was in good request.

Basingstoke, Wednesday.—At Raynbird and Sons' sale yard there was a fair attendance of buyers to meet a supply of 48 fat beasts, 54 calves, 541 fat sheep and lambs, 201 pigs, and 37 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £10 15s to £22 5s; fat calves, 50s to £7 10s; small, 20s to 50s; fat wethers, 42s to 52s 6d; fat ewes 29s to 38s 6d; fat lambs, 25s to 47s 6d; fat hogs, 60s to 71s; fat porkers, 40s to 51s; small, 27s to 38s; store pigs, 14s 6d to 16s; dairy cows, £7 10s to £19 15s, etc. A fair supply of fat beasts included some excellent polled Angus from Wolverton Park, and Devons from west country feeders, and a few useful Shorthorns, the remainder being of second class quality. Polled Angus steers made up to £22 5s; heifers, £17 5s; young Devon steers, £16 5s; Shorthorn steers, £16 5s; heifers, £17 10s; cows, £13 10s. There was a fair show of fat sheep and fat lambs, but the attendance of butchers was not so good, and as a consequence the trade for big fat lambs and fat sheep suffered, but there was more enquiry for store sheep. Lambs. Hants down wethers and ewes made 40s, 43s, 49s, 41s, 46s, 40s, 54s, 42s, 40s 6d, 50s 6d, 50s, 52s 6d, 51s, 45s, 47s 6d. Kent ditto, 49s 6d. Southdown wethers, 50s. 8 months old Hants down ewes and wethers, 47s 6d, 48s 6d, 45s 6d, 38s 6d, 48s, 47s, 36s, 44s 6d, 47s 6d, 39s, 38s, 46s 6d, 44s. Southdowns, 34s, 38s 6d. 12 months old sucking lambs, 58s, 57s, 31s. Old ewes, 38s 6d, 35s 6d, 37s, 37s 6d. Kent ewes, 40s. Black face Scotch ewes, 32s. Store Lambs, 26s 6d, 28s. With a short supply of dairy cows, fair prices ruled higher for all the best description of milkers. Store cattle met a better demand. Fat calves sold readily with a brisk trade. Fat porkers with a good enquiry were cleared at an advance. Store pigs met a slow trade. Rating values. For polled Angus and Devon beasts, 7d to 7¼d; Shorthorns, 6d to 6½d; bulls, cows, and inferior beasts, 5d to 6d per lb.; fat calves, 6½d to 9d per lb.; best sheep, 8½d to 9d; second ditto, 8d to 8½d, old ewes, rams, and inferior, 6½d to 7½d; choice fat sucking lambs, 9d to 9½d per lb.; fat porkers up to 10s 6d per score.

Birmingham, Wednesday.—There was a good supply of beasts and a small supply of sheep at our market to day. Trade slow. Beef, 6d to 7½ per lb; mutton, 7d to 8½d per lb; lamb, 7¾d to 8½d per lb; veal, 7d to 8d per lb; bacon pigs, 9s 2d to 9s 3d per score; sows, 9s 6d per score; porkets, 10s 10d per score.

Boston, Wednesday.—A good show all round, and a greatly improved trade. Best beef, 8s; and cow beef, 7s per stone; store beasts, £14 10s to £17; young steers, £9 to £10 10s; milch cows, £18 to £20 10s; calves, 55s to 60s; wether mutton, 8d; ewe mutton, 6½d per lb; store lambs, 20s to 33s; ewes, 40s to 50s; Hampshire rams, £4 to £5.

Bristol, Thursday.—There was a good supply of beef at our market to-day, which met a steady trade. Best qualities made 60s to 62s per cwt, and secondary 58s. A full number of sheep and lambs, for which trade was very dull. Best light wethers made 7¾d per lb, ewes 6d, and lambs 7½d to 8d per lb. There was a moderate supply of pigs on offer, with a steady trade, baconers making 8s 6d per score, and porkers 10s. About 300 store cattle were on sale from Ireland. A fair inquiry, and nearly all sold at late rates.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs ..	2½ in. and under.. ..	8s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in. ..	8s 0d
Under 11 sc 10 lbs	Not exceeding 2¾ in. ..	7s 3d
Under 12 sc	Not exceeding 3 in. ..	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at the market and the prices obtained were as follows:—Beasts, 439; sheep, 930; pigs, 332; horses, 29. Beef, 7s to 8s per stone; mutton, 4s 4d to 5s 10d; pork, 5s 9d to 6s 6d. A few lots store beasts all sold. Fat beasts, large show, prices unchanged. Fat sheep, a good number to hand, and a fair trade. Stores, a fair show, some good lots of ewes. Fat pigs a good brisk trade. Stores, a better trade for all classes.

Canterbury, Saturday.—A short supply, everyone being busy harvesting and hopping. Working lambs are selling at from 15s 6d to 17s; and better class animals from 22s to 25s, the latter being an occasional score of large picked lambs. Old sheep, 20s to 27s per head.

Carlisle, Saturday.—The show of Irish store cattle was similar to that of last week, over 400 heifers, chiefly for wintering purposes, being exhibited. Good attendance of buyers, and fairly strong demand at about the usual rates, the smallest specimens being as low as £5 10s, and the best sorts up to £16 10s. Young pigs a small show, and met a ready sale at 22s upwards.

Dorchester, Saturday.—Large supplies of milch beasts and barreners, while sheep were in short supply and met a good demand. Heifers and calves sold from £16 to £19; in-calf cows, £9 10s to £12 15s each; barren cows, £21 10s to £28 pair. Fat heifers met a dull sale at prices ranging from £18 10s to £21 15s; cows, £14 5s to £15 10s. Horn wethers sold from 52s to 55s; crossbreds, to 56s 6d; down ewes, 41s 6d to 47s 6d; lambs, 24s to 27s 6d; two-teeth maiden ewes and heifers, 36s 6d to 40s.

Dublin, Thursday.—Numbers in market:—Beasts, 4,166, increase, 394; sheep, 10,201, increase, 1,348; calves, 51, decrease, 7. Slow and disappointing trade for all classes of cattle, the improvement in prices noted recently being quite reversed. Sheep and lambs of all classes again on the downward grade, purchasers securing their wants on better terms. Middling and inferior lots very difficult to place. Cattle (best), 31s to 34s per cwt. Other descriptions, 27s to 30s per cwt. Mutton, 5½d to 7d per lb.—GANLY, SONS AND CO.

Dumfries, Wednesday. — Large supplies. Beef in good demand, realising up to 36s per live cwt. Horned bullocks made up to £19; polled bullocks, to £17; polled heifers, to £15; Galloway heifers, to £13; Galloway bulls, to £16; Ayrshire cows to £12; and Ayrshire heifers, to £12 15s. A good show of sheep, which made last week's rates.

Edinburgh, Wednesday.—Larger supplies of store sheep and cattle. Quiet trade for sheep and lambs. Cheviot dinmonts, 21s to 24s; grey-faced sheep, 30s to 35s; half-bred sheep, 37s; best polled bullocks, £15 10s to £16 10s; horned cattle, £14 12s 6d. Fine trade for cows. Shorthorns, £22 to £25; Ayrshires, £17 to £19.

Glasgow, Wednesday.—Supplies shorter, with a moderate demand. Prices steady. Top Scotch cattle, 66s to 68s per cwt; top Irish, 60s to 62s; top mutton, 8¼d per lb; secondary, 7d to 7½d; top lambs, 8½d. Dead meat in fair request at late values. Best Scotch, 6½d to 6¾d; best States, 6d; secondary, 5½d to 5¾d; cows, 5½d to 5¾d.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 288, calves 52, sheep and lambs 5,994, pigs (fat and sows) 16, sucking pigs 17, pigs (stores, not more than ten) 153, pigs (stores, more than ten) 48, colts 1. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 9½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Leeds, Tuesday.—There was a larger supply of cattle in the market to-day, the numbers being 580 compared with 564 last week. Sheep show a considerable increase, totalling 2,620, as against 2,050 at the previous market. Dealers and buyers were fairly represented, but owing to the finer weather and the increased supplies business generally ruled very slow, only the best quality of beef and mutton meeting with anything like a good demand. The entry of cattle was of good quality, chiefly from the North of England, with a large number from Ireland. Cattle dealers found business difficult to arrange, but last week's prices were about realised. Choice heifers and bullocks made 6¾d, good useful beef 6d to 6½d, and cow and inferior beef 5d to 6d per lb. The increased supply of sheep caused business to rule very slow all through the market, this being most pronounced in ewes and rough sheep, which were almost unsaleable. Prices in consequence were slightly lower than last week. Nice small shearlings made 8½d, large and heavy sheep 7d to 7¾d, and ewes and tups 5d to 6d per lb. An average supply of calves were offered, the best veal descriptions making 7d to 7¼d per lb. Dairy cattle met with a quiet demand. Best milkers realised £16 to £20. Numbers at market—Cattle 580, sheep 2,620, calves 12.

Leicester, Wednesday.—Very heavy deliveries of home-fed bullocks, in excellent condition, came to hand, and a brisker trade was done in choice qualities at firmer rates. Choice bullocks made 6¾d to 7d per lb; secondary, 6d to 6½d per lb; and heifers, 7d per lb. Sheep were a large supply, and sold freely at 8¾d to 9d per lb for light-weights, large sheep making 7¾d to 7¾d per lb. Calves were a very dragging trade.

Leicester, Saturday.—Very large supplies of stock in excellent condition. Trade rather sluggish, but prices firm. Bullocks made £14 to £18 per head; milch cows, £16 to £23. Sheep were a slow trade, but choice rams firmer.

Lincoln, Friday.—So few cattle offered that prices are absolutely unquotable. From the large number of sheep, it being the September fair, best breeding sheep made as a rule, up to 35s; inferior animals 25s. Lambs and ewes, 28s to 33s; lambs, 25s to 28s. Large supply of pigs, but practically no dealers, latter being scared by the reports of swine fever. Stores sold at 35s to 40s and sucking pigs at from 12s to 18s.

Newcastle, Tuesday. Large supplies, heavy trade, prices easier. Numbers:—Cattle, 1,957; sheep and lambs, 9,389; pigs, 698; calves, 67. Prices (sinking offal):—Beef, 5s to 8s 3d;

pork, 5s to 7s 6d per stone; mutton, 5d to 8d; lamb, 5½d to 8½d; veal, 5d to 9½d per lb.

Newport, Wednesday.—There was a good supply of cattle, sheep, and lambs, but only a moderate trade. Prices ruled about the same as last week.

Norwich, Saturday. The supply of store cattle here to-day was considerable, and was made up largely of Irish lots; a good trade was passing at former rates. The supply of fat beasts was also large; prices ranged from 7s 9d to 8s and 8s 3d per 14lb. Store sheep were in average supply, and there was a good demand at an advance of 1s to 2s per head, ams making 25s to 38s, and keeping shearlings 40s to 48s per head. Fat sheep were quoted at 8s 6d to 9s and 9s 6d per 14lb.

Preston, Wednesday.—A fair supply of fat beasts, and rade slow. Best animals ma e 4s 6d to 4s 8d, and middlings s to 4s 4d per stone. A large supply of sheep, and trade very low. Best sheep made 5s 6d to 5s 8d, and middlings 5s to s 4d per stone. Very few lambs offered. Calves in short upply, and trade fair, at 5s to 5s 8d per stone. No store beasts. ig trade good.

Sheffield, Tuesday.—A fair show of mulch beasts and a good demand for the best lots, which made from £18 to £22; econdary, £13 to £16.

Shrewsbury, Tuesday.—834 cattle, 61 cows with calves, 780 sheep and lambs, 102 calves, 35 fat pigs porkers and 203 tore pigs. Larger supplies all round. Fat stock firm at late ates. Cows with calves and store stock brisk. Quotations:— Beef, 6d to 7½d; mutton, 7½d to 8½d; and veal, 7½d to 8½d per b. Porket pigs, 9s 6d to 10s 6d; and bacons, 8s to 9s 6d per core. Cows, with calves, up to £21 17s.

Spalding, Tuesday.—A fair show of beasts, and a good rade for beef, the top price being 8s per stone. Stores, £10 to £16. In the sheep market there was a brisk trade, all breds, 8½d; long woods, 8d per lb. Good d mand for reeding ewes.

Stockton, Wednesday.—There were 182 cattle, 1 calves, 51 sheep, and 130 lambs on offer. Best cattle were a small how, and trade was rather slow at 8s to 8s 3d per stone; rougher inds, 7s to 7s 6d per stone; grazing cattle, £7 and £9. For oung sheep and lambs there was a fair demand at 8d and 8½d; wes, 7d; tups, 5d per lb.

Taunton, Saturday.—Fairly good supply, moderate ttendance, but good trade.

Thame, Tuesday.—There was a full supply of stock of all descriptions, and with a good attendance of buyers trade ruled irm, the best quality selling at higher prices than of late. Mr. Bond had a busy day. His entries comprised 120 fat beasts and own calving heifers, 399 fat sheep and stores, 85 fat and reaning calves, 134 fat and store pigs, and 2 hor es. Fat bullocks made £16 to £19; fat heifers, £14 to £22 5s; down calving eifers, £13 to £17 10s; fat wethers, 43s to 56s 6d; fat ewes, 8s to 52s; fat lambs, 28s to 42s; Scotch lambs, 11s 6d ach; fat calves, £3 to £5 16s; cow calves, 21s to 60s; bull alves, 18s to 40s; fat pigs, 9s 6d per score. Stores made late prices.

Wakefield, Wednesday.—Slow trade for both beef and mutton, but late rates were fairly well sustained. Best beef 9d per lb; useful beef, 6d to 6½d; and other kinds, 5d to 6d. Nice small sheep 8½d; strong sheep, 7½d to 8d; ewes and tups, d to 6d; lambs, 8½d to 9d. Numbers penned:—Fat beasts, 462; sheep, 3,547.

Wakefield, Wednesday.—The beef trade is very slow, nd to meet buyers dealers have to take less money. Consequently last week's top price for choice beef of 6¾ cannot be uite maintained. Mutton also drags, and it is with difficulty hoice sheep make 8½d; good strong sheep 7¾d, and ewes from ¼d per lb. Beasts penned—1,462; sheep, 3,547.

Wolverhampton, Wednesday.—Beasts a good supply, ad trade. Sheep and lambs: Fair number offered, slow rade. Calves small supply, fair demand for best. Milch ows, a very large supply of good animals and much cheaper. Beef 5½d to 7d per lb; mutton, 6½d to 8½d per lb; lamb, 8d o 8½d per lb; veal, 7d to 8½d per lb. Bacon pigs, 9s to 9s 6d er score; porkets, 9s 6d to 9s 9d per score; sows, 7s per score.

Worcester, Saturday.—There was an increased attendnce and better supplies. Good trade for beef, at full prices, nd wether mutton sold well. Lambs and fat calves were learer. Pigs made late rates. Beef, 6d to 7d; wether mutton, ¼d; ewes, 7½d; veal, 8d; and lamb, 9d per lb.

Worksop, Wednesday.—The best market for years on eger day—almost up to the average. About 80 beasts, 200 heep, and 40 pigs shown. Good attendance of buyers, and air prices were realised. Beef, 6s to 8s per stone. Good demand or sheep, up to 8½d per lb for best, and ewes, etc., 6d per lb.

York, Friday.—Calves, 7¾d per lb; small sheep, 8d per lb; arge sheep, 7¾d per lb; ewes, 5d to 6d per lb; lamb, 9d per b; small pork pigs, 7s per stone; large pork pigs, 6s 6d per tone.

FOREIGN.

Deptford, Wednesday.—Beast supplies comprised 941 ead, this being a decrease of 89 as compared with last Wednesday's figures, and were made up of 758 United States, and 83 Canadian, the latter consisting entirely of ranch cattle. Trade was firm at 4s 4d to 4s 6d, and 3s 10d to 4s per 8lb to sink the offal respectively.

FEEDING STUFFS.

London, Thursday.—Linseed.—The market was steady early in the week, but latterly demand having fallen off, prices have declined. Calcutta spot London passage August-September, 50s; and September-October, 56s; April-June, 45s 6d. Hull quiet, Calcutta April-June, 46s 6d. Azov, Black Sea, prompt and September-October, 56s; October-November, 56s 3d. La Plata, December-January, 50s 6d; January-February, 48s 9d; February-March, 48s 3d. To the continent Bombay is quoted March-May, sellers 49s 6d; buyers 48s 6d. Calcutta to Hamburgh August-September, 50s 3d; April-June, new crop 46s 9d. Linseed oil is quieter and prices for forward delivery are lower. We quote spot pipes and barrels £33 10s; October-December, £32; January-April, £29. Hull spot naked £33; October-December, £31 17s 6d; January-April, £29. Linseed cakes are again firmer. London made, £8 7s 6d. to £8 10s. Russian, £7 17s 6d ex dock. American Westerns at £7 12s 6d to £7 17s 6d. Cotton cakes are again dearer in sympathy with seed. London made £4 15s to £4 17s 6d. Rapeseed.—Owing to the firmness of holders business is much restricted. Yellow Guzerat, March-May, £5s. Yellow Cawnpore, March-May, 43s 6d. Brown Cawnpore 40s 6d. Brown Calcutta, October-November, sold at 44s. Ravison to Hull, September, 38s 6d. Cottonseed.—The disaster at Galveston, and the excitement in cotton have tended to keep the market strong. London, however, continues to abstain from buying. New seed just arrived has sold at £7 7s 6d; old in warehouse is quoted £7 2s 6d. September, £7 8s 9d new; October, £6 18s 9d; November-January, £6 12s 6d. Hull dearer, spot and passage, £7 5s; September, £7 7s 6d; October, £6 17s 6d; November-January, £6 11s 3d paid.—THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes.—Values are again tending upwards, and there is decidedly more inclination to buy, as stocks are practically exhausted, and few buyers have filled their ordinary requirements for the season. Russians are very scarce on spot and afloat, held for an advance of 1s. 3d. to 2s. 6d. per ton. American are unchanged for October-November shipment, while spot parcels are the turn dearer. English are firm at last week's quotations and attract more attention. Cotton cakes.—There have been very few arrivals, and no offers for future shipment, some parcels spot and future paper are held for an advance of 5s. to 5s. per ton. Maize.—Germ meal is again 2s. 6d. per ton dearer for prompt delivery while a fair trade has been done for September-December dispatch at a slight advance. Rice meal has been attracting a good deal of attention at the advance of 3s. 9d. to 5s. per ton for September-December shipments, as it is relatively a very cheap article.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—[illegible] supply of new home-grown wheat, which obtains about the same prices as on Tuesday last; old sound and mouldy are extreme rates. Foreign meets a steady sale at unaltered prices. The new English barley offering is not fin , and ranges from 25s to 28s per 14-lb to growers. Old oats command fully late rates, new unaltered. Beans fully as dear. Flat maize sells steadily at quite late rates. The market is about cleared of spot Odessa. Linseed.—The arrivals are 93 qrs from Amsterdam, 103 qrs Harlingen, 2,325 qrs Hamburg, 250 qrs Libau, 3,531 qrs Petersburg, 13 qrs Rotterdam; total, 6,315 qrs. Linseed has been firm throughout the week at again gradually improved pr ces. Calcutta on the spot does not offer, but April-June new crop is quoted 46s 6d. Black Sea has changed hands September-October and October-November at 55s 9d and 56s. Petersburg, July-August, 56s wanted. Riga and Libau, monthly shipments up to March, 52s. River Plate, December-January, 54s 3d to 54s 6d; January-February business done at 48s 3d. 48s 6d now mostly asked. Cottonseed.—The market has been firm all the week, and further improved in prices all round. Old crop f und buyers at £7 to £7 5s spot and passage, which latter paid September-Fayoumi, and still obtainable. First half October £7, all the month £6 16s 3d, and a fair business done November-January at £6 3s 9d to £6 7s 6d; subsequently, however, this position receded again to £6 5s, which accepted on Saturday, but yesterday there was more inquiry with one or two sales made at £6 6s 3d; and to-day £6 7s 6d to £6 8s 9d paid, but sellers over at latter. Old seed cakes.—All are dearer with firm market. Hemp firm.—KEIGHLEY MAXSTED AND Co.

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 2s. 6d. PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 0s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 5s 0d PER TON. ALL F.O.R. HULL.

WOOL.

London, Friday.—Wool, English, per packet of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 6d to 1s 7d; scoured good, 1s 7d to 1s 7½d; scoured average, 1s 5d to 1s 6d; greasy average to fair, 10½d to 11½d; New South Wales, scoured average, 1s 3d to 1s 4d; greasy average, 8½d to 9½d; South Australian, greasy average, 6½d to 7d; New Zealand, scoured average, 1s 4½d to 1s 5½d; greasy average, 8½d to 9½d; Cape, scoured superior, 1s 6d to 1s 8d; fleece average, 8d to 9d; greasy average, 6¾d to 7d; Natal, scoured, 1s 2d to 1s 3d; greasy average, 7½d to 7¾d. Crossbreds, greasy, Victorian, good to superior, 10d to 1s; New Zealand, fine, 9d to 10d; ditto medium, 7¾d to 8½d; ditto coarse, 6d to 7d.

London, Saturday.—The list of arrivals for the sales commencing on October 9 was closed yesterday, when the total amounted to 251,321 bales (219,924 bales Australasian and 31,397 bales Cape). Deducting what has been forwarded direct, but adding the wools held over from last series, the total available amounts to 366,000 bales, of which about 136,000 bales are crossbred. It having been decided that no sixth series is to be held this year, the above quantity represents the entire supply in the London market until the commencement of the first series in 1901 on January 15. Assuming the total quantity available for next series to be sold, or a moderate quantity remaining on hand to be balanced by direct importations up to November 30, the date when the import list for the season was closed last year, the total deliveries will amount to only 1,600,000 bales, against 1,924,000 bales in 1899, thus showing a reduction of 324,000 bales. We estimate that the actual decrease in production amounted to only 120,000 bales, all merino wools, viz., 70,000 bales Australasian and perhaps 50,000 bales Cape, though it is extremely difficult to form a correct idea of the Cape production, as there are still large stocks in South Africa. The balance would represent the quantity to be shifted from the present year to the next. Since the close of the July sales the market has remained perfectly quiet. The reports from the manufacturing districts in this country were fairly satisfactory up to the last week in August, when the collapse in the North of France occurred, and even in this [illegible] general position, though the lower prices in the home market have naturally affected the values of coarse fine lots.—HELMUTH SCHWARTZE AND Co., 3 and 4, Moorgate-street buildings, E.C.

Bradford, Thursday.—No important alteration in rates at this market to-day: standard 60s; botany top are probably sold at 1s 9½d, but holders are by no means anxious to sell 40-6's; and lower cross-breds are steadily enquired for, but values, which are very low, remain unaltered in English wools. Lustre hogs are in [illegible] rates.

Canterbury. [illegible] in prices. [illegible] 4d to 5d; cross-breds rather lower at from 6d to 7d per lb.

Leicester. [illegible] still maintained [illegible] cerned. There is a fair [illegible] and an improved inquiry has a tendency to harden prices. In other sorts business and values are steady, except in the most inferior kinds, which are depressed and weak. There is an encouraging sale for lambs' wool and knitting yarns. Trade in fine cashmeres is dull.

MANURES.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Black-faced Mountain ram is the property of the executors of the late Mr. T. Dargue, Burneside Hall, Kendal, Westmorland, who exhibited it at the Royal Agricultural Society's Show at York this year, and it came out top of the class for rams of the breed two-shear and upwards. It was bred by Mr. Fleming, Threepland, N.B., and was born about April 20th, 1898.

The photograph from which our illustration of a Harness Horse was reproduced was taken at the recent Royal Dublin Show. This horse, which was driven by Miss Arnold, of Inverness, won the first prize in its class.

STOCK AND SHOW NOTES

By Herdsman.

I would remind horse breeders that Saturday next (September 22nd) is the last day for making entries for the Wembley Park Horse Show, which takes place on Wednesday, the 26th inst. The trotting display was one of the features of last year's show, and it promises to be so again on Wednesday week, for it is announced that Mr. Walter Winans' Lake Erie and Princell will attempt to beat the two mile pair-horse record of 5 minutes 37½ seconds now held by them. Mr. Walter Winans will also himself drive Barney F. to beat the amateur drivers' and waggon mile record of 2 minutes 52 2-5 seconds held by his horse Fides Stanton. Mr. Louis W. Winans' Passing Belle and Rhoda Ferrand will attempt to beat the English pair mile record of 2 minutes 35 1-5 seconds which they at present hold; and a horse of his will attempt to beat the English quarter-mile record of 38 2-5 seconds at present held by his Moxie. Mr. Vero Shaw, 77, Fleet Street, E.C., is the secretary and manager of this show, and from him can be had prize schedules, entry forms, etc.

Mr. J. J. Cridlan, of Home Farm, Maisemore Park, Gloucester, has sold the yearling Aberdeen-Angus bull Cavalier of Maisemore (16370) to Mrs. Calmady, of Newton Abbot, Devonshire, who has a polled herd; the bull is of the choicest strain of the Pride of Aberdeen tribe, the sire being Blackwood, brother of Bion, the 300-guinea bull at the head of Sir George Macpherson Grant's Ballindalloch herd, and whose grandsire is the incomparable champion Equestrian, of the Auchorachan herd.

The fourth annual show and sale of registered Kent or Romney Marsh rams, held under the auspices of the Kent or Romney Marsh Sheep Breeders' Association, takes place on Friday, the 28th inst., in the Cattle Market, Ashford. The entries, which number 445, have been made by the following breeders:—The Right Hon. Earl Sondes, Mr. A. Amos, Mr. J. P. Barnes, Mr. G. Buley, Mr. N. Clayton, Mr. F de B. Collard, Mr. G. Farmer, Mr. C. File, Messrs. C. File and Sons, Mr. Arthur Finn, Mr. F. H. Harvey, Mr. E. P. Hogben, Mr. W. Millen, Mr. F. Neame, Mr. L. H. Page, Mr J. E. Long, Mr. J. D. Maxted, Mr. W. E. Quested, and Mr. H. Rigden. The judging will take place at 9 a.m., and the sale will commence at 10.30 prompt. The annual dinner, to which members and the public are invited, will be held at the Saracen's Head Hotel, Ashford, under the presidency of the Right Hon. A. Akers-Douglas, M.P., on Thursday, September 27th, at 7 p.m. Mr. W. W. Chapman, Room 32, Fitzalan House, Arundel Street, Strand, W.C., is the secretary of the association, and from him can be had catalogues and fuller information respecting the show and sale.

The entries for Volume 6 of the Polo Pony Stud Book close on Monday, October 1st. The acknowledged utility of the mounted infantry in the present war in South Africa has demonstrated the value of the pony of 14.2 hands, and the society has already represented to the Government the necessity for encouraging the breeding of the riding pony. Breeders should therefore be prepared to meet the undoubted demand that must arise. The Polo Pony Stud Book affords them the best information procurable as indicating the strains to which they can resort in the production of the animal required, while enabling them to register their young animals.

Per the ss. Paparoa, which left London on Wednesday last, Messrs. Alfred Mansell and Co., of Shrewsbury, shipped to Mr. Mitchell, of Jericho, Tasmania, Mr. P. L. Mills' highest-priced ram of this season, a sheep of beautiful character, with a close, merino-like fleece, and all the best attributes of the modern Shropshire. This ram was sired by Odstone Peacemaker (10048), bred by Mrs. Barrs from a Childe Harold ewe, and owning as his great-grandsire Viscount Harrington (8494), bred by the late Mr. T. Mansell.

On Monday, the 3rd inst., Messrs. Alfred Mansell and Co., Shrewsbury, shipped from Liverpool, per the ss. Hyanthes, two valuable three-year-old Clydesdale mares to a leading estanciero near Buenos Ayres, viz., Lily Flashwood, by the Glenklen's premium horse, Flashwood's Best (9211), and Fair Diplomat, by Mr. Picken's grand horse Crown Agent (10053), a grandson of Prince of Wales (673). This is the second consignment by Messrs. Mansell and Co. of Clydesdales for the same estancia.

Messrs. Alfred Mansell and Co., of Shrewsbury, shipped on Wednesday, to Mr. G. Simonds, of Tasmania, from the port of London, per the s.s. Paparoa, a high-class Shropshire shearling ram, selected from Messrs. Evans's flock, by Star of Fame (10144), a well-known sire by Star of the West (8764), dam by Star of the West (8764), and going back to two noted showyard winners, Corston Artist (5948), winner Highland Agricultural Show, 1882, and Royal Sceptre (3705), winner Shropshire and West-Midland Show. This ram was specially selected for his fine dense fleece and clear, cherry skin, combined with high quality, a beautifully-covered head, and perfect type.

The entries for the forty-eighth Birmingham autumn exhibition and sale, which takes place on the 20th inst., number 236, as compared with 195 at last year's show. The catalogue comprises 97 cows and heifers, a large proportion of these having calves at foot, and many others shortly due to calve. There are 59 entries in the class for bulls between twelve and eighteen months old, and 80 in the extra stock class for bulls of any age, entered for sale only. Amongst the animals entered are many which have gained honours at the principal county and other shows, and also winners of the Shorthorn Society's premiums.

Mr. Charles Showell, of Snitterfield, Stratford-on-Avon, is taking advantage of this opportunity to dispose of his entire select herd of 17 well-bred cows, heifers, and bulls, including several show animals. Mr. W. Arkell, of Kempsford, Fairford, is sending ten heifers of good milking strain from his well-known dairy herd. These are being disposed of owing to the farm being overstocked. Mrs. Holland, of Newport, Salop, has entered 17 cows, heifers, and bulls, and other noted herds represented are:—The Duke of Manchester, the Duke of Richmond, the Earl of Camperdown, the Earl of Powis, the Earl of Suffolk, Viscount Baring, Lord Lilford, Lord Penrhyn, Lord Sherborne, the Right Hon. F. J. S. Foljambe, Sir Joseph Pulley, Bart., Sir James Rankin, Bart., Colonel Blake, C.B., Colonel Makins, Captain Mytton, Captain Reeve, Captain Whitting, Messrs. S. H. Allen, D. Arkell, J. W. Barnes, N. Benjafield, R. Blezard, C. W. Brierley, F. P. Bulley, R. P. Cooper, J. R. Crawley, J. P. Cross, P. A. and G. T. Evans, G. Freeman, F. R. Fry, John Garne, W. T. Garne, G. Gerrard, J. and T. Harrison, A. Hiscock, jun., W. J. Hosken, T. R. Hulbert, G. F. King, W. S. Marr, C. E. Morris, J. Naylor, J. A. Preece, B. Read, Leopold de Rothschild, W. W. Slye, T. Stokes, J. Thorley, J. C. Toppin, W. H. Tremaine, J. H. Wheatley, R. Wood, etc.

This exhibition and sale affords an excellent opportunity to secure, at reasonable prices, valuable stock of the highest order of merit, the pedigree of every animal being guaranteed by the exhibitors as eligible for, or already entered in, the herd book. No higher reserve than twenty guineas can be placed on any animal entered, and a large number are for unreserved sale. The judging commences at 8.30, and the sale at eleven o'clock. Catalogues (price 7d. each by post) may be obtained from the secretary, Mr. W. H. Lythall, Bingley Hall, Birmingham.

Mr. L. A. Macpherson, of Wyrley Grove, Pelsall, Staffordshire, having let one of his farms, has instructed Messrs. Macdonald, Fraser, and Co., Limited, Perth, to sell by auction on Friday, the 28th inst., a number of his pure-bred Aberdeen-Angus cattle, the catalogue comprising twenty-eight cows, eleven two-year-old and five yearling heifers, four heifer calves, and three bulls. Mr. Macpherson's herd was founded in the autumn of 1890 by the purchase of two cows and eight heifers from Mr. John Rattray, Phoineas, and the following spring the bull Roisterer was purchased from Sir George Macpherson Grant's herd, and since then females have been purchased from the Advie, Naughton, New Southgate, Glamis, and Cullen House herds, whilst only bulls from the best herds have been used. Animals from this herd have rarely been exhibited, but this year a few were sent to the Royal, the Great Yorkshire, and Staffordshire Shows, and won one first, four second, and three third prizes, besides special prize for the best beast in the show at Stafford.

Mr. George Wainwright's entire stud of Shire mares, fillies, and foals is to be sold without reserve at the Monks Heath Hall Shire Stud, Chelford, Cheshire, on Wednesday, the 26th inst. All the mares are nicely bred, the Premier blood predominating as the most suitable to mate with the home stud horse Ercall Wynn, by Lincolnshire Lad II. The fillies and foals are also a good lot. Monks Heath is very getatable from Crewe or Manchester, and the sale being fixed for the day before the Ashbourne and Altrincham Shows will prove convenient to those attending from a distance. The sale will commence after a 12 o'clock luncheon, and will be conducted by Messrs. Sexton, Grimwade and Beck.

I would draw attention to the fact that to-morrow (Tuesday) is the date of the Hitchin Foal Show and Sale. For the sale, which will commence at one o'clock, Messrs. Sexton, Grimwade and Beck have already secured an entry of about sixty animals, the property of various gentlemen, amongst whom are several well-known breeders.

On Thursday next, Messrs. Sexton, Grimwade and Beck will dispose of a number of Shire horses belonging to Mr. F. Crisp, J.P., D.L., at the Girton Stud, Cambridge. This will be the last of the series of annual sales held by Mr. Crisp, as, having recently let two farms on the estate, he has decided to reduce his breeding stud, and for the future go back to his original plan of periodical sales. The catalogue for Thursday contains some thirty-five brood mares and fillies, and all the foals reared at the stud this year. All will be sold without reserve, and seeing how well they are bred, the sale should prove most attractive. Amongst the foals are two direct descendants of Starlight, by Bury Victor Chief and Marmion II., out of the dams of Southgate Charm and Girton Sunlight. Other foals are by Marmion II., Mormaer of Batsford, Markeaton Royal Harold, and Southgate Lincolnshire Lad, the mares being put to the same sires again. The mares will be sold according to age, commencing with the oldest in each class. All the foals are entered as produce for the next volume of the stud-book.

Captain Devereux H. Mytton's Garth Hall herd of Shorthorns, which was established on good sound old blood about thirty years ago, has been so prolific that a sale is now absolutely necessary, and on the 25th inst. Messrs. Lythall and Walters will dispose of eighty-six cows, heifers and bulls, at Garth Hall, which is about three miles from Welshpool. The animals have a good reputation as beef and milk producers, and being bred and reared in a hilly district in North Wales, are very robust in constitution. The cows are all young (one only being over five years old), are regular breeders, and free from any known defect in any way, and, with one exception, will be offered in ordinary store condition from their pastures. There are a large and good lot of two-year-old heifers, nearly all with

calves at foot, as well as several yearlings of great promise for show purposes. In former years the bulls have met a ready sale at Bingley Hall, where remunerative prices and several honours have been obtained, and specimens from the herd there selected have afterwards been winners at the R.A.S.E. and other important exhibitions. The animals bought for export will be sold subject to the tuberculin test. The catalogue will also contain fifty-five well-bred Shropshire sheep. The sale will commence after a twelve o'clock luncheon.

I have had sent me a copy of the prize-list for this year's fat stock show of the Birmingham Agricultural Exhibition Society, which will be held in Bingley Hall on December 1st, 3rd, 4th, 5th, and 6th. The classes and prizes are exactly the same as last year, and there is but little change in the list of challenge cups and special awards. In the pig section the twenty-guinea silver challenge cup for the best pen is this year given by the hotel and innkeepers of Birmingham, and they do not offer, as before, a five-guinea cup for the best pig in the single classes. Last year the challenge cup was given by the Bingley Exhibition Hall Company, Ltd. I only noticed two other alterations. In the corn section a ten-guinea silver cup is offered for the first time by Mr. Henry Mitchell for the best sample of one bushel of barley, which must represent a bulk of not less than ten quarters; and instead of the ten-guinea cup for the heaviest beast in the show there will this year be a prize of five guineas for the heaviest beast, three guineas for the second, and two for the third heaviest beast in the butchers' class. The entries close on November 1st with the secretary, Mr. W. H. Lythall, Bingley Hall, Birmingham.

At Grantown-on-Spey, on Thursday in this week, Messrs. Macdonald, Fraser and Company, Limited, of Perth, will hold a sale of pure-bred Aberdeen-Angus cattle, the animals—seventy-three in number—being from the herds of various breeders in the Strathspey district.

At the Peterborough Repository, on Friday, Messrs. Sexton, Grimwade and Beck will conduct a special sale of show mares, fillies, and foals, the proceedings to commence at one o'clock. The catalogue consists of fifty-three animals, selected from the shows of about five-and-twenty breeders in different parts of the country.

The first sale of pedigree Welsh Black cattle held under the auspices of the North Wales Black Cattle Society, of which Colonel Henry Platt, C.B., is president, will take place on Tuesday, the 25th inst. at the Madryn Home Farm, which is midway between Aber and Llanfairfechan, on the Chester and Holyhead section of the London and North-Western Railway. Sixty-two animals are catalogued, and they are from the herds of Colonel Henry Platt, C.B., Colonel Sandbach, Messrs. R. M. Greaves, Thomas Roberts, Aber; C. F. Priestley, Hirdrefaig; J. R. Jones, Bodfeirig; O. Parry Jones, Plas Llechylched; R. W. Pritchard, Coedmarion; Ed. Griffith, Tyddyn Canol; J. Williams, Cerrig Barcut; D. Roberts Jones, Crugeran; Owen Jones, Bodafon; Thomas Jones, Cefnmaesoglan; Hugh W. Roberts, Llandinorwig; and William Jones, Marian. All the animals which will be offered have either been already entered in the published volumes of the Society's Herd Book, or are eligible for entry in its next volume (now in course of preparation), and the showyard records of such as have already been exhibited, as well as of the sires and dams of many of the younger animals, indicate the high class of the cattle. The auctioneers are Messrs. W. Dew and Son, Wellfield, Bangor, and Trinity Square, Llandudno, and from them catalogues and further information can be had.

Mr. John Robert Jefferies, of St. Helen's Lodge, Ipswich, and a member of the firm of Messrs. Ransomes, Sons, and Jefferies, Ltd., Orwell Works, died suddenly on Wednesday. Mr. Jefferies, who was in his sixtieth year, had been ailing for some time, but on Tuesday became worse, and Mr. A. T. Wood, his medical attendant, and Mr. Jefferies' son-in-law, Dr. Ward, deemed an operation necessary. Dr. Herbert Brown was called in for the purpose, and so satisfactorily was the operation performed that there appeared every hope that the patient would recover. However, later he showed signs of relapsing, and succumbed on Wednesday morning from appendicitis.

The Foot-and-Mouth Disease.

The following circular was issued on Thursday by the Board of Agriculture to the clerks to the local authorities throughout England:—

"I am directed by the Board of Agriculture to draw the particular attention of your local authority to the fact that within the past six weeks outbreaks of foot-and-mouth disease have occurred in the East Riding of Yorkshire and in Denbighshire, whilst today the disease has been declared to exist in the neighbourhood of Melksham, in Wiltshire.

"The Board cannot but regard the fact that the disease has appeared within a few weeks in districts so widely separated, as an indication that foot-and-mouth disease has in all probability existed in unknown centres for some time past, and they fear that unless the utmost vigilance is exercised by local authorities, a grave danger of a widespread epidemic may arise. I am, therefore, to ask you to be so good as to at once call the attention of your local authority to the matter, and to ask them to use every possible means to obtain immediate information as to the appearance of any suspicious case of the disease in their district, and in the event of such reports being received to at once put in force and rigidly carry out the provisions of the Foot and Mouth Disease Order of 1895.—I am, etc.,

"T. H. Elliott, Secretary."

Jerseys as Farm Stock.

There are possibly thousands of instances in which a herd of Jerseys, either large or small, might be kept with advantage for the production of butter, or even of milk where milk is retailed by the farmer himself. First, with regard to milk, there is a danger, as has already been pointed out in this column, that the price of milk may permanently decrease, but we would urge upon the consumer the importance of paying a good price in his own interest, and insisting upon a first-class article.

Milk should be Rich

to commence with, but there is no milk which can compare with that of the Channel Islands cattle, and if a farmer can retail that at 4d. a quart it will pay him to do so, while it will still better pay the consumer who has the good fortune to obtain such milk. Although the remark does not apply to the supply from every dairyman, still we are convinced that pure Jersey milk purchased by any head of a family may be once skimmed of its cream and still prove equal in quality to the average sample left at the door, and be it remembered that cream obtained from this milk is beyond all comparison superior to anything else which is purchasable at any price. We would rather pay 50 per cent. more for pure Jersey milk, which we knew to be clean, than for the average milk of the average dairyman, often unclean and equally often imperfect. The purity can only be guaranteed when milk has been what is termed "sterilised" and delivered in bottles, but this question we propose to deal with on another occasion.

Jersey Butter.

Let us, however, deal with the question of butter production from the Jersey cow. It so happens that there are large numbers of tenant farmers who have no sale for their milk for various reasons, but who are compelled to produce butter. In the first place, the butter yield of the Jersey is probably a third larger than that of the average cattle of the country. A good cow will produce 300 lb., and there is no reason why, with proper care in selection and in breeding, a herd of cows should not be collected which average this, or very nearly this quantity. It must be admitted that anything approximating to 300 lb. per cow must pay handsomely, inasmuch as Jersey butter, thoroughly well made, readily sells at 16d. a pound, and in some hands at 18d. But the question will be asked, How about the skim milk? If Jersey milk is skimmed under the principle of shallow setting, the butter will be all the better, and but a very small portion of cream will be lost, but that small portion will be sufficient to so enrich the milk that it will be practically adequate to the feeding of calves in their second stage. Jersey milk is not only richer in fat than other milk, but also richer in casein and albumen, and consequently more valuable as a calf food. Thus, in our opinion, a Jersey herd might be

Made to do Double Duty

—cows producing butter for the market and milk for the rearing of calves, which are much more profitable than those who do not rear commonly suppose. It has frequently been shown, and especially by the Yorkshire College authorities, that skimmed milk may be enriched with oil or fat for feeding calves right along; but we believe that where Jersey milk is used, not only would less oil be essential in the first stage of milk feeding, but that in the second stage it might be dispensed with altogether; for, much as we value the separator in the dairy, we have never been able to ignore the practice of the farmers in parts of Normandy where calves are fattened for the market upon milk which has been once skimmed for the production of the finest butter.—*Yorkshire Post.*

Sale of Mr. Ker Colville's Shorthorns.

Messrs. John Thornton and Co. sold by auction on the 7th inst., at Bellaport, Shropshire, a large portion of the Shorthorn herd belonging to Mr. H. Ker Colville. The cattle had been bred on a cold high-lying farm, and were good milkers. During the last three years the first prize has been won each year for the best lot of bulls bred by the exhibitor at the Crewe Show. The highest price was 60gs., paid by Sir Oswald Mosley for Bellaport Faithful, a nice roan heifer that won first prize at the Cheshire Show this year. We give below a sale list of the principal lots, with purchasers' names and prices:—

Sale of Shorthorns at Burghley Park.

The greater portion of the old-established herd of Shorthorn cattle bred by the Marquis of Exeter, and the small, choice herd bred by the late Mrs. Franklin, of Grantham, were sold by auction on Thursday last by Messrs. John Thornton and Co., at Burghley Park, Stamford. There was a good local company, and many of the lots were purchased to keep in the county. Mr. J. Langham, of Stroxton, secured three well-bred cows and the stock bull Jack Tar for his herd near Grantham. The entire herd realised £937 2s. 6d., an average price of nearly £21 each. We append a sale list of the highest priced lots:—

Sale of the Trescowe Herefords.

This fine herd of Hereford cattle, which has been reared in Cornwall by Mr. R. S. Olver and his father for over half a century, was sold by auction on Tuesday by Messrs. John Thornton and Co. Very few Hereford breeders attended the sale, although there was a large local company. The cattle were rather wild, having scarcely been handled, but they were all in a healthy breeding condition. Prices ruled very low, and there was little competition. The following were a few of the highest priced lots:—

COWS AND HEIFERS.	Gs.

Sale of Sir W. Walrond's Devon Cattle.

On Thursday a large company of breeders was present at Bradfield, Cullompton, Devon, for the sale of Sir William Walrond's herd of Devon cattle. Sir William started the Bradfield herd about ten years ago, and from time to time he has gained successes at all the chief shows. He has been careful to secure the best blood, and, as a result, the animals were just those most likely to be of service in connection with other herds. Nearly the whole of the animals which Messrs. Hawkes, Risdons, and Andrew brought under the hammer on Thursday were in excellent breeding condition. About eighty animals were catalogued, and the whole were submitted without reserve, with the exception of three—Moss Rose 22nd of Pound, the beautiful cow which was formerly shown by Mr. A. C. Skinner, and won so many prizes. At Bradfield she has been used entirely for breeding purposes, and is now in calf by Masterpiece. The reserve price was not reached, and Sir William was rather glad to keep her. The second animal on which a reserve was put was Bradfield Pearl 1st, by Royalist, a very graceful heifer, up to show form and full of character. She was also bought in. The other animal on which there was a reserve was the stud bull Royalist the 22nd of Pound, a son of Masterpiece. The biddings were slow at the start, but the sale was a very satisfactory one for the young stock.

The cows and calves were first submitted. Columbine, which led the way into the ring, originally came from Mr. Rogers's herd, and was thought by many to be the best cow in calf offered. She was secured by Mr. Hemborough, of Honiton, for 26gs. Mr. Bowerman, of Williton, gave 26gs. for Lady Portman, the sixth descended from the Cothelstone herd, while Mr. A. Skinner, of Pound, bought for 23gs. Curly 2nd of Pound, which has the old Cutsey blood in her. The best bull calf by General Mercier and Moss Rose was bought by Mr. Norris, of Copplestone, for 17gs. A Royalist 2nd of Pound calf was secured by Mr. Salter, of Culmstock, for 13gs., and another by the same sire went to Mr. Hartley for a corresponding amount, while a third by the same sire was bought by Mr. Bennett, of Morchard Bishop, for 10gs. The cow calves were a numerous and promising lot, and sold well. One by General Mercier, from Curly 2nd, was purchased by Mr. Brown, of Buckland Filleigh, for 15½gs., while another by the same sire was sold to Mrs. Earle, of Highampton, for 11gs. The heifers were a very good lot. Mr. Anderson, of Ilfracombe, gave 19gs. for one by Bradfield, K.C.B., out of Broad the 2nd, Mr. Chichester, of Barnstaple, giving 14½gs. for another from the same sire. The Royalist heifers were in good demand. Sir Thomas Acland gave 16½gs. for one, Mr. Perry 15gs. for another, Mr. Pratt (of Payhembury) 13½gs. for one, Mr. Hoult (of Exeter) 12gs., and Mr. Bowerman 10gs. A Fireaway heifer was purchased by Mr. Abid, of Dulford House, for 14gs. There were five bulls in the catalogue—Royalist the 2nd of Pound; sires the 3rd, 6th, 8th, and 9th, of Bradfield. Royalist the 2nd took first prize at the Bath and West of England, Devon County, and other shows in 1897, and also carried off several prizes in 1899. On being submitted to auction the reserve price was stated to be 50gs., and there being no bid, the animal was withdrawn. Sire the third made 15½gs., being secured by Mr. P. A. Leach, of Thorverton. For 26gs., Sire the 6th was secured by Mr. Anderson, and Mr. Webber, for 17½gs., purchased Sire the 8th. Sire the 9th passed into the hands of Mr. J. Norman, of Stoodleigh, at 23gs. Four fat steers were offered. Mr. W. Row, of Willand, bought two at £23 and £18 respectively, the other two going to Mr. P. Rew, Willand, for £19 5s. and £16.

Transactions in Store Stock.

[From the Irish Department of Agriculture and Technical Instruction.]

The fair at Hospital, co. Limerick, on Monday, was a small one, composed chiefly of calves and one-and-a-half-year-old cattle, for which the demand was very good. There was a fair supply of sporters, but demand only moderate. The small supply of lambs met a ready sale. Prices: Calves, best class, £5 5s. to £6 6s. 8d.; second class, £4 to £5. Yearlings, first class, £8 10s. to £9 15s.; second class, £6 to £8; third class, £4 10s. to £5 5s. Two-year-olds, first class, £11 15s. to £14; second class, £9 to £10 10s. Springers, first class, £15 to £18; second class, £11 10s. to £14 10s.; third class, £9 to £10. Lambs, first class, £1 to £1 5s.; second class, £1 to £1 5s. 6d. Young pigs, eight to ten weeks old, sold at from 18s. to 22s.

At Kells Fair, co. Meath, held on Monday, there was only a small supply of stock. A keen demand prevailed for nice shapely cattle, and only inferior animals remained unsold. Prices:—Yearlings, first class, £8 10s. to £9 10s.; second class, £7 to £8. Two-year-olds, first class, £11 15s. to £12 15s.; second class, £10 10s. to £11. Three-year-olds, first class, £14 to £17; second class, £12 5s. to £13. Springers, first class, £15 to £18; second class, £12 10s. to £13 10s.

At Cavan Fair, held on Tuesday, there was only a small supply of cattle, which met a good demand; especially one and two-year-old heifers. Springers were plentiful and sold well. Sheep were few, and lambs in good condition met a ready sale. Prices:—Calves, second class, £3 13s. 4d. to £4 2s. 6d. Yearlings, first class, £8 to £8 11s. 3d.; second class, £6 to £7 6s. 8d. Two-year-olds, first class, £11 2s. 6d. to £13; second class, £8 5s. to £10 5s. Springers, first class, £16 to £19 10s.; second class, £12 10s. to £15 10s.; third class, £9 10s. to £10 10s. Lambs, first class, £1 10s. to £1 15s.; second class, £1 5s. to £1 8s. Hoggets, second class, £1 12s. 6d. to £1 16s. 8d.

HORSES.

Horse Sale at Glasgow.

On Tuesday Mr. Vine held a sale of horses at his horse bazaar, opposite Buchanan Street Station, Port Dundas Road, Glasgow. There were ninety animals catalogued, consisting principally of carriage and coaching horses, while there were also a number suitable for van and cart purposes, as well as a few cobs and ponies. Among the chief consigners were: Mr. Robert M'Intyre, Rothesay; Mr. Bartholomew, Millport; Mr. Fairlie, Dunoon; Mr. A. Pattison, Dunoon; Mr. James M'Ginty, Yoker; Mr. Smith, Partick; and Messrs. Brown, Smith, and Co., Buchanan Street. When the sale started there was a good attendance of buyers forward from all parts. Business was good, the demand for all classes being keen throughout. Carriage and harness horses experienced the best demand. Bids came for them readily, and they realised satisfactory prices. Cobs and ponies had a fair selling trade. Cart horses of a good class were in request, and they sold dear. Carriage horses of the best class realised up to 40gs., secondary to 23gs., and inferior down to 7gs. Coaching horses realised from 6 to 36gs., according to style, substance, and action. Cart or draught horses of the best class made 35gs., secondary and inferior from 5 to 20gs. Ponies and cobs sold from 5 to 23gs., all according to style and action. Vanners sold from 5 to 30gs.

SHEEP.

The Condition in which Sheep Should be Exhibited.

At a recent meeting of the committee of the Irish Cattle Traders' and Stockowners' Association, the president, Mr. William Field, M.P., said that it had been brought under his notice recently at Ball's Bridge that an esteemed member of the Association had exhibited rams and sheep with an unshorn patch of wool left on each. He thought this was a practice that ought to be insisted on at all shows where sheep are exhibited, as it enabled both judges and spectators to estimate the amount of wool which might be expected from any particular fleece, and he regarded this as a matter of much importance on account of the amount and quality of the wool forming a large element in the market value of sheep. He was convinced that the enforcement of the practice at shows would conduce to honest uniformity of shearing, which was hardly the case at present, and he felt certain that if such a rule were enforced there could be more accurate judging, and in that way enterprising and intelligent stockowners would be encouraged to propagate from the very best class of animals—wool-growing as well as meat-producing—to the great advantage of the sheep trade of the country. Attention was called to another objectionable feature in the showing of sheep, namely, the frequent use of colouring pigments in oil on the wool of certain breeds, as the practice prevented animals from being shown in their true and natural condition, the latter being obviously what is desirable in the interests of fair dealing. The secretary was instructed to communicate on these subjects with the Royal Dublin Society, the Royal Agricultural Society of England, and the Highland and Agricultural Society.

Wensleydale Sheep Breeders' Show and Sale.

The Wensleydale Sheep Breeders' Association's eleventh annual show and sale took place on Wednesday at Leyburn. The ewes from distance were not numerous owing to the outbreak of foot-and-mouth disease. The prizes were very much divided among exhibitors. The judges were Mr. Fisher Mewse, of Clapham, Lancashire, and Mr. R. Estbeck, of Lowood, Settle. After the show Mr. W. Lane sold on behalf of the Northallerton Live Stock Mart Co. a large number of pure Wensleydale sheep. The awards at the show were as follows:—

[illegible] 1, R. Bell, Bainbridge; 2, [illegible]; 3, [illegible], Penhill; Wensley [illegible]. The shearling [illegible]

President's silver cup, J. Rhodes, Wetherby; 2, R. Raw; 3, W. Cleasby, Isleheck Grange. Shearling ram: 1, J. Rhodes; 2, W. Cleasby. Ram lamb: 1, G. R. Etherington, Harmby; 2, T. C. Dobson, Kirkby-in-Cleveland; 3, F. J. Ireland, Bulk Bottoms, Lancaster. Ewes: 1, J. Rhodes; 2, W. Cleasby.

At the sale Mr. T. Jother's (Howgrave Walk) shearling rams sold at £5 5s. to £6 15s. Mr. Geo. R. Etherington sold a shearling ram to Mr. Geo. Carter, of Sandhill, Bedale, for £7 5s., while he reserved his shearling ram at £10 10s. Mr. J. P. Sowerby's, of Stokesley, shearling ram sold for £4 7s. 6d. Mr. R. Raw reserved his first and second prize rams at £10 5s. and £12 respectively. Mr. Hugh S. Rowlandson, of Newton Morrell, Barton, Darlington, sold a shearling ram to Mr. J. Chapman, of Leyburn, for £15, while his other rams sold up to £7 5s. Mr. B. J. Hodgson, of Hallwith, Spennithorne, sold his shearling rams up to £6 5s. Mr. T. Styan, of Park Gate, Wensley, sold his second prize three-shear ram to Mr. C. Fawcett, of Craggs Lane, for £10 10s. Mr. W. Cleasby reserved his prize shearling rams at £9. Mr. J. Rhodes, of Stockeld, Wetherby, sold his first prize shearling ram to Mr. John Jackson, of Hunsingore, for £11. His other shearling rams were reserved up to £15. Mr. F. E. C. Dobson's (Carlton-in-Cleveland), ram lambs were sold at £2 5s. to £4 2s. 6d. each. Mr. G. R. Etherington reserved his prize ram lamb at £8 2s. 6d. Mr. J. P. Sowerby, of Stokesley, sold his ram lambs at from £2 2s. 6d. to £4 2s. 6d.; Mr. Henry Storey, of Harmby, sold a ram lamb to Mr. Scott, of Wensley, for £3 5s. Mr. V. E. C. Dobson's ram lambs sold, the second prize ram lamb to Mr. R. V. Ward, of High Ellington, Masham, for £3 8s., and others at £3 15s. each. Shearling rams owned by Mr. F. E. C. Dobson sold at from £3 2s. to £3 5s. Mr. W. Cleasby, of Thirsk, reserved his shearling ewes at £3; while Mr. W. Saul, of Farton Bank, Garstang, sold his ewe lambs from 38s. to 40s. apiece. The principal buyers were Messrs. W. Foster, J. O. Trotter, B. J. Hodgson, M. Wood, J. Rhodes, J. Chapman, Dewhirst (Skipton), Penrose, Maunby, Lee (Manfield, Darlington), Thos. Thompson, C. Fawcett, Geo. Carter, and James Simpson.

A Black-Face Mountain Ram.

The Willoughby Lincoln Longwools.

The annual sale of shearling rams of the Lincolnshire Longwool breed, drawn from the Willoughby flock, took place on Tuesday at Bleak House, West Willoughby, near Grantham. Mr. W. F. Turner, of Sleaford, being the auctioneer. Messrs. Rudkin have generally offered from sixty to eighty rams, but this year, owing to the fact that Lincolnshire wool is somewhat out of fashion and down in price, whilst the demand is not so great as in recent years, only thirty-eight rams came under the hammer, and of these twenty-nine were sold for £260 18s. 6d., or an average of £9 each. The average was not quite so good as the owners could have wished, for the rams were a wonderfully even lot, and as good specimens of the Lincolnshire breed as a farmer could desire. The highest price paid was 26gs., by Mr. Wm. Knight, of Balderton, for a son of The Dean. Mr. John Burrows, of Harrowby, gave 14gs. for a ram by Willoughby Right Buck. A two-shear ram by Best Selected was sold to Mr. Fred Ward, of Quarrington, for 14gs. Mr. Henry Reade, of Great Hale, bought a shearling by King George III. for 11½gs., and 12gs. was the price paid by Mr. J. Freeman for a son of Willoughby Right Buck. A two-shear ram by King George IV. was knocked down to Mr. W. Knight for 11gs., and a son of King George III., a shearling, was bought by Mr. C. Rudkin, of Sapperton, for 10gs. The other prices given were: Mr. W. Fillinghaun, 7½gs.; Mr. H. M. Foster, Sapperton, 8½gs.; Mr. W. Topps, Pickworth, 6½gs.; Mr. G. W. Anyan, Braceby, 8gs.; Mr. J. Freeman, Balderton, 8½gs.; Mr. Holmes, Ingoldsby, 6½gs.; Mr. H. Minta, Burton Coggles, 7gs.; Mr. H. Reade, 6gs.; Mr. G. Strawson, Burton Coggles, 9½gs.; Mr. T. Dickens, Fulbeck, 7gs.; Mr. B. Weston, Stainsby, 6½gs.; Mr. J. W. Hoyes, Ingoldsby, 5½gs.; Mr. E. A. M. T. Fisher, Welby Warren, 9½gs. and 6gs.; Mr. J. Burrows, Harrowby, 5½gs.; Mr. Grayson, Lenton, 7gs.; Mr. J. Freeman, 5½gs.; Mr. Slater, Thorney, 7½gs.; Mr. E. J. Greenwell, 5gs.; Mr. R. Lowe, Pickworth, 6½gs.; and Mr. Rawlinson, Swaton, 5½gs.

Leicester Sheep-Breeders' Association's Sale.

At Driffield on Thursday was held the annual sale of pure-bred shearling rams, tup lambs, ewes, and gimmer shearlings, entered in the Leicester Sheep Breeders' Association Flock Book. The rams were from the flocks of the following breeders: Mr. E. W. D. Walkinson, Weaverthorpe (six); Mr. Joseph Cranswick, Rudstone (ten); Mr. W. D. Megginson, Towthorpe, York (twenty); Mr. John Cranswick, Hunmanby (twelve); and Mr. John J. Simpson, Pilmoor House, Hunmanby (twenty). Mr. Walkinson sent six tup lambs, twenty-one ewes, and eleven gimmer shearlings. The sale was conducted by Messrs. Hornby and Cranswick, and there was a good company present. Mr. Walkinson's rams were all sold at an average of £7 13s. 9d., the highest price being paid by Mr. J. Thompson, of Wauldly, who gave £12 for one (by Helperthorpe 4th, 507), while Mr. T. Stamper gave £10 for another by the same sire. None of the tup lambs found purchasers, but the ewes and gimmer shearlings from the same flock made an average of £2 12s. per head, a pen of four shearling gimmers making £3 2s. each. Only two of Mr. Joseph Cranswick's changed hands, these being at £5 5s. each. Of Mr. Megginson's lot thirteen were sold at an average of £8 6s. 2d., Mr. E. F. Jordan, Eastburn, taking the pick of the lot at £20 5s. From Mr. Simpson's consignment fourteen were sold at an average of £7 5s. each, Mr. Joseph Thompson giving the highest figure, £10 15s., while Mr. Nightingale took one at £9. Mr. John Cranswick only sold two from his flock, at £5 5s. each.

Pedigree Ram Sale at Sleaford.

The annual show and sale of pedigree sheep at Sleaford took place on Thursday, and there was a large attendance of breeders and dealers. Messrs. Hincks, Shakespear, and Lawrence offered 157 pedigree longwool rams, 25 Hampshire Down rams, and 2,130 Lincolnshire longwool theaves, ewes, and lambs. The first prize for the best pen of five rams was awarded to Mr. J. E. Criswell Laughton, and the second to Mr. Charles Clarke (Byard's Leap). The first prize for the best pen of twenty theaves went to Mr. Edward Baker (Morton); second, Mr. J. Tomlinson (Birthorpe). The judges were Mr. R. Bemrose (Frieston) and Mr. A. Dean (Dowsby). Ewes realised 41s. 6d. to 50s. each; theaves, 52s. to 58s.; rams, 5gs. to 20gs.; lambs, 32s. to 36s.

Sale of Leicester Sheep at Pictonshill.

Mr. W. S. Ferguson, of Pictonshill, near Perth, held his fourth annual sale of Leicester sheep on Tuesday, when the company of buyers was the largest seen at any of the sales of the central counties in Scotland in recent years. At the same time Mr. George Pople, of Newhouse, Perth, put forward the whole of his Leicester ewe flock and ewe lambs, in consequence of his farm being now laid to grass. The Pictonshill rams, which numbered sixty-six, were an exceedingly level well-bred lot, shown in a nice natural condition and very active on their legs. Mr. Pople's lots showed great breeding and true Leicester character. The first of the Pictonshill gimmers, a very stylish shearling that was first at Crieff Show this season, was taken by Mr. Thomas M'Intyre, Balgarran, at £20 10s.—the top price of the day. Dr. Shirra, of Boon took No. 3 at £15, this being second prize winner at Crieff. Sir Jean Gilmour, of Montrave, took No. 10 at £14. Many other prices ranged from £8 to £13, the average coming out at fully £7 5s., against £6 12s. last year. The gimmers, which were all drawn in place, united condition, and very good and even lots of their made from 3[illegible] to £20, the highest price being £2 15s. Mr. Pople [illegible] stylish, beautiful-bred lot, fetched from 50s. to 105s. each, the latter figure being paid by Mr. W. G. [illegible]. The [illegible] were [illegible] by Mr. [illegible] M'Intyre, the buyer of the [illegible] shearlings.

Horncastle Fair.

This [illegible] sold readily. Gimmers made 45s. to 50s.; [illegible] of Markham Hall, made the top price of the fair, [illegible] Mr. J. F. Walker [illegible] Mr. Dodds, of Miningsby, averaging £8 12s. 1d.; there from Mr. John Redmore, Hemingby, average £6 11s.; seven from Mr. R. Roberts, Thimbleby, average £5 7s. 6d.; three from Mr. E. Crowder, Thornton, average £3 18s. 9d.; four from Mr. Sargeant, Ranby, average £3 13s.; and four from Mr. C. Hensman, Horncastle, average £3 12s. 6d.

Wilton Fair.

Wilton great sheep fair was held on Wednesday in beautiful weather. There was a good attendance of buyers, and trade was very brisk, [illegible] a considerable advance on quotations at recent fairs. The supply of sheep was rather shorter than last year, the total number penned being estimated at between 37,000 and 38,000. The average of recent years has been about 40,000, but many regular attendants at the fair can remember when the supply [illegible] 60,000. While [illegible] was [illegible] demand was very keen, especially for working lambs, which were from 5s. to 6s. a head dearer than at any recent fairs. There was a very considerable improvement in the price of meaty lambs, but they were not so dear as stores, an advance of from 3s. to 4s. a head being a fair estimate of the general trade. The demand for ewes was not nearly so keen as for lambs, and trade for these was only a little better than at Britford. The bulk of the sheep penned were offered at the auction sales of Messrs. Waters and Rawlence, Mr. J. T. Woolley, and Mr. H. G. Saunders, and there was about the usual supply in the open fair, where a brisk business was done. Wether lambs made from 35s. to 46s. a head, some superior lots making up to 50s.; chilver lambs from 35s. to 42s. Two-teeth ewes made from 40s. to 50s., some exceptional lots making up to 58s.; and wether sheep made from 46s. to 52s.

As usual, two cups were offered for wether lambs, and it seems a pity that there should not have been more competition. There were two entries in the open class, but only one in that confined to tenant farmers, Mr. T. K. Harding, of Ashton Gifford, Mr. J. Futcher, of Fovant, and Mr. F. Best, of Andover, [illegible] the [illegible] judges, and their awards were as follows:—

A piece of plate of the value of £5, given by the Earl of Pembroke, for the best 100 wether lambs.—Mr. J. Brown, Chilhampton; h.c., the Earl of Pembroke.

A piece of plate of the value of £5, given by the Corporation of Wilton, for the best 100 wether lambs, to be competed for by tenant farmers who have less than 100 breeding ewes—Mr. J. Brown.

Mr. Brown's pen, which secured both prizes, comprised an exceptionally fine lot of sheep. These were eventually sold at the satisfactory price of 58s. a head. It may be mentioned here that Mr. Brown's [illegible] pen [illegible] Earl of Pembroke's [illegible] mended by the judges, were sold at 56s. a head, and another 100 belonging to Mr. Brown made 48s.

Shrewsbury Store Stock Sale.

Messrs. Alfred Mansell [illegible] autumn sale at Shrewsbury on the 6th inst., when 971 [illegible] and 800 sheep were penned. These sales are justly renowned for the high-class of stock exhibited, but Thursday's display far exceeded anything seen [illegible]. The [illegible] were [illegible] and [illegible] Shrewsbury or any other mart. The sheep were sold first and met a good trade, prices being very satisfactory. Promptly at one o'clock Mr. Alfred Mansell [illegible] £12 10s., £12 15s., to £13 10s. Blue grey Welsh

bullocks, £12 5s. to £15 15s. Hereford bullocks, £13 2s. 6d., £14 12s. 6d., £15 5s., £17 5s. Hereford heifers, £10, £11 5s., £12. Black-polled bullocks, £13 10s., £13 15s., £14, £14 10s., £14 15s., £15 5s., £15 15s., £15 17s. 6d., £16 15s. Black-polled heifers, £12 5s., £13 2s. 6d., £13 12s. 6d., up to £14 2s. 6d. Shorthorn heifers (quite the feature of the sale), £13 7s. 6d., £13 10s., £13 17s. 6d., £14 2s. 6d., £14 12s. 6d., £15, £16 7s. 6d., £17 2s. 6d. Shorthorn bullocks, £14 5s., £14 10s., £14 12s. 6d., £15, £15 7s. 6d. Red Polled steers and heifers, £13, £13 15s. The buyers at this sale principally hailed from the southern and eastern counties, and the fact that the sale was concluded, and all the lots removed for their various destinations by 4.45 o'clock, shows the expedition with which the business was conducted. The next sale to be held by this firm is announced to take place on Friday, October 5th.

Lothian Ram Sales.

The first of the two sales held by the Lothian Ram Society took place at Murrayfield, Edinburgh, on the 5th inst., when, as usual, the blackfaced and Cheviot rams and blackfaced ram lambs were disposed of. Messrs. John Swan and Sons (Limited) conducted the sale of the blackfaces, and at the Cheviot ring Messrs. Oliver, Swan, and Cairns officiated. There was again this year a considerable falling off in the entries, due doubtless to the disappointing prices realised last year. Eleven blackfaced flocks were represented—the same number as last year—but the numbers were thirty-two down from a year ago, while the Cheviots were seventy less than at last year's sale. The quality of the stock was as good as it has been for a year or two, and in most cases the average prices show an advance on those of last year. As usual, the sale was preceded by the show, for which prizes are given by the society, by the auctioneers, and by the breeders for the best blackfaced shearling ram and the best group of blackfaced shearling rams, and for the best Cheviot shearling ram and the best group of Cheviot shearling rams. In the blackfaced classes Messrs. Cadzow Brothers, Borland and Stonehill, were the most successful, securing first and second for the single sheep and first for the group. The second ram, though defective in neck and shoulder, was a grand sheep, and was apparently a greater favourite with those around the ring. As it turned out, at the sale he fetched £4 more than the first prize sheep. The third place was taken by a ram belonging to Mr. J. T. Mungle, North Cobbinshaw. The rest of the class were only of mediocre character. There were seven entries for the group of blackfaces. Messrs. Cadzow's lot were very equal in quality, having good thick faces and wide ribs, and standing remarkably well on their legs. The second lot, which were from Mr. John Murray's flock at Mid Crosswood, were bigger sheep, but lacked in quality compared with the other pen. The third prize went to Overshiels, but, although a lot of useful sheep, they were shown in a leaner condition than the others. As usual, Mr. John A. Johnstone, Archbank, was prominent in the Cheviot classes. He had first, third, and highly commended for single shearling rams and first for his group, all his sheep getting a place. The second prize shearling ram, which belonged to Messrs. A. and J. K. Smith, Leaston, was also a fine sheep, and made the top price of the Cheviots.

The sale commenced with the blackfaces, but the trade was a rather stiff one. Mr. Murray, Mid-Crosswood, had the highest average of the sale, viz., £11 9s. 9d., and he also secured the best individual price, one of his rams being bought by Sir Thomas Gibson Carmichael, M.P., for £25. Messrs. Cadzow Brothers came next with an average of £10 14s. 2d. Their first and second sheep went at £16 and £20 respectively to Mr. Fisher, Balmore, and Mr. Hamilton. Woolfords, while their group of five realised an average price of £14 8s. Mr. Bryden, Burn Castle, sold a ram at £22 to Messrs. Cadzow, which was got by a £72 ram he had bought from the latter at Perth two years ago; and Mr. Murray, Mid-Crosswood, disposed of one of his second prize group for £21 to Mr. Linton, Oakwood. Messrs. A. and J. K. Smith had the best average in the Cheviot classes (£9 5s. 6d.), and, like Mr. Murray, the best individual price. This was secured, as already stated, by his ram which was placed second in the class for shearlings. It was purchased by Mr. Matheson, Shoestanes, at £22. Mr. Johnstone had the next best average (£8 2s.), but his first prize sheep was sold for £8, and his third prize winner for £14, the latter to Mr. Hunter, Machrie Hill.

The second sale took place on Thursday at Murrayfield, Edinburgh, and the weather being favourable, there was a big attendance of buyers. As usual, Leicesters formed the bulk of the consignments, with the addition of Suffolks, Oxford Downs, and half-breds. Altogether 687 sheep were offered for sale, and the best of them found a brisk market, averages, as a rule, being considerably above those of last year. Still, there were no sensational prices, and it must be acknowledged that the Lothian sales now occupy a very moderate place in the estimation of breeders and buyers. Prior to the day's proceedings, Mr. Deans, Dalkeith Park, judged the animals entered for the prize competitions, and gave his awards as follows: Leicester shearling ram: 1st, Wm. Ford, Fentonbarns; 2nd, R. G. Murray, Spittal; 3rd and 4th, A. and J. K. Smith, Leaston. Group of five Leicester shearling rams: 1st, A. and J. K. Smith; 2nd, R. G. Murray; 3rd, John Mark, Sunnyside. The best price of the day, £27, was given at the first ring by Mr. Gordon, Halmyre, for one of the Spittal lot, a nice sheep, sired by Leaston Favourite, and thus one of the Messrs. Smith's breed, which in the competition gained only second prize. Messrs. Smith themselves had the good average of £11 6s. 6d., the top price, £25, being commanded by one of the first prize group. For the first prize ram Mr. Ford, Fentonbarns, got no more than £15, which is £12 less than Mr. Murray got for the second prize animal. There was a fair show of Oxford Down rams, and among the consigners was a newcomer in the well-known English breeder, Mr. Treadwell, Winchenden; but there was not much demand for this class of sheep, and prices were rather low, considering the quality of the stock. The highest average and the highest price were obtained by Mr. Elliot, Hollybush, whose top figure of £16 5s. 6d. was paid by Mr. James Ellit, Dunerahill.

Perth Ram Sales.

The annual show and sale of Leicester and Shropshire Down shearling rams and ram lambs and of Leicester and Shropshire ewes and gimmers took place in Messrs. Macdonald, Fraser, and Co.'s auction mart, Perth, on Wednesday. At Ring No. 1 there was a large attendance of buyers when Mr. Wedderburn took up the hammer. Bidding was not very brisk until the lot of Mr. M'Intosh, Balquharn, was put into the ring. The first was parted with a £23, while the third-prize winner at the Angus went for £25. The second-prize single sheep was taken out by Mr. Smith, Longniddry, at £40, while the fourth went at £30. Other prices ranged from £5 to £19 10s. In Ring No. 2, where Mr. Stewart was the auctioneer, bidding at the start was fairly brisk. For one of the second-prize winners in a pen of ten belonging to Mr. Hume, Barrelwell, Colonel Rait, Annistoun, gave £13 10s. The first-prize single belonging to the same exposer, fetched £31, while others belonging to the second-prize pen of ten brought from £9 10s. to £13 10s. Other sellers got fair prices.

On Thursday the blackfaces were sold, the number catalogued being about 1,000 rams and 700 ram lambs. The sale was held on the new ground in Glasgow Road, and there was a large attendance of buyers. In Ring 1, conducted by Messrs. Macdonald and Fraser, nothing exceptional took place in the way of prices until the Glenbuck breed entered the ring. There was very keen competition for this lot, the best price given being £130 for one of the prize animals by Mr. Maxwell, Carlisle. Mr. Clark, Achyturn, took out one at £33, while another went to Captain Mitchell for £54, and another at £62. The average for twenty of the Glenbuck breed was £29 15s., almost £5 above last year's figures. Messrs. Cadzow, Boreland, who were third for pens of ten, had a good sale, their highest price being £50, given by Mr. Duncan Balfour. Mr. Whyte, Spott, with forty sheep, came out with an average of ten guineas. Mr. Findlay got £22 from Mr. Millar, Lambhill. All over, the prices were very good.

In Ring No. 2, where the shearlings were disposed of jointly by Messrs. Macdonald, Fraser, and Co., and Messrs. Swan and Co., there was a good attendance, and the stock brought forward was in many instances of exceptionally good quality. Among the outstanding lots were those forward from the Messrs. Cadzow, Borland, and Stonehill, and for an animal possessing many good points they realised £50. Mr. Hope, of South Brownhill, with a nice lot, also secured some good prices, his highest being £66. Mr. Fisher, Auchrioch, sold one at £25; Mr. Campbell, Roroyan, one at £29; Mr. Hamilton, Nether Wellwood, one at £24; Mr. Craig, South Halls, one at £25; and Mr. Fisher, Ardeonaig, one at £31. The competition here was very good, and was before previous years.

Sale of Black-faced Rams at Lanark.

Symington's fourteenth annual show and sale of black-faced rams at Lanark took place on Tuesday, when there were sold 449 shearling and 652 lamb rams. The judging took place on the previous evening, and, as usual, the competition in all the classes was very keen. There were fifteen pens of competing shearlings and twenty pens of lambs, and altogether the show was one of the best yet held here. For the best five shearlings Mr. Howatson, Glenbuck, was first; Messrs. Cadzow, Boreland, second and fifth; Mr. Pate, Allarstocks, third; Mr. Millar, Lambhill, fourth. In the lamb section the breeding and quality were quite up to the average, but owing to the recent wet weather their skins were a little out of order, and they were not quite in such bloom as in some former years. Mr. Wobthop, Gurvald, was placed first; Messrs. Clark, Auchenlongford, were second and fifth; Mr. Lumsden, Arden, was third; Mr. Anderson, Over Whitehaugh, was fourth; and Mr. Anderson, Greenockdyke, was sixth. There was, as usual, a very large and influential attendance of breeders from all quarters. Trade all through was steady, and high prices were realised for the best animals, but for the secondary class and those adapted for ordinary purposes purchasers were determined to have them at £5 or under, and a large number of very useful sheep were sold at from £3 to £5. The top price of the day was made for a Borland shearling, which went to Mr. Scott, Bogside, at £125. A considerable number of the best sheep made from £50 to £90, and a large number of others from £25 to £45. The lamb section was topped by one of the Fermielhaugh lot, which went to Mr. M'Kinley, Andershaw, at £26, and a number of others made from £6 to £17. Notwithstanding the numbers a more satisfactory sale has not been experienced for a number of years past.

Irish Ram-Breeding Association's Sale.

The thirtieth annual sale of pedigree rams held under the auspices of the Irish Ram-breeding Association took place on the 6th inst. at Mr. Gavin Low's paddocks in Prussia Street, Dublin. The entries amounted to 300 head of various breeds, and the company attracted by the sale was a large and representative one. The usual rules of the Association applied to the reserve price on each animal, and the order of the catalogue being arranged by ballot. The demand was exceptionally brisk for well-built and meritorious shearlings, particularly Shropshires, some of which made very fancy prices, notably those entered by Mr. R. F. H. White, of Abbeyleix; Mr. J. Lenox Naper, of Oldcastle; and Mr. Barter, of Cork. The sale opened with Border-Leicesters as follows:—Mr. C. M. Doyne, of Gorey, ten shearlings, 4½gs. to 18gs.; Captain Riall, eight shearlings, 4½gs.; Mr. William Webster, ten shearlings, 5½gs. to 6gs.; Miss Staples, four shearlings, 5½gs. to 8½gs., and one shearling, 13gs.; and Lord Ashbrook's shearlings, 4½gs. to 6½gs. Hampshires: Three shearlings from Mr. William Young, 7½gs. to 8gs. Shropshires: The entries in this part of the catalogue were somewhat extensive, and we note the following:—Mr. R. F. H. White, ten shearlings of grand quality and size, 51gs. (prize-winner); Lord Longford, 31gs., ditto; Mr. Boylan, 13gs.; Marquis of Devonshire, 43gs.; Lord Fitzwilliam, 13½gs., 16gs., 14½gs., 12gs. (two), 9gs.; Mr. J. Lenox Naper, ten shearlings, 8½gs., 9gs., 11gs. (two), 12gs. (two), 14gs., 20gs., and 21gs. respectively; Mr. Richard Barter, ten shearlings, 9½gs. to 20gs. and 25gs.; Miss Rose, Monaghan, ten shearlings, 6½gs. to 10½gs.; Mr. R. Hamilton Stubber, 6½gs. to 8½gs.; Miss Jameson Bray, 4½gs. to 7gs.; Lady Margaret Charteris, ten shearlings, 4½gs. to 6gs., etc. Lincolns: In this class several entries were withdrawn at a reserve of 5gs. Six shearlings from Mr. J. R. Lloyd, of Nanagh, made 5½gs. to 8gs.; eight from Mr. Thomas L. Hodgins, of Marlborough, 5½gs. to 10½gs.; eight from Mr. R. G. Carden brought 6gs. and 7½gs. and one 15gs. Captain Longworth Dames's ten shearling Oxford Downs made 8¾gs. to 14½gs., and three Roscommons 6gs. to 8½gs. In the second ballot Hampshire lambs drew 3¼ to 4gs.; Mr. Barber's ten Shropshire shearlings 7gs. to 9gs.; Mr. White's five ditto, 6½gs. to 9gs.; and Miss Rose's six ditto and two lambs, 3½gs. and 5½gs.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending Sept. 8th 1900:—

SHOWS.

Cardiff Horse Show.

The Cardiff and South Wales Horse Show took place on Wednesday and Thursday, and was in every respect the most successful and best show ever held there. Not only were the entries bigger and better than usual, but the attendance of visitors was a record one. The officials put the total for the two days at 20,000, which is quite 3,000 more than the previous best. This public appreciation was all the more gratifying to the committee, whose stand in objecting to take certain widely-known exhibitors' entries was regarded in some quarters as certain to have a contrary effect upon the gathering. Competition in the numerous classes judged was again keen, and in evenness of general merit the show of 1900 will stand in relief among the whole and now long series of exhibitions held in this district. In point of number the entries exceeded those of last year, being about 580 as against 530 in 1899, a gratifying feature when it is stated that the general standard of excellence was quite equal to anything previously seen at the show. In the Hack classes some splendid animals were exhibited, and all the classes were large. The hunter classes, as usual, formed a leading feature of the show. The yearling and young hunters were somewhat disappointing, but the other hunter classes, both in number and excellence of entries, were quite worthy of past traditions. The cart horse classes also were very good. The entries were large, and so far as quality goes must be adjudged a very sound lot—a distinct improvement on what has sometimes been seen.

The judging extended over the two days, and was performed by the following gentlemen:—Hunters—the Hon. A. Roche, Doneraile, Ireland; Mr. Digby Collins, Callington, Cornwall; Mr. T. Wickham Boynton, Driffield, Yorkshire. Hackneys and harness horses—Mr. S. B. Carnley, Alford, Lincolnshire; Mr. E. Edmondson, Knowle, Warwick; Mr. Henry Moore Craswick, Hull. Cart horses—Mr. E. Lewis, Garth Mill, Berriew; and Mr. John H. Yeomans, Hereford.

Taking the classes in order of judging, the yearlings came first under notice. The chief award was given to a nice level mare by Pirate II.—Flyaway, a bay filly, the property of Mr. J. Wynford Philipps, M.P., Manorbier, Pembrokeshire. On the whole the class was below the average at a first-class show. Class 2, for two-year-olds, was also somewhat disappointing. Again the winner was sired by Pirate II., and is also the property of Mr. J. Wynford Philipps, M.P. In the class for three-year-olds, mare or gelding, Messrs. Lawton and Son's Brown Boy, Mr. Edward Hoyle's Sirdar, and Mr. J. Wynford Philipps's Firefly were decidedly good specimens. The winner is an animal of considerable promise, and has previously earned honours at Limerick. In the local class, with similar conditions, the entries were numerically weak, and not particularly strong in point of quality. Still Firefly, the third in the open, is a fairly good filly of high quality. A far different state of things was seen in the remaining hunters' classes, and the judges commended every animal exhibited in 5 and 6. Class 5 was for four-year-old mares or geldings, and here the first prize winner was Mr. J. H. Stokes's (Market Harborough) Royal Flush, by King of Trumps—Bide-a-Wee. Pennant, a chestnut roan gelding, owned by Major-General Watson, and Mr. R. T. Bassett's County Clare, who came out second and third, were horses of considerable merit. In point of numbers the class for four-year-olds and upwards to carry up to 13st. was even stronger than the last, and a string of four-year-old horses were here in competition with many that have been favourably known in the hunting field and have won honours in the ring. Redskin, that won most favour from the judges, was shown by Mr. Stokes, of Market Harborough. He is a bay gelding, and was more evenly balanced and certainly a more consistent goer in his slow paces than Wales, also a bay gelding, with which Mr. Drage, of Chapel Brampton, secured second prize. Taking this class as a whole it was conspicuous for high quality.

The next class was for medium-weight hunters, and the keenness in competition was made patent by the length of time it took the judges to make the awards. The entries included winners of several prizes, and among them was Brampton, holder of this year's championship at Bath. After an exhaustive test, each of the judges riding all the placed horses, the blue ribbon was given to Pelcomb, the exhibit of Mr. L. F. Craven, the ex-Master of the Pembrokeshire Hunt, Brampton coming second. Messrs. Apperley and Louis's Sporting Luck was third, and Mr. Stokes was fourth with Second String. Then came the heavy-weight carriers. Only five came into the ring, but all were real hunters. The characteristic of this class was its evenness. As at Bath, Mr. Stokes's Pasha secured chief honours. Second fell to a classy grey gelding in Snowdon, but Mr. Drage's exhibit was a bit light in bone, and hardly seemed up to the weight.

The championship classes, one for light weights and another for heavy weights, attracted considerable interest, the competition being keen. A long time was spent in judging the former class, and, after consultation with a referee, the award was given in favour of Treasure, a brown mare, built compactly, easy-going, and speedy. Treasure won for Mr. Stokes a first in her class at Bath Show, and was reserved for the open championship. The heavy-weight hunter class was also a good one. All the exhibits had previously appeared, and no surprise was created at the preference shown for Pasha, the property of Mr. Stokes, this and the other placings being similar to the awards at Bath.

In the brood mare classes there were some very useful specimens shown. In the open class for mares calculated to produce hunters, in foal or with foal at foot, the placings were very similar to those at Bath, Mr. Leonard H. Taylor's Platypus coming first, while Mr. Herbert Cory's Clytha and Mr. W. H. Barber's Sunbeam followed her in the order named. In adjudicating on the foals, curiously enough, the winner did not come from the mares selected by the judges for winning honours, but, nevertheless, they had little difficulty in picking out a first-class foal from Mr. D. H. Thomas's Heroine, a mare on the small side. The foal from Platypus was given the second prize. In the class confined to residents in South Wales and Monmouthshire, Mr. Herbert Cory's brown mare, Circus Girl, now ten years old, was first, although she was without foal; but as she had previously bred, the judges had no reason to think she was barren. Mr. D. H. Thomas's Mrs. Jones, a good mare, but with straight shoulders, was second, and the same gentleman's Heroine was third.

The Hunters' Improvement Society offered a gold and silver medal. The gold medal was for the best hunter brood mare possessing certificate of soundness from hereditary disease, and was secured by Mr. D. H. Thomas, Carmarthen, with his Mrs. Jones. Mr. R. S. Forestier-Walker, Marshfield, was reserved with Swallow. The competition was not so keen for the silver medal, which was competed for by hunter fillies not exceeding three years old. Mr. Wynford Philipps, M.P., Manorbier, Pembrokeshire, won the award easily with Flyaway. Mr. G. Hatton, of Bristol, was reserved with Fanny Fern.

Taken as a whole, the several classes for hacks were good in quality, and competition was generally keen. In the first class that came under review—that for a mare or gelding over 15 hands and not under four years old—only half a dozen competed, but they were full of quality. Popular opinion around the ring did not coincide with the official finding in giving premier honour to Mr. Batchelor's Eunice, while the well-known Nobleman was placed reserve. According to the spectators' judgment, Graceful, a bay mare, the property of Miss F. S. Hawkins, of Porlock, who was awarded second, should have changed places with Norbury Squire. In the next class—over 14 hands and not above 15 hands, four years old and upwards—there was a fair entry, but the standard was little below the average for this show, and Hackneys were again prominent. Snoatta, who won the Cardiff Championship in harness three years ago and has secured many triumphs for Mr. Arthur Evans, Wrexham, proved the winner. Mr. Charles Radcliffe (Cardiff) gained second with Princess Royal, third going to Mrs. Apperley, of Cheltenham, with Silver Star. The local class brought out a handy lot. Mr. Beavan, Llantrisant, won well with a very good bay mare, Mr. Thomas Nicholas, Port Talbot, being second with Margam Squire. The riding ponies, not above 13.2 hands, made a good class, and there was no room for criticism at the placing of Lord Go Bang, a neatly built bay gelding, exhibited by Mr. G. E. Franklin, of Derby. But in the next class adverse comment on the decisions was general. It was the local class for weight-carrying cobs, the requirements being ability to carry up to not less than 14 stone, while not above 15 hands. The nicest hack among the lot was a chestnut gelding shown by Mr. John Worthington, of Fishguard, Pem., but to the surprise of the spectators this was turned out of the ring in company with every one of the typical hacks or riding horses as contrasted with the Hackneys preferred by the judges. Class 24 (local for single harness) was numerically good, and its quality has never been excelled. Many stylish trappers with nice action and perfect physique were shown, and the prize was won after the closest possible competition. The championship class brought out a really good collection. Mornington Cannon added another championship to the many he possesses, his record of wins now exceeding 200. Snoatta, who won the championship in harness a couple of years ago, was second, and Mr. Batchelor's Eunice was third, with Silver Star fourth.

The Hackneys were a very showy lot. In the class for brood mares there was a fine entry, Mr. James Howell, of the celebrated Llanmaes Stud Farm, being responsible for no fewer than eight exhibits. Mr. Charles Galbraith's Queen of the West, a winner in London, was awarded the red rosette, whilst Mr. F. J. Batchelor's chestnut mare, Eunice, was second, and Mr. James Howell's Gilly Flower, a dark chestnut mare, third. In the competition for foals by mares in this class Mr. Thomas Nicholas, of Port Talbot, showed a colt by Polonius which possesses many of the characteristics of its sire, and was deservedly given first prize, the second place being secured by a foal from Lady Kate, belonging to Mr. Lysaght, of Chepstow. Mr. James Howell was reserved for a foal from Jennie Rufus. In the class limited to residents in South Wales and Monmouthshire Mr. James Howell literally swept the board, taking all the money prizes and a reserve. Gilly Flower III. was awarded the red rosette. In the local class for yearling colt or filly there was a very keen competition, Mr. Herbert Cory's St. Athan's, a worthy descendant of his champion sire, Royal Danegelt, was first, Hyam's Lord Prim, a chestnut, the property of Mr. Jas. Howell, being a good second, whilst Mr. Whitting's Queen of Day was third. In the local class for yearling colt or filly, Mr. Howell again secured the three prizes, Hyam's Lady Tenlyth being a better type of Hackney than Mr. J. H. Jones's animal, which was reserved. Mr. Galbraith was an easy first in the open class for two-year-old colts or fillies with three well-known yielding Arbon and Mr. Herbert Cory was second with Dr. Jessop's Kashmir.

First Prize Winner in Single Harness Horses at Dublin. Driven by Miss Arnott, of Inverness.

In the stallions class Mr. James Howell was again a good first with Golden Fireaway, bred by himself at Llanmaes, and he also secured the second award. with Lord Elsham, who scored over St. Mellons, the property of Mr. Herbert Cory, of Druidstone. The gold medal for mare or gelding not less than 15.2 was won by Mr. Mark Pearson's representative, Lord Lofty. The Hackney Horse Society presented a gold medal, or £10 its equivalent value, for the best animal in the Hackney and pony classes. This was won by Queen of the West, a chestnut roan mare, exhibited by Mr. Chas. F. Galbraith, Dumfries In the event of Queen of the West proving unsound the medal goes to Heroine, owned by Mr. D. H. Thomas, Starling Park, Carmarthen. Mr. James Howell secured the medal given by the society for the best Hackney stallion with Golden Fireaway, who stood well in front of his competitors.

In the section for harness horses the show retained its place so far as merit is concerned, while in the various classes there was more evenness than is customarily seen among the exhibits. In the only double harness class four pairs took the ring. Lord Bath and Duke of York, Mr. Godsell's handsome brown geldings, were excellently tooled by Mr. Butcher. They took some time to settle down, but then they went along very well. They were beaten on merit by a beautiful pair of chestnuts shown by Mr. C. J. Wertheimer, of Bourne End, Bucks, who with Jubilee King and Hopwood Squire surpassed his three opponents in most of the scoring points for double harness, their particular strength lying in their superior quality, uniformity of movement, and quicker pace as a pair. Ten were brought before the judges in the class for mare or gelding over 13.2 and not above 14.2. There was a deal of style in this class, the winner turning up in Norbury Lincoln, a capital and speedy mover, with Garton Lass a good second. Over 15.2 Mr. Godsell's Lord Bath was a winner, with the now equally well known Hopwood Squire next and Duke of York third. In the next and last class for harness horses judged on Wednesday, Heathfield Squire, who won for Mr. Godsell the champion cup at Bath, won first place. Lord Lofty, shown by Mr. Mark Pearson, of Harrogate, a nice looking bay gelding, was se ond, and Lady Confidant, a roan mare owned by Mr. Morris, of Morriston, was third. The single harness championship class was distinctly good, and Heathfield Squire was the winner. He is a magnificent chestnut, using himself well all round, with splendid action and no sky-scraping. The decisions at Bath Show were reversed so far as second and third were concerned, Lord Bath now having to take second place to Lord Lofty. Only three teams turned out in the harness tandem class, and two of them were of good quality, the first being above the average. Mr. Wertheimer's Jubilee King and Hopwood Squire gained the chief honours, and they scored the winning point through the leader. Mr. Godsell secured the second award with a team perfectly matched in colour and style of going, but Duke of York and Lord Bath showed signs of wear. The third team was owned by Mr. F. S. Miles, of Pontypridd.

There was unquestionably a remarkably good show of cart horses, and it is a matter for congratulation that not a single unsound exhibit came under the notice of the judges. In the class for dray or cart horses suitable for a brewer, builder, timber merchant, or any other tradesman, Mr. W. H. Evans, of Radyr Court, Llandaff, showed a beautiful horse, Captain, which has grand legs, and was an easy winner. The class for cart mare or gelding above 15.2 was, as a whole, a most excellent one, and all the animals entered put in an appearance. The judges were occupied a long time in the process of weeding out, although it was apparent from the outset that Lord Llangattock's grey mare, Emblem, and Miss Talbot's bay mare, Maud, stood out prominently from the rest. Eventually Lord Llangattock was awarded the premier position, Miss Talbot second, and Mr. W. Emerson, Sweldon Farm, near Cardiff, came third with the bay gelding, Sweldon Lad. In order to encourage the breeding of horses for colliery purposes, the committee allotted the class for mare or gelding not above 15.2, suitable for underground work, and Mr. John Miles obtained first prize with Chance, whilst Mr. R. S. David, Wilton, Cowbridge, and Mr. Rowland Thomas, Llanedarne, were second and third respectively. The yearling cart colt or filly exhibits consisted of a good lot. Lord Llangattock again won premier honours with Hendre Sultan, a fine bay colt. Lord Llangattock also came in first in the two year old cart colt or filly class, his exhibit being Hendre Champion.

There were only seven entries in the class for brood mares suitable for breeding polo ponies, and the exhibits were somewhat disappointing, and the disappointment was increased by the fact that in almost every instance the mares had been served by Hackneys. The winner turned up in Mr. Frank Matthews's Marie Stewart, a very creditable specimen, and with a foal that promises to be as big as its mother when it becomes a yearling. Mr. Matthews secured the Polo Pony Society's silver medal for the best brood mare suitabel for breeding polo ponies exceeding 13.2 and not above 14.2, the property of a resident of South Wales or Monmouthshire, and was also reserved.

There were several jumping and trotting competitions, and these, as usual, were witnessed with interest by large crowds.

Prize List.

HUNTERS.

Yearlings: 1, Mr. Wynford Philipps, M.P., Manorbier (Flyaway); 2, Mr. B. G. Hatton Gee, Bristol (Fanny Fern II.); 3, Mr. E. M. Southwell, Bridgnorth (Theory); r., Mr. E. Nichols, Worcester (Flying Fox).

Two year old: 1 and 2, Mr. J. Wynford Philipps (Captain Morgan and Captain Kidd); 3, Mr. E. Nichols, Worcester (Jeddah); r., Mr. E. M. Southwell, Bridgnorth (Sir Theo).

Mare or gelding, three years old: 1, Lawton and Sons, Carrigtwohill, co. Cork (Brown Boy); 2, Mr. E. Hoyle, Bacup (Sirdar); 3, Mr. J. Wynford Philipps, M.P. (Firefly); r., Lawton and Sons (Ray Lad).

Mare or gelding, three years old, the property of a resident in South Wales or Monmouthshire: 1, Mr. J. Wynford Philipps, M.P. (Firefly); 2, Mr. H. J. Cory, Castleton (Satisfaction); 3, Mr. J. Hurman, Llanishen (Lady Ethel).

Mare or gelding: 1, Mr. J. H. Stokes, Great Bowden, Market Harborough (Royal Flush); 2, Major-General H. E. Watson, Pantaguesta, Pontyclun (Pennant); 3, Mr. R. T. Bassett, Crossways, Cowbridge, County Clare; hc, Mr. T. H. Whiteman, Ashton Court, Leominster (Country Lad).

Mare or gelding, 4 year old and upwards, to carry under 13 stone: 1, Mr. J. H. Stokes (Redskin); 2, Mr. J. Drage, Northampton (Wales); 3, Mr. W. Henry Barber, Henley-on-Thames (Freemason); 4, Messrs. Apperley and Louis, Cheltenham (Jerrocks).

Mare or gelding, four year old and upwards, to carry 13 stone and under 15 stone: 1, Mr. L. F. Craven, Haverfordwest (Pelcomb); 2, Mr. W. J. Drage (Brampton); 3, Messrs. Apperly and Louis (Sporting Luck); 4, Mr. J. H. Stokes (Second String); hc, Mr. Edward Hoyle, Bacup (Countess); r, Mr. H. S. Brenchley, Cardigan (Relief).

Mare or gelding, four years old and upwards, to carry 15 stone and upwards: 1, Mr. J. H. Stokes (Pasha); 2, Mr. W. J. Drage (Snowdon); 3, Mr. L. F. Craven (Starlight); 4, Messrs. Apperly and Louis (Sporting Life); r, Mr. Alfred M. Pilliner, Llangarw, near Newport (Soloman).

Mare or gelding, four years old and upwards, the property of a resident in South Wales or Monmouthshire, up to not less than 12 stone: 1 and 2, Major-General H. E. Watson (Pennant, Swimon); 4, Mr. L. F. Craven (Sportsman); hc, Mr. Walter R. Shirley, Leckwith (Shem); c Mr. Hugh Drury, Plasturtongardens (Aristocrat); r, Lord Tredegar, Tredegar Park (Charles Surface).

Mare or gelding, four year old and upwards, the property of a resident in South Wales or Monmouthshire, up to not less than 14 stone: 1, Mr. H. S. Brenchley (Passing Fancy); 2, Mr. Robert Jones (The General); 3, Mr. L. F. Craven (Starlight); 4, Mr. R. T. Bassett; r, Mr. H. S. Brenchley (Relief).

Four years old and upwards, to carry 13st. 7lb.: 1, Mr. J. H. Stokes (Treasure); 2, Mr. J. Drage (Wales); 3, Messrs. Apperley and Louis (Jorrocks); r, Mr. W. Henry Barber (Freemason).

Four year olds and upwards, to carry 13st. 7lb. and upwards: 1, Mr. J. H. Stokes (Pasha); 2, Mr. J. Drage (Brampton); 3, Mr. J. H. Stokes (Royal Flush); r, Messrs. Apperley and Louis (Sporting Luck).

Brood mare, calculated to produce hunters, in foal or with foal at foot: 1, Mr. Leonard H. Taylor (Platypus); 2, Mr. Herbert B. Cory, (Cardiff Clytha); 3, W. H. Barber (Sunbeam); r Mr. W. H. Johnstone (Prioress).

Foals: 1, Heroine foal, Mr. D. H. Thomas; 2, Platypus foal, Mr. Leonard H. Taylor; r, Prioress foal, Mr. W. H. Johnstone; hc, Sunbeam foal, Mr. W. H. Barker.

Brood mare, calculated to produce hunters, in foal, or with foal at foot, the property of a resident in South Wales or Monmouthshire: 1, Mr. Herbert B. Cory (Circus Girl); 2 and 3, Mr. D. H. Thomas (Mrs. Jones and Heroine); c, Mr. Roland S. Forestier-Walker, Church Farm, Marshfield, Cardiff (Julia).

Foals: 1, Mr. D. H. Thomas (Heroine); 2, Mr. R. S. Forestier-Walker (Swallow); r, Mr. D. H. Thomas (Mrs. Jones).

RIDING HACKS AND PONIES.

Mare or gelding, exceeding 15.0 and not under four years old: 1, Mr. Frank J. Batchelor, Alvechurch, Worcestershire (Eunice); 2, Mr. Edward Godsell, Stroud (Norbury Squire); 3, Miss F. S. Hawkins, Porlock (Graceful); r, Messrs. Apperley and Louis (Nobleman).

Mare or gelding, exceeding 14 and not above 15, and not under four years old: 1, Mr. Arthur E. Evans, Wrexham (Sonata); 2, Mr. Chas. Radcliffe, Cardiff (Princess Royal); 3, Mrs. A. K. Apperley (Silver Star); hc, Mr. D. E. Morgan, Llantrisant (Llantrisant); r, Major Duncan, London (Enchantress).

Mare or gelding, exceeding 14.2 and not above 15.2, the property of a resident in South Wales or Monmouthshire: 1, Mr. W. T. Bevan (Lady Confident); 2, Mr. Thomas Nicholas, Port Talbot (Margam Squire); 3, Mr. D. E. Morgan (Llantrisant); hc, Mr. Rhys James, Llandovery (Lady Skip); c, Mr. David Powell, Brecon (Baden-Powell); r, Mr. Charles Radcliffe, Cardiff (Princess Royal).

Mare or gelding, not above 13.2: 1, Mr. G. E. Franklin, The Field, Derby (Lord Go Bang); 2, Mrs. A. K. Apperley (Prince Charming); 3, Mr. Alfred S. Day, Berkeley Stud, near Crewe (Berkeley Bobs); hc, Willmitt and Dare, Roath Market, Cardiff (Little Queen); c, Mrs. A. M. Budd, Kingsfield, Bradford-on-Avon (Little Nipper), and Mons. Depeaux, Eagle Chambers, Swansea (Perfection); r, Dr. William Howells, Watton House (B.P.).

Weight carrying cob (mare or gelding), up to not less than 14 stone, and not above 15 hands, the property of a resident in South Wales or Monmouthshire: 1, Mr. Thomas Nicholas (Margam Squire); 2, Mr. F. S. Miles, Pontypridd (Lady's Primrose); 3, Mr. A. G. Fennell, Cardiff (Lord Bute); hc, Mr. Alfred Stevens, Cardiff (Lord Exeter); c, Mr. David Francis Pritchard, Newport, Mon. (Lord Roberts); r, Mr. James Evans, Narberth (Sunrise).

Champion prizes, exceeding 14 hands, and not under four years old: 1, Mr. John Robinson (Mornington Cannon); 2, Mr. Arthur E. Evans, Wrexham (Sonata), 3, Mr. Frank J. Batchelor (Eunice); 4, Mrs. A. K. Apperley (Silver Star); hc, Mr. Charles Radcliffe (Princess Royal); r, Major Duncan (Enchantress).

HARNESS HORSES.

Mare or gelding, exceeding 15.2: 1, Mr. Edward Godsell (Lord Bath); 2, Mr. C. J. Wertheimer, Hedson House, Bourne End, Bucks (Hopwood Squire); 3, Mr. Edward Godsell (Duke of York); hc, Mr. Henry Radcliffe (Lord Cardigan); r, Mr. Arthur E. Evans, Wrexham (Kharki).

Mare or gelding, exceeding 14.2 and not above 15.2: 1, Mr. M. Godsell (Heathfield Squire); 2, Mr. Mark Pearson, Harrogate (Lord Lofty); 3, Mr. William Morris, Morriston (Lady Confidant); hc, Mr. John Pethick (Lord Bang); c, Mr. Charles Radcliffe (Butterfly); r, Mr. J. Trenchard, Wenvoe (Miss Danegelt).

Exceeding 14 hands and not under 4 years old: 1, Mr. M. Godsell (Heathfield Squire); 2, Mr. Mark Pearson (Lord Lofty); 3, Mr Edward Godsell (Lord Bath); 4, Mr. J. Mitchell (Norbury Lincoln); r, Mr. C. J. Wertheimer (Hopwood Squire).

Mare or gelding, exceeding 13.2 and not above 14.2: 1, Mr. James Mitchell, Hereford (Norbury Lincoln); 2, Dr. George P. Francis (Garton Lass); 3, Mr. A. G. Fennell (Lord Bute); hc, Mrs. A. K. Apperley (Silver Star); r, Alfred S. Day (Sunshine).

Pony, mare or gelding, not above 13.2: 1, Mr. G. E. Franklin (Lord Go Bang); 2, Mr. A. S. Day (Berkeley Bobs); 3, Mr. A. M. Budd (Little Nipper); r., Mrs. A. K. Apperley (Prince Charming); h.c., Dr. W. Howells (B.P.); c., Willmitt and Dare (Little Queen).

Mare or gelding, exceeding 14.2, the property of a resident in South Wales or Monmouthshire: 1, Mr. William Morris (Lady Confident); 2, Mr. James Evans (Sunshine); 3, Mr. David Powell (Baden-Powell); h.c., Mr. James Evans, Narberth (Sunrise); c, Mr. Arthur E. Bishop (Magpie), and Mr. Henry Radcliffe (Lord Cardigan); r., Mr. J. Trenchard (Miss Danegelt).

Mare or gelding, exceeding 13.2 and not above 14.2, the property of a resident in South Wales or Monmouthshire: 1, Dr. George P. Francis (Garton Lass); 2, Mr. A. G. Fennell (Lord Bute); 3, Mr. Thomas Davies (Wait-a-Bit); h c, Mr. Charles Ratcliffe (Butterfly); r., Mons. Depeaux (Lily of the Valley).

Pony (mare or gelding) not above 13·2, the property of a resident in South Wales or Monmouthshire: 1, Messrs. Willmitt and Dare (Little Queen); 2, Dr. William Howells (B.P.); 3, Mons. Depeaux (Perfection); hc, Mr. D. B. Morgan Lewis (Princess); c, Mr. F. Thomas (Peggy Pekin); r, Miss G. W. Gunn, Strathearn, Cardiff (Newmarket Mary).

Harness tandem, exceeding 14·0: 1, Mr. C. J. Wertheimer (Hopwood Squire and Jubilee King); 2, Mr. Edward Godsell (Lord Bath and Duke of York); 3, Mr. Francis S. Miles (Lady's Maid and Lady Primrose); r, Mr. John Pethick (Lord Bang and Lord Bang II.).

Harness, double, mare or gelding, exceeding 14.0: 1, Mr. C. J. Wertheimer (Jubilee King and Hopwood Squire); 2, Mr. Edward Godsell (Lord Bath and Duke of York); 3, Mr. John Pethick (Lord Bang and Lord Bang II.); r, Mr. Francis S. Miles (Lady's Maid and Lady's Primrose).

Single harness (mare or gelding), the property of a tradesman resident within the limit of the Cardiff Union, used solely by him, and driven regularly by his servants for the delivery of goods sold by him for a period of not less than three months prior to September 13, 1900: 1, Mr. T. B. Clode, Llandough (Lady Confident); 2, Mr. Harry Thomas, Cardiff (Lady Kitty); 3, Mr. Albert Hayes, Cardiff (Daisy Bell); hc, Messrs. Snook and Sons, Cardiff (Lampeter Bobs); c, Mr. John Sperring, Cardiff (Young Bang); r, Mr. A. F. Small, Cardiff (Ladybird).

TROTTERS AND JUMPERS.

Trotting, mare or gelding, exceeding 14.2, action and speed to be considered: 1, Mr. William Beale, St. Mary-street, Cardiff (The Earl); 2 and 3, Mr. Walter Winans, Pluckley, Ashford, Kent (Princell and Fides Stanton).

For best jumper in classes 6, 7, 8, 9, and 10: 1, Mrs. Blockley, Moor Hall, Madeley, Staffordshire (Alfred); 2, Mr. F. Firkins, Leigh, Worcestershire (Artist); 3, Mr. O. A. Daniell, Church Farm, Atworthy (Newcastle); r, Mrs. Blockley (Omega).

Best jumper, exceeding 14 hands: 1, Mrs. Blockley (Alfred); 2, Mr. W. W. Grundy, Worcester (Swallow); r, Mr. Charles A. Daniell (Newcastle).

Best (jumper in classes 6, 7, 8, 9, and 10—1, Mr. W.W. Grundy (Stag); 2, Mrs. Brockley (Omega); 3, Mr. C. A. Daniel (Newcastle).

Best jumper of any height: 1, Mr. C. A. Daniel (Newcastle); 2, Mr. F. Firkins (Artist); r, Mr. W. W. Grundy.

Best jumper, the property of a resident in South Wales or Monmouthshire: 1, Mr. J. Trenchard (Spider); 2, Mr. J. G. Blagrave (Celery); 3, Mr. Hugh Drury, Topthorne; r, Mr. R. Jones, Swansea (Empress).

Dray or carthorse, mare or gelding, to be exhibited with gear on, suitable for and having been worked by a brewer, builder, timber merchant, or any other tradesman, corporation, or haulier: 1, Mr. William Hier Evans, Radyr Court, Llandaff (Captain); 2, Mr. S. A. Brain and Co., Cardiff (Prince); 3, Mr. John Moon, Cardiff (Heath Primrose); hc, Mr. John Matthews, Cardiff (Lion); c, Mrs. E. Couch, Pontypridd (Virgin); r, Mr. George Aiden, Llandaff (Surly).

Cart mare or gelding, above 15.2: 1, Lord Llangattock (Emblem); 2, Miss E. C. Talbot, Port Talbot (Maud); 3, Mr. W. Emerson, Cardiff (Sweldon Lad); hc, Messrs. Edwards, Byford, and Marsh, Hereford (Byford Countess), and Mr. Angus G. McGregor, Cheltenham (Lady Hitchin); r, Peter Stubs, Newnham, Glos. (Depper).

Mare or gelding, not above 15.2, suitable for, but that has not been worked, underground in a colliery, the property of a tenant farmer resident in Glamorganshire or Monmouthshire: 1, Mr. John Miles, St. Fagan's (Chance); 2, Mr. R. S. David, Cowbridge (Bright); 3, Mr. Rowland Thomas, Llanedarne (Victoria).

Yearling cart colt or filly: 1, Lord Llangattock (Hendre Sultan); 2, Mr. C. Ivor Lowrie, Radyr Farm, near Cardiff (Radyr Harold); 3, Mr. Peter Stubbs, Newnham (Blaisdon Prince); r, Sir W. H. Wills, Bart., M.P., Biagdon (Rickford Jewel).

Yearling cart colt or filly, the property of a tenant farmer resident in South Wales or Monmouthshire: 1, Mr. C. Ivor Lowrie; 2, Mrs. Sarah Loveluck and Son, Pyle, Bridgend (Madam).

Two year old cart colt or filly: 1, Lord Llangattock (Hendre Champion); 2, Mr. J. Williams (Buscot President); 3, Mr. P. Stubbs (Blaisdon Welcome); hc, Mr. F. Pick (Maud); r, Messrs. Edwards, Byford, and Marsh (Byford Countess).

Two year old cart colt or filly, the property of a tenant farmer resident in South Wales or Monmouthshire: 1, Mr. J. Williams (Buscot President); 2, Mrs. S. Loveluck and Sons (Champion); 3, Mr. E. Morgan (Snowdrop).

Cart mare in foal or with foal at foot: 1, Lord Llangattock (Emblem); 2, Miss E. C. Talbot (Maud); 3, Mr. Peter Stubs (Depper); hc, Mr. M. B. Stabbins (Jolly), Mr. Angus G. McGregor (Lady Hitchin); c, Messrs. Edwards (Byford Countess); r, Mr. C. Ivor Lowrie (Rosamond).

Cart mare, in foal, or with foal at foot, the property of a tenant farmer resident in Glamorgan or Monmouthshire: 1, Mr. C. Ivor Lowrie (Rosamond); 2 and 3, Mr. W. Emerson (Madam and Sweldon Fashion); hc, Mr. G. H. Williams (Glamorgan Fashion), and Mr. R. S. David (Mayflower); c, Mr. Daniel Matthews (Fashion); r, Mr. James Board (Bounce).

POLO PONIES.

Brood mare, suitable for breeding polo ponies, exceeding 13.2 and not above 14.2, in foal or with foal at foot, the property of a resident in South Wales or Monmouthshire: 1, Mr. F. Matthews, Glan Ely, near Cardiff (Marie Stewart); 2, Mr. R. Wiltshire, St. Mary-street (Dolly Varden); 3, Mr. J. Cording, Tonypandy (Miss Tarr); r, W. Prosser, Clifton-street, Cardiff (Lady Clifton).

Pony mare, not above 13.2, in foal or with foal at foot: 1, Mr. J. Howell (Queen Bee); 2, Mr. F. Thomas (Peggy Pekin); 3, Mr. H. Lewis (Nancy); r, Mr. W. Jones (Lady Mary).

HACKNEYS.

Brood mare, registered, exceeding 14.2, four years old or upwards, in foal to or with foal at foot by registered Hackney sire: 1, Mr. C. E. Galbraith, Dumfries (Queen of the West); 2, Mr. Frank J. Batchelor (Eunice); 3 and r, Mr. James Howell (Gilly Flower and Jennie Rufus).

Foals: 1, Mr. Thomas Nicholas (Royal Duck); 2, Mr. W. R. Lysaght (Lady Kate); r, Mr. James Howell (Jennie Rufus).

Hackney mare, exceeding 14.2, four years old and upwards, in foal or with foal at foot by registered Hackney sire, the property of a resident in South Wales and Monmouthshire: 1, 2, 3, and r, Mr. James Howell (Gilly Flower III., Jessamine, Lady Tenby, and Lady Fewson).

Foals: 1, Mr. Thomas Nicholas (Royal Duck); 2, Mr. W. R. Lysaght (Lady Kate); 3, Mr. James Howell (Lady Fewson).

Yearling colt or filly, by a registered hackney sire and dam: 1, Mr. H. B. Cory (St. Athans); 2, Mr. J. Howell (Hywel's Lord Prim); 3, Mr. E. M. Whitting, Weston-super-Mare (Quarter Day); r Mr. J. Howell (Hywel's Lord Roberts).

Yearling colt or filly by a registered hackney sire, the property of a resident in South Wales or Monmouthshire: 1, 2, and 3, Mr. J. Howell (Hywel's Lord Prim, Hywel's Lord Roberts, and Hywel's Lady Tenbryite); r, J. H. Jones, Glanrynys Llandilarog, Carm; hc, Mr. J. Price Jones, Middleton, Narberth (Gentleman John).

Hackney stallion fully registered, or eligible to be entered in the Hackney Society's Stud Book, and not under four years old: 1 and 2, Mr James Howell (Golden Fireaway and Lord Elsham); 3 and r, Mr. Herbert B. Cory (St. Melton's and Druidstone).

Two year old colt or filly, by a registered hackney sire and dam: 1 Mr. Charles E. Galbraith (Atbara); 2, Mr. Herbert B. Cory (Druidstone Kathleen),; 3, Mr. D. M. Price, Hendre, Builth (Errand Boy).

Hackney, two year old colt or filly by a registered hackney sire, the property of a resident in South Wales or Monmouthshire: 1, Mr. Herbert B. Cory (Druidstone Kathleen); 2, Mr. J. D. Lewis (Trustful); 3, Mr. F. L. Davis, Caerleon; r, Mr. D. M. Price (Errand Boy).

Derbyshire.

The Derbyshire Agricultural and Horticultural Society's annual exhibition was held at the Cattle Market and Holmes Ground, Derby, on Wednesday and Thursday, in most beautiful weather, and the attendance of visitors was very large. In 1897 the exhibits numbered 818, but in 1898 the total had fallen to 629, and it was not much higher in the following year. This year's catalogue, however, contained no fewer than 807 exhibits, and the improvement in the figures was almost wholly in the classes for horses. The total entry was 462, which is just over 100 in advance of last year, and fifty more than in 1896, which was the highest number previously recorded. The advance must be regarded as a striking testimony to the increased interest taken by the farmers in horse-breeding. The horticultural section was again a strong feature of the show, and the other attractions included horse-jumping contests, butter-making competitions, and a capital display of machinery in motion.

The following table shows the number of entries received in the chief departments for this year and the preceding four years:—

	1896.	1897.	1898.	1899.	1900.
Cattle	151	142	130	140	146
Horses	411	389	299	356	462
Sheep	56	74	44	38	44
Pigs	41	40	35	41	41
Butter and Cheese	67	80	24	19	23
Roots	64	50	53	33	60
Butter Making	44	43	44	41	31

Cattle.

Taken as a whole, the display of cattle was well up to the average. The Shorthorns were a representative collection, though, perhaps, not quite so numerous as in previous years, and included many animals familiar to the showyard. There was keen competition in each of the bull classes. The two-year-olds were headed by Royal Seal, a massive red, the property of Messrs. Rawes and Son, Newcastle. Duke Carolus 13th, an attractive three-year-old roan, shown by Mr. R. P. Cooper, Shenstone, was second. The same exhibitor had also to be content with a similar position in the one-year-old class, the winner being Mr. J. Evens's Royal Burton. There were several other promising animals in this class, which was one of the strongest in the section. Bulls under twelve months old numbered six, and made a strong show. Mr. G. Harrison's Red Rose Prince, a well-bred roan, aged eleven months, was placed first, and he was closely followed by Break of Day, a stylish son of Village Knight 2nd. The best Shorthorn bull, the property of a local tenant farmer, was shown by Mr. Richard Smedley, Derby, the honour falling to Blanco, a well-developed white, now close on two years old. The same breeder secured premier position with Fitzherbert, a promising bull calf. The class for the best Shorthorn bull in Derbyshire and Staffordshire calved last year was a small one, only three animals being entered. Success was easy for Mr. R. P. Cooper, who showed Noel Duke, a magnificent roan. There were eight cows, in milk or expected to calve this year, the chief of which was Dot, belonging to Mr. L. Broadbent, Whaley Bridge. In both classes some wonderfully good heifers were shown. Mr. G. Harrison headed the two-year-olds with Welfare, and Mr. J. Platt, of Newark, the younger class with Scottish Waterloo. Tenant farmers were responsible for a strong show of cows suitable for dairy purposes. Mr. A. Stretton, of Wicknor, usually a successful exhibitor at this show, took the chief award; while to the executors of the late Mr. J. Woodward, Twyford, was given the fifty guinea challenge cup (presented by the Duke of Devonshire, president) for the best local tenant farmer's animal in the cattle classes. The display of Channel Island cattle was superior to anything seen at Derby for several years. One-year-old bulls were numerously represented, the class being headed by Scout, a stylish grey fawn, shown by Mr. P. Phipps, of Rushton, Kettering. He had a close competitor in Mr. L. G. Gisborne's Marmion, an animal which has been extremely successful this season in the showyards of Northampton, Leicester, and Birkenhead. Thirteen cows were stalled in the three-year-old open class, and Mr. Phipps was again placed first, with Lady Lavinia 6th, a deep milking cow, a worthy descendant of the well-known Orme. The Duke of Portland secured second honours with Lily 4th. Lady Lavinia also distinguished herself in the cow or heifer class, while another animal from the Rushton herd—Lady of the Lake—was a good first in the two-year-old heifer class. Mr. Gisborne's Maisonnette was second. The section devoted to Kerry and Dexter Kerry cattle was small, but on this account the quality of the exhibits did not suffer. With one exception all were Dexters, and the winners were thoroughly representative animals. Mr. R. S. Warren, of Matlock, won the first award in each class, and the second positions were awarded to Mr. J. N. Woodiwiss, of Duffield.

Horses.

The collection of horses was the strongest seen for many years. Compared with last year there was the substantial increase of 100, and the character of the animals was well maintained. Agricultural horses were again a strong feature, and an improvement was particularly noticed in the young stock, especially in regard to filly foals. Derby is in the Meynell Hunt district, and upon the borders of the South Notts country, and it is only necessary to say that the collection of hunters and hacks was as strong as it should be. Speaking first of the Shires, half a dozen colts were entered, and an excellent lot they were. The winner was Caistor, a chestnut of nice quality, owned by Mr. J. Nix, and he had a strong competitor in Mr. W. T. Everard's Bardon Baronet. A fine, sprightly-moving yearling entered by Messrs. J. and M. Walwyn, of Etwall, was an easy winner in the tenant farmers' class, and the same breeders also took the chief award in the open class with Bearwardcote Blaze, a bloodlike bay. The Shire mares, both in the local and open classes, were a good show, and quite half a dozen were of outstanding merit. Mr. J. Eadie, of Barrow Hall, Derby, headed the open class, his exhibit being Vulcan's Pride, an animal many times distinguished in the showyard. Mr. Oakes, of Alfreton, who was second with Lidding's Princess Ida 2nd, also won in the filly foal class, which was by far the largest in the show; Mr. Eadie was a good second with a nice-quality bay sired by Barrow Victor. No fewer than thirty foals bred and exhibited by tenant farmers were stalled, and in point of quality they were a great improvement on previous shows. Messrs. J. and M. Walwyn captured chief honours, and Mr. F. Topham, of Morley, was a good second. Many special prizes were offered, and £2 premiums were won by colts or filly foals sired by any horse belonging to the Markeaton Stud, belonging to Messrs. J. Bingham, Denby, Egerton Orme, T. Roe, Sudbury, J. Hodson, Mickleover, and J. Downing, Sawley. The Shire Horse Society's gold medal fell to Hendre Twilight, the property of Sir Oswald Mosley, Bart. She comes from Lord Llangattock's stud, and possesses all the Shire characteristics. The three-year-old filly class was headed by Broughton Diamond, the property of Mr. J. Tipper, and Mr. J. Eadie came out first in the two-year-old class. Mr. F. B. Wilkinson, of Newark, was a successful exhibitor in the hunter classes. He took premier position in the brood mare and colt classes, and also secured the medal of the Hunters' Improvement Society with a fine youngster, by Kilmarnock. A similar honour fell to Mr. A. W. Haslewood, Buxton. Hunters up to fifteen stones were not a numerous class, but the five animals stalled were all of almost uniform excellence. Mr. H. Charrington, of Tutbury, was placed first with his magnificent chestnut Colonel, and Mr. J. H. Stokes, of Market Harborough, was a good second. Heathfield Conceit, a four-year-old hack, shown by Mr. A. L. Goodson, was well ahead of the rest of his class. Harness horses, 14 hands, were a representative collection, which was headed by Surprise, belonging to Mr. G. Ledson, and the first prize taker in the pony class was Prince Ideal, a stylish fast-going chestnut, exhibited by Mr. J. B. Pearson, Derby. Mr. F. J. Batchelor's well-bred pair of chestnut ponies greatly impressed the judges, and he had no difficulty in carrying off the premier award. The silver medal of the Hackney Society was awarded to the Beeston Stud Company's brood mare Pepina, which won the first prize in her class and repeated her last year's success. Beeston Princess, her five-months-old daughter, was reserved.

Sheep and Pigs.

There was not a big show of sheep. Mr. N. Woodiwiss won several prizes with specimens of the long-woolled breed, and the Sheffield Coal Company also headed a couple of classes, and took a special prize for the best sheep in the yard. Mr. W. Gibbs, of Kirk Langley, secured nearly all the awards with his short-woolled sheep. Pigs numbered forty-one—strangely enough, the same number as penned last year. Mr. J. Barron, Borrowash, and Mr. G. J. Bushell, Derby, pretty well divided the positions in the Large White breed classes, and Mr. R. S. Warren, Matlock, and Mrs. E. M. Mundy, Shipley, were among the chief prize-winners with Berkshires. Sir Oswald Mosley showed several good specimens of the Tamworth reds.

Prize List.

CATTLE.

SHORTHORNS.

Bull, two years old and under five (open): 1, T. Mace, Rawes, and Son, Newcastle (Royal Seal); 2, R. P. Cooper, Shenstone, Lichfield (Duke Carolus XIII.); r, Richard Smedley, Asher Fields, Pentrich (King Cup); hc, B. Langdale Barrow, Sydnope Hall, near Matlock (Lord Fairy Butterfly).

Bull, above one and under two years old (open): 1, John Evens, Burton, near Lincoln (Royal Burton); 2, R. P. Cooper, Shenston, Lichfield (Saturn); r, George Harrison, Gainford Hall, Darlington (First Favourite).

Shorthorn bull, above one and under two years old, the property of a tenant farmer residing within the Society's area: 1, Richard Smedley (Blanco); 2, Joshua Lomas, Yeardsley Hall via Stockport (Lord Esher).

Bull, under twelve months old (open): 1, George Harrison (Red Rose Prince); 2, C. W. Kellock, Highfields, Audlem, Cheshire (Break of Day); r, R. P. Cooper (Noel Duke).

Bull calf, under twelve months old, entered in Channel Island Herd Book (open): 1, Lees Broadbent (Cedar Pride II.); 2, R. Lord Sudeley, Toddington, Winchcombe (Bridge of Canes Pride II.); r, Lees Broadbent (Cedas Pride II.).

Best Shorthorn bull in Derbyshire and Staffordshire calved in the year 1899: 1, R. P. Cooper (Noel Duke); 2, Lees Broadbent (Cedas Pride II.).

Cow in milk or to calve in 1900 (open): 1, Lees Broadbent (Dot); 2, John Evens; r, Sir Oswald Mosley, Bart., Rolleston Hall (Vesper Countess).

Heifer, under three years old, in milk, or to calve before March, 1901 (open): 1, George Harrison (Welfare); 2, John Woods, Draycott House, Marchington (Daisy Foggathorpe); r, J. W. Smith, Twyford.

Heifer, under two years old (open): 1, Frederick Platt, Barnby Moor, Newark (Scottish Waterloo); 2, George Harrison (Village Queen); r, Henry Wynne, Brick House Farm, Hadley (Duchess of Pride); hc, Rowson and Co., Farm, Reading (Lady Rose).

Pure bred Shorthorn cow, in milk, of any age, eligible for and entered in Channel Island Herd Book, the property of a tenant farmer entry previous to the show (open): 1, Lees Broadbent (Dot); 2, George Harrison (Rose of Europe); r, Sir Oswald Mosley, Bart. (Lady Alice).

CATTLE OF ANY BREED BUT QUALIFIED FOR ENTRY IN THE CHANNEL ISLAND HERD BOOK.

(To be exhibited in store condition.)

Bull, two years old and under five (tenant farmers): 1, Richard Smedley (King Cup).

Bull, above one and not exceeding two years old (tenant farmers): 1, John Falder, Lockington (The Duke); 2, William White, Lockington; r, Joshua Lomas, Yeardsley Hall (Lord Esher).

Three cows, three years old or upwards, and in calf or in milk for dairy purposes, the property of a tenant farmer residing within the Society's area, to be in milk, or to calve in 1900 (tenant farmers): 1, A. Stretton, Wichnor; 2, Exors. of late James Woodward, Twyford; 3, J. F. Hollingworth, Weston Coyney; hc, William Yates, Duffield.

Cow in milk, or to calve in 1900, best adapted for dairy purposes (tenant farmers): 1 and hc, A. Stretton; 2, John Gadsby (Whatedge), hc, Exors. of late James Woodward, Twyford.

Heifer under three years old, in milk or to calve before March, 1901, bred by exhibitor (tenant farmers): 1 and r, J. W. Smith; 2, Exors. of late James Woodward.

Heifer, under two years old, best adapted for dairy purposes, bred by exhibitor (tenant farmers): 1 and r, A. Stretton; 2, Exors. of the late James Woodward.

Heifer calf, over six and under twelve months old (tenant farmers): 1, Reuben Shelton (Lady Rosella); 2, A. Stretton.

Bull calf, over six and under twelve months old (tenant farmers only): 1 and 2, A. Stretton; r, Richard Smedley (Fitz Herbert).

CHANNEL ISLAND.

Bull, above one year old (open): 1, Pickering Phipps, Rushton Hall, Kettering (Scout); 2, Lionel G. Gisborne, Allestree Hall (Marmion); r, His Grace the Duke of Portland, Welbeck Abbey (Sardius); hc, William Shepherd, Ivy House, Scropton (Scropton Chinese Shot).

Cow, three years old or upwards, in milk or to calve in 1900 (open): 1, Pickering Phipps (Lady Lavinia); 2, His Grace the Duke of Portland (Lily IV.); r, Richard Wright, Chestall, Rugeley (Red Fern); hc, Pickering Phipps (Lily IV.), A. S. Marsden Smedley (Victoria's Legacy), J. Reid Walker (Red Fern).

Cow or heifer, in milk, or in calf, bred in Great Britain or Ireland (open): 1, Pickering Phipps (Lady Lavinia VI.); 2, Lionel G. Gisborne, Allestree Hall (Marigold); r, Pickering Phipps (Trust IV.).

Heifer, calved in the year 1898 (open): 1, Pickering Phipps (Lady of the Lake); 2, Lionel G. Gisborne (Maisonnette D.); r, Pickering Phipps (Trustful).

KERRY AND DEXTER KERRY.

Kerry or Dexter Kerry bull, under four years old (open): 1, Robert S. Warren, Alderwasley (Sedgemere Nigger); 2, Isaac Newton Woodiwiss, Chevin Stud Farm (Sedgemere Aristocrat XCIX); r, Sir Peter Walker, Bart., Osmaston Manor (Acorn Slave).

Kerry or Dexter Kerry cow or heifer, in milk or in calf (open): 1 and 3, Robert S. Warren (Ridgewood Biddy and Ridgewood Wee Kitty); 2 and c, Isaac Newton Woodiwiss (Sedgemere Bonny Maid and Sedgemere Birthday); r and c, J. Reid Walker (Little Bo Peep and Cahir Star).

HORSES

AGRICULTURAL.

Two-year-old entire Shire colt (open): 1, John Nix, Alfreton (Caistor); 2, W. T. Everard, Bardon Hall (Bardon Baronet).

Yearling entire Shire colt (tenant farmers): 1, J. and M. Walwyn, Bearwardcote (Bearwardcote Blaze); 2, J. W. Whitehurst, Markeaton (Viceroy of Markeaton).

Yearling entire Shire colt (open): 1, J. and M. Walwyn (Bearwardcote Blaze); 2, James Eadie, Barrow Hall (Barrow Boss); r, J. W. Whitehurst, Markeaton (Viceroy of Markeaton); c, Albert Armitage, Cotgrave Place, Nottingham (Cotgrave Regent Duke).

Two-year-old cart gelding (landlord or tenant): 1, G. F. H. Wade, Alvaston; 2, G. H. Bennett, Sawley (Duke); r, F. Topham, Broomfield Farm, Morley (Flash Light); c, W. White, Lockington.

Three-year-old cart gelding (landlord or tenant): 1, Timothy Lowe, The Oaklands, Walton-on-Trent (Walton Royal); 2, James Eadie (Barrow Sam); r, R. Finney, Hemington (Captain).

Cart gelding, four years old and upwards (landlord or tenant): 1, James Brooks, Trent House, Willington (Draryman); 2, Cook Bros., Kegworth.

Shire mare, with foal at foot (tenant farmers): 1, Egerton Orme, Ash, Etwall (Extraordinary); 2, John Orme, Sutton (Smiler); 3, R. Moore and Sons, Bilborough (Sedate); 4, Thomas Roe, Aston House, Sudbury; r, F. Farnsworth, Ratcliffe, Atherstone (Rose of Europe).

Shire mare, with foal at foot (open): 1 and r, James Eadie (Vulcan's Pride and Hendre Lassie); 2, [illegible] (Princess Ida II.); hc, Alfred Wright, Chestall, Rugeley (Red Fern); John Orme, Sutton, c, R. Moore and Sons (Sedate).

Shire colt foal (landlord or tenant): 1, C. R. Hanson, Cloverlands; 2, John Hodson, Mickleover; 3, Egerton Orme; r, R. M. Sims, Barrow Hall; hc, J. Bingham, Waingrove Hall, Denby; W. T. Everard, Bardon Hall (Bardon Bobs); J. and M. Walwyn, Bearwardcote.

Special prizes [illegible] Princess, and shown in [illegible] John Bingham; 3, J. and M. Walwyn; r, R. Vale.

Shire filly foal (landlord or tenant): 1, James Oakes; 2, James Eadie; 3, J. and M. Walwyn; r, W. T. Everard; hc, Joseph Downing, Sawley; R. Orme.

Special prizes [illegible] farmers, and exhibited in preceding class: 1, J. and M. Walwyn; 2, F. Topham; 3, Thomas Roe; r, J. Hill.

For [illegible] Markeaton Stud, and entered in any previous classes: Equal 1, J. Bingham, Waingrove Hall, Denby (Bardon Bobs), and [illegible]; 2, [illegible]; 3, [illegible]; r, [illegible]; hc, [illegible].

For [illegible] entered in a previous class: 1, Thomas Roe; r, Joseph Downing.

For [illegible] Markeaton Stud, and entered in any previous classes: 1, [illegible]; 2, [illegible]; 3, [illegible]; r, [illegible]; hc, [illegible].

For [illegible] entered in a previous class: 1, Thomas Roe; r, Joseph Downing.

surance Company, Limited: 1, F Topham; 2, Joseph Spalton; r, T Bassett Bullock

Shire mare, four years old and upwards, without foal (landlord or tenant): 1, F Lowndes, Rolleston Park (Rolleston Enchant); 2, Sir Oswald Mosley, Bart (Hendre Twilight); r, James Oakes (Riddings Princess Ida III)

Three-year-old Shire filly (tenant farmers): 1, James Tipper, The Green, Church Broughton (Broughton Diamond); 2, F W Gilbert, Meckleover (Bounce); 3, William Bull, Pinfold Farm, Repton (Repton Queen)

Three-year-old Shire filly (open): 1, James Tipper (Broughton Diamond); 2, James Oakes (Riddings Princess Ida IV); r, James Eadie (Holker Betty); hc, John Hodson (Desford Royal Lady)

Two-year-old Shire filly (tenant farmers): 1, F. W. Gilbert (Goadby Queen); 2, James Brooks, (Rustic Queen); 3, J. Y Hibbard, Thrumpton (Thrumpton Playmate); r, Stephen Rain, Stockley Park, Burton-on-Trent (Vanilla); hc, John Heathcote, Perwich Leys, Ashbourne (Jenny)

Two-year-old Shire filly (open): 1, James Eadie (Buscot Songstress); 2, F W. Gilbert (Goadby Queen); 3, James Brooks (Rustic Queen); r, W T Everard (Bardon Forget-Me-Not)

One-year-old Shire filly (tenant farmers): 1 and hc, G. F. H Wade (Alvaston Gleaming and Alvaston Queen); 2, John Spalton (Mackworth Bountiful); 3, Charles Etches, Royston Grange, Ballidon (Lady Magnum); r, W. White, Lockington (Countess).

One year-old Shire filly (open): 1, G. F. H. Wade (Alvaston Gleaming); 2, Sir Oswald Mosley, Bart (Brookside Lassie); 3, John Spalton (Mackworth Bountiful); r, Charles Etches (Lady Magnum)

HUNTERS AND HACKS

Brood mare, best fitted for breeding hunters, with foal at foot (open): 1 and 2, F. B. Wilkinson, Cavendish Lodge, Edwinstowe; r, Charles Miles, Tatenhill (Lot's Wife); hc, A. O Haslewood, Buxton (Hill Top); c, Clifford Schwabe, Arden (Whisper Low)

Hunter colt or filly foal (open): 1, F. B Wilkinson; 2, Clifford Schwabe; r, W. D Winterbottom, Aston Hall.

Yearling colt or filly, for hunting purposes (landlord or tenant): 1, A. O. Haslewood, Buxton (Macdougall); 2, T. H. Tomlinson, Dale Farm, Willington (Ruiksborough); r, Colonel Swinfen, Swinfen Hall, Lichfield (Dawn)

Two-year-old gelding or filly, for hunting purposes (landlord or tenant): 1, Sir Peter Walker, Bart, Osmaston Manor; 2 and Hunter's Society's silver medal, A. O Haslewood (Chaset); r and hc, for Hunter's Society silver medal, Charles Miles, Tatenhill (Lavinia)

Three-year-old gelding or filly, for hunting purposes (landlord or tenant): 1, F B. Wilkinson; 2, J Raynor, Wollaton (Elvaston); r, Hugh S. Charrington, Dove Cliff (Red Cross)

Hunter, four-year-old and upwards, up to 12 stones; period in possession from July 1st, 1900 (landlord or tenant): 1, W. D Winterbottom; 2, Sir Peter Walker, Bart (Rocket); 3, F. B Wilkinson; r, Henry Charrington, Castle Hill, Tutbury (Landley)

Hunter, up to 15 stones; period in possession from July 1st, 1900 (open): 1, Henry Charrington (Colonel); 2 and 3, J. H. Stokes, Great Bowden; r, Sir Peter Walker, Bart. (Curlew).

Hunter, four years old and upwards, up to not less than 13 stones; period in possession from July 1st, 1900; within the Meynell Hunt district of Derbyshire (tenant farmers): 1, T. H. Tomlinson, Dale Farm, Willington; 2, J. F. Hollingsworth, Weston-on-Trent; r, P. Walker, Shipley (Topthorn).

HACKNEYS OR ROADSTERS.

Brood mare, most suitable for breeding hacks or roadsters, with foal at foot (landlord or tenant): 1 and Hackney Horse Society's silver medal, Beeston Stud Co., Trent Vale Farm, Beeston (Pepina); 2, A. S. Marsden Smedley (Snowdrop); r, J. T. C. Eadie (Barrow Lady Jean); hc, Sir Oswald Mosley, Bart (Brilliance)

Hackney colt foal (landlord or tenant): 1, George Welsh, Castle Donington; 2, A. S. Marsden Smedley (Norman Cadet); r, Sir Oswald Mosley, Bart. (Rolleston King).

Hackney filly foal (landlord or tenant): 1, and reserve for Hackney Horse Society's silver medal, Beeston Stud Co (Beeston Princess); 2, J. T. C Eadie; r, Harry Hole, Talbot Street, Derby (Chellaston Countess).

Hack or roadster, 15 hands and upwards, to be ridden; period in possession from July 1st, 1900 (open): 1, A. L. Goodson, Heathfield (Heathfield Conceit); 2, Frank J. Batchelor, Hopwood Stud Farm, Alvechurch (Wild Agnes); 3, Geo. Ledson, Manor House, Bromborough (Astonishment); r, J. B. Pearson, Waverley Livery Stables, Derby (Lady Lofty)

Hack or roadster, to be ridden; period in possession from July 1st, 1900 (landlord or tenant): 1, Robert Hussey, Eastfields, Lichfield (Boy Myrtle); 2, Edward McInnes, Littleover Old Hall (Punch); 3, Beeston Stud Co. (Pepina); r, Colonel Swinfen Brown, Swinfen Hall, Lichfield (Daphne); hc, Henry Shrimpshaw, 29, Radford Road, Nottingham (Pride of the Forest).

HARNESS CLASSES.

Harness horse or mare, 15 hands and upwards; period in possession from July 1st, 1900 (open): 1, Frank J. Batchelor (Wild Agnes); 2, George Ledson (Astonishment); 3, A. L. Goodson (Heathfield Conceit); r, J. B Pearson (Lady Lofty); hc, Frank Newton Hobson (Wollaton Cadet)

Harness horse or mare, 14 hands and under 15 hands; period in possession from July 1st, 1900 (open): 1, George Ledson (Surprise); 2, Frank J Batchelor (Lord Alington); r, R Hussey (Boy Myrtle); hc, Edward McInnes (Punch).

Harness pony under 14 hands; period in possession from July 1st, 1900 (open): 1, J. B Pearson (Prince Ideal); 2, E. T Emery, Vernon Street, Derby; r, W Preston, Clarendon Hotel, Derby (Doctor); hc, B Johnson, Derby

For the best pair to be drawn in the ring; period in possession from July 1st, 1900 (open): 1, Frank J. Batchelor (Wild Agnes and Lord Alington); 2, Edward McInnes (Punch and Brewer); r, Lady Walker (Gamecock and Gamester).

SHEEP.

LONG WOOLLED.

Five breeding ewes having had lambs in 1900, and suckled them up to the 1st June: 1, Isaac Newton Woodiwiss; 2, Richard Smedley; r, William Futtit, Whitwell

Five long-woolled theaves: 1, Isaac Newton Woodiwiss; 2, William Futtit; r, J. W. Whitehurst, Markeaton.

Five long-woolled ewe lambs: 1, Robert Turner, Lockington; 2, J. B. Mellor, Over Haddon; r, Isaac Newton Woodiwiss; hc, William Futtit

Long-woolled ram, any age above a shearling: 1, and special Sheffield Coal Company's, Birley Moor Farm, Gleadless; 2 and r for special, Sheffield Coal Company; hc and c, Isaac Dean, Kirk Ireton.

Shearling long-woolled ram: 1, Sheffield Coal Company; 2, Isaac Newton Woodiwiss

Long-woolled ram lamb: 1, Isaac Newton Woodiwiss; 2, and r, Isaac Dean.

SHORT WOOLLED.

Five breeding ewes having had lambs in 1900, and suckled them up to the 1st June: 1, W Gibbs, Kirk Langley; 2, Sir Oswald Mosley, Bart.

Five short-woolled theaves: 1, W Gibbs; 2, R. H. Archer.

Five short-woolled ewe lambs: 1, Sir Oswald Mosley, Bart.

Short-woolled ram, of any age above a shearling: 1, R. H. Archer; 2, W. Gibbs; r, Joseph Spalton, Bowbridge; hc, William Futtit.

Shearling short-woolled ram: 1, R. H. Archer; 2 and r, Sir Oswald Mosley, Bart.

Short-woolled ram lamb: 1, W. Gibbs; 2, R. H. Archer.

Pen of five fat wether sheep, not exceeding twenty-two months old: 1, F. W. Gilbert; 2, G. D'Arcy Clark, Burnaston; r, Joseph B. Smith, Draycott Fields.

PIGS.

LARGE WHITES.

Boar, of any age, best adapted for general use (landlord or tenant): 1, 2, and special prize, John Barron, Elvaston House, Barrowash (Barrowfield Topsman and Barrowfield Eclipse); r, G. J. Bushell, The Union, Derby (Prince); hc, James Hill, White Lion, Derwent Street, Derby (Barrowfield Topsman VII.).

Sow, of any age, suckling or in pig (landlord or tenant): 1 and r, G. J. Bushell (Markeaton Lass and Markeaton Lady); 2, Charles Ecob; hc and c, J. F. Hollingworth

Three breeding pigs, of one sex, farrowed in 1900 (landlord or tenant): 1, John Barron; 2, G. J. Bushell; r, J. F. Hollingworth; hc, Charles Mort.

BERKSHIRES.

Boar, of any age, best adapted for general use (landlord or tenant): 1, Mrs. E. M. Mundy, Shipley (Prince, Victor); 2, Albert F. Hurt, Alderwasley (The Sirdar); r, Wm. Matthews, Green Stoup Farm, Mercaston.

Sow, of any age, in pig or suckling (landlord or tenant): 1, 2, and reserve for special prize, Robert S. Warren, Alderwasley; r, Mrs. E. M. Mundy (Flossie); hc, Albert F. Hurt (Seccotine); c, Wm. Matthews (Green Stoup Model)

Three breeding pigs, of one sex, farrowed in 1900 (landlord or tenant): 1, Robert S. Warren; 2, John Barron; r, Wm. Matthews.

ANY OTHER BREED.

Boar, of any age (landlord or tenant): 1, Sir Oswald Mosley, Bart. (Masher's Jewel); 2, F. W. Gilbert, Mickleover; r, T. Musson, Canal Street, Derby (Royal Albert).

Sow, of any age, in pig or suckling (landlord or tenant): 1, Sir Peter Walker, Bart. (Osmaston Beauty); 2 and r, Sir Oswald Mosley, Bart (Rolleston Daisy and Rolleston Princess)

Three breeding pigs, of one sex, farrowed in 1900 (landlord or tenant): 1, 2, and r, F. W. Gilbert, Mickleover.

Newbury Horse Show.

Newbury Horse Show was held on Wednesday in fine weather, which resulted in a successful show. The hon. sec. of the Society, Colonel Ricardo, is away in South Africa with the Imperial Yeomanry, and during the afternoon a cable was despatched to him stating that the show was a successful one. Hunters were judged by Mr. Romer Williams and Mr. P. Muntz. In Class 1, an open competition for the best brood mare and foal, there were five entries, including Goodcraft, a bay mare with a filly by Yard Arm, who was undoubtedly the best shown in the class, but inasmuch as she had previously won, the award went to Cockade, a useful mare with a good filly. In the local class for the same sort of animal there were ten entries. The quality was not so noticeable here, but the winner, a bay mare with filly by Boscawen, possessed plenty of room and scope, and was a useful animal. For the best hunter to carry not less than 14 stone the first prize went to Limerick, an exceptionally nice horse, full of quality and capable of weight-carrying. Waterproof, placed second, was also up to good weight, and galloped strongly. Class 4, also open, was for the best hunter qualified to carry less than 14 stone, and here the judges met with the best horse that came under their notice in Mavis, a seven-year-old chestnut gelding. The second in this class, Hermit, was also a fine mover, but not capable of carrying much over 12 stone. In Class 6 there were fifteen entries, and the competition for first and second places was very keen. The horses eventually securing these positions were the property of the same owner, Mr. James Bishop, of Hamstead Park. The judges were a long time in arriving at a decision, but eventually gave the first award to the chestnut mare Steller, who was possessed of more quality and was better on her forelegs than Gamester, who, however, was a very powerful galloper. Classes 7 to 12, which embraced young stock, were judged by Mr. T. K. Elliott and Mr. E. Legg, and in the open competition for the best mare or gelding foaled in 1897 calculated to make a hunter, there were five entries, and Mr. Holt-Needham, of Castle Cary, repeated successes he has gained here, this time with Killarney, a stylish mare, who, however, was run close by the bay gelding of Mr. Jefferies.

In the agricultural department, the judging was undertaken by Mr. B. Bucknell and Mr. J. Forshaw. Perhaps the most noteworthy feature was the success of Mr. W. H. Godding, of Brimslade, Marlborough, whose four-year-old stallion, Savernake Bar None Conqueror, won in the open class. Mr. Godding was also successful in the local class with Savernake Bar None, a son of the winner in the above. There were eight entries of cart mares with foal in the open class, and here Lord Wantage gained the blue rosette with Tatton Flower and a filly foaled in May last. Mr. Alexander Henderson, M.P., occupied second place, and Mr. Godding's two exhibits secured the third and commended. In the local class, where there were five competitors, Mr Godding swept the board. The first prize for the best cart mare or gelding not under three years went to Duchess of Bridgwater 3rd, who would have received the Shire Horse Society's silver medal had she not already gained one of their prizes, and under these circumstances the medal went to the second, Lord Wantage's exhibit. The chief interest for the great bulk of the public, however, was centred in the jumping and driving competitions, which followed the general parade of exhibits in the large ring.

Prize List.

HUNTERS.

Best brood mare and foal for breeding hunters (open): 1, J. A. Mulleus, Barrow Hills, Longeross, Surrey (Cockade); 2, A. Gorham, Telscombe, Lewes (Sally Brass); r, Lionel Barlow, Priors Court, Newbury (Zoo).

Best brood mare and foal for breeding hunters (open): 1, Commander H. G. W. Thirold, R.N., Silchester Hall; 2, Lionel Barlow, Priors Court (Zoo); r, E. B. Black-Hawkins, Upper Link, St. Mary Bourne (Diana); hc, Edney Hayter, Breach Stud Farm, St. Mary Bourne (Sweet Seventeen).

Best hunter, qualified to carry not less than 14 stone, four years old (open): 1, Hon. L. P. Bouverie, Freelands, Wherwell, Andover (Limerick); 2, A. Gorham, Telscombe, Lewes (Waterproof); 3, J. Stratton, Chilcombe, Winchester (Gay Lad); r, H. P. Woolcott, Wanborough Plain, Swindon (Mullingar); hc, Colonel G. P. Townshend, Eliot Park.

Best hunter, qualified to carry less than 14 stone, four years and upwards (open): 1, Leonard H. Taylor, Biddestone, Chippenham (Marvis); 2, H. P. Woolcott, Swindon (Hermit); 3, Miss Mary Rennie, Denford (Red Deer); r, Harry Dyson, Pamber, Basingstoke (Barley Sugar).

Ditto, local: 1, B. H. Lay, Steventon; 2, C. H. Whatley, Wanborough (Baden Powell); 3, Harry Dyson (Confectioner)

Hunter, to carry 13 stone and upwards, property of residents within the Craven Hunt or twelve miles of Newbury: 1, J. Bishop, Hamstead Park, Newbury (Steller); 2, J. Bishop (Gamester); 3, H. P. Woolcott (Mullingar); r, B. H. Lay, Steventon; hc, H. P. Woolcott (Hermit); c, Miss Mary Rennie, Denford (Red Deer); Harry Dyson, Pamber (Confectioner).

YOUNG STOCK.

Best mare or gelding calculated to carry a hunter, foaled in 1897 (open): 1, O. N. Holt-Needham, Castle Cary (Killarney); 2, A. Jefferies, Goosey, Faringdon; 3, E. B. Black-Hawkins (Killarney Boy); r, Sir F. W. Carden, Bart., Stargroves, Woodhay (Ouida).

Best mare or gelding calculated to make a hunter, foaled in 1897 (local): 1, F. B. Johnston, East Woodhay House (Estralda); 2, B. H. Lay, Harwell, Steventon; 3, E. B. Black-Hawkins (Killarney Boy); hc, Sir F. W. Carden, Bart. (Ouida).

Best colt, gelding, or filly calculated to make a hunter, foaled in 1898 (open): 1, C. Calway Bamber, Springfield Lodge, Chelmsford, Essex (Homely Lass); 2, Leonard H. Taylor, Beddestone, Chippenham (Letty Lind); 3, O. N. Holt-Needham (Dancing Girl); r, A. Gorham (Dick Swiveller).

Best colt gelding or filly, calculated to make a hunter, foaled 1898 (open): 1, W. H. Godding, Brimslade, Marlborough (Lady Doreen); 2, J. A. Rutherford, Highclere; r, Sir F. W. Carden.

Best colt, gelding, or filly, calculated to make a hunter, foaled 1899 (local): 1, Blackwell Simonds, Bradfield (Bobs); 2, E. B. Black-Hawkins (Lady Grey); 3, E. B. Black-Hawkins (Ladysmith); r, E. H. Fox, Adbury (Primrose).

HACKS.

Best hack not over 15.2 hands (open): 1, Captain J. Yorke Worthington, Benham Lodge, Newbury (The Rector); 2, W. E. Royds, 7th Hussars, Aldershot (Monkey); 3, W. E. Royds (San Toy); hc, Blackall Simonds, Bradfield House (Tamworth).

DRIVING

Best gelding or mare, to be driven in ring (open): 1, E. and A. Baxter, Hutton Hackney Stud, Brentwood, Essex (Lady Nell); 2, R. T. Thornton, Brentwood, Essex (Amandor); 3, Dr. B. Lyne Stevens, Enham Place, Andover (Smart Dungelt); r, R. T. Thornton (Princess May).

For best gelding or mare, the property of a resident within a radius of twelve miles of Newbury: 1, Mrs. Carstairs, Welford Park, Newbury (Billy); 2, O. W Rayner, Chieveley Manor (Gordon); 3, W. H. Coldicutt, Newbury (The Pauper); r, V. M. Hudson, Snelsmore, Newbury (Rumbidge).

For best gelding or mare, the property of tenant farmers or tradesmen within a radius of twelve miles of Newbury (local): 1, T. S. Hewer, Hungerford (Peter); 2, W. H. Coldicutt (Khaki); r, G. Warner, Midgham (Tiffler).

Best pony not over 14 hands (open): 1, E. W. Headington, Slough (Snowball); 2, G. Matthey, Goring-on-Thames (Silver Duke); r, G. T. Polley, Reading.

For the best tandem (open): 1, Mrs Carstairs, Welford Park (Billy and Sam); 2, R. T. Thornton, Brentwood (Armada and Princess May); r, W. E. Royds, 7th Hussars, Aldershot (Monkey and San Toy).

Best pony not over 13.2, property of a resident within twelve miles of Newbury: 1, W. H Coldicutt (The Pauper); 2, Mrs. C. Toubs, Newbury (Magic); 3, Dr. R. Maples, Kingsclere (Billy); r, Miss Fort, Speen, Newbury (The Dwarf).

AGRICULTURAL HORSES.

Three exhibits, best cart stallion, four years old and upwards: 1, W. H. Godding (Savernake Bar None Conqueror); 2, Rev. W. C. Dicker, St. John's Vicarage, Birkenhead (Mechanic II.).

Best cart stallion, 1897 or 1898 (local): 1, W. H. Godding (Savernake Bar None); 2, T. S. Hewer, Knighton, Hungerford (Khaki Boy)

Best cart mare and foal (open): 1, Lord Wantage, Lambourn, Wantage (Tatton Flower); 2, Alexander Henderson, M.P., Buscot Park, Faringdon (Moore's Cambria); r, W H Godding (Savernake Gloaming); hc, R. W. Hudson (Lockinge Nellie), c, W. H Godding (Savernake Orchard Princess).

Best cart mare and foal, the property of a tenant farmer or tradesman residing within twenty miles of Newbury or within limits of Craven Hunt: 1, 2, 3, and r, W. H. Godding (Savernake Gloaming, Savernake Princess May, Savernake Orchard Princess, and Savernake Gipsy).

Cart foal, residents within twenty miles of Town Hall: 1, T. S. Hewer; 2, W. H. Godding; 3, T. W. Waldron, Eastridge, Ramsbury; r, J. Lay, Thatcham; hc, W. H. Godding; c, Reading Sanitary Authority.

Best foal, got by Harold's Rival: 1, T. S. Hewer; 2, R. Cook, Radley, Hungerford; 3, E. Waldron, Ramsbury; 4, J. Lay, Thatcham; r, R. Osmond, Wootton; hc, R. Osmond

Best cart gelding or filly, foaled 1898, the property of tenant farmers or tradesmen, within twenty miles of Newbury: 1, F Stevens, East Isley; 2, J. Lay (Wells's Constance); 3, F Stevens; hc, T. S Hewer (Thrupp Belle); hc, Charles H Meese, Elcot: r, T S Hewer (Thrupp Belle); hc, R Cook, Radley

Ditto, open: 1, R. W. Hudson, Donnehold Great Marlow; 2, T S Hewer; 3, W H Godding (Savernake Duke); r, Reading Sanitary Authority (Whitefoot Hermione); hc, H Boxendale, Greenham (Lockinge Field Marshall); c, J Lay (Lockinge Chancellor)

Best cart filly or gelding, foaled the property of tenant farmer or tradesman (local): 1, J Lay (Wells's Belle); 2, W H Godding, Marlborough (Savernake Princess); 3, T S Hewer, Hungerford; hc, E. Church, Ridgemoor, Newbury (Thrupp Belle).

Best gelding or mare, the property of farmer or tradesman residing within twenty miles of Newbury: 1, W H Godding, Marlborough (Savernake Gloaming); 2, T S Hewer, Hungerford (Thrupp Eastcote); 3, T S Hewer (Savernake); r, W H Godding, Marlborough (Savernake Princess May); hc, W H Gerford (Whitefoot).

Best pair of agricultural horses, any age, the property of tenant farmers residing within twenty miles of Newbury, such pair to be shown in plough harness and driven in ring: 1, W H Godding, Marlborough (Savernake Orchard Princess and Savernake Gloaming); 2, T S Hewer, Hungerford (Drummer and Souvenir); 3, T S Hewer, Hungerford (Thrupp

Fashion and Thrupp Magpie); r. W. H Godding (Savernake Princess May and Savernake Gipsy).

Best cart mare or gelding, not under three years old (open): 1, Arthur Ransom, Hitchen (Duchess of Bridgewater III.); 2, Lord Wantage, Wantage (Blythwood Guelder Rose); r, Alexander Hedderson, Buscot Park, Faringdon (Morris Cambria); hc, R. W. Hudson, Danesfield, Great Marlow (Lockinge Nellie); c, W. H. Godding, Marlborough (Savernake Gloaming).

JUMPING.

Best horse or mare, over 15 hands, jumping only point of merit (open): A. N. Smith, Redhill (Grasshopper); 2, A. N. Smith, Redhill (Little Lady); r, A. N. Smith (Rat).

Horse or mare, not exceeding 15 hands, jumping the only point of merit (open): 1, R. Tugwell, Tetbury (Dainty); 2, divided between A. N. Smith (Starlight); and Hayden Bros., Winchfield (Corky Boy).

Middlewich.

The forty-second annual show of the Middlewich and District Agricultural Society, held on Wednesday, was favoured with glorious weather, an increased number of entries, and a splendid attendance, thus making the event a most successful one. There were 1,281 entries, as compared with 1,125 last year, but the increase is made more apparent when it is considered that this year, owing to the prevalence of swine fever in the district, no pigs were shown, whereas a year ago there were forty-eight entries in this department. In 1890 the number of entries was only 485, and there has been a steady increase year by year. There was a standard of excellence in the horses which had not been exceeded at Middlewich before, and many useful animals were shown. The number of exhibits in this department was 180, as against 156 last year, and the improvement was noticeable both in the light and heavy classes. The Shires included several winners at recent shows, and the one and two year olds were a very likely collection. The judges experienced considerable difficulty in judging of the merits of the two-year-old mares or geldings. There were several excellent specimens of the Shire horse with plenty of power and weight. In the class for four-year-old mare or gelding Mr. MacIntyre's roan, Redlynch Duke, won with ease. There was no lack of merit amongst the light horses, both hunters and for carriage purposes. The tenant farmers of the district made it apparent that they are possessed of roadsters of an excellent type. Of the cobs over 13½ hands and under 14½ Mr. Nelson's Butterfly, an American, proved the best in the yard, showing exceptional bone and feet. There was a distinct improvement in the exhibits of horned cattle as compared with last, or any previous year, there being forty-one entries, as against 32, and the quality was of exceptional excellence. Of the bulls, two years and upwards, Mr. T. Cliffe, of Crewe, was the winner with a fine beast of extraordinary weight, which has met with success in many parts of the country. Mr. J. A. Brown, of Tarporley, won easily in the class for bulls under two years old. There was not a numerous entry for bull calves, but the first and second prize winners were good specimens of the Shorthorned type. There were some exceptionally fine entries in the class for pairs of dairy cows, premier honours being gained by Mr. R. Clarke, of Warrington, with a beautiful pair of whites. There was also a fine collection of dairy cows in the next class. The judges found some difficulty in deciding upon the almost equal merits of the first and second winning pairs of two-year-old heifers, and in the one-year-olds there was little to choose. There were good classes of cottagers' cows and heifers, the former being a distinct improvement as compared with last year.

The principal awards were as follows:—

CATTLE.

(For tenant farmers in the Society's radius.)

Bull, two years and upwards: 1, I. A. Brown, Tarporley; 2, Thomas Cliffe, Crewe; 3, George Moreton, Middlewich.

Bull, under two years: 1, I. A. Brown, Tarporley; 2, Richard Hull, Nantwich; 3, George Lewis, Crewe.

Bull calf, under one year, to be reared for stock purposes: 1, Sam W. Gould, Lymm; 2, Peter Maddock, Middlewich; 3, Richard Clarke, Warrington.

Three-year-old mare or gelding: 1, J. T. Colclough, Betchton; 2, Mrs. Parton, Nantwich.

Four-year-old mare or gelding: 1, A. M'Intyre, Lymm; 2, Charles Baker, Congleton.

Best cart mare, with foal at foot: 1, Charles Baker, Congleton; 2, James Colclough, Stoke-on-Trent; 3, Lewis Dodd, Malpas.

Cart horse, mare, or gelding: 1, A. M'Intyre, Lymm; 2, James Colclough, Stoke-on-Trent.

Cart foal: 1, Lewis Dodd, Malpas; 2, James Colclough, Stoke-on-Trent.

LIGHT HORSES.

Foal, likely to make a hunter: 1, Charles Griffiths, Northwich; 2, W. Lea, Crewe.

Tarporley Hunt Steeplechase (cup): prizes for the best brood mare suitable for breeding hunters: 1, A. E. Hesketh, Wainford; 2, C. Griffiths, Northwich; 3, J. Millington, Middlewich.

Three-year-old mare or gelding, suitable for a hunter: 1, Evan Langley, Tarporley; 2, John Prescott, Middlewich.

Four-year-old mare or gelding, suitable for a hunter: 1, Richard Leech, Northwich; 2, Joseph Lewis, Oakmere.

Hunter, mare or gelding, up to not less than fourteen stone: 1 and 2, Alfred Ashton, Holmes Chapel.

Hunter, mare, or gelding, under fourteen stone: 1, Sylvanus Reynolds, Northwich; 2, H. Reginald Cooke, Nantwich; 3, Richard Leech, Northwich.

Gelding or filly, over one year and under two years, for field purposes: 1, John Prescott, Middlewich; 2, R. Prescott, Northwich.

Gelding or filly, two years old, for field purposes: 1, O. and F. Hesketh, Winsford; 2, Isaac Fairish, Northwich.

Mare for road purposes, with foal at foot: 1, John Beckett, Rode Heath; 2, John Richardson, Sandbach.

Roadster, mare, or gelding (confined to tenant farmers only): 1, John Beckett, Rode Heath; 2, Richard Hull, Nantwich.

Roadster, mare, or gelding: 1 and 2, G. Pimlott, Altrincham; 3, Robert Lee, Knutsford.

Best pony, not exceeding 13½ hands, mare or gelding: 1, C. E. Luxmoore, Middlewich; 2, John Beckett, Rode Heath.

Best cob, over 13½ hands, but not exceeding 14½ hands: 1, John Nelson, Hartford; 2, Thomas Walley, Nantwich.

SHEEP.

Long-woolled ram: 1, J. E. Ward, Middlewich; 2, O. R. Ward, Great Warford.

Three long-woolled ewes: 1, O. R. Ward; 2, J. E. Ward.

Three long-woolled ewe lambs: 1, J. E. Ward; 2, J. H. Richardson, Crewe.

Long-woolled ram lamb: 1, J. E. Ward; 2, O. R. Ward.

Three short-woolled ewes: 1, Joseph Millington, Middlewich; 2, J. W. Kenworthy, Kelsall.

Three-short-woolled ewe lambs: 1, J. W. Kenworthy.

Short-woolled ram: 1, J. W. Kenworthy.

Short-woolled ram lamb: 1, J. W. Kenworthy; 2, Thomas G. Parton, Nantwich.

Guildford.

Last year the Guildford Summer Show took place under most unfavourable climatic conditions, a thunderstorm breaking over the showground about noon. On the 5th inst., however, the weather was all that could be desired, being of the most brilliant description, and this year's show was a big success. By the kindness of Mr. W. E. Horne, who is the president for the year, Stoke Park was again the site, than which one more admirably adapted for the purpose it would be difficult to find. Hackneys and sheep were, numerically, the weakest features of an otherwise well-filled catalogue, which contained upwards of 470 entries, being in excess of the total twelve months ago; while the prize money offered amounted to over £550. The exhibition fully maintained its reputation for excellence of quality, and many of the exhibits were of exceptional merit. A steady improvement was noticeable in the cattle classes; but as regards sheep, the three classes allotted to that department only secured the patronage of three exhibitors and nine pens altogether. Classes for pigs had been arranged and entries received, but owing to swine fever restrictions no animals could be shown. The cart horses were again a grand lot. As usual, the riding, driving, and jumping competitions provided the chief attraction of the afternoon, the grand stand, running nearly the entire depth of that portion of the park, was crowded, and there was a capital ring of spectators all round; in fact, the attendance of visitors at the show was a record one.

Prize List.

CATTLE.

Bull of any pure breed but Channel Islands, calved in 1898: 1 and 2, Earl of Derby, Witley; r, Mr. J. Godman, Park Hatch, Godalming; c, Mr. C. Hawkins, Mellersh's Farm, Compton, and Mr. D. E. Higham, Coombelands, Addlestone.

Shorthorn bull, calved in 1899: 1, Mr. W. E. Horne, Hall Place, Shackleford, Godalming; 2, Reading Sanitary Authority; r, Mr. John Jay, Land End, Shere; c, Mr. Walpole Green well, Marden Park, Woldingham.

Bull calf of any pure breed but Channel Islands, calved in 1900: 1, Earl of Winterton, Shillingle Park, Petworth; 2, Mr. J. Godman; r, Earl of Derby; c, Mr. J. Godman.

Channel Islands' bull: 1, Miss Emily Moore, Leatherhead; 2, Mr. E. D. Stern, Fan Court, Chertsey; r and hc, Mrs. C. M. Perkins, Oak Dene, Holmwood.

Jersey bull, under two years of age, bred in England by the exhibitor, and eligible for entry in the English Jersey Herd book: 1, The Duke of Northumberland; r, Mrs. C. M. Perkins.

Best bull entered in either of the foregoing classes by a tenant farmer: 1, Mr. C. Hawkins; 2, Mr. T. Jones, Quarry Farm, Godstone; r, Mr. A. Holm, Lawrence Farm, Buckland, Betchworth.

Cow for breeding purposes, to calve before March 31st, or with her own calf at foot, not exceeding six months: 1, The Earl of Derby; 2, Mr. Owen Older, West Molesey; r, Mr. W. E. Horne.

General purpose cow with her own calf at foot, not exceeding four months, to be judged in the following points: 20 for good temper, 25 for milk, 25 for beef, 25 for healthy offspring: 1, Mr. Owen Older; r, Reading Sanitary Authority.

Channel Islands cow or heifer in milk or to calve before March 31st: 1, Mr. J. R. Corbett, More Place, Betchworth; 2 and r, Mrs. C. M. Perkins.

Jersey heifer in milk, under two years old: 1, Her Grace Lily, Duchess of Marlborough, The Duchess, Dorking; 2, Mrs. C. M. Perkins; r and hc, Miss Emily Moore.

Channel Islands heifer, over one year and under two years, bred by exhibitor: 1, Miss Emily Moore; 2, Mrs. C. M. Perkins; r and hc, Miss Emily Moore.

Heifer of any breed but Channel Islands, and exceeding three years, to calve before March 31st, or with her own calf at foot, not exceeding six months: 1, Mr. J. Innes, Morden Hall, Morden; 2, Mr. W. E. Horne; r, Lieut.-Col. Cunnesmaker, Westwood, Normandy.

Pair of heifers, of any pure breed but Channel Islands, calved in 1899: 1, Earl Winterton; 2, Mr. J. Innes; r and hc, Col. A. F. Walter, Bearwood, Wokingham; c, Lieut.-Col. Cunnesmaker.

Heifer of any breed but Channel Islands, calved in 1900: 1, Mr. J. [illegible]; 2, Mr. H. E. [illegible]; r, Mr. [illegible]; hc, Mr. [illegible]; c, Mr. [illegible].

Pair of heifers, of any pure breed but Channel Islands, calved in 1900: 1, Mr. [illegible]; 2, Mr. [illegible]; r, Mr. [illegible]; hc, Mr. [illegible]; c, Mr. [illegible].

Cow, of any pure breed but Channel Islands, in milk or in-calf: 1, Mr. [illegible]; 2, Mr. [illegible]; r, Mr. [illegible]; hc, Mr. [illegible]; c, Mr. [illegible].

Cow, of any pure breed but Channel Islands, in milk or in-calf, the property of a tenant farmer: 1, Mr. Owen Older; 2, Mrs. Smallridge; r, Mr. [illegible]; hc, Mr. [illegible]; c, Mr. [illegible].

[illegible]

[illegible]

[illegible]

[illegible]

[illegible]

CART HORSES.

Mare and foal: 1, Mr. Walpole Greenwell; 2, Mr. R. W. Hudson; r, Mr. [illegible]; hc, Mr. [illegible]; c, Mr. [illegible].

Mare or gelding, [illegible] years: 1, Mr. [illegible]; 2, Mr. A. Holm; 3, Mr. R. Barrow, Elm Grove, Brockham Betchworth; r, Mr. L. Deadman, Brockhampton Farm, Hascombe; hc, Mr. [illegible]; c, Mr. [illegible].

Mare or gelding [illegible]: 1, Mr. T. Jones; 2, Mr. A. Holm; r, Mr. R. Barrow; hc, Mr. [illegible]; c, Mr. [illegible].

Horse or gelding [illegible]: 1, Mr. W. [illegible]; r, Mr. W. Fleming, Orange Farm, Great [illegible].

Mare exhibited in the previous class [illegible]: 1, Mr. W. Fleming; 2, Mr. T. [illegible]; r, Mr. W. Neal, Gatehouse Farm, Great [illegible].

Gelding over three and under four years: 1, Mr. A. Holm; 2, Mr. H. Fortescue Young, Perryafield, Oxted; 3, Hon. Col. Lely, Duchess of Marlborough.

Gelding over three and under four years, exhibited in the previous class by a tenant farmer: 1, Mr. A. Holm; 2, Mr. H. Fortescue Young; 3, Mr. W. Shorter, The Lees, [illegible]; r, Mr. T. Allan.

Gelding under three years old: 1, Mr. Louis Deadman; 2, Mr. R. Hunt, Westbury Manor, Petersfield; 3, Mr. N. H. Sand; r, Lord Calthorpe, Easenhall Park, Warwick.

Filly under three years: 1, Lord Calthorpe; 2, Mr. R. W. Hudson; 3, Mr. R. Barrow; r, Mr. A. Holm.

Gelding or filly under three years, the property of a tenant farmer, exhibited in the [illegible] class: 1, Mr. R. Barrow; 2, Mr. N. Hosking; r, Mr. A. Holm.

Gelding or filly [illegible] years: 1, Mr. W. [illegible]; 2, Mr. R. W. Hudson; 3, Mr. A. Holm; r, Mr. H. F. [illegible] Young.

Gelding or filly [illegible] years, the property of a tenant farmer, exhibited in previous class: 1, Mr. A. Holm; 2, Mr. H. Fortescue Young; r, Mr. H. H. White, Shackleford, Godalming.

Yearling Shire filly, the property of a tenant farmer, bred by the exhibitor: 1, Mr. H. Fortescue Young.

Yearling colt, by a Shire stallion, entered [illegible] entry in the Shire Horse Stud Book [illegible] and all hereditary nasal [illegible]: 1, Mr. R. W. Hudson; [illegible] Walpole Greenwell; 3, Mr. Louis Deadman; [illegible] Mr. E. [illegible].

Colt foaled in 1900: 1, Mr. Walpole Greenwell; 2, Mr. Louis Deadman; 3, Mr. R. W. Hudson; [illegible] Mr. N. H. [illegible].

Filly foaled in 1900: 1, Mr. R. [illegible]; 2, Mr. N. H. [illegible]; Mr. R. Barrow; r, Col. A. F. Walter.

The Shire Horse Society's [illegible] mare, filly or filly foal, in the stud [illegible] registration in their stud book [illegible] Jones.

Horse harnessed in a van, waggon, or other heavy vehicle: 1, Mr. T. Bett, Down Place, Guildford; 2, Mr. A. Holm; r, Mr. D. E. Higham.

Best exhibits in the foregoing class by a tenant farmer: 1, Mr. A. Holm; 2 and r, Mr. J. M. Kelly.

HUNTERS.

Weight-carrying hunter [illegible] any age up to 14 stone [illegible] saddle: 1, Mr. T. Radmore, Cuddington Farm, Cheam; 2, Mr. W. Bellamy, The Tilt, Cobham; 3, Mrs. M. M. Litkie, Spokane, Manor Road, Aldershot; [illegible] Mr. G. St. [illegible] Horsley.

Gelding or mare, under four years, likely to make a weight-carrying hunter: 1, Mr. F. J. Mirrielees, Pasture Wood, Dorking; 2, Mr. J. A. Mullens, Barrow Hills, Chertsey.

Light-weight hunter [illegible] any age, [illegible]: 1, Mr. A. H. Rawle, Highfield, Sutton; 2, Mr. J. A. Mullins; 3, Mr. H. S. Ellis, Summersbury, Shalford; r, Mrs. A. H. Shotter, the Manor Farm, Witley.

Gelding or mare [illegible] years, [illegible] best hunter: 1, Mr. J. A. Mullins; r, Miss A. C. Perkins.

Hunter brood mare and foal: 1, Mr. R. W. McKergon, The Grange, Twineham; 2, Miss A. C. Perkins; 3, Mr. T. Graham Cooper; r, Mrs. Sherwood Browne, Weybourne House, Farnham.

HACKNEYS.

Stallion of any age: 1, Mr. T. Rolmore; 2, Mr. E. J. Vaughan, Mabledge Stud, Cranham; 3, Mr. [illegible] man, Fordham Grange, [illegible].

Filly or gelding foaled in 1898: 1, Mr. E. J. Vaughan; 2, Mr. W. Lloyd, Heaslands, Haywards Heath; 3, Mr. V. T. Tayler, Ashcroft, Dormans Land, East [illegible] of Derby.

Brood mare [illegible] years [illegible] a foal in 1900): 1, Mr. J. Wallis, The Banks, Beddington; 2, Mr. C. E. W. Brinckman; 3, Mr. W. Lloyd; r, The Earl of Derby.

Hackney foal, [illegible]: 1, Mr. W. Lloyd; 2, Mr. W. Butler, Tolworth Lodge, Surbiton; r, Mr. J. Wallis.

HORSES IN HARNESS.

Best [illegible] mare [illegible]: 1, Mr. A. W. Woods, 1, Park Terrace, Worcester Park; 3, Mr. J. [illegible]; r, Mr. [illegible]; hc, Mr. [illegible]; c, Mr. [illegible].

Gelding [illegible]: 1, Mr. [illegible]; 2, Miss E. K. Cunliffe, Tyrrell's Wood, Leatherhead; 3, Mrs. E. [illegible], Clapham; r, Mr. E. H. Goad, Mead House, Redhill.

Gelding or mare, under 14.3, shown in single harness: 1, Mr. A. N. Smith, Dormansland; 2, Mr. [illegible]; 3, Mr. J. J. Taylor, Angel Hotel, Godalming; r, Mr. J. C. Bevis, 3, St. [illegible]; hc, Mr. [illegible]; c, Mr. [illegible].

Whittaker Wright; r, Mr. E. H. Goad.

Pair of horses of any height: 1, Miss F. K. Cunliffe; 2, Mrs. F. Bevis; 3, Mr. [illegible]; hc, Mr. [illegible]; c, Mr. [illegible].

1 and 2, Mr. J. J. Taylor; 3, Mr. F. Allen.

[illegible] ing 15 hands, shown in saddle: 1, Mr. A. N. Smith; 2, Mr. J. [illegible]; r, Mr. [illegible]; hc, Mr. [illegible]; c, Mr. [illegible].

[illegible]; r, Miss A. Cunliffe, Tyrrell's Wood, Leatherhead; hc, Mr. [illegible]; c, Mr. [illegible].

Perkins; 2, Mr. E. H. Goad; 3, Miss A. C. Perkins.

JUMPING COMPETITIONS.

Gelding or mare, over 15 hands: 1, Mr. J. Colman, Epsom; equal seconds, Mr. A. N. Smith, and Mr. E. L. Clarke, Southsea. The second and third prizes were divided between the two last-named).

Gelding or mare, not exceeding 15 hands: 1, Mr. A. N. Smith; 2, Mr. Alfred Curnich, Long Ditton House, Long Ditton; 3, Mrs. M. M. Litkie.

Gelding or mare being a bona-fide hunter, and which had been regularly hunted during the past season with any recognised pack: 1 and 2, Mr. A. N. Smith; 3, Mr. F. W. Henderson, Westerland, Petworth.

Bury Colt and Foal Show and Sale.

The annual show of Suffolk, Shire-bred, and other cart colts and foals, cart mares and geldings, and hunter foals and brood mares, at Bury St. Edmunds, was held on the Playfield, adjoining the Cattle Market. There was a very large attendance. The annual show is evidently increasing in popularity, and the exhibition on Wednesday was certainly the best of its kind ever held in Bury. Sir E. Walter Greene, Bart., is the President, and the Vice-Presidents include—His Excellency Earl Cadogan, K.G., Viscount Chelsea, M.P., Lord Iveagh, Mr. Malcolm, M.P., and Mr. H. W. Mortimer. The judges were Mr. E. A. Cook, of Dennington Lodge, and Mr. B. B. Johnson, of Ingham, whose awards are as follows:—

FOALS.

Suffolk colt or filly foal: 1, Mr. W. Biddell, Lavenham Hall; 2, Mr. C. S. Wolton, Ixworth; r, Mr. E. J. Johnstone, Rougham Hall; c, Mr. W. Biddell, and Mr. Turner.

Colt or filly foal, other than Suffolk: 1, Messrs. J. Gough and Sons; 2, Mr. H. Button, Thelnetham; r, Mr. J. Sturley, Nunn; c, Mr. J. P. Bauly.

YEARLINGS

Suffolk colt or filly, foaled in 1899: 1, Mr. E. J. Johnstone, Rougham Hall; 2, Mr. W. R. Hustler; r and c, Mr. R. Edgar.

Colt or filly, other than Suffolk, foaled in 1899: 1, Mr. J. S. Nunn; 2, Mr. F. H. Jennings, Cockfield Hall; r, Mr. H. Button, Thelnetham.

TWO-YEAR-OLDS

Spffolk gelding or filly, foaled in 1898: 1, Mr. E. J. Johnstone; 2, Mr. W. Biddell (Stately II.); r, Mr. R. Edgar; c, Mr. W. R. Hustler.

Suffolk gelding, other than Suffolk, foaled in 1898: 1, Mr. F. Baldwin, Great Barton; 2, Mr. F. H. Jennings; r, Mr. F Baldwin.

GELDINGS AND MARES.

Cart gelding or mare, of any pure or cross bred, three, four, or five years old: 1, Mr. J. Sturley Nunn, Little Whelnetham Hall; 2, Mr. F. Baldwin; r, Mrs H. Sturgeon, Rushbrooke.

SALE CLASS

Cart mare or gelding, of any pure or cross breed, and of any age, not to be drawn from any other class, the reserve on any animal not to exceed £50: 1, Mr. Cordy S. Wolton, Ixworth; 2, Mr. W. Cross, Ixworth; 3, Messrs. J. Gough and Sons, Wickhambrook.

BROOD MARES.

Mare, of any pure or cross breed, that has bred and reared a foal in 1899; not to be drawn from other classes: 1, Mr. J. Sturley Nunn; 2, Mr. H. Button; r, Mr. W. Biddell.

HUNTER FOALS.

Hunter colt or filly foal: 1, Mr. O. S. Jaques; 2, Mr. W. A. Lloyd; r, Mr. P. M. Browne.

HUNTER BROOD MARE.

Hunter brood mare: 1 and 2, Mr. P. M. Browne.

SPECIAL PRIZES.

A silver cup, or £5, for the best colt foal by the late Mr. H. L. M. Davies' Cleveland bay horse, King Frederick the Great, was won by the executors of Mr. Davies, theirs being the only colt foal.

The silver cup, of £5, for the best filly foal by King Frederick the Great, was won by Mr. O. S. Jaques, Risby. Another, Queen of Cavenham, dam Nellie Farren 571, shown by the late Mr. H. E. M. Davies' executors, was reserved.

The Sale.

Mr. W. H. Salter conducted the sale on behalf of Messrs. Simpson and Sons, and said he was pleased to see so large an assembly, and took that opportunity of congratulating the promoters of the show on its continued success. Many of the horses exhibited were not for sale. Amongst the foals brought under the hammer were:—Mr. Turner's Suffolk colt, which fetched 12gs.; Mr. Biddell's horse foal, 25gs.; Mr. Biddell's Suffolk filly foal, 20gs.; Mr. Bauly's bay filly, 18½gs.; Mr. Button's bay colt foal, 19gs.; Messrs. Gough's bay foal, 25gs.; Messrs. Gough's black filly, 16gs.; Mr. E. Terry's filly foal, 15gs. Yearlings included Mr. Edgar's entire Suffolk colt, Lord Crewe, which realised 32gs.; Mr. Edgar's entire Suffolk colt, Cockfield Hero, 41gs.; Mr. Button's Wayland Lass, 38gs. Two-year-olds included Messrs. Rolfe's brown colt, which made 35gs. Others included Mr. Browne's brown gelding, five years, which ran up to 57gs.; Mr. J. E. Alston's black mare, Violet, eight years, 26½gs.; Mr. P. M. Browne's brown gelding, six years old, made 48gs.; Mr. G. Le-Heup Cocksedge's Suffolk mare went up to 42gs.; Mr. Cross's brown gelding, three years, was withdrawn at 42gs.; his bay mare, three years old, made 53½gs.; Messrs. Gough's bay gelding, five years, fetched 51gs.; Mr. Cordy S. Wolton's Suffolk gelding, Duke, five years, fetched 54gs.; Mr. Button's bay mare, Wayland Princess, three years, reached up to 58gs.

The buyers included: Mr. Donne (agent to the Marquis of Bristol), Messrs. R. Edgar (Cockfield), Pratt (Melton), W. R. Hustler (Cockfield), Halls, Baker (Lavenham), Traylen, Unwin, Turner, T. W. Gaze, Carlton, and others. Several horses not entered for the show were also sold. They included: Mr. Cordy S. Wolton's Suffolk mare, Barmaid, which fetched 35gs.; also Mr. Cordy Wolton's Suffolk filly, Sunlight, which made 30gs.; Mr. Palmer's bay mare, 5yrs., 32gs.; Mr. C. E. Hammond's black mare, Depper, 5yrs., 35gs.; a bay gelding, 9yrs., 35gs.; Mr. A. Boldero's chestnut gelding, 6yrs., 32gs.; Mr. T. F. Taylor's bay mare, 5yrs., 45gs.; his bay gelding, rising 4yrs., 37gs. Hackneys included a brown mare, 4yrs., 16 h.h., sent by Mr. E. Jillings; this fetched 45gs.; Mr. Jacques' bay brood mare made 17gs.; Mr. Biddell's Suffolk filly, Moggy's Daughter, 2yrs., fetched 26½gs.; his Suffolk gelding, Sharper, 3yrs., made 23gs.; his yearlings from 17gs.

Rugby and Dunchurch.

The tenth annual exhibition of the Rugby and Dunchurch Agricultural Association took place on Wednesday, and proved one of the best yet held in the grounds of Rugby Lodge. Not only were the entries up to the average, but in every department the quality of the exhibits displayed a marked improvement compared with previous years. The total number of entries was 400, and increase of seventeen on the year. The aggregate included the entries in several subsidiary departments, in which the principal feature was a small but useful collection of farm produce. This has been a suitable season for roots, and a number of capital specimens grown by tenant farmers were on view. The greatest interest, of course, centred in the live stock, the entries numbering 334, an increase of five on the year. There were fifty-two entries of cattle, as compared with forty-eight, and seven pens of pigs, against six twelve months ago, and 236 horses, a falling off of nineteen. On the other hand, there was an exceptionally good entry of sheep, thirty-nine pens being catalogued, as against only twenty last year, and twenty entries of samples of produce was very satisfactory, the increase being three on the year. The weather during the day was beautifully fine, and there was a large attendance of visitors.

Cattle.

The display of cattle, sheep, and pigs was of a most gratifying description, the exhibits being the property of tenant farmers and small breeders. In the cattle classes an admirable lot of competitive beasts were entered, and as farmers' stock the bulls, cows, and calves reached a high standard. There were, too, a number of very fine fat beasts practically ripe for the butcher. In the class for fat steers under four years, Mr. A. Wotherspoon, Monks Kirby, was placed first with a Hereford of good quality, while the executors of the late Mr. J. C. Harrison, Parlton Fields, were second and third with a couple of three-year-old meaty steers. Mr. T. Beasley, Rugby, headed the class for steers under three years with a smart polled animal, the second and third prizes going to Mr. J. Swingler, Rugby, with a couple of Shorthorns. The executors of the late Mr. J. C. Harrison were first for fat maiden heifers, Mr. J. Elland, Woolscott, taking second prize, and the prizes for fat cows or heifers went to Mr. W. Barnett, Bilton Hall, and Messrs. Holm, Carlton, Curliew, and Tilton. The bulls made an excellent show. In the class for bulls above two years there was strong competition, and every exhibit was noticed by the judges. The winner was Staffordshire Duke, a four-year-old roan Shorthorn, the property of Mr. W. R. Dewhurst, Nuneaton. This bull has won several prizes this season, and he easily defeated Florizel, a three-year-old roan, the property of the executors of the late Mr. J. C. Harrison. The third award went to Messrs. Bewley, Old Milverton, with a roan Shorthorn. Mr. Dewhurst was again first in the class for bulls under two years with the roan Stanley, a promising youngster.

The executors of the late Mr. J. C. Harrison were second, and Messrs. J. Gowling and Sons, Radford, were third. The best cow was the red Lady Langford, the property of Mr. P. S. Danby, Offchurch; Mr. Dewhurst this time had to be content with second place with a roan Shorthorn, while a red and white also belonging to Mr. Danby received the third prize. All three were good milking cows. The executors of the late Mr, J. C. Harrison took the first prize for heifers in milk or in calf, beating Messrs. Holm, their representatives being of very fair quality. Some creditable youngsters were also shown, Mr. J. Oldacres, Cestersover, carrying off the prizes for pairs of yearling steers, and the executors of the late Mr. J. C. Harrison and Mr. Dewhurst the awards for pairs of yearling heifers.

Sheep.

The six classes of sheep were tolerably well filled, and there was plenty of keen competition. Some rather smart ewes and lambs, from the point of view of the tenant farmer, were entered, and the judges in several instances distributed cards of commendation. Mr. W. T. Rathbone, Hillmorton, showed the best pen of five Shropshire breeding ewes, the well fleshed animals carrying capital fleeces, and Mr. J. W. Crofts, Stretton-under Fosse, was placed second, also with a creditable pen. The pens of five ewes of any other breed looked well, the prizes going respectively to Mr. F. J. Sumner, Easthorpe Parke, and T. Riddell, Church Lawford, with strong, healthy sheep. The best class was for pens of five short-wool breeding theaves, Mr. Sumner being placed first with five admirably-matched specimens, Mr. J. Livingstone, Long Lawford, running a good second with a useful pen. The short-wool ewe lambs were of splendid quality, the prizes going to Mr. F. J. Sumner and Mr. W. T. Rathbone. Mr. Sumner and Mr. J. Parnell were the most successful exhibitors of short-wool wether lambs, and the chief pens of cross-bred lambs were shown by Mr. T. Garner, Bitteswell, and Mr. T. Florendine, Thurlaston.

Pigs.

The seven pens of pigs were divided into two classes, one for pens of three breeding gelts and the other for sows or gelts of any breed. Several pens were of high-class quality, and there was some smart competition. A useful pen of Large White breeding gelts seven months old secured the first prize for Mr. T. Florendine, while Mr. J. Hicken, Bourton, was second with a pen of Middle Whites of the same age. Mr. G. Hawes, Onley Fields, Rugby, showed the best sow, a speciment of the Middle White breed, Mr. W. Barnett, Bilton Hall, being second with a fine representative of the Berkshire type.

Horses.

Of the 236 entries of horses 119 were in the heavy department. The first seven classes were exclusively confined to cart horses the property of tenant farmers. With very few exceptions, the whole of the exhibits were of the Shire breed, and it may be safely stated that a better display of tenant farmers' horses has rarely been seen at Rugby. In the class for filly foals, Mr. W. Lowick, Harlestone, Northamptonshire, came first with a granddaughter of Dunsmore Combination, five months old, which also won the champion cup in the tenant farmers' classes. Mr. J. P. Toone, Rugby, was a capital second with Primeval, nearly six years old, sired by Coleshill Carbon, and Mr. W. Tickle, Cotsford, was placed third with a three-months-old daughter of Calthorpe Loyalty. A healthy-looking lot of colt foals were on view, Mr. J. Oldacres, Cestersover, showing the best, a bay son of Rock Hydro, while Mr. J. Barnwell, Rugby, ranked next with the three months daughter of Dunsmore Masterman. Strength characterised the classes of fillies and geldings in point of number and also quality. Several interesting yearlings were paraded, the best being Danetree Peggy and Danetree Gaiety, the property of Mr. J. Bromwich, Daventry, which received the first and second prizes. Messrs. Gamble, Brannstone, Leicester, owned the leading two-year-old, a nice roan filly, sired by Eastern Harold, and the principal three-year-old was a chestnut gelding, the son of Calthorpe Disraeli. The mares and geldings, four years old and upwards, were a choice lot. Mr. J. Oldacres showing the first prize-taker, Waffra Bracelet, a well-built bay, while the second honour went to a useful-looking black, Whitefoot, belonging to Mr. E. Bostock, Kenilworth. The brood mares with foals were not numerous, but they were full of quality and sterling character. Mr. W. Tickle led the class with a four-year-old daughter of Dunsmore Masterman, Mr. J. P. Toone's Primula being second. The open classes were filled with an exceptionally fine collection of Shires, which would have done credit to any leading county show. In the colt foal class Mr. P. A. Muntz, M.P., Dunsmore, was first with a bay son of Dunsmore Masterman, four years old, which has won several prizes already during its brief career. Mr. J. Parnell, Rugby, came second with a bay son of Desford Vulcan Chief, occupying the same position to the winner as at the Leicester show. The fillies formed a stronger collection, and the class was conspicuous for the fact that it contained perhaps the best filly foal which has been seen out this season. It is a brown daughter of Dunsmore Combination, five months old, and the property of Mr. W. Lowick. The second honour went to another daughter of Dunsmore Combination belonging to Mr. P. A. Muntz, M.P., a three-months old bay. Mr. J. Parnell was first and second for yearling fillies with two splendid animals, and after a capital contest the same exhibitor beat Mr. P. A. Muntz in the yearling colt class, the exhibits being of surpassing excellence. Mr. P. A. Muntz turned the tables on Mr. Parnell in the two-year-old filly or gelding class, while the member for North Warwickshire swept the board of the prizes for mares three years old and upwards, and mares or geldings exceeding three years. In the latter class Bouquet, a seven-year-old mare which has won numerous prizes, also carried off the silver medal offered for the best mare, filly, or filly foal.

The classes for hunters were filled with useful animals, well bred and of high character. The best in the class for animals five years old and upwards was a chestnut gelding, Joyful, shown by Mr. J. H. Sedgley, Church Langton, while Mr. A. Fabbing, Grandborough, came next with the brown gelding Charley. Mr. J. Harrison, Pailton, led the four-year-old class with a handsome well-bred mare, Naomi, a grey gelding, Gray Morn, the property of Mr. W. P. Cowley, Braybrooke Lodge, being second. The two and three-year-old geldings or fillies were poorly represented, Mr. J. Hawkins, Lilbourne, taking the chief prize with a capital two-year-old chestnut gelding which promises to grow into a valuable lady's hunter. The yearlings were a somewhat indifferent lot, but there was a fair collection of nag foals. The class for mares was very strong. Mr. H. R. Roe, Cranoe, taking first prize with the chestnut Finale, a splendid mover which has won many prices of late years. Mr. G. Linnell, Sulby, was second with the grey Snowflake, an animal which possesses strong, healthy limbs and better action than the third winner, Madge, shown by Mr. J. H. Sedgley. The hacks and ponies were very attractive.

North-West Bucks.

The annual show in connection with the North-West Bucks Agricultural Association took place in beautiful weather on Tuesday, at Buckingham, in meadows kindly let by Mr. R. S. Budgett. The show was not quite up to the average as regards the number of entries, there being a great falling off in the classes for hunters, in which the entries numbered 96 against 167 last year. At the same time it should be borne in mind that in 1898 there were only 86 entries in these classes, and in 1897, 107. The decrease is said to be due principally to the war, and the absence of farmers and others at the front. There was also a falling off in the entries in the cart-horse classes, these numbering 61 against 94, the total being the lowest for years, as in 1898 there were 117 entries, and in 1897 85. There was a slight increase in the entries for cattle and sheep, the former numbering 43 against 41, and the latter 24 against 20. There were no pigs shown this year. The total entries were 227, against 330 last year, and 275 in 1898. The quality of the stock was good, but owing to the paucity of horses, the exhibition was to some extent shorn of one of its principal features. There was one new class this year, an open driving class, and it may be considered very successful, as eight entries were received. It was stated that one reason for the falling off in the entries for the nags and hunter classes was that a number of the entries for this show were by mistake despatched to Abingdon, and not received back in time for insertion in the catalogue. The President for the year was Mr. J. P. Heywood Lonsdale, the Master of the Bicester Foxhounds, who gave the show his personal patronage, and took the chair at the luncheon.

The jumping and driving competitions in the afternoon were witnessed by a large company, and, as usual, created considerable interest. They were, however, marred by two serious accidents, which, unfortunately, happened in the last of the jumping classes. One of the horses belonging to Mr. W. Lucas, of Tingewick, swerved at the double, and, catching the side hurdles, fell, and rolled over its rider (Arthur Gough, a groom), who was removed in an unconscious condition on a stretcher. The competition was then resumed and finished. As the winning horse, belonging to Mr. H. Deverell, of Bourton, was being taken round the ring after receiving the ribbons, it bolted, and attempted to leap the barrier. One of its feet struck a young man named George Soton, a cabinet maker, on the face, knocking him down. The horse fell over the barrier and rolled over Soton. Medical attendance was soon forthcoming, and the unfortunate man was carried to the tent. Later on he was removed in a very precarious condition to the Nursing Home. His nose was smashed and his face otherwise injured. We regret to have to add that Soton succumbed to his injuries about ten o'clock the same night, this sad result casting quite a gloom over the town, in which he was much respected. Gough is stated to be progressing favourably. The rider, Master Edgar Deverell, was uninjured.

Prize List.

CATTLE.

Shorthorn cow, in calf or in milk: 1, H. Landon; 2, Lord Penrhyn; r, A. Lepper.

Shorthorn heifer, in calf or in milk, under three years old: 1 and 2, Lord Penrhyn; r, A. Lepper

TENANT FARMERS' PRIZES

Shorthorn bull, above one and under three years old: 1, H. Landon; 2, W. Godfrey.

Shorthorn bull, under one year old: 1, H. Landon; 2, R. Mashiter; r, A. C. Rogers.

Shorthorn cows, in calf or in milk: 1 and 2, A. Lepper; 3, R. Dickins; r, J. Mashiter.

Dairy cow, in calf or in milk: 1 and 3, G. Markham; 2, J. F. Roper.

Pair of Shorthorn heifers, in calf or in milk, under three years old: 1, R. Mashiter; 2, A. C. Rogers.

Pair of Shorthorn heifers, under two years old: 1, H. Landon; 2, R. Mashiter; 3, A. C. Rogers.

Pair of Shorthorn heifer calves, not exceeding one year old: 1, R. Dickins; 2, H. Landon.

CART HORSES.

Cart mare with foal at foot: 1, J. F. Roper; 2, A. C. Rogers; 3 and r, A. Lepper.

Sucking cart colt: 1, A. Lepper; 2, F. W. Lester; r, W. J. Viccars; c, W. H. Hinton.

Sucking cart filly: 1, B. Welch; 2, A. C. Rogers; r, H. J. Tomes; c, J. P. Roper.

Cart gelding, five years old and upwards: 1, J. Harper; 2, R. M. Hiorns; r, T. P. Willis

Cart mare, five years old and upwards: 1, Exors. of W. Flowers; 2, J. Harper.

Cart gelding or mare, four years old: 1, B. Welch; 2, A. Lepper; r and c, R. Rowland.

Cart gelding or mare, three years old: 1, Exors. of W. Flowers; 2, R. Rowland; r, S. Clarke; c, A. Lepper

Cart gelding or filly, two years old: 1, Exors. of W. Flowers; 2, B. Welch; r, H. J. Tomes; r, A. Evered.

Yearling colt for agricultural purposes: 1, C. Lepper; 2, H. J. Tomes; r, A. Evered.

Yearling filly for agricultural purposes: 1 and r, R. Rowland; 2, Exors. of W. Flowers.

Shire Horse Society's silver medal for Shire mare filly, or filly foal, registered or eligible for registration in the Stud Book: Exors. of W. Flowers; d, B. Welch

HUNTERS

Mare, with foal at foot, best adapted for breeding hunters: 1, W. J. Viccars; 2, L. C. Maydon; r, W. R. Monk

Foal likely to make a hunter: 1, W. J. Viccars; 2, W. R. Monk; r, L. C. Maydon.

Mr. T. C. C. Morgan's prizes to the owners of the foals sired by one of the Stowe Stud: 1, J. Nichols; 2, J. F. Roper.

Yearling colt or filly likely to make a hunter: 1, S. Clarke; 2, C. Anstee; r, W. Manning.

Colt or filly, two years old, likely to make a hunter: 1, G. A. Elliott; 2, S. Clarke; r, W. Manning.

Colt or filly, three years old, likely to make a hunter (to be ridden): 1 and 2, W. Manning; r, J. W. King.

Sweepstake for colts or fillies (bred by exhibitor), sire a thoroughbred, one or two years old, likely to make hunters: 1, W. Manning.

Sweepstake for colts or fillies, three years old, likely to make hunters: 1, W. Manning; r, Hope Brooke

Hunting-like gelding or mare, four years old: 1, W. Flowers; 2, J. W. King; r, Hope Brooke.

Light-weight hunter, four years old: 1, C. Brooks; 2, S. Clarke.

Hunting-like gelding or mare: 1, B. F. J. Gates; 2, C. Brooks; r, C. M. Prior.

Hunting-like gelding or mare, fit to carry 14st. at least: 1, W. Manning; 2, C. M. Prior; r, J. W. King

RIDING AND HARNESS HORSES.

Riding pony, not exceeding 14.2 hands: 1, G. C. Pratt; 2, Lord Penrhyn; r, G. T. Drake.

Gelding or mare likely to make a chrirger, must be three years old or over, unbroached and mane not hogged: 1, Exors. of W. Flowers; 2, W. Manning; r, W. E. Lane.

Gelding or mare shown in single harness, not under 14 hands (price and action specially to be considered): 1, P. H. Buller; 2, H. Lever; 3, S. Tyzack.

Nag mare or gelding six years old or under, for general purposes, and quiet in harness: 1, W. Manning; 2, P. H. Buller; r, G. Warr

Gelding or mare shown in single harness, not under 14.2 hands, and not exceeding six years old: 1, P. H. Buller; 2, L. J. Chapman; r, W. Manning

Gelding or mare shown in single harness, under 14.2 hands, and not exceeding six years old: 1, A. E. Cavin; 2 and r, G. E. Reynolds.

Best jumper: 1, H. Deverell; 2, Hope Brooke; 3, J. T. Marshall

Open jumping class.—Gelding or mare, which shall jump the fences in the best form: 1, — Robins; 2, Messrs. Jerome; r, C. Brooks.

SHEEP.

Ram, of any age or breed: 1, J. T. Oxley; 2, R. Dickins.

Ten shearling ewes that have bred, suckled and brought up lambs this season: 1, Lord Penrhyn; 2, E. Slater, Harrison; r, R. Dickins.

Ten theaves: 1, J. T. Oxley; 2, R. Dickins; r, Lord Penrhyn.

Ten store ewe lambs: 1, R. Dickins; 2 and r, Lord Penrhyn.

Ten wether lambs: 1, G. Verey; r, R. Dickins.

Horncastle Foal Show.

The annual foal show at Horncastle took place on Thursday in most favourable weather, and was well attended. The entries totalled 102, which is the largest number received for many years past, but the quality was quite up to the average. Mr. C. B. Robswell, of Cawkwell, Mr. J. W. Ward, Withcall, and Mr. Joseph Oxley, Bole, Gainsborough, officiated as judges, and their awards were as follows.—

Cart colt foal: 1, B. G. Upton, Raithby, Louth; 2, J. B. Tomblin, Low Toynton.

Cart filly foal: 1, W. Rose, Haintor; 2, J. Rutter, Fulletby; 3, G. W. Leggate, Wildmore

Cart foal, colt, or filly (open): 1, E. H. Cartwright, Keddington.

Cart foal, colt, or filly (small holders' class): 1, G. W. Leggate; 2, F. Y. North, Scamlesby; 3, J. and G. Till, Scamlesby.

Cart mare, with foal at heels: 1, E. Turnor, Panton Hall; 2, G. Upton, Raithby.

Colt or filly foal, calculated to make a hunter by a thoroughbred horse: 1, J. T. Bower, Horncastle; 2, A. Short, Aswardby; 3, R. Fletcher, Hemingby.

Colt or filly foal, calculated to make roadsters: 1, W. Crowder and Sons, Horncastle; 2, J. W. Till, Martin Dales; 3, J. Gaunt, Wispington House.

Cart foal or filly, by any one of Mr. Fred Ward's horses: 1 and r, J. H. Tomblin; 2 and 3, J. Rutter.

Yearling cart colt: 1, Mr. Leedale, Woodhall; 2, Mrs. M. Mundy, South Ormsby.

Yearling cart filly: 1, H. Tyson, Donnington-on-Bain; 2, G. W. Clarke, Belchford.

Hunter mare, with foal at heels: A. Short.

For other Show reports see page 363.

MACKINDER'S LAMB FOOD

Used on the Royal Farms and by Large Flockmasters everywhere.

Mr. Jas. Bennett, Aure, Glos., writes:—"I have never had any Food of any sort or kind on which lambs did so well."

Mr. F. Jakeman (agent for C. T. Hoare, Esq.), Bicester, writes:—"I find it capital food both for lambs and cattle."

Hundreds of Testimonials, Samples, Pamphlets, etc., free through agents, or direct.

MACKINDER'S LAMB FOOD MILLS, LINCOLN.

SILCOCK'S CALF REARING.

CALF MEAL

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 *per cwt., carriage paid.* 5 *cwt. lots*, 12/-.

R. SILCOCK & SONS,
Poulton-le-Fylde, Lancs.

ASHWORTH'S Feeding Cakes.

ASHWORTH OIL CAKE.

"A very valuable Cake for fattening purposes."—Dr. T. WILLIAMS, F.C.S., M.S.C.I., etc.

THE ASHWORTH FEEDING CAKE.

"I consider this Cake to be of sterling quality for Dairy Cattle."—Dr. T. WILLIAMS, F.C.S., M.S.C.I., etc.

The Oil Cake is far cheaper than the best English Linseed Cakes, and will give as good results, using weight for weight, for fattening Cattle. Nothing surpasses the Ashworth Cake for producing such quality in Milk and Butter.

PURE ENGLISH DECORTICATED COTTON CAKE.

Best quality and value on the Market.

ASHWORTH'S LEGACY CALF FOOD. A perfect Cooked Food.

ASHWORTH'S RELIABLE CALF MEAL. Contains all the requirements to substitute milk. Thousands of Calves reared on this Meal annually.

Condiment, Pig Food, and all other kinds of Cakes and Feeding Stuffs.

Manufacturers of all kinds of Manures to any standard.

Write to ASHWORTH'S, Ltd., Oil Cake Mills, Bone and Manure Works, Frodsham Bridge, via Warrington, for samples, testimonials, etc.

AGRICULTURAL EDUCATION.

UNIVERSITY COLLEGE OF NORTH WALES, BANGOR.
A constituent College of the University of Wales
AGRICULTURAL DEPARTMENT. IN-COLLEGE COURSES. 1. A complete course in theoretical and practical Agriculture extending over two years, and suitable for farmers and land agents. 2. Advanced course for a third year in Agricultural Chemistry. 3. Short course of eleven weeks, commencing in October and consisting of Agriculture, Chemistry, Bookkeeping, and Land Surveying. The degree of B.Sc. in Agriculture of the University of Wales may be taken by students who pursue a three years' post matriculation course of study at the College. LLEDWIGAN FARM (360 acres) has been taken by the College for teaching and experimental purposes. Diploma (two years) and Degree (three years) students will in future follow courses for at least one year at the farm under the supervision of the Professor of Agriculture. Special arrangements will be made to take farm pupils for practical instruction only. The College is recognised by the Surveyors' Institution as a place of approved professional instruction for land agents. The cost of board and lodging, with tuition fees, varies from £30 to £40 for the College year. The Scholarship examination will commence on September 18.
Prospectus, with full particulars as to Scholarships and Diplomas, may be obtained from JOHN EDWARD LLOYD, M.A., Secretary and Registrar.
July 17th, 1900.

The INAUGURAL ADDRESS will be delivered on Wednesday, October 3rd, at 12.30 p.m., by Sir JOHN GILMOUR, Bart., of Montrave.
The Rt. Hon. SIR MITCHELL THOMSON, Bart., Lord Provost, in the chair.

THE YORKSHIRE COLLEGE, LEEDS, AND THE MANOR FARM, GARFORTH.

Complete Course of Agricultural Education. Lectures in College and at the Farm from October to March. Special provision for practical instruction. Fee, £10. Students are prepared for the N.D.A. Examination. There is also a special course for the B.Sc. Degree.—Prospectus from the REGISTRAR.

TENDER.

VESTRY OF ST. JOHN, HAMPSTEAD.

TENDERS FOR FORAGE.

The Vestry invite TENDERS for the supply of HORSE PROVENDER for one year from 29th September, 1900. Forms of Tender may be had and full particulars obtained on application to C. H. Lowe, M.I.C.E., Surveyor, at the Vestry Hall. Tenders to be delivered at my office by 4 p.m. on Thursday, 27th September.
No Tender will be received unless accompanied by £10 in cash or bank notes (not to be enclosed), as an evidence that the Tender is made *bona fide*; the amount to be returned if Tender not accepted, but to be retained in the other case until contract is duly signed. In the event of a Tender being withdrawn the deposit will be forfeited.
The expenses of preparing and stamping contract to be paid by the contractor.
The Vestry do not bind themselves to accept the lowest or any Tender.
By Order,
ARTHUR P. JOHNSON,
Vestry Clerk.
Vestry Hall, Hampstead.
12th September, 1900.

D. CLARKE'S Carbolized

WHEAT PROTECTOR.

WHEAT ☞ WHEAT

BEST AND CHEAPEST DRESSING FOR SEEDS

In use in England for OVER FIFTY YEARS, and is now being used extensively in the Colonies of Australia, New Zealand, and Central Africa.

A 9d. PACKET DRESSES 8 BUSHELS OF SEED.

This specific takes the place of Bluestone, and by its use the Seed is strongly carbolized and is protected both by the smell and taste from being eaten by birds and other pests. The seed also germinates quicker by its use.

Numerous Testimonials have been received, testifying that the "PROTECTOR

Prevents Smut in Wheat, Oats, and Barley.
Prevents Destruction of Seed by Birds or Worms.
Seed germinates a fortnight earlier.
Saves a quarter bushel of Seed per acre.

ORWELL WORKS, IPSWICH.

SILCOCK'S CALF MEAL

CALF REARING.

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12 6 per cwt., carriage paid 5 cwt. lots, 12/-.

BIBBY'S
"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

Exchange Chambers, Liverpool.

GARTONS
NEW BREEDS OF WHEATS & BARLEY

First Season of Introduction.

GARTON'S "RED KING" WHEAT,
Price 5 Guineas per Quarter of 504 lbs.

GARTON'S "WHITE PEARL" WHEAT,
Price 5 Guineas per Quarter of 504 lbs.

GARTON'S "ZERO" SIX-ROWED WINTER BARLEY.
Price 21s. per Bushel of 56 lbs.

Also Thousand Headed Kale, Trifolium, Italian Rye Grass, and all other kinds of seeds for Autumn sowing. Descriptive priced catalogue free on application.

WARRINGTON.

"CATCH CROP" SEEDS.

ALL OF BEST QUALITIES.
Descriptive priced list post free on application.

DICKSONS, SEED GROWERS, **CHESTER.**

Mark Lane Express Agricultural Journal.

The Only English Journal devoted exclusively to Agriculture.

MONDAY, SEPTEMBER 24, 1900.

Correspondents are requested to address all communications for the Editorial Department to THE EDITOR, "Mark Lane Express," 1, Essex Street, Strand, London, W.C.

Advertisements, Subscriptions, and business communications should be addressed to THE PUBLISHER, "MARK LANE EXPRESS," 1, Essex Street, Strand, London, W.C.

ARE RESTRICTIONS TOO WIDE?

Every now and then a wail is raised in some rural district on Government interferences with agricultural trading customs, and the prohibition of live stock removals from place to place, in exercising the administration of the powers confered by the Contagious Diseases (Animals) Act. Until recently these complaints were mostly raised against the too arbitrary enjoinments of the Swine Fever Orders. Not only has the craft of the pig-jobbers been continually placed in jeopardy by the squeals and gruntings of the swinish multitude being no longer heard to resound from market places in towns, but farmers were prevented from sending their pigs stubbling on to fields where acorns lay underneath trees, when a public road had to be crossed in driving them thither.

By far the greatest storm of public indignation against Disease Orders was that, however, raised in Norfolk last spring when, just as farmers were requiring to turn their cattle out to grass, the police barricaded the way. What occurred is tolerably well known. Farmers having starving cattle at their homesteads, and abundant grass at a little distance over the prescribed line, disobeyed the law, and got prosecuted. The magistrates sympathised with the law-breakers, and only inflicted nominal fines. Mr. Long, the President of the Board of Agriculture, sent them a sharp rebuke in consequence, and he was lectured in turn by Mr. Clare Sewell Read, on the ground that the Orders had been needlessly harassing and vexatious, and that the prescribed areas had been made tenfold wider than there was any occasion for.

Unfortunately there have been three more outbreaks at widely distant places since—one in the East Riding, a second in North Wales, and that of more recent occurrence at Melksham, Wiltshire. In all these cases the cattle attacked, and all beasts that had come in contact with them, were promptly slaughtered. But measures did not stop here, cordons being drawn round the centres extending many miles, out of which boundaries no cattle could be moved while the Orders remained in force. For example, in the most recent outbreak, although only a very few cattle had to be slaughtered, the area placed under the ban is very large indeed. No cattle, sheep, goats or swine can be moved out of the wide district of country comprising the petty sessional divisions of Melksham, Trowbridge, Westbury, Chippenham, Calne, Bradford, Devizes, Warminster and Whorwellsdown, and the boroughs of Chippenham, Calne, and Devizes, in Wilts, and the petty sessional divisions of Weston, Kilmersdon and Frome, and the City of Bath, in Somerset, so long as the Foot and Mouth Disease Order bearing date the 15th of September remains in force.

Concurrent with this order a circular was issued to all local authorities throughout England calling particular attention to the fact of three outbreaks coming so widely distant from one another in the short space of six weeks, leading to the probability that the disease had been harboured, but not reported for some time past. This leads the Board of Agriculture to fear that "unless the utmost vigilance is exercised by local authorities a grave danger of a wide-spread epidemic may arise." The circular concludes by urging local authorities to use every means of hunting out suspicious cases, and to give the earliest information of their occurrence to the proper officer for investigation.

This is, of course, all very right and proper, with the exception of the Board drawing the cordon of prohibition for live stock removal over a region comprising nearly the whole of North Wilts and a tolerably large slice of East Somerset. Whatever may have been the cause of these recent outbreaks, there can be no doubt but that it is pre-eminently desirable the foot-and-mouth epidemic should be stamped out, and that with this object all local authorities should second the efforts being made at headquarters by seeking to prevent any harbouring of suspicious cases, and being as much on the alert as possible in discovering them. But while giving this wholesome advice the Board has exercised its powers unwisely in making the so-called infected area needlessly large. If they had limited it to the immediate district of the markets the stock of the farm had been connected with it would surely have been all-sufficient.

Few outsiders understand how very serious are the inconveniences and losses to stock-owners when all traffic or removal of animals is prohibited except by special licence. The Wilts and Somerset territory under ban is full of dairy herds, and large numbers of pedigree stock are bred therein also. Several local shows are held in the autumn, the old-established Frome Show having been appointed to take place on Wednesday next, the 26th inst., which must in all probability be now denuded of its accustomed good cattle display. This deprivation is small indeed, however, compared to the inability of sellers of stock to find customers for them now that traffic and removal have been rendered so difficult. Many farmers have declared the Swine Fever Orders remedy to be far worse than the disease, and it is only natural that those having not the slightest apprehension of the scourge of foot-and-mouth visiting them, being in the midst of a district with a clean bill of health, should murmur at having to submit to arbitrary interferences with their business entailing grievous losses.

SAMPLES.

By a Man of Mark Lane.

I hear that all but one of the Greenock sugar refineries are closed. This is on account of the price of raw sugar and the high price of coal, which make it impossible for refining to be carried on with a profit, and until the new crop of beetroot sugar is in the market the works will remain closed.

An American firm of agricultural machine makers recently issued show-cards representing the Goddess of Liberty in society as driving a mowing machine drawn by Bengal tigers. They sent a large number of them to their Berlin agent, but, the *Pall Mall Gazette* says, advertising art had no charms for that gentleman, who sent the following amusing letter of protest to his employers:—"The picture of your admirable machines, of which I the receipt of 10,000 acknowledge, is not useful in this country, and it is of no benefit to me that I request to receive them postage. The women of our country, who by custom are to do agricultural work compelled, do not dress as your picture shows is the custom of your wonderful country, and would not deem such garments with modesty to consist. Also we do not tigers for draught purposes cultivate, they not being to the country native, nor is our experience for such work well suited. I have to my customers explained with earnestness that your picture is a sinnbild (allegory), and does not mean that your ad[illegible] should be painted by women for little children, nor is it necessary that the place of business shall be alongside from the Zoologischer Garten be taken. I cannot use them as you intend, and your further advices hopefully await."

In the last issue of the 1900 edition [illegible] of the Central Provinces issued by the Department of Land Records and Agriculture, Central Provinces, it is stated that sowings were successfully effected in most districts on a larger area than that of last year. In Chanda and Nagpur the increase is estimated at 75 and 50 per cent. respectively. Germination has been generally good, but some re-sowing has necessitated in parts of Narsingpur, Hoshangabad, Nimar, Chhindwara, Wardha and to a somewhat considerable extent in the Katol tahsil of the Nagpur District, where the early sowings failed owing to the deficiency of the rainfall. In the Warora tahsil of the Chanda district the plants have been injured by excessive rain and some re-sowings had to be done. The re-sowings have everywhere germinated well. In Nimar insects were causing some damage to the plants, but the recent rain has caused them to disappear. At the present time the prospects of the standing crops are excellent, and promise a full yield.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to September 15th, 1900, were £45,404,601 against £45,595,660 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £73,790,192 against £47,618,425 to the same date in the previous year. The Treasury balances on September 15th, 1900, amounted to £3,590,755, and at the same date in 1899 to £3,897,128.

Though there appears no great prospect of sugar beet growing and sugar manufacturing in Great Britain, the industry is making way in the United States of America. Of late its extension has been so rapid that it seems an important economic place among the factors of general prosperity. Perhaps the information that there are in operation in the United States beet-sugar factories having a daily capacity of 18,450 tons, that factories in process of erection will add daily 2,800 tons to the output, will come as a surprise to the reader who has not watched recent developments, yet this information is correct. To what proportion the increase will swell depends largely upon the success to be won at stations perhaps yet experimental; but at least, so far as California is concerned, the growth of beets and their conversion into a marketable commodity has passed the stage of trial and proved commercially both to farmers and manufacturers.

AGRICULTURAL POLITICS.

By a Lobbyist.

Now, there is one fact in connection with the General Election which it would be an egregious blunder to pass over; and that is that the Government has an indubitable right to appeal to the rural electors for sympathy. It has passed three measures of great importance to the rural interest. The first is, of course, the Rating Act; the second is the Bill amending the Agricultural Holdings Act Amendment Act; and the third is the extension of the Workmen's Compensation Act to labourers. True, it has failed to pension its peoples to entrance old age pensions for the workers; but still these three measures constitute such a claim as no Government for many years has possessed.

I am indifferent [illegible] shout khaki and some anti-khaki. I am indifferent [illegible] the fact that the war has been [illegible] and that the country [illegible] but it is a crime. Selfishness is the chief inspiration of the political man nowadays; and all I remember is that the Government [illegible] disarm it and [illegible] the three measures [illegible] the Unionists [illegible] and the Liberals. Yet I am not going to dispute the fact that the Tories are [illegible] the advantage of the Liberal

any more than I will seek to deny that the amendment of the Agricultural Holdings Act must operate to the sole advantage of the farmer.

However, if the rural electors be wise they will discriminate. I pay this general tribute to the Government, but I again aver that if the electors be wise they will insist on the return to the House of Commons of such friends of the farmers as the Liberal Mr. George Lambert, the Liberal Mr. Strachey, and the Liberal Mr. Fletcher Moulton (who, however, I now remember, is not opposed). They will devote all the ardour they possess to securing the election of men of the type of Mr. Adeane, who is seeking election as a Liberal for South Hunts, and who has placed agriculture under a grave obligation by a series of well-meant investigations and scientific inquiries; and of the type of Colonel William Woods, the Hampshire squire, who is seeking election for Wigan, and who has the courage—and it is courage in these days of khaki enthusiasm and imperialistic ecstacy—to give rural questions a distinct place in his campaigning manifestoes.

When agriculture becomes less the slave of party than it has been, when it shows that it is harnessed to the car of no particular set of politicians, then—this is a paradox which will commend itself to all who know aught of St. Stephens—it will have the support of parties. Party politicians are so constituted that they only seek the suport of those who flout them.

One other paradox of the situation is that Mr. Walter Long should be compelled to seek political refuge in a thriving, humming hub of life like Bristol. Essentially a country squire, redolent of rural life, having faiths which bespeak the park and the farm in every phrase, Mr. Long has been compelled to ask the urban elector to elect him. Ejected from Liverpool because he had the manly courage to refuse to become the agent of mere schismatics, he has had to seek another seafaring centre. His friends are in fact not those who plough the lea, but those who plough the ocean.

Of course, it would have been in the perfect fitness of things had he stood for one of the Wiltshire seats. Four families inevitably suggest themselves as providing desirable sources of Wiltshire Members of Parliament. Three are the Sotheron-Estcourts, the Bouveries, the Herberts, and the Longs. Not one, singularly enough, will be in the electoral lists of the county at this election. I apologise when I say "not one." After all a Chaloner is only a Long; and Colonel Chaloner—a Long born and a Chaloner only by preference—shares all the sympathies and many of the abilities of his brother.

It says something for the catholicity of our urban centres of life that they are willing to accept a rural politician rather than one who devotes himself to the more sensational problems which have been born of the social conditions of the towns. I, however, attribute this rather to the fascination of Mr. Long's character than to any sympathy with his ideals.

Will the coming election concern even in the slightest degree the rural situation? Not one scrap, beyond that, in the sane moments of khaki enthusiasm, it may be asked as to how far the rural districts will remain the chief recruiting centres of the kingdom. Not a single politician of first-class importance, beyond Mr. Chaplin, has ever thought agriculture of sufficient importance to give it a single line in his address.

It is the old historic industry of the country. It represents to-day the yeomen who made English fame—the men of the cloth-shaft and the yew-bow. Its future is fraught with grave and portentous possibilities for the country. It is itself in a state of practical and economic evolution; but it is disregarded, neglected, passed by.

Even Mr. Chaplin's reference to it is simply retrospective and platitudinarian, and has no more value in a suggestive sense than any of the addresses of the political ne'er-do-wells and nondescripts who seem to me to compose the majority of the new recruits to the electioneering ranks. Khaki and South Africa are undeniably the more lurid themes of the hour. They are the themes which induce men to fling themselves into mock-heroics and perfervour. Still, I should have thought that a word might have been given to agriculture.

I remember that the editor of the MARK LANE EXPRESS, in the fulness of his optimism and faith, expressed the hope a few weeks back that this election would witness the inception of an attempt to organise an agricultural party. There is no more prospect of this attempt being realised than of the clouds raining little apples or yellow potatoes. "In a moral point of view," once said Lord John Russell, "the life of the agriculturist is the most pure and holy of any class of men; pure, because it is the most healthful, and that vice can hardly find time to contain it, and holy because it brings the Deity before his view."

Yes, and in a political point of view the life of the agriculturist is the most perfect example of trust and faith again and again abused and again and again proffered that the Parliamentary records can produce. The MARK LANE EXPRESS should have been heeded over this question, but its advice was only sympathised with, only commended, and then passed by as being too Utopian. Why?

Even while this election is in progress, even while the combatants are sharpening their oratorical sabres on the whetstone of personal vanity, we have had the question as to the causes of the denudation of the villages treated in a more or less luminous fashion in the columns of the lay Press. We have had the arch-priest of anti-denudation, Mr. Rider Haggard, preaching in periods whose beauty of phrase has fascinated. We have had a score of less interesting personages taking up the same theme and poorly illumining it. We have had one or two daily newspaper editors devoting to it a few of the sonorous sentences which they keep on their shelves to be applied to any subject from the debatable Dan to the debatable Beersheba.

We have had all this; but we have not had a candidate who has thought it worth while to give it an hour's real earnest thought. There is no need to argue the cause of this; it is apparent. The weal of agriculture is not a fashionable fad. It has nothing exciting, pulsating, emotional in it. It only concerns every county in England. If its condition concerned one big town the heavens would reverberate with magniloquent appeals.

Mr. Rider Haggard! No man has of late given a more intelligent attention to agriculture; no man has brought to it a clearer perception; no man has shown himself more sanely wise in his suggestions. Might he not become a future leader of a future agricultural party, *vice* Mr. Jeffreys, politically indisposed? Yet even he—the author of the one spasm of interest which has been exhibited in agriculture in modern days—is out of the electoral list. This is the fate of agricultural reform. Every man who would do it good seems to be afflicted with infirmity of purpose.

As a postscript I should mention that I have neglected to say that one of the old guard of agricultural reformers—Mr. Felix Cobbold—is in the lists for the Woodbridge division of East Anglia. If I mistake not, he was a great personal friend of Howard of Bedford and of Farmers' Alliance fame. He deserves to go back to the House. But why is his friend Mr. Everett out of the list of Radical candidates? He prates wisely on his old theme; but in refusing a Liberal candidature he shows that the oil of energy courses sluggishly through his veins.

The election will be—thus I sum up—of no serious moment to agriculture. But I will return to this point.

Fatal Quarrel amongst Harvestmen.—An army pensioner named Rodgers, aged forty-three, who had just finished his harvest, met other harvestmen in the village of Chrishall, Cambridge, on Saturday, the 15th, and the party decided to go to the village beerhouse to spend an hour or two together. They called for beer, and songs were sung, accompanied on an accordion. An altercation arose, caused, it is said, by some offensive remarks on the harvest work of some of those present. From words they got to blows, and Rodgers was seen to fall and die almost immediately

PRACTICE WITH SCIENCE.

An Agricultural School for Hampshire.

The Hampshire County Council have just established a farm and horticultural school at Old Basing for male and female students, who will be received at different periods of the year. The farm comprises sixty-one acres, and the buildings include a large detached house to accommodate about sixteen students, with farmhouse, dairy, and other necessary outbuildings. The instruction will be kept as far as possible on practical lines, with sufficient science to secure a proper understanding of the practical operations. Among the subjects taught will be the general work of a farm, butter and cheese making, poultry and bee keeping, etc. For the female students there will be special instruction in cookery, needlework, laundry work, and domestic economy, while both sexes will receive instruction in elementary agricultural chemistry, botany, injurious insects, farm book-keeping, land measuring, and drawing. Mr. William Nixon is manager and head teacher, and the chairman and secretary of the Royal Counties Agricultural Society are on the committee.

Grants for Agricultural Education and Research, 1899-1900.

The annual report made by Major Craigie on grants for agricultural education and research to the Secretary of the Board of Agriculture is as follow:—

I have now to submit my report on the distribution of grants for agricultural education and experimental research during the year ended March 31st, 1900.

The individual awards to each of the institutions receiving assistance from the Board are set out in the usual form in the table on page 10, the total amount distributed amounting to £7,750 compared with an expenditure of £7,350 in the year 1898-99. As in former years, the sums above mentioned do not include the expenses incurred by the Board in the necessary inspection of the educational and experimental work of the several institutions aided, or of inspection of the similar work of certain county councils conducted at the request of these local authorities. The totals are also exclusive of the outlay on special investigations now being conducted by certain of the local centres on behalf of the Board of Agriculture.

The larger portion of the funds distributed in grants by the Board consists, as formerly, of subventions of a general character, awarded to collegiate centres of agricultural education in England and Wales. These centres, eight in number, have all been established during the past ten years to make local provision for the higher forms of agricultural instruction, and they are now working in connection with thirty-seven separate administrative counties, which have more or less closely associated their educational machinery with the colleges receiving grants from the Board. This arrangement continues to provide, in addition to the primary functions of the colleges in direct education, an efficient and economical means of systematising the various local schemes of technical instruction in agriculture, which the considerable sums placed by Parliament at the discretion of the local authorities have enabled county councils to set on foot. The collegiate staffs are in a position to aid the counties with scientific advice and the assistance of qualified lecturers, and they are able to provide effective supervision for the local demonstration plots and agricultural experiments, which are, as the details appended to this report will indicate, being maintained throughout the country, with considerable and increasing advantage to those already engaged in the practical business of farming.

In several instances it will be observed that the aided centres are entrusted with the supervision of complete farms, either hired directly by the college authorities, as at Bangor or Wye, or acquired by local authorities for educational and experimental purposes, as in the case of the farm provided by the Northumbrian County Council in connection with the centre at Newcastle, and that more recently established by the East and est Ridings of Yorkshire, in connection with the college at Leeds.

Subsidiary grants have also been continued by the Board for another year to exceptional institutions supplying facilities for dairy instruction other than those available in the ordinary machinery of the aided colleges. The British Dairy Institute at Reading, the Eastern Counties Dairy Institute at Ipswich, and the Midland Dairy Institute, near Derby, are included in this group; and the work from each of these special schools is understood to have benefited the dairy industry of the surrounding districts, and numerous pupils have been in attendance throughout the courses with the aid of scholarships from various county councils.

In a third category may be placed the sums awarded in the form of grants in aid of the cost of certain specific experiments undertaken under arrangement with the Board in districts not served, in this respect, by collegiate centres in receipt of general subventions. In the year under review, certain field experiments and a special investigation into the conditions of cider-making, conducted by the Bath and West and Southern

Counties Society, have been again aided; and the continued operations of the Agricultural Research Association of Aberdeen, supported by the North-Eastern counties of Scotland, have also received further acknowledgment by the Board.

Reports, as in previous years, setting out the conditions and the character of the instruction provided at each of the educational centres aided by the Board, with the staff available for teaching purposes, the attendance of pupils, and the special features, if any, of the past year's work, are set out in detail in the appendix, the counties associating their work with the agricultural departments of each of the several colleges being also shown.

At the examinations conducted under the joint auspices of the Royal Agricultural Society of England and the Highland and Agricultural Society of Scotland, for the recently established "national diploma," six out of the seven diplomas awarded were, it may be noted, won by students from the colleges receiving subventions from the Board.

Increased grants were awarded by the Board during the past year to the Yorkshire College at Leeds, where the educational and experimental work has been reorganised on a satisfactory footing, and to the South-Eastern Agricultural College at Wye, where the development of instructional facilities has been marked. New arrangements, explained in last year's report, have enabled the University of Cambridge to establish an Agricultural Department placed under the supervision of a special Board of Agricultural Studies representing the various scientific departments of the University and the ten county councils in the East of England which have seen their way to support the centre by direct financial aid. The responsibilities, hitherto discharged by the Agricultural Education Committee for this district, were accordingly taken over by the University Department on the 1st October last. In recognition of the material advantages likely to accrue to the scientific aspects of agriculture by this development of the Cambridge centre, and in view of the facilities which it offers for placing within the reach of undergraduates while at the university instruction likely to be of permanent value to those connected in any way with the ownership and management of land, considerably increased assistance has been awarded by the Board in the past year to the funds of the scheme.

Attention may be directed to the valuable opportunities given by the new arrangements at this university, and now, in a greater or less degree, by all the several institutions receiving assistance from the Board, for affording counsel to farmers on practical questions arising locally on which scientific advice is sought, and especially in the early detection or prevention of plant diseases and insect attacks. The equipment of the aided colleges now qualifies them to be of the most material benefit, in the direction indicated, to the agriculturists or horticulturists of the counties associated with each centre. The securing of these multiplied facilities for furnishing reliable advice on local emergencies is to be regarded as one of the advantages the Board have had in view by the expenditure of public money which they have authorised on these institutions during the decade which is now closing.

In addition to the descriptions given of the immediate educational work of each centre, I have appended to this report, as on previous occasions, a variety of notices of the experiments now being conducted with the aid of the Board's grants. Although it is impossible to do more in this report than provide selected summaries of some of the more typical enquiries, efforts are now, it is understood, made by the authorities of the experimenting institutions, both to arrange for local visits by farmers to interesting stations and field plots, and to diffuse by detailed reports, the widest possible knowledge of what is being done. The Board are now making arrangements to assist a movement, initiated by the representatives of the colleges, to compile a general index of the matters which have been made the subject of agricultural experiments, by both local and central bodies, in the course of the past ten years.

The rotation experiment conducted jointly by several institutions is again reported on in the summary given in the accompanying pages. This experiment has now been in progress since 1897 at the three original stations in Northumberland, Cambridgeshire, and Yorkshire; a similar experiment has been subsequently started in its entirety at centres in Yorkshire, Norfolk, Hertfordshire, and Suffolk, and partially at other stations in the counties of Kent, Cambridge, and Nottingham. Besides this uniform inquiry, which it is hoped may, when complete, furnish useful conclusions, arrangements are being made for the continuation on a comprehensive scale and on the same lines as in Northumberland, of the special experiment which has been fully described on former occasions on the effect of manures on grass land as shown in the relative production of mutton in sheep grazed on experimental plots of considerable area. Preparations are being made to repeat this investigation under the agricultural conditions obtaining on sheep lands in the South of England, where the Bath and West and Southern Counties' Society has secured a sufficient area for the purpose, and in the Midland counties under the supervision of the new department of agriculture at Cambridge.

The summaries now appended afford many illustrations of the more ordinary work of the botanical and feeding experiments, and give a general idea of the scope of the investigations which are proceeding, under qualified scientific supervision and with the aid of the Board's grant, in the various counties of England and Wales.

LIST OF GRANTS AWARDED 1899-1900.

Institutions aided.	Work.	Grant 1899-1900.
		£
University College of North Wales, Bangor	Collegiate centre	500
University College of North Wales, Bangor	Farm	200
Durham College of Science, Newcastle-on-Tyne	Collegiate centre	800
Durham College of Science, Newcastle-on-Tyne	Farm	200
South-Eastern Agricultural College, Wye	Collegiate centre	800
South-Eastern Agricultural College, Wye	Farm	200
University College of Wales, Aberystwith	Collegiate centre	800
Reading College	Collegiate centre	800
Yorkshire College, Leeds	Collegiate centre	800
Cambridge University Agricultural Department	Collegiate centre	800
University College, Nottingham	Collegiate centre	400
University College, Nottingham (Midland Dairy Institute)	Dairy instruction	300
British Dairy Institute, Reading	Dairy instruction	300
Eastern Counties Dairy Institute, Ipswich	Dairy instruction	300
Bath and West and Southern Counties Society	Field experiments	50
Bath and West and Southern Counties Society	Cider experiments	100
Agricultural Research Association, Aberdeen	Agricultural experiments	100

The Midland Agricultural and Dairy Institute.

The Midand Agricultural and Dairy Institute, Kingston-on-Soar, has just issued its prospectus for 1900-1901. The courses for this session have been entirely rearranged and considerably extended, particularly the course for dairy teachers and also for factory managers, these being now perhaps the most complete of their kind in the country. The Institute was established by the co-operation of the County Councils of Derbyshire, Leicestershire, the Lindsey Division of Lincolnshire, and Nottinghamshire, and is administered by a governing body consisting of representatives from these counties. An annual grant is made by the Board of Agriculture towards the cost of the scheme of education carried on at and in connection with the Institute. The dairy buildings were opened in September, 1895, by the Duke of Devonshire, and since that date over 800 students have passed through the courses. The addition of the Agricultural Department, which was transferred from the University College, Nottingham, was made this year.

The Institute is situated at Kingston, in the county of Nottingham, and consists of fully-equipped buildings and appliances for giving both theoretical and practical instruction in all branches of agriculture and dairying. Horticulture and poultry management are also dealt with, to a certain extent, as far as they come within the scope of the ordinary farm. Students of both sexes are admitted.

The scheme of work administered by the governing body consists of the following branches:—At the Institute courses of ten, twenty, and thirty weeks' instruction in agriculture and allied subjects for farmers' sons, etc.; courses of six, twelve, twenty-four, and thirty-six weeks' instruction in the principles and practice of dairying; and special courses of varying lengths of instruction in agricultural chemistry, bacteriology, seed testing, etc., for teachers and others wishing to specialise in any branch. Analyses of manures, foodstuffs, and general farm products at special rates for farmers resident in the co-operating counties can be had at the Institute.

The outside work consists of courses of lectures varying in number from three to twelve in the following branches:—Agriculture, agricultural experiments, dairying, veterinary surgery, poultry management, horticulture. Courses of instruction in dairying by means of the travelling dairy school; and experiments conducted on farms in the co-operating counties. The staff of the Institute are always available free of charge for advice and consultation by farmers, dairymen, etc., resident in the area of the co-operating counties, and wherever practicable a visit of a member of the staff to a farm or dairy where any difficulty has occurred may be arranged. Fuller information may be had on application to the director or manager of the Institute.

Caught in a Hay Press.—Gerald Anderson, aged twenty-eight, living in Brookeley Street, Islington, was admitted to the Great Northern Hospital on Wednesday suffering from terrible injuries through being crushed in a machine. He was engaged at one of the presses for the pressing of forage for use in South Africa, at Messrs. Whithorne and Company's works, in the Liverpool Road, Islington, when he was accidentally caught in the irons.

BARLEY AND MALT.

By Hordeum.

The General Election.

The dissolution of the existing Parliament, and the election of a new one to take its place, happen to be events of almost unique interest. It is never [illegible] call to mind a parallel case. A strong Government voluntarily gives up the reins of power at an earlier date than is necessary in order to determine the free opinion of the electorate upon its past and future policy.

There can be little difference of opinion upon the result, as it is practically a foregone conclusion. Our foreign policy, and the development of the Imperial feeling throughout the length and breadth of our vast Empire appeal to the popular imagination in a manner little to be understood. Every shade of political feeling merges more or less in the predominant "khaki" tint. Taxpayers cheerfully assent to heavier levies, and the only obligation laid upon the great spending departments is to urge that sufficient be spent to ensure efficiency.

All Political Aspects

are subordinated to the emphatically expressed wish of the vast majority of the most sensible men on our midst that the great strength of the Empire shall be exerted to extend its limits and foster its interests in any and every position possible. But all this can be done without sacrificing other and notably home interests. As a fact, due fostering of these other interests can most efficiently help to preserve existing Imperial interests, and tend to extend and strengthen them. We may cheerfully assent to the grave need of strengthening the Government to the utmost limit of reason, but it does not follow that we need lose sight of important points when even the shortsighted want of understanding of real facts can be and is productive of much mischief.

Needless loss and waste are discreditable to even the strongest Governments, and straightforward pointing out of such matters is directly necessary in grave national crises like that we are now plunging into.

Excessive Taxation

of industries employing home products is a needless and cruel waste which may be consistently resisted at all times. At the present moment it is necessary and right to bring forward all such matters.

British or other barley used by brewers is unfairly handicapped, and it has passed the reasonable limit of what it may reasonably carry.

Directing attention to the fact, and pointing out the remedies to be forthwith adopted, ought not to imply any disapproval of Government action or policy. Every Chancellor of the Exchequer admits the wisdom of refraining from killing geese that lay golden eggs. Even the present one, whom we all wish to see returned to his high office at the earliest moment, is now aware that it is barley which pays duty and not beer. The barley-grower is directly productive of the eggs, not the brewer, and then only through the medium of the consumers. The latter constitute

The Great Electorate.

If only they understood the question they would insist upon barley having fair play. The present beer duty is levied upon the actual yield of the material mashed or dissolved by the brewer in the initial stages of his process when brewing beer. The quantity of wort made from a given quantity of material has absolutely nothing to do with the amount of duty charged. Two cyes may stand side by side in the same fermenting room, and be the product of one heap of malt; one may contain ten barrels of wort, and the other a hundred. Yet both can be entered in the books as forty barrels, and the duty in either case is charged exactly as though forty barrels had been made and entered.

To take the illustration further, two other cyes may be fermenting at the same time and place, and the wort is the product of raw grain and sugar. The wet capacity may be still the same, say one hundred barrels, but in this case the duty charged is only thirty-five barrels.

This gives a

Premium upon Substitutes

which is unfair, and ought not to be tolerated. Without touching upon the question of adulteration, the perfectly legal working of existing regulations and methods of charging duty permit competition with barley malt in beer, which is monstrously unfair.

The present is the proper time to bring the matter forward, and the representatives of barley-growing counties ought to have the matter put plainly before them, and promises should be exacted that in the near future not only shall the duty on beer be reduced, but as matter of necessity that be placed on such a footing that all malt ground in mash tuns shall at least not be unduly charged.

Pending [illegible] the duty on the use of either raw grain, maize or rice, and low class sugars, [illegible].

Promises on these heads can be secured now, and it behoves those interested to see to it that they are given and kept.

By LUPULIN.

Wandering in Hopland.

The ancient city of Canterbury abounds with attractions for the man who is a bit weary of London commercial life, who has a liking for old-world scenes, and who can find in the contemplation of noble buildings that are associated with centuries of our national history food for restful thought. As I strolled up the High Street, passing under the venerable castellated gate which spans the road, and hearing the musical tones which now and then floated lazily down from the cathedral tower, the pleasant character of my surroundings created a sensation of peace and happiness which it is easier to experience than to describe. Pausing for a few moments to look down upon the sluggish stream of Stour, its clear water and the long green aquatic plants bending gracefully to the influence of the current, the artistic fitness of the gable-ended and creeper-draped houses on the bank attracted me, forming with the river such a charming picture. The old city has changed but little during the lapse of years; the little river flows on in the same slow fashion as when Chaucer's pilgrims plashed through it when they sought their rest-house, whose groined arches and cool, dark passages still bear witness to the long drawn out story of England's birth and growth and present sturdy strength.

Such musings were, however, speedily put an end to as I advanced further and found myself in the midst of a busy crowd of "men of Kent" assembled in front of the Corn Exchange and engaged in discussing the results of the hop crop, and the values likely to be attained for their produce this year. These farmers, whose occupation of their lands and whose interest in hop culture has been handed down to them by many preceding generations, are mostly keen men of business. They feel that they have a reputation to maintain, as the growth of hops in England had its origin in their county, and the fame of East Kent in this branch of agriculture is something to be proud of, and is worthy of every effort they can make for its continuance. They are especially desirous this year that events may issue in their favour. Several seasons have passed during which their labours have not been sufficiently remunerated. Last year their crops were certainly large, but the prices were so low that in the majority of cases they hardly saw their own again.

This season, whether on account of exhaustion of the roots, of unfavourable weather, or of severe and persistent aphis blight, the yield is exceptionally small, and planters are therefore nervously anxious that the prices to be realised should be commensurate with the deficiency of the crop. Many were the inquiries from the factors from London, who were in attendance to examine samples and receive the instructions of their clients, and even I was singled out for information as to the trend of the Borough trade. I think we tried to advise the growers to take courage and have faith in the early future. Their ideas seemed generally to be centred upon the average price of £8 per cwt. They certainly deserve to have it, and the outlook of the world's crop for 1900 seems to indicate that their desires will eventually be gratified if they handle their produce discreetly.

A delightful ramble through some of the bye-ways of the city soon brought me into the calmer atmosphere of the country road leading to Chilham and Chartham. Arriving at Thanington I entered an oast house, where the pungent aroma arising from the heaps of hops on the cooling floor most pleasantly affected my olfactory nerves. I noted that one heap was conspicuous by the wholeness of the cones, and, examining them, I found that, though they were somewhat small, and, being of the white bine variety, had only delicate bracts which were fully ripened, their roundness and compactness were evident throughout the heap. Upon inquiry, I ascertained that this superior condition was due to the fact that they had been cured upon a kiln fitted with Blackie's patent apparatus. This being the first time that I had seen this system in operation, I asked permission to enter the kiln, and there had ocular demonstration of the ease with which the hops were managed, and the practical certainty of the result. The dryer expressed his satisfaction with the new plan, and remembering the conservative opinions generally held by these workers, I accepted his testimony as unbiassed and conclusive in proving the efficacy of this system in protecting the hops from injury during this critical process, and in preserving for the benefit of brewers all the lupulin and other essential elements for which this plant is cultivated.

A short walk into some neighbouring gardens showed me some samples of the irregularity of yield which is characteristic of the present season. Side by side with a garden full of bine, but absolutely devoid of fruit, was another from which a fair crop had been harvested. In the one case neglect, and in the other attention, had probably prevailed.

I retraced my steps, and soon found myself again in the quaint city streets, which were enlivened by the presence of a contingent of jolly Jack Tars from the Sheerness Gunnery School, enjoying a day's holiday. They boarded their waggonettes, hoisted the Union Jack, and, roaring out patriotic songs, departed amid much enthusiasm. My photographic eye lingered lovingly on the high lights and deep shadows brought into prominence in the varied architecture by the bright beams of the evening sun, and it was with regret that I said good-bye to the city so crowded with agreeable associations.

Hops are strongly in evidence round about Tunbridge Wells, and during a short drive to the picturesque "High Rocks," whose geological wonders and sylvan beauties I enjoyed for the first time, I passed gardens completely or partly picked, where healthy crops demonstrated the care bestowed upon them, and wherein the pickers grouped in charming relief on backgrounds of graceful green foliage proved the value of this culture to the working population.

Back again, and away to Staplehurst, noting *en route* the great extent to which the crop is gathered and the rapidity with which the workers are getting through their task this season. The S.E. and C. Railway gives the traveller plenty of opportunity for making observations during his journeys by local trains, the slow rate of progression, the long waits at stations and elsewhere on the line being of service in this particular. Let us give this much-abused company credit for all that is due to them!

A drive through the pretty village of Staplehurst, along a splendid road for about two and a-half miles, passing on the way the extensive park and beautiful mansion of one of our best known London bankers, brought me to a farm belonging to Mr F. S. W. Cornwallis, M.P. for Maidstone, who will, I trust, retain his seat at Westminster in the new Parliament. Hops are here an important consideration, many acres being devoted to them. A large piece of Goldings was in course of picking, three-fourths of it having already come down, the remainder evidently ripening fast, and the whole having yielded very well for the season. But I understand this year's weight will not exceed much more than half that of last year.

Coming to the oast house, I found that here again Blackie's apparatus was under trial, and had thus far given entire satisfaction, in the wholeness of the hops cured by it. Some samples of Henhams were produced and examined. This somewhat coarse variety, with its thick green petals and heavy cones, does not often, even under the most favourable circumstances, make an attractive sample, but these were certainly improved in appearance by the process they had gone through, the boldness of the cones at the tops of the samples and the thickness of the side cut being very marked. A heap of Goldings on the cooling floor, though in my judgment rather overdried, and therefore tending to brittleness, were nevertheless kept entirely whole, thus in an especial manner demonstrating the advantages to be derived from this well-considered arrangement.

The next day was spent in the neighbourhood of Paddock Wood, whereabouts hops are decidedly the leading feature. The population seems to think hops and talk hops, and almost nothing else. It is not to be wondered at when it is remembered how large a number of country labourers are employed in this industry all the year round, the proportion per acre being far in excess of those required in any other department of farming. At this season the dwellers in towns also arrive in their thousands to work in the gardens, and if they are favoured, as this year, with fine weather, making a month's beneficial and enjoyable holiday for themselves and their families. As I walked from the station I soon became aware of this fact by a crowd of white tents, set in a meadow by the roadside. It had all the appearance of a military encampment, the tents in regular lines, with a large marquee for the superintendent, and another occupied by the sisters of the Medical Mission, who give gratuitous advice and medicine to any of the workers who need such help. The order and cleanliness of the pickers' colony spoke volumes for the supervision of the management, whose constant attention is needful, seeing that these plantations employ 2,000 pickers, so that probably more than double that number, including hosts of children, have to be provided for and looked after. The novelty of the scene induced me to borrow a camera and take a couple of pictures of it.

These extensive plantations would occupy more than a day's march for complete inspection. I was therefore compelled to limit myself to part of them, and in every direction was confronted with evidence that while trifles may make up perfection, perfection, when attained, is no trifle. An infinite capacity for taking pains is a prominent element in the methods under which this business is conducted. The system of registration of the smallest facts and observations, the careful study of all the varying circumstances and conditions affecting the plant, from the earliest movement of the root sap to the final maturity of the fruit, the exact watching of the manufacturing process, which commences when the pokes of green hops are carried into the oast house, and is only concluded when the samples are drawn and packed up, all these unite in raising hop culture to a science, the value of which is constantly recognised by those engaged on this estate.

Ever ready to test the latest suggestions for improvements in any of their processes, the managers have had Blackie's patent fitted to several of their kilns. I do not know what opinions they may finally arrive at concerning the working of the system, but perhaps I may venture to say a word on the subject, premising that I am only expressing my individual views. Having had the privilege of seeing samples drawn from about twenty pockets of hops grown on this plantation and cured on this apparatus, I can hardly imagine that the most exacting critic could desire anything better. Full of the condition which is due to careful attention, absolutely free from any sign of disease that had been eradicated by constant washing, and of exquisite even colour, the hops were as whole as they were on the bine, and but for the pressure exercised in the bagging had lost none of their beauty of form. Their richness in preservative resins and their delicacy of flavour were equal to anything that is quoted as being perfect, and I think the inventor cannot fail to be satisfied with the results, and also expect that the verdict of the managers will be favourable to him.

In passing through the grounds on my way to the station I met with a striking instance of the possibilities of hop growing in a piece which had been planted only last spring. The bine had grown so luxuriantly on low poles, and was so laden with fruit, that it was expected to yield several cwts. per acre. I never met with a more satisfactory proof that English planters can at least equal the doings of their American competitors, who have been known to boast that only on the Pacific Coast can hops produce a weighty crop the first year of planting.

This closed my "wandering," and left upon my mind a very satisfactory conviction that as regards English hop culture "there's life in the old dog yet."

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interst and benefit to the members of the society*

Home Notes.

The Borough.

Our factors are rather nonplussed by the slow progress being made in the trade. Merchants tell them that their customers will not operate, and that the samples of new hops being carried by their travellers still remain on hand for the most part. Yet there is a steady demand for yearlings, which are being sold daily at prices proportionately much higher than can be realised for the new growth. There are, however, many indications that this period of uncertainty will soon come to an end, and that when brewers understand the actual shortage of the English crop, which becomes more pronounced daily, they will throw off their reserve, and begin to buy in order to avoid the contingency of the advanced value which is inevitable. Merchants know what is before them, and are moving warily, but certainly, forward. When a grower is asking £6, and gets a bid one day at £5 5s., the next day advanced to £5 10s., and the following day to £5 15s., he must be aware which way the wind is blowing, especially when his factor, who being in personal touch with the buyer can feel his pulse, advises him to hold out for his price which legitimately represents the lowest value of the growth. I have, therefore, no fear as to the ultimate issue, and although the upward movement has not come about so soon as I expected, I can only advise my friends to be of good courage, and to have confidence in an early change in the position.

Audi Alteram Partem

is a sound motto. Every man is more or less prejudiced in his own favour, and cannot always judge rightly for himself. But when his opponent agrees with his view of the position he can safely conclude that he stands on an unquestionable basis, and that his arguments deduced therefrom may be accepted. For such reasons I quote from the *Brewers' Journal*, the most influential organ of the brewing industry, in which I find the following remarks at the conclusion of an examination of the probabilities of the hop crop of 1900: "From what we have seen, and from information gathered from disinterested and reliable sources, we feel bound to say that it is not at all assured that an average of 7cwt. per acre will be reached, though we are hopeful of such a result. The opinion of those who take the most sanguine view of the situation is that the crop will not be larger than that of 1898."

Statistically, the position is, therefore, as strong as it well can be, and distinctly encourages the expectation that much higher value must eventually and speedily be heard of.

Worcester Hop Fair,

held as usual on Wednesday last, the 19th inst., provided a striking object lesson, confirmatory of the views I have expressed. With respect to attendance it was a record for the small number present. Owing to the lateness of the picking, but few growers could leave their farms, and buyers seemed to feel that it would be almost useless to put in an appearance, as there was but little chance of picking up bargains. But the difference of opinion as to values between the planters and merchants who did attend was very pronounced. The former asked 100s. to 120s. for what the latter offered 80s. to 100s. Therefore, most of the samples were taken home again, as planters were generally so full of confidence that they resisted the blandishments of the buyers almost to a man. A little business was done. I heard of one transaction in good hops at 1s. per lb., and a few others for medium samples at 80s. per cwt. The chief selling was, I understand, of some Kent and Sussex hops, which had been bought in the Borough from needy growers, and were carried down to Worcester to be held up as bogies to the planters there. The total quantity of new crop hops weighed on the public scales up to Wednesday last was 558 pockets. What a contrast is this report to the fair of 1800, concerning which it was then stated in *Berrow's Journal*: "Hops were more numerous than was expected, and in general of good quality; 1,141 pockets were weighed, the current prices of which were from £16 10s. to £17 17s. per cwt." Would that we could revive these "good old times" for the hop industry!

The General Election

may possibly retard the establishment of business on a solid basis, although the ultimate result to the hop trade should be beneficial, as during this exciting period a larger supply of beer will probably be required by thirsty voters. Our direct interest in the new Parliament is limited to but few members, but I hope to hear of Colonel Brookfield's triumphant majority over the opponent who has been brought forward during the Colonel's absence on the battle field of South Africa. I am glad to know that our gallant Colonel is on his way home, and that he may be expected to land in England about the end of this week. Mr. Lawrence Hardy, Captain Boscawen, Lieut.-Colonel Warde, Mr. Cornwallis, Sir James Rankin, Mr. Ratcliffe Cooke, and Mr. W. G. Nicholson should also be returned again to sit at Westminster. I regret that we shall lose our good friend Mr. Gorell-Barnes, who is retiring in consequence of failing health, but an efficient successor has been found towards whose return I trust all hop-growers in the division will if needful lend a helping hand.

Messrs Piercy and Co.'s Report.

In a season like this, when the hop crop is still largely gathered, it is not possible to be quite so confident as usual in our estimate of the probable yield in quantity and quality of the various producing districts. From our careful inspection of the yards, and making due allowance for those that are quite hopeless, we feel justified in placing the total crop in Kent, Sussex, and Worcester at about half last year's, and though the samples already offering show immense variety, they are quite up to the average in brewing properties. Our Worcester Mathons, Goldings, and Bramblings promise to equal in condition those of recent years, but greater care will be necessary in their selection. Prices are wild to-day for the few lots of sound hops showing, and will probably not settle until Saturday.—PIERCY AND Co., 6, Sansome Street, Worcester (September 19th, 1900).

Mid-Kent.

Picking is now almost completed, and it is therefore possible to compare results with previous estimates. In the vast majority of cases the hops have come down considerably lighter than had been generally anticipated. Not a few growers who had looked for seven or eight cwt. per acre have been sadly disillusioned by the scale test, which has proved that the crop had been over-estimated by from one to two cwt. an acre. The season indicates in a striking manner the erratic nature of hops, very great diversity being found not only in the same parish, but even in the same field. The finest specimen I have seen this year was grown in Sussex, but their colour was not quite what it should be, and I do not anticipate they will produce a really fine sample. On the other hand, there are fields in the same locality that will yield under 4 cwt., and those of scarcely second rate quality; indeed, if the general crop had been more abundant they would probably have been left on the poles as not worth gathering, but the scarcity may give them a value. When I wrote last I intimated my opinion that your estimate of 6cwt. was outside the mark, and I have since seen nothing to induce me to alter my view. Grounds that will yield over 7cwt. are few and far between. There are very many more that will not scale above 4cwt., and even these few are in most cases below par in quality. What the factors describe as "good coloury samples" will be scarce, and those who have been fortunate enough to secure a crop of good quality should not, I think, be in a hurry to part with them.—MID KENT (September 20th, 1900).

Foreign Notes.

Nuremberg.

The demand for choice hops continues to be very active, and prices for such qualities are well upheld, the anxiety of the brewers to secure the best growths diverting their attention for the moment from the samples of medium or inferior grade. A slight depression in the value of the lower sorts is therefore evident, but the general healthy tone of the market, confirmed by the comparatively moderate supplies that are coming forward, and the certainty of the shortage of this year's crop, is sufficiently satisfactory to induce confidence in its future course. No doubt exists that full prices will eventually be realised, as it is now quite clear that the yield will barely suffice to meet the requirements of consumers during the season.

English buyers are becoming interested, and, contrary to usual customs, some orders for export to England have already been placed. About 300 to 400 bales have been purchased, but it was not without some difficulty that exporters were able to carry these transactions through.

A Few Recent Reports

of the crop are to hand, from which I condense the following:—

LOWER AUSTRIA.—Early pickings are yielding rather better than expected, and it is anticipated that the later sorts, which will not be picked till this week, will also come down fairly well. The hops are generally rich in lupulin and free from any trace of disease.

STYRIA.—The crop is coming down at the rate of a fair average. Trade is brisk, and good prices are obtained. The prospects in the south-west are not so favourable, as the bine was injured by the dry weather in July. Late hops are estimated to yield one-third less than last year.

SAAZ (Bohemia).—The expectation of a full crop has been lessened by want of rain, the development of the cones having been checked thereby. In some plantations, however, the crops are more promising, and on the whole a full average will probably be harvested.

MORAVIA.—A smaller crop than last year is expected, the plants having suffered much from the condition prevalent in early spring, from which they have not fully recovered. Recent drought and cold nights have also been detrimental, and the cones are consequently very small generally.

WEST GALICIA.—Rain falling in the early part of last month caused the formation of additional cones. The present aspect of the crop, therefore, shows much irregularity, ripeness and immaturity being visible on the same lines. The yield will probably be at best one-third less than last year.

EAST GALICIA.—In consequence of some of the plantations having failed to recover from the effects of bad weather during the early stages of the growth, the yield must be small, and is estimated as not likely to exceed one-third to one-half of last year's crop. Growers are not pressing to sell, therefore very little business is being done.

Belgium.

The speculative market at Brussels has remained rather quiet of late, and prices in that position have slightly receded. Buyers of Alosts are now only offering 80 francs, but sellers are still firm at 82½. Poperinghes are not being dealt in on the Bourse by reason of the very firm attitude of sellers, whose quotations of 90 francs hinder business. To the consumers the general quotation of dealers ranges from 90 to 95 francs both for Alosts and Poperinghes.

The Belgian Harvest

is almost completed. By the end of this week the whole of the crop will be gathered. With fine weather for the picking, the quality is generally turning out satisfactorily, but almost all growers complain that the quantity is not equal to their own estimate. They are consequently refusing the offers made to them, hoping to get higher prices later on. My friend, the editor of *La Petit Journal du Brasseur*, thinks that it is likely their expectations in this direction will be disappointed.

America.

Though the volume of recent business on the New York market has not been large, the tone of the trade, caused by the evident desire on the part of consumers to safeguard their position is distinctly stronger. The stocks in the hands of dealers are exceptionally small, and the careful operations of brewers throughout the year lead to the conclusion that they must soon replenish their stores.

Though the crop is generally coming down in fine condition, colour and quality being excellent in most cases, the quantity is even lower than the lowest previous estimates. Throughout New York State the reduced acreage will tell, in addition to the comparatively small average yield. Reliable reports from California, Oregon, and Washington speak somewhat despondently, as the experience of growers during the picking has revealed that the harvested weight will come much short of the promises presented before the harvest commenced.

In the country districts values are therefore rising rapidly. Dealers are offering 15 cents for choice and 12cents for medium hops. Very few growers are willing to accept these prices, and the general tendency is in the direction of a strong and healthy trade.

(*For Hop Market Reports, see pages* 399, 401.)

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

15,787.—H. L. Friedmann, of London, for an invention for "A new or improved box or case for conveying or carrying eggs."

15,788.—W. Ridlington, of Holbeach, Lincs., for an invention for "A machine for digging and picking potato or other root crops."

15,821.—M. Tonko, of London, for an invention for "Improvements in potato setting machines."

15,983.—S. L. Roberts, of Water Street, Liverpool, for an invention for "An improved cream separator."

10,017.—W. J. Green, of Upper Holloway, London, for an invention for "A perforated manger trough."

Patents Sealed.

10,303.—W. A. Hutcheson, of Fordyce, Banffshire, for an invention for "Crops, cut, stacking."

10,539.—W. H. Sleep, of Plymouth, Devonshire, for an invention for "Improvements relating to ploughs, cultivators."

Corn Merchant Killed whilst Cycling.—An inquest was held on Monday on the body of Mr. [illegible], corn merchant, of Stratfield-more, near Reading, who died from injuries received in an accident which occurred last Thursday. It appeared that deceased ran against a Post Office mail cart, with the result that his head was fractured and he died the following morning. Mr. Hutcheon was a well-known figure at all the markets in Berkshire and Hampshire.

SHOWS.

Stokesley Agricultural Show.

That the Stokesley Agricultural Society increases in popularity every year was evidenced at the show held on Thursday, for the entries reached the record number of 1,911, and the attendance of visitors was so great that one had difficulty to get about the ground. Cattle numbered 104, which is exactly the same as last year; sheep 156, an increase of 10; pigs 40, an increase of 5; and horses 370, as compared with 366 last year; but the greatest increase was in the miscellaneous departments, the total number of exhibits here being 1,241, as against 1,003 last year. Some of the finest bred Shorthorns in England graced the cattle section, but Mr. George Harrison's exhibits proved invincible in every class. In the class for bulls of any age, the sturdy young Favourite, of Sanguahar, had next to him Mr. J. Fryer's Merry Harbinger, who is just ten months his senior; and Mr. A. J. Dorman's Grand Waterloo 26th was placed second to the well-known Welcome in the cow class. Mr. J. W. Harrison and Mr. Fryer both did well with second prize winners, but it was with Mr. Geo. Harrison that the premier honours rested. Mr. A. J. Dorman was the most successful exhibitor of cattle of any breed, and Mr. Robert Brunton headed the tenant farmer class for two non-pedigree Shorthorns. For sheep of the Leicester or Lincoln breed Mr. George Harrison was again distinguished, while Mr. J. P. Sowerby had the best of it in the Wensleydale classes. The cross-breds gave rise to rather more competition; nevertheless the sheep show, as a whole, was a highly satisfactory one; there were several tip-top classes, and the quality all round was good. The pig prizes were limited to the immediate district, and full advantage seemed to have been taken of the fact.

The total of 370 horses included over four score for agricultural purposes, an even bigger lot of hunters, and a nice sprinkling of hacks, in addition to about sixty of the Cleveland bay and coacher type. It was a capital collection, and did credit to the district. The Cleveland bays, naturally, claim first attention. They were quite up to the average, embracing both "Royal" and "Yorkshire" winners. The brood mares, headed by Lady Stainton, with May Blossom second, made a fine display. Two and three-year-old fillies also were choice, Mr. William Wood having the place of honour with Queen's Rocket. Equally worthy was the group of coaching brood mares, a very strong class compared with the short numbers through the rest of the section. Messrs. R. and J. Davison were, as usual, well to the fore with their representatives of the heavy breed. As was only to be expected, Mr. James S. Darrell and Messrs. T. and H. Ward sent a selection of their best of the hunting type. Diana won in the brood mare class, and Lord Clare distinguished himself over and over again. A strong class of colt foals was led by a son of Knight of Ruby, shown by Mr. James Ingledew. Three nice roadster classes passed before the judges.

The following is a list of the awards in the principal departments:—

CATTLE.

SHORTHORNS.

Bull of any age: 1, G. Harrison, Gainford; 2, J. Fryer, Howden-le-Wear; 3, R. Dixon, Great Ayton.

Bull, under two years: 1, G. Harrison; equal 2, J. W. Harrison, Lealholm, and J. Fryer, Howden-le-Wear.

Bull calf, under twelve months: 1, G. Harrison; 2, J. W. Harrison; 3, Crosland Bros., South Stainley.

Cow, in calf or in milk: 1, G. Harrison; 2, A. J. Dorman, Grey Towers; 3, F. W. Horsfall, Potto.

Two-year-old heifer, in calf or in milk: 1, G. Harrison; 2, F. W. Horsfall.

One-year-old heifer: 1, G. Harrison; 2, J. W. Harrison; 3, J. Fryer.

Heifer calf, under twelve months: 1, G. Harrison; 2, J. W. Harrison; 3, J. Fryer.

Two non-pedigree Shorthorn cows, property of tenant farmer in district: 1 and 3, R. Brunton, Marton; 2, T. Petch, Little Ayton.

Two or three-year-old non-pedigree heifer, in calf or in milk, limited to district: 1 and 3, T. Petch; 2, G. Smith, Castlelevington.

ANY BREED.

Two bullocks or heifers, any age or breed: 1, A. J. Dorman; 2, T. Wilkinson, Maltby; 3, T. Petch.

Two grazing bullocks or heifers with not more than four broad teeth: 1, T. Wilkinson; 2, T. Petch; 3, W. Scarth, jun., Carlton.

Two bullocks, with not more than two broad teeth: 1, A. J. Dorman; 2, J. L. Dugdale, Crathorne; 3, W. Kearsley, Kirby-in-Cleveland.

Two heifers with not more than two broad teeth: 1, A. J. Dorman; 2, W. M. Hall, Stokesley; 3, J. H. Hall, Stokesley.

Two bullocks or heifers without broad teeth: 1, A. J. Dorman; 2, W. M. Hall; 3, T. Buckle, Scamer.

Couple of non-pedigree calves, calved in 1900, bred by exhibitor, and property of tenant farmer: 1, T. Petch; 2, W. Robinson, Marton; 3, W. M. Hall.

Cow, in calf or milk, the property of a labouring cottager whose rent does not exceed £15 per annum: 1, E. Stevens, Great Ayton; 2, R. Durham, Crathorne.

SHEEP.

LEICESTER OR LINCOLN

Ram, any age: 1 and 2, G. Harrison; 3, J. Dowson, Danby.

Pen of three breeding ewes: 1, H. T. Allison, Stanghow; 2, J. W. Harrison; 3, J. Brown, Hawsker.

Pen of three shearling gimmers: 1, G. Harrison; 2, J. Dowson; 3, J. W. Harrison.

Pen of three gimmer lambs: 1 and 2, G. Harrison; 3, J. W. Harrison.

Tup lamb: 1 and 2, G. Harrison; 3, H. T. Allison.

WENSLEYDALE

Ram, any age: 1, J. P. Sowerby, Stokesley; 2, W. Hutchinson, Nunstainton; 3, F. E. C. Dobson, Dromonby.

Pen of three breeding ewes: 1, A. E. Pease, Pinchingthorpe; 2, F. E. C. Dobson; 3, T. C. Dobson, Kirby.

Pen of three shearling gimmers: 1 and 3, J. P. Sowerby; 2, T. C. Dobson.

Pen of three gimmer lambs: 1 and 3, J. P. Sowerby; 2, F. E. C. Dobson.

Tup lamb, belonging to member of Wensleydale Sheep Breeders' Association, and eligible for entry in same: 1 and 3, T. C. Dobson; 2, J. P. Sowerby.

CROSS-BRED.

Pen of three half-bred ewes, for breeding purposes, which have reared lambs this season, to be first cross from a Cheviot ewe: 1, E. Anderson, Thornaby-on-Tees; 2, T. Wilkinson; 3, T. Petch.

Pen of three grey-faced ewes for breeding purposes, which have reared lambs this season, to be first cross from a Scotch ewe: 1, W. Hutchinson; 2, W. M. Hall.

Pen of three fat shearlings of any other cross breed: 1, 2, and 3, G. Myers, Great Broughton.

Pen of three fat lambs, to be not more than twice crossed from a Cheviot ewe: 1 and 3, T. Wilkinson; 2, J. Dent, jun., Marton.

Pen of three fat lambs, to be not more than twice crossed from a Scotch ewe: 1 and 3, T. Wilkinson; 2, J. H. Hall.

Pen of three fat lambs of either sex, or mixed, first cross from a Moor ewe by any pure-bred ram, the second breed of ram to be stated at time of entry: 1 and 2, E. Hall; 3, G. Raw, Fryup.

MOOR.

Ram, any age: 1 and 2, J. P. Waind, Ankness; 3, S. Boocock, Danby.

Pen of three breeding ewes: 1 and 3, S. Boocock; 2, J. P. Waind.

Pen of three gimmer lambs: 1, J. Frank, Farndale; 2, S. Boocock; 3, G. Raw.

Tup lamb: 1 and 2, F. Farrow, Rosedale Abbey; 3, G. Raw.

PIGS (limited to district).

Boar: 1 and 2, S. Boocock, Danby; 3, I. G. Richardson, Stokesley.

Sow, in pig or milk: 1 and 2, S. Boocock; 3, I. G. Richardson.

Sow, with litter under ten weeks old: 1, G. Myers; 2, T. Hugill, Busby; 3, G. Alexander, Newby.

Pig, not more than fourteen stone: 1, Guardians of Stokesley Union; 2, G. Myers; 3, J. Boocock, Ainthorpe.

Pig, of any weight above fourteen stone: 1, J. Boocock; 2, Guardians of Stokesley Union; 3, G. Myers.

Pig, not more than fourteen stone, property of and fed by bona-fide labouring cottager: 1, C. Corps, Stokesley; 2, J. Harper, Stokesley; 3, J. Armstrong, Stokesley.

HORSES.

AGRICULTURAL.

Brood mare: 1, R. and J. Davison, Nawton; 2, T. Petch, Little Ayton; 3, J. Struthers, Stainsby.

Colt foal: 1, S. Barker, Langton-on-Swale; 2, J. L. Dugdale, Crathorne; 3, R. P. Petch, jun., Skelton.

Filly foal: 1, Exors. of R. Allison, Thornton Watlass; 2, J. Ingledew, Fencote; 3, A. W. Boville, Walk Mill.

Yearling gelding: 1, Miss Peirson, Kirby Bridge; 2, J. R. Moon, Tanton.

Yearling filly: 1, T. Petch; 2, G. Chapman, Helmsley.

Two-year-old gelding: 1, J. and W. Wilkinson, Preston; 2, W. Benton, Rookbarugh.

Two-year-old filly: 1, A. S. Benton, Kirbymoorside; 2, R. and J. Davison.

Three-year-old gelding: 1, R. and J. Davison; 2, J. Struthers.

Three-year-old filly: 1, F. E. C. Dobson; 2, J. Struthers.

Four to eight years old mare or gelding: 1 and 2, T. Petch; 3, J. Struthers.

Pair of horses, mares, or geldings, for agricultural purposes, two or three years old, property of a tenant farmer in the district: 1, J. Struthers; 2, G. H. Sickling, Yarm; 3, W. J. Humphrey, Acklam.

Pair of horses, mares, or geldings, for agricultural purposes, harnessed: 1, R. and J. Davison; 2, T. Petch; 3, J. Struthers.

HUNTERS.

Brood mare with a foal at foot, by a thoroughbred horse: 1, J. S. Darrell, West Ayton; 2, W. Dent, Fighting Cocks; 3, J. Ingledew.

Colt foal: 1, J. Ingledew; 2, J. Baxter, Kildale; 3, J. R. Raley, Cayton.

Filly foal: 1, W. Dent; 2, J. S. Darrell; 3, J. Dent, Marton.

Yearling gelding: 1, J. S. Darrell; 2, T. Curry, Morton Carr.

Yearling filly: 1, J. Pickard, Salton; 2, T. Clark, Great Smeaton.

Two-year-old gelding: 1, T. and H. Ward, Pinchingthorpe; 2, A. G. Ramshay, Catterick.

Two-year-old filly: 1, T. Newton, Easington; 2, W. Maddison, jun., Bishop Middleham.

Three-year-old gelding: 1, T. and H. Ward; 2, J. S. Darrell.

Three-year-old filly: 1, J. S. Darrell; 2, J. R. Raley.

SPECIAL PRIZES.

Pony, mare, or gelding, not more than 14½ hands, ridden in ring: 1, W. Lakin, Pickering; 2, H. Calendar, jun., Bishopton; 3, T. T. Campion, East Heslerton.

Pony, mare or gelding, not more than 13 hands, ridden in ring: 1, G. Bradley, Newton; 2, J. Walton, Guisborough; 3, M. Pearson, Harrogate.

Lady's Hackney, mare or gelding, ridden in ring: 1, E. H. Pease, Darlington; 2, J. W. P. Page, Norton; 3, Sir J. W. Pease, Hutton Hall.

Nag, mare, or gelding, from four to eight years old, ridden in ring: 1, J. Robinson, Hull; 2, H. Callendar, jun., Bishopton; 3, A. E. Scanlan, Middlesbrough.

Three or four years old hunter, mare or gelding: 1 and 2, T. and H. Ward; 3, J. Hugill, Sockburn.

Hunter mare or gelding, from four to eight years old, property of tenant farmer in the district: 1 and 2, T. and H. Ward; 3, W. Chapman, Sexhow.

Hunter, mare, or gelding, from four to eight years old (President's prize): 1, T. and H. Ward; 2, D. Smallwood, Whitby; 3, W. Jordison, Thirsk.

Single harness mare or gelding, driven on show ground: 1, M. Pearson, Harrogate; 2, A. E. Scanlan, Middlesbrough.

Single harness mare or gelding, driven on show ground, property of bona-fide tenant farmer or tradesman in Cleveland: 1 and 2, J. Walton, Guisborough; 3, C. T. Sickling, Acklam.

Horse of any age, sex, or breed, to leap fences: 1, T. E. Lavin, Ripon; 2, T. and H. Ward; 3, D. Smallwood.

ROADSTERS.

Brood mare: 1, J. Taylor, Stamford Bridge; 2, T. Binnington, North Dalton; 3, H. Stephenson, Ebberston.

Colt foal: 1, T. Binnington; 2, H. Stephenson.

Filly foal: 1, C. Moore, Upper Helmsley; 2, H. Creaser, Pickering.

Colt or filly foal by Tranquillity: 1, J. Smith, Acklam; 2, J. T. Swales, Hutton Rudby.

Yearling gelding or filly: 1, H. Creaser; 2, F. R. Hansell, Sutton.

Two-year-old gelding or filly: 1, J. W. Kirby, High Scambridge; 2, J. Burton and Sons, Copthewick.

Three-year-old gelding or filly: 1, W. Lakin, Pickering; 2, J. Watson, Hutton Lowcross.

CLEVELAND BAYS.

Brood mare, three years old and upwards, stinted to a Cleveland bay horse entered in the Cleveland Bay Stud Book: 1, G. Elders, Aislaby; 2, J. Hutton, Kettleness; 3, T. Petch, Skelton.

Colt foal: 1, T. Petch; 2, J. Gill, Ingleby Greenhow; 3, F. E. C. Dobson.

Filly foal: 1, J. Hutton.

Yearling colt: 1, G. Elders; 2, J. Fell, Easby.

Yearling filly: 1, W. Wood, Bilsdale West; 2, J. Morley, Goathland.

Two-year-old filly: 1, W. Wood; 2, Mrs. Petch and Son, Little Broughton.

Two or three years old filly, the property of a tenant farmer in the district: 1, W. Wood; 2, T. Petch; 3, M. Young, Overdale.

COACH HORSES.

Brood mare: 1, I. Duell, Hinderwell; 2, R. Brunton; 3, S. Boocock.

Colt foal: 1, R. V. Robinson, Fryup; 2, Mrs. Petch and Son.

Filly foal: 1, G. Elders; 2 and 3, K. Rickaston, Trenholme Bar.

Yearling colt or filly: 1, T. Knaggs, Marske-by-the-Sea; 2, R. Brunton.

Two-year-old gelding or filly: 1, T. Robinson, Ainthorpe; 2, M. Wilson, Whithy.

Three-year-old gelding or filly: 1, G. H. Chapman, Guisborough; 2, I. Duell.

(*For other show reports see pages* 409 *to* 415.)

THE WEATHER.

MONDAY (September 17th).—The weather was fine and dry in most parts of our islands, but there was a good deal of fog or mist in places. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, at a few places in different parts of the country, but the amounts were mostly very small. Sunday night was warm, especially over England, where the temperature did not generally fall below fifty-five degrees, and at Yarmouth the lowest reading of the thermometer was sixty degrees.

TUESDAY (September 18th).—The weather had become generally less settled than of late, and cyclonic disturbances were arriving rather frequently on our northward coasts from the Atlantic. The wind was blowing freshly from the south-west at several places, and the sea was rather rough on the south coast of Ireland. Rain fell since Monday at many stations in the west and south-west. The weather was generally dull, with mist or fog in many places, and the midday temperatures were not so high as on the two or three preceding days. In London the weather was dry; but the sky was mostly cloudy, although the air was still warm, the thermometer registering 71deg.

WEDNESDAY (September 19th).—The weather was fine over Great Britain, and the rainfall in Ireland was very slight. The barometer had risen over the entire country, and an anticyclone was spreading over us from the Atlantic. Westerly winds were general, and the force was nearly everywhere light. Rain was measured in the morning, as the result of the fall since the previous day, at nearly every station reporting to the Meteorological Office, but the amounts were mostly small. The temperature scarcely anywhere touched seventy degrees. In London the day was very fine and bright, and the highest temperature was seventy-one degrees.

THURSDAY (September 20th).—Fine and bright weather prevailed in most parts of England; but there was a good deal of cloud in other parts of our islands, and rain fell at places in Ireland. The early morning temperatures were low over the central parts of England, and there was a slight ground frost at Loughborough. The midday temperatures were again fairly high, especially in the south of England. The barometer was still high and uniform over the southern portion of the kingdom; but a brisk fall had set in over Scotland and Ireland, where the wind had considerably increased from the southward, and a moderate gale was blowing at several places on our coasts. The day was very fine and bright in London, and the temperature rose to seventy-two degrees in the afternoon.

FRIDAY (September 21st).—The weather was very fine and warm over England, but the sky was cloudy in Scotland and Ireland, and rain fell at places in the north-west. Slight rain was measured in the morning, as the result of the fall since the previous day over the northern and western portions of the kingdom. Temperature was high during Thursday night in most parts of England, the readings at the southern stations falling very little below 60deg. The day was rather warmer than on Thursday, and in the southern part of our islands the thermometer in the shade exceeded 70deg. Brilliant weather was experienced throughout the day in London, and the thermometer in the screen rose to 76deg., which is fully 10deg. above the average.

SATURDAY AND SUNDAY (September 22nd and 23rd).—The weather continued fine and dry during the two days over England; but small amounts of rain were measured at several of the Scotch and Irish stations. On Saturday the midday temperature rose to 70deg. and above at many places in the southern portion of the Kingdom, and on Sunday the thermometer was rather higher, the sky being for the most part clearer. Saturday night was very warm, the lowest temperature being 59deg. or 60deg. in many parts of England. Slight rain fell in parts of London on Saturday morning, but the remainder of the day was fine, and the thermometer in the shade rose to 71deg. On Sunday the weather was brilliant, and the shade temperature registered 75deg., while the heat was very great in the sun's rays.

FARM PROSPECTS.

Dorset.

The later harvest has been well taken and is in excellent threshing condition. Rain is badly wanted, and cultivation proceeds with great difficulty. Ley lands are almost uncultivable. Rye, tares, and the like are sown, but are not likely to come up well. The springs are much drier than they have been for years, and many well's are completely dry. Roots are being affected by the drought, and cannot bulb well for want of moisture. The abundance of grass feed is very much lessened, and the hayricks for the dairy cattle will have to be commenced in many places. The cattle trade for all good quality things is well supported, and best mutton and beef make fair prices with a slow trade. G. S. (September 20th).

Durham.

The crops in the north-east district have for the most part been secured in good order, but in the later districts much of the hay got spoiled owing to the excessive wet weather which continued throughout August. The corn crops also got much laid and twisted from the same cause. Barley in this district seems to be the

Best Crop of the Year,

and will likely turn out above the average. Wheat is a fairly good crop, but oats are very deficient, and will be far below an average yield. Turnips, where not attacked with finger-and-toe, are an excellent crop, but in some districts there is great loss from the disease named. Potatoes have the appearance of being an excellent crop, but in many cases it is too evident the disease has got amongst them, and in the meantime it is impossible to say how they will turn out. Both cattle and sheep are selling well, and hay and grain are also yielding rather better prices. The weather during September has been, so far, first rate for harvest operations.—R. B. (September 20th).

East Ulster.

The farmers in the north of Ireland have had a spell of beautiful harvest weather, of which they have availed as largely as the conditions of labour permit. Labourers indeed are few.

Cereals.

Everywhere expressions of satisfaction are heard in reference to the produce of cereals. Oats, the principal crop, are excellent, and the small patches of barley and wheat have also yielded well in the fields. The reaping is not yet finished except in the warmer valleys, but on the higher lands and northern aspects of hills there are many fields not yet ready for the reaper; however, the weather continues good, and all hands are busy from dawn until dusk. No eight hours day for farmers.

Grass Seeds.

There was much difficulty in saving upland grass owing to the broken weather, and consequently the grass seeds have not worked out so well as in better seasons, but the prices are pretty good, and may pay for the trouble.

Flax.

The flax crop, of which there is a much larger acreage than usual, has been on the whole good; but the retting, drying and scutching are technical operations in which many farmers often blunder and suffer loss. Yet so far as the crop at the time of pulling is concerned it may be set down good.

Potatoes and Other Root Crops.

The potato crop, especially early kinds, has suffered much from disease, and at present appears very largely a failure; but it will only be after raising and picking the tubers that the exact amount of loss can be known. Swedes and other root crops look healthy and are growing well.

Cattle.

For young stock and stores the prices are falling, so that it appears as if graziers would lose money to men who buy in for winter feeding, but even that depends largely upon the prices of foreign feeding stuffs.

Fruit.

Fruit crops are abundant, but there is a good deal of small, inferior fruit.—E. U. (September 20th).

Hereford.

We see few fragments of harvest still in places, though the weather has been everything we could wish for cleaning it up. Have not heard of a day's threshing being done in this part. Very little corn grown. Fifty years ago there was more corn grown on one farm in this parish than is grown now, and add six others to it adjoining. It is turned into a stock-raising district, though more land could be kept under tillage, but the expenses would be too great to meet the extra cost, and therefore the land is gone down into indifferent pasture, except where the sheep troughs have been freely used or top-dressing followed up. In this case you find a good turf.

The Prospects for Winter Keep

are good; an average cut of hay well gathered, and the root crop may get to an average; it is growing fast after two or three plantings. What few potatoes are grown in this part are a very poor crop; they seemed all right to start with until about the time they were moulded; then the tops died away, and they are not more than a third of a crop.

The Hops

are very variable, some places good, in others hardly worth gathering. I see the average for the county is put at 4¼ cwt. Some land will produce double, and others less than 1 cwt. per acre. Up the Teme Valley, from Ham Bridge to Tenbury, they will grow nearly an average crop, having been well washed and cultivated. I hear a good many were sold at Worcester Fair yesterday (19th inst.) at £5 and over.—W. H.

Shropshire.

The weather continues mild, with some showers of rain; the sky variegated with clouds. Thermometer 30.2, barometer 60. All hands are busily engaged in picking plums here. There is a fair crop, but the price is extremely low—about 2s. per bushel. The meadows keep their beautiful green verdure. The ploughed land is fairly worked, but few weeds left to grow. It has now got a little damp. Farmers are now selecting the best Shropshire Down rams they can get to put to the ewes, that breed having got into favour, though this district keeps the pre-eminence. The breed is called for for foreign countries. Perhaps no other breed combines all good qualities of wool and carcase so perfectly, being also more easily got around here, and so generally preferred, the quality and quantity of the whole being good. A quiet disposition to settle down in the good pastures of this county promotes a fattening disposition, and their lambs are in favour with the butchers. The small Welsh breed often purchased for feeding in Shropshire gives trouble by their wandering disposition. They need close watching, close timing, or, as a Scotchman said, "tooth lining" in a good pasture.—J. G.

Suffolk.

Harvest completely finished. Threshing proves wheat to be a bad crop. Barley and oats not an average. Winter beans a fairly good crop, but spring beans nearly a failure. Peas only a fair crop. Roots and pastures would now welcome a good rain. Live stock healthy; beef and mutton selling well. Butchers have increased the price of meat.—J. S. (September 22nd).

Foreign Prospects.

FRANCE.—Dry weather makes ploughing difficult, and rain is also needed for the seed already sown.

HOLLAND.—Weather continues favourable for field work, and farmers are busy on the land.

BELGIUM.—Seasonable weather keeps farmers engaged with autumn sowings.

GERMANY.—Summerlike weather permits the rapid lifting of potatoes, and complaints of injury have ceased.

RUSSIA.—Although farmers are largely occupied in field work, the supply of grain continues good in the inland depots and at the ports.

ROUMANIA.—Wheat thrashing is nearly terminated. Although the yield is below expectation, still the crop is an abundant one, and of good quality. Latest advices state that the maize crop continues to look in excellent condition, except in a few localities in Moldavia.—*Dornbusch*.

The Plenteousness of Fruit.—Fruit-growers in the Peterborough district are complaining of the prejudicial effect which exaggerated newspaper reports have had upon the trade. It having been stated that there was a glut, buyers have acted on the information, and refuse to buy except at very unremunerative prices. Consequently the crop, which is about an average one, is being wasted. In the orchards around Peterborough tons of fruit, particularly stone fruit, lie rotting beneath the trees. A local buyer admitted last week that he purchased at £6 a ton plums which in London readily fetched a price equivalent to £40 a ton.

Farmer Charged with Shooting a Boy.—Henry Corbett Wilkinson, farmer, of Manor Farm, Old Wolverton, North Bucks, was charged at Stony Stratford Police-court on the 14th inst. with shooting a boy named Roger Stimpson. The evidence showed that Stimpson and another boy were trespassing in the defendant's fields gathering mushrooms. The defendant appeared, and fired both barrels of the gun he was carrying. Stimpson was hit in his legs and arms by about twenty shots. The wounds, however, were very trifling. For the defence it was stated that the gun was fired in the air merely to frighten the boys; but, unfortunately, Stimpson was accidentally hit. The magistrates committed the defendant to Aylesbury Assizes. Bail was allowed.

Irish Crops of 1900.

In many ways the season just drawing to a close has been one of the most trying through which Irish farmers have passed for a number of years, says the *Irish Farmers' Gazette*, speaking upon the crops and harvest of 1900. To begin with, the spring was a somewhat backward one, and in many districts work was from a fortnight to three weeks late right down to the time of getting in the turnip crop. Wheat is but sparingly grown; even in parts of the country in which it was at one time extensively cultivated it is now practically unknown as a farm crop. Where it still figures to any extent, however, it is satisfactory to know that it merits the description of being included among the crops which are generally described as "a good average." Second only to that through which we have just passed are notoriously disappointing to barley growers. Of all our cereals barley is by far the most exacting as to matter of weather, as in order to enable the crop to produce that plumpness and uniformity of grain for which our maltsters are always clamouring, bright sunshine and a high temperature are absolutely essential while the filling up and ripening of the corn are in progress. These sub-tropical climatic conditions were denied to the crop this year during the most critical stage of its growth, and as a consequence it is to be feared that when the result of the season's threshings find their way to market their quality will not be so good as for some years past.

In view of the importance of the part which it plays in our agricultural systems, it is very satisfactory to find that the oat crop is this season one of the best for a number of years. Alike as regards yield of straw, and weight and quality of grain, it is returned as almost everywhere up to, and in not a few places considerably over, the average, and though, as in the case of wheat and barley, the cost of harvesting it was considerable—from 20 to 30 and even to 40 per cent. in excess of recent years—there is reason to believe that its fine yield will more than make amends for the extra expense thus entailed. The flax crop is another regarding which there is room for congratulation. It has not been an unqualified success everywhere, but it is a good many years since reports have been so generally favourable. Like the leading cereals, the leading root crops—mangolds and turnips—are this year bulking up well. In some districts the roots are not quite so large as at this time last year, but the fine growing weather recently experienced has brought about a marked improvement in them in this respect, and as they have several weeks' growth still before them, there is every prospect that they will yield well up to, if not in excess of, the average. A better year for grass has not been experienced in a generation. All through the season pastures have carried quite a remarkable wealth of herbage, and at present grass lands are as green and fresh in appearance as if it were only mid-summer.

The Irish Potato Crop.

The worst has been realised in regard to the potato crop. When we ventured to hazard the opinion some weeks ago, continues the Irish *Farmers' Gazette*, that half an average yield of sound tubers was about the best that could be hoped for this season, we were criticised in some quarters as needlessly apprehensive and unduly pessimistic—guilty, in short, of an exaggerated estimate of the havoc which was then being wrought by the disease. The condition of affairs which the reports describe is, so far as the potato crop is concerned, depressing to a degree. The ravages of the disease have been widespread and complete, and except in those cases in which adequate advantage was taken of the spraying machine, the present condition of the crop is hopeless in the extreme. Not only will the yield of sound tubers be a small one, but their quality will be inferior, and in those districts in which the potato enters to such a large extent into the food rations of the people the outlook for the small farmers must be more than dispiriting; in some cases it must be even extremely critical. By a fortunate coincidence, however, it so happens that in the very districts in which the effects of a potato failure would be most keenly felt the crop is this year least seriously affected by the disease.

All over the congested districts of the west, north-west, and south-west spraying operations seem to have been much more extensively undertaken, and more effectively carried out, than in the more favoured localities in other parts of the country, and the consequence is that while in districts like the co. Dublin (in which the disease never appears in anything like ordinary years) the potato crop this season has been literally ruined, there are some places in which the blight had not made any headway up to within ten days ago. Speaking generally, however, the crop will be one of the worst for a number of years, and we believe we were even rather than under the mark in stating some weeks ago that the yield over the whole of the country would not amount to more than half an average. No more interesting proof of the potato position of the crop could be given than the fact that potatoes are now selling in almost all parts of the country at more than double the usual price for this season of the year.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: No change since last Monday. Barley rather easier for grinding. Wheat about 6d per qr dearer on the week. Oats firm. Maize improved 6d to 9d per qr. Flour advanced 6d per sack.—NIXON, GOWER, AND Co.

Mark Lane, Wednesday.—Home-grown wheat is now fairly submitted on the country exchanges, being less scarce, and farmers are satisfied at the range of currencies now obtainable. Fine white quoted up to 34s, and red of similar sample, weighing 63lb, 33s. American reds firm at fully the last advance, notwithstanding stocks being large. The flour market remained unaltered during the day, with mill offers only entertained at high prices. Consumers' requirements in the meantime are fairly satisfied. The London Millers' Association made no alteration at this afternoon's meeting. Grinding barley steady, unchanged. Fine home-grown malting meets with attention by maltsters, 26s to 35s being the general range as to quality. Oats easier, being about 3d to 6d lower since last Wednesday, and the quantity on hand with that coming forward tends to further depress the market. Flat maize barely up to last Monday, and round firm. Plate maize also sustained. Beans and peas on continued scarcity command enhanced rates, but business is still checked.

Mark Lane, Friday.—English wheat of the new crop comes up in smaller supply, and is sparingly submitted on the country exchanges, while next to nothing seems on offer here. Fine white ranges up to 33s, and red of similar sample to 32s per qr 63lb delivered. American reds 3d firmer since last Wednesday, and not pressed, while whites are fairly plentiful. Although the consumptive demand was again slow to-day for flour, owing to easier cable news from America and fine weather, there was no giving way respecting the trend of prices, which ruled fully up to 6d advance since last Friday, both English and American in the meantime remaining scarce. Grinding barley is now in sufficient supply for wants, but steady, Persian being the main source of supply, 18s ex ship, 18s 3d ex quay. Flat maize is fully 3d lower, although steady to-day at the decline. Mixed American, 20s 10½d ex ship, 21s 4½d ex quay. Round corn unchanged.

COUNTRY.

Ashford, Tuesday.—Wheat firm at last week's sales or a little over. One sample of old white realised 34s, the top price made for some time past. A fair quantity of malting barley was disposed of at 29s to 33s. All descriptions of feeding corn from white oats, 19s to 23s; black ditto, 17s to 21s; beans, 28s to 33s; round maize, 26s to 27s; flat ditto, 23s to 24s per quarter.

Aylesbury, Saturday.—Wheat firm, and the parcels disposed of were at fully last Saturday's rates. All other descriptions of grain unchanged in values. Wheat, 28s to 31s per quarter.

Boston, Wednesday.—A small attendance and a slow trade. Wheat, 27s to 29s; grinding barley, 23s to 23s 6d; malting barley, 26s to 30s; oats, 16s to 20s; beans, 30s; peas, 45s to 55s; maize, 23s 6d.

Cambridge, Saturday.—During the week the wheat trade has been gradually hardening. Supplies continue small, and farmers accept current rates very reluctantly. Weather remains very warm and dry, and condition of grain is improving. On Saturday a fair show of grain. Wheat was difficult to buy at last rates, fine lots making 6d advance. Red, 29s to 31s; and white up to 31s per 504lb; old wheat up to 33s. Barley was a dull trade for anything but the best, for which there is a good demand. Prices, 26s to 30s; fine up to 34s.

Canterbury, Saturday.—Supplies continue limited; trade dull at recent rates. Ruling prices:—White wheat, 31s to 33s; red ditto, 30s to 32s; malting barley, 28s to 35s; grinding ditto, 21s to 24s; white oats, 18s to 21s; ditto black, 16s to 20s; peas, 30s to 32s; tick beans, 30s to 32s; mazagans, 28s to 29s; flat maize, 22s to 23s; round ditto, 27s to 28s per quarter; winter tares, 7s 6d to 7s 9d per bushel.

Carlisle, Saturday.—Good supply of oats in our market to-day. Fair demand, at 6d qr less money—17s 3d to 18s for new, 22s 6d to 24s for old per 336lb.—THOMAS ROBINSON.

Chester, Saturday.—The fine weather tempting farmers to thresh their corn, samples were more freely offered to-day. There was no alteration in the ruling prices of barley, oats, and wheat. Quotations: Wheat, new, 4s 1d to 4s 3d; old, 4s 5d to 4s 6d per 75lb. Grinding barley, 3s to 3s 6d per 64lb. Beans, 4s 10 to 5s 6d per 80lb. Oats new, 2s 2d to 2s 4d; old, 3s to 3s 6d per 46lb. Indian Corn, 11s 3d to 11s 9d per 240lb.

Chichester, Wednesday.—Wheat was in small supply, and prices were 6d to 1s dearer on the week. There was a fair attendance.

Colchester, Saturday. — More wheat offering, firm market at fully last week's prices. Barley irregular in both quality and value. Beans, peas, and oats, firm.—FRANCIS AND Co.

Dorchester, Saturday.—There was a large supply of English wheat, which sold at late rates. Foreign advanced 6d. on the week. Little doing in barley. Feeding stuffs unchanged.

Glasgow, Wednesday.—There was a small attendance at our corn exchange to-day. Wheat firm at an advance of 3d to 6d per boll on the week. Flour firm, and 6d to 1s per sack more money asked. Indian corn steady, and 4½d per boll dearer. Canadian peas advanced 6d per boll owing to scarcity. Grinding beans firm, but unchanged. Foreign oats steady at late rates; home, new, are offering freely at about 6d per boll below last Wednesday's prices; old continue firm. Barley firm and scarce. Oatmeal dull and 1s per sack lower. Bran and thirds firm, but unchanged.—GIBSON AND CLARK.

Glasgow, Wednesday.—Wheat and flour practically unchanged since Monday, but on the week the former is 6d and the latter 1s dearer. The higher prices are checking sales. Indian corn scarce, and held for 4½d advance on the week; price 12s 4½d. Canadian peas scarce, and values advanced 9d since Wednesday. Beans and barley firm; sale quiet. Home oats lost 6d; foreign steady.

Ipswich, Tuesday.—Very small supply of wheat, trade firm at an advance of from 6d to 1s per qr. New reds, 29s to 30s 6d; old, 32s; white, 33s. Barley in fair supply, trade slow at present, prices vary from 26s to 33s according to qual ty. Oats unaltered. Maize rather dearer. Beans and peas firm.

Leeds, Tuesday.—Notwithstanding the heavy shipments of the past week, the market must be quoted 3d to 6d dearer than last Tuesday for all kinds of hard wheat; soft descriptions do not participate in the improvements. More doing in barley, prices very irregular. Maize and beans 6d dearer. Oats unchanged.—DUNNS AND Co.

Leeds, Friday.—Millers continue very cautious in their purchases, and wait the expected downward tendency in prices to change to-day from Tuesday's quotations, inferior being the turn easier. Maize and flour fully maintain the recent upward tendency. Beans, oats, and barley firmly held.

Leicester, Saturday.—A good attendance, with fair supplies of wheats, in variable condition; trade slightly brisker; newwheats, 28s to 31s; old wheats, 31s to 33s per 36 stones. Barley, slow trade.

Lincoln, Friday.—Fair supply of new wheats, trade steady at last week's rates, viz., 28s to 29s per qr. Foreign wheats dearer on the week. Moderate show of barleys, no fine, useful sorts, 27s to 30s. New oats rather lower; old firm. Maize a trifle higher. Beans and peas firm.

Liverpool, Friday.—Wheat a fair consumptive trade all round. Springs occasionally ½d, whites ½d to 1d dearer. Flour a fair trade. American qualities generally 6d to 1s dearer. Maize meets with a fair consumptive demand at ½d per cental less than Tuesday for Mixed American. European and Plate kinds have a fair inquiry at last market day's figures. Barley has an improved inquiry and a fair trade has transpired at unchanged values. Feeding firm with a good demand. Beans are firm with a moderate trade. Peas steady with a small trade. Oats are firm, with a better inquiry for English; foreign quiet and only a small demand. Oatmeal firm, inactive. Oilcake firm with only a moderate inquiry, owing to the recent advance. —SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Wheat realised the full prices of last week, and an occasional advance of 6d per qr. Barley of good quality sold freely at satisfactory prices. Oats are rather dull, especially foreign. Beans and peas about as before. Maize 3d per qr up. Tares are rather on the decline. No change in rye, hemp, brank, sergo, or millet.

Manchester, Thursday.—A firm tendency has prevailed throughout the week. Business has been steady, at full quotations. To-day an advance of 6d per qr was asked on English wheat, foreign being 2d per cental higher. Flour in fair demand, quotations being 6d higher. No change has been experienced in English oats, the conditions being unsatisfactory. Peas and beans are firm, at quotations. Indian corn is the turn dearer.

Newark, Wednesday.—Wheat a small show, at 6d per quarter dearer. Barley prices irregular, maltsters buying little. Oats and beans at previous prices.

Newcastle-on-Tyne, Saturday.—This day's market closed inactive for wheat, although we must confess that sellers had the gain. Flour steady, unchanged. Malting barley met with more inquiry, and full prices made for best samples. Oats shaky, the new samples coming in cheap. Beans and peas repeated late prices. Maize holds its own well, and with the approaching winter looks like no drop.—G. W. WATSON AND Co.

Newcastle-on-Tyne, Saturday.—Wheat at to-day's market ruled firm, but buyers were less anxious in buying; maize was fully as dear as last week with a good demand. Old Scotch oats steady at late rates, new easier to make sales. Foreign oats steady at late rates. Peas and beans firm at last week's prices; the malting barley trade was very disappointing buyers having all their own way. Flour sold at late rates.—JOSEPH POLLARD AND Co.

Newport (Mon.), Wednesday.—A large attendance. Wheat firm, and 6d dearer on the week. Maize firm, unchanged; barley 6d to 9d lower; oats and beans no change; flour, fines, 24s 6d per sack; offals were dearer.

Northampton, Saturday.—Small market, with a limited show of new and old wheat. New was 27s and 29s; fine old, 31s to 32s; barley, 22s to 24s; for grinding and for malting, 25s to 30s. The quality of malting barley is very indifferent; new oats from 19s to 24s; fine old, 25s; flour, 23s to 27s. Business was generally dull without much life.

Norwich, Saturday.—Wheat was in small supply to-day for the time of year, and in some cases 6d per qr more money was realised. Barley is now being offered, but maltsters are at present not eager buyers; medium qualities fetch from 28s to 30s per qr. Fine and warm weather has prevailed during the past week. Wheat, red, 30s 6d to 31s 6d per qr, weight 63lbs. per bushel imperial. Corn Inspector's return for the week ending September 17th, 1900:—Wheat, 2,238, 28s 11½d. Barley, 1,559-3, 26s 7d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat, only a moderate show. Holders asked an advance of 1s per qr, but business ruled slow. Barley fair supply, condition disappointing, and price irregular. Oats new, rough, and prices not fixed. Old, 6d dearer. Beans, dry parcels, 31s to 33s per 532lb.—ROBERT HUBBLE.

Peterborough, Saturday.—A fair supply of wheat at market; trade not fast, but prices about 6d dearer than last week. Barley slow; buyers hold back at present, weather being warm. Oats steady at late rates.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was an average attendance at our Corn Exchange to-day. Oats and barley are 3d easier. Maize remains steady. English wheat unaltered, owing to disappointing qualities, but foreign wheats have advanced 1s. —ORLANDO DAVIS AND Co.

Reading, Saturday.—The quantity of wheat on offer at the Exchange to-day was much smaller than usual, and, as a result, trade ruled very firm, the prices secured at last week's market being fully maintained, and in some instances slightly exceeded. The demand experienced for other sorts of corn was certainly limited, and a dragging trade ensued at late quotations.

Salisbury, Tuesday.—There was again a good supply of grain, and a large attendance of buyers. Trade was brisk throughout, at the following rates:—Wheat (new), 27s to 32s; ditto (old), 32s to 35s; barley (best malting), 31s to 35s; ditto secondary, 25s to 29s; peas (new), 16s to 20s; ditto (old), 20s to 23s; beans, 32s to 37s.

Sheffield, Tuesday.—Fair attendance at corn market today. Foreign wheat 6d to 9d per qr advance on the week. English wheat making advance of 6d. Flat maize in fair demand 6d to 9d advance on the week. Beans and oats unchanged. Flour 6d per sack dearer. Quotations:—Wheat, white, 33s to 33s 6d; red, 32s to 33s; new, 31s to 32s per 504lb; oats, old white, 26s; ditto old black, 22s; new, 18s 6d to 20s per 336lb; peas, grinding, 28s to 29s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 33s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s 6d to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small old, 21s to 29s; ditto American mixed, 23s to 23s 6d per 480lb.

Spalding, Tuesday.—Wheat, 29s per qr, 1s advance on the week. New oats were a slow trade at 16s to 18s per qr, some of the samples being of bad colour, but the better quality oats were inquired for. Old oats, 24s to 26s; old beans, 35s. There was a fair demand for new beans for seed purposes, 31s to 32s. Nothing doing in barleys.

Stockton, Wednesday.—There was practically no farmers' wheat showing. The foreign wheat trade keeps very firm, with a fair inquiry for millers at about last week's prices. Maize and oats about 6d dearer on the week. There were only a few samples of malting barley, and these were of only moderate quality at 24s to 26s 6d per qr.

Sunderland, Saturday.—Little grain offering. Wheat 1s per quarter dearer. Spring corn unchanged. Arrivals coastwise:—Wheat, 1,770 qrs; oats, 170; foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.— Fair attendance. Wheat a firm trade at last week's extreme prices. Malting barleys in greater supply, with steady trade. Feeding stuffs quiet.

Wakefield, Friday.—The wheat market continues to exhibit firmness, with a gradually hardening tendency; business is, however, restricted by the high pretensions of shippers, whose limits have for some time been considerably in advance of spot values. Californian and other hard wheats are 3d to 6d dearer, as also old English; no advance obtainable on other descriptions. Barley meets a poor demand, fine samples of both English and foreign are scarce, and held above buyers' ideas. Other articles unchanged.—DUNNS AND Co.

Wakefield Friday.—Foreign wheats have advanced 6d to 9d per qr on the week, and English are quoted very firm at late rates on to-day's market, but the actual business doing is only nominal. No alteration in feeding stuffs. New Yorkshire barleys are in fair supply, but there is very little tendency on the part of buyers to operate.—MICHAEL SANDERSON AND SON, LIMITED.

Winchester, Saturday.—A moderate supply of new wheat on our market to-day, which met a firm trade at fully last week's prices. More barley offering of irregular quality, grinding sort 1s. cheaper. Maize unaltered. Oats, good demand at late rates. Flour, 24s to 26s.—FEAR, COLEBROOK, AND Co., LD.

Wisbech, Saturday.—A small supply of grain at market. Wheat advanced 6d per qr, 29s to 31s. New oats, 17s to 19s; old upto 24s. Barley, 24s to 28s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—Moderate attendance, and prices practically unaltered. English wheat, old, 13s to 13s 6d per 216lb; oats, old, 14s 6d to 15s 6d; new, 10s to 11s 6d; beans, old, 14s to 15s; new, 12s 6d to 13s 6d per 196lb; maize, 24s to 25s per 480lb.

Worcester, Saturday.—Wheat firm all round; English 6d, and foreign 6d to 9d dearer on the week. Feeding stuffs steady at last week's values, except barley, which favoured buyers. Wheat, 28s to 32s per quarter.

Worksop, Wednesday.—A considerably better inquiry, especially for old wheats and barleys. Good attendance of buyers, and brisker trade all round. New white wheat, 29s to 29s 6d; new red, 28s to 28s 6d; old wheats to 33s per qr; best barleys, 30s to 33s; secondary, 26s to 28s; grinding 25s; new beans, 32s; old ditto, 33s to 37s; new white oats, 17s to 19s; new black, 15s to 16s 6d; old white (very scarce), 24s to 25s; flat maize, 24s; tares, 48s to 50s per qr.

FOREIGN.

The Antwerp wheat market has ruled firm, with a regular current of business. Quotations for wheat have shown a firm tone upon the French provincial markets, but prices have still remained extremely low. French farmers are placing some reliance upon the existence of a deficit in this year's French wheat crop, while it is contended that the general wheat resources of the world are not in excess of current requirements. Many French cultivators will be compelled to sell their wheat in order to put themselves in funds, and to persons in this position any advance which may take place in prices will probably come too late, as, when it is established, they will have nothing, or next to nothing, to sell. Last week's sales of wheat at Marseilles amounted to about 10,000 quintals. Business in wheat has been quiet at Paris, and prices have shown little change. Flour has also remained without any material variation in the French capital. The harvest is now not only quite over in France, but a commencement has even been made with autumn sowing; there have been some complaints of drought. Disposable wheat has shown scarcely any change at Dantzic. The Konigsburg wheat market has been weak. Wheat threshing has been attended with about average results in Hungary; the quality of the new crop leaves something to be desired. The grain trade has shown more animation during the last few days at Braila and Galatz under the influence of more inspiring advices from the United States. The quantity of wheat now en route for Europe is returned at 915,000 qr as compared with 1,305,000 qr at the corresponding date of 1899.

Hamburg, Saturday.—Barley report: Market rules quiet here, and demand remains poor, as the high prices asked by the holders offer little inclination for buyers to operate; besides, the weather remains rather warm, so that most people have hardly commenced to malt, and at the present prices feel not disposed to lay in any stocks. Perhaps with colder weather things will alter, and trade become more active.—FRANCIS M. TH. DUHNE.

Hamburg, Saturday. — We have very fine weather favouring the lifting of potatoes, which in general turn out a good crop. The imports during the week amount to:—Wheat, 3,247 tons; rye, 5,713 tons; barley, 9,097 tons; maize, 13 223 tons. Wheat, both foreign and native, is in good demand, particularly dry, heavy sorts. For fine Holstein, Mecklenburg, and Saale, 28s 3d to 29s 3d per 504lb, f.o.b., is being paid, while light Holstein fetches only 27s, 27s 6d f.o.b. Hard Winter 2 is selling at 29s to 29s 9d, River Plate at 26s 9d to 29s 9d per 80lb, c.i.f. Hamburg. Rye quiet, new German coming forward more freely, but prices are kept up, as Russian sellers are refusing here on account of the advanced rates of freight. 9 15-20 South Russian September shipment is offering at 23s per 480lb c.i.f. Hamburg. Malting barley continues in fair demand for England, particularly the best mellow sorts, which, however, are very scarce, and for finest Saale 39s to 41s 6d f.o.b. has been paid. Finest Slovakian fetched 42s 6d f.o.b., good Saale is selling at 32s to 34s 6d, fine at 35s to 36s 6d, good Bohemian at 35s to 37s per 448lb f.o.b. Feeding barley less inquired after, 60-61 Ko. South Russian is offering at 18s 3d to 18s 6d per 400lb c.i.f. Hamburg. Mixed maize continues in fair demand. It appears dealers in the interior allowed stocks to run low, expecting to see lower prices, and they are now in want of stuff. Prompt shipments are selling at 20s 6d, November 20s, January-March 19s per 480lb c.i.f. Hamburg.—JOHN TATLOCK.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—A good demand. Fowls: Yorkshire, 2s 3d to 2s 9d; Boston, 2s to 2s 6d; Surrey, 3s to 3s 6d; Sussex, 2s 6d to 2s 9d; Essex, 2s 3d to 2s 6d; Welsh, 1s 9d to 2s; Irish, 1s 6d to 1s 10d; Geese, 4s to 6s 6d; Ducks: Aylesbury, 2s 6d to 2s 9d; country, 2s to 2s 6d; Pigeons: Bordeaux, 8d to 10d; feathered, 7d to 9d; Rabbits: Wild, 8d to 10d; tame, 1s to 1s 2d each; Australian, 7s 9d to 9s 6d per dozen; hares, 2s 6d to 3s; leverets, 1s 6d to 2s 3d each; Grouse: Young, 5s 6d to 6s; old, 3s to 3s 6d; Partridges: Young, 3s 6d to 4s; old, 1s 8d to 2s per brace.

Chester, Wednesday.—The farmers brought in supplies of about 50 tons, or rather under the average for September. There was a good attendance of buyers from all parts of the country, and with an excellent demand, fine cheese was quickly sold, at 60s to 70s per cwt. Medium quality cheese met a slower sale, and prices ranged from 50s per cwt and upwards. The quotations were about the same at the September fair last year.

Liverpool, Saturday.—Bacon: With an improved consumptive demand both from the country and locally, together with stronger American advices, the market closes firm, and some Cuts, chiefly Irish and Fancy Cuts, are quotably higher. Hams: With only a moderate demand and a plentiful supply quotations are again easier and in buyers' favour. Lard: With a sharp advance in c.i.f. quotations lard on spot is firmly held, and prices are 1s. 6d. to 2s. better on the week. Beef is quiet and without change. Pork is in steady demand, but quotably unaltered. Cheese.—The demand was slow early in the week, and some holders were easier in their views—but towards the close the position has again hardened on stronger cable advices, and high prices being paid freely for September makes in Canada and New York—from 55s 9d to 57s 6d c.i.f.—and with a better inquiry here the market must be now quoted firm. For finest current arrivals Canadian, coloured, 54s to 55s; white, 53s to 54s; States coloured, 53s to 54s 6d; white, 52s 6d to 53s 6d. There is a good inquiry for full cream second grades at 45s to 50s, but very few obtainable. Butter.—There is very little improvement in the demand, and with a further decline in Kiel, and increased Colonial supplies, prices are slightly lower all round, though chiefly on the better grades. We quote to-day Canadian creamery in boxes, 100s to 104s; Scotch 94s to 98s; finest ladles, imitation creamery, 80s to 84s; finest Danish, 108s to 112s; Irish creamery, 100s to 106s; Cork firsts, 90s; seconds, 84s; thirds, 78s per cwt.—HODGSON BROTHERS.

BUTTER.

Tuesday.—Bedale: 1s 6d to 1s 7d per roll of 24oz. Gainsborough: 1s 7½d to 1s 9d per lb. Leeds: Dairies 116s to 124s per cwt., Irish creameries 104s to 114s, York dairy, best, to 124s per stone, ditto long rolls 14½d. to 1s 2d to 2s; fresh butter in 1lb prints, 1s 3d per lb. Sheffield: 1s 3d to 1s 4d per lb.

Wednesday.—Barnsley: 1s 2d per lb. Boston: 1s 3d to 1s 5d per lb. Colne: 1s 3d per lb. Goole: 1s 4d per lb. Hereford: 1s 1d to 1s 2d per lb. Keighley: 1s 2d per lb. Knaresborough: (Wholesale), 1s 6d to 1s 8d; (retail), 1s 8d to 1s 10d per roll of 24oz. Louth: Wholesale, 1s 1d per lb. Market Drayton: 1s 1d to 1s 2d per lb. Northallerton: 1s 4d to 1s 6d per roll of 24oz. Stockton: 1s to 1s 1d per lb. Thirsk: 1s 2d to 1s 3d per lb. Whitby: 1s 1d to 1s 2d per lb. Worksop: 1s 3d to 1s 4d per lb.

Thursday.—Driffield: 1s 1d per lb. Devizes: 1s 1d to 1s 2d per lb. Penistone: 1s 2d to 1s 3d per lb. Ripon: 1s 4d to 1s 5d per roll of 24oz. Scarborough: 1s 2d to 1s 4d per lb. Wetherby: 1s 1d to 1s 2d per lb.

Friday.—Derby: 1s 3d to 1s 6d per lb. Easingwold: 1s 3d to 1s 6d per lb. Grimsby: Danish 11½ to 12s per 112lb. Dutch, 108 to 112s; Coreendom 108 to 112s. Hornsey: 1s per lb. Leeds: Danish 116s to 120s per cwt., Irish creameries, 100 to 114s; York lumps 14s 6d to 16s 6d per stone, ditto long rolls 14½d. to 1s 6d to 2s; fresh butter in 1lb prints, 1s 3d per lb. Leyburn: 1s 6d to 1s 8d per roll of 24oz. Lincoln: 1s 2d to 1s 3d per lb. Otley: 1s 6d to 1s 8d per roll of 24oz. Stratford-on-Avon: 11d to 1s 2d per lb. Whitchurch: 1s 1d to 1s 2d per lb.

EGGS.

Tuesday.—Bedale: 11 or 12 for 1s. Gainsborough: 12 for 1s. Leeds: Yorkshire, 11s to 14s per 120; Irish, 8s 6d to 10s 6d; Danish, 8s 3d to 10s; Austrian blues, 6s 7d to 7s 3d; ditto reds, 5s 9d to 6s 3d. Settle: 12 or 13 for 1s. Sheffield: 10 to 12 for 1s. Spalding: 13 for 1s.

Wednesday.—Barnsley: 10 for 1s. Boston: 13 or 14 for 1s. Colne: 1s 9d per score. Goole: 14 for 1s. Hereford: 12 for 1s. Keighley: 10 for 1s. Kirbymoorside: 13 or 14 for 1s. Knaresborough: 10 or 12 for 1s. Louth: 14 for 1s. Market Drayton: 10 or 12 for 1s. Market Weighton: 13 or 14 for 1s. Northallerton: 12 for 1s. Stockton: 10 or 11 for 1s. Whitby: 10 or 11 for 1s. Worksop: 1s per score. Gloucester: 1s 2d to 1s 9d per score.

Thursday.—Devizes: 14 to 16 for 1s. Driffield: 13 to 14 for 1s. Penistone: 11 for 1s. Ripon: 11 for 1s. Scarborough: 10 or 11 for 1s. Wetherby: 11 for 1s. Birmingham: 9 for 1s. Kidderminster: 12 for 1s.

Friday.—Derby: 9 and 10 for 1s. Easingwold: 12 or 13 for 1s. Grimsby: Austrian, 6s to 7s per 120; Russian, 5s 10d to 7s; Danish, 8s 6d to 9s 3d; Canadian, 6s 6d to 7s 6d. Helmsley: 13 or 16 for 1s. Leeds: Yorkshire, 11s to 12s per 120; Irish, 9s 3d to 9s 9d; Danish, 8s to 9s 6d; Austrian blues, 6s 8d to 7s; ditto reds, 5s 9d to 6s 3d. Leyburn: 12 for 1s. Lincoln: 13 for 1s. Otley: 9 or 10 for 1s. Stratford-on-Avon, 1s 6d to 1s. 10d per score. Whitchurch: 11 and 12 for 1s.

WOOL.

London, Friday.—Wool, English, per packet of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £8; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 6d to 1s 7d; scoured good, 1s 7d to 1s 7½d; scoured average, 1s 5d to 1s 6d; greasy average to fair, 10½d to 11½d; New South Wales, scoured average, 1s 3d to 1s 4d; greasy average, 8½d to 9½d; South Australian, greasy average, 6½d to 7d; New Zealand, scoured average, 1s 4½d to 1s 5½d; greasy average, 8½d to 9½d; Cape, scoured superior, 1s 6d to 1s 8d; fleece average, 8d to 9d; greasy average, 6½d to 7d; Natal, scoured, 1s 2d to 1s 3d; greasy average, 7½d to 7¾d. Crossbreds, greasy, Victorian, good to superior, 10d to 1s; New Zealand, fine, 9d to 10d; ditto medium, 7¾d to 8¼d; ditto coarse, 6d to 7d.

Bradford, Thursday.—The market for strong wools is firm, but business is no greater in quantity. Deep green worsted and English half-breds command a better sale where holders do not attempt a slight advance. The values of fine wools are still irregular. Mohair is very firm. The yarn trade shows a better tone, but business is not improved substantially, though more demand for lustres and some twofolds. Prices are barely

Canterbury, Saturday.—There is no improvement in the trade, and prices with some difficulty maintained. Only 6d per lb is offered for Kent fleeces and from 6½d to 7½d for lambs' wool. Half-breds, 6½d to 7d; down fleeces, 8d to 10d per lb.

Leicester, Saturday.—During the past week there has been a slight improvement in the wool market, but it has not extended to merinos and fine cross-breds, neither holders nor consumers being inclined to operate only for immediate requirements. In the best sorts of home-grown produce there is more doing, and the tendency of the values is against the buyer. The lower classes of wools are still much depressed at irregular rates. There is an encouraging tone of feeling in the yarn trade.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—A good supply of vegetables were offered, and the demand was [illegible]. Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The weather has been perfect for ploughing up the stubbles and for getting into the soil those "catch crops" which are nowadays almost synonymous with efficient farming. In a few instances we have found farmers sowing wheat quite a fortnight before the usual date even of a forward district. Farmers seem to believe that the South African war was but the prelude to an era of strife, and that wheat will be a good deal dearer than of yore. If this impression coincides with an early and favourable sowing season we may have a perceptible recovery in the wheat acreage to report. The rise in coals, in cotton, in metals, and in many other articles has helped to nourish the idea that wheat will participate in the forward movement. Our individual conviction that wheat should show a moderate rise in 1901 has already been expressed in this column, but farmers need to be warned that the production of an extra million qrs. would almost certainly defeat its ends and check advancing tendencies. Not until for three years running have we had a yearly average above 30s. will there exist such conditions as should warrant any material increase in the area under wheat. Of another autumn crop, rye, we should like to see a good deal more sown, for it serves a double purpose, affording an excellent green feed if the next season prove short in such food, and yielding little less per cwt. than wheat in the market, if allowed to complete its growth. Threshings of the year's crops are proceeding, but as yet no undue haste has been shown.

In France the sowing of wheat proceeds apace, and the weather has been almost too dry. The threshings of new wheat reveal a finer quality than had been anticipated, but the weight is lighter on the average than that of the 1898 and 1899 crops. Germany is occupied lifting the gigantic potato crop annually produced in Central Europe. There is little disease, but the tubers do not run large. The new Russian crop of winter wheat is in brisk request for shipment to Italy and the Netherlands, but England, France, and Spain are not buying at all freely. The freights are higher than usual, and will be enhanced still further with the approach of winter and rough weather. India has experienced an extremely heavy rainfall, and the promise of the early autumn sown cereals is said to be good. There is, however, a great danger in prophesying, in September almost any harvest which is not to be reaped before April, and to speak of a bumper yield as in any way assured to India in 1901 is to run the risk of being gravely out in calculations when the crops have to be dealt with otherwise than merely in statistics.

The British wheat markets of the past week have been rather dearer as a rule, but trade has been exceedingly uneventful. The demand for English wheat is, relatively speaking, better than for foreign. Flour is 6d. dearer on the sack at all markets. The supply of flour made from new English wheat has been small at all the chief centres, and America has enhanced her terms by a shilling on all the leading patents.

The prices of principal staples per cwt. thus compare:—

	Per cwt. s.	d.
Wheat	7	2
Barley	7	1
Oats	6	2
Maize	5	1

The imperial wheat average of 28s. 4d. equals 29s. 9d. per 504lb., the quarter by which English wheat is sold at Mark Lane, and the London official average of 30s. 2d. equals 31s. 8d. at the same 504lb. weight. The need for uniform practice over the returns is very great; even *habitués* have constantly to be on their guard under the present market system.

The sales of breadstuffs for the week have been:

	Qrs.
British wheat	120,000
Foreign ,,	360,000
,, flour	158,000
Total	638,000
Requirements	567,000
Surplus	71,000

The stocks in granary may accordingly be reckoned as increased to that extent.

The quantities of wheat on passage on 22nd inst. were:—

	Qrs.
Californian	900,000
North American	500,000
South ,,	275,000
Australasian	220,000
Russian	65,000
All other countries	100,000
Total	2,060,000
A year ago	1,815,000

Of flour there are 432,000 sacks on passage against 396,000 sacks in 1899, and 306,000 sacks in 1898.

The maize trade has been somewhat irregular, but, on the whole, it is surprising how well the price of an article in such large supply keeps up. Last week 296,000 qrs. were imported, but scarcely any exchange admitted a decline; yet it is very few years since an importation of 200,000 qrs. was described in ordinary market circulars and reports as "depressing." The quantities of maize afloat are as follows:—

	Qrs.
22nd Sept., 1900	735,000
1899	815,000
1898	660,000

The barley trade is preparing for the big burst of business which October inaugurates. The threshings are giving a better sample than was the case a month ago, but the few early samples of later August were in no sense indicative of the general crop. The imports last week were 117,500 qrs., while there are now 480,000 qrs. on passage against 446,000 qrs. a year ago and 550,000 qrs. in 1898.

The trade in oats is very quiet, 371,000 qrs. landed in the last fifteen days representing a rate of supply from abroad for which the markets are not wholly prepared. The American and Russian shippers are not, however, competing with each other so fiercely as usual. Russia has temporarily distanced America, and free offers to ship at 12s. 9d. to 13s. per qr. indicate that the control of the market thus assumed by the Baltic and Black Sea ports will not be relaxed until the winter impedes navigation. The market for beans is very steady. Alexandria holds less, and is shipping less than at this time last year. The London and Glasgow markets are inclined to favour holders of peas. The American and Canadian crops of pulse are stated to be less than last year, but the home production is probably rather larger than in 1899. Linseed remains dear, and with only 71,000 qrs. on passage against 267,000 qrs. on Sept. 22, 1899, the holders on spot have every warrant for a firm attitude. Cottonseed derives spot strength from a like source, only 3,745 tons being afloat as compared with 7,500 tons at this time last year.

THE BALTIC.

A cargo of No. 1 Californian wheat arrived on 14th inst. fetched 31s. 9d.; another arrived on the 20th made 32s. 6d. This indicates 9d. rise in six days. The proverbial difficulty of judging of a house from a single brick is, however, brought home to us by noting that a cargo of Walla Walla sold on Sept. 15 for 30s. 9d., and that a similar cargo made only 31s. on the 22nd. The rise in wheat cargoes since the 14th inst., then, is 3d. to 9d.; that is as near as we can get. Other sales of wheat cargoes during the period under notice have included Australian at 31s. 9d., fine Argentine at 31s. 3d., fine Azima Russian at 31s. 9d., and No. 2 winter red American at 29s. 6d per qr. The maize sales have been numerous, several American cargoes for October shipment being placed at 20s. 6d., one for Nov. at 20s., one for Dec. at 19s. 9d., and four for Jan. (new crop) at 18s. per qr A cargo of fine Russian has made 25s. 3d., but Argentine has been held above buyers' ideas. Barley has been quiet; 17s. 9d. has been accepted for a cargo of Persian just shipped. Oats have made 15s. for three cargoes of American, but Russian cargoes wait for buyers, though offered at 12s. 9d. prompt shipment. Other cargo sales include Argentine linseed at 50s. 9d., Calcutta linseed at 58s. 3d., Indian rapeseed (Cawnpore brown) at 44s. 9d., Calcutta poppyseed at 46s. 3d. French buckwheat at 28s., and best Smyrna dari at 25s. 6d.; all per qr.

The arrivals of grain and seed-laden vessels at ports-of-call for the week were 4 wheat (3 Oregon, 1 Rosario), 1 barley (San Francisco), 1 beans (Casablanca), 1 fenugreek seed (Casablanca); total, 7.

The sailings of grain and seed-laden vessels from ports-of-call for the week were 4 wheat (1 Antwerp, 1 Cardiff, 1 Hull, 1 Tyne Dock), 1 canaryseed (Bristol); total, 5.

Since January 1, 1900, the total arrivals have been 254 wheat, 13 wheat and barley, 1 wheat and pease, 6 flour, 10 maize, 1 maize and oats, 24 barley, 18 beans, 7 locust beans, 1 linseed, 3 canaryseed, 1 fenugreek seed, 5 valonea; total, 344.

Last year during the same time the arrivals were 228 wheat, 10 flour, 3 maize, 6 barley, 1 barley and beans, 1 rye, barley, and oats, 8 beans, 1 locust beans, 5 linseed, 5 canaryseed, and 7 valonea; total, 275.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The market to-day was firm, but dull for most imported descriptions of grain. New English wheat made 33s. for fine white. There is a demand for seed wheat at 36s. to 40s. per qr. for "pedigree" types. The American wheat samples, whether spring or winter, are held for 6d. more money, but it is seldom paid. Argentine is firm. New malting barley from North Norfolk commanded 34s. to 36s., and from Cambridgeshire 31s. to 34s. per qr. Russian at 20s. and Persian at 18s. 6d. had only a slow sale, while Californian at 27s. was neglected. Maize was firm on spot, but weak for future supply. Foreign oats were hard to place. New English oats were not very plentiful, 18s. to 19s. commanded the majority of samples. New Maple peas from Essex were in request at 37s. to 39s., according to sample. New rye at 27s. was a fair sale. Torrified barley had its buyers at 23s. 9d. to 24s. per qr.

THE FLOUR TRADE.

MARK LANE, Sept. 24th.

The sales of flour to-day were up to a full average, but there is very little speculation. London makes were firm at a slight advance on the ordinary qualities. Country flour, all English new crop, made 23., but a mixture with old crop at 23s. 6d. was preferred, and the best demand of all was for the "patent" mixtures, as they are somewhat inexactly called, of various high-class East Anglian firms, These houses can be relied upon to blend old and new English wheat wit ha justly-chosen percentage of the sort of foreign which best suits the local product. For such flour a special price is often paid, up to 27s. being obtained at Mark Lane to-day in more than one instance, though, speaking generally, 24s. to 26s. is quite as high a price as can be quoted. Hungarian flour to-day was the turn in sellers' favour. American flour was difficult to buy, as the agents here were advised to hold for a rise, which bakers resisted. American flour sales, so far as they were actually made, included "Gold Medal" at 27s. and "Sun" at 27s. 3d. Below these rather fancy prices were "Gilt Edge" at 20s. 6d., "Iron Duke" at a guinea, "Good Hue" at 23s., and Kansas "Dazzle" at 24s. 3d. and 24s. per sack. Whole meal was 6s. to 7s. per ton dearer, and 188s. to 190s. was demanded. But the germ meal was obtainable at 110s. to 112s. per ton.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—	Sept.	Oct.	Dec.	March.
	s. d.	s. d.	s. d.	s. d.
Sept. 17 noon	6 7 .. 6 8	.. 6 9	.. —	—
4 p.m.	6 8 .. 6 9	.. 6 10	.. 7	0
Sept. 18 noon	6 8 .. 6 9	.. 6 10	.. 7	0
4 p.m.	6 8 .. 6 9	.. 6 10	.. 7	0
Sept. 19 noon	6 8 .. 6 9	.. 6 10	.. 7	0
4 p.m.	6 9 .. 6 9	.. 6 11	.. 7	0
Sept. 20 noon	6 9 .. 6 9	.. 6 11	.. 7	1
4 p.m.	6 10 .. 6 10	.. 6 11	.. 7	1
Sept. 21 noon	6 10 .. 6 10	.. 6 11	.. 7	1
4 p.m.	6 10 .. 6 10	.. 6 11	.. 7	1
Sept. 22 noon	6 10 .. 6 10	.. 6 11	.. 7	1
To-day noon	6 10 .. 6 11	.. 7 0	.. 7	2

The sales of maize for future delivery include purchases for actual delivery within this month at 4s. 5d. per cental and at 3s. 11d. for speculative supply of new American in February. Thus the opinion of the forward market points to temporary scarcity of Indian corn to be followed by plenty.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

GRAIN AND FLOUR FACTORS' REPORTS.

Wheat: The demand is not active, but holders are very firm at 6d. advance on the week. Flour 6d. dearer. Maize and barley without alteration. Oats 6d. lower on the week. - W. P. Wood and Co., Mark Lane.

Flour.—A very firm trade at 9d. to 1s. over last week's prices.—T. S. Medill, Mark Lane.

The trade for milling offals remains unchanged from Monday last.—Richard Doggett, Mark Lane.

Arrivals are large both of wheat and flour. Wheat in steady demand and prices 6d. and 9d. higher. Flour 6d. per sack advance. Maize unchanged in value. Barley a slow sale at late prices. Oats with heavy arrivals are 3d. and 6d. cheaper. Coventry, Mark Lane.

We have few buyers at to-day's market. Red clover seed is still in demand for export and very firm. Alsike is also strong. White clover and trefoil are steady. Italian and perennial rye grasses tend upwards. For winter tares the demand is disappointing and the orders for trifolium are small. Birdseeds quiet. Mustard and rape are very firm. Blue peas tend upwards.—John Picard and Co., Mark Lane.

Offals: The advanced quotations for bran are somewhat checking sales. Smaller qualities are still scarce. There is a moderate enquiry for pollard; prices rather dearer.—Greenhill Brothers, Belfast, September 22.

Flour: The amount of business put through this week has only been limited by sellers asking a further advance. Mill prices now prevent purchases for shipment. Grain: The supply of Indian corn on spot and afloat to this market is very small, and the demand being good, buyers are obliged to pay very full prices. Oats do not participate in the general improvement in values. Scotch and Irish oats are cheaper, and foreign oats are also in buyers' favour. Canadian pease are 3d. up. Beans are unchanged. Of barley there is none on spot. Mill stuffs: Bran and thirds are unchanged.—McKinnon and McDonald, Glasgow, Sept. 22.

Wheat a fair consumptive trade all round. Spring occasionally ½d, white ½d. to 1d. per cental dearer. Flour a fair trade. American qualities generally 6d. to 1s. dearer per sack. Maize meets with a fair consumptive demand at ½d. per cental less than Tuesday for mixed American. European and Plate kinds have a fair inquiry at last market day's figures. Barley has an improved inquiry, and a fair trade has transpired at unchanged values. Feeding firm, with a good demand. Beans are firm with a moderate trade. Peas steady with a small trade. Oats are firm, with a better inquiry for English; foreign quiet and only a small demand. Oatmeal firm, inactive. Oilcake firm, with only a moderate inquiry, owing to the recent advance.—Ross T. Smyth, Liverpool, September 22.

THE BALTIC, Monday, 1 p.m.

State of Trade.

Holders are firm for wheat cargoes, American are held for 3d. rise from Saturday. Maize cargoes, on the other hand, are not quite so strong as on the 22nd. Barley is neglected, but oats are selling fairly well, though the prices both for American and Russian cargoes must be accounted low.

Business Done.

Wheat.—Californian, 32s 6d, arrived; Argentine, 30s, new crop, Jan. shipment; Manitoba, 31s 9d, Oct. shipment; Northern Spring, 31s 3d, Oct. shipment; best Duluth, 32s 3d, Oct. shipment; Odessa Ghirka, 32s, Oct. shipment; Fine Azima, 32s 6d, Oct. shipment; Australian, 31s 9d, due.

Maize.—Argentine, 21s 9d, on passage; Odessa, 26s, on passage; American, 20s 6d, Oct. shipment; American, 18s 9d, December shipment.

Barley.—Persian, 17s 6d, October shipment.

Oats.—White Libau, 13s, October shipment; Vologda, 13s 6d, October shipment; American white clipped, 16s, October shipment; American mixed clipped, 14s, October shipment; No. 1 Canadian, 15s 6d, October shipment; No. 2 Canadian, 15s, October shipment.

Beans.—Smyrna, 27s 9d, on passage.

Dari.—Persian, 22s 6d, October shipment.

Linseed.—Argentine, 56s, on passage.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that samples of new American red cloverseed are now coming to hand, but the prices asked for same appear high. Some English trefoil has been changing hands at long figures. There is no quotable change in either alsyke or white cloverseed. Full rates, meantime, are demanded for perennial and Italian ryegrasses. The sale for trifolium, tares, and rye has of late, owing to the lack of rain, been meagre. As regards mustard and rapeseed, the market keeps firm. Blue peas and haricot beans still favour holders. Canaryseed remains dull. The Liverpool imports of this article for the year ending August 31, 1900, were only 8,000 bags, against 20,300 bags, for the corresponding previous twelve months. The total stocks in Liverpool are to-day only 7,843 bags.

Lambs	5 4 .. 5 10	.. 6 4	

Milch cows, per head, £11 to £21 10s.

British arrivals include as follows:—Scotland, —; Eastern Counties, 13; Midland, Home and Western Counties, 1,297; Devon, 40; Ireland, 120.

We note to-day a decrease in the beast market of 520 head due to fewer arrivals from the Midland Counties and Ireland. Prime quality beasts made late rates, other grades were slow of sale at less money. Fat bullocking cows and bulls were in less demand and consequently ended in prices. Amongst the Irish arrivals were thirty-six yearling stores, which were quoted at from £6 1s to £7 per head.

The following are top quotations per 8lb. (sinking the offal):—

	To-day	Sept. 25th, 1899.
Devons	4s 8d to 4s 9d	— to —
Herefords	4s 8d to 4s 9d	4s 10d to 4s 10d
Runts	4s 6d to 4s 9d	4s 4d to 4s 6d
Lincolns	4s 8d to 4s 9d	4s 10d to 4s 10d
Irish	4s 2d to 4s 6d	4s 2d to 4s 4d
Fat cows	3s 6d to 4s 8d	3s 4d to 3s 6d

In the sheep market there was a decrease compared with Monday last. Trade for both wethers and ewes was slow, the latter making 2d per 8lb less money, the former maintaining late rates. A few choice lambs were on offer, and were soon disposed of at Thursday's higher rates. The supply included 270 Scotch, 2,250 Irish, and 680 from the Eastern counties.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.	Sept. 25th, 1899.
7½ to 8 stone Downs	5s 8d to 5s 10d	5s 6d to 5s 8d
9-stone ditto	5s 6d to 5s 8d	5s 4d to 5s 6d
10-stone half-breds	5s 4d to 5s 6d	5s 2d to 5s 4d
12-stone Lincoln	— to —	4s 10d to 5s 0d
10-stone Irish	5s 0d to 5s 2d	4s 8d to 4s 10d
10-stone Down ewes	4s 6d to 4s 8d	3s 10d to 4s 0d
11-stone half-bred ditto	3s 8d to 3s 10d	— to —
5-stone Down lambs	6s 2d to 6s 4d	5s 6d to 5s 8d
6-stone half-bred ditto	5s 8d to 5s 10d	5s 4d to 5s 6d

Calf trade nominal.

London Central, Monday.—Good supplies, trade very slow. Beef: Carcases, 3s 6d to 3s 8d; hindquarters, 4s 2d to 4s 6d; roastings, 5s to 5s 4d. Sheep: Ewes, 3s 6d to 3s 8d; wethers, 4s 4d to 4s 8d; hindquarters, ewe, 4s 4d to 4s 8d; wether, 5s 4d to 5s 8d. Pigs, large, 3s 2d to 3s 6d; small, 3s 8d to 4s.

St. Ives (Hunts), Monday.—Beasts 721, sheep and lambs 2,010, pigs 423. Beef, 7s 3d to 8s 3d; mutton, 7s to 9s 11d; pork, 6s to 7s 3d. Fat cattle good demand, stores fair. Fat and store sheep good demand. Fat and store pigs fair. Milch cows fair show and trade, prices £14 to £22.

FOREIGN CATTLE.

Deptford, Monday.—Beasts, 327. To-day's supply, compared with Monday last, showed a decrease of 817, and consisted of consignments from the United States. Owing to the small number on offer, there was but slight competition, consequently trade was on a slow and dragging nature, the tendency in regard to value being fully 1d. per 8lb. in favour of the buyer. The best on offer to dress about 720lb. made from 4s to 4s 1d per 8lb. (offal given in). No sheep on the market. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts, 958; 4s 4d per 8lb. Sheep, 1,370; 3s 8d to 3s 10d per 8lb.

Liverpool, Monday.—Trade slow for cattle, and prices considerably lower for all classes. A slow demand for sheep at prices about the same as last week. Quotations: Beef, 6½d to 4¾d per lb; mutton, 8d. to 5½d per lb. At market: 1,356 cattle and 8,382 sheep.

FEEDING STUFFS.

London, Monday.—The linseed cake market is very firm, but demand is poor. Decorticated cotton cake and meal have an upward tendency. Cotton cake, very firm. Linseed, 6d dearer.

English linseed cake	£8	5	0	to	8 10	0 ex mill
American Calcutta linseed cake	None			to	—	ex quay
American Western linseed cake	7	17	6	to	—	ex quay
Russian oil cake	7	17	6	to	8 5	ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 p.c. oil)	6	5	0			on rail Liverpool
Decorticated cotton cake	6	17	6	to	7 2	6 ex quay
Decorticated cotton meal	—				6 12	6 ex quay
London made cotton cake (best)	5	0	0	to	5 2	6 ex mill
Egyptian cotton cake (in bags)	—				—	ex quay
Burton desiccated ale grains (bags included)	4	10	0			on rail, Burton
Rangoon Rice Meal	4	12	6	to	4 15	0 ex warehouse
Russian linseed in bulk, per 416lbs	2	17	0	to	—	ex warehouse
Calcutta linseed in bags, per 410 lbs	2	18	0	to	—	ex warehouse

—Robt. and John Hewetson.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough Highstreet, London, S.E., report: There is rather more trade doing, but growers are exceedingly loth to offer hops on the present basis of prices. Now that picking is practically over it is proved that the estimates of the growth made before picking commenced have not been reached.

PROVISIONS.

London, Monday.—The arrivals from Ireland for the past forty-eight were [illegible] and from foreign ports 17,087 boxes butter. The home trade was steady at, with a quiet demand, but arrivals cleared fairly well as they came along at unchanged prices. Canadian supplies were somewhat smaller than previous week. The market closed quiet but steady. Prime salted Irish [illegible] Danish [illegible] 92s to 94s. Canadian, 88s to 90s. Irish [illegible] Danish 106s to 112s. Irish [illegible] Canadian, 98s to 100s. Bacon was a moderate inquiry at somewhat improved prices for American. Irish, 44s to 45s. Canadian, 43s to 44s 6d.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

At Islington on the chief market day of the week there was a larger supply in the beast market, due to larger arrivals from the Midland counties and from Ireland, included in the latter being 150 stores, for which there was a very slack demand at following quotations:—Yearlings, £6 10s. to £7 per head; two years old, £8 to £9; three years old, £12 to £13. For fat beasts of both prime and second quality trade was of a decidedly slower nature, sales having to be more or less forced, and rates lowered by fully 2d. per 8lbs., at which reduction a clearance could not be made. Fat bulls on that day sold readily at higher prices; but on Thursday rates were lower, fat butchering cows, meeting with less inquiry, were slower of sale, and consequently favoured the buyer. At Deptford there was a larger supply, Monday's transactions being governed by last week's quotations, whereas on Thursday not only was trade slower, but less money had to be accepted to effect sales, especially as regards ranche cattle, several of which remained unsold last week. The total number on sale at both markets was 6,900 (previous week 5,570), consisting of 1,905 British, the remainder consisting of shipments from the United States and Canada, chiefly the former. The following were the top quotations paid per 8lb., sinking the offal:—90-stone Herefords, 4s. 10d.; 80-stone Devons, 4s. 10d.; 90-stone runts, 4s. 9d. to 4s. 10d.; 80-stone Highland Scots, 4s. 8d. to 4s. 9d.; 100-stone Lincolns, 4s. 4d.; 110-stone ditto, 4s. 2d.; 90-stone Irish, 4s. 6d.; 95-stone Waterfords, 4s. 4d.; 90-stone States, 4s. 4d. to 4s. 6d.; 85-stone Canadians, 3s. 10d. to 4s. 2d.; ranche ditto, 3s. 6d. to 3s. 8d.; 90-stone fat cows, 3s. 8d. to 3s. 10d.; 100-stone fat bulls, 3s. 6d. to 3s. 8d. The sheep trade chiefly confined to the Islington market, very few being on sale at Deptford, was dull and dragging at a decline of 2d. per 8lb. for both wethers and ewes, the same remark applying to lambs on Monday, which, however, on Thursday sold quickly at an advance of 4d. per 8lb.; the total number penned was 10,910, of which 10,420 were British. Best pens made per 8lb. as follows, sinking the offal:—7½ to 8 stone Downs, 5s. 10d.; 9-stone ditto, 5s. 8d.; 8-stone Scotch, 5s. 10d.; 10-stone Downs, 5s. 6d. to 5s. 8d.; 10-stone halfbreds, 5s. 4d. to 5s. 6d.; 11-stone ditto, 5s. 2d.; 10-stone Irish, 5s. 2d.; 10-stone Down ewes, 4s. 2d.; 11-stone halfbred ditto, 3s. 10d.; 8 to 8½-stone Canadians, 4s.; 5-stone fat Down lambs, 6s. on Monday and 6s. 4d. on Thursday; 6-stone halfbred lambs, 5s. 6d. and 5s. 10d. The calf supply was very short, only forty being on sale, and for this small number trade was dull, the best on offer were quoted at from 5s. 6d. to 5s. 8d. per 8lb.

Trade in the West.

The want of rain is occasioning a shortage of pasture keep, and affecting the roots, considerable breadths of which in certain districts are showing signs of mildew. If this continues it must seriously affect prices of stock. So far, however, the sheep trade is unusually brisk. Good class ewes now make 42s. up to 50s. for the younger ages, and older drafts 35s. to 40s. In many districts very fresh wether lambs are in much demand at high rates for finishing off, and there is an equally good inquiry for working lambs in those districts where keep still continues plentiful. Barreners of a good stamp also sell well, as also do milch beasts, prices of which are very firm. Fat stock prices are well maintained. Best beef, 11s. to 12s.; seconds, 10s. to 10s. 6d.; best mutton, 8½d.; seconds, 7½d.; lamb, 9d. to 10d.

Trade in Ireland.

With a smaller market and a better all-round inquiry, prices were firmer and more uniform than last week. The stiffening of rates was particularly noticeable on prime bullocks and choice heifers for the London and Scotch markets, and the drop of last Thursday was practically recovered. Secondary and rough cattle also met with a better demand, prices being firmer and sales much easier effected. Buyers tried hard to keep to the rates current last day, but sellers were firm, and a slight advance was eventually obtained. In the sheep department very little change could be noted from the previous day. Prime wether mutton, 6d. to 6¾d. per lb.; ewe, 4½d. to 5½d. per lb.; hoggets from 29s. to 52s., and lambs, 14s. to 32s. each. Veal of best quality in demand, and sold as high as 8s. per lb., but rough calves hard to move. There was a great scarcity of prime milch cattle, and any in evidence realised extreme rates, but second quality and rough cows were fully equal to the demand, and moved rather slowly at late rates. In the pig department, with moderate supply, sales were effected with freedom, and an early clearance made. Light bacon and shipping pigs sold at from 42s. to 44s., and coarse pigs down to 32s. per cwt.

LONDON.

London Central, Wednesday.—Fair supplies on offer, but trade quiet. Arrivals of beef include 20 tons Scotch, 400 Liverpool sides, 1,400 hindquarters, and 750 forequarters American refrigerated. Quotations: Beef: Scotch, short sides, 4s 4d to 4s 8d; long, 4s to 4s 2d; English, 3s 10d to 4s; American Deptford-killed, 3s 8d to 3s 10d; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 7d to 3s 10d; forequarters, 2s 6d to 2s 8d. Mutton: Scotch, 4s 4d to 4s 8d: wethers, 4s to 4s 4d; ewes, 3s 2d to 3s 4d. Veal: English and Dutch, 4s to 4s 4d. Pork, country, 4s to 4s 4d; Dutch, 3s 8d to 3s 10d per 8lb.

London Central, Friday.—Better demand for fair supplies on offer. Arrivals of beef include 60 tons Scotch, 600 Liverpool sides, 3,500 hindquarters, and 3,000 forequarters American refrigerated. Quotations: Beef, Scotch, short sides, 4s 4d to 4s 8d; long, 4s to 4s 2d; English, 3s 10d to 4s 2d; American refrigerated hindquarters, 3s 8d to 4s; forequarters, 2s 6d to 2s 9d; New Zealand hindquarters, 3s to 3s 2d; forequarters, 2s 3d to 2s 4d. Mutton: Scotch, 4s 6d to 4s 8d; wethers, 4s 2d to 4s 4d; ewes, 3s 4d; Dutch, 3s 8d to 4s; Wellington, 2s 5d to 2s 6d; Canterbury, 2s 6d to 2s 8d. Veal: English and Dutch, 4s to 4s 4d. Pork: Country, 4s to 4s 4d; Dutch, 3s 8d to 4s per 8lb.

Islington, Thursday.—Only small supply of beasts, chiefly fat bulls and rough descriptions, which met quiet demand. Sheep supplies small, but demand for both wethers and ewes slow, at about last Monday's decline. 7½ to 8-stone Down wethers, 5s 8d to 5s 10d; 9-stone ditto, 5s 6d to 5s 8d; 10-stone halfbreds, 5s 4d to 5s 6d; 10-stone Down ewes, 4s to 4s 2d; 11-stone halfbreds, 3s 8d to 3s 10d. Lambs moved very slowly. 5-stone fat Downs, 5s 10d to 6s. Calves slow of sale. Top price, 5s 6d per 8lb to sink the offal. Total supplies:—60 beasts, 1,680 sheep and lambs, 35 calves, 80 pigs, and 5 milch cows.

COUNTRY.

Ashford, Tuesday.—Trade was dull all round in consequence of the hot weather. Best beef did not exceed 12s per score, and a good many prime animals went at 11s 6d. Inferior beasts made 10s to 11s, and cows 8s to 9s. Mutton met with a slow demand at prices nominally the same as a week ago. Veal in the midst of the general depression was selling at good prices, best calves going as high as 5s 8d per stone. Pigs were irregular, but not cheaper on the whole; a good roaster was worth about 6d per lb.

Basingstoke, Wednesday.—At Raynbird and Sons' sale yard there was a full attendance of buyers to meet a supply of 40 fat beasts, 85 calves, 660 fat sheep and lambs and store sheep, 227 pigs, and 61 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £13 10s to £21; fat calves, 80s to £5 10s; smaller, 20s to 47s 6d; fat wethers, 40s 6d to 60s; ewes 26s 6d to 38s 6d; fat lambs, 25s to 48s 6d; fat hogs, 65s to 75s; porkers, 42s to 54s; small, 26s to 38s; store pigs, up to 23s 6d; dairy cows, up to £22, etc. The greater part of the supply of fat beasts was of second class quality, for which the trade was slow with lower prices. Best quality beasts of moderate weights are wanted and sell readily at full rates. Shorthorn steers made up to £19; heifers, £16 10s; cows, £15 5s: young Devon steers, up to £19, etc., etc. With a good show of sheep and lambs, prices were maintained for the best lots, a slower trade for old ewes and inferior fat sheep. Store sheep and lambs are wanted. Hants down wethers and young ewes made 48s, 46s, 45s 6d, 45s, 43s, 47s 6d, 44s 6d, 56s, 60s, 58s, 46s 6d, 55s, 54s 6d, 40s, 44s, 54s, 51s 6d, 45s; 9-months old wethers and ewes, 45s. 42s 6d, 35s, 47s, 46s, 48s 6d, 48s, 38s, 43s 6d, 36s, 43s, 31s, 43s, 38s; Southdowns, 35s 6d; 3-months old sucking lambs, 25s, 34s 6d, 32s 6d, 25s 6d, 30s. Old ewes, 37s, 36s 6d, 37s 6d, 33s 6d, 35s, 36s 6d, 32s, 38s 6d. Rams, 44s, 40s, 47s, 57s. Southdown ewes, 37s. Cheviot lambs, 28s 6d; Cheviot wethers, 33s. Hants down store lambs, 34s 6d to 38s 6d. With an average entry of dairy cattle, last week's prices for the best lots were maintained. Store cattle are a short supply and showed a better enquiry. Fat calves met a brisk trade, and a trifle more money. Fat porkers sold readily at late rates. Store pigs also met a better enquiry. Ruling values: Prime quality Devon beasts, 7d to 7½d; ditto Shorthorn ditto, 6d to 6¾d; bulls, cows, and inferior sheep, 5d to 6d per lb.; best quality sheep, 8½d to 9d; second ditto, 7½d to 8d; old ewes, rams, and inferior sheep, 6d to 7d; choice fat sucking lambs, 8½d to 9d per lb.; fat calves, 6d to 9d per lb; fat porkers up to 10s 6d score.

Boston, Wednesday.—A small show of cattle, but a good show of sheep. Best beef, 7s 6d to 8s; cow beef, 6s 9d to 7s per stone; heifers, £16 to £18; in-calvers, £18 to £20; calves, 55s to 60s; wether mutton, 7¾d to 8d; ewe mutton, 5½d to 6d per lb; store lambs, 28s to 32s; shearlings, 44s to 50s; fat lambs, 34s to 38s each.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2¼ in. and under	8s 6d
Under 10 sc 10 lbs	Not exceeding 2¼ in.	8s 0d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	7s 3d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 674; sheep, 272; pigs, 437; horses, 11. Beef, 7s to 8s per stone; mutton, 4s 4d to 5s 8d; pork, 5s 6d to 7s. A few more lots of store beasts, but trade was not brisk. Fat beasts, a fair trade all round at late rates. Fat sheep not so good as last week. Stores a much larger show; some fine lots lambs and ewes trade slow. Fat pigs a brisk trade at late rates. Stores a fair trade all round.

Canterbury, Saturday.—There was a considerable supply of sheep, but not quite so many lambs. Old sheep ranged from 20s to 32s; best breeding ewes made up to 36s; wether tegs, 32s to 34s; lambs, 13s to 16s; and for the best pens, 20s per head. Some Irish calves were shown, but there was little inquiry. Trade was slow all round.

Carlisle, Saturday.—The supply of Irish store stock was again a good one, consisting of over 400 heifers of a good type for wintering purposes. The attendance of buyers was about the average, and the recent good demand was maintained. Small beasts made £7 10s to £10 10s, and the best specimens realised as much as £17 10s. Young pigs a fair show; quiet sale at 24s to 28s.

Chichester, Wednesday.—Small supply of fat stock, and business was done at prices which showed a somewhat rising tendency. Store sheep were plentiful, but there was not such a brisk demand as on the last occasion, although prices on the whole were well maintained. The attendance was up to the average.

Dorchester, Saturday.—A heavy supply of beef. Heifers and calves made £16 to £19; fat steers, £17 to £21; fat heifers, £14 to £18; cows and calves, £9 to £13; barreners, £8 10s to £12. Moderate offer of mutton, wethers making 41s to 48s; Down ewes, 38s to 42s; lambs, 22s to 30s.

Dublin, Thursday.—Considerably more animation prevailed in the beef market, due to the presence of more buyers. Best finished cattle were perhaps easier to sell at slightly higher prices, but rough and unfinished sorts, although in better demand, cannot be quoted higher. Slow dragging trade for sheep at prices favouring sellers, some middling and inferior lots remaining unsold. Beef, first class, 30s to 34s per cwt; second class, 26s to 29s per cwt. Mutton, 5d to 7d per lb. Lambs out of season.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Average supplies maintained late currencies. Best beef, 38s per live cwt; horned bullocks, to £20; polled heifers, to £13; polled bullocks, to £15; Highland bullocks, to £15; Galloway bullocks, to £17; Galloway heifers, to £15; calving cows, to £16.

Driffield, Wednesday.—A light show of beef, which made 7s to 7s 6d per stone. A good number of sheep were on offer: shearlings, 7d to 7½d; ewes, to 6d; lambs 8d; veal, 7d to 8d per lb.

Edinburgh, Wednesday.—Best class of sheep met a good trade. Half-breds made 30s to 41s; Cheviot hogs, 30s to 37s; grey-faces, 35s; Shorthorn bullocks, £13 10s to £14 5s. Best Shorthorn cows were in good demand, making to £24 15s; Ayrshire, £17 to £19.

Glasgow Wednesday.—Prices a shade dearer. Top Scotch scarce. Dealers maintained that the show was the poorest of the season. Scotch cattle, 66s to 68s; Irish, 60s to 62s per cwt. Top mutton, 8¾d to 8¼d; secondary, 7¾d to 7¾d per lb. Good lambs scarce at 8¼d to 9d per lb. Milder weather injured the dead meat trade; best Scotch beef, 6d to 6¼d; States, 5¾d to 5¾d per lb.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 411, calves 44, sheep and lambs 5,304, pigs (fat and sows) 7, sucking pigs 21, pigs (stores, not more than ten) 137, pigs (stores, more than ten) 113, horses 1, colts 1. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6¾d to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 9½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robt. Bond and Sons report fat cattle were short in numbers, and all the best descriptions sold well at the rates current last week; £24 was the highest price obtained. Fat lambs were in request, choice Suffolks making up to 57s. The fat sheep pens were well filled. Trade for shearlings was dull; but fat ewes sold well. Several lots of ewes and young lambs were offered, and changed hands freely at the improved prices recently current. Calves were numerous, those for weaning making more money. Fat calves in demand, up to £4 17s 6d. Fat swine were well represented, and a brisk trade was experienced for all descriptions. Well-bred stores were also in request. This being the first autumn sale of grazing cattle, 140 stores and heifers were forwarded, which included several grand Highland Scots, and some forward lots of shorthorns. The attendance of buyers was large, and a capital trade was experienced for all animals in good condition, but for those that were poor biddings were slow, and good value for money was obtained. Eighteen shorthorn steers, about 20 months old, made from £12 5s to £11. Nineteen two and three-year-old Highland Scots, which had been caked during the summer, sold in three lots, made £13, £10 10s, and £7 17s 6d. Twenty-six shorthorn steers made from £8 5s to £7. Several cows were on offer, but the trade was not so good, and prices ruled lower. Numbers on sale—Beasts, 714; calves, 58; sheep, 1,272; swine, 1,852; horses, 30.

Leeds, Tuesday.—Cattle were offered in smaller numbers to-day—534 against 580 last week—and comprised a good assortment of home district, North of England, and Irish stock. There is not much improvement to note in the amount of business passing compared with last Tuesday. Buyers were again indifferently represented, and business generally ruled slow, the close of the market being exceptionally dull. There was a moderate demand for the very choicest heifers and bullocks, but other qualities were neglected. The primest lots of heifers and bullocks realised 6¾d. good beef made 6d to 6¼d, and cow and inferior beef 5d to 6d per lb. The entry of sheep was much smaller than last week—2,030, compared with 2,620. Business was very disappointing to sellers, all descriptions except the very choicest shearlings meeting with a poor market. Buyers were reluctant to invest, and sellers were firm in their demands, consequently the prices of last week were about maintained. Choice shearlings made 8¼d, large and heavy sheep 7d to 7¼d, and ewes and tups 5d to 6d per lb. Rather more calves were offered. Best veal 7d to 7¼d per lb. Small display of dairy cattle, and trade slow at slightly lower prices. Best milkers £15 to £20. Numbers at market—Cattle 534, sheep 2,030, calves 18.

Leicester, Saturday.—Very heavy supplies of stock in excellent condition. Trade rather slow, but prices firm. Milch cows made £18 to £24 per head; bullocks, £12 to £18. Sheep were a large supply, and sold freely at firm prices.

Lincoln, Tuesday.—Fairly good supply of beasts, and trade slow. Prime beef, 7s 6d to 8s; lower qualities, 6s 6d to 7s 6d per stone. Sheep about an average, and trade dull. Ewe mutton, 5¼d to 6d; wether ditto 7¼d to 8d; lamb, 8d to 8¼d per lb.

Lincoln, Friday.—Much better supply of milch and store beasts, but trade not brisk. Milch beasts, £14 to £20. Very little alteration in prices of store cattle. Breeding sheep made up to 56s; drape ewes, 20s to 30s; and lambs, 20s to 35s.

Newcastle, Tuesday.—Smaller supplies, prices firm, but unaltered. Numbers:—Cattle, 1,870; sheep and lambs, 774; pigs, 613; calves, 63. Prices (sinking offal):—Beef, 5s to 8s 3d; pork, 5s to 7s 6d per stone; mutton, 5d to 8d; lamb, 5¼d to 8¼d; veal, 6d to 9¼d per lb.

Newport (Mon.), Wednesday.—Average supply of stock and brisk trade. Beef (best), 6¾d to 7d per lb; beef (secondary quality), 6d to 6¼d; wethers (best), 7¼d; ewes, 6d to 6¼d; lamb, 8d; veal, 7d to 7¾d; pigs (porkers), 10s to 10s 3d per score.

Norwich, Saturday.—The supply of store cattle here to-day was unusually large; trade was quiet, and a complete clearance was not effected; prices remained at about their former level. Fat beasts, which were in good supply, made 7s 9d to 8s and 8s 3d per 14lb. Store sheep and lambs were in large supply; trade was quiet, and late rates were barely maintained; lambs were quoted at from 27s to 38s, and keeping shearlings at from 40s to 48s per head. Fat sheep made 8s 6d to 9s and 9s 6d per 14lb.

Nottingham, Wednesday.—Best beef, 7s 9d to 8s per stone; moderate beef, 7s to 7s 6d per stone; best mutton, 8d to 8¼d per lb; ewes, 6d per lb; lambs, 9d per lb; calves, 7¾d to 8d per lb.

Preston, Wednesday.—Full supplies in every department, and a fair attendance. Trade was rather slow, and prices for beef just easier. Beef, heifers and bullocks, 6d to 6¾d; cows and bulls, 5¾d to 5¾d; mutton hoggs, 7¾d to 7¾d; tups and ewes, 5¾d to 6¾d; Cheviot wethers, 5¾d; lambs, 7¾d to 8¼d; calves, 6¾d to 8d. At market—210 cattle, 2,250 sheep, and 120 calves.

Salford, Tuesday.—There was a smaller supply of both cattle and sheep. Cattle experienced a moderately good demand, but prices were no better. There was a fair demand for sheep, but trade ruled slow and prices were against the seller. The lamb trade was also slow and prices lower. About the same number of calves on offer as last Tuesday, and trade slow, prices having a downward tendency. Quotations:—Cattle, 5¾d to 6¾d; sheep, 6d to 8d; lambs, 6¾d to 8¼d; calves, 5¾d to 7¾d per lb. At market—Cattle, 2,454; sheep and lambs, 11,065; calves, 124.

Sheffield, Tuesday.—A very small show of milch beasts. The best lots were sold from £18 to £23; secondary, £13 to £16.

Spalding Tuesday.—There was a good show of cattle; best fat beasts, 28s to 24s per head; good useful stores, £16 to £18; beef, 8s per stone. In the sheep market a little less money was made, but lambs sold well, and mutton made 7¾d to 8d per lb.

Stockton Wednesday.—There were on offer 221 cattle, 446 sheep, 160 lambs, and 261 pigs. Best cattle was an average show, at 8s and 8s 3d; rougher kinds, 7s and 7s 6d per stone; lambs, 8¼d; young sheep, 8d; ewes, 7d; tups, 5d per lb.

Taunton, Saturday.—Fair supply; moderate attendance. Business somewhat dull.

Thame, Tuesday.—The market was well supplied with stock of all descriptions, but the trade, with the exception of the best quality, was rather slow. Weaning calves showed a great improvement in prices, and met with a keen competition, several Norfolk buyers being present. Mr. Bond's sale com-

prised no less than 131 fat beasts, 15 store heifers and down calvers, 857 fat sheep and stores, 88 fat and weaning calves, 117 fat and store pigs, and 2 horses. Fat bullocks made £17 to £20; fat heifers, £14 to £19 10s; two-year-old heifers, £8 to £10 each; fat wethers, 43s to 57s 6d; fat ewes, 38s to 50s; fat lambs, 29s to 37s 6d; store lambs, 17s to 35s; fat calves, £3 to £4 17s; cow calves, 28s to 69s; bull calves, 18s to 70s; fat pigs, 9s per score. Stores a better trade.

Wakefield, Wednesday.—Quiet trade all round at about last week's rates. Best beef, 6½d per lb; other kinds, 5d to 6½d; lambs, 8½d to 9d: small sheep, 7½d to 8d; ewes and tups, 5d to 6d. Numbers penned:—Fat beasts, 1,432; sheep and lambs, 3,137.

Wolverhampton, Wednesday.—Beasts a moderate supply, slow trade. Sheep and lambs fair supply, quiet demand. Calves small supply, fair demand for best. A large supply of milking cows and fair demand. Beef, 5½d to 7d per lb; mutton, 6½d to 8½d per lb; lamb, 7½d to 8½d per lb; veal, 7½d to 8d per lb. Bacon pigs, 9s 3d to 9s 6d per score; porkets, 9s 6d to 10s per score; sows, 7s to 7s 6d per score.

Worcester, Saturday.—Beef was in fair demand at steady rates. Wether mutton firm; ewe mutton and lamb favoured buyers. Best beef, 7d; inferior, 6d; wether mutton, 8½d; ewes, 7d; veal, 7½d per lb; pork pigs, 10s; bacon, 9s per score.

Worksop, Wednesday.—A full market, and good attendance, prices showing little variation from last week. Best beef, 7s 6d to 8s; secondary, 6s 6d to 7s per stone; best mutton, 7½d to 8½d; secondary, 5½d to 6d per lb.

FOREIGN.

Deptford, Wednesday.—Beast entries totalled 1,005 head, 64 more than shown on Wednesday last, and comprised 723 United States and 282 Canadian. Trade was extremely dull, and even at easy prices, a good many were left unsold. The former quoted 4s 2d to 4s 4d; best of the latter, 3s 10d, with ranch 3s 6d to 3s 8d per 8lb to sink the offal. No sheep offered.

FEEDING STUFFS.

London, Thursday.—Linseed.—Small shipments and a fair demand have caused prices to advance considerably. Calcutta spot London 58s, near 58s 3d; August-September and September-October, 58s 3d; April-June, 46s. Hull firm Calcutta April-June, 47s. Azov, Black Sea, September-October, sold at 56s; October-November, 55s 9d paid. Duluth, September-November 54s 6d. La Plata, December-January 51s 3d; January-February, 50s. To the Continent Bombay is quoted March-May, sellers 51s. Calcutta April-June, new crop 47s 6d. La Plata December-January, 51s 6d; January-February, 50s. The imports into London for the week have been 21,587 qrs; and since 1st January, 548,029 against 517,382 qrs corresponding time last year. Linseed cakes continue firm. London made, £8 7s 6d. to £8 10s. Russian, £7 17s 6d ex dock. American Westerns at £7 17s 6d to £8. Cotton cakes are firm and advancing. London made, £5; Egyptian, £4 15s to £4 17s 6d. Rapeseed.—In good demand at advancing prices. To the Continent we quote, Yellow Guzerat, October-November, 49s; March-May, 45s 9d. Yellow Cawnpore, October-November, 48s 6d. March-May, 44s 6d. Brown Cawnpore October-November, 46s; March-May, 42s. Brown Calcutta, October-November sold at 45s. Ravison to Hull, September, 33s 6d. The imports into London for the week have been 1,076 qrs; and since 1st January 36,721 qrs. against 41,216 qrs corresponding time last year. Cottonseed has continued to advance in Alexandria causing prices to harden on this side. London, however, still continues very quiet. Warehouse seed has made £7 10s and is now held for £7 15s 6d. September quoted £7 12s 6d; October, £7 2s 6d; November-January, £6 17s 6d, Hull closes quieter. Spot and passage, £7 7s 6d; September, £7 12s 6d; October, £7; November-January, £6 12s 6d. Cargoes November, £7 2s 6d wanted.—THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday. — Linseed Cakes. — The trade generally has been less active during the past week, but with the prospect of short supplies and a further advance in c.i.f. quotations, values are firmly held up. Russians only offer in limited quantity at 1s. 3d. per ton advance. Americans for early arrival are good value. English remain in small production, and unchanged. Cotton cakes.—Stocks of foreign are nearly exhausted, while very little offers for shipment next month, and holders in consequence ask rather more money for landed parcels. Decorticated are scarce and dear at last week's full prices, but meal may still be bought at £6 10s. both in spot or forward positions. Maize germ meal.—The market is almost bare of stocks, and near at hand parcels of American fetch extreme prices, while English in warehouse is unchanged. Rice meal.—A further large business has been done in September to December parcels of Rangoon, while spot meal sells steadily and unchanged.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—The market to-day rules very firm, prices tending upwards for both home-grown and foreign, the former being 6d and the latter 3d to 6d per quarter higher than last Tuesday. Barley sells at irregular prices, owing to variation in quality of the new crop. Oats in moderate supply and unaltered in value. Beans maintain full prices. Flat maize, 3d to 6d per qr dearer, and round quite as dear as last week. Linseed.—The arrivals are 295 qrs from Harlingen, 1,883 qrs Kurrachee, 10,247 qrs Petersburg; total, 12,425 qrs. Linseed, during the last few days, has shown considerable activity, and prices have again moved upwards. Calcutta on the spot does not offer; the same applies to April-June new crop. Black Sea 56s 9d to 57s has been paid for seed afloat and shipping, September-October 56s.; October-November 55s 3d the value, sellers now asking 55s 6d. Petersburg, July-August, 55s the value. Riga and Libau, monthly shipments October-March, business done at prices ranging from 51s to 51s 6d; 52s now asked. River Plate, December-January, has been sold at 50s 6d; the value now being 51s; January-February 49s 6d now asked. Cottonseed.—Continued firmness in this article and higher prices again paid. Business done spot and passage at £7 6s 3d, which asked for old crop September. New, first half October £7 2s 6d, and £7 paid October. Good sales have transpired in November-January at up to £6 16s, the market being rather easier to-day and business done at £6 13s 9d. Oil seed cakes.—Linseed cakes are 2s 6d dearer. Cotton cakes steadier. Hemp easier.—KEIGHLEY MANSTED AND Co.

WATERLOO ROUND FEEDING CAKES, £6 17s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £9 2s. 6d. PER TON; WATERLOO ANGLO-SHAPE 97 PER CENT. PURE LINSEED CAKES, £9 0s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £5 7s 6d PER TON. ALL F.O.R. HULL.

HAY AND STRAW.

Whitechapel, Saturday.—Prices were unchanged. Best clover, 70s to 105s; inferior, 55s to 65s; per cwt.; pocket hay, 32s 6d; good ditto, 70s to 75s 6d; inferior ditto, 60s; mixture and sainfoin, 55s to 65s; and straw, 25s to 30s per load.

Bristol, Tuesday.—The prices quoted at to-day's market were:—Old clover hay, 75s to 80s per cwt.; old meadow do. 70s to 75s; new hay, 60s to 70s; and straw, 1[illegible]

FOREIGN HAY AND STRAW.

London, Saturday.—Supplies are again very moderate and a fair demand for hay and clover, but straw is quite quieter. We quote Canadian timothy and clover mixtures, 87s 6d; good Dutch clover, 82s 6d to 85s; good Dutch hay, 75s; common hay, 62s 6d to 65s; large bale French wheat straw, 48s; small bale French wheat straw, 45s; small bale French oat straw, 44s. All these prices are per ton, delivered by barge alongside.—FULLER AND PRENTIS, 9 and 10 Great Tower Street, E.C.

POTATOES.

Borough and Spitalfields, Saturday.—Arrivals this morning have been heavy, for which trade has been slow, but prices were steady. English: Beauty of Hebron, 3s 3d to 4s; Early Puritans, 3s 3d to 4s; Snowdrops, 3s 3d to 4s; Reading Giants, 2s 9d to 3s 3d; Professor Maerkers, 3s to 3s 6d; Up-to-Dates, 2s 9d to 3s 3d per cwt.

MANURES.

Liverpool, Friday.—With the approach of autumn the inquiries for basic slag increase, and a fair amount of business has transpired; particulars of the various tests are annexed. For other fertilisers there is practically no demand. Of fish guano a parcel is selling testing 9 per cent. ammonia and 13 per cent. phosphates at £5 10s to £5 12s 6d per ton. The market for all descriptions of feeding stuffs is strong, and latterly values of oil cakes, etc., have improved to the extent of 5s to 15s per ton, and at the advance a fair consumptive demand is experienced. Today's values are as subscribed. At auctions 1,323 bags Peruvian cotton cake, all faults, sold at £6 to £6 2s 6d, and 1,357 bags Pernambuco cotton cake meal at £6 10s per ton, b. th ex quay, old since then 550 bags Peruvian cottonseed cake have changed hands at £6 11s 3d to £6 15s per ton. Nitrate of soda, best quality, i.e., guaranteed 95 per cent., pure, in bags, £8 5s to £8 7s 6d per ton; East India bone meal, in bags, £4 5s to £4 7s 6d per ton; kainit, prime 23 per cent., in bags, £2 7s 6d to £2 10s per ton; linseed cake, American thin oblong, prime, in bags, £7 15s to £8 per ton; ditto, English, prime, in bulk, £8 12s 6d to £9 per ton; cottonseed cake, N.A., decorticated, prime, fairly soft, in bags, £6 15s to £7 per ton; ditto, English ditto, prime, very soft, in bags, £7 7s 6d to £7 10s per ton; ditto, English, undecorticated, prime, in bulk, £4 15s to £5 per ton; cottonseed (crushed) 20 to 25 per cent. oil, prime, in bags, £7 to £7 5s per ton; maize germ meal, English, prime, in bags, £5 10s to £5 12s 6d per ton; Indian meal, coarse to fine grinding, prime, in bulk, 12s to 12s 6d per 240lb; linseed, fine bold feeding, screened, in bags, £3 3s to £3 5s per qr of 416lb; N.A. cleverseed, new red, fair to good, in bags, £2 12s 6d to £2 18s per cwt; D.N.S. brand, superphosphate of lime, guaranteed, 25 to 27 sol., in bags, per ton; ditto, ditto, 30 to 31 sol., in bags, per ton; ditto, ditto, 35 to 36 sol., in bags, per ton, nominal; basic slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, £1 11s to £1 12s 6d per ton; ditto, ditto, 35 to 40 phos., in bags, £1 12s 9d to £1 14s per ton; basic slag, finest quality, guaranteed 38 to 45 phos., in bags, £1 16s to £1 17s 6d per ton, at the producing depots. H. JONES LANGAR AND Co.

Winsford (Cheshire), Saturday.—Current prices for salt at the works: Common white salt, 11s per ton; fine screened rock salt, 8s 6d per ton, for truck loads in bulk. THE SALT UNION, LTD.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended September 15, 1900, together with the quantities imported in the corresponding week of the previous year:—

Failing to notify Glanders.—At the Westminster Police Court, on Thursday, Frederick Johnson, a cab proprietor, of Odell Stables, Chapel Street, Chelsea, appeared, before Mr. Francis, to a summons under the Diseases of Animals Act, 1894, at the instance of the London County Council, for failing to notify to the police that he had a horse suffering from glanders. Mr. Collman, who prosecuted on behalf of the Council, said that on July 24th the defendant sold a bay mare for £6 to a cabman, who proposed using the animal for a four-wheeled cab. At the time sores and lumps were noticed, but they were disregarded. The next day the horse was harnessed and attached to a cab, but only went a few yards, and then fell down in the street. A veterinary surgeon was called, and he pronounced the animal suffering from glanders of some days' standing, and ordered it to be slaughtered. Mr. Ridler, veterinary surgeon and inspector under the Diseases of Animals Act, said the horse was undoubtedly glandered. There was a passage from [illegible] enlarged glands, and ulcers. In his opinion, had a veterinary surgeon been called in the day before the horse was sold [illegible] Free from disease, the horse would have been worth £10. The defendant called his veterinary surgeon, his saddler foreman, and other witnesses, who said there were no symptoms of glanders at the time the horse was sold. The defendant himself urged that it was not safe to [illegible] dered horse among thirty sound ones. The magistrate thought there was a good deal in this contention, and said he thought it would be sufficient if [illegible] the defendant to pay £2 2s. the costs of the proceedings.

LIVE STOCK.

OUR ILLUSTRATIONS.

The Southdown ram is the property of and was bred by Mr. C. R. W. Adeane, Babraham Hall, Cambridge. Our photograph was taken at the Royal Show at York, where this ram won first prize in the class for two-shear rams of its breed, and also carried off the Southdown Sheep Society's champion prize for the best Southdown ram.

The Shorthorn bull calf Macbeth, by Royal Star 71502—Countess of Groam 5th, was bred by the Right Hon. Lord Lovat, Beaufort Castle, Beauly, N.B., who exhibited him at the Birmingham Shorthorn Show, held in March. Here Macbeth won first prize in the class for bull calves over nine and under twelve months old, and at the subsequent sale was bought at 200gs. by Mr. Duthie, of Collynie.

The hunter gelding is a chestnut by Royal Meath, dam Rasheen, by Playactor, and is the property of and was bred by Mr. G. J. Ball, Moorside, Naul. At the recent show of the Royal Dublin Society this gelding was only third in its class, but it also won the Pembroke Challenge Cup, value 100gs., offered for the best animal in classes 13 to 21, bred in Ireland by the exhibitor, and continuously owned by him up to the time of entry.

STOCK AND SHOW NOTES

By Herdsman.

Messrs. William Cooper and Nephews, of Berkhamsted, have just made a deal in cattle through the cable, and have purchased 1,400 cattle for their Estancia in Paraguay at a cost of 19s. 3d. per head. No wonder that at this price their agent advised them to take advantage of the bargain.

At a meeting of the Council of the Yorkshire Agricultural Society last week it was stated that the total attendances at the Doncaster show were 20,193, whilst the average of the previous ten years were 60,458. The gross receipts from turnstile, season tickets, and grand stand were £1,466 6s., as against an average of £3,998 0s. 3d. for the previous ten years. The site was everything that could be desired, being one of the finest in the country, the Mayor of Doncaster and the local committee spared no effort to make the show a success, the weather was most favourable, yet the attendance was the least for over 30 years.

In the course of a short speech made at the luncheon prior to the sale of Mr. Mutton's Jersey herd at Plumpton on Wednesday, Mr. F. W. Le Brocq, of St. Heliers, said that breeders in the island of Jersey had had a very good season, thanks to a number of American gentlemen who had bought a lot of cattle at prices ranging from £50 to £200.

At the end of the present week Messrs. J. Thornton and Co. will dispose of two well-known herds of Shorthorn cattle. On Thursday the late Mr. Henry Wyatt's animals come under the hammer at Walton Grange, Aylesbury, and on Friday the sale will be at Wakehurst Place, Ardingly, Sussex, the herd being that of Sir T. William Boord, Bart. The Walton Grange herd was founded in 1876, and thanks to judicious breeding it has become a very high-class one. The cows are of large scale on short legs, with good shaped udders, the calves running with their dams in the celebrated Broughton pastures. The heifers are a very good lot, and there are a number of strong, good, robust bulls, fit for service. The animals are in excellent natural condition, having been grazed out most of the year through, and in consequence of the untimely death of the proprietor are to be sold without any reserve. Sir William Boord's herd has been kept especially for supplying the large quantity of milk and butter required on the estate, and with this object in view have been reared on skim milk, and kept in good hardy condition. With the exception of a few bulls at the Sussex Show the herd has not been exhibited.

Messrs. Thornton and Co. have also two important Shorthorn sales for next week. On the Wednesday they will sell a number of pure-bred dairy cattle, the property of Mr. Robert W. Hobbs, Kelmscott, Lechlade, Gloucestershire, and on the Friday the entire herd of Mr. William Atkinson, at Overthwaite, Milnthorpe, Westmorland. Mr. Hobbs's herd was established in 1873, and the chief bulls used have come from the famous Maiseyhampton herd, and to-day the Kelmscott herd consists of heavy milking cows, which supply a contract in connection with a great London dairy. Occasionally the animals have been exhibited at the Oxfordshire shows and prizes won in the milking classes. The young bulls have proved well and a demand has arisen for them. About a score are now offered for unreserved sale. They are mostly well grown, good fleshed yearlings, of a deep red or rich roan colour. The cows have mostly calved or are close at profit for winter dairying, and their capacious udders show their adaptability for dairy purposes.

The Overthwaite herd will be sold without reserve in consequence of Mr. Atkinson's increasing years and declining health. Overthwaite is a large grass farm in the Kendal district, near Milnthorpe Station on the London and North Western Railway, between Carnforth and Oxenholme Junctions, and has long been celebrated for its high class dairy Shorthorns, Mr. William Atkinson having been a well known dairy farmer, breeder, and judge for forty-eight years. His first occupation was at Selside, where he won the late Mr. Jonathan Rigg's silver cup for the best general stock in 1859. He afterwards removed to Burneside Hall, where his farm took one of the prizes given by the Royal Agricultural Society of England when its show was held at Carlisle in 1880. In 1884 he occupied Mr. Wakefield's farm at Overthwaite, where the herd has since been carried on and greatly improved. He has won the late Earl of Bective's ten-guinea prize for the best general stock every time the farm became eligible, viz., every fourth year since 1872, at the Kendal Agricultural Show, also Lord Bective's ten-guinea prize at the Burton and Milnthorpe Shows for the best stock in 1876, 1880, 1887, and 1891, and Lady Henry Bentinck's ten-guinea prize in 1895 and 1899. His system has been butter making, and calf rearing, the cows being sold off on their third calf to the Edinburgh and Yorkshire dairies. The herd is large and remarkably uniform. The feminine, nice, even character of the cows, is very striking. With the exception of four, the whole of the animals have been bred on the farm. The young stock are equally good, and the beautiful lot of yearling heifers show their careful breeding. The sale will commence after a twelve o'clock luncheon.

The Liverpool shipping trade is feeling keenly the recent order of the Argentine Republic prohibiting the importation of live stock after the 13th inst. Liverpool is the chief port for the shipment of valuable pedigree stock, special facilities being offered for this trade. Extensive business was done, and the restrictions will be a great blow to many English breeders of prize cattle, sheep, and pigs. It is feared the valuable cargoes now *en route* may have to be slaughtered.

Messrs. John Jones and Son, Dinarth Hall Pony Stud, Colwyn Bay, have sold to Mr. White, for exportation to Australia, two pure-bred Welsh brood mares; both are prize winners, and represent the best class of typical Welsh ponies. The sales during the month from the stud also include three Welsh prize ponies to Mr. Pringhorn, Germany, and ten ponies and cobs to various English centres

In the note concerning the Birmingham Fat Stock Show which appeared last week there was a slight error. It was stated that the ten guinea cup for the heaviest beast in the show would not be offered, and that three other money prizes had been substituted. This, however, is not the case, the three prizes being in addition to the cup.

The annual Shire Horse Show at Ashbourne, Derbyshire, takes place on Thursday this week, and on the following day Messrs. Sexton, Grimwade and Beck will hold a special sale of pedigree Shires in the show ground, the animals, which number eight-four, being the property of various exhibitors at the show. The sale will commence at eleven o'clock.

An American View of English Shows.

Americans would be surprised to see what a personal interest is taken in agriculture, and especially in the breeding of all kinds of farm stock, by the nobility and the political heads of the Government of England. From the Queen down they are found exhibiting their live stock at all the leading fairs in England, Ireland, and Scotland, and losing to some poor tenant farmer quite as often as they win; but losing a game never hurts an Englishman and never humiliates him. This year at the Royal the Prince of Wales competed with his royal mother in the Shorthorn classes; in some cases they won, in others they lost to their most humble subjects. These royal exhibitors make no display. Their animals occupy boxes no better in any way than the poorest tenant's, and they are sent into the ring to win or lose, asking no favours, expecting none, and receiving none, from society or judges. In horses, cattle, sheep, and swine it was a race between lords and farmers, dukes and breeders, squires and their tenants, the Queen of England and the Prince of Wales. But do you say you should not think the common tenant farmers could compete with the Queen and Prince, who can go out and buy the best? There is where you make a mistake. They could do so, but they are too good sportsmen to do a thing of that kind. They only exhibit animals that are bred or raised on their own farms. They may show a cow they bought as a calf at a public sale, or something of that sort, but that's all. They are in the game to win by the fairest kind of fair play. Not only is this true of the Queen and the Prince of Wales, but of the gentlemen of the nobility as well. Therefore they all meet on a common level, and the common tenant farmer usually comes out ahead. However, this year the Prince of Wales has been particularly fortunate in winning the three great races of England with a young horse of his own breeding, reared and trained on his own farm by his own servants, *i.e.*, the Oaks, the St. Leger, and the Derby. Although he has had a horse in these races every year, for I do not know how long, this was his year. A game, gentlemanly sportsman, he may never win again, but he will be in the game in the future, as in the past, to do his best.

It was a sight to see him at the Royal meeting this year at York, walking about a large enclosure, where possibly stood fifty farmers and shepherds holding as many rams for the Prince's inspection. As His Royal Highness, in plain dress and manner, walked down the line, stopping here and there to shake hands with some weather-beaten old farmer, with a kind word to a shepherd who was holding a ram while the Prince parted the fleece to examine the quality and length of staple, a "thank you, lad," to a shepherd boy who had his hands more than full trying to make a refractory ram show to the best advantage, a smile and a nod to a big, red-faced Scotchman, who, in his anxiety to display the wool of his favourite black-faces, forgot to remove his cap. Do you wonder that every Briton loves the Prince? It was a stirring sight at Cowes last year to see a hundred yachts dress ship to offer homage to the man who, cripple though he was, came out to honour the occasion with his presence; or, as at the Queen's Jubilee, surrounded by pomp and splendour that dazzled the world; or, again, at the great Naval Review, when twenty-five miles of battleships belched forth thunders of applause. But never did the Prince of Wales look so supremely great to me as on the day when he walked down the line of farmers and shepherds at the Royal Agricultural Show. At such a sight, every true Briton, sportsman and gentleman, takes off his hat, and says: "*He is a man!*"—F. S. Peer, in the *County Gentleman* (Albany, U.S.A.).

Iron Acton September Fair.—This fair was held on the 13th inst., and was very largely attended. This fair is chiefly noted for the supply of colts, but these were not so numerous as on former occasions, and good animals of this class were scarce. The highest price realised for sucking colts was for a cart colt by Mr. Alfred Anstey's horse Spark Harrod, which was sold by Mr. A. Willcox, of Oldbury-upon-Severn, to Mr. George Jones, of Badminton, at £30. Mr. Jones also secured another colt by Mr. Anstey's horse Bar Naught, for which £20 was paid. Several other sucking colts changed hands at prices ranging from £8 to £18 each. There were but few good two-year-old cart colts on offer, for which, in a few instances, as high as £40 was asked without finding purchasers. Some very fair animals changed hands at from £25 to £55 each. There were no really good horses in the fair, and the horse trade throughout must be termed very dull. A few store cattle were sent to the fair, trade in which was unaltered. A good average supply of sheep was penned, the same commanding a good sale, at prices fully maintaining late quotations. Messrs. George Nichols, Howes, Young, Alder, and Co.'s sale included a number of horses and colts, several pens of sheep, store ewes realising from 42s. to 46s. per head, and stock lambs from 26s to 30s

Fattening Bullocks without Roots.

Although the coming winter will not be one in which roots for live stock will be short, as they were last year, there are many farmers in the pastoral districts who do not grow roots at all, and they may be disposed to follow a plan of fattening bullocks without roots, pursued with great success last season by Mr. Duthie, of Mill of Manis, Dundee, who has described his experiment in the *Dundee Advertiser*. He bought ten black polled Irish bullocks on the 16th of October and fed them until the 29th of May upon undecorticated cotton cake, cotton-seed meal, maize meal, treacle, straw, and a little salt. Their average consumption of the concentrated foods was 12¾lb. per day each, and this was made up to from 40lb. to 50lb. per day with rough straw chaff, treacle water, and salt, the mixture being allowed to lie for a day before being used. Long straw was also supplied, but was not consumed to any considerable extent.

The quantities of concentrated foods consumed during the whole period of feeding were 20cwt. of cake, 41¾cwt. of cotton-seed meal, 169¼cwt. of maize meal, and 25cwt. of treacle; and the ten beasts made a live-weight increase of 36cwt. 3qr. 14lb. in 144 days, or the remarkably good daily gain of 2.13lb. per head. They were bought at £70, and sold at £171 5s., while their food, without valuing straw or salt, cost £67 14s. 5d. Deducting the cost of the animals and of the concentrated food from the return, and setting the manure against straw, salt, and attendance, a profit of £33 10s. 7d. was left, or £3 7s. a head.

It is stated that the beasts were turned out to grass for about half of each day in the first instance, but for how long is not stated; and no charge is made for the grass. That the animals were not of high quality is shown by the lowness of their cost price; but probably better-bred beasts, though they would have cost more, would have given a still better return for their food.

Mr. Duthie might have gone more into detail by stating the quantities of his ration consumed at different periods of the feeding process, as, no doubt, he gave the bullocks less at the start than towards the finish. The figures show that the average daily ration per head consisted of 11b. of cake, 2lb. of cotton seed meal, 8½lb. of maize meal, 1¼lb. of treacle, and about 30lb. of straw chaff. The animals consumed very little water, apart from that which was used to moisten the chaff and other food.

Sale of Jerseys and Berkshire Pigs at Plumpton.

The first of the two Jersey sales in Sussex last week was held at Mr. D. Mutton's farm at Plumpton, Sussex, on Wednesday, when a portion of his own herd and a few from Mr. Pope's, of Beresford Manor, were sold by Messrs. John Thornton and Co. Both herds have been well represented in the show ring, and the cattle were a useful, promising lot, and made fairly satisfactory prices. For the bulls there was very little demand. The twenty-nine head of cattle sold realised £429 19s. 6d. A number of well-bred Berkshire pigs from Mrs. Hepburn's herd at Cailey were also sold, and made from 1g. to 6gs. each, the average price of the twenty young pigs sold being over 50s. each.

We give below a sale list of the principal lots:—

Sow ..... Major Thurlow	3
Sow ..... Mr. S. Springate	3

Sale of Mr. J. Cooper's Shorthorns.

The old-established herd of pure-bred Shorthorn cattle belonging to Mr. John Cooper was disposed of by auction at Brook Hill, East Haddon, Northampton, on the 14th inst. by Messrs. John Thornton and Co. This herd having a well-deserved and wide reputation in the surrounding counties, there was a capital attendance of buyers, who bidded briskly, and the result of the sale—£1,519 7s. for fifty-seven head—was considered most satisfactory. The animals were very uniform, in nice condition, and were excellent milkers with well-shaped udders. Three of the best heifers were bought by Earl Spencer, who presided over the luncheon which preceded the sale. Below we give a complete list of the animals sold, together with the prices realised, purchasers, etc.

Sale of Aberdeen-Angus Cattle at Alford

On Wednesday Messrs. Macdonald, Fraser and Co. conducted an important sale at Wellhouse, Alford, where Mr. Littlejohn put his herd under the hammer, together with a draft of eighteen head from the herd of Mr. George Cran, Morlich. There was a large attendance of buyers from the Scottish centres and several from the north and south of England, and the demand was exceptionally good. One of the best figures was 75gs., which Mr. Bambridge, Newcastle, paid for the seven-year-old cow Mavis of Midmill, which at the Aberdeen Show this year won the medal as the best female in the class for those which had formerly gained highest honours. Mr. Basset, Devonshire, paid 33gs. for a four-year-old cow, Fairy Queen, descended from the noted herd of the late Mr. M'Combie, of Tillyfour. One of the most fancied females in the sale was a four-year-old cow, Molly of Morlich, a noted winner at the Kildrummy and Tarland shows, this being a handsome female of immense substance and cover of flesh, which fell to the offer of Mr. Kennedy, Doon Holme, Ayr, the price being 96gs., the top figure of the sale. Mr. Matheson, Shoertane Heriot, Midlothian, bought some of the best specimens in the ring at prices ranging from 31gs. to 41gs. Mr. Kennedy, Doon Hulme, in addition to the purchase mentioned, took out a promising three-year-old cow from the Morlich draft, Jemima 34th, at 42gs. Mr. Schroeter, Sussex, and Mr. Geddes, of Blairmore, paid 43gs. each for two of the best of the Morlich draft. Mr. Bambridge, Newcastle, bought the pick of the yearling heifers, Queen Bess of Wellhouse, which was champion of the Alford Show this year, the price in this case being 54gs.

The following are the averages for the two drafts:—Wellhouse—Sixteen cows, £34 6s. 4d.; seven two-year-old heifers, £28 12s.; nine yearling heifers, £20 18s. 6d.; nine heifer calves, £17 1s. 10d.; two bulls, £36 4s. 6d.; six bull calves, £17 17s. Forty-nine animals made an average of £25 19s., the total assets being £1,271 11s.

The Morlich draft, the following averages: Four cows, £32 10s.; seven two-year-old heifers, £35 11s.; four yearling heifers, £27 6s.; three heifer calves, £19 19s.—or for eighteen animals an average of £34 17s. 8d. and a total of £627 18s.

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

Strokestown Fair (co. Roscommon) took place on Monday. There was only a small supply, and for cattle the demand was slow, except for springers. There was a good demand for lambs and hoggets, but not so brisk for aged ewes, which were bought for breeding purposes. Prices:—Calves, first class, £3 10s. to £6; second class, £2 3s. 9d. to £5. Yearlings, first class, £9 to £9 15s.; second class, £6 to £8. Two-year-olds, first class, £13 to £13 10s.; second class, £9 to £11. Three-year-olds, first class, £15 10s.; second class, £12 9s. to £12 15s. Springers, first class, £18 to £20 10s.; second class, £13 10s. to £16. Lambs, first class, £1 10s. to £1 13s.; second class, £1 3s. to £1 8s. Hoggets, first class, £2 1s. to £2 5s.; second class, £1 15s. to £1 18s. Two-year-olds and upwards, first class, £2 to £2 2s.; second class, £1 15s. to £1 19s. Young pigs, eight to ten weeks old, first class, 21s. to 24s.; second class, 16s. to 19s. each.

Rathkeale Fair (co. Limerick), held on the same day, was also a small one, but a good demand prevailed all round. Prices:—Calves, first class, £4 17s. 6d. to £5; second class, £3 5s. to £4 15s.; third class, £2 10s. to £2 15s. Yearlings, first class, £8 3s. 10d. to £9; second class, £6 10s. to £8; third class, £4 to £5 10s. Two-year-olds, first class, £11 7s. 6d. to £14; second class, £8 15s. to £11; third class, £7 5s. to £8 2s. 6d. Springers, first class, £15 to £18; second class, £11 10s. to £14; third class, £8 to £9 10s. Lambs, first class, £1 5s. to £1 11s.; second class, £1 to £1 4s. Hoggets, second class, £1 15s. to £1 17s. Young pigs, eight to ten weeks old, sold at from 18s. to 22s. each.

The fair at Skibbereen, co. Cork, on Monday, was a small one, and a good demand was experienced. Prices:—Calves, second class, £3 15s. to £4 1s. 10d.; third class, £3 to £3 10s. Yearlings, second class, £6 to £6 8s. 9d.; third class, £3 10s. to £5. Two-year-olds, second class, £9 to £10; third class, £7 10s. to £8. Three-year-olds, third class, £8 10s. to £8 12s. 6d. Springers, first class, £16 7s. 6d. to £17 10s.; second class, £12 15s. to £14; third class, £8 15s. to £10. Lambs, second class, £1 2s. to £1 2s. 6d.; third class, 16s. 6d. to 17s. Hoggets, second class, £1 13s. 4d. to £2; third class, £1 10s. to £1 12s.

The fair at Kinsale, co. Cork, on Wednesday, was larger than usual, and the cattle shown were of better quality. There was a brisk demand, and all the animals were sold. Prices:—Calves, second class, £3 17s. 6d. to £4 2s. 6d.; third class, £3 to £3 10s. Yearlings, second class, £6 to £6 17s. 6d.; third class, £4 2s. 6d. to £4 17s. 6d. Two-year-olds, first class, £11 7s. 6d. to £12 12s. 6d.; second class, £8 10s. to £9 5s.; third class, £7 10s. to £8. Springers, second class, £13 to £13 10s.; third class, £9 5s. to £10 10s. Lambs, second class, £1 2s. to £1 6s. 6d.; third class, 17s. 6d. to £1. Hoggets, second class, £1 12s. 6d. to £1 16s. 6d.; third class, £1 7s. 6d. to £1 12s. 6d. Young pigs, eight to ten weeks old, sold at from 19s. to 23s. each.

There was only a small supply of cattle at the fair at Naas, co. Kildare, on Wednesday. The demand was brisk for well-conditioned animals, especially two and three year-olds, but other sorts met a slow sale. First class yearlings realised up to £9 15s.; second class, £6 to £8 15s. Two-year-olds, first class, £12 15s.; second class, £8 10s. to £12 5s. Three-year-olds, first class, £16 15s.; second class, £12 2s. 6d. to £14 10s. There was an average supply of sheep, consisting chiefly of Wicklow mountain ewes, for which there was fair demand. Two-year-olds and upwards, second class, £1 6s. to £1 10s.

Another Outbreak of Foot-and-Mouth Disease.

Foot and mouth disease has broken out among a number of sheep at Westerton Crieff, and the Board of Agriculture has scheduled forty-four parishes in which the movement of cattle or sheep is prohibited.

HORSES.

Sale of Girton Shires

On Thursday Messrs. Sexton, Grimwade, and Beck conducted an unreserved sale of Mr. Fred Crisp's Shire horses, at Girton Stud Farm, Cambridge. This was the last of a series of annual sales of Shires held by Mr. Crisp, as, having recently let two farms on the estate, he has decided to reduce his breeding stud, and for the future to go back to his original plan of periodical sales. All the foals reared at the stud during this year were disposed of, and the sale, which comprised fifty-eight lots, was very successful. At the luncheon which preceded the sale there were present representatives of all the principal Shire horse breeders in the country, the company numbering about 700. In replying to the toast of "The jolly good health of one of the best men and one of the best sportsmen in Cambridgeshire," which was proposed by Mr. P. P. Pratt, of St. Asaph, Mr. Crisp said he thought there were no animals so profitable to farmers, large or small, as the Shire horses. He had tried hunters and thoroughbreds, but he found Shires the animals of the day. He urged breeders to cultivate geldings.

The bidding at the sale was brisk, especially for some of the filly foals, and some good figures were realised. The highest bid was 190gs. for the seven-year-old brood mare Sudbury Sunflower, which was knocked down to Mr. C. W. Victor Cavendish, M.P. Among the other brood mares Cade, a seven-year-old, was bought by Mr. J. Topham for 130gs.; Desford Duchess, of the same age, was knocked down to the Earl of Verulam for 120gs.; whilst Waxlight, a four-year-old, went to Sir J. Blundell Maple for 110gs. The three filly foals, sold without dams, realised splendid figures. Girton Belle was knocked down at 150gs. to Sir J. Blundell Maple, while Girton Charm and Girton Peerless realised 140gs. and 120gs. respectively, their purchasers being Mr. Fred W. Griffin, Boro' Fen, and His Royal Highness the Prince of Wales. Of the foals sold with their dams, Girton Edith and Girton Dora, purchased by Lord Llangattock, realised the highest prices, viz., 85gs. and 86gs. As to the fillies, the yearlings were productive of the most competition, the top figure being 110gs. paid for Girton Empress by Mr. Frohock. The only colt foal, Girton Meteor, produced keen competition, and was knocked down to Mr. A. H. Clarke for 80gs. Mr. Crisp afterwards offered him 100gs. for his bargain.

Below we give a list of the principal prices realised:—

	Gs.
BROOD MARES AND FOALS.	
Hard Cheese 28827, br, f 1887, s Brailsford Hero 3484 Mr. Nesbitt	40

We regret to announce that Mr. Alfred Agate, the well-known breeder of Sussex cattle, and frequent winner of the Blue Ribbon and other distinctions at the Smithfield Show, died on Monday morning at Horsham, at the age of seventy-four. He celebrated his golden wedding on May 1 last year.

Sale of Geese at Wimborne.—Mr. Ensor's special Michaelmas sale of young geese took place at Wimborne, Dorset, on Tuesday, when about 200 herd were offered, and all sold, meeting a capital trade. Considering this to be the first sale of the kind at this season of the year held in this famous poultry district, it bids fair for future success. Among the principal consignors were Messrs. W. R. Little (St. Giles), O. S. Little (Winterbourne Kingston), H. Friend (Brockington), E. Thorne (Verwood), Reader (Stoke), J. Pike (Tarrant Keynstone), H. Tozer (Bere Regis), Barter (Broadstone), Perrett (Parkstone), Hembury (Parkstone), Nicklen (Alderholt). The birds from these breeders made from 4s. 6d. to 5s. 3d.; others up to 4s. 3d. In the majority of cases 5s. was the standard price.

SHEEP.

Sale of Mr. C. Tulley's Southdown Flock.

The dispersal of Mr. Charles Tulley's flock of Southdown sheep at Pangdean Farm, Pyecombe, near Brighton, on Wednesday, attracted a large company of breeders from all parts.

There was exceptional interest in the sale, owing not only to its important character, but to the fact that Mr. Charles Tulley, who is retiring from farming, has held the farm for nearly a quarter of a century, and his flock has acquired considerable repute throughout the country. It cannot be said how many years ago the Pangdean Southdown flock was established, but when the late Mr. George Baker quitted the farm in 1877, Mr. Tulley purchased largely as the incoming tenant, and has since introduced into the Pangdean flock rams bred by many well-known flockmasters. The catalogue included 1,047 ewes, 309 stock ewe lambs, fourteen rams, and ten ram lambs. The sale, which was conducted by Mr. W. G. Ansell, of the firm of Messrs. Drawbridge and Ansell, Haywards Heath, was a very satisfactory one. Prices were good, better than were anticipated. They worked out as follows:- The full-mouthed ewes averaged 45s., the six-tooth ewes 53s. 9d., the four-tooth ewes 60s. 3¾d., the two-tooth 65s. 2½d., the over-age ewes 39s., the stock ewe lambs 39s. 8½d., the rams, 79s. 2d., and the ram lambs 46s. 2½d. The total amount realised by the sale was £3,448 2s., an all-round average of 55s. 0½d. The ewes, reckoning all ages, averaged 54s. 1¾d., but, taking the usual flock ages, they averaged 55s. 0¾d.

Champion Southdown Ram, the Property of Mr. C. R. W. Adeane, Babraham Hall, Cambridge

Sale of Mr. E. K. Bickley's Shropshires.

On Tuesday, Messrs. Alfred Mansell and Co., of Shrewsbury, in conjunction with Messrs. Parry and Batho, offered for sale Mr. E. K. Bickley's carefully selected flock of Shropshires. Previous to beginning business Mr. and Mrs. Bickley entertained the numerous company assembled to an excellent lunch, which was served in a spacious marquee erected near the house. After several toasts had been duly honoured, the company adjourned to the sale ring. Mr. Mansell occupied the rostrum, and in commending the flock to the attention of purchasers, he pointed out that they were all in good, healthy, working condition. He hoped the company would rally round Mr. Bickley and give him a successful sale, and he felt sure they would never regret having made purchases out of the really good lot of animals he had to dispose of. The buyers seemed to have acted on Mr. Mansell's advice, as satisfactory prices were realised all round, and the breeding ewes and ewe lambs in particular sold very well. The following were the prices paid:—

Shearling Rams (pasture rangers) -Mr Humphreys, 4gs; Mr Edwards, 4½gs; Mr Roscoe, 5½gs; Mr Lee, 7½gs; Mr Davies, 4gs; Mr Edwards, 6gs; Mr Batho, 4gs, 4½gs; Mr Ellis, 4gs; Mr Legh, 4gs; Mr Lea, 3½gs; Mr Griffiths, 3½gs; Mr Simcox, 3½gs; Mr Davies, 3½gs; Mr Cooke, 3gs; Mr Lee, 3gs.

Two-shear Rams—Mr Gresty, 9gs; Mr Darlington, 5gs.

Ram Lambs—Mr Dodd, 2½gs; Mr Lloyd, 2½gs; Mr Jones, 3gs; Mr F Bowen, 2½gs; Mr T Topham, 3½gs; Mr Lewis, 3½gs; Mr Topham, 3½gs; Mr Mottrell, 2½gs; Mr Timons, 2½gs; Mr Lewis, 3 ; Mr R Topham, 2½gs; Mr Edwards, 2½gs; Mr Dickin, a ir 3½gs; Mr Bright, 2½gs; Mr Lea, 3½gs; Mr Jones, 2½gs, 3½gs Pairs Mr T Topham, 5½gs, 14gs; Mr Lloyd, 3½gs; Mr Edwards, 4½gs. Lots of four—Mr Timons, £6 8s; Mr T Topham £8 10s; Mr Timons, £6. £5 5s.

Shearling Ewes—Mr J Edwards, 62s 6d, 65s; Mr Griffiths, 60s; Mr W Thomas 55s; Mr Dodd, 57s 6d; Mr W Humphreys, 47s 6d.

Two-shear Ewes—Mr Timons, 67s 6d, 65s; Mr Legh, 60s 57s 6d.

Young Stock Ewes—Mr Legh, 65s, 62s 6d, 60s, 57s 6d, 52s 6d. Mr W Oakley, 65s, 60s. Mr Holding, 57s 6d; Mr Parry, 55s.

Ewe Lambs—Mr W Thomas, 50s. Mr Cureton, 45s. Mr J Davies 40s, 35s, 30s; Mr F Horne, 40s, 37s 6d; Mr Hill, 32s 6d, 28s; Mr Gresty, 32s 6d; Mr H Williams, 31s.

Middleton Hall Flock.

A sale of sheep belonging to Mr. R. Bowness, of Middleton Hall, Kirkby Lonsdale, took place at the Hall on the 14th inst. There was a good attendance of buyers, and prices commensurate with the quality of the stock were realised. Messrs. M. B. Hodgson and Son were the auctioneers, and disposed of the following lots: 550 half-bred gimmer and wether lambs, at prices varying from, wethers, 13s. 6d. to 23s. 9d.; gimmers, 13s. 3d. to 25s. 6d.; 100 draft black-faced ewes, 12s. 9d. to 17s. 9d.; 80 black-faced wether lambs, 7s. to 11s. 3d.; 30 black-faced wethers, 23s. 6d. to 26s. 6d.; fat ewes, 21s. 6d.; rough tups, 18s. to 24s.

Sale at Bridgnorth.

The great annual sale at Bridgnorth was held in the Smithfield on Monday by Messrs. Nock, Deighton, and Kirkby. The entry was much larger than the previous year, and comprised 4,000 ewes and wethers, 1,000 ewe and wether lambs, and 100 rams and ram lambs. The sheep were chiefly Shropshires, and were a capital lot throughout. Buyers were present from Northampton, Nantwich, Market Drayton, Wellington, Worcester, Kidderminster, Birmingham, Wolverhampton, and other parts of the Midlands. The prices were considered to be very satisfactory to the vendors, the highest price for stock ewes being 53s. Ewe and wether lambs met a fair trade and made up to 33s. The rams were chiefly Shropshires and were of a good type, the trade being brisk, making up to 14gs. Ram lambs made as high as 5gs.

Carlisle Fair.

Large sales of sheep and lambs were held at Carlisle on Wednesday, it being the Latter Fair day. At Harrison's Mart about 10,000 were forward. The annual sale of rams was also held, 220 being shown, including a consignment of Border Leicester and Shropshire lambs from Lord Polwarth's flocks at Mertoun. The best classes of Border Leicesters and Oxford Down rams met a good trade at £5 to £10; Shropshires and Suffolks did not sell so well. Prizes were offered, and were won as follows: Five shearlings—1, Mr. Twentyman, Hawkrigg; 2, Mr. Thompson, The Mains; 3, Lord Polwarth. Border Leicester Shearling Ram—1, Mr. Winter, Lotherton Park; 2, Mr. Twentyman; 3, Mr. Watson, Stone House. Down Shearling Ram—1, Mr. Riley, Ennim; 2 and 3, Lord Polwarth. Cross ewes made 37s.; half-bred ewes, 33s. 3d.; Leicester ewes, 39s.; Cheviot ewes, 21s. 6d.; cross gimmers, to 27s. 6d.; halt breds, to 5[illegible] 9d. Border Leicester gimmers, to 40s.; cross lambs, to 24s. 9d. Feeding sheep: Cheviots, to 24s.; crosses, 59s.; Cheviot lambs, 17s 9d each.

At Hetherington's Mart 10,000 sheep and lambs were forward, and there was a good demand. The first and second prize Border Leicester shearling rams were from Mr. Roper, The Leazes, and brought £5 15s. and £5; the first and second Down rams were from Mr. Jones, Wrexham, and brought £2 12s. 6d. and £1 16s.; cross feeding sheep made to 27s.; Cheviot gimmers to 18s. 9d.; cross ewes, 35s.; half-bred gimmers, to 35s.; half and three-quarter bred lambs, to 23s. 6d. each. There were about 300 Irish cattle on the South, the bulk being well suited for wintering. Trade was brisk. The best sorts made £14 10s. to £16 10s.; medium, £10 10s. to £12 10s.; and the smallest lots £5 5s. each.

Lincoln September Ram Fair.

The above fair, held on the 13th inst., was attended by a good number of buyers, and a large number of rams were disposed of. Trade ruled good and prices were against sellers. Mr. J. E. Walter sold twenty rams belonging to Mr. M. Dixon, Norton, at an average of £14 4s.; twenty-five property of Mr. J. Cartwright, Dunston, at an average of £7 2s.; and eight, bred by Mr. F. G. Battle, of Potterhanworth, at an average of £7 5s. The same auctioneer also disposed of twenty rams belonging to Mr. C. S. Dickinson, Branston, and about 500 breeding sheep and rams. Fifteen, the property of Mr. Heathcote, made up to £7 5s. each, and a number of ewes and gimmers found purchasers at 56s. 6d. to 60s. 6d. apiece. Messrs. Richardson and Son sold by auction fourteen rams belonging to Mr. J. Evans, of Burton, for 64½gs., prices ranging from 4½gs. to 6¾gs. each; and seven of Mr. E. J. Howard's, Nocton, at 5½gs. to 15gs., Mr. Wilkinson, Nettleham, giving the top price.

Sale at Monmouth.

Messrs. Nelmes, Poole, and Atkins' annual sale of sheep took place on Thursday last, in beautiful weather, in a field close to Troy Station, Monmouth, and was the most successful ever held here, the catalogue comprising some 3,000 ewes and store lambs, and 170 rams. Nearly the whole of the lots were cleared at a considerable advance on last year, ewes being quite 4s. to 5s. per head dearer. Customers attended in large numbers, and competition was keen throughout.

Beaminster Fair.

Beaminster (Dorset) Great Prize Sheep Fair was held on Wednesday, when there was an exceptionally large number of sheep penned (about 7,000), a large offer of horned cattle, and other stock. Buyers also attended in large numbers from all parts of the country, but more especially from the West of Shires. Messrs. Morey and Son, of Bridport, had the whole of the business in their hands, and, with a good demand throughout, a capital trade was experienced at the full prices of Wilton and other late fairs; and even higher rates would have been realised had there been a little rain just previous, as was the case in some districts. A general run for horn ewes from 45s. to 53s. for best, and 38s. to 44s. for seconds; couples, 54s. to 64s.; horn wethers, 36s. to 47s.; best wether lambs, in fresh condition, 34s. to 43s.; others, 28s. to 32s.; horn chilver lambs, 29s. to 36s. Down ewes, of which there was not a large offer, ranged from about 34s. to 45s.; wethers, 32s. to 42s.; wether lambs, 28s. to 34s. for best; others, 24s. to 27s.; chilvers, 30s. to 36s.; mixed lambs, 24s. to 35s. Cattle made full prices, heifers and calves up to £15 and barreners to £26 per pair.

Kelso Ram Sales.

The great sale of Border Leicester-bred (Leicester-Cheviot) and Southdown rams held annually under the auspices of the Border Union Agricultural Society took place on the 14th inst. at Kelso in brilliant weather and in the presence of a large company of flockmasters and agriculturists from all parts of the country. As in former years, there were six rings in which the sales were carried on simultaneously, and in which all the local auctioneering firms, to the number of seven, were engaged. The catalogue comprised 1,708 rams of the various breeds, or 466 fewer than last year. This reduction was to some extent anticipated, owing to the somewhat indifferent encouragement extended to the exposers of rams from the more formally established flocks, and some of whom did not realise anything like profitable prices. As usual, the bulk of the stock was of the Border Leicester breed, but the predominance of this class was not so marked as formerly, owing to the circumstance that while there were nearly 300 fewer offered this year, the numbers in the other classes were well maintained. The relative numbers were: Border Leicesters, 893; other classes, 815.

From the outset business assumed a lively character, and this was maintained throughout. The averages generally showed a decided advance on those of last year, in some cases being nearly doubled, and in only a few cases was there anything like a serious reduction. Without any invidious reflection on it, may be said that the highest sale was to be found in

Ring No. 4, where Messrs. J. Swan and Son, Limited, had for disposal no fewer than 400 sheep. Mr. James Swan presided, as usual. The first lot brought forward were those from Leaston (Mr. Smith's). Last year their average was £18 9s. 2d.; this year they realised £22 15s. 2d. The highest-priced one was £95, the purchaser being Mr. Murray, Spittal. Mr. M'Connell, Glasnick, had one at £40; Mr. Grant, New Gelland, one at £35; and some half-dozen others went at from £28 to £30. The Mertoun rams (Lord Polwarth's) came on early in this ring, and met a very satisfactory demand. No. 1 of the lot was secured for the Right Hon. A. J. Balfour at £120; one was taken for the Earl of Rosebery at £100; while Mr. Ridley, Peelwill, took two at £90 and £45. Mr. Elliot, Maskle, bouht one at £71; and Mr. Thomson, Mungoswalls, one at £35; whilst others went at prices well over £20. The Markle lot (Mr. Elliot's) averaged £11 14s. 7d., as against £5 16s. 9d. last year. Of these Mr. Hitchison, Carlisle, secured one at £27; and Mr. Wood, Brookbushes, one at £21. The Leicesters in the other rings sold relatively well. Halfbreds were also in most cases up on the average, but not to such an extent as the Leicesters. Oxford Downs made fair prices on the whole.

Findon Fair.

The September Sheep Fair at Findon, Sussex, was held on the 14th inst., when close upon 8,000 sheep were penned, which number was a slight decrease compared with last year. The fair opened briskly. Lambs particularly were in demand, and a good many lots changed hands before eleven o'clock. The prices all round were good. Ewes varied from 30s. to 44s., the latter price being obtained by Mr. Pyle, of Angmering. A number belonging to Sir Henry Fletcher were bought by Mr. Haines of Chichester, for 42s., and the Rev. John Goring disposed of one of his lots at 37s. 6d. The highest price for lambs was secured by Mr. Tompkins, of Angmering, who sold some at 42s. Both Mr. King, of Steyning, and Mr. Short, of Findon, obtained 40s. for a number of theirs. The Rev. John Goring sold some at 37s.; Mr. Lee, of Sompting, 100 at 36s.; Mr. Duke, Angmering, 100 at 34s. 6d. and 100 at 31s.; Mr. Phillips, of Lancing, some at 32s.; Mr. J. A. Miller, 100 at 25s. 6d. and 40 at 23s.; Mr. Lee, 90 cull lambs at 25s. Mr. J. Hampton, of Findon, secured 4gs. apiece for ram lambs. There was a short supply of tegs, the principal lot changing hands being the property of Col. Margesson. They fetched 46s. 6d.

Show and Sale of Rams at Glasgow.

Messrs. Macdonald, Fraser and Co.'s (Ltd.) sixteenth annual show and sale of rams and ram lambs at Glasgow was held on Tuesday at their premises adjoining the Cattle Market. The total number of animals catalogued was 819, comprising sixty Leicesters, 230 blackface shearlings, and 523 blackface ram lambs. These numbers show a slight increase over last year. All the usual well-known flocks in the midland and southern counties of Scotland were represented at this sale, and many of the lots shown were of great merit. The weather being fine the sheep were brought out in remarkably good form, and this was all the more evident when the various lots were drawn out for competition. In the shearling class as many as nine pens of five were placed before the judges, and eleven pens of five ram lambs. The judges were Mr. M'Diarmid, Camusericht, Rannoch, and Mr. M'Dougall, Claggan, Kenmore. For shearlings the first prize was won by Miss Coubrough, Craigend, which averaged £15 12s.; the second by Mr. Buchanan, Wellwood, which averaged £14 5s.; and the third by Mr. Stewart, Carrot, average £6 13s.; the commended ticket going to the pen owned by Miss Coubrough, Craigend, which averaged £7 15s. For lambs the place of honour was given to Mr. Cadzow, Westown; the second to Mr. Pate, E. Bramcastle; and the third to Messrs. Clark and Sons, Auchenlayford; and the commended ticket to Mr. Watson, Greenfield. The sale started with the Leicesters, Mr. Paton officiating as auctioneer. There was a crowded attendance, buyers being forward from a wide radius of Scotland and the Western Islands. Hitherto Glasgow has always been the centre of attraction for Irish buyers, but owing to the present regulations no sheep of any kind can be sent into Ireland. This fact, however, did not seem to affect prices much, as trade all round was found to be quite as good for all classes.

Sale of Half-breds at Hawick.

Messrs. Andrew Oliver and Son held their annual special sale of half-bred ewes and gimmers at Hawick on Wednesday, when they presented 5,700 ewes and 650 gimmers. There was a good attendance. Prices for ewes were up from 2s. 6d. to 9s. 6d. per head, the average rise being 4s. 9d. above the corresponding sale last year. A lot from Hallrule topped the market at 47s. 3d., another lot from Flex making 47s., and Spittal 46s. 3d. For the better class of gimmers trade was good at a similar rise to the ewes, and the class was topped by a fine lot from Cavers Home Farm at 51s. 6d., a lot from Courthill making [illegible].

Technical Terms Used in the Bradford Wool Trade.

It is always as well to have a clear idea as to what the consuming end of the trade has when dealing with any commodity, and in presenting this description of how wool is dealt with by Bradford sorters, growers will be able to follow more intelligently and more correctly estimate the different parts of their shorn fleeces.

Wool-classing we define to dealing with the fleece as a whole. There need be no hard and fast rules made, as fleeces show up very differently, and when they are straight and uniform they do not demand that classing and skirting as do fleeces that are "ragged" and wanting in uniformity. In classing it is usual to make three sorts of sound combings, also a cast, and two if not three sorts of clothing. In the combings the great bulk will consist of first combing, being an average quality and length of the whole clip, and it must be even and sound. Super-combing when made consists of parts of fleeces that usually are a little shorter than the first, but much finer, quality here being the chief desideratum. The second combing should contain much longer, stronger, and deeper-grown wool than the first combing, and consist of nothing but sound wool. The cast should include all cross and very low fleeces which does not near approach the general run of the whole flock. In clothing the classes should be made according to quality, and are usually made independent of length. Super-clothing consists of the highest quality, the staple being shorter than the combing, with good colour, density, fine serrations, well fitted for felting purposes, and soft and kind to the touch. First clothing contains the bulk of the shorter wool, providing it is clean and free, is usually a little longer than the super, and not so fine, but due attention should be paid to brightness, softness, and elasticity. Second combing, when made, is composed of a very wide grade of wool, but when super and first combing is made there need be no second clothing attempted only when a big clip is to be classed, or when the super is knocked off there should then be a first and second clothing, circumstances determining the line of action at the time being. We rather incline to lean to the line of action that when second clothing cannot be properly made the wool should go to the pieces. Generally this sort is of much bolder growth than the other two sorts, and always sells on a par with the other parts of the fleece. This past few years good shafty pieces have been in much request, and sold very well indeed.

Let us now look at the expressions one hears every day among Bradford woolmen, and see what they mean. The word combing really means long wool, a term used to distinguish from short wool; a wool specially adapted to the worsted trade. Clothing, a short wool; a term used to distinguish from combing or long wool, a wool used in the cloth or woollen trade round Leeds, Dewsbury, and Huddersfield. Teg, hog, or hogget. The first fleece from a sheep that has not been shorn as a lamb. Shurled hogget, first fleece from a sheep after it has been shorn as a lamb. Wether wool (English), all fleeces cut from sheep after first or hogget fleece has been removed. Wether wool (colonial), all fleeces shorn from unsexed sheep after the hogget fleece has been removed. Brightness refers to demi-lustre, a soft shade of lustre. Fineness: smallness of fibre. Quality signifies fineness with high character of breeding. Silkiness: a combination of softness, fineness, and brightness. Broad or thick-haired: denoting loss of character, straight-fibred, devoid of elasticity. Hardness: dry, unkind feel. Stringy: thin, delicate-stapled wool. Mushy: open and fuzzy. Noily: wasty, mushy, and the staple usually being starved and perished. Discoloured: stained by dead yolk. Cast: a rough, coarse, bad-bred fleece. Cot: a matted or felted wool. Kemps: white brittle hairs; a fibre grown on sheep, which cannot possibly be dyed, and is always either an indication of want of purity of breed or put down to a bad class of low and coarse-bred sheep. Dags: matted fibres, dirt and wasty matter of all character.

In presenting these technical descriptions of wool, readers will be able to understand and value them at their proper worth, and those growers to whom they refer cannot do better than carry them out carefully and systematically when preparing their wool for market. With the vastly increased quantity of wool now thrown on to the market growers can no longer skip and scamp their wool clip, and the observation of a lifetime leads one to say that there is nothing more satisfactory in the eye of a buyer than to see a good clip, and that wool nicely done up.—*British Australasian and New Zealand Mail.*

Sale of the "Old Times" Coach Horses.—The sale of the "Old Times" coach horses that have during the season been working the road to Virginia Water attracted a good many people to Aldridge's, St. Martin's Lane, on Wednesday afternoon. A very fair trade was done, the stud of thirty-six realising 2,310gs., or an average of 64gs. each animal. Sir Harry, out of the chestnut team, made 125gs.; Deacon, a bay, 120gs.; Charming, bay mare, 110gs.; and a pair of roans, Columbia and Kate, 160gs. Two hunters, named Isaac and Princess, changed hands at 120gs. and 110gs.

PIGS.

Sale of Mr. Frank Allmand's Large White Pigs.

Mr. Frank Allmand's herd of Large White pigs was disposed of by auction at Wrexham on Thursday week, Messrs. Frank Lloyd and Sons being the auctioneers. There was a large attendance of buyers, nearly all the principal breeders in England being represented. The highest price of the day was paid by the Earl of Ellesmere's representative for the large White sow Wrexham Hawthorn; the same buyer also secured Wrexham Venus and Wrexham Minera, at 16gs. and 17½gs. respectively. Wrexham Heatherbell was purchased by Mr. Walker, Wigan, for 15gs.; Wrexham Gem II. was knocked down at 13gs. to Mr. Hope, Scarborough; Wrexham Jason, 11½gs., to Mr. Albert Armitage, of Nottingham; Wrexham Bessie, 10½gs., to Mr. J. P. Smith, Evesham; Wrexham Juno II., 10gs., to Mr. Davies, West Bromwich; Large White gilt, 12gs., to Mr. Prescott, Liverpool; also Large White sow, Ruby, 14½gs. Six months' old gilts realised up to 8gs., and younger ones up to 6gs.

Sale of the Trescowe Large Black Pigs.

The old-established herd of Large Blacks, owned by Mr. R. S. Olver, of Trescowe, Cornwall, was dispersed on Tuesday, the sale being conducted by Mr. Ernest Prentice, secretary to the Large Black Pig Society, who in his preliminary remarks alluded to the services Mr. Olver had rendered as President of the Society since its incorporation, and to the value of a herd which had been purely bred for over fifty years, expressing the opinion that in the near future the Trescowe strain of blood would be sought after, and breeders who possessed it would find themselves able to command remunerative prices.

The large company included breeders in the south-western counties, and also representatives of the eastern, midland, and northern counties, and the eighty lots catalogued realised excellent prices. The top price of the day was 25gs., given by Mr. R. O. Feilden, Penkridge, Staffordshire, for the sow Trescowe Belle II., 556, farrowed March, 1897, and at 23gs. Mr. C. F. Marriner, Thorpe Hall, Hasketon, became the purchaser of a fine lengthy sow, Trescowe Jet, 564, farrowed 1898; Trescowe Beauty II., 554, went to Mr. H. A. Hope, of Cloughton, Yorkshire, at 12gs.; Trescowe Bonny II., 558, to Mr. J. B. Dimmock, of Shotford Hall, Harleston, at 10gs.; Trescowe Black Belle, 710, to Mr. A. H. Cobbald, Eldo House, at 7gs.; and Trescowe Ebony, 562, 7gs.; Trescowe Smut, 566, 6gs.; and Trescowe Black Bess, 708, 4gs., were taken by Mr. W. H. Pinhey, of Castle Hedingham. The average price for ten sows was £10 14s. 6d. per head.

Gelts, farrowed in October, 1899, made up to 10gs., at which price Mr. H. A. Hope took the winner of first prize at Launceston Show, 1900. Mr. C. F. Marriner was a purchaser at £6 5s., Mr. W. H. Pinhey, three lots, at £5 15s., £5 5s., and £4 5s., and Mr. Robt. Graham, of Stutton, at £5. Gelts, farrowed January and February, 1900, made from £5 15s. to £4; Mr. A. Harvey, of Wattisham, buying at £5. Twenty gelts, three to five months old, made up to £5 5s., the average price for the thirty-six lots being £4 4s. 6d. per head. The majority of the boars were only three to five months old, and with a few exceptions, made but little more than store prices. A promising young boar, farrowed January, 1900, realised £7, to Mr. C. F. Marriner, and Mr. R. B. Bond, of Sproughton, was the purchaser of a boar farrowed May, 1900, at £2 10s. Ten lots of capital store pigs averaged £3 16s. 6d. per head.

Sale of Large Black Pigs.

The formation of the Large Black Pig Society has resulted in increased attention being paid to this breed. It will be remembered that there was a sale of animals from registered herds, which, by the way, are generally confined to the Eastern counties and Somerset, Devon, and Cornwall, held at Ipswich last May. The result was so satisfactory that it was determined to hold an autumn sale, which duly came off on Friday week. No doubt, the high prices made last spring induced breeders to send a good many more animals to this sale. Breeders had evidently, indeed, been tempted to keep more than they were, perhaps, justified in doing for breeding purposes, and a very large proportion were young stock, the ages of the majority ranging from ten weeks to ten months. There was, however, a good demand for the best animals. Mr. G. F. Hempson bought the first sow in the catalogue, sent by Mr. H. W. Packard, Shotley, at 5½gs., while an exceptionally large animal from Cockwell made 8gs. One sent from South Devon, farr. November, 1899, made 7gs. to Mr. J. W. N. Moss, Kelvedon, while Mr. C. S. Sherwood secured one consigned by Mr. James Goddard, Tunstall, of the same age, at 7½gs. Two others belonging to the same herd made 7gs. and 6½gs. to Mr. Cottee and Mr. G.

F. Hempson. Three gilts, a year old, belonging to Mr. Percy Turner, realised 3gs. each. Mr. George Courtauld, Halstead, sent several gilts, farr. last February, and they made £2 15s., the buyers including Mr. Southgate, Mr. Gage Harper, Mr. Gwilt, and Mr. J. Watkins. Mr. G. Watkins also had a dozen gilts. Three farr. last December sold at 6gs., 5gs., and £4 15s., the buyers including Mr. Cottee and Mr. Cordy. Another one, farr. January, 1900, was taken by Mr. J. Watkins at 6gs. Mr. C. F. Marriner also had seveal entries from his Hasketon herd; one farr. last March making £4 15s.; other farr. in May, and sold in pairs, went at about 40s.

Three belonging to Mr. T. P. Brand, Shimpling Hall, farr. last January, sold at £5, £3 5s., and £4 respectively, to Mr. Cottee, Mr. Fox, and Mr. C. S. Sherwood. The others made satisfactory prices. Mr. A. H. Cobbald, Eldo House, Bury St. Edmunds, consigned a considerable number of sows and pigs. A sow, Eldo Beauty, farr. 1898, made £5, and five, farr. March, 1899, were knocked down at £4, £3 17s. 6d., to £3 12s. 6d. The gilts made from £2 15s., the purchasers being Mr. Hood, Mr. Ranson, Mr. J. W. Moss, Mr. Brand, Mr. S. T. Harwood, Mr. Moorsom (for Capt. E. G. Pretyman, M.P.), and others. A gilt, farrowed last March, from the Colonial College, Hollesley Bay, went at £3; another one making £2 15s., and three others £2 17s. 6d. each. Mr. John Matthew, Earl Stonham, made £4 2s. 6d. of a gilt farrowed last January, and 75s. and 70s. each of three others, Mr. Gage Harper, Mr. Burgess, Mr. Crook, and Mr. Graham being amongst the buyers. There were several other consignors, amongst them being Mr. John Rock, of Dunningworth Hall,

Shorthorn Bull "Macbeth," purchased by Mr. Duthie for 200gs.

whose consignments sold well, to Mr. Edwin H. Preston, Worlingworth, Mr. Cousins, and Mr. Ross.

As to the boars, one farrowed in March last, belonging to the Colonial College, realised 10½gs., the top price of the day, and another one 9½gs., to Mr. Cousins and Messrs. J. and G. Stannard. Mr. Burgess secured one from Cornwall at 7gs.; while Mr. Sidney Traylen gave £5 for one sent by Mr. John Goddard, farrowed in May. Mr. Walter Wrinch, Erwarton, had several farrowed in April last, the first three being purchased at £3, 2gs., and £2. It is satisfactory to note that buyers came from outlying districts, including Derby, Westmorland, and Dumfries.

The introductory lecture for the new session at the Royal Veterinary College will be delivered at that institution on Tuesday, the 2nd October, at noon, by Prof. McFadyean, M.B., B.Sc., M.R.C.V.S.

Sale of Live and Dead Farming Stock.—Mr. John Barton, of Hackwood Farm, Hants, has decided to retire from farming, and to-morrow (Tuesday) Messrs. Raynbird and Sons, Basingstoke, will dispose of the whole of the live and dead stock on the farm. This comprises a flock of registered Hampshire Down sheep—540 in all—seven well-bred Shire mares and fillies, nineteen cart horses and colts, a seven-year-old bay cob and four-year-old bay nag filly, eight Shorthorn cows and heifers, a two-year-old steer, a pedigree Shorthorn bull, five pure-bred Berkshire sows and young pigs and one boar, seventy pure-bred dark Dorking fowls, twelve ricks of sainfoin, clover, and meadow hay, and all the implements, surplus household furniture, etc. Hackwood Farm, which is three miles from Basingstoke railway station, has for many years been well known as the home of first-class farm stock, and this dispersal is sure to attract a large gathering of buyers, who will be well repaid for their visit. The sale will take place on the premises, and will commence at eleven o'clock precisely.

SHOWS.

Birmingham Shorthorn Show and Sale.

The autumnal show and sale of Shorthorns promoted by the Birmingham Agricultural Exhibition Society was held at Bingley Hall on Wednesday. It must have been gratifying to the promoters to note that the falling off in the number of entries which occurred last year was this autumn recovered. There were in all 236 animals shown, as against 195 last year and 237 in 1898. The show is not, of course, of the same importance as that held in the early part of the year, and the animals do not come up to the same high standard of merit. Yet there were several notable Shorthorns stalled on Wednesday, with others which, although serviceable beasts, were not of show type. There was a fair attendance of buyers, though several gentlemen who generally purchase largely did not put in an appearance. A good number of animals were bought for export, chiefly to South Africa and South America, but not so many as in some former years.

Cows and Heifers.

The class for cows and heifers exceeding three years of age was a fairly strong one, both in numbers and quality, and prices reigned pretty high. There were sixty-four animals entered, including the calves. Mr. Charles Showell, a large exhibitor, who owned some remarkably fine cattle, was awarded the first prize for Bella, a handsome and well-developed milker, bred by the Right Hon. F. J. S. Foljambe, out of Beauty by Leonidas. Mr. Kaye purchased this prize-winner for 35gs. Second award went to Crumpet 4th, bred and exhibited by Mr. S. H. Allen, and sold to Mr. Kaye for 47gs. Mr. Showell was the owner of the reserve cow, an excellent animal, also by Leonidas, which was purchased by Mr. Kaye for 40gs. In regard to prices, Mr. J. A. Preece headed the list for the class, he receiving from Mr. J. H. Wheatley 82gs. for a three-year-old, Duchess of Barrington 41st, who came of a famous line of Barringtons, and was highly commended by the judges. Mr. A. R. Motion paid 42gs. for Morwenna, a Leicester prize winner in 1898, and her two cow calves, born in August last. Another of Mr. Charles Showell's animals, Jessamine, which received the commended card, was sold to Mr. Hiscock for £41. She was the winner in 1897 of prizes at Bingley Hall and at the Warwickshire show. From the same herd came Snitterfield Lass, which was purchased by Mr. Jackson for 34gs. Duchess of Cumberland 20th, a roan from the herd of Mr. W. Bewley, went to Mr. Lloyd for 32gs., Mr. Motion bought Hardbelle 7th from Mr. G. Gerrard for 36gs., and Mr. R. Symonds paid 25gs. for Blushing Rose, a prize winner on other occasions, belonging to Mr. A. Hiscock, jun., while Mr. Green purchased a cow from Mr. W. Arkell for 34gs., and another, with calf, from the same breeder for 31gs. In the heifer section the animals were of very good character all round, especially in the classes for calves and one year olds. The best beast among the two-year olds, Warton Lady, belonged to Mrs. L. H. Holland, and was a roan in prime condition. She was disposed of for 36gs. to Mr. Townley Parker. Second honours were secured by Barr Lady, a well-grown, level heifer. Mr. Brain bought her for 25gs. Mr. Kaye purchased Bellebone 2nd, a red bred by Mr. Charles Showell, for 27gs. Mr. T. R. Hulbert's Heliotrope was placed reserve in this class.

Premier honours among the yearling heifers fell to Mr. H. Wynne, in respect of Ombersley Pride, which he sold to Mr. Dudding for 67gs. Other prize winner, a fine roan bred by Mr. T. Harrison, falling to Mr. [illegible] Parker at 31gs. Mr. B[illegible] gave 47gs. for the second animal, belonging to Mr. G. Freeman, and Mr. Hastings' [illegible] Red Blossom was secured by Mr. Dudding for 36gs. To Mr. Charles Showell belonged Jessamine 3rd, which Mr. Motion bought for 2[illegible] [illegible] of the Right Hon. Chaplin, Position 4th, Coquette 3rd, and a pair of two-year-old heifers, Coquette 2nd and Coquette 4th, in the order of their numbering. Second honours were secured by Mr. Wynne, and her yearling heifer, Duchess of Clarence Ruth, was the second prize animal, and she was sold to Mr. W. H. Thomas for Mr. Dudding for 30gs. The same pen [illegible] by Mr. Thorley to Mr. J. Harrison for the reserve heifer, Fairy Queen.

Bulls.

In the [illegible] for bulls [illegible] offered there was the most [illegible] be less than twenty-six entries, [illegible] and of these forty-two were [illegible] ton there were really a [illegible] entered for competition, to the [illegible] A few of the animals shown were [illegible] who could well have [illegible] good people on their [illegible] ter, and certainly all [illegible] A magnificent [illegible] Duke, [illegible] hibited by Mr. J. H. Wheatley, out of Fairy Princess 2nd, and sired by Jasper 2nd. He was calved in May, 1899, [illegible] the judges at the recent Warwickshire [illegible] a deep-set, level beast, with a good [illegible] and was far and away the best in the hall. No less than 135gs. was paid for him on behalf of Marquis Camden. A high price was also given for the second prize animal, Vain Duke, from the herd of Captain E. [illegible] Wheatley, for which Mr. Bucka was content to pay 82gs. Mr. C. E. Morris was the exhibitor of Lady Bountiful, which won third award, and which was knocked down to Mr. Trevethen for 42gs. Rockhill Fancy, belonging to Mr. F. R. Fry, ranked fourth, and 46gs. was the price given for him by Sir H. N. Wrixon-Becher. Makins gained fifth award with Omdurman, a well-matured yearling, and the reserve card was given to Mr. Thomas Diggle, for Ewerby's Hope, bought by Mr. Bucka for 39gs. A similar price was given by Mr. H. Maclean for Chewton Marquis, a bull belonging to Mr. G. F. King, while it was exceeded by one guinea by the price paid for Misfit, a yearling from the herd of the Right Hon. Lord Lathom, by Mr. Motion. Messrs. P. and G. Evans were the purchasers, for 46gs., of Vain Duke's brother, by Captain E. M. Whitting, and 40gs. was paid by Mr. Kaye for Haycroft, a bull of Mr. R. Singer's 3gs. less being the price at which Mr. C. E. Morris' Perfection was sold to Colonel Blake, and Mr. S. Hill's Lancaster Archer to Mr. Wynne. For 32gs. Mr. Jagger was able to secure Gerome, belonging to Mr. J. P. Cross, and Mr. J. Graves's British Knight, brother to Wrangler, recently sold for £125, was secured to Mr. Gilding for 35gs. Mr. Kaye paid 34gs. for Patriot, a bull from the herd of Mr. W. J. Hosker, and 32gs. was given by Mr. Johnson for Mr. J. Thorley's Beaconsfield, Mr. S. H. Allen's Crowdown fetching the same price from Mr. J. Lucas. Mr. Tillard became the possession of Stonehouse, a bull, bred by the Right Hon. Viscount Baring for 30gs. Mr. W. G. G. Pitcher sold his Hermit to Mr. Wardell for 28gs., and Mr. G. Freeman his Oxford Freshman to Mr. Atkinson for 21gs. A number of other bulls were disposed of at lower figures. Among the extra stock the highest price realised was for Baron Wisbury, a very fine [illegible] last year. It was shown by Mr. J. Lawson and bought at 66gs. for the Marquis of Exeter. Mr. J. Grave's Paul Kruger was sold to Mr. Chettle for 36gs., and 35gs. each were given, on behalf of Lord Sherbourne, for Mr. E. P. Bulley's Majestic, and by Mr. Adams for Messrs. Bewley Brothers' Ewerby King.

Westmoreland.

The exhibition of the Westmoreland Agricultural Society's [illegible] in the town of Kendal [illegible] on Tuesday last, the entries [illegible] exhibits being above the average and almost equal to the high [illegible] Shire Horse Society's [illegible] were held [illegible] not expected, as special inducements were then offered. [illegible] The most noticeable falling off in entries was among the agricultural horses, and no reason could be assigned for that unless it was the separation of Clydesdales and [illegible] Shorthorns, and on this occasion there was an excellent [illegible] successful, and [illegible]

offering the new prizes which were given. Indeed, it was a question whether the tenant farmers' stock was not really better than those of the wealthier breeders. The majority of the other cattle are bred more for flesh-forming properties than for milk, whilst the tenant farmers' cattle combined the dual qualities of milk and beef. The class for bull calves was the best of those for males, containing some most promising animals. The old bulls were not quite so numerous as usual, but they were of very good quality. The class for breeding cows was a very full one. The horses, both light and heavy, were a most atractive lot, especially the former, which were well represented. Mr. W. Dowbiggin carried off the palm with his beautiful brood mare Scottish Mysor, which won in her class, and also secured the medal for the best agricultural horse in the show. Some high class hunters were exhibited. Taken generally, the sheep were of exceptional merit, particularly the Wensleydales, which in recent years have been bred considerably more than previously.

The following gentlemen officiated as judges:—Cattle and pigs: Mr. John Patton, Alnwick; and Mr. Thomas Richardson, The Wreay, Wigton. Hunters: Mr. G. T. Brown, Exton, Oakham. Hackneys: Mr. R. Whitworth, South Wood, Halifax. Shires: Mr. T. Walsh, Poulton-le-Fylde. Clydesdales: Mr. James Lowther, Quarry House, Harperley. Sheep: Longwools, Mr. H. Smith, jun., Cropwell Butler; Shropshire or other Down, Mr. T. A. Buttar, Cupar-Angus, N.B.; Wensleydale and halfbred, Mr. Robert Ewbank, Clapham; Scotch Blackfaced and Rough Fell, Mr. James Greenshields, Lesmahagow; Herdwicks, Mr. Edward Nelson, jun., Gatesgarth, Buttermere.

Prize List.

CATTLE.

SHORTHORNS.

Bull of two but not exceeding six years old: 1, J. Handley, Greenhead, Milnthorpe; 2, A. Cleasby, Podgercroft, Sedbergh; 3, E. Potter, Lewfield, Kirkby Lonsdale.

Bull, above one and under two years old: 1, R. Braithwaite, Fellside, Middleton; 2, W. G. Atkinson, Raines Hall, Kendal; 3, J. Handley, Greenhead, Milnthorpe.

Bull calf, under twelve months old: 1, W. Richardson, Laverock Bridge, Kendal; 2, W. Atkinson, Overthwaite; 3, A. Cleasby.

Cow for breeding stock, in calf or milk, three years old or upwards; 1, E. Mason, Watercrook, Kendal; 2, R. J. Huddleston, Natland Park, Kendal; 3, R. Parker, Moss End, Milnthorpe.

Heifer, above two and not exceeding three years old: 1, V. C. W. Cavendish, M.P., Holker, Cart-in-Cartmel; 2, James Hodgson, Fairies Lodge, Newbiggin Dacre, Penrith; 3, E. Mason.

Heifer above one and not exceeding two years old: 1, W. Taylor, Wharton Hall, Kirkby Stephen; 2, W. Atkinson; 3, V. C. W. Cavendish, M.P.

Three cows for breeding stock, in calf or milk: 1, E. Mason; 2, Rev. T. Butler, Rectory Farm, Bowness; 3, A. Cleasby.

Cow for dairy purposes, in calf or milk, three years old and upwards: 1, R. J. Huddleston; 2 and 3, E. Mason.

Heifer calf, under three months old: 1, E. Mason; 2, J. Handley.

Calf, bull, or heifer, under six months old: 1, A. Cleasby; 2, W. Taylor; 3, Rev. T. Butler.

SMALL TENANT FARMERS' CLASSES.

Bull, over twelve months old: 1, W. Cannon, Birks, New Hutton; 3, T. Edmondson, Low Garths, Hutton.

Bull calf, under twelve months old: 1 and 3, Mrs. Atkinson, Brunthwaite, Old Hutton; 2, J. Woof, Crook of Lune, Howgill, Sedbergh.

Cow for breeding stock, in calf or milk, three years old or upwards: 1 and 3, T. Park, Natland, Kendal; 2, E. Moorhouse, High House, Natland.

Heifer, above two and not exceeding three years old: 1, T. Park; 2, Mrs. Atkinson; 3, Collinson, Crosthwaite.

Heifer, above one and not exceeding two years old: 1, J. Milner, Croft House, Stainton, Penrith; 2, Mrs. Moorhouse; 3, J. Wood, Crook of Lune, Howgill, Sedbergh.

Heifer calf, under twelve months old: 1, J. Woof; 2, J. Airey, Barwick Hall, Middleton; 3, T. Edmondson.

Best collection of animals: 1, R. J. Huddleston, Natland Park, Kendal; 2, R. Parker, Moss End, Milnthorpe; 3, H. C. Hodgson, High Foulshaw, Milnthorpe.

Two Shorthorns, one male and one female, or two females: 1, W. Atkinson; 2, W. Taylor; 3, T. Park.

Bull or heifer under twelve months old: 1, W. Atkinson; 2, J. Morton, Skelsmergh Hall; 3, W. Taylor.

For collection of animals, viz., one horse, one stock cow or heifer, one dairy cow, and three female sheep of any breed: 1, W. Cottam; 2, J. Morton; 3, J. R. Airey.

Shorthorns. Best of all the first prize male animals: J. Handley.

SHEEP

LONG-WOOLLED.

Aged ram: 1, J. Wakefield, Sedgwick House, Kendal; 2, R. Parker; 3, Messrs. J. Sedgwick and Sons, Lambrigg Head, Lambrigg.

Shearling ram: 1, R. Parker.

Tup lamb: 1 and 2, J. R. Airey; 3, R. Parker, Moss End, Milnthorpe.

Three ewes, which have each reared a lamb in the current year: 1, R. Parker; 2, J. Wakefield; 3, J. R. Airey.

Three shearling gimmers: 1, R. Parker; 2, J. R. Airey; 3, J. Wakefield.

Three gimmer lambs: 1, J. R. Airey; 2, J. Wakefield; 3, R. Parker.

SHROPSHIRE OR OTHER DOWNS.

Aged ram: 1, R. J. Huddleston, Natland Park, Kendal; 2, J. Gibson and Son, Kendal.

Shearling gimmer: 1 and 3, R. J. Huddleston, Natland Park, Kendal.

Tup lamb: 1 and 3, R. J. Huddleston; 2, J. Todd, Stainbank Green, Kendal.

Three ewes which have each reared a lamb in the current year: 1, R. J. Huddleston; 2, J. Gibson and Son, Kendal.

Three shearling gimmers: 1, J. Gibson and Son; 2, R. J. Huddleston.

Three gimmer lambs: 1, R. J. Huddleston; 2, J. Gibson and Son; 3, J. Todd.

WENSLEYDALE AND HALFBRED.

Aged ram: 1, W. Rhodes, West House, Kirkby Lonsdale; 2, J. Gibson and Son; 3, Lord Henry C. Bentinck, M.P.

Shearling ram: 1, W. Rhodes; 2, J. Gibson and Son; 3, Lord Henry C. Bentinck, M.P.

Three shearling gimmers: 1, W. Rhodes; 2, J. Gibson and Son; 3, Lord Henry C. Bentinck.

Three gimmer lambs: 1, J. Gibson and Son; 2, W. Rhodes; 3, Lord Henry C. Bentinck.

Wensleydale Blue-faced Sheep Breeders' Association and Flock Book Society's special prizes for pair of Wensleydale lambs (either sex): 1, Lord Henry C. Bentinck, M.P.; 2, Messrs. James Gibson and Son.

Special prizes: 1, William Rhodes; 2, Messrs. James Gibson and Son; 3, Lord Henry C. Bentinck.

SCOTCH BLACK-FACED.

Aged ram: 1, Executors of the late T. Dargue, Burneside Hall, Kendal; 2, T. Rawlinson.

Shearling ram: 1 and 2, Executors of the late T. Dargue; 3, T. Rawlinson.

Tup lamb: 1 and 3, T. Rawlinson; 2, Executors of the late T. Dargue.

Three ewes which have each reared a lamb in the current year: 1, T. R. Bownass, Barbon; 2, Executors of the late T. Dargue; 3, Thos. Harrison, Biggins Hall, Kirkby Lonsdale.

Three shearling gimmers: 1, Executors of the late T. Dargue; 2, T. Rawlinson; 3, T. R. Bownass.

Three gimmer lambs: 1, Executors of the late T. Dargue; 2, T. Rawlinson; 3, E. Rawlinson, Docker Hall, Grayrigg.

ROUGH FELL (other than Black-faced).

Aged ram: 1 and 2, Mrs. H. Wharton, Ashstead, Whinfell.

Shearling ram: 1 and 3, Jas. Shuttleworth, Castle Bank, Grayrigg; 2, Ed. Swidenbank, Whelpside, Whinfell.

Tup lamb: 1 and 2, Ed. Swidenbank; 3, H. Wharton.

Three ewes which have each reared a lamb in the current year: 1, Joseph Wood, Cooper House, Selside; 2, W. G. Atkinson; 3, Mrs. Atkinson, Low Groves, Kendal.

Three shearling gimmers: 1 and 3, Jos. Wood; 2, Mrs. Atkinson.

Three gimmer lambs: 1 and 2, Jos. Wood; 3, Mrs. Atkinson.

HERDWICK.

Aged ram: 1 and 3, Wm. Abbott, Hartsop Hall, Patterdale; 2, Messrs. John Dove and Son.

Shearling ram: 1 and 3, W. Mackereth, Green Bank, Ambleside; 2, J. Dove and Son.

Tup lamb: 1 and 3, W. Mackereth; 2, J. Dove and Son.

Three ewes which have each reared a lamb in the current year: 1, J. Dove and Son; 2, W. Mackereth; 3, R. Rigg, Windermere Hotel.

Three shearling gimmers: 1, W. Mackereth; 2, J. Dove and Son.

Three gimmer lambs: 1, W. Mackereth; 2, J. Dove and Son.

HALF-BREDS.

Three ewes which have each reared a lamb in the current year: 1 and 2, J. Gibson and Son, Kendal.

Three shearling gimmers: 1 and 3, J. Gibson and Son; 2, Lord Henry C. Bentinck, M.P.

Three gimmer lambs: 1 and 2, T. Dixon and Son, Ellers Farm, Caton, Lancaster; 3, J. Wood, Cooper House, Selside.

Five sheep, four females and one male, to be Herdwick, Black-faced, or half-bred females with a pure-bred ram: 1, Exors. of the late T. Dargue; 2, T. Rawlinson.

Five sheep, four females and one male, of any pure-breed other than those mentioned in the previous class: 1, R. Parker, Milnthorpe; 2, J. R. Airey, Patton.

One tup and three females, any age, Longwood, Wensleydale, Shropshire, or Leicester: 1, J. Gibson and Son; 2, R. J. Huddleston.

One Long-woolled or Wensleydale ram and three half-bred gimmer lambs: 1, J. Gibson and Son; 3, J. Wood.

One tup and three females, any age, Rough Fell or Herdwick: 1, J. Wood; 2, J. Dove and Son.

PIGS.

Boar, large breed, above six months old: 1 and 2, H. H. Owtram, Newland Hall, Ellel, near Lancaster.

Boar, small breed, above six months old: 1, W. Askew, Oaks Farm, Cartmel Fell; 2, C. Thompson, Halfpenny Stainton.

Breeding sow, large breed: 1, H. H. Owtram, Newland Hall, Ellel, near Lancaster; 2, G. Wilson, Bridge End, Milnthorpe; 3, M. Robinson, Carus Green, Kendal.

Breeding sow, small breed: 1, C. Thompson, Halfpenny Stainton; 2, M. Robinson.

HORSES

HUNTERS.

Brood mare, in foal, or with foal at foot: 1, J. S. Rigg, Appleby; 2, J. Wilson, Helsington Laithes, Kendal; 3, T. Edmundson, Low Garths, Hutton.

Three-year-old gelding or filly: 1, Exors. of T. Dixon, Priest Hutton, Carnforth; 2, J. Hartley and Co., Mill Head, Carnforth; 3, T. Harrison, Bowness.

Two-year-old gelding or filly: 1 and 2, J. Wilson, Helsington Laithes, Kendal; 3, T. Tomlinson, The Hagg, New Hutton.

One-year-old colt, gelding, or filly: 1, W. F. Egerton, Gawithfield, Ulverston; 2, Major R. L. Breeks, F.R.A., Helbeck Hall, Brough, Kirkby Stephen; 3, T. Edmondson, Low Garths, Hutton.

Colt or filly foal: 1, T. Atkinson, Woodhouse, Milnthorpe; 2, J. S. Rigg, Appleby; 3, J. Wilson, Helsington Laithes, Kendal.

Hunter up to 15 stone: 1, R. Hothersall, Preston; 2, C. H. Wilson, Kendal; 3, J. Wilson, Kendal.

Hunter up to 12 stone: 1, C. H. Wilson, Kendal; 2, Dr. E. S. Jackson, Carnforth; 3, T. Atkinson, Milnthorpe.

HARNESS AND HACKNEYS.

Brood mare, in foal or with foal at foot: 1, J. W. Liver, Calder Vale, Barnacre; 2 and 3, J. Wrigley, Holbeck, Windermere.

Three-year-old gelding or filly: 1, J. Clarkson, stone merchant, Carnforth; 2, Exors. of J. Howorth, Low Sizergh, Kendal; 3, T. H. Spooner, Mill Hill, Warcop.

Two-year-old gelding or filly: 1, R. and P. Hartley, Ulverston; 2, Dr. G. W. Brumwell, Stricklandgate, Kendal; 3, W. Wray, High Crag, Burneside.

One-year-old colt, gelding, or filly: 1, M. Robinson; 2, J. Wrigley; 3, Dr. G. W. Brumwell.

Colt or filly foal, the property of the exhibitor: 1, M. Robinson; 2, R. Burrow, Greenbank, Whittington; 3, Exors. of J. Howorth.

Pony of any age, mare or gelding, not exceeding 13½ hands: 1, T. G. Benn, Newton Reigney, Penrith; 2, A. S. J. Musgrave, Abbey Lands, Stackhouse, Settle; 3, C. Iveson, Sedbergh.

Hackney (any age, mare or gelding, over 13½ and not exceeding 15½ hands: 1, T. G. Benn, Newton Reigney, Penrith; 2, J. W. Liver; 3, S. Harper, Loftus Hill, Sedbergh.

Lady's hack of any age, mare or gelding, from 13 2 to 15 2 hands: 1, N. Dixon, Priest Hutton, Carnforth; 2, J. Hudson, High House, Crook; 3, J. Case, Gwen Holme, Morecambe.

Road or cob, mare or gelding, of any age, not exceeding 15 hands: 1, J. W. Liver; 2, G. W. Dalston-Ewebanke, Brough, Kirkby Stephen; 3, A. S. J. Musgrave, Abbey Lands, Stackhouse, Settle.

Best turn-out: 1, S. Harper, Loftus Hill, Sedbergh; 2, E. McNaughtan, St. Anthony's, Milnthorpe; 3, J. Clarkson, Carnforth.

Best by Cleveland: 1 and 3, M. Robinson; 2, F. C. Bowness.

Best by Gazette: 1, Exors. of J. Howorth; 2, Mrs. Pagnam, Winster, Windermere.

The Hackney Horse Society's silver medal: 1, T. G. Benn.

Best first prize horses, mares or geldings, in the classes for Hunters, Harness, and Hackneys, etc.: J. Wilson.

AGRICULTURAL PURPOSES.

SHIRES.

Brood mare, in foal or with foal at foot: 1, V. C. W. Cavendish, M.P., Holker; 2, J. Fox, Corless Mill, near Lancaster; 3, E. Whittaker, Windermere.

Three-year-old gelding or filly: 1, R. J. Huddleston, Kendal; 2, J. Towers, Carnforth; 3, J. Dobson, Burton, Westmorland.

Two-year-old gelding or filly: 1, H. Mackereth; 2, J. Towers; 3, H. Robinson, Old Hutton.

One-year-old colt, gelding or filly: 1, T. Allonby, Dalton-in-Furness; 2, V. C. W. Cavendish, M.P.; 3, Lord Henry C. Bentinck, M.P.

Colt or filly foal: 1, V. C. W. Cavendish, M.P.,; 2, E. Rawlinson, Grayrigg; 3, E. Whittaker.

Shire Horse Society's silver medal: 1, V. C. W. Cavendish, M.P.; r, J. Towers.

CLYDESDALES.

Brood mare, in foal, or with foal at foot: 1, W. Dowbiggin, Millom; 2, H. C. Hodgson, High Foulshaw; 3, R. Hudson, Windermere.

Three-year-old gelding or filly: 1, W. Griffiths, Castlesteads, Plumpton, Penrith; 2 and 3, A. Mansell, Crossrigg, Penrith.

Two-year-old gelding or filly: 1 and 2, A. Mansell; 3, W. Cottam.

One-year-old colt, gelding, or filly: 1, W. Dowbiggin; 2, Messrs. Hodgson; 3, W. Carr.

Colt or filly foal: 1, H. C. Hodgson; 2, W. Carr; 3, R. Addison.

The Clydesdale Horse Society's bronze medal: 1, A. Mansell; 2, W. Dowbiggin; he, A. Mansell.

Pair of agricultural horses, mares or geldings, shown in gear: 1, W. Griffiths; 2, A. Mansell, Crossrigg, Penrith; 3, R. Parker.

Foal of any breed: G. Bownass, Gilpin Bridge, Kendal.

Single agricultural horse, mare or gelding, shown in gear: 1, W. Dowbiggin; 2, R. Hudson; 3, R. Parker.

Agricultural horse, mare or gelding, shown in cart and gear: 1, H. C. Hodgson; 2, R. Hudson.

Three agricultural mares, any age: 1, J. Lancaster; 2, R. J. Huddleston; 3, T. Clement, Cinderbarrow, Levens.

The Society's silver medal for best of all the first prize horses, mares or geldings, in classes for agricultural purposes: 1, W. Dowbiggin; r, V. C. W. Cavendish.

South Tyne.

The annual show of the South Tyne Agricultural Society was held in Bellister Park under most favourable auspices on the 8th inst. The attendance of visitors was very good, and the day's takings constituted a record in the Society's history. The gate money amounted to £140 8s. 9d.; catalogues sold, £16 4s. 6d.; grand stand, £3 1s.; guessing competition, £5 9s. 6d.; total, £165 3s. 9d., against £118 odd last year. There was a falling off in the total entries compared with last year, the principal decrease being in the cattle. Shorthorns, which numbered fifty-seven against seventy-one last year, contained on this occasion no representatives from Bellister Castle, but there were several from Mr. Henderson, East Elrington, and Mr. Thomas Lambert, Elrington Hall, which took the cream of the awards, though Mr. Carr, Bunker's Hill; Mr. E. Joicey, Blenkinsopp Hall; Mr. Edgar, Birchfield-gate; and Mr. J. W. Johnson, Whitfield, received favourable notice. Galloways and half-breds, too, were short of last year's numbers, being fifty-six and thirty-six respectively against eighty-four and fifty-two in 1899. A characteristic of these, and indeed of the cattle generally, was a high level of merit all through, and not, as is sometimes the case, a few animals of surpassing merit and a larger number of the mediocre stamp. Mr. Dove, of Thorngrafton, and Messrs. Stothert, Cleugh Foot, were the most successful among the Galloways, but the Nether Denton district was strongly represented by the exhibits of Messrs. Fenwick, the Temon; Thomlinson, Cleugh Head; and Holliday, of Low Row, while the cow belonging to Mr. Graham, of Gapshield, repeated his victory at Brampton. As might be expected in such a blue-grey district the half-breds were a capital lot. The Leicester sheep were scarcely so numerous as last year, but were on a high level as regards quality, and had the honour of producing the best sheep exhibited on the ground, the two year ram of Mr. Nichol. Black-faces, however, were a special feature of the day, both as to numbers and quality, such as has not been exhibited before on the South Tyne ground, and Messrs. Lowdon, of Whitelees, Blanchland, and Robson, of Newton, Bellingham, who divided most of the honours pretty fairly between them, are to be congratulated on the merit of their representatives.

Agricultural horses reached a total of eighty entries, against sixty last year. The first class of brood mares in foal or with foal at foot always comes out well at Haltwhistle, and the present occasion was no exception. Most of the regular exhibitors in this section were represented, but the winner hailed from Alston. Mr. Lancaster's three-year-old roan adding another to her owner's already long list of honours gained in the show ring. Mr. C. Waugh's Broomhouses yearling filly, which took first last year among the foals, was now awarded the special ticket for the best animal in the agricultural horse classes. Roadsters were also more numerous than last year—fifty-seven against fifty-one—and were a good useful class, in which the more immediate local exhibitors more than held their own. A reduction in the hunter classes, rendered expedient by the fact that the district is now not hunted, would account for the falling off in this department from thirty-four to seventeen, or exactly one-half. Ponies were about the same, but Hackneys were less numerous. As the classes for hunters and Hackneys are open they included some noted prize-winners, amongst which was Mr. Benn's Melford Maid, which took 105 first prizes last year, and has taken forty-seven more this year. The subsidiary sections of the show, shepherds' dogs, butter, etc.,

were well up to previous standard. The two leaping events each attracted good entries and excited the utmost interest.

The following were the chief awards:—

Prize List.

CATTLE

SHORTHORNS.

Bull above two years old: 1, W. Henderson, East Ellington, Haydon Bridge (Ellington Stamp); 2, Thos. Lambert, Ellington Hall, Haydon Bridge (Cornwallis); 3, Mr. Carr, Bunkers Hill, Alston.

Bull above one and under two years old: 1, Thos. Lambert (Royal Cardigan); 2, W. Henderson (Chancellor); 3, E. Joicey, Blenkinsopp Hall (Terra Rem).

Bull calf: 1, Wm. Henderson; 2, Jacob Edgar, Birchfieldgate, Tattwhistle; 3, Joseph Yeats, Todhillward, Coanwood; r, E. Joicey.

Cow in calf or milk, above three years old: 1, W. Henderson; 2, Mr. Carr; 3, Messrs. Pickering, The Lees, Haydon Bridge.

Heifers, above two and under three years old: 1, Thomas Lambert; 2, W. Henderson.

Heifer, above one and under two years old: 1 and 3, W. Henderson; 2, Messrs. Pickering.

Heifer calf: 1 and 2, W. Henderson; 3, Mr. Carr.

Pair of bullock stirks (retaining their calf teeth): 1 and 2, W. Johnson, Parmontley Hall, Whitfield, R.S.O.

Special prize (confined to tenant farmers) Best three Shorthorns: W. Henderson.

GALLOWAYS

Bull, above two years old: 1, T. J. Dove, Thorngrafton, Bardon Mill (Royal Jubilee of Thorngrafton); 2, Thos. Cowing, Low Hall, Hayden Bridge (Black Prince of Thorngrafton)

Bull, above one and under two years: 1, T. J. Dove; 2, George Tweddle, Wydon, Haltwhistle.

Bull calf: 1, John Thomlinson, Clough Head, Low Row Parish Councillor); 2, Thomas Fenwick, Tenton, Low Row; r, John J. Wigham, Hangill House, Coanwood.

Cow in calf or milk above three years: 1, Edwin Graham, Sepshields, Gilsland; 2, John Holliday, Broom Hill, Low Row; r, John Oliver, Cawfields, Haltwhistle; hc, Messrs. Stothert, Cleughfoot, Haltwhistle; c, Joshua Sowerby, Gallowshieldegg, Bardon Mill.

Heifer, above two and under three years old: 1 and r, Messrs. Fenwick; 2, John Thomlinson; hc, T. J. Dove.

Heifer above one and under two years old: J. Messrs. Stothert; 2, John Thomlinson; r and hc, Messrs. Fenwick.

Heifer calf: 1 and 2, Messrs. Stothert; r, T. J. Dove.

Pair of bullock stirks retaining their calf teeth: 1, John Oliver; 2, Thomas Mitchinson, Mess House, Coanwood.

Special (confined to tenant farmers in the Union)—Three Galloways: 1, T. J. Dove.

HALF-BREDS.

Polled Milch cow in calf or milk: 1, John J. Armstrong, Doctor's Bogg, Haltwhistle; 2, Joseph Bell, Woodhouse, Coanwood; r, Jos. Robinson, High Closaburns, Haltwhistle.

Polled heifer above two and under three years old: 1 and c, John Oliver, Cawfields; 2, S. Lee, Featherstone, Haltwhistle.

Dairy cow: 1, Jacob Edgar, Birchfieldgate; 2, Joseph Bell; c, John J. Armstrong.

Special for pair of fat heifers or steers bred on "Bibby's Mike":—1 and 2, M. Thompson, Plenmellor, Haltwhistle.

Special for blue-grey heifer stirks retaining their calf teeth: 1, S. Lee; 2, John Oliver; r, J. W. Johnson, Low House, Haltwhistle.

Special for pair of half-bred bullock stirks, retaining their calf teeth: 1, S. Lee; 2, John Oliver; c, J. W. Johnson.

SHEEP.

LEICESTERS.

Best ram above two years: 1, Messrs. Hudspith, Hindley Hill, Allendale; 2, John W. Nichol, Lough Green, Lanchester-Tyne; hc, Messrs. Pickering, The Lees, Haydon Bridge.

Best ram above two years: 1 and special, John W. Nichol; Messrs. Pickering.

Ram lamb: 1, Joseph T. Armstrong, Hindley Hill; 2, Messrs. Hudspith.

Pen of two gimmers: 1, John W. Nichol; 2, Messrs. Pickering; hc, George Tweddle, Wydon.

Pen of two gimmer lambs: 1, Messrs. Pickering; 2, Joseph Armstrong; hc, Messrs. Hudspith.

Special for Leicester ram, any age; 1, John W. Nichol.

BLACK-FACED (HILLS).

Ram above two years: 1, Messrs. Lee, Hesketh-in-the-Moor, Allendale; 2, John Robson, Newton, Bellingham; r, George Millburn, Garrets Hall, Sinderhope, Allendale.

Ram under two years: 1, John Lowdon, Whitelees, Bromlands; 2, John Robson; r, Messrs. Raine, Thornhope, Scraggyford.

Ram lamb: 1 and 2, John Robson; r, Messrs. Lee.

Pen of two ewes: 1, John Robson; 2, Messrs. Lee; r, John Lowdon.

Pen of two gimmers: 1, John Lowdon; 2, John Robson.

Pen of two gimmer lambs: 1, John Robson; 2, Messrs. Raine; r, Jos. W. Stephenson, Limnolds, Hexham; hc, Frank Moscrop, Butterburn, Gilsland.

Special for male Black-faced sheep any age: John Robson.

Female Black-faced sheep, any age: John Lowdon; 2, John Robson.

Special for group of Black-faced sheep (not including rams), unfed, direct from the hills), consisting of two ewes, two shearling gimmers, and two gimmer lambs: 1, John Lowdon; 2, Jos. W. Stephenson, Limnolds, Hexham; hc, Frank Moscrop, Butterburn, Gilsland.

HALF-BREDS.

Pen of five shearling gimmers, half-bred between Leicester and Black-faced: 1, J. W. Johnson, Parmontley Hall; 2, George Tweddle.

Pen of five gimmer lambs, half-bred between Leicester and Black-faced: 1 and r, J. W. Johnson, Low House; 2, Thomas Mitchinson, Mess House.

Pen of five shearling gimmers, half-bred between Leicester and Cheviot: 1 and 2, J. W. Johnson; 3, Joseph T. Armstrong, Hardrodin.

Pen of five gimmer lambs, half-bred between Leicester and Cheviot: 1 and 2, R. E. Woodman, Crow Hall, Bardon Mill; r, Joseph T. Armstrong.

Special prize for best pen of sheep in Classes 33, 34, 35, and 36: 1, J. W. Johnson; 2, R. E. Woodman.

Special for best sheep in show, of any class: J. W. Nichol.

PIGS

Mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, three years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, five years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

For the best mare or gelding, three years old and upwards, 14 hands and under 15 hands: 1, Thomas Foster, Carrshields, West Allen, Whitfield, R.S.O.; 2, W. Morrison, Spadeadam; r, T. G. Bell, Hallcrag, Brampton; hc, Jackson Dove, Wood Head.

Mare or gelding, three years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, five years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

For the best mare or gelding, three years old and upwards, 14 hands and under 15 hands: 1, Thomas Foster, Carrshields, West Allen, Whitfield, R.S.O.; 2, W. Morrison, Spadeadam; r, T. G. Bell, Hallcrag, Brampton; hc, Jackson Dove, Wood Head.

Mare or gelding, three years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, five years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Mare or gelding, three years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, five years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

For the best mare or gelding, three years old and upwards, 14 hands and under 15 hands: 1, Thomas Foster, Carrshields, West Allen, Whitfield, R.S.O.; 2, W. Morrison, Spadeadam; r, T. G. Bell, Hallcrag, Brampton; hc, Jackson Dove, Wood Head.

Mare or gelding, three years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, five years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Mare or gelding, three years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, five years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

For the best mare or gelding, three years old and upwards, 14 hands and under 15 hands: 1, Thomas Foster, Carrshields, West Allen, Whitfield, R.S.O.; 2, W. Morrison, Spadeadam; r, T. G. Bell, Hallcrag, Brampton; hc, Jackson Dove, Wood Head.

Mare or gelding, three years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, five years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Mare or gelding, three years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, five years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

For the best mare or gelding, three years old and upwards, 14 hands and under 15 hands: 1, Thomas Foster, Carrshields, West Allen, Whitfield, R.S.O.; 2, W. Morrison, Spadeadam; r, T. G. Bell, Hallcrag, Brampton; hc, Jackson Dove, Wood Head.

Mare or gelding, three years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, five years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Mare or gelding, three years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, five years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

For the best mare or gelding, three years old and upwards, 14 hands and under 15 hands: 1, Thomas Foster, Carrshields, West Allen, Whitfield, R.S.O.; 2, W. Morrison, Spadeadam; r, T. G. Bell, Hallcrag, Brampton; hc, Jackson Dove, Wood Head.

Mare or gelding, three years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, five years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Mare or gelding, three years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, four years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Special for mare or gelding, five years old (not qualified for Shorncliffe, Corbridge; 2, B. Spraggon; hc, E. J. Smith, Dotland Hall.

Mare or gelding, any age or size, not having previously won a first prize: 1, J. R. Spraggon, Willimoteswick; 2, M. Grier, Gilsland.

Melton Mowbray Horse Show.

The eleventh annual show of Melton Mowbray took place on the 15th inst. in Egerton Park, kindly lent for the occasion by the Countess of Wilton and Mr. W. Pyott. Although unfavourable weather was experienced in the early part of the morning, it brightened up considerably as the day advanced, and the show was quite as successful as any of its predecessors. Considering that the entries, with the exception of one class, are limited to exhibitors residing within a radius of twelve miles of Melton Mowbray Church, the quality of the Shire horses and hacks, as well as the hunters shown, was a credit to the district. The number of entries this year showed a decided and satisfactory increase, the total being 467, an increase of thirty-seven entries in the horse classes, and several more in the classes for dairy produce. The exhibits of Shire horses were remarkably good, the judges themselves expressing admiration of many of the horses shown, the two-year-old fillies being an exceptionally good class. Colts foaled last year were well represented, the premier prize in this class being secured by Mr. Charles Maclean, of Walkcote, with a bay sired by Dunsmore Masterman. Mr. Frank Needham, of Oakham, was second with a brown colt by Monks Prince, possessing good feet and giving great promise. Shire fillies foaled in 1899 were both strong in number and quality, Mr. Joseph Rigby, South Croxton, being first with a big bay of the upstanding type, which was closely rivalled by Mr. Maclean's well-turned grey, to which the second prize was awarded. Messrs. A. and J. Holm, of Carlton Curlieu, were third with a promising youngster. The 1898 geldings were an exceptionally weighty lot, and were considered the best that have been shown in the county this year. Mr. R. C. Cooper was first with a well-balanced black of good quality. As closely intimated, fillies of the same age made a strong class, Mr. Maclean again being the winner of the first place with Without Lolly, by Nonsense Adjutant, a well-grown animal, with plenty of bone and other first-class qualities. Mr. M'Turk was second with a big filly of excellent quality. Fillies foaled in 1897 produced another strong entry, the first award going to a well-known prize winner in Mr. H. Smith-Carrington's Rocks Madam, which was first at the Royal, being sired by Calwick Heirloom. Three and four year old geldings were all useful animals, although they possessed few, if any, characteristically strong features of merit. The class for pairs aroused keen competition, but Mr. Matthew Hubbard's entry from Essex was ultimately awarded the first prize Mr. Cooper being a good second. Mr. R. Crawford, of Lowesby, was first for Shire bred mares with foals, with a thoroughly good mare, the second award falling to Mr. A. Shipman, Thorpe Arnold, with a useful black mare which had been placed first in another class.

The classes for hunters and hacks produced many exceptionally fine exhibits, the general opinion being that this section of the show could not be attained or anything previously seen at Melton. The class for mares with foals at foot only attracted three entries, and Messrs. Carr and Crawford, of Oakham, had no difficulty in obtaining the premier honours with their respective exhibits. Pleasure [illegible] by Cadi. There was a good entry [illegible] Mr. R. L. Pickering [illegible] Mr. W. Pickering [illegible] Mr. J. Pickering [illegible] Mr. J. C. Page [illegible] Dalby Hall [illegible] by Polonius; and Mr. J. C. Page [illegible] Cadi. In the [illegible] were a large

entries. The judges awarded Mr. J. A. Jackson the premier award for a chestnut filly, Starlight, sired by the renowned Marioni, which one of the judges said was the best foal he had seen this season. Mr. J. W. Musson, of Wartnaby, was second with a bay filly by Cylinder, which was also an animal of considerable merit, but not up to the standard of the winner. In the class for the best hunter foaled in 1898 Mr. Charles Brown, Melton, was an easy winner, the second prize being awarded Mr. W. Mount, of Waltham, Melton. Mr. Algernon Hack's Merry Lad was deservedly awarded the premier prize in the class for four-year-olds and upwards capable of carrying 14 stone. The whole of the other classes were of equally good quality, the jumping competitions aroused considerable interest, each of the events being keenly contested.

Prize List.

SHIRES.

Shire colt, foaled in 1899, entered in Stud Book or eligible for same: 1, C. Maclean, Withcote, Oakham; 2 and r, F. Needham, Melton Road, Oakham.

Cart gelding, foaled in 1899: 1, J. Craig, Three Gates, Billesdon; 2, A. Shipman, Thorpe Arnold, Melton; 3, R. Crawford, Lowesby, Billesdon; 4, W. T. Kirk, Scalford.

Shire filly, foaled in 1899: 1, J. Rigby, South Croxton; 2, C. Maclean; 3, A. and J. Holm, Carlton Curlieu and Tilton; 4, M. Hubbard, Ivy House, Eaton, Grantham; r, W. Carter, Goadby Marwood, Melton; hc, G. Simpson, Hickling, Melton; c, John Barker, Ragdale.

Chester Foal Show.

The Chester Farmers' Club's eighteenth annual foal show was held on the Linen Hall, Chester, on the 15th inst., and was well attended by farmers and well-known horse breeders from all parts of the country. The entries reached record figures, being 264, as compared with 222 last year, whilst in point of quality the show was considered to be one of the best held under the auspices of the society. Animals possessing exceptionally good points were shown. For the best hunter mare with foal at foot, Mr. Parker, of Stanney, captured the coveted trophy (a silver cup), with his chestnut, Ruddigore—Dora, which won the 100 guinea cup at Birkenhead. In the class for roadster colt or filly foal, Mr. Buller, Rowton, and Mr. J. Stonar, jun., Chester, were first and second prize winners respectively with animals of the right stamp, both sired by Rowton Vinca. The Hackney mare section contained some first-rate exhibits, of which the district might well be proud. Mr. Stonar distinguished himself by winning the Hackney Society's medal with an excellent mover, which showed good quality. The special prize offered by Mr. Stonar for colt or filly foal by any of his stallions went to Dr. F. E. Williams, of Wrexham, who exhibited a capital foal by Crusader. Mr. Denson, Picton, won the special prize by Austin C. Carr for the best yearling by his horse Elevator. Mr. Woodhall, of Bollington, took the primary award for the best foal by Elevator, with a big and strong filly, possessing all its sire's good points.

Shire Horse Society's medal for the best Shire mare, filly, or filly foal: Mr. S. Jones, Poole Hall.

Best agricultural colt or filly foal: 1, P. Allen, Willaston; r, Carrier, Sealand.

Silver cup for two-year-old or yearling agricultural gelding: 1, R. Dodd, Tarporley; 2, A. S. Gaskell, Prenton.

Best colt or filly foal by J.P.: 1, Carrier, Sealand; 2, J. Beecroft, Duckington; 3, E. Evans, Belgrave.

Agricultural colt or filly foal by any of Mr. J. W. Kenworthy's Shire horses: 1, P. Allen; 2, L. Dodd, Bickerton; 3, S. Jones, Poole Hall.

Best colt foal by Kesterton: 1, P. Allen; 2 and 3, T. J. Dutton, Saltney.

Best filly foal by Kesterton: 1, T. Lea, Waverton; 2, H. S. Whalley, Bickerton; 3, T. L. Okell.

Best colt or filly foal by any of Mr. J. Stonar's stallions: 1, Dr. F. E. Williams, Wrexham; 2, G. Denson; 3, W. Dyke, Pulford; 4, Benson.

Yearling by Elevator: 1, G. Denson, Picton; 2, J. Mottershead, Coddington.

Foals by Elevator: 1, L. Woodhall, Bronington; 2, S. Gerrard, Clutton Hall; 3, G. Denson, Picton.

Best foals by Mr. F. Jeffs (Hapsford) horse: 1, J. Noden, Alvanley; 2, Mrs. Roberts, Eaton.

Compton Stud Show and Sale.

The fifteenth annual show and sale in connection with the Compton Stud Company took place at Horsington Park, by kind permission of Mr. R. Doddington, on Tuesday and Wednesday. Although threatening at times, no rain fell during the judging on Tuesday, but despite the fine weather there was apparently a falling off in the attendance on that day, but was made up for on the second day. The entries, however, showed but little diminution in numbers, there being only five less than last year. Considering the large number of animals produced in the district over which the Stud is used for service abroad and to replace home mounts it is surprising that the decrease was not larger. What deficiency there was in numbers in connection with the older animals was nearly made up by the increase in the younger stock, whilst the quality of the animals shown generally compared most favourably with that of other years. The entries for the various classes on Tuesday were:—Brood mares, 54; foals, 29; ponies, 8; yearlings, 12; two-year-olds, 12; three-year-olds, 19; total, 134. For the show on Wednesday there were 98 entries:—Hacks, 18; harness cobs, 4; horses, 13; light-weight hunters, 30; heavy-weights, 18; four-year-old light-weights, 9; heavy-weights, 6. The operations of the stud and the influence it has had on the increased quality of local-bred hunters, etc., has been so often described and is so well known throughout the south-west that it is superfluous for us to enlarge on its many advantages. The company have been particularly careful in the choice of sires, and the fact that their progeny bear away some of the prizes at the national shows, and almost sweep the boards at local exhibitions, amply proves that the selection of sires leaves nothing to be desired. Thirty-four horses have been used for stud purposes, but there have been no fresh additions since the last show.

On Tuesday judging began with the farmers' brood mares, which were a very large and fairly strong class. There was a small quantity of rather rough stock, but the mares picked out for services were a very smart lot, and the whole of them well suited for breeding a good type of hunter. Mr. C. Wakely's bay mare Shamrock, which took first prize, had an exceptionally good foal at foot. The mare of Mr. W. Andrews was given the reserve number, and would have been well in the first six, but was thrown out, having taken a premium before. In the open class nineteen mares were judged, and they proved an exceptionally excellent collection. The leader was again Mr. Wakely's mare Shamrock. Mr. Holt Needham's bay mare Goodcraft was also of excellent type, as indeed were all of the four mentioned, and it is seldom four better dams are seen in the same class. The winner in the two classes was also awarded the championship prize given by the Hunters' Improvement Society. There was a strong competition for the five equal prizes given for the best five foals. The youngsters may be termed a most likely looking lot. The first six were all nice colts and did their dams and sires justice. Some of the mares shown have been heavy winners at various shows.

The three-year-olds were the best of the young stock, and an exceptionally nice gelding, Pioneer, the property of Messrs. Moody, of Stapleton Manor, was undoubtedly the pick of them, and was awarded the prize for champion youngster of the show. In the same class Mr. T. Miller's Marquis, which has already taken several prizes in good company, was awarded the second honours, Mr. Munckton's Monarch, a very useful gelding, being a good third. The majority of the two-year-olds were decidedly good. Mr. Hoddinott's chestnut gelding Acton was placed first, as being a good all-round type and likely to grow into a valuable animal. A neat brown gelding, belonging to Mr. Hillard, Fivehead, was given the second card, but was driven closely by the chestnut mare of Mr. A. E. Pitt-Rivers, which was awarded the silver medal of the Hunters' Improvement Society for the best hunter filly in the show, also Mr. T. S. Metcalfe's chestnut Handy Man, to which the judges awarded the reserve number. Mr. T. H. Miller's Mainsail, a very useful type, which took first honours in a strong class at the Bath Show, failed "to catch the eye" of the judges. There were twelve entries in the yearling class, which was not a very superior batch taken as a whole. There were, however, a few very useful looking youngsters, which give evidence of becoming fair specimens of the hunter type later on. The

ponies were not largely represented, only eight being entered. Although a small they were a fairly neat class, the best of which was undoubtedly Mr. A. Hoddinott's bay gelding Flying Fox.

As on Tuesday, the judging on Wednesday commenced early in the forenoon, and was completed soon after twelve o'clock. The first class to come under notice was that for hacks, fillies or geldings, four years old and upwards, not exceeding 15.2 hands, and sired by one of the Compton Stud stallions. There were eighteen entries, and amongst them were some very fine animals. A remarkably good mare named Elegance, the property of Mr. G. T. Tilley, came out top, but was closely followed by Major Towers-Clark's Cocoatina, both being four years old. Some very fair animals were shown in the class for light-weight hunters, fillies or geldings, but there was nothing particularly striking, and on the whole they were not quite so good as those exhibited last year. The Hunters' Improvement Society's medal for the best hunter got by a premium stallion or by a registered hunter sire out of a registered mare was won by Mr. J. Day, Huxton, Shepton Mallet, with his brown mare Maggie, a five-year-old by Yard Arm, and she also carried off the champion medal for the best of the four winning hunters in the show. The heavy-weight hunters constituted a sterling class, Mr. Day's Maggie being the first prize winner, while Mr. C. Warr's Marshal was a very nice second, and would make a first-rate charger. As a whole, the class for four-year-old light-weight hunters was good, the first prize winner, Mr. J. Day's Edward by Master Ned, being a gelding of high quality, while Mr. G. T. Tilley's Elegance, who came second, was a charming mare. Some particularly good hunters were included in this lot, displaying both grace of action and symmetry of build. The corresponding class for heavy-weights embraced some smart animals, but on the whole the quality was only of a moderate character. The two other classes were filled with good animals, and the prize winners well deserved their awards.

Prize List.

TUESDAY.

Half-bred brood mares covered this year by one of the thoroughbred stallions, or for young mares (not exceeding five years), with foals at foot, sired by one of the thoroughbred stallions (open to tenant farmers): C. M. Wakely, Rugg's Farm, Kilmington, Axminster; T. H. Miller, Oborne, Sherborne; C. W. Francis, Horsington Farm, Templecombe; F. H. Sawtell, Lavant, Chichester; H. P. Woolcott, The Manor, Wanborough Plain, Swindon; R. W. Andrews, Church Farm, Cucklington, Wincanton, Bath.

Half-bred brood mares, covered this year by one of the thoroughbred stallions, or for young mares (not exceeding five years), with foals at foot, sired by one of the thoroughbred stallions (open) 1, C. M. Wakely (Shamrock); 2, O. N. Holt-Needham, Castle Cary (Goodcrabb); r, H. P. Woolcott (Lady Ned); hc, C. W. Francis (Clousilla).

Five prizes of 30s. each, for the five best foals sired by one of the thoroughbred stallions (open): R. Parker, Shepton Mallet; J. W. Shute, Shaftesbury; H. Clark, North Wootton, Shepton Mallet; J. Clare, Hallatrow, near Bristol; T. H. Miller; r, H. Raymond, Bourton, Dorset.

Hunters' Improvement Society's gold medal, or £5, with bronze medal, for the best hunter brood mare in foal to, or with foal at foot, by a thoroughbred horse, or registered hunter sire: Mr. C. M. Wakely (Shamrock).

Three-years-old geldings or fillies, sired by one of the thoroughbred stallions (open): 1, Messrs. C. and J. Moody, Stapleton Manor, Martock (Pioneer); 2, T. H. Miller (Marquis); r, W. H. Munckton, Bineham, Long Sutton, Somerset (Monarch); hc, N. J. Sims, Pitcomb, Bruton (Marquis); c, N. Biggin, Liberty Farm, Halstock, Yeovil (Grey Leg).

Two-year-old geldings or fillies sired, by one of the thoroughbred stallions (open): 1, R. Hoddinott, Springfield, Gillingham (Actor); 2, R. W. Hillard, Fivehead, Taunton (Musket); r, T. S. Metcalfe, Rooke Court, Salisbury (The Handy Man); hc, A. E. Pitt-Rivers, Hinton St. Mary, Blandford.

Yearlings, colts, or fillies, sired by one of the thoroughbred stallions (open): 1, R. Hoddinott, Springfield, Gillingham (Marquis); 2, R. Parker (Lord Scot); r, T. H. Miller; hc, Major Towers-Clark (Chance); c, A. E. Pitt-Rivers.

Ponies, fillies, with geldings, one, two, or three years old, by one of the Compton Stud stallions (open): 1, A. Hoddinott (Flying Fox); 2, A. T. Manger, Stockill, Gillingham (Weigalia); r, Dr. T. F. Hanly, Gillingham.

Hunters' Improvement Society's silver medal for the best hunter filly (not exceeding three years): Mr. A. E. Pitt-Rivers.

Hunters' Improvement Society's medal for the champion youngster of the prize-winners in classes 4, 5, and 6: Messrs. C. and J. Moody (Pioneer)

WEDNESDAY

Hacks, fillies or geldings (four-year-olds and upwards), not exceeding 15.2 hands, and sired by one of the Compton Stud stallions (open): 1, G. F. Tilley (Elegance); 2, Major Towers-Clark (Cocoatina); r, C. M. Wakely (Dauntless)

Light-weight hunters, carrying 13st. 7lbs. and under, fillies or geldings (four-year-olds and upwards), sired by one of the thoroughbred stallions (open): 1, F. H. Dowling, Hedge Farm, Shepton Mallet (Kaffir); 2, G. F. Tilley (Elegance); hc, H. and J. Miles, Church Farm, Radstock, Bath (Mendip); W. H. Munckton (Melody); W. Corry, Over Compton, Sherborne (Cora); r, E. H. Roach, Coombe House, Glastonbury (Birdcatcher).

Hunters' Improvement Society's medal for the best hunter got by a premium stallion or by a registered hunter sire out of a registered mare: J. Day, Huxham, Shepton Mallet (Maggie)

Heavy-weight hunters, carrying 14st. and over, fillies or geldings (four-year-olds and upwards), sired by one of the thoroughbred stallions (open): 1, J. Day (Maggie); 2, C. Warr (Marshal); r, Sir H. Hoare, Bart., Stourhead, Bath (Crafty); hc, W. H. Munckton (Maxim)

Four-year-old hunters, light-weights, carrying 13st. 7lb and under, fillies or geldings, sired by one of the thoroughbred stallions (open): 1, J. Day (Edward); 2, G. F. Tilley, Alstone Court, Huntsgill (Elegance); 3, S. W. Green, Swiss Farm, Henley-on-Thames (Maid Marion); hc, Sir H. Hoare, Bart. (Redlight); c, J. Perrett, Hartmoor Farm, Pulham, Dorset (Duke).

Four-year-old hunters, heavy-weights, fillies or geldings, carrying 14 stone and over, sired by one of the thoroughbred stallions (open): 1, T. H. Miller (Miss Molly); 2, J. W. Munckton (Masthead); r, C. and T. Perrett (White Foot).

Harness mares or geldings (four years old and upwards), not exceeding 15 hands, and sired by one of the Compton Stud stallions (open) 1 and 2, C. P. V. Lester Weston House, Buckhorn Weston, Wincanton (Dandy and Baldwin)

Harness horses, mares, or geldings (four years old and upwards), exceeding 15 hands, and sired by one of the thoroughbred stallions (open): 1, W. Hall, Kilkenny, Shepton Mallet (Nelson); 2, A. C. Clarke, Shepton Mallet (Patience); r, Sir Harold Peily, Bart., Thorngrove, Gillingham (Macaroni); hc, L. B. Beauchamp, The Grange, Midsomer Norton (Black Bess)

The Sales.

There was a good company present at the selling on each day. Mr. Somerville Tattersall taking his place on the rostrum shortly after one o'clock. On Tuesday he offered about ninety-two lots, and on Wednesday a little over eighty. There was a very poor demand, and a large number of the animals did not change hands. The following were the principal prices:—Mr. T. Cridland's colt, 4½ months, 19gs.; Mr. J. W. Shute's colt, 6 months, by Pantomime, 14gs.; Mr. J. Ralph's colt, 6 months, by Pantomime, 14gs.; Mr. T. H. Miller's black mare Midnight, 40gs., and Mr. T. H. Miller's colt, 6½ months, by Scotch Hazel, 16gs.; Mr. R. Parker's filly foal, 4 months, by Grand National, 25gs.; Mr. H. Raymond's three-year-old bay filly, Miss Ned, 40gs.; Major C. D. Sherston's three-year-old chestnut filly, by Yard Arm, 32gs.; Messrs. Ponting's bay gelding, Ivanhoe, 32gs.; Mr. N. Biggin's three-year-old bay gelding, Grey Leg, 35gs.; Mr. A. E. Pitt-Rivers' two-year-old chestnut filly, by Pantomime, 50gs.; Dr. T. F. Hanly's two year-old gelding, by Lifeboat, 15gs.; Mr. A. E. Pitt-Rivers' yearling chestnut gelding, by Pantomime, 27gs.; Mr. T. H. Miller's brown yearling filly, by Pantomime, 25gs.; Mr. C. M. Wakeley's black mare, Dauntless, 60gs.; Mr. W. Curtis's black mare, Lady Ryan, 35gs.; Mr. A. C. Clarke's bay mare, Patience, 71gs.; Mr. Walter McCreery's chestnut gelding, V.C., 27gs.; Mr. W. Beaton's grey gelding, Lively, 47gs.; Mr. S. Y. Brake's bay mare, Catherine, 36gs.; Mr. H. Mead's grey mare, Countess, 43gs.; Mr. W. H. Munckton's chestnut mare, Melody, 7gs.; Mr. W. Corry's brown mare, Cora, 71gs.; Mr. E. H. Roach's bay gelding, Birdcatcher, 51gs.; Mr. T. H. Miller's chestnut mare, Miss Molly, 120gs.; Mr. J. Day's brown mare, Maggie, 165gs.; Mr. H. Bugg's black gelding, Reuben, 20gs.; Mr. W. Field's chestnut gelding, Marengo, 39gs.; Mrs. L. Forbes' bay gelding, Glenmore, 59gs.; Mr. W. H. Munckton's chestnut gelding, Maxim, 120gs.; Mr. Walter McCreery's chestnut gelding, Mario, 64gs.; Mr. C. Warr's chestnut gelding, Marshal, 100gs.; Mr. Warr's chestnut gelding, Warrior, 100gs.; Mr. J. Day's brown gelding, Edward, 110gs.; Mr. W. A. Adams's chestnut mare, Red Light, 45gs.; Mr. L. B. Beauchamp's black mare, Black Bess, 50gs.; Mr. A. H. Farrant's black mare, Gipsy Queen, 25gs.

Kington Horse Show.

The Kington Horse Show Society's twentieth annual show was held on Wednesday in the Recreation Field, Kington. This show has made great strides in the competition for premiership, and now stands third on the list in the United Kingdom. Mr. Richard Green (The Whittern) is the president for the year. There were eleven entries in the class for cart mares and foals, and it was the opinion of the judges that a better lot was never shown in the county. The old prize-winner, Temeside Mettle, was first, Mr. Green's old mare looking in the pink of condition, with a promising colt by her side. Messrs. Edwards came second, and Mr. Peter Coats third. Class 2 was for cart mare and foal foal to be by registered sire and bred by exhibitor There were eight entries, and first prize was awarded to Mr. Henry Lilwall, Logason, for a grand mare by Castle Bromwich Hero. The same exhibitor also took second prize for cart geldings, and Mr. Peter Coats first for cart mare, four years old. For the best pair of cart mares, with foals at foot, the first prize was awarded to Mr. James Mainwaring, Bridge Court, and the second to Messrs. Edwards There were twelve entries for yearling cart fillies, and a most promising lot they were, the judges having much trouble in arriving at a decision. Mr. Richard Green (Whittern) was awarded first, Mr. John R. Bache second, and Mr. John Trewin third. For colt foals Mr. J. H. Edwards won the first prize, and Mr. Richard Green second. The champion prize of £10 for the best exhibit in Classes 3 to 11 was awarded to Mr. Peter Coats, Sheepcote, Clifford, for his bay mare, Clifford Bright Light, which also secured the Shire Horse Society's silver medal. There were ten entries in the class for two-year-old geldings or fillies. Mr. Nicholls, Worcester, was an easy first, Captain Heygate, Leominster, coming second with a chestnut filly by Valley King. In the class for gelding or mare best adapted for hunters up to 14st., the first prize of £20 and also the second of £10 was won by Messrs. John and Nixon Gray. Messrs. Gray also won the first prize of £10 for weight-carrying hunter up to 12st., Mr. Edward Hoyle, Scarborough, being second. Mr William Till, Trewonga, Ross, won the Hunters' Improvement Society's medal for the best hunter filly by a thoroughbred horse. Mr. B. Davies won first prize for Hackney mare, not exceeding 14.2; Mr. James Michell, Hereford, being second. For three-year-old Hackneys Mr. Robert Hussey secured the first prize and Messrs. Bovill and Horne second. In the next class, for two-year-old Hackneys, Mr. Hussey again won the first prize with a fine filly by Duke of Connaught, Mr. Nicholls [illegible] second. For the best yearling, Hackney colt or filly, Mr. John Thomas was a good first with a chestnut filly by Babington, Mr. B. Davies being second. The jumping tests were of great interest, and thousands of spectators lined the ropes. In the heavy weight the first prize of £20 was won by Mr. Grundy, Worcester. The brothers Mr. Blockley taking the second with his bay breeding colt Omega. Mr. Grundy took third with The Stag. Mrs. Trimm, Cheltenham, took first for light weight hunters. Mr. Frank Batchelor gained a prize for tandem team. Mr. Cotterill being second. Mr. Batchelor also secured first prize out of a large entry for horse or mare.

Buxton Horse Show.

The twenty second annual show of the Buxton and High Peak Horse Show Society, which took place on the 14th inst., was the biggest and best ever held in the Peak district. Delightfully situated, the show ground at Silverlands commands an excellent view of interesting country, and with bright sunshine to favour the proceedings the gathering was large and fashionable. The Duke of Devonshire (the patron of the society) was unable to be present, but his Grace was represented by Mr. Victor Cavendish, M.P., who has consented to be the president of the society next year. All departments of the show had some distinguishing feature, and there were other healthy signs of progress. The list of entries numbered 369, as compared with 342 last year, and 193 when the first show of the society was held twenty-two years ago. The class for brood mares in the Shire horse section attracted some of the best known prize breeders in the country, and so excellent was the quality of the stock that the judges had the greatest difficulty in making their award. They took three-quarters of an hour in deciding between Mr. Joseph Wainwright's black mare Harold Brunette and Saxon Empress, owned by Mr. Victor Cavendish, M.P. The premier card ultimately went to the massive Brunette, who had the advantage of her rival in build and smartness. Their respective foals at foot were proportionately as good as their dams. They were each victorious in the colt and filly class respectively, having very little to beat. Mr. Wainwright's mare was further sucessful in securing the Wainwright challenge cup and the Shire Horse Society's silver medal. Light horses were strong numerically, and generally of excellent quality. The Hackney Horse Society's silver medal for females was secured by Mr. A. W. Hickling's Adbolton Duchess, a graceful and shapely chestnut from Nottingham. History repeated itself to this extent, that Mr. Tom Mitchell's noted winner Sam Weller defeated Mr. A. L. Goodson's Heathfield Conceit in the saddle class, just as he did a year ago. In single harness the six-year-old son of Ganymede was preferred to Mr. Mark Pearson's Lord Lofty. Another Yorkshire horse, Mrs. Fred Holmes's Love Letter—a successful showyard mare—was again the best of the cobs not exceeding 14½ hands, beating Mr. G. E. Franklin's Lord Gobang both in saddle and harness. Hunters made a creditable show. The winner of the Hunters' Improvement Society's gold medal for brood mare was a good quality animal called Whisper Low, owned by Mr. C. Schwabe, of Altrincham. In her class, however, she had to yield to Mr. F. B. Wilkinson's well-known pair, Norah and Lady Grosvenor, placed in that order. The silver medal of the Hunters' Improvement Society for the best filly was given to Mr. John Smurthwaite for his Fitaway, a beautiful, good-moving daughter of that successful sire Havoc, now at Welbeck. Mr. F. B. Wilkinson's Yorkshire winner Castaway topped the two-year-old class.

Prize List.

SHIRES

Open—Brood mare, with [illegible] has had 1 foal 2 [illegible] 1 and challenge cup: 1, J. W. [illegible] Bar[illegible] 2, V. C. W. Cavendish, M.P. [illegible] R. B. M[illegible] Bar[illegible]

Colt foal: 1, J. Wainwright [illegible] E. W. Lees, Bar[illegible]

Filly foal: 1, V. C. W. Cavendish, M.P. [illegible] R. Ireland, Blackburne, Lytham

Three-year-old mare [illegible] 1, R. W[illegible] Bar[illegible]

2, C. Eccles, Ashbourne [illegible] 3, S. S. Bar[illegible] Bar[illegible]

Two-year-old [illegible] [illegible] A. C. [illegible]

2, J. Rimell, Staffs [illegible] E. W. Lees, Bar[illegible]

One-year-old [illegible] Bar[illegible] J. W[illegible] J. F. Wardle, Buxton [illegible] C. [illegible]

[illegible]

Brood mare and foal: 1, R. B. M[illegible] Bar[illegible] J. [illegible] Hope

Colt foal: F. W. Lees, Bar[illegible]

Filly foal: 1, J. [illegible]

Filly foal: 1, J. Lomas, Buxton; 2, G. Salt, Buxton.

Two-year-old gelding or filly: 1, E. W. Lees, Buxton; 2, J. Bagnall, Bakewell

church; 3, A. C. Sparkes

[illegible] J. W[illegible] A. W[illegible] Derby

Yearling colt or filly: 1, W. Ferguson; 2, A. C. Sparkes, 3, W. G. Wheeldon, Derby

Exp. [illegible] of Mr. Haslewood's horses: Rev. T. H. Feste, Buxton.

Two-year-old gelding or filly: 1, Lees Knowles, M.P.; 2, J. K. Ford, Derby; 3, J. W. Hewitt, Thelwall.

Three-year-old gelding or filly: 1 and silver medal, A. W. Hickling, Nottingham; 2, Lees Knowles, M.P.; 3, R. Hussey, Eastfields.

DISTRICT COMPETITION.

Brood mare, with foal at foot, or has had a foal in 1900: 1, W. Ferguson; 2, J. Hutchinson, Bakewell; 3, C. J. Wills, Chapel-en-le-Frith.

Foal: 1, W. Ferguson; 2, J. Hutchinson; 3, Mrs. C. Dixon, Monsal Dale.

Mare or gelding: 1, R. Whitehead, Buxton; 2, Mrs. C. Dixon, Monsal Dale; 3, T. A. Collier, Macclesfield.

Ditto.—Open: 1, Tom Mitchell, Bradford; 2, A. L. Goodson, Knutsford; 3, Frank J. Batchelor.

COBS AND PONIES.

Open.—Cob, mare or gelding, not exceeding 14.2 hands: 1, Mrs. Fred Holmes, Shipley; 2, G. E. Franklin, Derby; 3, Mrs. C. Dixon, Monsal Dale.

Pony, not exceeding 13.2 hands: 1, G. E. Franklin; 2, W. Harrison, Chorley; 3, J. Makeague, Newton-le-Willows.

HUNTERS.

Open.—Brood mare, with foal at foot, or has had a foal in 1900: 1 and 2, F. B. Wilkinson; 3 and gold medal, C. Schwage, Arden.

Foal: 1, C. Schwabe; 2, F. B. Wilkinson; 3, C. Griffiths, Northwich.

Brood mares, calculated to breed horses able to carry 12 st. 7lb. and upwards with hounds, the property of persons resident or occupying land in Derbyshire, Cheshire, or Staffordshire, with foal at foot by, or stinted to, a thoroughbred registered hunter stallion: T. C. Fitton; C. Schwabe, and R. Needham, Buxton, all equal.

Foal, by any of Mr. Haslewood's horses: 1, T. C. Fitton; 2, F. W. Ashton, Chapel-en-le-Frith.

Yearling colt or filly: 1 and silver medal, J. Smurthwaite, Retford; 2 and 3, A. Haslewood, Buxton.

Two-year-old gelding or filly: 1, F. B. Wilkinson, Newark; 2, A. Haslewood; 3, Sir Peter Walker, Bart., Derby.

Three-year-old gelding or filly: 1, R. Whitehead, Buxton; 2, F. B. Wilkinson; 3, J. R. Eastwood, Buxton.

Mare or gelding, exceeding 13 stone 7lbs.: 1, H. Charrington, Tutbury; 2, J. H. Stokes, Market Harboro'; 3, J. and N. Gray, Cardiff.

Not exceeding 13 stone 7lbs.: 1 and 3, J. and N. Gray; 2, J. H. Stokes.

DISTRICT COMPETITION.

Brood mare, with foal at foot, or has had a foal in 1900: 1, T. C. Fitton; 3, R. Needham, Buxton.

TURNOUTS.

Open.—Horse, in single harness, exceeding 14.2 hands: 1, T. Mitchell, Bradford; 2, Mark Pearson, Harrogate; 3, F. J. Batchelor, Alvechurch.

Stone wall jumping (open to members or subscribers to the High Peak Harriers or any other hounds hunting any portion of the society's district): 1, R. Whitehead; 2, J. H. Lawson.

Loughborough.

The sixty-second annual exhibition in connection with the Loughborough Agricultural Association was held at Southfield, on Wednesday, by the kind permission of Mr. W. B. Paget, and once again proved its great utility in promoting the best interests of husbandry, as well as useful stock-breeding. The continued success of the Loughborough exhibition also justifies its separate existence, though there have been some who would like to see it absorbed in the County Society. The schedule was practically the same as last year. The only alterations were the prizes offered by Messrs. W. and J. Thompson for the best colt or filly Shire foal got by any of the Desford Stud horses. Three prizes of £3, £2, and £1 were offered, with a free nomination in addition to the first prize to the horse travelling the district. The only stipulation was that the third prize was to be withheld if there were not more than three entries. Taking the entries altogether, they came within five or six of any previous number. There was a strong entry of cattle, though the total was not so good as 1899, which was an exceptional year, and quite above the average. In the classes for heavy horses there was an advance of thirteen entries over last year—sixty-three against fifty. One would expect a nice show of hunters in the Quorn country, and visitors were not disappointed. Here there was a slight advance over last year's figures. Sheep also showed a slight increase. The quality of the cattle was generally good. The class for a dairy cow owned by a tenant farmer was a strong one, Mr. White, of Lockington, securing both first and second prizes. The premier cow was a very good young beast, but although superior in other points it was beaten as regards the udder by its farm companion, which, in its turn, was behind Mr. Fox's winner of the third prize in the same respect. The Exors. of the late Mr. Jos. Faux, Coleorton, were very successful in the class for bulls under a year old, securing the two premier awards. The exhibits in the classes for animals owned by cottagers were a big improvement on those of last year, a fact which should ensure a larger entry next year.

The show of sheep was very good all round. Mrs. Perry Herrick's exhibits, as usual, were very successful—two firsts, four seconds, and one reserve number. Mr. Hallam, of Wymeswold, obtained three firsts and one reserve, and Mr. Henson, of Prestwold, took two firsts, one second, and one reserve. The quality of cross-bred lambs was very high. Mr. Hallam was first, and Mr. Turner, Lockington, second, and the judges awarded the highly commended badge to all the other animals in this class. The classes for short-woolled lambs were well filled with some extraordinarily good animals. There were a satisfactory number of entries in the classes for draught horses, although none of the animals shown were of special merit. There were some of good quality, but others were very indifferent. In the class for mares with foal at foot there were some good animals shown, Mr. R. Crawford's Loseby Ruth, by Paxton, being a particularly nice four-year-old grey, and easily obtaining the first prize. This mare had won firsts at both the Leicester and Melton Shows, and was a nice compact animal with good legs and feet. In the class for colt foals of the cart kind Mr. R. Crawford showed a promising youngster of five months by Sopwell Duke. He had been successful at Melton last week, and easily took the first prize in this class. The class for filly foals of the cart kind was not of special note, nor was that for cart geldings between two and three years of age. The majority of the exhibits in the section for hunters, hacks, and harness horses were of good quality, some of the hunters shown being of exceptional merit. In the class for the best brood mare of the hunting kind, with a foal at foot, Mr. Tom Firr, of Quorn, was awarded the premier honour for Hilda, a brown mare, with a bay foal by Undecided, although the judges' decision met with some criticism, the opinion being held that Mr. D. Ward, of Nailstone, who was second, should have had the first place. In the next class, for the best brood mare of the Hackney kind, with foal, the first prize deservedly fell to Mr. G. H. Stocker, of Gotham, the Beeston Stud Company being a good second with a chestnut mare with a foal by Lord Derby. Mr. David Ward, of Nailstone, was an easy winner in the class for yearling hunters with a bay filly of excellent all round characteristics, by Gonsalvo. This animal met with much praise, and shows promise of becoming a future prize winner. There were six entries in the class for yearling Hackneys, and competition was somewhat keen, the red ribbon being ultimately awarded to Mr. H. Shardlow, of Hyson Green, Notts, for a chestnut colt with good feet and of all-round qualities, sired by Grand Cadet. There were only two entries in the class for three-year-old geldings or fillies adapted for hunting purposes, and only one prize was awarded, this falling to Mr. Samuel Marshall, for his roan gelding Bird-catcher, by the famous Marioni.

Prize List.

CATTLE.

Dairy cow in calf or in milk: 1, R. H. Ratcliff, Stanford Hall; 2, S. W. Fox, Humberstone; r, R. Moore and Sons, Bilborough.

Dairy cow, in calf or in milk, the property of a tenant farmer: 1 and 2, W. White, Lockington; 3 and r, S. W. Fox; vhc, G. Dickens, Station Street, Loughborough.

Heifer, in calf or in milk, under three years of age: 1, W. White; 2, W. H. James, Hamilton Ground; r, R. H. Ratcliff, Stanford Hall.

Heifer under two years of age: 1 and r, H. T. Hincks, Wigston Hall; 2, Mrs. Perry Herrick, Beaumanor Park; hc, W. Fox; c, R. H. Ratcliff.

Bull not exceeding twelve months old: 1 and 2, Exors. of the late J. Faux, Coleorton; r, L. Faux, Snareston; c, A. Nelson, Wanlip.

Bull, the property of a tenant farmer, above one year and not exceeding two years old: 1, J. Sim, Hoton Hills; 2, J. Falder, Lockington; 3, W. White; c, Exors. of the late J. Faux.

Bull over two years old: 1, T. Turner, Kingston; 2, Mrs. Perry Herrick; r, H. T. Hincks.

Cow, which has had a calf since January 1st, 1900, the property of a cottager wholly employed in agriculture, and occupying not more than fifteen acres of land, attention being paid to constitution and milk: 1 and r, J. Draycott, Hathern; 2, J. Monk, Wymeswold.

Cow or heifer, in calf or in milk, the property of a cottager occupying not more than thirty acres of land, who must be a member of the Association: 1, G. Dickens, Station Street, Loughborough; 2 and c, B. B. L. Underwood, Loughborough; r, Mary Hallam, Willoughby.

SHEEP.

Long-woolled ewes, having suckled lambs to the 1st June, 1900, and to be kept by the same flockmaster for breeding purposes: 1, J. Hallam; 2, Mrs. Perry Herrick; r, H. T. Hincks.

Long-woolled theaves, to be kept by the same flockmaster for breeding purposes: 1, H. T. Hincks; 2 and r, Mrs. Perry Herrick.

Five long-woolled ewe lambs: 1, J. Hallam; 2, Mrs. Perry Herrick; r, R. Turner.

Five short-woolled ewes, having suckled lambs to the 1st June, 1900, to be kept by the same flockmaster for breeding purposes: 1, G. Henson; 2, Mrs. Perry Herrick; r, G. De Lisle, Onebarrow.

Five short-woolled theaves, to be kept by the same flockmaster for breeding purposes: 1, G. Henson; 2, Gerard De Lisle, Onebarrow; r, H. T. Hincks.

Five short-woolled ewe lambs: 1, H. T. Hincks; 2, G. Henson; r, J. Moss.

Five cross-bred ewe or wether lambs: 1, J. Hallam; 2, R. Turner; r, J. Hallam.

Ram of the long-woolled breed, which shall be used by a member for his own flock, age and symmetry considered: 1, Mrs. Perry Herrick; 2, A. Baker, Sutton Bonnington; r, J. Hallam.

Ram of the short-woolled breed, which shall be used by a member for his own flock, age and symmetry considered: 1, Mrs. Perry Herrick; 2, G. de Lisle; r, G. Henson.

PIGS.

Sow of the black Berkshire breed: 1, J. W. Taylor, Shelthorpe House, Loughborough; 2 and r,, R. Bell, Salmon Street, Loughborough.

Boar of any other breed: 1, Rev. T. J. Davies, Ratcliffe College; 2, V. Wells, Seagrave; r, R. Bell.

Sow of any other breed, for breeding purposes: 1, Rev. T. J. Davies; 2, J. Harvey, Six Hills; r, J. Cooper, Sileby.

Gilt of any other breed, under twelve months old, and to be retained for breeding purposes: 1, H. Parkinson, High Street, Sileby; 2, V. Wells; r, J. Cayless, Derby Road, Loughborough.

DRAUGHT HORSES.

Mare, with foal at foot, of the draught kind: 1, R. Crawford, Loseby; 2, R. Moore and Sons, Bilborough; 3, Gamble Brothers, Braunstone; 4, M. Hubbard, Scalford.

Colt foal of the cart kind, the property of a tenant farmer: 1, R. Crawford; 2, A. Clowes, Long Whatton; 3, T. Dowell, Hungarton; 4, R. Moore and Sons.

Filly foal of the cart kind, the property of a tenant farmer: 1, R. A. Haywood, Nailstone; 2, J. W. Sheppard; 3, M. Hubbard; 4, W. Carter.

Colt or filly Shire foal got by any of the Desford stud horses: 1, R. Crawford; 2, R. A. Haywood; 3, W. Carter; 4, W. H. James, Hamilton Grounds.

Gelding of the cart kind, above two and under three years of age: 1, W. Porter, Dishley Grange; 2, M. Hubbard; 3, G. H. Bennett, Sawley; 4, W. Loseby.

Filly of the cart kind, above two and under three years of age: 1, Gamble Brothers; 2, J. V. Hibbard; 3, J. Tansley.

Gelding of the cart kind, above one and under two years of age: 1, W. C. W. Woodroffe, Burton-on-the-Wolds; 2 and 3, George Henson.

Filly of the cart kind, above one and under two years of age: 1, J. Barker, Ragdale; 2, W. White; 3, F. Cramp, Swing Bridge Farm, Loughborough.

Pair of geldings or mares of the cart kind, above three years, that have been regularly worked, the property of a tenant farmer, and to be shown in G. O. tackle: 1, G. E. Laban, Normanton Hill; 2 and 3, W. Porter; 4, G. Henson.

Tradesman's turnout of the heavy kind, regularly used in his business: 1 and 4, Shardlow Brewery Co., Shardlow; 2, Ind Coope and Co., Loughborough.

HUNTERS, HACKS, AND HARNESS HORSES.

Brood mare of the hunting kind, with a foal at her foot: 1, T. Firr, Quorn; 2, D. Ward, Nailstone; 3, M. J. Joyce, Alton Grange, Ashby.

Brood mare of the Hackney kind, with a foal at her foot: 1, G. H. Stocker, Gotham; 2, Beeston Stud Co., Beeston, Notts; 3, J. W. Taylor, Shelthorpe House, Loughborough.

Yearling of the hunter kind: 1, D. Ward; 2, H. B. Black Frishy-on-the-Wreake; 3, H. T. Hincks, Wigston Hall.

Yearling of the Hackney kind: 1, H. Shardlow; 2, W. G. Wheeldon, Friargate, Derby; 3, H. Bamber, Thurcaston.

Gelding or filly, two years old, adapted for hunting purposes: 1, S. Marshall, Hickling Manor; 2, H. T. Hincks; r, M. A. Thompson, The Oaks, Loughborough.

Gelding or filly, three years old, adapted for hunting purposes: 1, S. Marshall.

Tradesman's turnout of the light kind regularly used in his business: 1, T. Summerfield, Castle Donington; 2, J. S. Underwood, Sparrow Hill, Loughborough; 3, E. B. Pickworth, Coalville.

Hack, not exceeding 15.1 hands high: 1, G. R. Apperly, Paddocks, Cheltenham; 2, F. Tyler, Stoneygate Road, Leicester; 3, J. Moss, Loughborough.

Weight carrying hunter, four years of age and upwards, up to not less than 14 stone and upwards: 1 and 2, J. H. Stokes, Great Bowden; r, J. H. Sedgley, Church Langton.

Hunter, four years of age and upwards, up to not less than 12st. 7lbs., and not more than 14st.: 1, J. H. Stokes; 2, H. Custance, Oakham; r, G. R. Apperly, Paddocks, Cheltenham.

Light-weight hunter, four years of age and upwards, up to not more than 12st. 7lb.: 1, W. Gale, Waltham; 2, J. H. Stokes; r, G. W. Sumner.

Hunter, four years of age and upwards, the property of a tenant farmer, who has no other business, and gets his living entirely by farming, residing within the limits of the Quorn Hunt: 1 and 2, H. Bamber; 3, S. Marshall.

Gelding or mare, 14.2 hands high and upwards, best adapted to harness purposes, to be driven on to the show ground, speed and action to be specially considered: 1, J. S. Underwood; 2, J. G. Parr, F.R.C.V.S., Leicester; r, A. J. Betts, Coalville.

Cob, under 14.2 hands high, to be driven in harness on to the show ground: 1, J. Walley, Market Place, Loughborough; 2, G. E. Franklin, The Fields, Derby.

JUMPING.

Mare or gelding, of any height, which shall jump the artificial fences in the best manner: 1, C. J. Jerome, Sutton Coldfield; 2, T. G. Foster, Brailsford, Derby.

Gelding or mare, under 15 hands, which shall jump the artificial fences in the best manner: 1, T. G. Foster, Brailsford, Derby; 2, C. J. Jerome.

Mare or gelding of any height, which shall jump the artificial fences in the best manner, for amateurs only within the radius: 1 and 2, L. Faux.

Carnforth.

For many years past the annual exhibitions of the Burton and Milnthorpe Agricultural Society have been worked at a financial loss, so that this year the committee resolved to extend their area, and the Carnforth district became affiliated with the association, which will continue under the name of the Carnforth Agricultural Society, shows being held in alternate years at Burton, Milnthorpe, and Carnforth. The alteration seems to have been a good one, for the show held on the 15th inst. at Carnforth attracted an unusually large number of exhibitors, and also spectators, the weather being all that could be desired. The society has this year been enabled to augment the premiums, upwards of £400 being offered, as contrasted with a little over £200 last year, and the total entries were 799. The quality of the animals was satisfactory, and the society should be able to in future record balances on the right side instead of deficits. The judges were:—For cattle and sheep, Messrs. D. Linton, Bedale, and G. Harrison, Gainford; light horses, Messrs. T. H. Hutchinson, Catterick, and N. Morton, Ballymena, Ireland; Wensleydale sheep, Mr. J. W. Fothergill, Brownber; agricultural horses and pigs, Messrs. W. R. Trotter, South Acomb, and R. Robinson, Worsley. The following is a list of the principal awards:—

Prize List.

CATTLE.

(Restricted to a radius of thirty miles of Burton.)

Shorthorn bull, two years old and upwards: 1, J. Handley, Green Head; 2, W. Bateman, Braunston Grange; 3, J. Casson, Beetham.

Shorthorn bull, above one and under two years old: 1, R. Braithwaite, Pelside, Milnthorpe; 2, W. G. Atkinson, Raines Hall; 3, W. Atkinson, Overthwaite.

Shorthorn heifer, above one and under three years old: 1, J. Gibson and Son, Kendal; 2, Lady Henry Bentinck, Underley Hall; 3, J. R. Airey, Park, near Kendal.

Shorthorn heifer, above one and under two years old: 1, W. Atkinson; 2, Lady Henry Bentinck; 3, J. Cottam, Nether Killet.

Three Shorthorn cows: 1, W. Bateman; 2, R. Parker, Moss End; 3, Lady Henry Bentinck.

Shorthorn cow: 1, R. Hall, Lancaster; 2, R. J. Huddleston, Kendal; 3, T. Park, Nateland.

Dairy cows in calf or in milk: 1 and 3, R. J. Huddleston; 2, J. Makinson, Kirkby Lonsdale.

The Society's silver medal for the best male Shorthorn: J. Handley.

Dressing the best female Shorthorn: W. Atkinson.

SHEEP.

Long-woolled sheep, any breed except Wensleydale: 1, J. Wakefield; 2, J. R. Airey.

Shropshire or other Down sheep, Three ewes: 1 and 3, R. J. Huddleston; 2, J. Gibson.

Three one-shear gimmers: 1, J. Gibson and Son; 2, R. J. Huddleston.
Ram, any age: 1 and 3, R. J. Huddleston; 2, J. Gibson and Son.
Three ewes: 1, W. Dowbiggin; 2, J. Wakefield; 3, R. Parker.
Three one-shear gimmers: 1, J. Wakefield; 2, J. R. Airey.
Ram, any age: 1 and 2, J. Gibson and Son, Natland Hall.
Three ewes: 1, Lord Henry Bentinck, M.P.; 2, J. Gibson and Son.
One-shear gimmers: 1, J. Gibson and Son; 2, Lord Henry Bentinck.
Lady Henry Bentinck's prizes for three Wensleydale ram lambs: 1, J. Gibson and Son; 2, J. Towers.
Half-bred sheep, from a Blackfaced, Mountain, or Herdwick ewe, by any pure ram—Three ewes: 1, J. Gibson and Son; 2, E. Barton.
Three one-shear gimmers: 1 and 2, J. Gibson and Son.

PIGS.

(Within a radius of thirty miles of Burton.)

Boar, any breed: 1, T. Graveson, Warton.
Breeding sow, any breed: 1, G. Wison, Milnthorpe; 2, E. Barton, Warton Grange.

HORSES.

(Within a radius of thirty miles of Burton.)

HUNTERS.

Mare, having a foal at foot, or in foal: 1, A. Orr, Hornby; 2, J. S. Rigg, Appleby.
Yearling colt or filly: 1, H. Staveley, Wray; 2, T. Taylor, Heaton.
Two-year-old gelding or filly: 1, J. Wilson, Kendal; 2, T. Tomlinson, New Hutton; 3, J. Kidd, Hauer Flatts.
Three-year-old gelding or filly: 1, Exors. of T. Dixon, Priest Hutton; 2, E. Barton, Warton Grange.
Colt or filly foal: 1, E. Barton; 2, A. Orr.
The Society's silver medal for hunting gelding, colt, or filly, three years old or under: 1, T. Jackson, Netherbeck, Carnforth; 2, J. Hartley and Co.
The Hunters' Improvement Society's silver medal for hunter of either sex, any age: T. Tomlinson, New Hutton.

HACKNEY OR HARNESS.

Yearling colt, gelding, or filly: 1, Colonel Foster, M.P.; 2, J. Wrigley, Windermere.
Two-year-old gelding or filly: 1, N. Dixon; 2, E. D. McNaughton, Milnthorpe.
Mare, with a foal at foot, or in foal: 1, R. Burrow, Whittington; 2, J. Williams, Carnforth.
Three-year-old gelding or filly: 1, J. Wrigley; 2, J. Clarkson, Carnforth.
Colt or filly foal: 1, R. Burrow; 2, J. Williams.
Prizes given by the ladies of the district to encourage the breed of small horses for military purposes, for mares, 14.2 to 15.1, three years old and upwards: 1, T. Edmondson, Old Hutton; 2, J. W. Liver, Garstang; 3, R. Burrow.
The Society's silver medal for Hackney colt, gelding, or filly, three years old and under: R. Burrow.

FOR AGRICULTURAL PURPOSES.

Yearling colt or gelding: 1, T. Allonby, Sandscale; 2, J. Dobson, Burton.
Yearling filly: 1, W. Dowbiggin; 2, Lord Henry Bentinck, M.P.
Two-year-old gelding: 1, W. Cottam; 2, J. C. Webster, Beetham Hall.
Two-year-old filly: 1, H. Mackereth, Whittington; 2, J. Towers.
Mare, having a foal or in foal: 1, W. Dowbiggin, Millom; 2, R. Hudson, Windermere; 3, H. C. Hodgson, Milnthorpe.
Three-year-old gelding: 1, H. C. Hodgson; 2, R. Parker.
Three-year-old filly: 1, W. Cottam, Low Levens; 2, E. Willacy, Nateby.
Colt foal: 1, H. Mackereth; 2, T. Askew, Slyne.
Filly foal: 1, Mrs. Wilson, Yealand; 2, G. Lawson, Cockerham.
Pair of horses for agricultural purposes, mares or geldings, three years old or upwards: 1, W. Cottam; 2, J. C. Webster.
Single agricultural horse or mare, three years old or upwards: 1, W. Dowbiggin; 2, R. Hudson.

HACKNEYS.

(Open to the United Kingdom.)

Hackney, exceeding 14.2, saddled and ridden in the ring: 1, J. W. Liver; 2, N. Read; 3, J. Clarkson.
Hackney, not exceeding 14.2: 1, E. Cousins; 2, A. S. J. Musgrave; 2, H. W. Cheadle.

TURN-OUTS.

Mare or gelding, exceeding 14.2, shown and driven in harness: 1, N. Read, Blackburn; 2, J. Clarkson, Carnforth; 3, W. Brown, Lancaster.
Mare or gelding, not exceeding 14.2, shown and driven in harness: 1, A. S. J. Musgrave, Settle; 2, H. W. Cheadle, Silverdale; 3, T. W. Speight, Morecambe.
Hackney mare or gelding (within a 15-mile radius of Burton), saddled and ridden in the ring: 1, J. W. Liver; 2, E. Cousins, Lancaster; 3, E. Johnson, Morecambe.

Wayland.

The annual show of the Wayland Agricultural Association was held on the 12th inst. for the forty-first time at Watton. Considering the invariable lateness of this fixture, the society were particularly fortunate in the matter of weather. The sun shone in a fashion that would have been appropriate to the middle of July, and the result was that the attendance was exceptionally large. The features of the show were in the main identical with those of the last few years, but there was a new development of some importance from a spectator's point of view—a grand stand commanding a view of the competitions in the ring had been provided. Numerically considered, the entries well maintained the reputation of the Wayland district as being able to produce one of the best supported of local shows. The horse classes were particularly strong. The only department in which it would be possible to complain of inadequate competition was the cattle, there being in four out of the eight classes no more than two entries each. It has been suggested that an extension of the prize list will be necessary before an improvement can be expected. Both the heavy horse and the Hackney classes contained some noteworthy animals. This makes the third year in succession that Mr. W. R. Welcher, of Griston, has taken the Shire Horse Society's silver medal, the winner on this last occasion being a shapely cart foal of five months, bred by the exhibitor, and sired by Calwich Blaze. The mares and foals were all good, and as much may be said of the Hackney classes. Taken all round, the most satisfactory animal in this department was Lord Walsingham's Go It, in the class for Hackney stallions over two years of age. He well deserved the honours he received. Both the prize winners in the class of Hackney foals were sired by Go It. The cattle classes are not greatly to be commended. They reached a presentable average; but except among the Red Polls there was nothing calling for particular mention. The most notable animal was Lord Amherst's Didlington Davy 11th, first in the class for polled heifers in calf or in milk, not more than three years old. She makes an admirable specimen of the breed. The strongest class among the sheep was the one for ewe lambs, which would do credit to any show, not even excluding the Royal, as one of the judges declared.

Prize List.

HORSES.

Cart stallion, over two years of age, open to the county: 1, F. J. Cresswell, Aldery Grange (Comerden Hardy); 2, T. Hall, Saham (Saham Albion); r, J. Quantrill, Wreningham (Prince Albion).
Cart mare: 1, W. R. Welcher, Griston (Brown); 2, L. J. Wace, Oarbrooke; r, W. R. Welcher (Violet).
Pair of cart mares or geldings: 1, L. J. Wace; 2, W. R. Welcher (Violet), and H. G. Burnham, Griston (Queen Prudence); r, J. H. Gurney, Saham (Scott and Gipsy); and W. R. Welcher, Griston (Brisk).
Three-year-old cart colt, filly, or the second best ditto, the Society's prize, £1: L. J. Wace.
Yearling cart colt or filly: 1, J. Jarrad, Shipdham (Tom); r, Hon. C. B. Hanbury.
Cart gelding of any age: L. J. Wace; r, J. T. Clarke.
Cart foal: 1 and silver medal, 2, r, and c: W. R. Welcher.
Cart foal, sired by Mr. W. R. Welcher's Holkham Tom: 1, J. Martins, Scoulton; 2, A. J. Wade, Merton.
Cart foal, sired by Mr. L. J. Wace's Saxon: A. Middleton, Ovington; r, Adcock and Sons, Watton.
Cart foal, sired by Mr. Thomas Hall's Helmdon Tom or Saham Albion: J. Jarrad, Shipdham.
Hackney stallion, over two years of age, open to the county: 1, Lord Walsingham, Merton; 2, J. T. Clarke; r, G. H. K. Francis, Mattishall.
Hackney stallion, two years old or under, open to the county: 1, W. B. Fryer, Wymondham; 2, G. H. K. Francis.
Brood mare, suitable for saddle or harness purposes, with foal at foot, or having bred a live foal this year: 1, Earl Egerton of Tatton; 2, Abbot Bros., Thuxton; r, G. H. K. Francis; c, T. Hall.
Hackney foal: 1, G. H. K. Francis; 2, Abbot Bros.; r, C. H. Colman; c, W. Quadling.
Hackney foal, sired by Lord Walsingham's Go It: 1, M. Rae; 2, A. J. Wade.
Hackney filly, foaled in 1897, 1898, or 1899, to be shown in hand: 1, Abbot Bros.; 2, T. Hall; r, Earl Egerton of Tatton; c, W. Quadling.
Mare or gelding for saddle purposes: 1 and 2, Earl Egerton of Tatton: r and c, Lord Walsingham; c, W. S. Hall.
Mare or gelding, over 14.2, to be shown in harness: 1, G. H. K. Francis (Kitty); 2, Earl Egerton of Tatton; r, Lord Walsingham; c, W. S. Hall.
Mare or gelding, not exceeding 14.2, to be shown in harness: 1, W. Patterson, East Dereham (Fashion); r, M. Rae, Watton; hc, R. Waters, Watton (May).
Two or three-year-old hunter open to the county: 1, H. Blofield, Quidenham (Mary); 2, Mr. Cross, Earlham; r, A. Gayford, East Harling; c, W. R. Harvey, Illington.
Hunter, the property of a Norfolk farmer, open to the county: 1 and c, A. Gayford; 2, W. R. Goulder; r, A. Cloud; c, W. S. Hall.

CATTLE.

Horned bull of any age: F. W. Bernard, Eccles; c, Abbot Bros.
Polled bull of any age: C. F. Newton, Saham (Marquis of Meadland); hc, Perkins' Executors, Saham.
Horned cow of any age, in calf or in milk: Abbot Bros. (Thuxton Rose).
Horned heifer, in calf or in milk, not exceeding three years of age: Abbot Bros. (Lady Delight); hc, E. E. Smith.
Polled cow of any age, in calf or in milk: Lord Amherst of Hackney; hc, Hon. Charles B. Hanbury; c, C. F. Newton.
Polled heifer in calf or in milk, not exceeding three years of age: Lord Amherst of Hackney; hc, Hon. Charles B. Hanbury; c, C. F. Newton.
Fat beast: 1, W. Whalebelly, Watton; 2, A. G. Scorer, Caston; hc and c, T. A. Barton.
Beast fed on Thorley's food as per conditions: W. Whalebelly.

SHEEP.

Ram of any age: 1, T. A. Barton; 2, A. Betts, Ashill; hc, Captain A. B. Fielden, Reymerstone.
Five shearling ewes for breeding purposes: 1, Lord Cranworth; 2, Captain A. B. Fielden.
Five ewes of any age, crones excepted: 1, Captain A. B. Fielden; 2, Abbot Bros.; hc, Lord Cranworth.
Ten ewe lambs: 1, Captain A. B. Fielden; 2, Lord Cranworth; hc, T. A. Barton.
Ten wether lambs: 1, Lord Cranworth; 2, W. R. Welcher.

PIGS.

Boar pig of any age: Adcock and Sons, Watton; c, A. G. Scorer, Caston.
Breeding sow of any age: Adcock and Sons; hc, Hon. C. Hanbury.
Litter of not less than six pigs, under twelve weeks old: Adcock and Sons; c, Hon. C. B. Hanbury.
Fat pig, fed on food seasoned with Wilson's Canadian pig powders: 1 and 2, A. Middleton, Ovington.

Changes in the Highland Prize List.

On account of animals failing to comply with the regulations as to calving and foaling, a few changes have taken place in the official prize list of the Highland Show at Edinburgh in 1899. These changes are as follow:—

Shorthorn cattle—Colonel Munro's cow May Blossom 3rd, which was placed fourth, failed to produce a calf within nine months, and the prize of £2 went to Lord Polwarth for Lady Beatrice.

In the class of two-year-old Shorthorn heifers, Mr. George Harrison's animal Fairy Queen, which was placed third, and Mr. William Bell's Comely, placed very highly commended, having failed to produce a calf within nine months of the show, the third prize of £3 has gone to Joseph Harris, Calthwaite Hall, Carlisle, for Empress 12th, and the fourth prize of £2 to A. Robertson, Bolleshin, Badlinluig, for Tulip Blossom.

Aberdeen-Angus cattle—Sir George Macpherson Grant's cow Elixir 1,809, which was placed fourth, failed to produce a calf within nine months, and the prize of £2 went to George Willshe, Pippenscale, Auchencheyne, for Black Velvet 27,361.

The three-year-old heifer, Jipsy of Ben, 26,124, which was shown by Mr. Clement Stephenson, Newcastle-on-Tyne, and which was placed second, having failed to produce a calf within nine months of the show, the second prize of £3 has gone to George A. Ross, Rhyme, Fearn, for Gazelle of Rhyme; the third prize of £2 to James M'Kelvie, Hatton House, Kirkmichael, for Lady Lauder; and the fourth prize of £2 to W. S. Ferguson, Perth, for Juniper Jam.

Galloway Cattle.—Sir Robert Jardine's two-year-old heifer Cowslip of Cavenagh, 1,022, which was placed second, having failed to produce a calf within nine months, the second prize of £3 has gone to the animal, Nora Lee 3rd, of Castlemilk, which was placed third; the third prize to Colonel Dalrymple, of Cargen, for Beauty 2nd, the fourth prize of £2 having been forfeited to the society.

Highland Cattle.—The Duke of Atholl's three-year-old heifer Beauty 6th of Atholl, which was placed second, having failed to produce a calf within nine months, the second prize of £3 has gone to the Earl of Southesk, K.T., for Lady Clare; the third prize of £2 to Wm. Macfadilyean, Corrie, Dunblane, and the fourth prize of £2 to Thomas V. Smith, of Ardvorlich, for Scotstoun 21st, 3,221.

Yield Clyde Ide mares.—Prince the Queen Mab, the property of the late Mr. W. H. Lambton, of Biddick, which was placed third, and Mr. R. Smith's Scott's Scottish Prettess, placed fourth, failed to produce foals within twelve months of the show, and the first and second prizes go to the only two mares that proved in foal, viz. Flirt, £12, for F. Murdoch, Eccl. Holsyde, Newton, for Lady M'Clelland; second £10, Hebers Wells, Mains House, Fence Houses, for Lady Lambton.

Contagious Diseases of Animals.

SOCIETIES.

THE NATIONAL ASSOCIATION of ENGLISH HOP GROWERS.

(Founded June, 1894.)

PRESIDENT.—COLONEL BROOKFIELD, M.P.

HON. TREASURER.—E. ALBERT WHITE, ESQ., Beltring, Kent.

SECRETARY.—THOMAS IRONMONGER.

CENTRAL OFFICE.—61, HOP EXCHANGE, BOROUGH, LONDON.

GENERAL OBJECTS.

To promote united action among English hop growers as a body for the improvement of the industry.

To promote, support, or oppose such legislative and other measures as may affect the industry.

To collect and publish, for the benefit of members, special statistical and other useful information relating to English and foreign hop culture.

To arrange for arbitrations in cases of dispute between sellers and buyers of hops, for the avoidance of litigation.

ANNUAL SUBSCRIPTIONS.

Ordinary members, 3d. per acre of hops under cultivation; honorary members, £1 1s.; hop factors, £1 1s.

CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE.

NOTICE OF MEETING.

A MEETING of the COUNCIL of the CENTRAL AND ASSOCIATED CHAMBERS OF AGRICULTURE will be held (by permission of the Society of Arts) at the House of the Society of Arts, John Street, Adelphi, on Tuesday, November 6, 1900, at 11 o'clock in the forenoon.

Members of Council representing either the Central Chamber or Associated Chambers are requested to attend.

Subscribing Members of the Central Chamber are invited to be present, and may speak by permission of the Chairman, but are not entitled to move resolutions or to vote.

AGENDA.

To transact General Business.
To receive Communications.
To consider Alterations in the Laws and Bye-Laws proposed by the Business Committee.
To receive Reports of Committees (if any).
To receive "Statement of Legislation required in the Agricultural Interest," prepared by the Business and Parliamentary Committees in pursuance of Council's resolution of May 29th last.
To consider the following subjects:—
(1) The Report of the Royal Commission on Local Taxation (if issued).
(2) Agricultural Insurance.

Associated Chambers and Clubs are requested to consider the above subjects, and to send up any resolutions which they may pass thereupon to the Secretary of the Central Chamber before the Meeting of the Business Committee, at 8 p.m. on Monday, November 5th, 1900. Suggestions of subjects for discussion at future Meetings of the Council should be forwarded at the same time.

ERNEST H. GODFREY, Secretary.

RAILWAY ANNOUNCEMENTS.

GREAT NORTHERN RAILWAY.

DAIRY SHOW
AT
ROYAL AGRICULTURAL HALL,
ISLINGTON, LONDON.
OCTOBER 9, 10, 11, and 12, 1900.

The Great Northern Railway Company will convey Exhibits for above Show from Inverness, Aberdeen, Perth, Dundee, Oban, Glasgow, Edinburgh, Berwick, Newcastle, Sunderland, Durham, Darlington, West Hartlepool, Whitby, Scarboro', York, Harrogate, Hull, Goole, Blackburn, Accrington, Burnley, Oldham, Rochdale, Brighouse, Huddersfield, Mirfield, Keighley, Halifax, Bradford, Leeds, Batley, Dewsbury, Wakefield, Pontefract, Doncaster, Liverpool, Warrington, Manchester, Stockport, Barnsley, Rotherham, Sheffield, Worksop, Retford, Newark, Burton, Derby, Ilkeston, Nottingham, Grantham, Grimsby, Gainsboro', Lincoln, Louth, Horncastle, Sleaford, Boston, Spalding, Yarmouth, Cromer, Norwich, Lynn, Sutton Bridge, Wisbech, Peterboro', Huntingdon, Sandy, Cambridge, Hitchin, Dunstable, Luton, Hertford, St. Albans, and other towns on and in connection with their system.

Through Vans for the conveyance of Exhibits will be run to King's Cross wherever necessary.

☞ Rates for conveyance of the traffic may be obtained on application to any Great Northern Station-master or agent, and they will in no case exceed those in force by any other route.

Arrangements will be made for the return of Exhibits, etc., at the close of the Show, and Exhibitors should be careful to mark the address labels "Per Great Northern Railway."

A Great Northern Company's representative will be in attendance at all Shows, prepared to give all information as to train service, etc.

Cheap excursions will be run to London (King's Cross), for this Show, from the principal towns on, and in connection with, the Great Northern system. For full particulars, see bills, to be obtained at the various stations and agencies.

Holloway and King's Cross Stations on the Great Northern Railway are the nearest stations to the Royal Agricultural Hall.

CHARLES STEEL,
General Manager.

LONDON & NORTH-WESTERN RAILWAY.

DAIRY SHOW.
TO BE HELD AT THE
AGRICULTURAL HALL, LONDON,
OCTOBER 9th to 12th, 1900.

For the convenience of Exhibitors at the above Show, the London and North-Western Railway Company have made arrangements for Through Vans for the conveyance of Exhibits to be run to London on Monday, October 8th, by the Trains leaving—

Carlisle	at	8.30 a.m.
Liverpool (Lime Street)	„	12. 0 noon.
Manchester (London Road)	„	12. 0 „
Shrewsbury	„	12.35 noon.
Wolverhampton	„	1.35 p.m.
Birmingham (New Street)	„	2.10 „
Northampton	„	3.37 „

These will be in addition to the Vans running regularly on the Through Trains to London.

Consignments from the Branch Lines, and from Nottingham, Peterboro', Oxford, Cambridge, &c., will be placed in these Vans at the various Junctions, thus ensuring direct transit to the Show.

Rates for the conveyance of Exhibits, which in no case exceed those charged by any other route, can be obtained at the various Stations on the Line.

Arrangements will also be made for the return of the traffic in Through Vans at the close of the Show, and Exhibitors wishing to avail themselves of these facilities are requested to order their consignments "Per London and North-Western Railway."

Exhibitors are requested to be careful to write their names and addresses distinctly on the backs of the direction labels issued by the Show Committee.

The Company's representatives will be at the Show to answer inquiries with regard to the arrangements for the return journey. All information can be obtained of MR. ROBERT TURNBULL, Superintendent of the Line, Euston Station, London; the Company's District Superintendents, MR. J. GROOM, Euston Station, London; or MR. R. F. CASTLEMAN, Broad Street Station, E.C.

HALL'S
SANITARY
WASHABLE
DISTEMPER
(PATENTED)

A NEW SANITARY WATER PAINT,

HAS GREAT ADVANTAGES,
SOME OF WHICH ARE AS FOLLOWS:—

It sets hard, Kills Vermin, and Disinfects.

It is washable in 3 weeks, does not scale, and can be Painted or Varnished. Made in two qualities, for inside and outside work.

It is made in Dark Rich Shades as well as in Light Tints, contains no Lead, and does not Turn Black.

It only requires the addition of Water to make it ready for use, so that anybody can apply it.

It is Cheaper, Cleaner, Healthier, and more Artistic than Wall Paper.

It makes an excellent Shading for Greenhouses, the inside quality lasting about 9 months, the outside quality several years

Sold by Leading Chemists, Drysalters, and Ironmongers, and Manufactured by—
SISSONS BROS. & Co., LTD.,
HULL,
from whom Samples, Shade Card, and other particulars can be obtained.

MACKINDER'S
LAMB FOOD

Used on the Royal Farms and by Large Flockmasters everywhere.

Mr. Jas. Bennett, Aure, Glos., writes:—"I have never had any Food of any sort or kind on which lambs did so well."

Mr. F. Jakeman (agent for C. T. Hoare, Esq.), Bicester, writes:—"I find it capital food both for lambs and cattle."

Hundreds of Testimonials, Samples, Pamphlets, etc., free through agents, or direct.

MACKINDER'S LAMB FOOD MILLS
LINCOLN.

HORNE'S FRUIT TREE DRESSING has stood the test of 12 years as the best remedy for capturing the Caterpillas Moths. Thousands of pounds' worth of fruit has been saved by its use that otherwise would have been lost if left to the ravages of the caterpillar pest. Invaluable. Write at once for pamphlet, post free. Please note, A GREAT FRUIT TREE SALE of 200,000 TREES will take place, on the premises, Oct. 10 & 11. One month allowed to clear and settle accounts. Catalogues may be had of the Auctioneers, PROTHEROE and MORRIS, 67, Cheapside, London; or, Messrs. HORNE and SONS, Cliffe, Rochester Kent.

D. CLARKE'S Carbolized
WHEAT PROTECTOR.

WHEAT
WHEAT

BEST AND CHEAPEST DRESSING FOR SEEDS.

In use in England for OVER FIFTY YEARS, and is now being used extensively in the Colonies of Australia, New Zealand, and Central Africa.

A 9d. PACKET DRESSES 8 BUSHELS OF SEED.

This specific takes the place of Bluestone, and by its use the Seed is strongly carbolized and is protected both by the smell and taste from being eaten by birds and other pests. The seed also germinates quicker by its use.

Numerous Testimonials have been received, testifying that the "PROTECTOR"

Prevents Smut in Wheat, Oats, and Barley.
Prevents Destruction of Seed by Birds or Worms.
Seed germinates a fortnight earlier.
Saves a quarter bushel of Seed per acre.

SOLE MANUFACTURER:

MOLASSINE

— FOOD FOR —

HORSES, CATTLE, SHEEP, and PIGS.

Replacing an Equal Quantity of Fodder.

A STAPLE FOOD AND CONDIMENT COMBINED.

Annual Consumption:—

cwt. 1,200,000 cwt.

Introduced into the Imperial and Royal Stables of

H.I.M. KAISER WILHELM, Emperor of Germany,
H.I.M. CZAR NICHOLAS II., Emperor of Russia,
H.I.M. KAISER FRANZ JOSEF I., Emperor of Austria-Hungary,
H.I.M. The EMPRESS FREDERICK,
H.M. The KING OF SAXONY.

It is adopted throughout

THE GERMAN ARMY,

and during the few months it has been on the Market in the United Kingdom it has met with a most favourable reception, which is evidenced by the many Repeat Orders we are daily receiving, and assurances of its permanent adoption.

MOLASSINE

CONTAINS

36 to 40 per cent. of **Sugar,** and is a combination of **Sugar, Treacle,** or **Syrup with Vegetable substances.** It is guaranteed to consist exclusively of natural organic materials. The vegetable ingredients **entirely overcome** the disadvantages of the use of sugar products.

The **sweet taste** of Molassine gives a welcome **relish** to the usual fodder, which becomes **perfectly chewed** and **digested;** the best proof of this is that the mangers of the most **delicate-feeding** horses are **quite cleared.**

Molassine is a special preventive **against gripe, diarrhœa** and similar diseases.

Sugar has a very soothing effect upon the mucous membrane, therefore Molassine acts as a preventive against cough.

RESULTS OF FEEDING WITH MOLASSINE.

Strength, Highest Working Power. It Stimulates the Appetite. Improves Digestion. Gripe and Diarrhœa Completely Disappear. The Horses Look Well and Get Smooth Glossy Coats.

For Samples and Prices apply to

THE MOLASSINE COMPANY, LTD.,
36, Mark Lane, London, E.C.

BIBBY'S
"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at The Hornby House Farm, Bedale, Yorks, by his Grace The Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 7% Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the "Cream Equivalent" fed Calves as having been fed on New Milk.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—

J. BIBBY & SONS,
Exchange Chambers, Liverpool.

ALFRED MANSELL & CO.,
LIVE STOCK AGENTS AND EXPORTERS

SILCOCK'S CALF MEAL

CALF REARING.

To rear Calves economically and profitably use SILCOCK'S SOLUBLE CALF MEAL. Thousands of Calves are reared on it annually; it is a true milk substitute, is very easily digested, dissolves at once in water, gives least trouble in preparing, does not scour, is very economical in use, as one pint makes one gallon of thick gruel, and it fits early for cake feeding. It contains about 80 per cent. of soluble feeding digestible ingredients, while in milk, butter-milk, and whey the figures stand at 12½, 9, and 6 per cent. respectively. With the minimum of cost and trouble SILCOCK'S CALF MEAL gives the maximum results. Use SILCOCK'S SOLUBLE CALF MEAL, feed regularly, in right quantity and at correct temperature and you will have little trouble in rearing paying calves.

Price, 12/6 *per cwt., carriage paid. 5 cwt. lots,* 12/-.

R. SILCOCK & SONS,
Poulton-le-Fylde, Lancs.

THE GENERAL ELECTION.

We are now in what the daily Press describes as "the throes of a general election." What does this mean to the farmer and the landlord? The matter is of the most serious import to both, but it needs a few words to explain it. We have explained more than once when a general election has happened that from the strictly agricultural point of view the farmer ought to have a policy, but that he ought not to have any politics. "Policy" and "politics" are very different things. Nowadays there are many political parties, although in the old days there were only two. It does not matter what a party is called: all we have to do is to find out what it does. It must be remembered that what it does is a very different matter to what is promised, although many people seem to quite overlook that fact. There is no wonder that the farmer who takes the trouble to show an intelligent interest in the doings of the Legislature—and, unfortunately, too few do—comes to the conclusion that there is no political party that will really help him to face the many difficulties that meet him at every turn. Throughout the whole of the present century the farmer has been made the plaything of the politician. All parties have made promises to him; but no party has fulfilled them. He has been told over and over again that his grievances were to be dealt with; in fact, that they were to be placed in the front rank of legislation, but that has been all. We do not pretend to say that one political party is any better or worse than another; but we do say that they are much alike as far as the interests of agriculture are concerned. They have simply made promises in a way which has been just as lavish as their performances have been mean.

There is no good, however, in dwelling on past performances; we had much better look to the future. What is to be done? The proper course is for every farmer to refuse to vote for every candidate who will not give some definite pledge that he will see to the interests of the suffering agriculturist — whether landlord or tenant—and endeavour to promote legislation with such an object. As to what should be done, there is much to be said, and there may be much difference of opinion upon the subject; but there cannot be the least doubt that something ought to be done. For example, the question of unfair foreign competition is one which is well worth attention, and it is one which is quite apart from that of Protection. Then, again, the railways have much to answer for, and the unreasonable way in which they favour foreign produce is a matter to which Parliament might well give some attention. Again, it is by no means certain that the laws relating to contagious diseases of animals are anything like as perfect as they might be. Then the new Agricultural Holdings Act is so far from perfect that there is no wonder that some farmers are beginning to say that it would have been better unpassed. There are also other reforms required, such as have been indicated by the Central Chamber of Agriculture, and also by various other bodies who have a right to speak on behalf of agricultural interests. We cannot go into every point at once, for the ground is wide and the grievances are many; but we can safely say that it will pay the farmer better to consider the candidates who ask for his vote from the point of view of the agriculturist rather than from that of the party politician. If the farmer would assert himself he could become the greatest power in the land. It is a pity that he will not do so.

SAMPLES.

By a Man of Mark Lane.

The export trade in agricultural seeds from Great Britain to New Zealand, formerly of considerable importance, has dwindled almost to vanishing point. In fact, the balance is probably the other way at present. A gentleman largely interested in the trade states that, whereas his firm, four years ago, shipped 100 tons of grass and clover seeds, valued at £8,000, to New Zealand, the quantity going out through them this year is so trivial as to be unworthy of mention. The Colony, he says, is now growing all the white clover, timothy, and other grass seeds it requires, and has, moreover, established quite a flourishing export trade to this country in cow grass seed. The New Zealand growth of this variety is in great and growing esteem here, and sells readily at 70s. in London. There is also a variety of fescue grass seed, known as Chewing's, grown in the Colony, which appears likely to come into general favour here on account of the rapidity with which it forms a close, even turf, suitable for lawns, cricket pitches, bowling greens, and the like.

While the wool industry in Europe has been disorganised by the collapse of the speculation at the end of last year, and the consequent difficulties of the speculators, the high prices then obtained (the *Statist* tells us) have helped materially to revive business in Australia. It will be recollected that European houses, and more particularly Continental houses, sent out agents in exceptionally large numbers to Australia in the latter part of last year, and that they bought wool on a great scale. Then followed the eager purchasing at our own December sales, when the speculation culminated. The great prices obtained during the last three or four months of last year gave extraordinary results. We have heard of one case in which, from a certain property where the sales never previously brought in more than £8,500, last year they gave nearly half as much again. Part of the increase was due to a better clip. But the larger part was the result of the extraordinary prices obtained. And this is only a single instance typical of what took place on much larger properties and over vast areas. Much, therefore, of the losses which the European trade has suffered have gone to enrich the flock-owners of Australia and Argentina; and that enrichment is one of the causes of the marked revival that is taking place in our Colonies.

Considerable amusement, I am told, was caused at a political meeting in the Sleaford Division last week by one of the speakers declaring that he was strongly in favour of beer being brewed from pure "malt and mops."

It is officially announced that, according to reports of the Prefects, the French wheat harvest for the year 1900 is estimated at 109,025,960 hectolitres; meteil (mixture of rye and wheat 3,732,790 hectolitres; and rye, 22,393,320 hectolitres (one hectolitre equals 2¾ bushels).

Mr. Walter Long, President of the Board of Agriculture, who was to have attended the Agricultural Conference in Glasgow next week, has forwarded a telegram expressing regret that he cannot be present.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to September 22nd, 1900, were £48,051,601 against £48,177,660 in the corresponding period of the preceding financial year, which began with a balance of £3,919,173. The net expenditure was £81,919,407 against £49,514,308 to the same date in the previous year. The Treasury balances on September 22nd, 1900,

amounted to £2,302,540, and at the same date in 1899 to £4,573,245.

The Revenue returns for the past quarter show a net increase of £1,797,389, compared with the corresponding period last year. As there was a decrease of £1,144,372 in the previous quarter, the net increase upon the first half of the financial year is £653,017. In the past quarter the increases include £744,133 from Customs, £650,000 from Excise, £280,000 from Property and Income Tax, £260,776 from Estate Duties, and £150,000 from the Post and Telegraph Service. There was a diminution of £250,000 from Stamps. The total revenue for the quarter was £27,213,377, of which £1,901,222 was paid to local taxation account.

I notice that Professor Long is addressing audiences on behalf of the Unionist candidates in the five agricultural constituencies—Launceston, Bodmin, Truro, Camborne, and Tavistock in Devon and Cornwall, having been asked to place his services at the disposal of the Liberal Unionist party. I think it is a pity that we have not agricultural speakers all over the country, for the electors really know little or nothing about the subjects which are of greatest importance to farmers.

AGRICULTURAL POLITICS.

By a Lobbyist.

I have visited four agricultural districts during this contest, and I am bound to make this confession: Not once have I heard one of the subjects referred to in the statement issued by the Central Chamber of Agriculture to the local chambers. It is idle to disguise this fact, and it would be criminal of me if I failed to enforce the lesson to be deduced from it. The men most concerned in the vitality, the success, and the future of agriculture are absolutely disregarding it as an electoral question.

How many addresses of rival candidates refer to that most crucial and significant of all questions, local taxation, and to the desirability of providing an uniform assessment? How many have referred to the grave injustice of giving preferential rates to foreign produce? How many have declared that they will demand compensation for tuberculous animals slaughtered in the public interest? I have read twenty addresses at the very least, and I do not remember one that has even revealed the most distant interest in these problems.

The agricultural voter is, in fact, pursuing that old policy which the MARK LANE EXPRESS can at least declare that it has stoutly faithfully condemned—the policy of unselfishness. In politics unselfishness is not far removed from insanity. It means the renunciation of yourself to the advantage of somebody not half so deserving. It means a readiness to allow yourself to be disregarded by the makers of statecraft. To take a back seat may be a desirable thing as an indication of personal modesty. In the political world it shows little wisdom. I know my local chamber of agriculture. I know that as a debating assembly of academic themes it is sometimes admirable. But how many of them will approach the political candidates with the admirable questions which have been so clearly and succinctly outlined by the secretary of the Central Chamber? Will a dozen local chambers go to the trouble? I doubt it.

I will take the more purely rural constituencies which will poll this week for the purpose of enforcing my moral. These be South Derbyshire, the Maldon division of Essex, the Watford division of Hertfordshire, North Hunts, South Hunts, the Melton division of Leicestershire, the Sleaford division of Lincolnshire, South Norfolk, Mid-Northamptonshire, Rutlandshire, the Newport division of Shropshire, Chichester, the Appleby division of Westmoreland, the Abingdon division, the Aylesbury division, the Wirral division, the Honiton division, the Ilkeston division, North Dorset, South-West, East, and Mid Kent, the Hornsastle division, South Monmouth, East Norfolk, East Northamptonshire, the Henley division, the Oswestry division, the Wells division, Stowmarket, Nuneaton, Stratford-on-Avon and Tamworth, Devizes, West Worcestershire, the Holmfirth and Richmond divisions of Yorkshire, Chelmsford, the Thornbury division, and the Lewes division.

Now, these be the divisions whose present and future, whose every hope, is concerned in the welfare of agriculture. If agriculture fail, then these districts relapse into desuetude and misery, into non-success and failure. Yet in neither of those constituencies has any of the questions propounded by the Central Chamber been even suggested.

Of course, I cannot say that the election was altogether sprung upon us. It is true that I could not bring myself to believe that the country gentlemen in the Cabinet would allow themselves to be coerced into following a policy which I am persuaded their better judgment did not approve. Yet it is the fact that the majority of the people of this country believed that an election was close upon us; and it is a fact, too, that the ordinary political and electoral organisations had prepared for it. I know nothing of the immediate circumstances, but it is certain that in many constituencies the suggestions of the Central Chamber must be absolutely unavailing. It will be impossible to even call the local chambers together in time to allow of the questioning of the candidates. Political manifestoes are splendid, a desire to concentrate a clear attention upon agricultural necessities is better; but it would be more practical to see to it that the manifestoes intended to influence public attention are issued in time.

What is my view, it may be asked, as to the general result of the election? The Radicals will win a few of the urban seats. This is due to the fact that the miserable spirit of incohesion and rivalry which wrecked the party at the last election does not prevail in so strident a character even at this election. The Radicals will, so far as I can see, make no headway in the rural districts. Their philippics against the maladministration of the war, against the tragic mistake which led to so many deaths, and to the maiming all unnecessarily of so many men, have not penetrated to the villages. I will not say that the Mafficking-spirit has so piquant an expression there as it had; but it is certain that the revulsion of feeling created in the big towns by the knowledge of the administrative muddling and bungling has not so definite a character in the villages, simply because the facts which were the parents of that revulsion have not penetrated in all their appalling force to the rural parts of the country. The village-vote will be a patriotic vote. A patriotic vote, alas! will permit of little heed being given to the necessity of the villages or to the necessities of farming.

What has struck me in this election is not merely the indifference of the farmers to their own interests, but the fact that the farmers have agreed to this indifference so readily as to induce the candidates to think they are absolutely acting in obedience to the rural desire. I have seen the county papers of twelve shires. I have noted the meetings in each. I have not perceived any disposition to heckle. There has been, in Mr. Bret Harte's classic phrase, "narry a heckle." Farmers would seem to have entered into an electoral conspiracy to harm themselves.

Of course, my readers will urge that I am repeating now what I have said a score of times. This may be true; but it is all the same the one lesson of the contest. Two appalling and even astounding facts have impressed me. They are—and I beg that I may be allowed to set them out in all the significance of separate paragraphs—

1. Statesmen in their manifestoes, and politicians in their speeches, have absolutely disregarded the interest of agriculture.

2. The farmers have readily acquiesced in this disregard.

I am half-inclined to paraphrase Ebenezer Elliott, and to prayerfully ask—

> When wilt thou save the farmers, Lord?
> O, God of Mercy, when?

The Board of Agriculture is right in advising the farmers that they can insure against the operation of the Act extending compensation for accidents to persons engaged in agriculture, and that the premium charged for the policies need not proceed beyond 3s. for every £100 of wages paid annually. This sum has been found to be sufficient even in a semi-dangerous industry—to wit, the mineral water industry.

LETTERS TO THE EDITOR.

Agriculture and the General Election.

The following letter has been addressed by the secretary of the Central Chamber of Agriculture to the local Chambers of Agriculture throughout the country:—

"Central Chamber of Agriculture,
"Broad Sanctuary Chambers, Westminster, S.W.,
"September 26th, 1900.

"Dear Sir,—In view of the General Election about to take place, the accompanying 'Statement of legislation required in the agricultural interest' has been prepared by the Business and Parliamentary Committees of the Central Chamber of Agriculture, in accordance with the terms of the resolution passed by the Council on the 29th May last.

"It must obviously rest with the local Chambers and other bodies associated with the Central Chamber throughout the country to decide as to the steps which it may be desirable to take with the view of bringing under the notice of Parliamentary candidates the various subjects mentioned. Following, however, the precedents set in connection with previous General Elections, it is suggested that at the forthcoming election it is expedient that a general effort should be made to secure, as far as possible, the return of representatives favourable to the views entertained by the Chambers on the questions included in the 'Statement.'—I am, dear Sir, yours faithfully,

"(Signed) ERNEST H. GODFREY, Secretary."

Statement of Legislation Required in the Agricultural Interest.

Prepared by the Business and Parliamentary Committees of the Central Chamber of Agriculture, in pursuance of the following resolution of the Council, dated May 29th, 1900:—"That authority be given to the Business and Parliamentary Committees to prepare from the previous resolutions of the Central Chamber a statement of the legislation required in the agricultural interest, and to issue such statement in the event of a General Election before the next meeting of the Council."

1. LOCAL TAXATION.
   (*a*) That a permanent and comprehensive measure be passed, giving adequate relief from the excessive and unfair burdens at present imposed upon agriculture.
   (*b*) That steps be taken to remedy the anomalies disclosed by the First Report of the Royal Commission on Local Taxation of December 16th, 1898, and especially to provide one uniform assessment for all purposes, both Imperial and local.
2. RAILWAY RATES.
   (*a*) That the granting by railway companies of preferential rates and facilities for foreign produce be absolutely prohibited, and that the Board of Trade be empowered and instructed to enforce the law.
   (*b*) That more ready means be provided for obtaining the reduction of unreasonable rates on English produce.
3. TUBERCULOSIS.
   That in any legislation dealing with the important national question of tuberculosis, due provision be made for compensation in respect of tuberculous animals or carcases slaughtered or seized in the public interest.
4. COMPULSORY DIPPING OF SHEEP.
   That power be conferred upon the Board of Agriculture to order the compulsory dipping of sheep for the purpose of preventing and eradicating sheep scab.
5. BEER DUTIES AND BREWING MATERIALS.
   (*a*) That the beer duty be readjusted by a reduction in the duty charged on beer brewed only from barley-malt and hops; and that a like amount be added on beer containing any substitute for barley-malt and hops.
   (*b*) That brewers and publicans be compelled to declare the ingredients of their beer.
   (*c*) That effect be given to the suggestions contained in the Majority and Minority Reports of the Departmental Committee on Beer Materials, as to the insertion in the brewing books and in the information furnished in the Parliamentary Returns of separate columns for hops and hop-substitutes, and as to the publication of returns by brewers for sale and of the use of hop-substitutes.
6. SALE OF CORN.
   (*a*) That there be one uniform weight for the sale of corn.
   (*b*) That the highest and lowest prices of each kind of grain, in addition to the summary of the total quantities sold and the average prices of such grain, be published in the weekly returns now made by the Government officials at the statute markets of this country.
7. FRAUDULENT SALE OF FOREIGN MEAT.
   That in the interests of both producers and

consumers all retail vendors of imported dead meat be registered, and prominent notice of the fact displayed in every shop held by each person registered.

8. Damage to Crops by Sparks from Railway Engines.

That railway companies be rendered liable to pay compensation for damage done to growing crops, plantations, fences, etc., by fires caused by sparks from their engines, and thus in this respect be placed upon an equal footing with the owners of road locomotives.

9. Law of Trespass.

That the existing law of trespass, which is obsolete and ineffective, be amended, particularly in the direction of providing for the protection of products, which, though of natural growth, are of a marketable character.

10. Injuries to Farm Stock by Uncontrolled Dogs.

That steps be taken to prevent or secure compensation for sheep-worrying or other injuries inflicted upon farm stock by dogs, either by the enactment of the provisions of the Dogs Regulation Bill of last Session, or by other legislative means.

N.B.—The order in which the above subjects are printed does not necessarily involve an expression of opinion as to their relative importance.

The Sale of Poisons and the General Election.

Sir,—The following is a question which my Society (The Traders in Poisons or Poisonous Compounds for Technical or Trade Purposes Protection Society) is forwarding to be answered by each candidate at the coming General Election:—

"Are you prepared to support a Bill in Parliament making it legal that chemical compounds (although containing poisons) which are not for medicinal use nor intended for the preparation of medicine may be retailed by traders such as agricultural agents, seedsmen, nurserymen, corn dealers, iron and hardware dealers, and other tradesmen (including pharmacists) for any trade or technical purpose in original sealed packages as received from the wholesale dealer or manufacturer?"

I trust that your readers who are interested in the subject will use their best endeavours to also bring the question to the front.—Yours faithfully,

T. G. Dobbs, Secretary.

Offices: 5, Clement's Inn, Strand,
London, W.C., September 26th, 1900.

Foot-and-Mouth Disease—Agricultural Rating Act, etc.

Sir,—Our Board of Agriculture appears to believe that in consequence of so many isolated outbreaks of foot-and-mouth disease, the malady must have existed in those localities some time before it was reported to the Department. If this most contagious malady had existed anywhere without any restriction, it would certainly have spread, whereas, thanks to the energetic action of the Board in applying immediate slaughter, all the recent outbreaks have hitherto been happily confined to the several farms where the disease originated. Had this policy been adopted in the primary outbreaks in Suffolk and Norfolk, similar success would probably have been obtained.

At Fritton, where the disease had not been known for over twenty years, it might be a valid excuse that neither master nor man were aware of the nature of the disease. But since the whole kingdom has been alarmed, it seems incredible that foot-and-mouth should exist without it being at once recognised. This raises the question, How did the germs of the disease come to be carried to such widespread localities as Yorks, North Wales, and Wilts? May it not be possible that as thousands of cattle from Argentina, in the worst stages of the disease, were allowed for six weeks after the malady was detected to land in this country the microbes multiplied to such an extent as to be carried somehow all over the country? Unless foot-and-mouth has a spontaneous origin in these islands (which I do not for one moment believe), the germination of millions of these bacteria within our shores must be a source of great and mysterious danger.

There was a report some time ago that the Minister of Agriculture would seek a seat in the new Parliament as M.P. for London. Whereupon the *City Press* asserted that it would never do for London to be represented by the head of the Agricultural Department. I do not see much difference in the great commercial cities—first Liverpool, and now Bristol—being represented by the President of the Board of Agriculture, but it does show how powerless the farming interest is to assert itself in Parliament when the most popular member of the Government in the House of Commons cannot find an agricultural constituency that will return him.

South Africa will be the main question that will be decided at this election, but we farmers should remember the Agricultural Rating Act (for which we have to thank Lord Salisbury's Government) soon expires, and we should withhold our support from any candidate who would not promise to uphold that measure, or some similar Act giving the farmer his just relief from local taxation. The towns should help us in insisting that foreign meat and other products should not be sold as British, and the working man ought to go in strongly for Sir Cuthbert Quilter's Pure Beer Bill.

Clare Sewell Read

Antiseptic Grain Storage.

Sir,—Business men are sometimes slow in making practical use of scientific discoveries, and although a large quantity of grain (and especially Argentine maize—that is shipped in apparent good condition, arrives in Europe heated and decayed, the real cause of this trouble does not seem to be studied according to the lights of modern science, nor is the fact that Indian peasants can keep their grain for many years in underground pits appreciated properly.

Some twenty-five years ago Pasteur demonstrated that fermentation does not result from the generation of gases, but from the action of living microbic organisms, and it is now known to bacteriologists that some 95 per cent. of the germs which cause fermentation in grain require oxygen (as well as a certain amount of heat and moisture) for their development, and it is also known that under favourable conditions their rate of increase is prodigious.

The vitality of these germs can be suspended by a sufficiently low temperature (as is done in refrigerator chambers for fresh meat—and although it is impracticable to apply cold storage to cargoes of grain, it should be easy to sterilise the air in the holds of a steamer sufficiently to retard fermentation, without causing any injury to the grain or to the crew, if suitable precautions are taken. On the other hand what is called "ventilation" of the holds is surely a grave error if Pasteur is right, and must assist fermentation just as the admission of fresh air assists combustion in a furnace.

It is interesting to note the arrival last week in London, free from weevils and in perfect condition, of a cargo of Argentine maize, which appears to have been treated antiseptically, and this has occurred at a time when all other Argentine maize cargoes are arriving in bad order, and when claims for damage during the voyage have been settled for some £12,000 in one week.

Attention has been called to this cargo because a grain sampler, who, without permission, removed the hatches of one of the holds and went down, became insensible, and died forty-eight hours afterwards from the effects of inhaling carbonic acid gas. Evidence was given at the inquest to the effect that the maize had been sprinkled during shipment with some chemical preparation, and that the holds had been kept closed during the voyage. A verdict of accidental death was given, but the jury censured the shippers for using chemicals, and the captain of the steamer for having allowed them to do so, and also for neglecting to ventilate the cargo, a verdict that may have unpleasant after consequences, because of precedents established by the rulings of judges.

About three years ago the owners of the ss. Bellasco were condemned to heavy damages because some of the hatches and ventilators were closed during the voyage, and many steamship owners immediately gave their captains notice that they must be able to prove that ventilation had been provided and used, notwithstanding any instructions to the contrary on the part of shippers of the cargo.

Chemists say that inexpensive compositions of a perfectly harmless nature in their after effects on human food can be used to sterilise an air chamber—that is, either to consume or drive out the oxygen contained in atmospheric air—and that their application to the holds of a steamer or to suitable warehouse silos would only need reasonable precautions; but it is very desirable that some joint action be taken by grain trade and steamship associations, not only to arrange for a careful study of the entire subject in order to ascertain what methods are safe and efficacious, but also to protect as far as possible from unfair legal penalties shippers and others who make the necessary experiments, because when juries or arbitrators have to decide on cases of death by misadventure or damage to produce, there is always a tendency to deal harshly with any departure from old methods.

The logical sequence of Pasteur's discovery should be a radical change in the method of storing grain and indeed nearly all other food products, and it would appear that the air in storage chambers, at sea or on land, can be more economically sterilised with carbonic acid gas than by any refrigerating process, and the subject being of national importance calls for proper investigation. Yours truly,

William Goodwin, of Buenos Ayres.

London, September 21st, 1900.

■ **The** immense wool warehouse of the Magasins Generaux Compagnie, Roubaix, France, has been totally destroyed by fire. **The** damage is estimated at nearly £200,000.

THE DAIRY.

Frome Cheese Fair.

The great autumn cheese fair at Frome was held in the Market Hall on Wednesday, the day of the Frome District Agricultural Society's Show, which took place near the town. Upwards of eighty tons were pitched but this is slightly below the average. The market was crowded as ever, and there was a large number of dealers, both old and from a distance, in attendance. The largest proportion on sale was Cheddars, and the quality was variable, consequently trade was not so brisk as was expected, and prices were 2s. to 4s. a cwt. less than quoted last month. Of heavy Cheddars sold from 54s. to 56s., a few fine lots, including some in the cheese for competition, realising from 60s. to 64s. Some cheese are now in manufacture, so as to be procurable; loaves were disposed of at from 50s. to 56s.

Whitchurch Cheese Fair.

The September Cheese Fair held at Whitchurch on Wednesday was well attended by buyers, and the pitch was a fair average one. Today's cheese were well up to the standard of late quality, and eagerly sought after by buyers, but those which were over-kept and of medium quality had to be sold at a reduction of 2s. to 3s. per cwt. The cause of this was an over-supply of cheese keeping their cheese for better prices, the cheese being of quality in the meantime. Prices were: 64s. to 70s.; medium and lower, from 50s. to 62s.

Molassine.

"Molassine" is the name of a combined food and condiment for horses, cattle, sheep, and pigs, which has just been introduced into this country, although for some time past largely used on the Continent, the annual consumption having within the short space of five years grown from 26,000cwt. to 1,200,000cwt. This fact speaks volumes for the feeding value of "Molassine," and owners of all classes of live stock would do well to obtain prices and particulars from the Molassine Company, Limited, 36, Mark Lane, London, E.C., who have just issued a pamphlet containing some excellent testimonials from well-known breeders after having given the preparation a trial with most satisfactory results. Expert opinions show from a hygienic point of view that the use of "Molassine" increases the appetite, aids digestion, and gives to the horse greater strength and working power. It is also recommended as a cure for colic, diarrhœa, etc., and from the nature of its ingredients improves the animal's general condition, imparting a smooth and glossy coat. "Molassine" is used in the stables of the Emperors of Germany, Russia, and Austria, and has also been adopted throughout the German Army. "Molassine" contains about 35 per cent. of sugar and nitrogenous and other digestible substances, in addition to the usual mineral matter contained in fodders, its comparative feeding value given in units being as follows:—Oats, 75.1; barley, 83.8; bran, 83.6; hay, 43.9; "Molassine" food, 85.29. "Molassine," which is a British manufactured article, should commend itself to owners of all classes of farm live stock, the present growing demand forecasting for it a prominent position amongst the many well-known animal-foods already in the market.

Market Weighton Fair.—The September Fair at Market Weighton took place on Tuesday, when there was a fair sprinkling of horned stock, and the sheep numbered more than for years past. There was a fair attendance of buyers, but the prices asked for grazing lambs was very high, and many were left unsold. Mr. John J. Kempley offered by auction a quantity of rams, ewes, and gimmer shearlings. The rams were from Mr. J. Thompson's (Wauldby) flock. Mr. J. Watson's ewes made 39s. to 42s.; thirty-five gimmer shearlings from Mr. C. Mitchell (Enthorpe), 47s. to 52s. each. Mr. Kempley disposed of thirty cross-bred grazing lambs from the Hasgrove Hall estate at prices ranging from 27s. to 32s. each. Mr. S. Sharp offered a quantity of sheep, which made the following prices:—Gimmers, 52s. 6d.; ewes, 25s. to 34s.; rams, £5 10s. to £6 each.

Stamford Bridge Fair.—A very large number of cattle and sheep changed hands at Stamford Bridge on the 22nd inst. During the afternoon a strike was noticed pending in a paddock at Bridge Farm, in the occupation of Mr. F. A. Vaizey, and in a very short time a considerable crowd had assembled. The fire had obtained a good hold of the stacks, and attention was instead turned to the buildings, which, with but a slight exception, and also fourteen stacks of wheat and barley, were saved. In all fourteen stacks were burned down, eleven of these consisting of wheat, barley, beans, etc., the other three being straw stacks. The cause of the fire is unknown, but as some men had been working in a field adjoining the stacks it is thought likely that some lighted matches may have done the mischief. The damage amounts to about £2,000, which is stated to be covered by insurance.

By LUPULIN.

Home Notes.

The Borough.

I do not know whether the election can be held entirely responsible for the uneventful character of the hop trade during the past week, but it is a fact that I am sorry to record that business has been very slow, and comparatively little interest is being manifested by buyers in the new crop. They are still looking after yearlings and paying full prices for them, but they are not making satisfactory offers for new hops, and it is generally admitted that hardly ever has the end of September arrived with the completion of so little business. Rightly, as I think, growers are firm in their demands. They know how general is the shortage of the yield, and they seem, this season, to be fully aware of the strength of the position they occupy with respect to the real value of their produce. It is therefore most described that they show no sign of weakness. If ever there were a season in which they were justified in holding out, it is certainly the present one. Intelligence from every quarter of the hop-growing world confirms and accentuates the estimates of small crops, and despite the independence arising from the possession of some stocks now being shown by brewers, they must be brought to market by the necessities of their future requirements, and it is unquestionable that as soon as they begin to operate the present and even the advanced views of growers will most certainly be gratified.

On Saturday last I found some indications which lead me to think that we shall hear of developments in the desired direction within a few days. There was more inquiry then had been previously met with. More readiness to entertain quotations was apparent, and I look for enlargement of this movement in the course of this week.

A Violent Attack

upon the Borough system of trading in hops appeared in an article on agriculture in the *Standard* last Tuesday. There was some truth in the writer's statements, but very much extravagant exaggeration. He described the methods of the trade as "atrociously bad" and "abominable," and made certain assertions with respect to the relationship existing between factors and merchants, the errors in which proved that he could not be fully conversant with the facts of the case.

I have consistently advocated the desirability of some changes in the system of business. For instance, I cannot understand the necessity for the intervention of two profit-making traders between the producer and consumer of hops, and still hope to see the time when the transfer of our produce will be more direct. The present system has, however, existed so long, and seems to be accepted as permanent and necessary, that we should rather try to see its advantages, and, where necessary, improve it by reasonable reforms.

All growers must admit that the factors are frequently very serviceable to them. There are cases, unfortunately, perhaps, too many, in which factors render great help in the way of financing their clients, and I have reason to believe that they do not usually exercise the power they thus gain to the detriment of the interests of growers. It would be better if all temptation in this direction were removed by the abolition of this system of advancement of money. But it is as it is, and is doubtless appreciated by those who need its help. In the matter of warehousing the present system is also convenient to growers, and I have no doubt that if factors' books were examined the balance between the rentals received and the expenses incurred would generally be found on the debit side. There are these good points to be found, and the factors deserve that they should be recognised.

The scale of remuneration should, I think, be put, in the interests of growers, on a different basis to the present. Their commission should be calculated by a percentage on the actual amount of the transaction, instead of, as now, being alterable by intervals of 20s. per cwt. in the price at which the hops are sold.

But whatever may be the objections to the system which now prevails in the Borough (and I do not for a moment suggest there are not some), it certainly does not call for such strong adjectives as I have quoted. I am sure there is not a reasonable grower who would endorse such expressions; therefore I feel impelled to protest against them, especially as having included them in the same paragraph in which the writer noticed the report of one Association, he appeared to make the N.A.E.H.G. responsible for them.

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interst and benefit to the members of the society*

Foreign Notes.

Nuremberg.

The activity that marked the opening of the trade in new hops, gave place during a few days to comparative quietude, during which quotations were slightly relaxed. But it has been succeeded this week by a resumption of demand, with the establishment of corresponding firmness in values. The present tendency of the market is towards higher prices, but its future course depends almost entirely upon the stocks held by breweries, concerning which there appears to be some difference of opinion. From the information which reached me before the picking commenced, I was convinced that the reserves at the command of brewers were exceptionally small; recently I have been told that they are well supplied, and that for this reason they can control the market according to their wishes. The course of business thus far hardly supports this latter view, and, therefore, I am inclined to believe that this statement does not possess sufficient value to affect the outlook for a gradually hardening market, this condition being generally expected.

The Latest Quotations

for best qualities at first cost are given as follows:—Marktwaare, 80s. to 90s.; Hallertaus, 100s. to 115s.; Wolnzachs, 100s. to 125s.; Wurtembergs, 105s. to 115s.; Spalts, 115s. to 130s.; Saaz, 140s. to 150s.; Badens, 95s. to 120s.; Alsace, 85s. to 100s. per cwt.

"Le Bulletin des Halles,"

an important Parisian journal devoted to agricultural market matters, quotes from a German authority, which estimates the world's crop this year at 1,940,000cwts., being nearly half a million cwts. in excess of the estimate of our English Hop-growers' Association. But this total is arrived at by making the English and Belgian crops much larger than they turn out to be, and by a somewhat extravagant estimate of the yield in America. The *Bulletin* is not able to confirm this high figure, which certainly surpasses all the calculations I have yet examined, and the hop contributor of the French journal adopts as more correct the medium total of 1,746,000cwts. Even if this latter figure be realised, a marked and serious deficiency on the present year must be evident, as it is admitted by most of those best qualified to judge, that the world's consumption will exceed two million cwts., and that after making full allowances for the unused surplus of the 1899 crop there can only be sufficient available hops to meet the requirements of consumers, while it is more than possible that before the next crop is gathered there may be an absolute dearth of supply. Therefore I fail to discern any reason for the anticipation of lower prices, and can only argue from the present aspect of affairs that in every hop market values must necessarily be enhanced as the season progresses.

Belgium.

The speculative market on the Brussels Bourse has receded about 2½ francs this week, and in consequence of this "bear" pressure growers, who were compelled to sell, have been obliged to lower their demands. There are sellers now on the Bourse at 80 francs, and buyers at 77½. But in the country districts values are somewhat higher, being 85 francs in Poperinghe and 80 francs in Alost. Considering the very limited yield which the completion of the harvest has disclosed, and the generally excellent quality of the later pickings, I am prepared to hear of a reaction from the present retrograde movement. When the "bears" have been satisfied, they will probably change their tactics and appear upon the scene as "bulls," pushing quotations upward. It is an unfortunate fact that the Belgian hop trade is so much at the mercy of these gamblers, who control and manipulate prices at their pleasure, regardless of the actual value of the commodity.

Burgundy.

The crop being a very small one, and the average quality being quite satisfactory, prices are steadily advancing, and now stand at 100 to 110 francs for 50 kilos, with a distinct tendency towards further improvement.

America.

A very firm tone characterises the New York market, and the values of both old and new hops are gradually moving upwards. The supply of yearlings is very small, and is steadily going into consumption. Choice '99's are now quoted up to 15½ cents, and reports from Washington show that buyers have advanced their offers for contracts on the new growth by 20 per cent. since picking began.

The yield of certain Californian ranches, concerning which I have reliable information, proves to be considerably less than the original estimates. These were expected to produce 5,800 bales; at the commencement of picking they were set at 4,400 bales, and the actual produce is only 3,800 bales. This example is an index to the general crop of California, but Oregon is expected to harvest fully as much as last year, the estimate of the hop association in this State being 75,000 bales.

The Production of Beer

in the U.S.A. is increasing rapidly, the revenue from this source in July last being nearly 700,000 dollars in excess of July, 1899. The total number of barrels brewed in the year ending June 30th, 1900, exceeds the output of the previous year by nearly four millions, or about 10 per cent. This enlarged consumption, in connection with the limited crop, will necessarily bring exports to Europe down to a very small figure.

The Carriage of Hops to London.

Mr. Howard Kennard, of Tilden, Marden, writes to the *Kentish Express* as follows:—"I think it is quite time the hop-growers of Kent made a stand against the most unfair treatment they are receiving at the hands of the South-Eastern and Chatham and Dover Railway. Recently I sent twenty-seven pockets of hops to Marden station, arriving by nine o'clock. The stationmaster informed my waggoner that orders had been received by him that no hops were to be taken at Marden station until further orders. On my man's return I sent him with the hops to Maidstone, with the result that after refusal at both stations he had to unload at a warehouse at a charge to me of 6d. per pocket. Last season it was almost the general thing for one's horses to have to wait at Marden Station from the morning of one day until mid-day of the next to get unloaded, because of no trucks, or if there were trucks there were sure to be no waterproof sheets. This seems very one-sided when compared with the conditions of conveyance issued by the railway company, of which I will quote a part:—'One hour will be allowed for the detention of each vehicle when at the warehouse of the consignee, and if not discharged by the time the hour has expired a demurrage charge will be made of 5s. for every hour or fractional part of an hour up to four hours. If the vehicles are not unloaded at the expiration of four hours the hops will be taken away and warehoused at the expense of the consignee.' Before the amalgamation of the two lines we generally had a remedy, as the L.C. and D.R. were only too glad to get anything away from the S.E.R., but at the present time

I think you will agree with me that our only remedy is to forward our hops by water from Maidstone. I have this morning received a letter from Messrs. Storr and Co., saying that they are willing to take my hops to London at a charge of 1s. 8d. per pocket, this includes insurance and all expenses to factor's warehouse, and is at the rate of about £1 1s. 8d. per ton, taking thirteen pockets to the ton; but then there is the overweight and also extra gain in travelling through damper atmosphere. The rail charges are:—Maidstone, 15s. 2d. per ton, 4d. per pocket for delivery to warehouse in London. Marden, 14s. 6d. per ton, 3d. per pocket delivery."

Hops in their Botanical and Commercial Aspect.

An interesting work, entitled as above, written by Emanuel Gross, Professor at the Higher Agricultural College, Tetschen-Liebwerd, and translated into English by Charles Salter, is before me.

The scheme of the author is to present in a condensed form all that is known about hops, especially from the German aspect of the matter, and with the assistance of several scientists and practical men he has well accomplished his task.

In the course of his sketch of the history of the hop plant and its application to brewing in past years, he remarks that "the introduction of hop-growing into the United States marks a turning point in the history of this industry, the consequences being adverse to the interests of European growers on account of the quantity now sent over," and concludes that, "notwithstanding the greater intelligence nowadays bestowed on the cultivation of the hop, the position of the grower is far from being a bed of roses."

Following upon the recital of these historical facts, we meet with a lengthy essay upon the botanical features of hops, and the course of their growth, noting that the plant is diœcious, the male and female being separate individuals, but as no agricultural value attaches to the male hop, the saying of Professor Lintner is quoted: "A hop garden should resemble a nunnery, all males being excluded." Numerous and well-executed engravings illustrate this section, which conveys much valuable information.

The varieties grown are classified as red, green, and pale green hops. The most celebrated for fine and aromatic odour are said to be the red hops, grown in the districts of Spalt and Saaz, but these do not yield more than 3cwt. to 5cwt. per acre, although it is found they are more profitable than the green sorts, which give a heavier crop, because of the higher prices they command. The Dauba district of Bohemia, Neutomische, and Rottenburg produces principally green hops, with an average yield of 10cwt., but the aroma is inferior, and tinged with a smell of garlic, which reduces their value. In North Germany, and to some extent in Bohemia, the pale green variety is found, and, given equality of situation, these are superior in character to the green sorts, while for productiveness they stand between the red and the green.

The red or golden Saaz hop is singled out as undoubtedly the best of its class, being richest in lupulin and finest in aroma, but is only met with in perfection in its native district. The writer gives the premier place amongst English varieties to the Goldings, which he considers occupy in their own country the same position as that filled by Saaz hops on the Continent.

In the chapter dealing with "injuries to growth" we find a copious description of malformations, diseases produced by conditions of soil or climate, vegetable and also animal enemies, with all of which the grower has to contend in a greater or less degree. For instance, the formation of barren cones is attributed by Kraus to too lavish dressings of nitrogenous manures. Honeydew is described as being of two kinds, vegetable or animal, the former being sap excreted by the leaves and stems under rapid and extreme fluctuations of temperature, and the latter is the excretory product of the aphis. The cryptogamous parasites infesting the plant, which are the cause of the most serious anxiety, are the black brand or smut and the white mouse, the latter being described as "the dreaded foe of the hop," for which the only remedies proposed are flowers of sulphur, although some good results are said to have been obtained by spraying thoroughly with a half per cent. solution of bicarbonate of soda. Evidently Continental planters are not free from the troubles which are found in English gardens, as amongst the animal enemies of the hop mentioned are the familiar May bug, wireworm, ghost moth, ground beetle, weevil beetle (very destructive in Styria), nematode or eel-worms, red spider, aphis, hop fleas, and several other pests, whose ravages are more or less dangerous to growth and development.

In the section devoted to cultivation the importance of favourable climatic surroundings is emphasised, it being admitted that "the hop cannot stand sharp and oft-repeated fluctuations of temperature, their occurrence invariably resulting in evil consequences; therefore any district subject to marked contrasts of heat and cold must be considered as fundamentally unadapted for hop-growing." Again, the value of light to growth and ripening is demonstrated by the habit of the wild hop, which climbs rapidly upwards, the flower bearing branches exhibiting an unmistakable tendency to grow out of the overshadowing bushes and develop their flowers and cones in the open, free and unshaded.

Some carefully prepared tables are included in this section of the work, showing the amount of distribution of warmth and rainfall in the hop growing districts of the world, and the influence exercised thereby upon the crop.

Soils, selection of hops suitable thereto, the application of manures, and the various methods of cultivation are subjects which occupy many pages of the book, the sum of the matter being found in the following sentence: "The endeavour of the brewer to employ the best raw material in the production of his beer is undoubtedly a weighty circumstance which should induce the grower to prefer the finer varieties of hops, and only to cultivate the coarser though more productive sorts so far as economic conditions render this course imperative."

Want of space forbids me enlarging upon various other interesting details contained in the 330 pages of which the book consists. Suffice it to say that the various systems of curing in vogue on the Continent receive full notice, and are illustrated by numerous drawings of kilns, etc. Statistics of production throughout the world are given, the trade customs connected with the industry are described, and certain conclusions for the furthering and bettering of the position of Continental growers are set forth, which, as they appeal with equal force to English planters, I summarise for their edification.

It is advised that:—

1. Area under inferior sorts be restricted in favour of better varieties.
2. Experimental gardens be established for investigation of all the obscure questions connected with hop culture.
3. Careful picking, grading, and drying be constantly practised.
4. Cost of production be reduced as far as possible.
5. Intellectual status of the industry be raised, by means of lectures and meetings, etc.
6. Hop shows and competitions be frequently organised.
7. Unscrupulous middlemen be rooted out, by growers uniting to form sale associations.
8. Adjustment of imports and freight tariffs affecting hops.
9. Regulation of the conditions of agricultural credit, to relieve farmers from the necessity of compulsory sales.

I commend these excellent proposals to the attention of my readers, and can assure them that if they decide to purchase and peruse the work I have briefly noticed they will find that their outlay and trouble will be amply recompensed.

The publishers of the book are Messrs. Scott, Greenwood, and Co., 19, Ludgate Hill, London.

BARLEY AND MALT.

By Hordeum.

The Excise Returns.

The forty-third Report of the Commissioners of Inland Revenue is just published, and as usual it gives much interesting and valuable information. The chief point, as it has generally been around the Beer Duty, which, whilst being one of the largest direct sources of revenue is also one of paramount interest to several important sections of the community, notably barley growers, maltsters, and beer brewers.

The Commissioners referred at length to the large loss from the collection of the duty from beer instead of malt in the twenty-fifth report (1865), since which they have been content from year to year to give statistical details of a more or less incomplete and puzzling type.

This year they give more than a page of explanatory matter, which throws a good deal of light upon some of the little known difficulties attending the collection of the Beer Duty, and of the remarkable results which have followed its imposition.

The Repeal of the Malt Tax

is described as "certainly, from an administrative point of view, the greatest fiscal change effected in modern times." Its financial aspect is naturally the point that appeals most to the Commissioners, but they also refer to the continuous decrease in the number of brewers as the most noticeable feature in the brewing trade.

The number of brewers for sale has declined from 22,000 to under 7,000, but this decline is pointed out as following a steady diminution from 1838 to 1880 from 49,200.

With private brewers the falling off is still greater, as, whilst the number in 1882 exceeded 110,000, it now stands at less than 13,000.

The amount of beer brewed and duty paid has just as steadily increased as the number of brewers has diminished, although the Commissioners quite naïvely observe that "the Revenue derived from beer-duty did not—contrary to expectation—at first exceed the amount derived from the Malt Tax, and it practically remained stationary until 1888." On May 17th, 1888, the use of

Saccharin was Prohibited!

It was three years earlier, the dilution of beer by brewers and retailers had been made illegal, so there need never be any confusion of the fiscal influences of the dual restriction.

It is much to be regretted that dilution by brewers in the practical sense is not more seriously regarded by the Excise authorities, if for no other reason than for the sordid point of view of protection of revenue. It has long been contended in these columns that the gravity of beer is steadily being reduced to the grave disadvantage of barley-growers and maltsters, together with much loss of revenue and fraud upon consumers. When the duty was raised six months ago I pointed out (April 2nd last, page 394 *M.L.E.*) "the desirability of an additional column in the returns giving the actual number of gallons declared (or brewed), instead of the perpetuation of the absurdity of estimating the number of barrels made."

In the returns just issued this has been done for the first time, and at last we have an index to the amount of beer actually made

As might be expected and I have persistently claimed would prove to be the case—

The Official Standard

is exceeded in practice. On page 23 we have one table showing the official number of barrels of beer said to be brewed each year from 1891 to 1900, calculated at the standard gravity. This is followed by a statement of "the number of bulk or liquid barrels of beer without distinction of gravity" actually made.

The nominal number of barrels for 1900 is 36,578,156, but the actual is 38,373,449, so that British public really consumed no less than 2,895,293 barrels more beer than had ever been disclosed in any previous return.

The Commissioners are to be deeply thanked and very heartily congratulated upon the production of these figures. Had they been given ten years ago the beer duty to-day would produce nearly fifteen millions instead of the twelve and odd millions gathered in. Nothing is said in this report about the immensely important alteration in the amount of duty levied when raw grain, maize, rice, and other substitutes was put upon

A Fairer Basis of Charge

than heretofore when it was allowed to be charged as malt at 42lb. per bushel. Nor is anything suggested to fix the gross loss to Revenue inflicted by the existing method of charging sugar used as "priming."

All these are points calling for attention and remedy. Happily the Excise authorities make it a point of conscientious duty to do their utmost to protect the Revenue and gather in the interests of the king. The report goes to the legal cases seeming to show the need of supplementing such as pool sales with a back duty to give support to receipts in account books for moneys collected on behalf

of the Bank, and so on. All this is eminently right and proper, but to guard against the suggestion of ability to strain at gnats and swallow camels, vigilance must be shown and intelligent understanding brought to bear upon the vast sums lost now upon the sugar used as priming, and which accounts for so large a proportion of the nearly three millions of barrels of beer which pay no duty.

Another grave defect is the publication of the figures now of a year ago indiscriminately mixed with duties charged to the end of February and March 31st last.

Barley and Beer.

The following letter, forwarded by Mr. Jasper More to the *Shrewsbury Chronicle*, though addressed to Shropshire farmers, appeals most strongly to those who live in other counties:—

"Sir,—I find the question of when and where shall I sell my barley? foremost in the minds of Shropshire farmers. The barley competition at the Brewers' Exhibition in London, I believe, gives one of the best opportunities for sale. Entries close on the 11th of October at 44, Cannon Street, London. Some of the farmers, I find, say their crop is very good, but the colour not so light as last year. Is not this remark founded on misapprehension? I am told by good brewers that the colour, except in extreme cases, makes no difference whatever. It may be true that at restaurants the taste is for very light coloured beer, but let anyone notice the beer sold at public-houses to the real beer drinkers. It is not light-coloured at all. We don't hear of maize being rejected because it is not light coloured. Why should it be used in preference to barley when it is known that the beer drinkers don't like it? The ordinary people in the country feel more strongly on this than on any point. Those who brew at home never think of using anything besides barley malt, hops, and a little sugar. About 1,200 houses in Shropshire thus brew free, or only with a nine-shilling licence, and why more don't take the trouble to do so when they are anxious to have beer that is brewed only from barley, malt, and hops may be accounted for by the fact that they don't know how easily it is made. If barley, malt, and hops could only have been conveyed to Bloemfontein, I am sure that many cottagers' wives in my division could have brewed such light and pure beer from it as would have saved the extraordinary number of cases of enteric fever there. Temperance advocates (as we all are, without also being teetotalers) should say how they would deal with a case where there is only polluted water and no firewood to boil it, except what is taken from pulling farmhouses to pieces. I tried to draw attention to this question at the dinner given to Mr. Green at Shrewsbury before the Yeomanry went out to South Africa. Our Yeomanry have been singularly free from enteric fever, but there were said to be 13,000 cases in Bloemfontein. What soldiers should drink, and how to convey it to them, will be one of the interesting cases arising out of the recent war. I see eminent medical authorities are explaining in the Press what are the bacteria in water that cause enteric fever. What to drink so as to avoid it where there is any chance of the water being polluted is certainly an important question for young people. After the age of forty-five, Sir Herbert Jenner told me, the constitution is not liable to it.

"With regard to the barley competition at the Brewers' Exhibition, anyone has merely to write to the secretary of the exhibition, 44, Cannon Street, to enter for competition. He must be prepared to state what is the soil and subsoil of his field, what were the preceding crops in 1899 and 1898, what seed was sown, is sweated or steeped before planting, what manaure was used, and the date at which it was used, and the quantity per acre, the dates of sowing and cutting, the quantity grown equal to sample, the name of the maker of the dressing machinery, the name of the maker of the threshing machine, the price of the barley, and how much is offered for sale. "R. Jasper More.

"September 18th."

Sale of Coach Horses.—The sale of the stud of coach horses which have been working the Perseverance during the past season on the London and Dorking road attracted a large gathering of coaching men at Aldridge's Repository on Wednesday. The competition was very keen, and some excellent prices were recorded. The top figure was obtained by the very shapely brown gelding Benito, a capital wheeler, which eventually changed hands at 165gs. Included in the sale was the handsome chestnut team which was selected to represent the stud on the occasion of the stage coach competition at the Ranelagh Club on July 7, and which then won the challenge cup. This team made the following prices: Cragsman, by Dalesman, chestnut gelding, leader, 150gs.; Diamond, chestnut gelding, leader, 140gs.; Marguerite, by Commander, chestnut mare, wheeler, 150gs.; Charmion, chestnut mare, by Agility, wheeler, 155gs. In all twenty of the horses realised 100gs. and over, and the thirty-five fetched an aggregate of 3,635gs., or the average of over 103gs.

MILLING.

This Year's English Wheat.

Since these notes last appeared the weather has been more suitable for threshing, and more wheat has been on offer. Prices are quite firm, and, indeed, have advanced for very good samples. Flour is 6d. per sack of 280lb. dearer, and all offals are making good prices. In some parts broad bran is making as much as £6 10s. per ton, and fine sharps quite as much, or even more. It is universally acknowledged that the great bulk of the crop is inferior to last year, and so must be dried before being used. In fact, the condition is very irregular, while smut is too often seen. In a recent article the writer emphasised the necessity of having dryers, even where no washing plant finds a place. At the same time, a good many country millers have neither, and yet they will find that they cannot satisfactorily grind much of this year's crop without some sort of preparation. Fortunately, in the absence of machinery there is a method which may be employed, provided the miller can secure some sort of dry, absorbent wheat like Cali or Chilian. If equal proportions of English and one of these wheats be taken, perfectly mixed, and placed in bins or silos (or even on the floors of warehouses, which would allow for occasional turning), the wheats become more uniform the longer they lie together. The process may be employed if the English be not too damp and out of condition, when it will give up a portion of its moisture to the dry kind, which will readily absorb it and become more like the former.

Conditioning by Mixing.

Even where they come to the mill in good condition, soft wheats, such as English and the softer Canadian and Dantzic sorts, will not lie for any length of time without being covered with mildew and injured; so that in the best of seasons it is always a good plan to mix soft wheats with extra dry kinds. How much more, then, is it necessary when they are extra soft and moist? Some millers who have dryers as a part of their plant send all English wheat through them, and then mix it when it is hot and sweating with some dry sort, and it is wonderful what good results may be obtained by this treatment, provided due care has been taken in regard to the temperature in the dryers.

When the process is carried out to secure safe storage also the assimilation is easily seen even after a week or two, while in twice or three times that period a still greater uniformity is observed. Even in good seasons these soft wheats are a constant loss and worry, and unless they are mixed in this manner they need constant aeration and turning. But a good and efficient dryer settles the whole question, and in the present season, and with such native samples as we are now getting, if once passing through the machine does not have the desired effect, the operation should be repeated.

Washing for Smut

In the absence of a washing plant smutted wheat must be left severely alone, as it is impossible to perfectly get rid of this bad impurity without immersion. Neither should inexperienced millers attempt to wash soft wheats like English, or they will come to grief. In this case as little water should be used as is necessary for the operation; the wheat should only be immersed for a very short time, and it should be dried as quickly as possible at not too high a temperature. It requires a great deal of experience and skill to wash soft wheats, and for this reason some millers prefer to dispense with the process, even in cases where they are not afraid to wash the harder and dryer kinds. On the other hand, some millers wash all wheats, sometimes for other reasons than cleansing, believing that a proper application of water and heat will improve the resulting flour both in quality and percentage.

Garlic in Wheat.

There is one other impurity in home-grown wheat, which is also occasionally found in Red Winter, which is very tiresome to eliminate, and that is garlic. Fortunately, it does not occur so frequently as was the case some years ago, neither does it often occur in excess. In the latter case the mischief is soon found in the mill. It is a soft raw substance, with a very objectionable flavour, very much like that of onions. As most millers know, its worst effect is on the rolls, which become gummed over, needing constant cleaning. Every succeeding machine feels the effects; silks cannot dress properly, and the miller who is working on wheat of this kind will find that he can neither get a good yield nor a well-cleaned bran. There have been special machines on the market from time to time for the removal of garlic, but, so far as the writer knows, one and all have been a failure. When it is of the same size as wheat it is not easily removed, and especially when the wheat comes in damp. Strong air currents do some good, but the best plan to remove it is to well dry the wheat, The drier the latter, the drier will be the garlic bulbs, making them more likely to be lifted out by aspiration.

The Different Strains on Shafting.

With regard to the transmision of power about the mill it should be remembered that all shafting is subject to two different strains—a bending strain, on account of its own weight and the weight of the pulleys on it, as well as of the pull of the belts, and a torsional or twisting strain, owing to its rotation. It is the former which mainly causes friction to avoid which as much as possible it is necessary to have perfect alignment, the correct distance between bearings, which was mentioned in my last article, and proper lubrication. It has been shown that the power absorbed in driving shafting varies from about one-tenth to one-fifth of the whole power derived from the engine, and in view of the present price of fuel this is a matter worthy of most earnest consideration. It will therefore be understood how necessary it is to have all shafting well designed, carefully erected, and well lubricated. It will also be recognised that the diameter plays a most important part in the erection of shafting. Just as there is a correct distance between the bearings of shafting of different diameters, so the diameter plays a most important part in the saving of power. There is no need to give a formula; most engineering manuals give tables of horse powers which shafting of different diameters will safely transmit at various speeds. So really the three things to be considered, and which can be found out from these tables, are the power to be transmitted through the shafting, the speed at which the shaft must run to safely do the work, and the diameter of the shaft itself. The nearer perfection is reached in these three conditions, the less will be the friction and the greater the power saved. Friction is a necessary evil, and cannot be entirely abolished, but it can be minimised considerably in many mills, with a double advantage—the saving of power and the lessening of danger from fire.

Miller-Farmer.

Roller Mills Spoil the Bread and Destroy the Teeth.

The following letter is copied from the *Lancet*, the leading medical journal. It deals with a subject of great importance, but which the general public fail at present to estimate at its proper value:—

"The Decay of Teeth Committee of the British Medical Association in their report to the council suggest among the causes that by the civilised methods of preparing food thorough mastication is rendered unnecessary, and that this limitation of the action of the muscles of the jaw is further shown by atrophy of the jaw, as a consequence of which the teeth become overcrowded. These statements appear to only half meet the case. With bread made from roller-flour additional mastication is really necessary in order to obtain a large supply of saliva to promote digestion, and it is quite possible that the low nutritive value of roller-flour is a great factor in atrophy of the jaw. To properly appreciate the difference in the nutritive value of roller-flour as compared with stone-made, it appears necessary to briefly consider the modes of manufacture. In

Old Stone Mills

the wheat to be ground is fed in through a hole in the upper or running stone, when by reason of the dress or cut put into the surfaces of the stone, assisted by centrifugal force, the wheat becomes pulverised on its way to the periphery or skirt of the stones, whence it passes through mechanical sifters and dressers, and the coarse parts are separated from the flour. By this method all parts of the wheat grain are cut up more or less, and the resulting flour contains particles of all parts.

"In the modern invention,

The Roller-Mill

the wheat is at first only rolled to smash it, in order to separate the kernel from the husk and the germ, and the operation is repeated several times between fluted iron rollers, until the object aimed at is obtained, and then the parts of the kernel pass on to be ground between smooth iron rolls. This rolling is succeeded by dressings in cylinders covered with silk, through which the flour made between the smooth rolls passes, and the rollings and dressings are repeated until all the flour is extracted and only the pollard is left. By this method only parts of the kernel are ground up, and the resulting flour does not contain any particles of husk or germ. The husk, although very rich in lime salts, is very indigestible. The lime salts contained in the germ are easily assimilated. The germ is the vital part of the grain, and acts very like a stomach for the young wheat plant, the diastase it contains converting the starch of the kernel into grape-sugar, which helps to nourish the young plant. One part of the diastase contained in the wheat germ will convert a thousand parts of starch into grape-sugar. The starch in the dough must be gelatinised or scalded in order to obtain the full effects of the diastase upon it. The heat at which wheat-starch becomes gelatinised is 150.5 degrees F. Thus, when the dough is placed in the oven and the required heat is reached, the starch cells burst, and the diastase acts upon it. After the heat of 180 degrees F. has been reached, the power of diastase ceases.

"Since starch forms about 60 per cent. of wheaten flour the

Nutritive Quality of Bread

is considerably lowered by removing the germs in roller-milling. It can be easily understood that if we get the dough at a point at which the starch is gelatinised, and at the same time have a certain amount of diastase intermingled with it that will convert a portion of the starch into grape-sugar, we have succeeded in obtaining a bread which will be easily digested. The bread made from flour ground in a roller-mill, even if well masticated and swallowed with a good supply of saliva, is not so easily digested and assimilated as when the flour is obtained from a stone mill.
